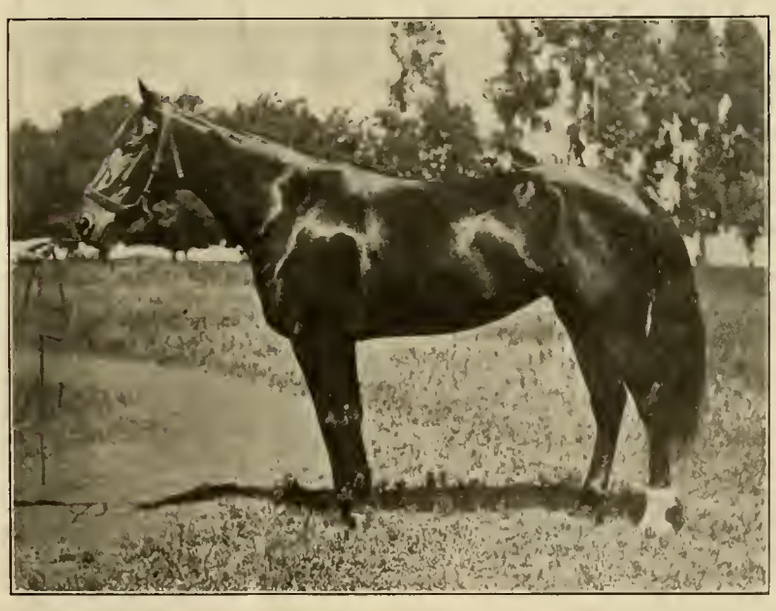
BREEDER AND SPORTSMAN

VOLUME LIII. No. 1.

+636.1
B74
53
147847

SAN FRANCISCO, CAL., SATURDAY, JULY 4, 1908. Subscription—$3.00 Per Year.



RAMONA S.

Bay mare by Zombro 2:11. Owned by E. A. Swaby, Dixon.

Blue Ribbon Live Stock Sale

To be held by the

Tulare County Agricultural Association

DURING THE ANNUAL FAIR AT

Tulare, Sept. 21 to 26, Inclusive

STOCK BREEDERS

who desire buyers for their Horses, Cattle, etc., should send at once to the Secretary for Entry Blanks, and have stock listed for our

BLUE RIBBON SALE

which will take place each evening of the Fair, conducted by a first-class auctioneer.

REMEMBER, each evening under electric lights

W. F. INGWERSON, Sec'y. H. WHALEY, Pres.

No road too rough. Has cushion tires and carries weight over the wheels, not on the axle. It has the strength. Never a tired driver after a long workout day. Why? The long spring makes it easy riding, and does away with all horse motion. Furnished with Pneumatic tires.

McMurray

Sulkies and Jogging Carts

Standard the world over.

Address for printed matter and prices.

W. J. KENNEY, Sales agent for California. 531 Valencia Street, San Francisco

McKINNEY 2:11¼ Fee, $300

WORLD'S GREATEST SIRE OF EXTREME SPEED

Only sire of eleven 2:10 trotters; 17 in 2:10; 44 in 2:15; 62 in 2:20, and 92 in 2:30; and of sires of 7 and of dams of 5 in 2:10—56 in 2:30.

When writing kindly mention this journal.

The Empire City Farms, Cuba, New York.

GEORGE E. ERLIN, Prop. JAMES M. McGRATH, Mgr.

Dexter Prince Stables

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Devisadero Street Cars.)

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

Agents and Correspondents wanted everywhere for the

Breeder and Sportsman

Back East Cheap

Low round trip rate summer excursion tickets sold to Eastern points on these dates:

July 6, 7, 8, 21, 22, 23, 28, 29.
August 17, 18, 24, 25.
Sept. 15, 16.
Sept. 23, 24, 25 to Kansas City only.

Here are some of the rates:

Omaha	$ 60.00
Council Bluffs	60.00
Kansas City	60.00
Chicago	72.50
St. Louis	67.50
New Orleans	67.50
Washington	107.50
Philadelphia	108.50
New York	108.50

Tickets good for three months—some cases longer. Stopovers and choice of routes going and coming.

See nearest agent for details.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

BONESTELL, RICHARDSON & CO., 118 to 124 First St., San Francisco, Cal.

BEST FOR LEAST MONEY

JOHN MIDDLING'S

High Grade Sulkies and Carts

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

KEEP YOUR RAZOR SHARP

3 in One

Don't blame the razor if it dulls quickly. Maybe it's your fault. Rub a few drops of 3-in-One oil on your razor strop. When leather is pliable strop as usual. Any razor will cut easier, better and stay sharp longer. After using, draw blade between thumb and finger moistened with 3-in-One. This prevents rust, keeps edge smooth and keen, always sharp and ready for immediate use. Don't scrape your face. Use 3-in-One on your razor and shave right.

FREE Write for liberal free sample and special *scientific circular*. Try it yourself. 3-IN-ONE OIL COMPANY, 102 New St., New York.

THE BUTCHERS' BOARD OF TRADE is an organization of excellent standing in this community, and its affairs are managed by gentlemen who rank high among San Francisco's business men. The annual celebration of the organization of this institution, Butchers' Day as it is called, brings out the largest crowd of people that assembles at any place of amusement during the year. The Oakland race track, where the racing program of the day is held, can hardly accommodate the immense throng that fills the grandstand and overflows onto the infield when the races begin. That the public enjoy the contests provided is shown by the immense attendance which seems to increase every year, and the only criticism heard is that occasionally there is a crooked race which the directors use their utmost endeavors to prevent, but lack the power to punish the perpetrators thereof. It has come to light that there were a couple of ringers in the harness races last week, which fortunately were exposed by drivers who knew the horses, thus preventing the schemes from going through, and there were one or two drives made in races that should have been noticed and the offenders punished. That the judges would have punished the offending parties had they the power is certain. We suggest to the Butchers' Board of Trade that prior to its next annual meeting it take out membership in the National or American Trotting Association, and hereafter have all its races conducted strictly according to rule. The idea has prevailed in the past that the small purses offered for these races would not attract a sufficient number of entries were suspended horses and drivers not permitted to start, but there is little doubt but all the races necessary can be provided even though the rules of one of the parent associations should govern the racing. One thing is certain, the races would be of higher class, and there would in all probability be larger entry lists, as owners who desire to race their horses honestly would make more entries if they knew they would be protected from ringers and dishonest contestants. The program last week was so long that it was after sundown before the racing was finished and even then it had to be curtailed. The racing committee and the judges handled everything very well, declaring bets off where there was any suspicion of fraud, and refusing to allow horses to start against which protest was made, but they would find their work much more satisfactory to themselves if they had the power to suspend or expel from all tracks those guilty of dishonest racing. We suggest that the Butchers' Board of Trade give this matter consideration at its next meeting.

THE SAD ACCIDENT to Prof. M. B. Holmes the Fresno teacher, who was run over by a colt driven by Schuyler Walton at the Fresno track several weeks ago, finally terminated in the death of Mr. Holmes last week. While the occurrence was a most lamentable one, and the authorities in the discharge of their duties were compelled to hold Walton on a charge of manslaughter, releasing him however on $5,000 bail, which was immediately furnished, there is no doubt but Mr. Walton will be exonerated of all blame in the matter and discharged on preliminary examination. Those who know Schuyler Walton know him as a gentleman, strictly honest, always fair, and one who would be the very last to inflict an injury purposely. The facts of the case as developed before the coroner's jury, were that the Fresno track, which is used for the training of horses, had been given over on the day of the accident, after the hour of 10:30 a. m. to the school children of Fresno who were to hold athletic games thereon. The horsemen retained the use of the track until the hour named and were working out their horses. The children began arriving at the track at an early hour however, and while repeatedly warned to keep off until the horse training was through, were continually crossing and re-crossing the track. Prof. Holmes seeing Walton scoring down the stretch at a fast gait rushed out on the track, held up his arms and tried to stop him. Walton's colt was trotting very fast, and the driver used all his efforts pulling his horse to one side and shouting to the teacher to get out of the way. Walton was riding in a low seat cart and could not see directly in front of his horse. Prof. Holmes failed to step aside as the horse came thundering through the stretch, was struck and knocked down, and Walton was thrown to the ground, the cart being overturned. Prof. Holmes' skull was fractured, and while it was thought, after three weeks had passed, that he would recover, he died last week. The coroner's jury found that he came to his death from "injuries received from being struck by a horse driven by S. C. Walton on the Fresno track May 23d, 1908," but did not charge Walton with any crime. Walton testified before the coroner's jury that he used every effort to prevent the accident, and those who know him are satisfied that he did. He regrets the occurrence greatly. It was a very unfortunate affair and entirely unavoidable on Mr. Walton's part. The proof is abundant that no children were in danger of being run over, and Prof. Holmes must have lost his head when he stepped directly in front of the swift moving horse in his anxiety to have Walton give the school children the track in advance of the time agreed upon. The accident is a most regrettable one, but it is perfectly clear to all unprejudiced persons that Mr. Walton was not to blame in the least.

STANFORD STAKE OF 1910.

Following are the entries received June 1st for the Stanford Stake for foals of 1907, to be trotted at the California State Fair in 1910:

Frank E. Alley's b. f. Phillis Wynn by Bon Voyage-Mabel Wynn.

Frank E. Alley's b. c. Bonaday by Bon Voyage-Welladay.

"CONSIDERS THE BEST."

Mr. E. E. Kane Burke, N. Y., writes: "Some time ago I obtained Quinn's Ointment and have used it with very good results having removed a large puff from the hock joint of a two-year-old colt, I consider it the best remedy I know of for that class of blemishes." For Curbs, Splints, Spavins, Windpuffs and all bunches use Quinn's Ointment. If cannot obtain from Druggists address W. B. Eddy & Co., Whitehall, N. Y. Price $1.00 delivered.

GOOD FOR ANYTHING THAT NEEDS A BLISTER.

Gombault's Caustic Balsam is all right for anything that needs blistering. I used it on spavins with success.—H. F. Sherman, Toledo, Wash.

CALIFORNIA'S FASTEST TROTTERS.

A Glance at the Breeding of the Horses Whose Records Are Below 2:06.

The Year Book credits just 23 trotters with records better than 2:06, and of these no less than seveu, or nearly one-third the entire number, were bred and raised in California. This is a remarkable showing, but in this land of sunshine, fruit, flowers and fast horses, record breaking has become so frequent that it is almost commonplace, and attracts litttle attention from the general public unless of the extraordinary sort.

If there is any lesson to be learned from the roster of Callfornia's 2:06 trotting list, it is that a champion may develop anywhere, and that those who are striving to breed record breakers have no clearly blazed trail to follow, as each and every horse in this list was bred by a different owner, and on lines that were not the result of any established rule of mating.

The first California bred to cover a mile in 2:06 was the black stallion Directum, whose breeder, John Green of Dublin, Alameda County, never dreamed that a champion trotter would result when he sent his mare Stemwinder 2:31 to be mated with Monroe Salisbury's Charter Oak winner Director 2:17. This was in 1888, when Director had one solitary representative in the 2:30 list the three-year-old Direct with a trotting record of 2:23, made with a pound and a half of iron on each front foot. Mr. Green lived not far from Salisbury's Pleasanton Stock Farm, and the fame of Director as a race horse naturally led him to send his trotting mare to the embrace of the black stallion that was recognized as a champion of the track. Stemwinder had been bred the previous season to Dick Richard's Electioneer stallion Elector, and had produced a likely filly that was called Electrina. When this filly was three years old she was trained and started twice. At the Stockton Fair she made ber first start, but failed to win, but got fourth money and finished second in two heats that were trotted in 2:27½ and 2:28. This was in September and the following montb she took a record of 2:30 by winning a heat in that time in a race which she lost. The following year she was started twice, the first time at Oakland where she won the 2:30 class trot in straight heats, the fastest in 2:25¼, and the second time at Stockton where she trotted a mile in 2:23¾ in a trial against time. These performances of Electrina did not give any great hopes that Stemwinder would be the dam of a champion, but when her three-year-old colt Directum was put in training in 1892, he soon showed that he was possessed with the speed and gameness that would carry him to the front "barring accidents." He was raced tnat year on the other side of the mountains and returned with a record of 2:11¼ made in a race for a purse of $7.500 where he defeated all tbe best three-year-olds of that year in straight heats in 2:15, 2:12 and 2:11¼, a remarkable race. The following year as a four-year-old he started against Hazel Wilkes and Nightingale in the free-for-all at Nashville and after permitting tbem to get inside tbe flag the first two heats in 2:13¾ and 2:14, distance was waved the third heat and he lowered the world's stallion record, the four-year-old record and the trotting race record by covering the mile in 2:05¼.

This gaining of the championsbip caused every trotting horse breeder to study carefully the breeding of Directum. His sire was Director 2:17, son of Dictator and Dolly by Mambrino Chief, and his dam was the trotting mare Stemwinder 2:31, sired by the trotting thoroughbred Venture 2:27¼ out of a mare by Bennett's St. Lawrence. This Director-Venture cross was immediately made the proper thing for the production of champions, but although tried many times thereafter no horse as fast as Directum was ever produced by it.

Two years later anotber trotting star from California shot across the racing sky, and the State's second 2:06 trotter was added to the list. This was the big bay gelding Azote, hred at Senator Stanford's Vina Ranch in Butte County, and thought so little of that he was used as a work horse until Pete Robinson, one of the farm's horsemen, discovered that he could trot and induced Orrin Hickok to take him to the races. Azote began his trotting career in 1892 getting a record of 2:14½ that year, which he reduced to 2:08¼ in 1899, and then under Monroe Salisbury's management in 1895 trotted to a record of 2:04¾ and gained the world's record for trotting geldings. California breeders now saw in Azote the proper mixture of trotting blood to produce cbampions. He was by Whips, a son of Electioneer that had a thoroughbred mare for a dam, while his dam was a daughter of Whipple's Hambletonian and his grandam a mare by Speculation. Whips never got another 2:10 trotter, but out of Mony Cobb by Gen. Benton he produced that good trotter Cobwebs 2:12, and from a mare by Contractor, son of Ajax 40, he by Hambletonian 10, he got Myrtha Whip 2:09, a pacer.

Seven long years now elapsed before another trotter bred in California showed his ability to beat 2:06. The horse to break the long wait was John A. McKerron, a son of Nutwood Wilkes, and again the Director blood appeared in this exclusive list, this time through the dam of the trotter earning the record. John A. McKerron had taken a three-year-old record of 2:12½ in a race four years before and had been sold to a Cleveland gentleman. In 1892 he was started twice, both times against the watch. The first time he tried to beat 2:10 and made his mile in 2:06½. The next time he trotted his mile in 2:05¼ placing his record in the same notch as that of Directum. The following year he reduced this record to 2:04½, and became the second fastest trotting stallion in the world, wbich record he still holds. John A. McKerron was the first California hred horse of the Wilkes tribe to trot helow 2:06. He is by Nutwood Wilkes, a son of Guy Wilkes, and his dam is Ingar by Director, second dam by Echo. The combination of Wilkes and Director blood in John A. McKerron led the California breeders to look to it as the one to produce record breakers, but the following year a meteor flashed into the trotting firmament that was from an entirely different combination of blood, and set a record that has not yet been eclipsed. This was Lou Dillon the incomparable. At the close of ber first year on the turf she had a record of 1:58½, a rate of speed for a mile that no other trotter has approacbed. Lou Dillon is by Sidney Dillon an unmarked son of Sidney, and her dam is Lou Milton, the unmarked daughter of Milton Medium, he by Happy Medium.

The next addition to the State's 2:06 list was the great McKinney mare Sweet Marie, who in 1904 trotteu to a record of 2:04¾, and in 1906 to 2:02, making her the second fastest trotter bred in California, and third fastest in the world. By the great McKinney 2:11¼, the greatest sire of extreme speed in the world, the mark made by Sweet Marie was not as much of a surprise as the records made by her predecessors in the 2:06 list. Her dam is by Carr's Mambrino, a son of Mambrino Patchen, and her grandam by Vermont 322.

It was in 1905 that California got its sixth member of the 2:06 trotting list in George G. 2:05¼ a son of Homeward 2:13¼ out of Mabel by Junio, son of Electioneer, second dam by El Capitan, 2:29, son of Nutwood.

The seventh and last of the 2:06 family of California trotters is Sonoma Girl, whose wonderful campaign of last year is still fresh in the memory of every trotting horse enthusiast. Her record is 2:05¼ and she is expected to reduce this several seconds before she is retired. She is by Lynwood W. 2:20, a son of Guy Wilkes, and the second son of that horse to get a 2:06 trotter. Her dam is Maud Fowler 2:21¾ by Anteeo, and her second dam by Nutwood.

From the above it will be seen that every 2:06 trotter thus far produced in California is from a different combination of trotting blood. In the male line each and everyone however, traces to the great founder of the trotting family Hambletonian 10. Lou Dillon 1:58½ and George G. 2:05¼ both trace through the sire line to Strathmore, Sweet Marie 2:02, John A. McKerron 2:04½ and Sonoma Girl 2:05¼ trace to Geo. Wilkes, Azote 2:04¾ to Electioneer and Directum 2:05¼ to Dictator, all these being sons of Hambletonian.

The lesson to be learned from tthe blood lines of California's 2:06 list is that to breed the fastest trotters stallions must be used that descend from Hambletonian in the male line as every trotter produced in this State that has entered that list is sired by a horse that so descends. And the blood of the Hero of Chester is also potent on the dam's side. The dams of Lou Dillon, John A. McKerron, Azote, George G. and Sonoma Girl are all by sires that trace in the male line to Rysdyk's great stallion. Another lesson that tbese pedigrees teaches is that the Hambletonian blood, strong and rugged though it is, and filled with the trotting instinct, must be "fined down" to produce the hest and the fastest trotters. In each and every one of these 2:06 performers there is a goodly mixture of the hot blood of the desert, but it is far enough removed and sufficiently diluted to he an aid instead of a detriment which it so often proves when close up in the pedigree of a horse that is expected to trot fast.

Another thing taught by the breeding of these illustrious seven is that there is no royal road nor clear pathway to the production of a 2:06 trotter. As in many other lines, the stone that is rejected becomes the corner stone of the temple, and the material from which one expects to rear the most beautiful structure crumbles and falls when the weight of many stories is put upon it. Anyone who breeds a good mare to a good horse may get a 2:06 prize, but if he does not he has not drawn a blank as in nine cases out of ten the result will pay a profit on any moderate and sensible investment made in the course of the proceedings.

The worn-out and attenuated cab horse, which has so often been the butt of the comic writer, will soon he an unknown quantity in the streets of Paris. A society known as the Assistance aux Animaux has just formed a "horse committee" which, working with the proprietors and drivers' societies, seeks to provide Paris with cabs drawn only by horses in a perfect state of fitness, and driven by men who have given every proof of their competence and intelligence. A staff of inspectors will be employed to watch at the gates of the cab yards every morning and demand the immediate return to the stables of any animal which seems in an unfit condition.

According to the Horse World of Buffalo, F. R. Bain's beautiful little bay mare Zealous, that trotted a half mile to wagon in 1:04 when she defeated Dicker in a race on the New York speedway last montb, is a daughter of Zombro 2:11, and is one of the fastest and most perfect road mares in New York.

SALE OF YEARLINGS BY DEMONIO 2:11¼.

The annual sale of the yearlings by Demonio 2:11¼ took place at the Suisun Stock Farm on Saturday, June 20th. There was not a very large crowd present, there being but ten yearlings catalogued, hut the bidding was lively and James P. Martin of Dixon, who acted as auctioneer, handled the sale well. The nine yearlings by Demonio brought a total of $1,060, an average of $106, or $6.50 less than last year's average, which is a very good showing when the difference in financial conditions is considered.

In addition to the Demonio yearlings sold, a two-year-old gelding was auctioned and hrought $97.50, and a yearling by Bon Voyage out of a Demonio mare, owned by H. B. Muzzy, was sold for $160.

The summary of the sale follows:

Bay filly, foaled March 11, 1907, dam Rosebud by Fallis; George L. Flammer, Suisun, $180.

Bay filly, foaled May 3, 1907, dam Mamie Airlie by Prince Airlie; Henry Smith, Cordelia, $90.

Bay filly, foaled April 5, 1907, dam Elorita by Alban; A. D. Dally, Elmira, $107.50.

Brown colt, foaled April 2, 1907, dam Nellie T. by Dawn; L. E. Middleton, Marysville, $115.

Bay filly, foaled March 14, 1907, dam Eva; E. C. Dana, Benicia, $140.

Bay colt, foaled March 20, 1907, dam Sister by Nutwood Wilkes; Henry Eakle, Woodland, $100.

Sorrel colt, foaled April 4, 1907, dam Honora by Oro Wilkes; Frank Garnett, Suisun, $160.

Bay colt, foaled May 5, 1907, dam Olita by Bradtmoor; Gene Thurber, Vallejo, $90.

Bay colt, foaled April 22, 1907, dam Potrero Girl by Prince Airlie; Henry Eakle, Woodland, $77.50.

Two-year-old gelding, foaled April 16, 1906, dam Mamie Airlie by Prince Airlie; E. C. Dana, Benicia, $97.50.

HOW CHARLEY D. FINISHED.

A reader of the Breeder and Sportsman asks us to give a list of tbe races in which Charley D., Col. J. C. Kirkpatrick's bay stallion by McKinney, appeared last year, with the time made and his position in each heat.

Charley D. started in four races last year. His first start was at Pleasanton in the 2:20 class pace for a purse of $800 Copa de Oro won the third, fourth and fifth heats, Inferlotta the first and second. Charley D. was 2-3-4-5-3 in the summary and won third money. The time was 2:07¼, 2:07¼, 2:07¼, 2:09¾, 2:10¼.

His next start was at Santa Rosa in the $2,000 purse for 2:20 class pacers. This race was won by Inferlotta in 2:06½, 2:04¾ and 2:08. Copa de Oro was 2-2-3, and Charley D. was 4-3-2. He was again awarded third money.

Petaluma was his next start in a purse of $1,500 for pacers without records. Copa de Oro won the first heat in 2:10 and was second in the next two heats and third in the fourth. Inferlotta was secoud the first heat and won the next three. Charley D. was 3-3-3-2, again winning third money.

His last start was at Woodland in the purse of $1,000 for 2:20 class horses. Copa de Oro did not start in this race. Inferlotta won in straight heats in 2:07¼, 2:08¼ and 2:10. Charley D. was second in every heat.

THE CONCORD RACES.

C. L. Windler gave his inaugural meeting at the Concord, Contra Costa county track on Sunday, June 21st, and while the crowd was not as large as expected, tbere were good fields in each of the three events and the racing was fair. The summaries:

Road race, trotters and pacers:

Dick Perry (C. V. Perry)	1	1
Crazy Jane (L. M. Palmer)	2	2
Sligo (W. E. Bowen)	3	7
Young Setter (A. Hamburg)	5	3
Dr. Bople (J. E. Durham)	4	5
Prince Derby (C. R. Windeler)	6	4
Easter (G. Demartini)	7	6

Time—2:33½, 2:32.

Pacing, 2:20 class:

Albert S. (S. E. Burton)	1	1
Sidney Dillon (D. Hoffman)	2	2
Nellie Gans (J. Harlan)	3	3
Baby Boswill (S. Benson)	4	4

Time—2:21, 2:19.

Free for all, trotters and pacers:

Ring Rose (A. M. Ludd)	1	1	1
Neko (S. E. Burton)	2	3	2
Major Cook (W. E. Bowen)	3	2	3

Time—2:35½, 2:20½, 2:22.

CHANGE OF DATES.

Since its inception the Old Glory auction has followed the National Horse Show. The Horse Show Association has recently decided to hold its show tbis year one week earlier than usual, and we have decided that the best interests of everyone will be served by changing our dates and, as usual, to follow the show. The Old Glory will, therefore, open on Monday, November 16th. This year's sale will be a six-day event only.

FASIG-TIPTON CO.

Drink Jackson's Napa Soda.

CHARLES TANNER ON GERMAN RACING.

One of the most interesting and instructive letters that has been written from Europe on the manner in which harness racing is conducted there, appeared in the Chicago Horse Review of June 16th, and is from the pen of Charles (Doc) Tanner, the well-known Cleveland horseman. The letter contains so many good things that we give it in full:

Berlin, Germany, May 31.

Here I am among the Germans and they are the most hospitable people I ever met. I was fortunate enough to see their greatest day's racing Thursday, which was Derby Day. There were eight races on the program. The derby, worth 25,000 marks for three-year-old colts and fillies bred in Germany, resulted in a fine race and was won by an outsider, Mowe, defeating the favorites Reineclaude and Pastinak, who trotted coupled as an entry. They went eighteen yards short of two miles, which I would judge would be farther than we would care to go with colts in our country at any time of year—surely not as early as May 28th. I wish you were here to see how a race meeting should be conducted. No noisy peanut, lemonade, program, or other venders allowed. Carriages or autos are not allowed on the grounds. They must stop outside. Everything is done for the comfort of the people.

The track itself, "West End," where the races are now taking place Mondays and Thursdays (eight races per day at different distances), is fifteen yards short of one of our miles. It is about ninety feet wide in the stretch and sixty on the back side. It is constructed of brick and covered with about eight inches of saud, which is kept wet. The footing is like the outside of the Memphis track. Starting poles alternate every seventy-five feet around the track, with a red and white flag flying from each starting point, the red denoting the even numbers and the white the odd. The horses are allowed to turn around to get as much of a moving start as possible within the poles. Not much time is wasted at the post. The head-starter is with the scratch horses and all of his assistants are back of him with the other horses, which they help get straight and then signal him. As soon as they are off it is announced by the ringing of bells from the judges' stand. At the same instant the Paris-mutuel machines, by medium of which all the betting is done, are locked by an electrical device.

There are two sets of judges in the stand; the ones above watch the gait of the horses, and if they go foul gaited or break too often, their number is hung out while they are trotting, a blue flag indicating to the drivers and the people that they are disqualified. No such thing as arguing with the judges is permitted. The winner of the money drives into an inclosure beside the stand on returning from the heat. Then the drivers weigh in and the numbers are displayed all over the grounds. Everything is done in an orderly and systematic manner; no talk, no commotion. Sulkies are kept at the stand owned by the club and if there is a breakdown before the start, they change right there and do not delay the spectators, as is the case in America.

There were eight races trotted, starting at 3:30 p. m., and continuing on time every half-hour until finished. Inside of the main track is another one which is used for jogging other days than race days. You can warm up your horse during the half-hour preceding your race, but are not allowed to take him off the track pending the race. When he appears he must stay until the race is finished.

The derby colts all went from the same mark, so were allowed to start fifty yards back of their mark and score up slow. They went the two miles at about a 2:40 clip and were good mannered and good gaited. All looked fine and their deportment showed how nicely they were trained. In fact, all the horses racing here look good enough to go into a show ring, being fresh and nice. It started raining about 1 o'clock, but that did not keep 40,000 people from attending. All seemed happy and thoroughly enthusiastic regarding the sport. Men, women and children walked around in the rain as if the sun were shining. Why can't that condition prevail in our country? Why not have the tracks so the people can come and see racing, rain or shine?

The prices of admission range from 1½, 2½, 5, 7, and 9 marks, the latter entitling you to all privileges. The betting in the Paris-mutuels range from 5, 10, 20, and 50 marks. I saw only one box on at the latter price. The drivers are all licensed and they must have served two years in a training stable before one is granted them. All wear bright colors and are dressed like running horse jockeys.

In the Derby there were eleven starters and the drivers were furnished with bouquets by the club, which they must wear while driving the race. It looked good to me after seeing some of our jockeys whose only bouquet is a rotten cigar. As you pass in the gate, signs direct you to booths, where you may purchase programs. Nothing is allowed in the center field, not even a person, so the people don't have to climb over one another to see the races. After the racing is over the hand remains and plays for hours, or as long as the people care to stay. As there are gardens back of the stand and under them, where the people eat and drink and enjoy themselves, the evening is often given up to sociability. Everything is done for the comfort of the people and they surely enjoy themselves.

There are about 500 horses here in training at the two tracks in Berlin. I don't know just how many trainers there are, but they are all a fine lot of fellows. I have not met them all personally, but those whom I have met speak so highly of the others that it makes one feel glad that he is a horseman. The largest stable here is trained by Mr. Mills and his three sons (they have forty-five horses), Will, Charley and Alfred. Mr. Mills is the pioneer horse trainer of Germany, having been here twenty-seven years—fourteen of them being spent in Berlin. He and his boys are not only high-class horsemen, but gentlemen as well, and while Mr. Mills is at the age that most of us are laid away, or have given up the battle, he is still the most enthusiastic horseman I ever met.

I can readily see why there are so many horses here in training and why the people come to see them. It is in the air, kept there by the trainers, who are as enthusiastic as school boys. As old and hardened as I am, they had me filled with the disease. I wish we had a lot like them in our country. I don't know all their names, but all are doing all they can in every way to make my stay a pleasant one. Charley Lyons, who came over two years ago, is a full-fledged Dutchman, talks the language like a native and looks the part. He is enamored with the country and its prospects in the racing line. Charley Foster, Mr. Metcalf and a number of other Americans are here.

The gentlemen who write the turf news are fine fellows, too, and are helping the game and the trainers along all they can. The whole thing seems like one happy family. My letter gives only a faint idea of the hold the American trotter has in Germany, and when I get home I will tell it to you, as I am a poor performer on paper. I am mailiug you a program marked by Charley Lyons. Perhaps Dick McMahan will translate it for you.

By the way, what a hit Dick, garbed as he always is in purple and gold, would make sauntering Unter deu Linden. But our friend Richard is only iu the primer class when it comes to manners. In that respect these Germans have the "Beau Brummel of the turf" marked off the hoard, and while Richard's clothes would go the limit, he would have to consult a Chesterfieldian dictionary in order to polish up his line of conversation.

Charley Lyons just trains a few colts of his own and at the prices he gets I am afraid that Dick could not get his laundry out. But everybordy bets some and there is ready sale for finished colts. Mr. Mills manages the Weisensee track and it is largely due to him, Mr. Metcalf and Prince Smith that trotting is in such a flourishing state here. There are any number of German trainers who are very bigh-class men, as indicated by the horses, which are good gaited, good mannered and wear less rigging than we use on them at home. Everyone takes the Review here and it is digested from start to finish.

I am leaving for Russia Tuesday night, and will write you from there. I am sorry that I can't put on paper what I would like to. If Murray Howe were here he would do that for me and then you would get the right dope. I met the official handicapper here, Mr. Scheppe, whose brother also handicaps at Vienna. Why wouldn't it be a good scheme if the Boston people would engage him or his brother to come over and handicap the $50,000 race. They are the best handicappers in Europe. I think they would be of great assistance to our people, owing to their familiarity with the game. I have been visiting all points of interest here and there is a lot to absorb.

No American can come here and fail to be impressed with the superiority of the German racing methods, as compared with our own. Our methods are antiquated as compared with theirs, and while they have to come to us for their best horses, we would do well to borrow from them a few modern ideas. There is a wonderful future for harness racing here, and it will continue to thrive and grow under present conditions. Like everyone else who comes here, I expected to find the German people less fond of sport and inclined to be unsociable. In both respects I was agreeably surprised. The Germans are real sportsmen, and as for hospitality and kindliness, it is administered here in such hearty style as to leave one constantly in their debt for favors received. I enjoyed every moment of my stay and I cannot give expression to the gratitude I feel towards my German hosts.

DE RYDER'S HORSES AT FARGO.

At the Fargo, North Dakota, half-mile track, Charley De Ryder started his horses in five races during the meeting which began June 9th and lasted three days. He was third in the 2:30 pace with Senator Clark by Prodigal, the horse being second in 2:20½ the third heat.

Diablo Mac, Lewis Pierce's trotter by Diablo, dam Hazel Mac by Director, won the 2:25 trot in straight heats, each in 2:24¼, and only jogged to do it.

Nutwood Princess by Prince Nutwood won the first heat in 2:21¼ in the 2:25 pace, and took second money.

In the 2:30 trot the chestnut horse Odd Mark by Sirius Mark, won second money, being close up to the winner in 2:15¾.

Charley T. 2:11¼ was the only horse of De Ryder's string that failed to get "in the money." As he has been sick since leaving California he has had but little work. The heats were from 2:14 to 2:16, pretty fast for an early meeting on a half-mile track.

Altogether De Ryder's horses won $280 net at the meeting. All the purses were $400 each.

THE ARTISTIC SIDE.

Managers of trotting tracks and horse shows can take a leaf from the book of the managers of the International Horse Show, now being held in London. Some of the fiuest horses in the world are being shown there and could be safely depended upon to attract large crowds, but the management has not been content with that, and as a result the decorations at Olympia have set a new mark for shows of this nature.

It is worth while to note what was done in that line. Decorative artists, sculptors and floral experts were called in and the result of their labors was a fairyland. According to the London Trotting World thousands of blooms were planted about the show ring and the promenades, including standard roses, crimson and pink ramblers, geraniums, hydrangeas, rhododendrons, marguerites, verbenas and maple trees to the number of 15,000. Two thousand palms from twenty to thirty feet in height and a large number of fully-grown trees were also used.

The arena was covered with 200,000 square feet of fresh turf, and this was renewed every day during the exhibition. The flowers were renewed daily and the scheme of decoration changed each time. In addition to all this, five miles of scenic canvas, painted on both sides, and two and a half miles of gauze were used. One can imagine that the effect was unique and superb.

The royal box is in reality a magnificent suite of apartments, for the reception of their majesties, the King and Queen, and other royalties from this country and abroad. The most wonderful floral effects are seen in the decoration scheme of the royal box. It is massed all round with growing flowers, and lies cut off from everything else in a perfect bower of trees, stretching from the margin of the ring to the hack of the hall, a distance of forty feet. A special lift conveys his majesty to the royal box. In front of the royal box is a handsome staircase leading to the terraces upon which the foreign officers will be seated.

Novel electrical signs on both sides of the arena instantly transmitted the numbers of the exhibitors to the audience. In the stables the exhibitors vied with each other in decorating their stalls, some of them expending as much as fifteen hundred dollars. Never before was there a horse show where the decorations were so elaborate and novel.

It is not to be expected that the managers of race tracks and ont-of-doors shows in tbis country could afford to enter on such an elaborate decorative scheme as outlined above, but there is no question but that much could he accomplished along those lines that would pay a good investment on the money expended.

At race tracks the grounds could be kept tidied up, the grass cut, flowering shrubs of a permanent nature planted and the stable refuse could be removed daily. Then the admirer of the trotter would not hesitatte at taking his wife, daughters and the members of his family to view the horses in their stalls. The educational value of these visits would repay all trouble and expense and a large number of recruits would be added to the sport.

State fair grounds are often located so close to the city that they could well be turned into public parks. Families would find the grounds a pleasant place for picnics and an unlifting spirit would prevail that would eveutually popularize the horse with a large class that take little or no interest in the horse, for there is no gainsaying the fact that human beings cannot come in contact with the noblest of all animals without soon developing an intense admiration for him.

With whole families thus converted to adherents of the trotter and pacer much of the opposition due to unfamiliarity with the horse would disappear and racing would become universally patronized.—Western Horseman.

MATINEE AT COMPTON HALF MILE TRACK.

The Hynes Driving Club gave a very interesting and enjoyable afternoon of harness racing June 20th. Five races were on the card, several members of the Los Angeles Driving Club competing with their horses. The summaries were as follows:

First Race, 3:00 Trot:

Daisy (Bob Palmer)	1	1
Hazel (John Palmer)	2	3
Fanny (Chas. Wilber)	4	2
Ada (Phil Crockett)	3	4

Best Time—1:38.

Second Race, 2:30 Mixed:

Bonnie C. (Geo. Pierce)	1	1
Belle (Clay Mayo)	2	2

Best Time—1:20.

Third Race, 2:40 Pace:

Lady Mason (H. Parker)	1	1
Belle V. (R. Morton)	2	2
Dan (Geo. Aiken)	3	3

Best Time—1:28.

Fourth Race, 2:40 Trot:

Tornado (Geo. Harris)	1	1
Black Beauty (C. Venza)	2	3
Irene (H. Parker)	3	2

Best Time—1:24.

Fifth Race, Free-for-all.

Lady Bug (J. Herdman)	1	1
El Diablo (L. McClellan)	2	2

Best Time—1:13½.

NOTES AND NEWS

The Woodland Driving Club will hold its second matinee next Friday.

In New Zealand recently, O. Y. M., a four-year-old stallion by Owyhee, won a race easily in 2:20.

Wm. Cecil has named his pacer Joe Gans in the $5,000 pace at Hamline. Joe Gans is by Nearest.

Get your business so arranged that you can start in the circuit at Santa Rosa and go clear through.

Second payments were made on 118 horses out of the original 127 in the $50,000 handicap at Readville.

There will he harness racing at San Diego, San Bernardino, San Luis Obispo, Newman, Sonoma and Chico to-day.

Sixty-eight foals of 1907 have heen entered in the Stanford Stake to he trotted in 1910. A good showing for a dry year.

A train of thirty-two cars loaded with horses left Winnemneca, Nevada, two weeks ago for Omaha, where they will be put on the market.

From every track in the State news of fast workouts is beginning to come. There will he some very fast racing in California this season.

Queen Derby, Joe Cuicello's fast pacing mare, hroke the record for Pleasanton track's first quarter last Saturday by turning it in 29½ seconds.

The prohability is that the three-year-olds will trot pretty fast in California this year, while the two-year-olds are a choice hunch at the present time.

The Readville $5,000 free-for-all trot which was to have heen decided to-day, was declared off, much to the disappointment of horsemen all over the country.

John R. Conway 2:09 is working well this year for Sutherland and Chadhourne. He stepped the Pleasanton track a little better than his record last Saturday.

W. A. Hunter is training at the Woodland track a four-year-old gelding by Diahlo, owned hy Oscar Phanstell of Madison, that is a very promising young horse.

The hell will ring to call out the horses at Santa Rosa just three weeks from next Wednesday. All the fastest and best trotters and pacers in California will he there.

Big Ben, the horse that was entered in the race for Butchers' cart horses at Oakland, last week, is said to have heen none other than the well known pacer Victor Platte 2:12½.

Banker G., a three-year-old gelding by Greco B., dam Banker's Daughter 2:13¼, trotted a mile in 2:23½ at Woodland one day last week. He is owned hy Oscar Whitehouse.

The Sonoma Driving Club will hold a matinee on its track at the town of Sonoma this afternoon. Five good harness races are on the card, and a couple of races for saddle horses.

The entries for the $6,000 free-for-all trot at Hamline are Sonoma Girl 2:05¼, Angiola 2:06, Highhall 2:06¼, Wilkes Heart 2:06¼, Watson 2:07½, Early Alice 2:07½ and Aunt Jerusha 2:10¾ .

More than sixty horses have been named in the different races to he decided at San Bernardino track July 3d and 4th. There are to be two trotting, two pacing and two running races each day.

A report from Pleasanton states that Mr. Frank H. Burke's McKinney mare Vallejo Girl 2:16¼ is showing great speed and worked the last half on that track last Saturday in 1:03, some watches getting it a shade better.

Frank Wright of Sacramento has shown that he is an expert with the starter's flag at several matinees this year, and has heen selected to start the races at the inter-city matinee of driving cluhs to he held at Chico this week.

James Lyndon, well known to horsemen as a trainer and driver of harness horses, died at Sacramento recently. He trained for W. B. Todhunter some years ago, also for General McNassar and General A. L. Hart of Sacramento.

Sonoma Boy, formerly known as Dumont S. 2:20, and now owned hy Mr. F. E. Alley of Roseburg, Oregon, will be entered in the stallion classes at the big Portland Horse Show this year. He is a full hrother to Sonoma Girl 2:05¼.

Charley Belden 2:08½, now owned hy J. D. Callery of Pittshurg, made an excellent showing at the first matinee in which bis new owner drove him. He was a hang-up second in 2:12¼, closing a hig gap and trotted the last half in 1:04.

Corning Girl, the yearling pacing "phenom" owned hy W. H. Swanson of Corning, California, paced the Woodland track last Saturday in a heavy wind in 2:40½, last half in 1:16½ and last quarter in 37 seconds. She finished the mile strong and fresh.

Cbarley De Ryder injured his hand after reaching North Dakota and, hlood poisoning resulting, had to enter a hospital for a time. At last reports he was recovering and is probahly all right hy this time. Walter Palmer drove for him during the time be was laid up.

The colt by Cresceus 2:02¼ out of Silver Pan by Silver Bow 2:16 that Al McDonald is working at Santa Rosa track is pronounced one of the best looking young trotters he has ever seen hy so good a judge as Payne Shafter of Olema, who looked him over last week.

The fastest mile to date on the Woodland track this year was trotted hy William Hashagan's McKinney stallion Kinney Rose last Saturday when Det Bigelow drove him a mile in 2:11½ with the last quarter in 31¾ seconds. Kinney Rose is well entered on the coast this year.

John Quinn has arrived at Santa Rosa with his string of trotters and pacers that he has heen training over the Sacramento track. Among them is Capt. Frank Ruhstaller's trotter Wild Bell 2:08½, Sim's Captain Gorges, Ed. Kavanaugh's Dora, Dana Perkins' All Style and several others.

While the entries thus far received for the Santa Rosa meeting are not as numerous as expected still nearly every race advertised will prohahlly fill and all the fastest trotters and pacers in the State are named. The speed committee will meet next Monday to decide upon what races will be given.

T. H. Corcoran, owner of that handsome and fast mare Lady Falrose, purchased a new latest model sulky from W. J. Kenney, 531 Valencia street, this week. Hardly a day passes hut a sulky or two, and several carts are taken away from Kenney's estahlishment hy purchasers who want the hest in that line.

The first race in which Inferlotta has heen entered is the $3,000 pace for 2:04 class pacers at Hamline. She meets the hottest kind of a hunch in Argot Boy 2:03¼, Lady Maud C. 2:04½, Baron Grattan 2:03¼, Aileen Wilson 2:04¼, Citation 2:03¼, Dana Patch 2:05¼, Don Roma 2:07¼, Robert Lee 2:06½ and Rollins 2:08.

Diahlo Mac of De Ryder's string, Sonoma May, the full sister to Sonoma Girl now owned hy Gen. Watts of Charleston, W. Va., The Zoo, a stallion, and Zomalta, a mare, both by Zombro, are all entered in the $5,000 purse for 2:21 class trotters at Hamline. The Zoo is owned in Canada, and Zomalta is in Will Durfee's string.

The picture on the front page of the Breeder and Sportsman this week is of Ramona S. the handsome bay trotting mare owned by Mr. E. A. Swaby of Dixon, California. Ramona S. is out of a mare by Antevolo, son of Electioneer, second dam hy Major Tourtelotte, son of Rhode Island. She worked a mile last April in 2:17¼ and will be raced this year.

Manager Ben Benjamin will soon have his advertising matter out for the big meeting at Oakland. It is the duty of every horseman to help boost this meeting, as a success this year will induce Mr. Benjamin to give larger purses next year. There is no reason why there should not he one week of high class harness racing at the Oakland track every year.

It is announced that 508 entries have heen received to the thirteen fixed events for the Kentucky Trotting Horse Breeders' Association, to be held at Lexington in Octoher. This is only twenty-three less than the entry list of 1907 totaled, and indicates that the Lexington meeting next fall will be as successful in all respects as any of the meetings which have preceded it.

May Earl 2:10¼ promises to be the sensational trotter on the Grand Circuit this year. Her three heats helow 2:09, with the fastest in 2:05¾ at Lexington two weeks ago was a marvelous performance for this season of the year. Her trainer, Mike Bowerman, a veteran, but as good as any of the younger generation, says the mare's owner is willing to match her against anyhody's trotter.

At the earnest solicitation of the energetic managers of the Salem and Portland fairs to be held in Septemher, Mr. C. L. Crellin of Pleasanton has consented to send his great hrood mare Bertha hy Alcantara, sire of four 2:10 pacers, to be exhihited at those two fairs this year. Her foal of this year, the nineteenth of her numerous and famous family, Ruhylight hy Aerolite (3) 2:11¾, will he shown at the side of her dam.

A San Francisco gentleman made a wager this week that the horse Tommy Murphy by Gossiper, would take a faster pacing record this year than Charley D. by McKinney, and in his opinion 2:06 would not stop either of them.

The three days' meeting which will celehrate the opening of Chico's new $25,000 track began on Thursday of this week and will end to-day. Matinee racing by members of the Sacramento, Stockton, Chico and other driving clubs will he the principal feature of the program, but there will be running races, hroncho busting, auto and bicycle racing, and many other sports at this three-day carnival.

The next matinee of the Woodland Driving Cluh will be held Friday afternoon next, July 10th. All future matinees of this cluh will occur on Fridays at the request of the business men who find it hard to leave their husiness on Saturday, which is the day for farmers to come to town to do their shopping. On the Grand Circuit nearly all the associations end their meetings on Friday.

The interest being taken in the new track and grounds of the Portland Country Club, where fair and harness race meeting will follow the Oregon State Fair at Salem, and serve to dedicate the Portland track, is such that many expect the attendance will exceed that at Salem, where last year as many as twenty thousand persons passed through the turnstiles in one day.

The European half-mile track record was lowered June 15th at Vienna, Austria, by Siliko, in his first start on foreign soil. Siliko started in the Vienna Summer Prize, which he won, defeating Onward Silver 2:05¼, Lotta 2:08¼, Codero 2:09¾ and several others, taking a record of 2:08 3-10. He is to start in the European championship race August 9th at Baden, and the majority of the hest judges on the other side believe he will win it.

Alhert H. Moore of Philadelphia, who paid $75,000 for Director 2:17 and $60,000 for Red Wilkes, two of the greatest trotting sires, died in New York on June 11th. The fastest horse he ever hred was the pacer Nathan Straus 2:03¼ by Director. His farm, called Cloverdell Stock Farm, was one of the most complete in America, costing Mr. Moore at least a million dollars when it was finished and stocked. When he retired this farm and the horses were sold for a song.

H. W. Lawrence of Santa Ana, who owns the good stallion Murray M. (3) 2:14 in Will Durfee's string, has gone East and will he with the borses during the eastern campaign. Mr. Lawrence owns a fine colt hy Murray M. out of Bonita hy Knight that he expects to win the Breeders Futurity with. The colt is now two months old and weighs 250 pounds, is a beautiful chestnut and hegins to look like a stake winner. Mr. Lawrence has selected the name Atlantic Fleet for him.

The following incident of a recent Cleveland matinee is taken from the American Sportsman: "Henry W. White started his trotting mare Carrie Mac 2:29¼ by John A. McKerron 2:04½, dam Carrie Onward 2:14½, for the first time to wagon, Saturday. She behaved like a veteran, winning in straight heats, the fastest being in 2:23½. This mare has only heen trained to wagon a short time and if Saturday's showing is any indication, she will make a high-class wagon trotter."

But one harness race was pulled off at Denver hefore the meeting closed down on account of betting being prohihited. This was the 2:22 trot, which was won hy Mr. George Estahrook's hay mare Queen's Honor hy Parole out of Queen of the West hy Baron Wilkes. She was driven by Gus Macey, who won with her very easily in straight heats, hoth in 2:17½. Queen's Honor is a five-year-old mare of great promise and is well staked through the Middle West and on the Grand Circuit.

The Sidney Dillons owned hy Sterling R. Holt, of Maywood Stock Farm, are making very satisfactory speed progress in the hands of Trainer Millard Sanders, says Western Horseman. On Tuesday, June 16th, Ruth Dillon 2:15¼, champion half-mile track trotter of 1907, negotiated a mile in 2:14¾, a half in 1:05 and the last quarter in 31¼ seconds. She appears to he in much better form than last year, and apparently takes very cleverly to the work. Sanders worked Martha Dillon 2:19¾, a mile in 2:19, and Harry Dillon, a three-year-old, a mile in 2:25.

The mare Winnie Wilkes 2:17½ by Rey Wilkes, dam hy Cresco, was found dead in a pasture near Santa Rosa last month. She had doubtless tried to jump a picket fence and was snagged by a picket. Winnie Wilkes was owned by Mr. J. H. Jack of Berkeley, Cal., wbo valued her highly as a hrood mare. He owns a fine hig two-year-old from her hy Lecco 2:09¾. She was sent to Sonoma county this year to he hred to McMyrtle, a grandly bred son of McKinney 2:11¼. Winnie Wilkes was a large black mare foaled in 1894, and took her record at Woodland in 1901. Her daughter Hester Diahlo hy Diablo is a very fast natural trotter, and she also produced a filly by McKinney, now owned in Sacramento, that is fast.

President Thomas H. Williams, of the New California Jockey Club, has turned the Tanforan track over to Mr. Kuowles a leading citizen and husiness man of South San Francisco, who will have authority to issue permits for its use by driving clubs, automobile and motor cycle clubs. The track is to be put in condition for this sort of racing and on Sunday, July 19th, tbe San Francisco Driving Club will probably hold an afternoon of matinee racing there, at which all the fastest horses owned by memhers of the club will be raced.

The Statesman, Chas. F. Silva's bay stallion by James Madison, is being picked as a likely money winner in the big stakes for 2:20 class trotters at Oakland, Chico and Sacramento. He is said to be trotting steadily and good gaited in all his work, and to have been a mile in 2:17. Just how fast this race will be trotted is, of course, problematical, but the general opinion is that none of the heats will be slower than 2:13 whenever the horse hit a good track, and some enthusiasts are predicting that tbe winner will have a mark of 2:10 when the races are over.

A New York daily says: There is a rather peculiar thing in connection with the automobile situation this spring, and it is causing a lot of comment. The wealthy people are not buying them to any great extent, but the middle class, people in moderate circumstances, are mortgaging their homes to buy them. The wealthy people, both in this country and in Europe, are showing more interest than ever before in horse shows and horse functions of all kinds. This switching to the automobile by the people of moderate financial standing is one of the curiosities of the present spring.

An Eastern exchange says that Athel, the undeveloped brother to Arion 2:07¾, has been unsuccessful as a sire, although among his eight standard performers is the good mare Bugle 2:12¼. This year, however, there is a trotter by him in training at Evansville, Ind., that is thought to be one of the kind that become famous. This is the bay mare Angetta 2:17¾ that raced over the half-mlie track of the Middle West last season very successfully. She is a big mare, but with speed enough to make a prediction of a record of 2:08. She is out of Thaber by Royal Wilkes 2:17¾, second dam Zetta, by Epaulet 2:19.

Mr. C. A. Harrison, proprietor of the Washington Annex hotel at Seattle, has sent his mare hy Cresceus 2:02¼ to Dr. Boucher at Pleasanton. Miss Cresceus has been sick with distemper and will run out until she regains her strength when she will he taken up and trained during the fall. She is a young mare of great promise, a fast natural trotter and looks to he a credit to her breeding. Her dam is Venus II 2:11¼ by Cupid 2:18, own brother to Sidney Dillon, sire of Lou Dillou 1:58½, consequently she is closely related to the fastest trotting stallion and mare in the world. Miss Cresceus is five years old. Dr. Boucher also has Mr. Harrison's mare Niquee by Joe Patchen in his string, she having been turned over to him on Mr. Harrison's order when P. W. Hodges who was training her, started east to race on the Graud Circuit. Niquee is entered on the California circuit this year. Mr. Harrison, who has just purchased the splendid hotel the Washington Annex, in Seattle, will now be so confined to business that he will have to forego the pleasure of coming to Pleasanton this month, as he intended, to see his horses at work.

NEWS FROM THE NORTH.

(Portland Rural Spirit, June 24.)

The yearling filly Lynwood Girl hy Lynwood W. 2:20 dam Lenmetta, is stepping eighths in :24½ at the trot.

William Clark of Medford, has a very promising trotter in his stallion Baron Bretto hy Silver Bow, that will be seen on the district fair circuit this fall.

George A. Kelly of Walla Walla, will move to North Yakima this week his McKinney stallion, Bonnie McK., where he will make a short season.

Pilot McGregor, owned by J. O. Morse, secretary of the Western Fair Association, Seattle, won the 2:40 trot and pace at Victoria, B. C., and took a record of 2:27½ pacing.

S. S. Bailey reports the loss by death of the fine filly foal by Tidal Wave 2:09 out of Oma A. Mr. Bailey considered this the finest colt on his place and feels he has lost a futurity winner.

Bill Frazler 2:14 won the free-for-all matinee race at Seattle last week, defeating New Moon, Freemont S., Prince Nutwood and Francisco in 1:12, 1:13, 1:07½. New Moon won the second heat.

A. McCloud of Clear Lake, Wash., has a handsome three-year-old colt by Tennysonian, out of Benton Girl, that is a big, handsome fellow, showing lots of speed. He will be worked some at Bellingham this season and may start in some of the races for green ones.

FRESNO ENTRIES.

Waltou Stake, two-year-old pacers—Geo. W. Kirkman's Stoneway Jr.; J. Stewart's Ester D.; J. W. Zibbell's King Kohler; Ella Warlow's Silente.

Trotting 2:14 Class—T. H. Ramsey's Kinney Al.; J. Smith's Wild Girl; Montgomery Stock Farm's Little Louise; J. Twohig's May T.; W. B. Snyden's Dutch; E. A. Swaby's Ramona S.

District Pace, 2:35 Class—D. B. Mosier's Avalon; H. O. Smith's Joe Athby; George W. Kirkman's Lady Stoneway; J. H. Nelsou's Allie Glen; George A. Ingals Valadore; C. E. Jobnson's Ira Basler.

Pacing, 2:25 Class—J. H. Nelson's Allie Glen; George W. Kirkman's Lady Stoneway; H. O. Smith's Joe Athby; D. B. Moshier's Avalon; W. B. Snyder's Wanderer; Valencia Stock Farm's Amado; George W. West's Ruby; H. Johnson's Babe Madison; Haring Werner's Chatterbox; G. W. Bonnell's Velox; T. D. Witherby's T. D. W.; Alfred Solano's Boton de Oro; George W. Kirkman's Alice St. Clair.

Zibbell Stakes, three-year-old pacers—Valencia Stock Farm's Conqueror; George W. Kirkman's Lady Stoneway; Thomas Smith's Vallejo King; M. G. Liggett's Donna; J. W. Zibbell's Georgie Z.

Nogi Stake, two-year-old trotters—A. G. Pinfor's El Greco, G. A. Pounder's Prince Lock; George L. Warlow's Pomona; Chester Warlow's Rautstrau.

Trotting, 2:18 Class—George T. Algeo's Chestnut Tom; M. J. O'Donahoo's Charlie M.; J. L. Smith's Bonetti; J. S. Frary's Herbert Dillon; William Manske's Lucy M.; J. A. Kirkman's Idolway.

Pacing, 2:20 Class—George W. Kirkman's Alice St. Clair; T. D. Witherby's T. D. W.; G. W. Bonnell's Velox; J. G. Leggett's Martinez Boy; Alfred Solano's Boton de Oro; C. E. Micken's Adelanta; W. B. Snyder's Wanderer; H. Johnson's Babe Madison; Harry Warner's Chatterbox.

The 2:14 class pace, purse $500, the 2:10 class pace, $500, and the 2:24 class trot $500, were not filled but were re-opeued to close in September.

A DENVER PAPER'S OPINION.

The miserable ending of the summer meeting at the Overland was nothing more than might have been expected. The track has been outlawed for years or ever since the gentlemen quit the game and turned it over to the gamblers. A Denver printer named Wablgren has been operating it under lease and this one man constituted the so-called association. Last year he is said to have taken down $60,000 from the game, which might have been repeated this year had not the law stepped in and shut up the track. The lop-over meeting held at Littleton on a half-mile country course is only the continuation of the farce which everybody must regard as a great joke. It is quite evident to all men that racing has come to an end in Denver as it has in all other cities where the pool box became the sine quo non of the cult conducting the meetings. A hundred years ago our grandfathers bred and raced horses for the true sport of the game but that was before the hoi polloi moved in with their clap trap contrivauces to fleece people out of their money.—Denver Feld and Farm.

TROTTING BRED SHOW HORSES.

At the recent Plainfield, N. J., horse show, writes Raymond in the Horse World, the famous high-stepping horse show Dr. Selwonk came perilously near being beaten by a comparatively new aspirant for show-ring honors, the trotting-bred horse Red Oak, that promises to have a brilliant future as a show horse. Red Oak was bred by E. D. Morgan, one of the directors of the National Horse Show Association. His sire Nuttingham Gift, was by Nuttingham(son of Nutwood 2:18¾, and Adelaide 2:19¾), dam by Oakland Black Hawk, a grandsou of Vermont Black Hawk. Mr. Morgan says the dam of Red Oak was by Golddust, out of a Morgan mare, so that the horse is a strongly inbred Morgan on both sides of the house. Red Oak, then called Duster, was exhibited by his breeder and won at Mineola and other Long Island horse shows in 1905. He was sold under the hammer in the fall of that year, John Spratley huying bim for $380, and reselling him soon afterward to Thomas J. Ryan. In the following year Mr. Spratley repurchased the horse, paying $1,300 for him. Under the name of Red Oak he was shown at the National Horse Show last year, and was sold a short time since to Paul A. Sork, who now owns him. Mr. Spratley says that Red Oak is not only a great show borse, but is the most enduring, rugged, and best harness horse he ever owned.

Another trotting-bred show horse that is being used to sire coachers is Whirling Cloud, one of the leaders of Thomas W. Lawson's thirty thousand dollar park four-in-hand team. He is in the stud at the Iowa State Agricultural College Farm, near Ames, Iowa. Thunder Cloud, one of the wheelers of the same team, is at the head of the United States Government Stud, at Fort Collins, Col. Whirling Cloud is registered as Don Edward. He was bred hy M. L. Haines, of Mount Holly, N. J., and was by Don Ogden, son of Kentucky Prince. If mares of the right type are mated to these trotting-bred high-steppers, the foals ought to afford an excellent foundation for a strictly American-bred breed of coacb and show horses.

G. A. Graham, secretary Washington State Fair, wires us that all purses filled at North Kaklma.

Drink Jackson's Napa Soda.

THE ESTABROOK STRING.

The horses that Gus Macey will campaign on the western and eastern tracks this year for Mr. George Estabrook of Denver, are the following:

Dorothy Axworthy 2:21¼, chestnut filly, foaled 1905 by Axworthy (3) 2:15½, by Axtell (3) 2:12, dam Dorothy T. by Advertiser 2:15¼; second dam Hannah Price by Arthurton (dam of five in the list).

Silver Band 2:10¼, black gelding, foaled in 1901, by Colonel Cochran 2:10¼, dam Sweet Marie by Rodgers; second dam by Anderson Wilkes.

Matt L. 2:15¼, bay gelding, foaled in 1902, by Parole 2:16, dam Lizzie Clinch (dam of three in the list) by Baron Wilkes; second dam Belle Medium by Pilot Medium.

Geraldine 2:14½ (p), by Patent Right, son of Velton, dam by West Egbert.

Spanish Queen 2:26½, bay mare, foaled 1903, hy Onward Silver 2:05¼, dam Elfin Dance 2:27 (dam of McGrath 2:28) by Wilkes Boy 2:24¼, grandam Sonata by Dictator.

Whitelock (p), foaled 1899, by Wiggins 2:19½, dam Maid of Windsor (dam of three) by Peavine.

Queen's Honor, bay filly, foaled 1903, by Parole 2:16, dam Queen of the West (dam of Queen's Baron 2:19½) by Baron Wilkes 2:18.

Lady Seymour, bay filly, foaled 1903, by Seymour Wilkes 2:08½ by Guy Wilkes 2:15¼, dam by Silver Bow 2:16.

Fanny Lawsou, hrown filly, foaled 1906, by Tregantle 2:09¼, dam Miss Fanny Summers 2:26¼ hy Bow Bells 2:19¼, second dam Florence D. 2:29¼ by Jay Gould 2:21¼.

Dorothy Axworthy has worked around 2:15 this spring and is engaged in stakes valued at $50,000. Spanish Queen has worked in 2:20 and her engagements foot up $99,000. Whitelock has several important engagements. Fanny Lawson has heen a mile this spring iu 2:26. Her engagements foot up $40,000.

RECORD IN THE HANDICAP.

Quite a variety of opinions have been expressed by horsemen interested in the big Readville Handicap on the questiou of the official time record of tbe race.

Some horsemen contend that there can be no equitahle time record made in a handicap race, since the record must be compared with the regular mile events which differ so much as to make them incomparable. Others fancy that official records can be made only from tbe mile mark, while others still contend that the difference between the standing and flying start takes the handicap race outside the rule. That the rules were made for the ordinary races with flying starts and should not be applied to special events that provide for a standing start.

Whatever horsemen tbink of the equity of comparing the handicap race with its standing start, with the regular racing events and their flying starts, the rule is nevertheless plain and provides that in such events the time shall be reckoned from the mile, no matter what distance over a mile he may go.

The rule which is identical with both parent associations is as follows:

"A horse shall not he eligible if the time specified by him has heen beaten at a greater distance. That is, a horse having made two miles in five minutes shall take a record of 2:30 and be eligible to a 2:30 race, but not for a race limited to horses of a slower record than that."

According to this rule horses in the haudicap race will be officially timed from the mark from wbich they start and their time reduced to the average for the mile. As all of the horses will go a mile and an eighth or over and from a standing start the winner is not likely to take a record that will penalize him for racing at mile heats.—Boston Courier.

DAVIS DRIVING CLUB RACES.

(Three-quarter Mile Heats.)

Following are the results of the racing at Davis, Yolo county, on Sunday last under auspices of the driving club:

First race, Class A:

Stuart Montgomery's L. J	1	1	
Oren Wright's Trix	2	2	

Time—1:55, 1:50½.

Second race, three-year-olds:

O. B. Willis' Lady (Elmo Montgomery, driver)	3	1	1
J. P. Montgomery's Lady Hoy	1	3	2
S. W. Lillard's P. D. Q	2	2	3

Time—2:07½, 2:07, 2:02½.

Third race, Class C:

Del Grieve's Lena	1	1
George Eissell's Lady Eissell	2	2

Tme—2:16, 2:15½.

Fourth race, Class D:

Mercer Bracken's two-year-old Forgery	1	1
J. P. Montgomery's four-year-old Sam Hoy	2	2

Tme—3:00, 2:56.

S. W. LILLARD.

ANSWERS TO CORRESPONDENTS.

J. C. H., Oroville—Grace Hale, the dam of Little Thorn 2:07¼ was a bay mare, by Director 2:17. Her first dam was Nettie Nutwood by Nutwood 600, second dam Zephyr by Williamson's Belmont and third dam Senter Mare, breeding not given: This is the breeding as given in the catalogue of L. U. Shippee's Stock Farm, where she was owned, and where Little Thorn was bred.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

HUNTING AND EXPLORING DOWN THE COLORADO AND IN LOWER CALIFORNIA.

Geeral Adna R. Chaffee, General M. H. Sherman and a party of friends last January had a most interesting time and enjoyed a fortnight's hunting and exploring trip down the Colorado river from Yuma to the Cannibal Islands in the Gulf of California, up the Hardy river to the head of navigation, and across the delta of the Colorado to the slopes of the Cocopah Mountains.

They returned to Los Angeles browned from exposure to the southern wind and sun, bringing with them rare trophies of the chase from what they unite in calling the finest hunting grounds in all North America.

Adventures were not lacking, writes E. L. Hedderly recounting the main features of the trip; they were stranded on a desert island in the Gulf of California, they were housed at night to ward off an attack from renegade Indians only to find the attacking party was a colony of beavers at work; in the Hardy river they found an abandoned schooner the idle sport of wind and wave; they passed through a thrilling experience with what might have been the original of Jules Verne's floating island; with their Indian guides they chased wild boar through the jungles along the Hardy, and hunted bear in the Cocopahs; they visited a valley of geysers almost equal to those of the Yellowstone; one member of the party asserts that he found traces of the lost schooner Arno which sank in the Colorado in 1859, carrying with her 150 barrels of rare Kentucky whisky which has been aging in the wood ever since, and is now believed to be worth a king's ransom.

From Yuma to the mouth of the Colorado river the party traveled in the steamer Searchlight, chartered by General Sherman. W. H. Holahird, one of the voyagers, gives the following list of guests in his log:

The guests comprised several gentlemen well known throughout the nation, chief of whom was Lieut.-Gen. Adna R. Chaffee, U. S. A. (retired); Maj. John H. Norton, who won his title in the exciting times that prevailed during the early history of the Territory of Arizona; Capt. Jack A. Mellon, who is perhaps the best posted man regarding the personnel of the army officers and explorers of Arizona during the last decade now living; O. F. Brant of Los Angeles, and Tom Silsbee, known everywhere as a frontiersman and a pathfinder of more than ordinary ability and geniality.

During the day they steamed slowly down the tortuous channel of the Colorado. At night the Indian guides built great bonfires on the wooded slopes of the river and there they gathered about the campfire and lived over again in romantic narrative some of the stirring periods of the early settlement and development of the far West. Gen. Chaffee, Gen. Sherman and Major Norton were comrades in Arizona during the epoch-making decade in the history of that territory a quarter of a century ago.

Grouped about their campfire the second night down the river they marched in their imagination with Gen. Chaffee and the American troops through the heart of China to the great walled city of Peking at the time when the Boxer uprising was at its zenith. Then they toiled over the death-dealing sands of Lower California with Capt. Mellon and two companions, wandering for seventeen days without food and water, nourished only by the bitter fruit of the desert cactus. That was in 1864 when a renegade outlaw killed Capt. Mellon's first assistant and sailed away with the Victory Reunion, leaving the little party to die, he thought, on the hills about the Gulf of California.

Among the marshes and tule jungles that flank the Colorado river they found rare hunting. After traveling for a week by boat, the explorers took horses and Indian guides and spent another seven days roaming over the slopes of the Cocopah Mountains, where the echo of the huntsman's rifle is almost unknown. In this fastness of desert and mountain are locked what is probably the greatest hunting ground in the West.

Rare adventures of field and flood befell members of the party and their Indian guides as they roamed through the wilds of what is not unlikely, one of the least-known parts of all America.

About the Gulf of California itself a rare interest attaches. The Colorado is a river of mystery. Its shifting tides carry it at times far out of its courses, until at times during the spring floods it is said to never sleep twice in the same bed.

In the Gulf rare and wonderful natural changes are almost continually taking place. A chart made to-day would be valueless six months from now. Great islands alternately rise and disappear. Capt. Mellon failed even to find some rocky promontories around which he trudged forty-five years ago.

During a day and a night the Searchlight lay moored at the side of an island that did not exist when Capt. Mellon sailed through the gulf in 1862; and the island which he sought for anchorage had disappeared.

The party anchored near Tiburon Island, notorious as the home of a tribe of cannibal Indians, reputed to be the fiercest on the West coast.

Members of the party bring back the report that to land on Tiburon Island is not dangerous on account of cannibals—if these ever existed they disappeared years ago—but because it is now inhabited by about 200 renegade Indians and desperadoes, who have found here one of the few places of safety from the Mexican and United States authorities.

Reports of explorers devoured by cannibals on Tiburon are now discredited; that explorers have lost their lives there is true, but it was generally at the hands of white renegades, who knew that to permit the explorers to return to civilization would mean to reveal their own hiding place.

The Gulf of California is not likely to become a pleasure resort; the water is a trifle too rough for bathing and aquatic sports; the gamut of the tides is discouraging even to the lovers of the sea. During the full moon the tide in the northern part of the gulf rises to the height of forty-six feet.

On the first night in the Gulf the Searchlight anchored to the lee side of Montague Island in deep water. About milnight two of the party chanced to go on deck. The waters had all disappeared, the boat was lying high and dry on some mud flats.

At the first break of dawn they roused the other voyagers to tell them of the strange accident that had befallen them; plainly, they had been trapped by one of the mysterious shiftings of sand in the Gulf.

Their narrative was received by the others with shouts of good-natured merriment. Veteran Capt. Mellon called their attention to the fact that the boat was rocking with the tides as they talked.

Deeply mystified, the party went on deck to find that the waters were higher about them than the night before, and that a part of Montague Island itself had disappeared in the sea.

"Just the action of the tides," Capt. Smith explained; but the land lubbers of the party rested easier when they had weighed anchor and sailed safely out of the treacherous gulf, the scene of so many shipwrecks, and away through the sluggish channel of the Hardy river.

While the boat was moved to the banks of the river one night three of the party wakened together from their sleep and rushed on deck to repel what sounded like the approach of a band of marauders or unfriendly Indians. They found that the boat was anchored in the middle of a colony of beavers, and that these crafty animals were making as much disturbance as possible it seemed, as if to cause them to move on to quieter mooring places.

Nothing was heard from the Indian guides that night but the head cook found them gathered about the campfire of their own the next morning devouring some strange venison. He investigated and found the Indians had caught one of the beaver the night before and were feasting on its tail.

The party devoted one day to treasure hunting—and the treasure they sought is even more rare than that of the great barren mountains that stretched away to the west and north.

In 1859 the schooner Arno was wrecked on an island a few miles below the mouth of the Hardy. This vessel carried 150 barrels of Kentucky whisky. Shifting tides have changed the channel of the river, but somewhere near the junction of the Hardy and the Colorado this prize liquor lies in a cellar which Nature herself has fashioned. For fifty years it has aged in the wood and if it were uncovered now it is claimed it would be worth more than $100,000.

For years the narrative of this sunken treasure has floated about the ports of the west coast. Frank Norris caught a whiff of it while in San Francisco and wove it into the story of "Blix"; but it is in the sands of the Colorado and not of the Amazon that Norris' treasure ship lies buried.

After enjoying Capt. Mellon's narratives of his adventures in the Gulf of California and along the lower Colorado fifty years ago, some of the members of the party say it might not be impossible for them to discover the original of the Capt. Jack who contributes so much to the interest of Norris' novel.

In the tule swamps along the Hardy the Indians chased wild boars while the explorers filled the larder with wild geese and ducks until they were fairly surfeited with the hunting.

There was a warm rivalry between the sportsmen as most of them are fine shots but when the contents of the game bags were all noted, it was veteran Gen. Chaffee who carried away the prize for marksmanship.

The Indians of the party acted as retrievers, plunging into the water as soon as a fowl was dropped, swimming away to it and bringing it back to the boat. The Indian guide who followed Gen. Chaffee soon learned to jump into the river as soon as he saw the way the gun was pointed and it was only in rare instances that he started in vain.

As they sailed north on the Hardy they sighted a dismantled schooner floating aimlessly about, guided only by wind and tide. This derelict proved to be the vessel in which Arizona Charley sought to rescue some miners who went to Tiburon Island two years ago and forgot to return. The abandoned boat bears mute evidence of the failure of the Arizona Charleys' mission.

When they had cruised for fifty miles up the Hardy river Capt. Smith announced that they were at the head of navigation on that water course. But. Gen. Sherman had made provision for this. At the point where Capt. Smith said they could proceed no further they were met by another party with fresh Indian guides and horses to carry them on the proposed hunting and exploring trip along the slopes of the Cocopah Mountains.

Roaming about through the great valley between the Hardy River and the Cocopah Mountains, they found some volcano lakes in a wonderful little valley that in time may become even more famous than that of the Yellowstone. These lakes are known to the Indians all over the southwest. The section is famed as the home of a great good spirit who possesses power to cast out rheumatism and gout.

There are geysers and steaming caldrons, almost the prototype of those in Yellowstone Park. At one place they found a small body of water that has been described by other travelers as a "lake of ink." Members of the company made some rought tests and found that it was only a pool of mud and hot water.

The acres of great steaming mud baths give promise of some time becoming the Mecca of the sufferers from chronic rheumatism all over the globe.

It was partly to guard this valley of the geysers and the burning lakes that the Colorado River Indians opposed so fiercely the intrusion of the white traders. Some of their medicine men had warned them that the good spirit would leave the valley if the lake of ink should be polluted by the touch of a white man's foot, and that they would all then die of rheumatism.

The almost unbroken seclusion that has attached to this territory during the last fifty years was illustrated well when Capt. Mellon pointed one afternoon to some dismantled buildings on Point Isabel. He said that during the troubles with the Indians of Arizona in the early sixties, the United States government found it convenient to send supplies to Fort Yuma from the mouth of the Colorado River.

A sheltered cove on Point Isabel, just east of Montague Island, was selected and maintained as a shipyard from 1864 to 1876—and the Mexican government never knew that it existed.

The glory of the lower Colorado faded when the Southern Pacific Company built its line to Yuma in 1877; since then the navigation of the lower river has become a lost art. But the reclamation and development of the delta of the Colorado and the Hardy Rivers promises to bring back the ancient maritime commerce and to increase it a thousand fold.

On the slopes of the Cocopah Mountains the explorers hunted mountain sheep and deer. In a number of places they found traces of bear. The chief of the Indian guides expressed confidence that if they would wait for his men to beat the thickets they would be awarded with some rare bear shooting.

But the hunters passed on. Some time they expect to return and spend a fortnight hunting bear in the Cocopah Mountains. When Theodore Roosevelt is no longer President, when he can accept invitations to go hunting outside his own country, he may be one of the party of sportsmen that will go with Indian guides to hunt bear in the Cocopah Mountains and wild boar in the jungles of the delta lands.

On their way to Calexico the party stopped for the night at one of the settlements of the California-Mexico Land and Cattle Company. Almost the whole of the Mexican delta of the Colorado belongs to this company, which is composed of Los Angeles men. It is one of the largest and best cattle ranges in North America.

Resident agents of the company told the travelers that there are 18,000 head of cattle on this ranch at the present time. So vast is the territory that in a day's ride through the fertile delta one may not pass a single herd.

Small-mouthed black bass, gamier than their big-mouthed cousins, are to be placed in the lakes, rivers, sloughs and creeks in the vicinity of Sacramento by Game Warden Geo. Neale, who will procure a supply through the Fish Commissioners, from Ice lake and other waters in Placer and Nevada counties where they are thriving and plentiful. The Sacramento waters are well stocked with the big mouths, where they were planted twenty-one years ago, and afford great sport to the up river anglers.

Stockton anglers find black bass fishing in Whiskey slough and the Calaveras plentiful in results. Fish run from one pound to four in weight. The Dowagiac bait seems to be the killing lure.

Salt Spring valley reservoir near Milton also affords good black bass fishing.

Webber lake fishing is reported to be most excellent at present. Theodore Rothsbild, Harry Gosliner and E. M. Pomeroy, members of the California Anglers' Association left San Francisco this week for a fishing trip to Webber lake. Coming back they will whip the Little Truckee, where it is known fine fly fishing is now in vogue. Further down they will fish several miles of the Truckee before taking train back to Frisco.

Drink Jackson's Napa Soda.

SACRAMENTO VALLEY NEEDS MORE GAME PROTECTION AND APPROPRIATIONS.

Sportsmen of every section in the State, and the Coast as well, are now keenly alive to the necessity of looking after what game and fish are yet in evidence in their particular sections and also the restocking with native birds and fish with the purpose in view of maintaining, as long as it may be possible, a comparatively even balance for gun and rod recreation.

One matter that is deserving the most serious attention of those who are interested in game protection and propagation, both officials and laymen, is that our native game bird, the valley quail, so called, should be given prominence in protection and transplanting—many of the sportsmen enthusiasts are muchly interested in wild turkeys, Hungarian grouse, etc., and seem to overlook a vital matter, that of quail re-stocking. The valley quail is our native game bird and will exist and increase almost anywhere in the State, under proper care and protection. Instances are by no means rare, where quail feed in the yards with domestic poultry. With these birds, transplanting is not an experiment, but a necessity. In many sections the birds have been growing scarcer year by year. Bevies loosed in these quail barren areas will, if allowed so to do without molestation, increase readily. Wild turkeys, grouse, pheasants, etc., placed in the same districts will be to quite an extent an experiment. Better by far to re-stock with birds congenial to the habitat. At the same time the imported birds may also be set loose in the same territory, but by all means, the quail first.

The needs of the Sacramento valley are here given by Mr. A. E. Dunning in the following letter:

Probably nowhere in the State of California, which has vast areas of wild tracts that are admirably suited for the implanting of any number of wild fowl and wild animals, is there a spot more advantageous for the successful stocking of the streams and forests with game fish and game birds than in Sacramento valley and the adjacent country. To the old-timers, many of whom are familiar with almost every foot of laud from border to border aud who are fully aware of the vast possibilities afforded for the stocking of all kinds, it has been a source of regret for years that a stronger effort has not been made for the appropriation of large sums to keep it in a state of plentitude with the wild life that is of such value to the country and which formed a goodly portion of its food annually.

In conjunctiou with the recently puhlished statements of the unexpectedly large sums that have been realized from the collection of the hunting license of one dollar imposed on every aspiring sportsuan, it seems timely to urge the outlay of a goodly portion of tbe surplus of this fund on the game and fish preserves of this section.

When the idea of first placing the tax (for such, to all purposes, it is) on hunters for the collection of revenue and the checking of indiscriminate slaughtering, was originated, it was expected by those who were in favor of the movement that a sum of perhaps $20,000, and possihly $30,000, would be collected, and tbat this sum could well he expended in increasing the number of game wardens and their salaries. This (so the writer was told last November by the presiding officer of the California Fish and Game Protective Association in the regular meeting in Los Angeles) was the primary object of the action. It was found, however, that the fund grew by leaps and hounds, until not only the looked-for $20,000 had been poured into the State coffers, but indications pointed at that time to nearly a full $100,000 being collected. This forecast proved nearly accurate, being however, approximately some $15,000 below the total mark, and now it is understood that there is a surplus of thousands of dollars lying idle at the disposal of the State authorities.

Sacramento sportsmen have already awakened to the fact that there is a need of replenishing the vast resources of the county, for although fishing and hunting look up well this season, at the present death-rate in the wild woods caused by the out-of-door enthusiasts, there will come a time in the near future when these excursionists will begin to return with small hags, and they will wonder why this was not forestalled by the Fish Commission. The preventive laws of this organization have been well framed, so that there is no immediate danger of totally wiping out the present inhabitants of uplands and forests, but new and strange game is hadly needed in this county as well as in the others.

Should the Fish Commission of the State see to it that Sacramento valley and adjacent foothills have a stock of the wild turkeys and pheasants and grouse imported, and the rivers stocked with the valuahle fish, there is little probability that a noticeable hole would be made in the surplus now on hand, and it would be working a great benefit to the State. It is a good idea for the local sportsmen to ponder on, and if the matter should be taken up by prominent residents of this section assurances are many that the desired appropriations could be obtained. California needs this increase to its game habitat. It is up to the sportsmen to unite in a request for some action along the lines suggested that will bring the required result.

—o—

It is reported that hundreds of fine trout are being unlawfully destroyed at the two dams east of Carlin and also at the dam west of Beowawe, Nevada. One report states that the fish are heing dynamited.

TAMALPAIS GAME PRESERVE PROJECTED.

There is at present a movement, that has quite a following of support, for the establishment and maintenance of a game preserve in Marin County. There seems to he quite a deal of enthusiasm among those interested in the proposed preserve. It is claimed that this will ultimately be one of the most attractive and unique features of Marin County if the project for a great game preserve located around the base of Mount Tamalpais is carried out by the men behind it.

It is planned to devote hetween fifteen and twenty thousand acres for a reserve stretching from Mill Valley at the south to White's Hill at the north, and from Larkspur and Escalle on the east to Bolinas on the west, where imported game and game birds can be turned loose to exist in security and be an attraction to the surrounding country.

Mr. John Cushing has been at work for the men at the head of the plan and he has approached all owners whose land is to be included. So far, it is reported, everything looks favorable for the success of the project. This reserve is certain to be of the greatest benefit to Mill Valley and Marin County, and particularly so to one or two hotel resorts, rumor has it, which will be built and maintained nearby.

"Thousands of people will flock to our shores to witness this most remarkable feature of the county," says one interested promoter. "Besides the game now in existence, many different species will be imported. Elks, Japanese pheasants, deer from Mexico and Arizona, wild turkeys and grouse are among those that will be seen running through the forests, perfectly tame because of the lack of molestation by anyone."

The wild turkey and grouse idea is rather Utopian and may not be practical. Better hy far to take care of and propagate tne native quail, they need it sadly.

For five years the reserve will be strictly guarded under the control of the State Fish Commissioners and at the end of that time it will be left to the land owners themselves, whether or not the plan of the reserve shall be continued.

—o—

GAME INCREASING IN IDAHO.

"Deer are on the increase in all parts of Idaho, and in those sections where elk are to be found, they also are increasing. With the proper care and protection of this animal it will be hut a few years until elk can be found in large bands within the borders of our state." So says State Game Warden Stephens. He asserts the increase in deer and elk is due to the destruction of the cougar. According to his report there are 600 mountain sheep in Custer county, and few elsewhere in the State, but they are increasing rapidly, as are the antelope under the protection of a strict law. Some hirds have increased, while others have been on the decrease. In southeast Idaho the grouse is almost a thing of the past. In other parts of the State the grouse is on the increase. Quails have increased in every part of the State where they are found or have been introduced except in Kootenai county, where it is said the ground squirrel has played havoc with the bird. Ducks are on the increase in almost every county in the State. It is claimed that the increase is due to the enlarged feeding grounds and the enforcement of the law forbidding spring shooting.

The last year has been the best for fishing in the history of the State. This is due, it is said, to the abolition of fish ponds in the vicinity of Henry's lake. Mr. Stephens reports that one hatchery has been constructed in Blaine county, another site located in Fremont, and a third to be placed in Kootenai, the location as yet undertermined. Over $15,000 was expended in the one fish hatchery established. The eastern trout, together with the western, will be placed in the streams of the State, not less than 10,000,000 trout to be distributed during 1908.

A pheasant farm has been established near Boise, having 220 birds recently hought in Oregon, and by 1910 the State will have 10,000 hirds, it is estimated, which will then be distributed through the different counties.

The income of the fish and game department has exceeded the disbursements by nearly $6,000. Only 225 predatory animal pelts were delivered to the State during the year.

Mr. Stephens reports that there were 31,241 licenses sold in Idaho in 1907, netting the State more than $30,000. There were ninety-four individuals fined during the year. The number of licenses for 1907 exceeded those of 1906 hy 12,000.

—o—

County Game Warden Vosburgh of Riverside recently made a trip to Banning, Indio and Coachella, where he went to investigate game conditions and learn whether the quail are proving a menace to the farmers, as reported. He found that the birds are not so numerous as to injure the crops to any appreciable extent in any of the sections visited, and he posted notices warning hunters against shooting them out of season. On a three hours' drive in the neighborhood of Coachella, Capt. Vosburgh saw but one quail and about a dozen doves.

As a protection to the birds, he appointed three or four good deputies, who will see that the game laws are not violated.

The latter part of this week Mr. Voshurgh will make a trip to the Temecula country to investigate complaints which have come in from there as to the ravages caused by quail in that section.

ARIZONA GAME PRESERVE DESIRED.

Arizona sportsmen are keenly interested in the splendid hunting and fishing to be found in many favored sections of their territory. Foreseeing the possibilities of future depletion of their streams and the extermination of their furred and feathered game they are thoroughly aroused to the importance of radical measures on the lines of protection and propagation. In this respect a correspondent discusses the situation pertinently and wisely advocates the creating of a game preserve within the boundaries of a national forest reserve as follows:

The proposition to make a game preserve of the Santa Catalina national forest reserve, which includes the Rincons, will appeal to every citizen and sportsman who has an interest in the prosperity and development of Arizona, and more particularly this section of this very promising territory.

The game common in the mountains of the southwest is becoming very scarce. Not many years ago deer and antelope were plentiful, and turkeys could he found in the Catalinas and were ahundant in the Rincon mountains.

What is the condition in those mountains now? There are a few deer, a small band of mountain sheep and not a turkey.

Do the people of Benson, Tucson, Phoenix, and the smaller towns, know what the summit of the Catalinas contain? It is very evident they do not realize that so close to them there is a heavy forest of pine, spruce and fir trees, with springs and crystal clear streams of water, and a delightfully cool summer climate. In fact, there is everything that goes to make the high mountains health-giving and delightful. It is understood that a dozen or more well known residents have established summer camps in these mountains. In a few years, however, many hundreds of our people will go to these mountain tops to escape the heat of summer and get in touch with nature.

It is an imperative duty of this generation to look after certain great interests which will affect the prosperity of those who are to come after us. Unless some action is taken soon, within a few years there will be no game left in the Santa Catalina and Rincon mountains.

The forest reserve should also he created into a game preserve. Such refuges for game are being created all through the western states, the movement being in line with the conserving of all our natural resources. It is not too late now, but it will soon he.

There is a remnant of game remaining that filled these and other ranges of mountains. Let hunting be not permitted, as at present on other mountains, but take this opportunity to save the game so that all who wish may have the opportunity of a week or a month in the mountains, where deer, mountain sheep may be seen in their native home. More people will take advantage of a mountain trip where no bullets are flying through the air. This advantage will appeal particularly to our women and children.

But without gush or sentiment, from the standpoint of true sportsmanship, give the game a fair deal and allow them a breeding ground of at least one range of mountains out of the many that occur in southern Arizona. The movement must come from the people. The forest service is heartily in favor of the protection of game, and will furnish a force adequate to patrol the preserve, the present range force to he increased.

The United States government hires hunters and trappers, and issue permits for the killing of all predatory animals. In fact, this work is pushed more vigorously within our national game preserves than it is without such areas. The benefit to the stock industry is direct and very material in amount.

There are two methods for bringing about the creation of a game preserve. One is to petition congress through the territorial delegate; and the other is to take action through the territorial legislative body securing a continuous close season on all game. The first one is the usual method adopted hy communities generally. The movement in this line is a very popular one, and congress has shown itself most heartily in favor of the creation of game preserves.

—o—

There is a lumpy feeling prevailing among the members of the Del Paso Outing Club just now. For many seasons past the capitol city sportsmen enjoyed the splendid shooting and excellent fishing on the club preserve located withiu the boundaries of the Haggin grant. This preserve has been deservedly famous for more reasous than one. It is safe to say, that nowhere in the United States can be found so prolific a club preserve as close and easy of access to a large city as that of the Del Paso Club.

What causes the down hearted feelings with the up river boys is the report that the Haggin tract is to he sold and sub-divided into city lots. Just think of it, a hunting preserve, that for years past has been more than ample for a club of 30 or more members, adjacent to a large and populous city, the capitol of the State, must now by reason of the growing needs for more municipal room be split up into lots for residence purposes. This condition can not be paralleled anywhere in the country we are sure. One consolation remains, the club is sure of the use of the preserve for the coming season anyway.

—o—

A rod and reel club will be organized at Ocean Park by salt water anglers of that delightful southern beach resort.

SANTA CRUZ SHOW.

After all the fulsome notices in the daily press of San Francisco, San Jose, Santa Cruz and other points and even with the prestige of the names of the Lieutenant-Governor of California and a prominent clubman of San Francisco as president and vice-president of the Sauta Cruz Kennel Club the show was practically a frost. Out of 132 dogs entered there were hut 92 benched and that for a three day show—40 dogs were absent. This cuts no figure with the promoters for it is reported that the club (?) will give another show in August.

The dates for this show were a month or more too early in the season, an oversight a practical show promoter would not have made.

The main support of the show came from San Francisco and at that there was a chilling vacancy of the regulars at the surf city show. The Pacific Coast Pointer and Setter Club for one, apparently sidestepped the dog hroker judge, the support in those breeds was very light—5 English Setters, (4 of nine absent), 4 Pointers. 3 Gordons (1 absent), 2 Irish Setters. 3 Irish Water Spaniels. Most of the classes were of the one two entry variety. This gives owners of mediocre dogs a chance to boast of easy wins and is disappointing to owners of good ones who win without competition.

Collies were the strongest breed, 17 entered 3 absent. Valverde Kennels taking the principal honors over an ordinary lot, barring Dictator. Valverde Faultless, in for specials only, also won the president's trophy for best in the show and another special for best bitch. Valverde Valor won first dog puppies and V. Verona and V. Prim won the honors in bitches.

Cockers numbered 16 entries with three absent. In blacks the well-known Ch. Searchlight won out. In bitches the red Brownland Babbie annexed the honors. Both dogs were hrought to the Coast hy the judge last year. Gay Lad, a bit over in flesh, took the rihbons and special for parti-colors. Lad is a recent importation from the East and was reserve winners to Gypsy Cbief at Frisco.

Bostons, 11 shown and one absent, Ch. Dick Dazzler who was on the sick list. Ch. Boylston Prince II (a dog the judge brought out from the East this year) was placed first in his classes and for the special. Hazelwood Statesman, a recent importation of Wonderland Kennels was second open and winners. In bitches Wonderland Kennels Clancy III was first winners and won the sex special. A very good Dick Dazzler puppy Millbrae Allie won out in bitch puppies and also the best puppy special.

The principal specials, aside from the win of V. Faultless were the following:

Lieutenant Governor's trophy for best of opposite sex to winner of president's trophy—T. J. Cronin's Black Tralee (Greyhound).

For best in Ladies' Variety Class—Mrs. J. P. Norman's Toreador Venus (Bull-bitch). For best of opposite sex—Mrs. C. J. Lindgren's Chihuahua Toy (Chihuahua).

For best in Championship Class—Toreador Venus (1 entry).

Brace Class—First, T. J. Cronin's Black Tralee and Fourpaw (Greyhounds). Second, W. H. Dennis' Twinkle and Cymbeline (Cockers).

Best dog owned in Santa Cruz county—J. Kennaugh's Zar (St. Bernard).

Best bitch owned in Santa Cruz county—S. O. Andros' Arroyo Affiliate (Boston Terrier).

Awards.

St. Bernards, Puppy dogs—1 V. Hubel's Bruno. Local dogs—1 J. Kennaugh's Zar; 2 Bruno. Limit dogs—1 W. J. West's Don. Open dogs—1 Don. Puppy hitches—1 Mrs. J. Merkt's Topsy. Winners, dogs and bitches—1 Zar, res. Don.

Special—N. J. Stewart trophy for best, Zar.

Great Danes. Open and winners dogs—1 J. Snook's Dick. Limit bitches—1 C. G. Saxe's Ermine. Open bitches—1 Mrs. C. G. Saxe's Ch. Princess Harlequin. Winners bitches—1 Ch. Princess Harlequin, res. Ermie.

Special—Trophy for best, Ch. Princess Harlequin.

Greyhounds. Limit dogs—1 P. Lenahan's Tralee's Last. Open and winner's dogs—1 P. J. Cronin's Black Tralee. Limit bitches—1 C. L. Southgate's Troy Maiden, 2 S. E. Portal's Rainier. Open bitches—1 T. J. Cronin's Fourpaw, 2 P. Lenahan's Servant Girl. Winner's bitches—1 Fourpaw, res. Servant Girl.

Special—The judge's trophy for best, Black Tralee.

Pointers. Local dogs—1 Mrs. W. M. Aydelotte's Duc Ay. Limit dogs (under 55 pounds)—1 J. W. Gibb's Mike Geary. Winners dogs—1 Mike Geary, res. Duc Ay. Limit and winners bitches (under 50 pounds)—1 Fred P. Butler's Sunshine.

Specials—Trophy for best, Chas. Holman's Ch. Joaquin.

English Setters. Puppy dogs—1 F. P. Butler's Sven C., 2 M. Perry's The Roman. Novice dogs—1 The Roman. Open dogs—1 Fred P. Butler's Ch. Tiverton. Winners dogs—1 Ch. Tiverton, res. Sven C. Puppy and winners bitches—1 W. G. McMahon's Nona III, 2 V. Kuehn's Mallwyd Victoria.

Specials—Trophy for best dog, Ch. Tiverton. For best bitch, Nona III.

Gordon Setters. Puppy dogs and bitches—1 C. G. F. Moale's Madame Butterfly. Limit bitches—1 Madame Butterfly. Opeu bitches—1 A. L. Holling's Ch. Flora B. Winners bitches—1 Ch. Flora B. res, Madame Butterfly.

Special—Trophy for best, Ch. Flora B.

Irish Setters. Limit and winners dogs—1 Mrs. S. H. Hodgkins' Spuds. Novice and winners hitches—1 W. J. Heney's Leal.

Special—Trophy for best, Leal.

Irish Water Spaniels. Open and winners dogs—1 W. V. N. Bay's Our Cbance Jr. Junior, limit and open (Pacific Coast bred)—1 P. O'Ryan's Irish Nell. Open and winners bitches—1 Irish Nell, 2 W. V. N. Bay's Frisco Dot Malone.

Special—Trophy for hest, Our Cbance Jr.

Field Spaniels. Local and winners dogs—1 Mrs. A. C. Rennie's Taps II.

Cocker Spaniels. Black. Puppy dogs—1 G. A. Niehorger's Uvas Surprise. Local dogs—1 Mrs. F. Budgett's Sambo, 2 M. E. Neary's Mr. Dooley. Novice dogs—1 Samho. Open dogs—1 Miss A. Wolfen's Ch. Searchlight, 2 Uvas Surprise. Winners dogs— 1 Ch. Seachlight, res. Uvas Surprise. Local bitches—Mrs. A. C. Rennie's Fraud. Limit bitches—1 Mrs. L. M. Mack's Kentucky Bess, 2 W. H. McKay's Lassie Katbleen, 3 Mrs. F. E. Adams' Cressella Nell. Open hitches (Pacific Coast bred)—1 Kentucky Bess. Opeu bitches—1 W. H. Dennis' Twinkle, 2 Cressella Nell. Winners bitches—1 Twinkle, res. Kentucky Bess.

Cocker Spaniels. Other than black. Puppy dogs—1 V. J. Ruh's Beacon Light. Junior dogs—1 V. J. Ruh's Prince Chap, 2 Beacon Light. Novice dogs—1 Prince Cbap. Limit dogs—1 W. Blackwell's Gay Lad, 2 Prince Chap, 3 Beacon Light. Open dogs, parti-colored—1 Gay Lad. Open dogs—1 Prince Chap, 2 Beacon Light. Winners dogs—1 Gay Lad, res. Prince Chap. Limit bitches—1 Miss L. Murray's Golden Grain. Open bitches, parti-color—1 W. H. Dennis' Cymbeline. Open bitches—1 K. N. Stevens' Brownland Babbie, res. Cymbeline.

Specials—Trophy for best black, Ch. Searchlight. Trophy for hest of opposite sex, Twinkle. Trophy for best red, Brownland Babbie. Trophy for best parti-color, Gay Lad.

California Cocker Cluh specials—Trophy for best dog, Ch. Searchlight. Trophy for best hitch, Brownland Babbie.

Pacific Sheepdog Club medal for best in local class —Sambo.

Dachshundes. Limit dogs and bitches—1 Mrs. P. Honeman's Queen Honeman. Open dogs and hitches —1 Mrs. S. St. L. Cavill's Ch. Nordica, 2 Alex Kaiser's Gretchen, 3 Queen Honeman. Winners dogs and bitches—1 Ch. Nordica, res. Gretchen.

Special—Trophy for hest, Ch. Nordica.

Dalmatians. Local dogs—1 Dr. E. P. Vaux's Spot V.

Bulldogs. Puppy, junior and novice dogs—1 Geo. H. Young's Ross Billy. Open dogs—1 A. H. Hayes' Jr.'s Ch. Endcliffe Advance. Winners dogs—1 Ch. Endcliffe Advance, res. Ross Billy. Puppy bitches—1 Ch. Harker's Magnolia Buzz. Limit bitches (under 40 pounds)—1 U. E. Methever's Magnolia Fawn. Open bitches (American bred)—1 Mrs. J. P. Norman's Ch. Toreador Venus. Open bitches (Pacific Coast bred)—1 Toreador Venus. Winners bitches—1 Toreador Venus.

Specials—Trophy for hest dog, Ch. Endcliffe Advance. Trophy for best bitch, Ch. Toreador Venus. Tropby for best Pacific Coast bred bitch, Ch. Toreador Venus.

Pacific Bulldog Club specials—Trophy for best, either sex, Ch. Toreador Venus. Trophy for best in puppy, junior or novice classes, Ross Billy.

Airedale Terriers. Open and winners dogs—1 Thayerdale Kennels' Ch. Motor Dace. Open and winners bitches—1 Thayerdale Kennels' Ingafield Wild Rose.

Specials—Trophy for best, Ch. Motor Dace. Pacific Sheepdog Club medal for best in open, Ch. Motor Dace.

Bull Terriers. Puppy dogs—1 Miss Louise Easton's Wonderland Jim Woods. Junior dogs—1 Mrs. W. J. Keay's St. Felix Tang. Limit dogs (not over 30 pounds)—1 Wonderland Jim Woods. Limit dogs (over 30 pounds)—1 John Cawkwell's Silkwood Surprise, 2 St. Felix Tang, 3 Miss J. A. Crocker's Silkwood. Open dogs (not over 30 pounds)—1 Wonderland Jim Woods Open dogs (over 30 pounds)—1 Silkwood Surprise, 2 Silkwood. Winners dogs—1 Wonderland Jim Woods, res. Silkwood Surprise. Novice bitches—1 Mrs. H. V. Bridgeford's Silkwood Gaiety Girl. Limit bitches (over 30 pounds)—1 Silkwood Gaiety Girl. Open hitches—1 Mrs. G. Flexner's Lady Hazel. Winners bitches—1 Lady Hazel, res. Silkwood Gaiety Girl.

Specials—Trophy for best dog, Wonderland Jim Woods. Trophy for best bitch, Lady Hazel.

Boston Terriers. Local dogs—1 A. Holbek's Oarsman's Spider. Limit dogs (under 22 pounds)—1 Miss J. A. Crocker's Hazelwood Statesman, 2 Miss J. A. Crocker's Frisco Cinders. Limit dogs (over 22 pounds) —1 Oarsman's Spider. Open dogs (under 22 pounds) —1 Arroyo Kennels' Ch. Boylston Prince II, 2 Hazelwood Statesman, 3 Frisco Cinders. Open dogs (over 22 pounds)—1 Oarsman's Spider. Winners dogs—1 Ch. Bolyston Prince II, res. Hazelwood Statesman. Puppy bitches—1 Millbrae Kennels' Millbrae Allie, 2 W. J. Stevens' Muggins of the Golden Gate. Novice bitcbes—1 Miss J. A. Crocker's Little Mother, 2 Muggins, etc. Local bitches—1 S. O. Andros' Arroyo Affiliate. Limit bitches (under 22 pounds)—1 Arroyo Kennels' McCusker's Butternut, 2 Arroyo Affiliate. Limit bitches (over 22 pounds)—1 Miss J. A. Crocker's Clancy III, 2 McCusker's Butternut. Open bitches (over 22 pounds)—1 Little Motber. Winners bitches—1 Clancy III, res. Millbrae Allie.

Specials—Trophy for best dog, Ch. Bolyston Prince II. Trophy for best bitch, Clancy III. Trophy for best puppy, Millhrae Allie.

Fox Terriers, Smooth. Open and winners dogs—W. W. Stettheimer's Tallac Marlin. Limit bitches—1 W. W. Stettheimer's Tallac Orchard. Open bitches —1 W. W. Stettheimer's Tallac Seabreeze. Winners bitches—1 Tallac Orchard, res. Tallac Seabreeze.

Special—Trophy for hest dog, Tallac Marlin. For best bitch, Tallac Orchid.

Fox Terriers. Wires. Puppy, junior and novice dogs —1 J. Oliver's Humberstone Joker. Limit dogs—1 J. Oliver's Humberstone Jack. Open dogs (American bred)—1 Humberstone Jack. Winners dogs—1 Humberstone Joker, res. Humherstone Jack. Open and winners bitches—1 I. C. Ackerman's Cb. Humberstone Hope.

Specials—Trophy for best bitch, Ch. Humherstone Hope. For best dog, Humberstone Joker.

Irish Terriers. Junior dogs—1 W. E. Foley's Clan-Na-Gael. Limit and open dogs—1 Millbrae Kennels' Endcliffe Curate. Winners dogs—1 Endcliffe Curate, res Clan-Na-Gael. Open and winners bitches—1 Arroyo Kennels' Ch. Arroyo Enigma.

Special—Trophy for best, Endcliffe Curate.

Toy Poodles. Open bitches—1 Miss Vera Lindgren's Black Eyed Susan.

Special—Trophy for hest, Black Eyed Susan.

Chihuahuas. Limit, open and winners dogs—1 Mrs. C. J. Lindgren's Chihuhua Toy.

Special—Pacific Sheepdog Club medal for best, Cbihuahua Toy.

Italian Greyhounds. Open and winners dogs—1 Mrs. W. A. Dean's Ch. Duke II.

Special—Pacific Sheepdog Club medal for best, Ch. Duke II.

Brace Class—1 T. J. Cronin's Black Tralee and Fourpaw (Greyhounds), 2 W. H. Dennis' Twinkle and Symbeline (Cockers).

Champion Variety Class—1 Mrs. J. P. Norman's Ch. Toreador Venus (Bulldog), 1 entry.

Ladies' Variety Class—1 Miss J. P. Norman s Cb. Toreador Venus, 2 Mrs. C. J. Lindgren's Chiuahua Toy, 4 entries.

There were 190 classes listed in the catalogue. For a three day show it seems to have heen an overlook not to have issued a marked catalogue. Possibly the light gate and the fact that the salary list is said to have been rather plethoric made tbe marked catalogue superfluous.

All in all, properly managed, there is no reason why Santa Cruz could not bold a very good show once a year.

The officers of the cluh are: R. M. Hotaling of San Francisco, president; Lt. Governor Warren Porter of Santa Cruz, vice-president; Norman J. Stewart of San Jose, secretary; J. P. Norman of Berkeley, treasurer. Bench sbow committee: Charles R. Harker of San Jose, N. J. Stewart, Dr. Waters, George W. Sill. Superintendent, Louis Haff of San Francisco. Veterinary, Dr. L. G. Kraker of San Francisco.

Judges: W. H. Carmichael of San Jose, Mastiffs (1 entry, absent), Greyhounds (seven entries, 1 absent), Old English Sheepdogs (no entries). J. Bradshaw of Pasadena all other hreeds.

Entries for the Oregon Derby close July 31st, for the all-age August 31st. The Derby is open to all, for dogs whelped on or after January 1st of the year preceding the trials, $5 to nominate, $10 to start; $200 purse guaranteed—first $100, second $60, third $40. All-age, open to all, $10 to nominate, $10 to start, $300 guaranteed—first $150, second $90, third $60. These purses will be increased materially by the entries, it is believed.

Honolulu premium lists were received by Frisco fanciers this week. It is very probable that a string of dogs will be sent over from this city. The dates are July 20th to 23rd inclusive. George A. Granfield will judge all breeds. Entries close July 11th with C. T. Littlejohn, secretary-treasurer, Honolulu, T. H. P. O. Box 826. The entry fees are $2.50 for the first class and $1.00 for each additional class. The club rules are similar to those in vogue with clubs on the mainland, save in a few local differences. The classification is full in nearly every breed. The list of specials will be announced in the catalogue. From the ear marks of the second annual premium list it looks as if this show will be a vast improvement over tbe first one. We wish the Hawaiian Kennel Club every success that goes with a function promoted by sportsmen and in the interest of the fancy.

We are prepared to give the addresses, to any of our readers interested, of the owners of some grandly bred English Setters. Dogs ready to traiu for the fall hunting season.

Reports from Valverde Kennel are tbat Valverde Caprice (Ch. Wishaw Leader ex Ch. Xautippe of Moreton) has a grand litter of 10 puppies (6 dogs) hy Ch. Anfield Model. Southport Supreme, the dam of the good ones, Valverde Viola and Valverde Vera, is looking after another Model litter of seven (6 dogs). Ch. Valverde Faultless was recently served by Ch. Anfield Model. This nick will he watched with much interest, the chances for something in the "higher up" line are keen.

Venice entries close July 15th.

Early fishing in the Bear Lake district is said to be better than in previous years and to promise finer midsummer luck than in many years. A new wagon road has been opened to this region from Redlands.

AT THE TRAPS.

Fred Harlow of Newark, O., won the ninth Grand American Handicap after shooting off a tie on Friday, June 26th, with Woolford Henderson of Lexington, Ky. Over 316 contestants (including post entries) started in the premier event of the tournament on Thursday morning. Harlow and Henderson were high guns with 92 out of 100—a remarkably low score compared with past results in this event. In shooting off Harlow broke 18 out of 20, Henderson scored 17.

California Wing Club members and guests will shoot live birds at Ingleside to-morrow at the regular monthly club shoot.

Empire Gun Club blue rock shooters will meet at Alameda Junction to-morrow.

The San Pedro Gun Club, organized June 18th, held the initial practice shoot June 21st at the club grounds near Thirtieth street, south of the Government reservation. Challenges will be sent to other clubs soon. The officers of the club are: President, Coby Eyster; vice-president, Howard Martin; secretary-treasurer, J. A. Weldt; referee, F. D. Foot; scoreman, F. S. Whitman. More than 100 members are already enrolled. Shoots are held Wednesday and Sunday afternoons at 1:30 o'clock.

The Glendale Gun Club will hereafter hold its regular shoots on Saturday afternoons of each week. Everybody in Glendale is invited to attend. The range will be closed Sundays.

A re-union of northwest trap shooters took place at Portland, Ore., June 21st, on which occasion shooters were present from various Coast cities. One result of the meeting was the organization of the "Western Indians Association." The new association is arranged on the same lines and for similar objects in view as the "Indians"—a body of Eastern and Middle Western sportsmen famous equally on the firing line and for good fellowship. Every effort is being made by the northern shooters to push the new organization ahead to perfection. Should these endeavors result favorably before winter it is contemplated to hold the biggest shoot ever pulled off in Portland. There will be, it is reported, at least $2,000 in cash prizes hung up.

The Multnomah Rod and Gun Club "invitational" trap shoot June 21st was attended by a bunch of experts from many different points on the Coast. F. Riehl the Tacoma crack, was high gun with 143 out of 150, 96 per cent and that is going some. Over one-half of the boys who shot at 150 targets scored more than 90 per cent and that is going some more. The results, summarized, were the following:

Riehl, Tacoma, shot at 150, broke 143, 96 per cent; W. Caldwell, Portland 150-138—92; J. E. Enyart, Medford 150-138—92; A. Wagner, Portland 150-138—92; E. W. Cooper, Tacoma 150-137—92; H. Ellis, Portland 150-136—91; J. C. Jensen, Idaho 150-136—91; W. A. Robertson, Portland 150-136—91; Spencer, Pendleton 150-136—91; E. E. Young, Portland 120-109—91; J. Cooper, Tacoma 150-134—90; M. Abraham, Portland 150-134—90; E. E. Ellis, Seattle 150-133—89; Cullison, Portland 150-132—88; Carlton, Portland 150-131—88; J. Dillon, Portland 150-131—88; Payton, Roseburg 150-130—87; R. Shangle, Portland 50-42—84; Barkley, Prescott, Wn. 150-122—82; D. W. Fleet, Montesano, Wn. 130-115—77; F. Howe, Portland 150-115—77; Hudson, Portland 60-44—74; C. Logan, Tacoma 150-109—73; Worlen, Portland 90-62—70; E. W. Ougon, Portland 110-71—65; L. Young, Portland 100-60—60; Catterlin, Portland 25-60—44.

The warm up was at 10 targets, followed by seven 20 bird races. W. A. Robertson, formerly of San Francisco banged out 91 per cent with Infallible. There was $150 added money. The Tacoma shooters seem to have dipped into the purse strongly.

The Crescent Beach Gun Club, with which was recently consolidated the Western Gun Club of Los Angeles, is the largest smokeless powder organization in Southern California.

It is proposed to hang up added money purses of $500 at least, if not more, for the three day tournament next month. The committee on arrangement is composed of R. H. Bungay, secretary of the club; C. B. Pettis, G. B. Snyder, B. E. Carter, H. L. Mitchell and Charles Anderson. C. E. Gillon is president. It is expected that no fewer than fifty contestants will appear in the various events.

A big merchandise event will be one of the features of the third day's program. Another agreeable feature will be a shoot for all contestants who have shot under 80 per cent the first two days. The incentive for a higher percentage will be a $50 purse.

Bob Bungay was again high gun on June 21st. The results were: R. H. Bungay 190—171; Vetter 85—44; Vaughan 120—104; Lane 165—143; Wood 145—111; Greenway 125—85; R. H. Smith 140—101; Dr. Wool 85—64; J. Smith 145—112.

The National Trapshooters' tournament at Cedar Point, under the auspices of the Indian Shooting Association, came to an end June 19th after consuming five days, the last four of which were devoted to actual competition and the other to preliminaries. W. R. Crosby, of O'Fallon, Ill., won out in the trophy class, for which the contestants each shot at 700 birds during the four days. Crosby had but one point to spare, however, having a total of 670, while L. R. Barkley of Chicago, followed him with 669. R. O. Heikes, the Ohio champion, totaled 666 and won fourth place. John A. Flick of Cleveland, was distanced in the trophy class after showing good form the first day. E. H. Tripp of Indianapolis, carried off honors in Friday's shoot by having a perfect score of 100. The scores for the twenty leaders follow: W. R. Crosby 670, L. R. Barkley 669, G. S. McCarthy, Philadelphia, 668, R. O. Heikes, Dayton, 666; C. M. Powers, Decatur, Ill., 659; W. H. Heer, Concordia, Kan., 659; Fred Gilbert, Spirit Lake, Ia., 657; S. A. Huntley, Omaha, 657; George Roll, Blue Island, Ill., 641; E. O. Bower, Sisterville, W. Va., 640; J. W. Garrett, Colorado Springs, Col., 639; H. Fleming, Pittsburg, 636; H. W. Kahler, Denver, 636; L. B. Fleming, East Liberty, Pa., 636; Tom A. Marshall, Keithsburg, Ill., 632; George Mackie, Scammon, Kan., 632; L. J. Squier, Wilmington, Del., 632; J. A. Elliot, New York, 626; J. F. Mallory, Parkersburg, W. Va., 626; J. M. Hughes, Milwaukee, 625. Heer won the Mallory trophy cup on the final day by breaking 47 out of 50. He was closely pushed by several experts.

James T. Skelly shot in excellent form, he was one bird behind the high averages one day and one short of the top score in the cup event. Considering the company he was doing some shooting.

W. H. Price is now located at 636 Market street, room 24, opposite the Palace Hotel. "Bill" says he is better prepared than ever to do all kinds of gun repairing, stocking, boring, bluing, or such alterations as may be required.

The deer and the dove seasons open July 15th. Is your gun in first-class condition? Did you clean it after your last shoot?

The shooters of Clovis, Cal., hold regular weekly trap shoots. At a recent Sunday shoot the scores were: First event, club race, 30 targets: Fraler 22, Clay 23, Carr 20, H. Atkinson 16, Mitchell 19.

Second event, 10 targets—Fraler 6, Clay 5, Carr 8.

Third event, 15 targets—Fraler 11, Carr 10.

Fourth event, 10 targets—Frcler 7, Carr 6, Clay 5.

Fifth event, 25 targets—Fraler 16, Mitchell 16, Carr 21, Clay 16, H. Atkinson 20.

The club has received a handsome trophy donated by the Dupont Powder Company, to be shot for weekly for the balance of the season.

The club has secured a lease of a section of fine quail shooting ground in Madera county with a good cabin with bunks, stove and fire-place in it.

Auburn, Colfax and Loomis shooters will gather at Auburn to-day for a blue rock shoot. Considerable rivalry exists between the scatter gun artists of those cities. Loomis shooters have twice vanquished the Auburn powder burners, to-day the latter will endeavor to turn the table. A sharp eye will be kept on the Loomis teams, for, it is stated, so zealous are they to keep in ascendancy over Auburn that several "ringers" may be introduced.

Carson City shooters "wiped the eyes" of the Gardnerville contingent June 21st at Carson City. The "Mud Hens" were beaten by the Carson shots by a score of 6 to 2 events. In the main event the Nevada capitol city team won by a margin of 22 targets. Douglas was high gun with 23 out of 25, Crow followed with 21 and Bright broke 20. Arrangements are being made for a return shoot. Over 500 spectators watched the shooters.

The third Eastern Handicap at targets will take place in Boston, July 14th, 15th and 16th, under the auspices of the Association of Palefaces.

H. W. Hagen of San Mateo, a popular angler sportsman of that city has secured an allottment of fry for that section. Pescadero creek and its tributaries is to be stocked with 40,000 rainbow trout, which should bring those streams back to their old time reputation for fishing in a few years. Hagen is bearing the expense and made his application to the Fish Commission through Deputy Game Warden J. S. Hunter, who perfected the necessary arrangements.

Reports from the Truckee river are that the cold weather is holding back the fly fishing, but that the trout are rising well in the four-mile stretch between the Lime Kilns, three miles distant from Truckee City, and Prosser Creek.

Anglers who visited the Klamath Lake region early in the season state that they were forced to resort to bait and spoon fishing to get results. Fly fishing is just beginning.

IT WILL DO THE SAME FOR YOU.

Chas. E. West, Goteba, Okla., writes under date of November 15, 1907: "I purchased your Absorbine from the druggist and applied it according to directions for Bog Spavin and had grand success. One bottle was enough to do the work. I can give high praise for your Absorbine and shall recommend it for Bog Spavin above all other medicines that I tried, and I tried a good many different kinds." If you have a lame or blemished horse in your stable get a bottle of Absorbine to-day and you will be surprised at the satisfactory results you will get. Absorbine removes bunches, kills pain and cures lameness without blistering or removing the hair; horse can be used. Mild and positive in its action and cures to stay cured. Try a bottle to-day and you will find it a necessity in your stable hereafter. At all dealers or express prepaid upon receipt of $2.00. W. F. Young, P. D. F., 54 Monmouth Street, Springfield, Mass.

LATE RACING.

Every year the same question is asked, why the great race meetings take place so late in the season when the horses are ready nearly two months before, writes Hawley in the Stock Farm. Thus far the question has never been answered, and until some enterprising association gives an important meeting on the first of June, the trainers, who prolong the agony of their own methods, will continue to follow the same tactics. The fact of the matter is that trainers who have in their stables trotters of real merit can get them ready by the first of June, and frequently do so, while those who are dependent on the per diem of each horse are some times tempted to put off the evil hour at which time the owner must be told of the lack of capacity of his horse. It is a very easy matter to extend the training time until the bill of expense has reached its proper proportions. It is of course somewhat trying on a trainer whose livelihood is dependent on his profession to notify an owner that his horse is worthless, and it is also much easier to postpone the time of starting in which the horse is to prove this fact than it is to show him up at the beginning of the season. In justice to trainers, however, it should be said that the average owner is willing to be fooled. In fact tries to deceive himself, and if he is keenly enthusiastic, would rather live in the hope that he owns a great trotter than witness his failure. That horses can be got ready on the first of June has been proved so frequently that it should not be necessary to call attention to it, except that trainers so frequently plead an inability to accomplish this. The present season in Kentucky particularly has been a very backward one owing to the amount of rain fall. The track has been wet much of the time, and yet on the first of June a dozen two-year-olds have shown their ability to beat 2:30, an aged trotter has been a mile in 2:09¼, and many others could start to-morrow in races and do themselves justice. At Poughkeepsie many of the older horses have been miles very close to 2:10, and those who have not have been brushed fast and are ready for very creditable performances. The stables that have wintered at Memphis have wintered at Memphis have been ready for a month, and their trainers will find their only trouble in keeping them fit for their engagements which begin during the latter part of the summer and in the midst of the heated term. One has but to read the summaries of the early amateur races to learn how quickly matinee horses can be got ready, and halves in 1:02 or 1:03 during the latter part of May are almost an every day occurrence. It is quite true that if the Grand Circuit meetings began in the early part of June, the horses who took part in the racing would, if the present conditions prevailed, be in a sorry plight at the end of the year, for flesh and blood could not stand such a strain as four or five months' racing under the three-in-five plan with protracted scoring, which is a feature of light harness racing. When those in authority awaken to the realization that light harness racing must be popularized, important meetings will be given in the early part of June, dashes and repeats, two-in-three, will take the place of the old fashioned system, and the attendance will be twice as large as it now is.

GREATER UNIFORMITY IN RULES.

Says the Trotter and Pacer of New York: "Representatives of the National and American Trotting Associations met at the Murray Hill Hotel in this city last week, for the purpose of bringing about closer relations and greater uniformity of action in the matter of framing and enforcing the rules of harness racing. Those present at the conference were Major P. P. Johnston, president, and W. H. Gocher, secretary, of the National Association, and W. F. Ijams, president, and W. H. Knight, secretary of the American. The announced result of the meeting was an agreement to hold the biennial meetings of the two associations on the same dates hereafter, and to maintain uniformity as far as possible in amendments to the turf code, a joint committee being the means of effecting this purpose. The joint committee will meet before the regular congress of each association and will recommend the course to be pursued in changing the rules. In order to carry out this agreement, the American Trotting Association will change the dates of its biennial congress to coincide with those of the National, which holds its meetings in even years, on the second Wednesday in February."

J. D. Chappelle has returned from Victoria, B. C., where he took a stable of trotters and pacers to race in the spring meeting. He reports lots of interest and a successful meeting. He won the free-for-all trot and pace with Iowa Boy in 2:17½, equaling the track record. He also won the silver cup for gentlemen's roadsters with his pacer, The Prince.

THE TIMES—MIRROR COMPANY.
The largest paper in the world, Circulation Dept.

Los Angeles, Cal., May 1, 1908.

Tuttle's Elixir Co.,
1821 New England Avenue,
Los Angeles, Cal.

Gentlemen:—I cannot too highly recommend "Tuttlee's Elixir". It has genuine merit. Both the veterinary and family remedies I have used extensively with the best of results. For lameness, sprains, bruises, etc., it has no equal. No household can afford to be without it.

Yours very truly
H. S. NOY

THE FARM

BREEDING FOR COLOR IN SHORTHORNS.

In his paper in Nature, Professor James Wilson of Dublin, gives the following statements and results of an examination of records as to color in Shorthorns, in illustration of the application of Mendel's law of inheritance:

1. Red crossed by red should give red calves.

2. White crossed by white should give white calves.

3. Red crossed by white should give roans.

4. Roans in-bred should give reds, white and roans in the proportion 1, 1, 2.

5. Roans crossed by reds should give roans and reds in equal proportions.

6. Roans crossed by white should give roans and whites in equal proportion.

This, giving heed to the expected exceptions as indicated above, is what we find, viz:

Four hundred and thirty-eight reds crossed by red give 413 red, 25 roan.

Three whites crossed by whites give three whites.

Seventy-one reds crossed by white give 3 red, 68 roan.

Five hundred and fourteen roans crossed by roans give 152 red, 278 roan, 84 white.

Four hundred and fifty-six roans crossed by reds give 226 red, 230 roan.

Twenty-three roans crossed by whites give 14 roan, 9 white.

For the breeder of Shorthorns this means that if he wishes to avoid white calves, he is limited to three crosses, viz: red with red, red with roan, and red with white. He gets whites when whites are bred together, when whites are bred with roans, or when roans are bred together.—London Live Stock Journal.

POULTRY NOTES.

If there is such a thing as vermin about the poultry premises, it will find the little chick and nothing but heoric measures will rid a premises of the pest.

The farmer can make money on eggs if he can get the eggs. If he can produce eggs, and he ought to do this about as easy as to raise wheat or oats or barley.

A writer in Poultry Success insists that white diarrhoea is hereditary. His plan of combatting it is to be careful to keep none of the chicks affected with this trouble for breeders. By this means he claims to keep his flock reasonably free from this dreaded complaint.

The hen is the best property on the farm; the cow second best, and the horse stands third. We, of course, refer to profit, if we referred to use we would say horse is man's best friend. It takes all these to succeed on the farm, but the hen will bring money right along, all the time.

Grease of any kind is very sickening to a chick, and yet a drop of oil on the head, one on the back and under each wing, we mean just the thinnest drop, will rid the chick of vermin. The same end may be accomplished by dusting the chick with insect powder. The powder is less apt to effect the chick, but is not one-half as efficient as oil in riding the chick from vermin.

A local poultry dealer makes sport of the idea of white diarrhoea being hereditary, but insists that it is the result of feeding. He feeds dry, raw feed. Starting in first, he puts grit before the little fellows and then gives bran and shorts, just dampened a little. A few days later he gives chopped feed. The chick is out of danger from this complaint when three weeks old.

CARE AND FEEDING OF TURKEYS.

Young turkeys are harder to raise than chicks or ducklings, and, in order to succeed with them, more pains must be taken to study their nature and habits.

The natural tendency of the turkey is to roost where night overtakes it, and in time the wild animals are apt to diminish the flock.

This can all be avoided by an inexpensively constructed roosting place, which can be made with woven-wire netting, a few posts and a roof of tarred paper, where the birds can be housed at night.

The young can be trained to come up regularly at about 4 o'clock to be fed, when they can easily be driven into the roosting place for the night.

An earthen floor can be laid in this pen, but it must be kept clean. The majority of failures are, no doubt, due to lack of proper knowledge or carelessness.

In many instances, where the young are hatched by hens, the foster mother is cooped and the little ones deprived of their liberty, and fed almost entirely on wheat or grain of some sort, which alone is enough to cause the poults to die.

They must have more of a vegetable diet, and even in this case judgment must be exercised.

A diet of horse-radish leaves would be detrimental. If allowed to choose for themselves they would select such as lettuce, cabbage, clover and many kinds of grasses.

Turn the hens loose with the little ones and let them pick what they most relish, giving them a little meal or wheat to coax them home and also to quicken their growth.

In picking stock from which to start, make your calculations that some are wild and some are tame.

The Bronze variety is very desirable for the market on account of its size and the sweet flavor of its meat. But on account of its wild, roving disposition, this variety is hard to raise. The birds nearly always hide their nests, and perhaps will not be seen for a month or two at hatching season.

The White Hollands are more domesticated, and are more apt to make their nests about the barn and outbuildings, same as chickens do. They are also good layers, having a record of as high as ten eggs each.

They are probably a little harder to raise than the Bourbon Reds, which, by the way, are handsome birds, but do not become quite so tame. All turkeys are peculiar about their nests, and when they once select the location they must not be disturbed.

According to figures prepared by the United States Department of Agricuture the crops of the 1908 season will be worth, in round numbers, eight billion dollars. The chief statistics of the department said of the crop outlook: "The indications at present are for great crops. For eight years the American farmer has enjoyed unprecedented prosperity, and now the ninth promising harvest is practically assured. Never in the history of the United States have there been nine such big years—years of big yields and high prices."

The first thing to take into consideration when feeding the dairy calf, especially the heifer that is intended for the dairy herd, is to see that it is kept growing from the time it is placed in the feeding lot till it is matured. Any neglect that will cause a standstill in growing will cause a dwarfing of the organs of milk production and the calf will not make the producer she should.

Sulky and Cart for Sale.

One brand new McMurray sulky and one brand new McMurray cart for sale. Never been uncrated. Best made. Can save you some money. Address,

F. W. KELLEY,
Care of Breeder and Sportsman,
P. O. Drawer 447. **San Francisco.**

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.
Address this office,
BREEDER and SPORTSMAN.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.
SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.

Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best bred and best individuals on the Coast. Write for particulars. Address,
THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.
My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

ROHNERVILLE RACE TRACK FOR SALE.

One of the best mile tracks in California. Fenced, two grandstands, two pavilions, 35 stalls, abundance of water, good climate, right in one of the best towns in Humboldt county. Big horse center. Stalls can be rented year round. Great chance for a profitable investment.
Address,
L. FEIGENBAUM, 14 Spear St., San Francisco

"HOWARD SHORTHORNS"-QUINTO HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.
WILLIAM NILES & CO., Los Angeles, Cal.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to
S. B. WRIGHT,
Santa Rosa, Cal.

COLLIE AND BLOODHOUND PUPPIES FOR SALE.

Best bred Young Stock on the Coast. Sires and Dams winners on the Bench and Workers in the Field. Address
T. S. GRIFFITH,
Glen Tana Collie Kennels,
Spokane, Wash.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

BONNY McKINNEY YEARLINGS FOR SALE.

Three yearlings by Bonny McKinney 41383 are offered for sale. Two are fillies and one a stud colt. All are trotters, black in color, broke to harness, and from choice bred dams. Must be sold as I am compelled to vacate present location(by July 15th. For price, breeding of dams, and other particulars, address
H. BUSING,
Alameda Race Track, Alameda, Cal.

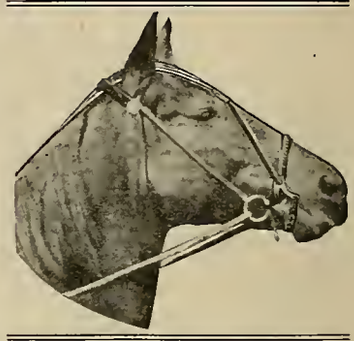
Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct** from us, as **we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

GOOD FEED FOR DAIRY COWS.

Professor Thomas Shaw thinks there are certain foods that may be looked upon as standard for feeding dairy cows, and that every dairyman can grow them wherever he may be located. These include as roughage, plants of the clover family; as silage, corn in one or another of its varities, and as a grain, a mixture of wheat and oats. Of course, in addition to these, many other foods should be grown, but these are less important than the foods named.

Wherever the clover plant can be grown it ought to be used with much freedom. The food furnished for cows represents only one element in its value. The benefit to the soil is always helpful, in many instances greatly so. Usually clover can be best grown in mixtures for dairy cows. This means that two or three varities may be grown together. It would also seem correct to say that quite a sprinkling of timothy improves a clover ration for dairy cows. It does so by helping to support the clover while it is growing, and by making it easier to cure when the crop is cut. Alfalfa will answer the same purpose as clover. Where neither may be had it may be quite possible to get vetch hay or cowpea hay.

No food can be grown in the United States that will provide so large a proportion of nutrients as corn. But the nutrients furnished do not tell all the story. In addition to nutrients, when cured in the silo, its succulence is beneficial. It is helpful to the digestion. It also favors milk production. These are two advantages that it always will have over corn fodder fed in the dry form.

Clover and corn furnish a fodder ration that cannot easily be improved upon for dairy cows. Two factors should be taken into account when determining the amount of grain to feed. One is the extent to which clover or alfalfa is fed, and the second is the production of the cow. The rule with some is to feed one pound of grain for every three pounds of milk produced. When clover or alfalfa form a large part of the ration it would seem reasonable to suppose that a less quantity of grain would suffice than the amounts named.—Rural World.

ITEMS FOR MILK PRODUCERS.

If you drive the cows with a dog, let him be a good one, but I have always found that a little bran in the manger is better than the best of dogs.

Tin vessels are always the best for holding milk. Wooden pails will absorb milk and the little milk absorbed will rot in the grains of the wood and act as yeast to taint the warm milk put in.

A great many milk producers are adverse to the use of the Babcock test, simply for the reason that it uses no partiality. If rightly handled it does straight work, no question about that.

Many a promising dairy animal has been ruined while young by being fed as we would a calf intended for beef. Skim milk, oat meal and flax seed is one of the best and most economical feeds for a growing calf.

Do not lose your temper and say things that you will be sorry about afterwards if your milk don't test up quite so high as you expected it would. Do your best and look to the average results. If they are not satisfactory, change cows.

Every effort should be used by the farmer to get the milk to the creamery in good condition for it is greatly to his interest to do so. The prosperity of the producer is to a certain extent dependent upon that of the individual creameryman while in the case of the co-operative creamery he has a direct interest.

The farmer who has not cows enough to warrant the use of a separator has not enough to warrant the making of butter, yet there are a great many farmers who still persist in keeping half a dozen cows and setting their milk in pans, crocks and cans. The loss to farmers who cream their milk in this way is very great. From the results of tests made it has been clearly proved that there is a loss of three-quarters of a pound of butter more when the cream is raised by the gravity system than when the separator is used. V. M. Couch.

According to some experiments noted by the Department of Agriculture, it was found that where cows were milked three times a day, morning, noon and evening, the milk was richest at noon and poorest in the morning; and when milked morning and evening, the milk was slightly richer in the evening.

DAIRY NOTES.

(Colman's Rural World.)

Chicago Dairy Produce says that cooperative dairying is the hedrock of the dairy industry. Only by it and through it can we secure that degree of influence in Congress and Legislatures that will bring the enactment of just laws. By means of the creamery the farmers were reached and induced to make their influence felt in the passage of the national oleomargarine law.

For market milk, in order to be considered profitable, a cow should produce 6,000 pounds (2,800 quarts) of 3.5-4 per cent milk yearly, without being forced. For butter a cow ought to produce 300 pounds of butter yearly—if she does not do it, she is not helping you. How many of your cows are returning you these results? If you don't know, isn't it time you found out?

Of all the various methods of extracting the cream (butterfat) from milk the centrifugal separator is superior. The advantages of the separator over all other methods may be summarized in this way: Less labor, quicker and easier; sweet skim milk for calves and pigs; butter from separator cream demands a higher price than from the other methods.

Under a new ordinance reported for passage before the City Council of Manitowoc, Wis., every owner of a cow in the city must have a license. Even if no milk is to be sold, and the total supply to he used for family wants, the license must he in evidence. The measure provides for no fee, hut gives the city bealtb department the power to demand the inspection of premises and to file complaints and to revoke licenses. Dairymen of the city are at a loss as to the practical success of the new measure.

ANTOINETTE FOR SALE.

The handsome bay mare Antoinette, sound and all right, kind and gentle, and a fast trotter, is offered for sale. She has won at matinees, trotting in 2:21 with very little work. Has worked out in 2:18 and can go faster. A lady can drive her and she is bred well enough to be a great brood mare. Has no record. Her sire is Antrim, sire of Anzella, 2:06¾, and her dam produced Antrima 2:15½, a full sister to Antolnette. She can he seen at the Pleasanton at any time. For any further particulars, write to the owner.

THOS. RONAN, Pleasanton, Cal.

Dividend Notice.

SAN FRANCISCO SAVINGS UNION, NW Cor. California and Montgomery streets.—For the half year ending June 30, 1908, a dividend has been declared at the rates per annum of four and one-quarter (4¼) per cent on term deposits and four (4) per cent on ordinary deposits, free of taxes, payable on and after Wednesday, July 1, 1908.

Depositors are entitled to draw their dividends at any time during the succeeding half year. A dividend not drawn will be added to the deposit account, become a part thereof and earn dividend from July 1st. LOVELL WHITE, Cashier.

Dividend Notice.

THE GERMAN SAVINGS AND LOAN SOCIETY, 526 California street.—For the half year ending June 30, 1908, a dividend has been declared at the rate of four (4) per cent per annum on all deposits, free of taxes, payable on and after Wednesday, July 1, 1908. Dividends not called for are added to and bear the same rate of interest as the principal from July 1, 1908.

GEORGE TOURNY, Secretary.

The investigation shows that it is possible for a few poor cows in a herd to so reduce the profits realized from the good cows that the entire herd is kept either at a loss, or at but small profit. The depressing influence of poor cows will be eliminated when the dairy farmer keeps records of the production of his individual cows so that he may discover and remove as soon as possible all "star boarders."

Cornell University, New York, has just shown what can be done in grading up by means of using pure bred sires. A cow of ordinary grade was kept and the progeny for four generations was tested. The cow was producing 225 pounds of butter in a year. By the use of a pure bred sire the next generation produced 275-pound cows and in the fourth generation two cows, descendants of the original one and improved sires, made an average of 450 pounds of butter in a year. This ought to settle the question as to whether pure-bred or grade animals are preferable for the dairy.

Wisconsin takes high rank in things agricultural. There are the Babcock milk tester, the Hart casein tester, the Henry feeding science, the Goff botanical work, and a whole raft of other notable achievements to the credit of Wisconsin. What is the mainspring of all the activity in Wisconsin? It looks as though most of the remarkable work up there might be blamed indirectly onto ex-Governor Hoard and his able corps of scientific, wide-awake, never-let-up, onto-their-job assistants on the Dairyman, who are forever spurring the workers and searchers to new and higher efforts, says the New York Farmer.

ADVERTISE IN THE

BREEDER AND SPORTSMAN

POULTRY-KEEPING IN TOWN.

Why not keep a few fowls in every dooryard of the country, as do the people in foreign lands? Belgium, the little country with a small population, stands forth prominently in the quantity of poultry and eggs shipped into other countries. The quality in value as graded, places Belgium among the leading producers of quality in poultry and eggs of all nations of the world. They stand second in the value of dressed poultry, and fourth in the value of eggs sent into the United Kingdom last year.

There is one important factor in dressed poultry that is better understood in foreign countries, even in Russia, than with us. This is hiding away the breast-bone beneath the breast-meat. In other words, 95 per cent. of all the American poultry sold to market shows the sharp breast-bone most prominently, while the better grades of what are known as Houdan, Surrey and Belgium poultry have the breast well covered with meat. It would be quite as easy to select and breed for a less amount of bone and a greater amount of meat on the breast as it is to have them as at the present time. If every person living in the towns and villages grew a few fowls of this character in a dooryard, there would more health, more pleasure, and more profit accrue to the dweller therein than can possibly come from the neglect to make use of the space about his doorway.

We noticed a short time ago a neat little house of cottage construction six feet square, a post at each corner and the roof shedding four ways to the centre, out of which grew as if by magic a little flag-pole with the emblem of the country floating at the mast. Within this little building, which was only six feet and a half in the center, were housed twenty Brahma Bantams that supplied the breakfast eggs for a family of five. A sufficient number of eggs were sold from these for hatching to purchase a small amount of food necessary to keep them in excess of the table scraps and to furnish the tea and coffee and sugar for the family table. This amount almost anyone could calculate, and realize for themselves the value that would accrue from the proper and careful growing of a few Bantams. Brahmas, Plymouth Rocks or Wyandottes can be kept by almost every family, and if given sufficient attention to keep their surroundings in good condition, they will always pay their keep and add pleasure and health to the lives of those who care for them.

The requisites for success along these lines are comfortable quarters, cleanly surroundings, the frequent digging up of the enclosure where the fowls are kept. If some wheat screenings are thrown among the dirt when the ground is dug up, and the dirt and screenings raked thoroughly together, it furnishes scratching facilities for the fowls and a large per cent. of the screenings will spread and grow, which provides the best quality of green food as well.

Well-selected fowls, properly kept—not too many in a place—always prove to be a pleasure and a profit to those who keep them, but whenever too many are kept and those neglected, they are likely to become anything but a pleasure or a profit to yourself and your neighbors.—The Feather.

The following having been found to be an effective remedy for egg-eating hens, I venture to suggest it to your readers, who may have occasion to try it. Take an egg and blow out half the contents, leaving the yolk in. Stop up one hole and refill with ammonia, shaking well to get it thoroughly mixed; put it down in the house and watch results. A rush, a peck, and a sudden recollection of good manners on the part of each hen as she gets a beakful and retires gracefully to allow her comrades to take their share. Next day put down a genuine egg, and note the disdain of the highly educated ladies who have had a taste of the doctored edition for anything so common as an ordinary new egg.

Forestry officials of the Federal government estimate that at the present rate and manner of cutting the forest supply of this country will only last twenty years. It is known that we have a good deal of timber left—something like fifteen thousand billion feet—and it grows at the rate of forty billion feet a year, but we are using now one hundred billion feet a year. The plans of the Forest Service are to increase the growth and limit the cut to what is absolutely necessary; in which case the time when we shall be without timber will be postponed for thirty-five to forty years. The government cannot do all this except by education, for it owns but twenty-two per cent of the timber now standing. The plans of the officials embrace not only a strict husbanding of the government's supply but attempts to have laws put in force based upon the laws of France and other European countries. They think that a measure like that of France which exempts from taxation for thirty years clear lands which are replanted with forest trees will prove efficacious.

Washington McKinney 35751

At the Breeders meeting to be held on the historic Santa Rosa Stock Farm track, July 29 to Aug. 2, we expect to give standard records to the following sons and daughters of Washington McKinney—only two of which ever had any training until this year:

Belle of Washington, Trial 2:19
Ray McKinney, Trial 2:19
Fabia McKinney, Trial 2:25
Harry McKinney, Trial 2:28¼
Donello, Trial 2:27¾
Rex McKinney, Trial ¼, 34½ seconds
Reed McKinney, Trial ¼, 36 seconds
May Randall, Trial ¼, 34 seconds

and two others we do not now control. We will also reduce the records of Lady McKinney and McKinney Belle, obtained last year. We know of twenty others of the get of Washington McKinney which can be put in the list if trained. This great horse goes East next fall. Breed to him before be goes.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: $35. Return privilege or money refunded. Apply to or address SAMUEL NORRIS, Santa Rosa, Cal.

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for $3.50 per month at owners' responsibility and risk.

CAPITAL $50,000 SURPLUS AND PROFITS $20,000

The National Bank of Port Deposit

PORT DEPOSIT, MD.
May 25, 1908.

Troy Chemical Co., Binghamton, N. Y.:

Gentlemen: As a lover of the horse I want to tell you my experience with "Save-the-Horse" Spavin Cure.

Last August I purchased of you a bottle of "Save-the-Horse" which I used on a horse twenty-four years old and so lame that he could not go twenty feet without resting the spavined leg. He was useless, as he could not trot one step and could not keep up in team work.

After using one-half a bottle of "Save-the-Horse" I consider the horse absolutely sound. Since last October the horse has been used constantly on my farm and as a driver, and no one could tell that he had ever been lame. The remainder of the bottle cured several cases of scratches and took two large bumps off another horse.

I now have a very fine five-year-old horse that by hitting his head on a low beam, just back of the ear, and about three inches from it, has caused a large lump to appear. Have you any remedy or treatment that you could advise? If so please let me know as I am anxious to help the animal.

I never hesitate to recommend your spavin cure, as I know from actual experience what it will do.

Yours very truly, [signature]

A. W. McKAY TRAINING STABLES.
Fayetteville, Tenn., May 20, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: I used a bottle of "Save-the-Horse" last season on my mare, record 2:18¾, for bowed tendons. Made the treatment while racing and was well pleased with the results. I now have another case and you may send me a bottle same as before.

Very truly, ALEX W. McKAY.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corintbian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

R. V. HALTON, Manager,
Hotel Belvedere,
Belvedere, California.

ANTOINETTE FOR SALE.

The handsome bay mare Antoinette, sound and all right, kind and gentle, and a fast trotter, is offered for sale. She has won at matinees, trotting in 2:21 with very little work. Has worked out in 2:18 and can go faster. A lady can drive her and she is bred well enough to be a great brood mare. Has no record. Her sire is Antrim, sire of Anzella, 2:06¾, and her dam produced Antrima 2:15½, a full sister to Antoinette. She can be seen at the Pleasanton at any time. For any further particulars, write to the owner,

THOS. RONAN. Pleasanton, Cal.

Peoria, Ill	Sept. 14-18
Springfield, Ill. (State Fair)	Sept. 25-Oct. 2

AMY BROOKS is tbe name of a mare that is occupying that portion of the trotting stage where the limelight is centered just now. At Peoria, Illinois, last Wednesday, she won tbe 2:19 trot, after capturing a race four days previous over tbe same track. She won her race Wednesday in straight heats in 2:06¾ and 2:05¼, and must be considered as one of the trotters headed toward champion bonors. She is a bay mare, foaled in 1901, and first sbowed up in the Year Book of 1906 when a five year old. Her first start was at Cynthiana, Kentucky, where she won second money in the 2:40 class, the fastest heat of which was 2:28½. A few days later she won the 2:30 trot taking a record of 2:27¼. The following week she started twice at Xenia, Ohio, winning both races in straight heats and reducing her mark to 2:24¼. Tbe following week at Cartbage she won again and lowered ber mark to 2:22¼ in the race. Her last start that year was at Knoxville, Tennessee, where she got the flag the first heat in 2:23¼. Last year she started in nine races of which she won three, was second in one, and third in two, and fourth in three, not being outside the money. Her record was 2:19¼ at the close of the year, and she trotted to that mark in all three of her winning races. Amy Brooks was bred by David Cbenault, of Richmond, Kentucky, and her breeding is not in strictly fashionable lines, although she has plenty of good trotting blood in her veins. Her sire is Haxhall 35,371, one of the undeveloped sires, whose list of standard performers consisted of seven trotters and five pacers at the close of last season, none of which had entered the 2:10 list, Amy Brooks being the first of Haxhall's family to enter the extreme speed list. Haxhall is by William L., sire of Axtell 2:12 and an own brother to the famous Guy Wilkes 2:15¼. The dam of Haxhall is Sultaness by Sultan, his grandam Sophia by Geo. Wilkes. The dam of Amy Brooks is Little Anne by the unregistered horse Huguely Boy a son of Vatican 11,308. Vatican is by Belmont 64, sire of Nutwood, out of Vera by Hambletonian 10, next dam by American Star. Vatican is the sire of Vassar 2:07, Belle Vara 2:08 and Mustard 2:08½. The second dam of Amy Brooks is Jenny Clifton by Lord Clifton, a horse whose name does not appear among the list of stallions with records or among those that are registered. So Amy Brooks may not be one of those bred according to theory but that she is a wonderfully fast trotter is shown by her two heats in a winning race early in July, which were in 2:06¾ and 2:05¼. In this race Mr. George Estabrook's $10,000 mare Spanish Queen 2:26½, by Onward Silver 2:05¼ out of Elfin Dance 2:27 by Wilkes Boy, was second in both races, and Mr. Estabrook is to be congratulated on the mare making such a grand showing so early this year. Even though she did not win, she has made good, as to be second to such a wonder as Amy Brooks is no mean honor.

JACK CURRY, the famous reinsman, is dead after a long illness, and was buried at Lexington on Thursday of this week. He was one of the most widely known trotting horse drivers in the United States, having a reputation as a high class trainer as well as a great driver. He drove Alix to a record of 2:07¾ when she was a five-year-old, and drove Prince Alert to his record of 1:59½. He came to California a few years ago and entered the employ of James de la Montanya, owner of Brilliant Girl 2:08¼ and Tuna 2:08½, training and marking both those fast mares. Curry was of such a disposition that he banked greatly on tbe future, and was known in the east among the newspaper scribes, with whom he was a great favorite, as Optimistic Jack an account of his roseate views of the future. Few trainers could patch up a crippled horse so as to win races, witb the success which he acbieved and many a good purse he bas pulled down with a trotter that was considered only fit for retirement. He leaves a brother, Gil Curry, also a well known reinsman.

THE CHALLENGE recently issued by Mike Bowerman to race the mare May Earl 2:10¼ against any trotter in the world has drawn an answer from the owner of Sweet Marie 2:02. Her trainer, Billy Andrews bas sent word to Bowerman asking him to name place, time and amount. Bowerman wired back suggesting Cleveland as the place, but said he would leave date and amount to Andrews. Bowerman says he still tbinks May Earl able to defeat any trotter living and as he has worked her a mile in 2:05 he has reason for his belief. But tbe public's money will go on the California mare if there is a race.

DON'T FORGET that purses of $500 and $300, one for 2:14 class trotters, and the other for 2:30 class trotters, will close for entry with Secretary Kelley of the Breeders Association on Tuesday, July 21st. These purses are to be raced for at the Santa Rosa meeting which opens July 29th. Everything points to a fine meeting there and those who failed to enter their trotters in the slow or fast classes already closed, now have an opportunity to race. See the advertisement.

IN NEW YORK the demand for good useful horses is increasing every day. Nearly every daily paper contains the advertisements of persons wanting saddle horses, coachers, runabout horses and gentle family horses that are young and sound. The prices that most advertisers want to pay are from $200 to $400.

MUTUAL AND AUCTION POOLS are the only legal betting systems in Kentucky. The blue grass state whose leading stock industry is horse breeding, has had its fill of the bookmaker, and will return to the system of betting in which the public makes its own odds and under which racing not only flourished but was indulged in by the best citizens of the country and looked upon as one of the greatest of sports. In time the elimination of the bookmaker will restore racing to its former standing, but it will take time.

Richard Sweasy of Eureka, Humboldt County, recently visited Red Bluff and purchased a dozen trotting bred horses for use on his stage lines. He paid an average of $150 for them.

NEW TRACK OPENED AT CHICO.

The inaugural meeting at the new Chico mile track July 2d, 3d and 4th was a great success. The crowd was not very large the first day, but 2,000 turned out on Friday, and nearly 3,000 on Saturday. All sorts of sports were on the program, but the harness races drew the most atteution.

The judges were Colonel Park Henshaw, Judge McDaniel of Marysville and Frank Wright of Sacramento; timers, J. O. Simms and R Cartwright.

Ben F. True's familiar countenance and voice were seen and heard as of years ago, he being delegated to fill the position as official announcer. Wendell Miller acted as marshal.

The summaries of the harness races were as follows:

First Day.

Trotting, Class D:

Gladys Moore, Barnard Livery Co.	1	1			
Flyaway	2	2			
Billy George, George Vice	3	3			

Time—2:31, 2:29 3-5.

Pacing, Class B:

Dixie (Renalti)	3	2	2	1	1
Judge (Heenan)	4	1	3	2	2
Scotch John (Colm)	2	4	1	3	dr
R. W. P. (Atkins)	1	3	dr		

Time—2:17¾, 2:20, 2:22, 2:23, 2:23.

Second Day.

Trotting, Class C:

Lulu Mac (Daniels)	1	1
Protection (Pike)	2	2
Presto (Hunt)	3	3

Time—2:34, 2:33½.

Directors' Race:

Panic (W. J. O'Connor)	1	1
Nadene (Wendell Miller)	2	2
Lady St. John (Fred Parks)	3	3
Mabel (Thomas Stile)	4	4

Time—2:56, 2:52.

Third Day.

Trotting, Class D:

Gladys Moore (Barnard)	1	1
Nocha (Daniels)	2	2
Flyaway (Silva)	3	3
Billy George (Vice)	4	4

Time—2:34, 2:31.

Pacing, Class A:

Briarwood (Christie)	1	2	1
Lady V. (Simpson)	2	3	2
Polka Dot (Wright)	5	4	3
Monteo (Renatti)	4	5	4
Harold B. (Daniels)	3	1	dr

Time—2:16, 2:16, 2:20¼.

Special, roadsters:

Protection (H. C. Pike)	1	1
Lulu Mac (Butters)	2	2

Time—2:45, 2:42.

THE GREATEST TWO-YEAR-OLD.

Arion, the brightest star in tbe constellation of American-bred colt trotters, was the greatest two-year-old trotter yet foaled, and his equal may possibly never be seen. He was so much greater than all otber colts of bis age—those foaled before his day and those foaled since—that no one can institute a comparison which will do him justice or prove his greatness. Arion accomplished something that no other two-year-old colt bas ever accomplished. More than likely no other two-year-old colt will ever be asked to attempt the same task. Arion trotted a mile in his two-year-old form, to high-wheeled sulky, in 2:10¾, with the last half mile faster than the first half, and the last quarter of the mile faster than any other quarter of the mile. Was there ever another such an exhibition of speed and gameness upon the part of a colt trotter?

Only one three-year-old trotter ever pulled a high-wheeled sulky as fast a mile, and that one was Sunol, by Electioneer, wbo went a mile in 2:10½ in 1889, three years prior to the introduction of the bicyclle-wheeled sulky. So wonderful was the performance of Arion that it appears useless to compare tbe mile and time with the achievements of colt trotters of the present day, or with the records obtained since 1891 by colts and filllies.

Arion made an attempt at lowering the tbree-year-old record of Sunol, and succeeded in equaling it.

Arion's two-year-old year was tbe last season of the higb-wheeled sulky in tbe making of world's records, and colts racing or trying for fast records since Arion's year have drawn a much faster vehicle. Just how much faster is problematical, as instances are indeed few where the same trotter has attempted going miles to both styles of sulkies. The 2:10¾ of this son of Electioneer and Manette was the record in 1891, and it is the record of to-day. Until the two-year-olds of 1908, or some otber year, attempt lowering the 2:10¾ of Arion, at the same style hitch, there will be no measure by which the greatness of that performance can be approximated.—The Western Horseman.

Petigru 2:10½ won second mouey in his first start this year which was at Peoria, Illinois on Wednesday last. He was a bang up second in the second heat of his race, won by Othello, a gelding by Prince Edward in 2:10¼. As Petigru has been out of training since 1902, the year he took his record, his showing at Peoria is another feather in Will Durfee's cap.

NEW RECORD FOR SAN BERNARDINO TRACK.

Welcome Mack by McKinney Paces Heat in 2:07¼ in Winning Race.

The holiday meetiug at Agricultural Park, San Bernardino, on July 3d and 4th, under the auspices of the San Bernardiuo and Riverside Racing Association was a success in every way. Nearly every event was closely contested and the racing was classy considering that some of the horses were not regularly in the racing business, haviug only been trained for matinee racing and for this meeting.

Only a fair sized crowd witnessed the racing on the first day of the meeting, but all were loud in their praise of the day's entertainmeut. Mac O. D., tbe brown gelding by Zolock had a figbt to win the 2:25 pace in which there were five starters, My Dream by Silver Coin contesting the first heat with hiu, and Velox by Zolock fighting out the second heat and bringing the erowd to its feet while cheers were given for the horses. Tbis was the fastest race of the day, the second beat in 2:12¼.

Ted Hays of Los Angeles, captured the 2:20 class trot in handy fashion with Alsandro, the bay horse by Bonnie Direct 2:05¼ out of Alix B. 2:26¼ by Nutwood Wilkes. Tbe heats in 2:17 and 2:16¼ showed Alsandro to be a horse of considerable class, and he proved it the following day by winning the free-for-all trot and taking a record of 2:14¼.

The 2:25 trot was won in straight heats by the Zombro filly Early Bird, driven by Hazelett. She won the first heat in 2:17½, and gave her sire a new one in the list.

Considerable difficulty was experienced in getting the five starters off in the 2:30 trot for local horses. Emma Z., a Zolock mare won in straight heats.

Running raees, and trotting for records filled out the day's program.

The Glorious Fourth brought out a big crowd to see the racing. The track was never better, and startling finishes marked every beat during the afternoon.

The great feature of the day was the breaking of the track record by the McKinney horse Welcome Maek, owned by Thomas Hughes of Los Angeles, and driven by Henry Delaney. While the crowd realized that a fast mile was being driven they were not ready for such a fast heat at this time of the year and were surprised when the time was hung out as 2:07¼. Ted Hays was not far behind with the Prodigal mare Moy, and when these two start at Oakland and Chico there may be a further reduction of their records.

The 2:25 pace was won in straight heats by Mrs. Severance's black horse Amado, son of Direct Heir and the great two-year-old of her day La Belle 2:16 by Sidney. The interesting feature of this race was the showing made by Lady Lou, the family driving mare of Mr. W. L. Scott of Riverside. With just two weeks' training and only four work-outs she made a great race and was only just beaten the two heats in 2:16 and 2:24. Lady Lou is by Stanton Wilkes 2:10½ son of Nutwood Wilkes, aud this was her first race. Sbe was driven by G. H. Parker. Amado is a full brother to Conqueror 2:16 the good three-year-old pacer of last year. It is a coincidence that two brothers should both take records of 2:16 as three-year-olds. He was ably handled by C. E. Mickens.

The management is to be congratulated upon the manner in which the races were handled, as a better race meet has never been held in this city. The financial side was perhaps not a success, still it was demonstrated that good racing can be held here and it is understood that another meeting will be held later in the season, also one at Riverside. The San Bernardino association is greatly indebted to the people of Riverside for the interest they took in the meeting and greatly appreciate their efforts. The summaries:

Pacing, 2:25 class, purse $300:

Mac O. D., b. g. by Zolock (Pounder)	1	1
Velox, ch. h. by Zolock (Bonnell)	3	2
My Dream, gr. m. by Silver Coin (Harris)	2	3
Ruby H., blue roan m. by Bayswater Wilkes (Mickens)	4	4
Seigfried, b. g. by Silver Coin (Ward)	5	5

Time—2:13, 2:12¼.

Trotting, 2:20 class, purse $300.

Alsandro, b. s. by Bonnie Direct (Hayes)	1	1
Charley M. b. g. by Silent Brook (Mickens)	3	2
Wenja, br. m. by Zolock (Pounder)	2	3
Zomell, gr. g. by Zombro (Mahen)	4	4

Time—2:17, 2:16¼.

Trotting, 2:25 class, purse $150:

Early Bird, g. f. by Zombro-Lady Bird (Hazlett)	1	1
Bolock, ch. h. by Zolock (Kelly)	2	2
Bonnie June, br. m. by Zolock (Mickens)	d	

Time—2:17½, 2:23¼.

Trotting, 2:30 class, purse $150:

Emma Z., b. m. by Zolock (Parker)	1	1
Worth While, b. s. by Allerton (Bonnell)	2	2
Eugenia B., br. m. by Zombro (Nelson)	5	3
Tom McKinney, s. g. by Geo. W. McKinney (Ramsey)	3	5
Neerest, b. m. by Neernut (Thornquest)	4	4

Time—2:26½, 2:27.

Pacing, 2:25 elass, purse $150:

Amado, blk. s. by Direct Heir-Le Belle 2:16 (Mickens)	1	1
Lady Lou, eh. m. by Stanton Wilkes (Parker)	2	2
Andrew Carnegie, b. g. (Bonnell)	3	3

Time—2:16, 2:24.

Pacing, free-for-all, purse $300:

Welcome Mack, b. g. by McKinney-Hawthorne (Delaney)	1	1
Seigfried, b. g. by Silver Coin-Nutwood (Ward)	3	2
Moy, b. m. by Prodigal (Hayes)	2	3

Time—2:07¼, 2:10¾.

Trotting, free-for-all, purse $300:

Alsandro, b. s. by Bonnie Direct-Alix B. (Hayes)	1	2	1
Golden Nut, eh. s. by Neernut (Ward)	2	1	2
Wenja, br. m. by Zolock (Pounder)	3	3	3
Zomell, gr. g. by Zombro (Maben)	4	4	4
Bolock, ch. s. by Zolock (Mickens)	5	5	5

Time—2:14¼, 2:15, 2:17.

Trotting, Against Time:

Walter J., ch. g. by Geo. W. McKinney-Lady Woolsey (Delaney) ....won

Time—2:28½.

Alta Reva, b. m. by Zombro-Alto Reina (Mickens) ....won

—Time—2:28.

Neerest, b. m. by Neernut-Mabel McKinney (Thornquest) ....won

Time—2:28¾.

Engenia B., b. m. by Zombro-Kate Hamilton (Nelson) ....won

Time—2:28.

The officers of the meeting were:

Judges—John W. Snowden, John P. Gaines, J. H. Kelly.

Timers—F. E. Shaw, C. H. Thomas, Wm. Rourke.

Starter—J. H. Kelly.

Marshal—E. H. Brazelton.

Blanchard Miller is president and R. E. Curtis secretary of the association.

G. H. P.

GOOD RACING AT NEWMAN.

A crowd of at least 1,500 people enjoyed some exeellent racing at the half mile track at Newman on July 4th. The track was a little soft and not fast hy any means, but the time made was very good. In the first heat of the free-for-all pace Joe Cuicello's mare Queen Derby stepped the first quarter in 31½ seconds, but made a break coming into the stretch, and was beaten in the drive to the wire. Geo. Perry did not display his usual speed in this race, not seeming to like the turns or the footing. The summaries of the four events follow, all the harness races being at half mile heats:

First race, 2:30 class:

Vera Hal (Liggett)	2	1	1	1
Olga (Best)	1	3	2	2
Lady Gin (Giannini)	3	2	3	3
Lady Irene (Jones)	4	5	4	4
Wild Bill (Allen)	5	4	5	dr

Time—1:11, 1:10, 1:10¾, 1:09.

Second race, Free-for-all Pace:

Allie Glen (Liggett)	1	2	1	1
Queen Derby (Cuicello)	4	1	2	2
Geo. Perry (Giannini)	2	4	4	4
Cranky Thoru (Helm)	3	3	3	3

Time—1:05, 1:04, 1:06, 1:07.

Third race, Special for buggy horses:

Tom (Turner)	1	1
Queen B. (Barba)	3	2
Teddy (Dr. Smith)	2	3
Silver Arrow (Petersen)	4	4
Los Banos Boy (Allen)	5	dr

Time—1:12¾, 1:16.

Fourth race, Local buggy horses:

Buck (Christensen)	1	1	4	1
Dolly (Barba)	2	4	1	3
Mack (Beckwith)	3	2	2	2
Dan Patch (Wright)	4	3	3	4
Birdie (Mederios)	5	5		

Time—1:26, 1:26, 1:27¾, 1:28.

In tbe steer tying contest A. Ordway won first prize in 1:22, and G. C. Bernal second prize in 1:51.

A DAY'S RACING AT CONCORD.

C. R. Windeler, the new manager of the regulation mile track at Concord, Contra Costa county, advertises in this issue of tbe Breeder and Sportsman an afternoon of racing for Sunday, July 26th, entries for which will close Tuesday, July 21st.

Three races for harness horses are offered as follows:

Trotters and pacers without records, $50.

Trotters and pacers, 2:30 class, $50.

Trotters and pacers, free-for-all, $250.

In addition to these there will he a purse of $75 for runners, free-for-all, three-fourths of a mile, two saddle horse races, and a broncho busting contest.

The Concord track is in good shape and there are plenty of stalls for horses.

BAKERSFIELD ENTRIES.

The entries for the Bakersfield races have been given out, that is for the 2:25 pace, 2:35 district pace, and 2:30 pace. There were eleven entries for the 2:24 class trot, hut they have not been received up to the time the Breeder and Sportsman went to press. The entries reported are as follows:

Pacing, 2:25 class—Allie Glen, Lady Stoneway, Joe Athby, Avalon, Wanderer, Amado, Ruby H., Babe Madison, Chatterbox, Velox, T. D. W., Boton de Oro, Alice St. Clair.

District Pace, 2:35 class—Avalon, Joe Athby, Lady Stoneway, Allie Glen, Valadore, Ira Basler.

Pacing, 2:20 class—Alice St. Clair, T. D. W., Velox, Martinez Boy, Boton de Oro, Adelante, Wanderer, Babe Madison, Chatterbox.

CARPET, DAM OF GEN. WATTS.

When the stallion Gen. Watts reduced tbe three-year-old record to 2:06¾ last fall, cutting the best previous performance a full two seconds, all the facts about his sire and dam became of interest. As to the sire, Axworthy, he already was famous, but the dam, Carpet, was unknown to all but a dozen people. At first it was thought she was lost or dead, but a man in Missouri had her.

It now appears that Carpet is a fast trotter, and bas been since she was a colt, but that her nerves always bave been set to such a fine edge that the sight of a race track or tbe weight of a sulky behind her made the mare a nervous wreck. Wben she was a two-year-old Carpet was looked upon as a possible phenomenon. She soon showed "nerves" but trotted a full mile in 2:31.

The next season she beat 2:20 a little over the farm track, but hy that time the nervousness was so pronounced that any idea of giving her a record, where the work must be done in public, during a race meeting, and in the presence of crowds, was abandoned. Finally, when she was well along in years, and after she had heen sold to her present owner, it was decided to try Carpet once more with the idea of marking her better than 2:30.

It took superhuman patience, but the man in charge of the job was built that way. Six times in one afternoon did he take the mare on the track hefore anything could be done with her so great was her agitation. Finally she consented to take the word at a jog trot. It looked like a joke, the idea of marking in 2:30 or hetter a mare that was not going a three-minute gait. But hy the time the quarter was reached the old mare was stepping along a little. She did still better on the backstretch and reached the half-mile pole in 1:22.

This would land her twelve seconds behind a 2:30 record, hut Carpet was just beginning to flatten out, and in a few strides she fairly was flying. Still, it looked liked the wildest sort of a joke to expect a hroodmare to trot the last half of a mile in 1:08, which would have to be done if 2:30 was to be made. But Carpet is no ordinary nag.

Faster and faster she flew, until finally a 2:10 horse would not have beaten her as she tore down the home stretch and under the wire. She had trotted the last half mile in 1:06, making the whole distance in 2:28. —Boston Courier.

DE RYDER'S HORSES IN NORTH DAKOTA.

The Courtenay, North Dakota, races opened June 16th. The opening day De Ryder's bay gelding Diablo Mac won the 2:30 trot after five heats bad been trotted. He made a dead heat with Moto the first mile in 2:26¼, was set back to last position the second heat for a foul, and won the next tbree, the fastest being 2:26.

The same day Nutwood Princess won the 2:35 pace in straight heats, fastest time 2:21½.

Odd Mark, the ehestnut horse by Sirius Mark was second every heat and took second money in the 2:24 trot won by Frank M. The fastcst heat in this race was 2:26¼.

In the 2:15 trot or pace Charlie T. 2:11¼ was a starter, hut was outside the money.

Sherlock Holmes 2:06 was a started in the free-for-all pace. Lady Maud C. 2:04½ won this race in straight heats. Sherlock Holmes getting second money. The fastest heat was in 2:10½, pretty fair for a poor half mile track. Thornway 2:05¼ by Steinway, was third.

The following week the DeRyder horses were raced at Carrington, North Dakota, the half mile track heing rough and hard.

Diablo Mac won the 2:30 trot in straight heats, hest time 2:27¼.

Nutwood Princess was a starter in the 2:25 pace, but was outside the money, tbe fastest heat in 2:19¼.

In the free-for-all pace Sherlock Holmes won three straight heats rather handily, the fastest in 2:12¼. Thornway got second money.

Nutwood Princess started again in the 2:21 pace, hut third money was her portion. Fastest time in this race 2:17¾.

FRESNO RACES.

Harness racing furnished a portiou of the sport at Fresno on the Fourth.

The 2:24 trot was won by W. B. Snyder's Dutch by Athby, best time 2:20. Katalina was second and Native Daughter third.

Newport, the old favorite, going guideless, won the 2:16 pace from Milton Gear, Advertiser and Wonder, pacing one heat in 2:14½. Newport was also awarded a trophy for the fastest heat of the day.

Fresno Girl 2:10½ worked a nice mile in 2:16½, driven by J. W. Zibbell.

Women own the two fast two-year-olds whieh Ed. Hall is training at Libertyville, Ill. Justo, his Kentucky Futurity candidate, is the property of Mrs. J. C. Adams of Phoenix, Arizona. He is a son of Jay Bird and trotted a mile last fall in 2:14½. His other two-year-old is a filly by Sidney Dillon, dam Ataline, yearling record 2:23¼, by Woodline, 2:19; second dam Atlanta, the dam of Alix 2:03¾. She is owned by Mrs. A. D. Hughes of Chicago. This latter is one of the handsomest and best put together fillies to be seen anywhere. Mr. Hughes has just taken her to the Austin track, together with some others that will be shipped there soon, he will do his own training.

SANTA ROSA ENTRY LIST.

There will be some high class racing at Santa Rosa where the Pacific Coast Trotting Horse Breeders Association will open the circuit July 29th for a four days program. The best horses in training in California are entered and there will certainly be some hot contests and fast time. In the 2:09 trot there are seven of the fastest trotters on the Pacific Coast named and it looks as if every one of the seven will start. Wild Bell 2:08¼ is the fastest of the seven by records, but John Caldwell 2:08½ is only a quarter of second behind him, while Athasham 2:09¼, Fresno Girl 2:10½ and Era, North Star and R. Ambush, all three with records of 2:11¼ are giving every evidence in their work that 2:08 will not keep them out of the money. This race promises to be one of the greatest and fastest trotting contests ever seen in California.

In the 2:20 pace for a purse of $1,000, there is a big chance for a killing. It is probable that Charlie D. the McKinney stallion owned by Col. J. C. Kirkpatrick, will be the favorite, but the form shown by Silver Dick, Mac O. D. and two or three others that are entered makes it look as if field tickets would be good investments. At San Bernardino on the 4th of July Mac O. D. drove Welcome Mac out in 2:07¼ and by the time he reaches Santa Rosa it is thought he will make Charlie D. step in about 2:05 to beat him. Silver Dick has shown miles below 2:10 and can brush quarters in 29 seconds.

One of the best races on the card will be the 2:24 class trot for a purse of $1,000. There are eleven entries in this race, among them Lady Inez that bas worked in 2:13½, Wilmar that recently showed a mile in 2:14. The Statesman that has close to two-minute speed, Princess W. with a trial below 2:15 to her credit, Alsandra winner of a race in 2:14¼ and others.

The full list of entries in the purses declared filled aro as follows:

No. 2—2:24 Class Trotting, Sonoma Stakes, $1,000—11 Entries.

Lady Inez, b. m. by Nutwood Wilkes, dam Cora by Ira; El Nido Stable. Judge Dillou, c. h. by Sidney Dillon, dam Eveline by Nutwood; Mrs. L. J. H. Hastings; Alsaudra, b. h. by Bonnie Direct, dam Alix by Nutwood Wilkes; Morris Bros. Princess W., bl. m. by Geo. Washington, dam Urania by Ky. Prince; Frank J. Kilpatrick. Wilmar, b. g. by Wildnut, dam Sweetwater by Stamboul; William Michelsen. Wenja, br. m. by Zolock, dam Molocka by Nutsford; G. A. Pounder. The Statesman, b. s. by James Madison, dam Creona by Algona; W. J. Ivey. Dutch, b. s. by Athby; W. B. Snyder. Tonopah, b. s. by Billups, dam Elisa S. hy Alcantara, Jr.; W. L. Vance. Emily W., b. m. by James Madison, dam Cornelia Rose by Cornelius; Fred E. Ward. Sidonis, b. s. by St. Nicholas, dam Hagar Wilkes by Nutwood Wilkes; W. H. Williams.

No. 4—2:30 Class, Trotting, Three-Year-Olds, Sidney Dillon Stakes, $400—5 Entries.

Debutante, b. f. by Kinney Lou, dam Athene by Dexter Prince; V. K. Dunne. Hy You, br. m. by On Stanley, dam Hyto by Happy Prince; Homer Rutherford. Bessie T., b. f. by Zombro, dam Manila by Shadeland Hero. Don Reginaldo, b. s. by On Stanley, dam Belle Raymond by Raymond; Fred E. Ward. Nusado, br. s., by Nushagak, dam Addie B. by Dexter Prince; Woodland Stock Farm.

No. 5—2:15 Class, Pacing, Sebastopol Stakes, $500—11 Entries.

Freely Red, b. m. by Red Medium, dam by Bourbon Wilkes; A. G. Dahl. McFadyen, ch. s. by Diablo, dam Bee Sterling by Sterling; E. D. Dudley. Kermit, ch. g. by Henry Nutwood, dam Two Minutes by Wildnut; F. E. George. Memonia, b. m. by Demonio, dam May Norris by Norris; S. H. Hoy. Queen Derby, br. m. hy Chas. Derby, dam Addie Ash by Indianapolis; McGowan & Cuicello. Rockaway, r. g. by Stoneway; G. A. Pounder. Silver Dick, g. g. by Geo. McKinney, dam Miss Taylor by A. W. Richmond; L. L. Payton & Sons. Wanderer, b. g. by Athby; W .B. Snyder. Salva, b. m. by Dictatus Medium, dam Aunt Salne by Benton Boy; C. Whitehead. Fred W., b. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann. T. D. W., b. s. by Nutwood Wilkes, dam Abaca Calendine by Wilkesdale; T. D. Witherly.

No. 7—2:25 Class, Pacing, Three-Year-Olds, Chamber of Commerce Stakes, $400—5 Entries.

Lookout, br. s. by Searchlight, dam Bee Sterling by Sterling; E. D. Dudley. Demouio Wilkes, b. s. by Demonio, dam Laura H. by Nutwood Wilkes; J. B. Nightingale. Moortrix, b. s. by Azmoor, dam Trix by Nutwood Wilkes; James Sutherland. On Bly, br. s. by On Stanley, dam Nellie Bly by Woolsey; C. O. Thornquest. Georgie Z., b. m. by Lynwood W., dam Evangie by Shadeland Onward; J. W. Zibbell.

No. 8—2:09 Class, Trotting, J. H. Gray Stakes, $750—7 Entries.

Athasham, b. h. by Athadon, dam Cora Wickersham by Junlo; D. L. Bachant. John Caldwell, b. g. by Strathway, dam Annie; J. C. Kirkpatrick. Wild Bell, br. g. by Wildnut, dam Bell Bird by Electioneer; F. J. Ruhstaller. R. Ambush, br. h. by Zolock, dam May Kinney by Silkwood; Homer Rutherford. North Star, b. g. by Nutwood Wilkes, dam Ivoneer by Eugeneer; C. Whitehead. Era, b. m. by Zombro, dam Nellie K. by Gen. Grant, Jr.; Frank Williams. Fresno Girl, br. m. by Seymour Wilkes, dam by Richard's Elector; J. W. Zibhell.

No. 9—2:19 Class, Trotting, F. S. Turner Stakes, $500—10 Entries.

Monicrat, bl. s. hy Woodman, dam Altlcrat, Jr.; J. J. Breen. Verona, m. by Nutwood Wilkes, dam by Cal. Nutwood; F. Gommet. Judge Dillon, c. h. by Sidney Dillon, dam Eveline by Nutwood; Mrs. L. J. H. Hastings. Lady McKinney, b. m. by Washington McKinney, dam Danville Maid by Daly; Frank J. Kilpatrick. Irene, b. m. by Martin's Florida, dam Birdie by Altamont; Robert Prior. Wenja, br. m. by Zolock, dam Molocka by Nutsford; G. A. Pounder. The Angelus, br. s. by Zombro, dam Hazel Kinney by McKinney and b. m. Laurel Leaf by Stam B., dam Laurel by Nephew; James Sutherland. Wild Girl, br. m. by Wild Nutling, dam by Geo. Washington; James Smith Easter Bells, b. m. by Diablo, dam Elisa S. by Alcantara, Jr.; W. L. Vance. May T., ch. m. by Monterey, dam Melba by Nutwood Wilkes; J. Twohig.

No. 11—2:20 Class, Pacing, Santa Rosa Stakes, $1,000—10 Entries.

Highfly, b. g. by Nearest, dam Miss Gorden by Bismarck; T. W. Barstow. Lettie D., b. m. by Boodle, dam Maud by Bertrand; A. M. Davis. Diabull, ch. g. by Diablo; W. Griswold. Charlie D., b. s. by McKinney, dam Flewey Flewey by Memo.; J. C. Kirkpatrick. Silver Dick, g. g. by Geo. W. McKinney, dam Miss Taylor by A. W. Richmond; L. L. Payton & Sons. Mac O. D., b. h. by Zolock, dam Kentucky Bell; G. A. Pounder. Josephine, b. m. by Zolock, dam Lady May by Newton N.; Homer Rutherford. Solano Boy, br. g. by Father McKinnon, dam Minerva by Guy Wilkes; C. J. Uhl. Joe Robin, bl. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann. Explosion, b. m. by Steinway, dam Flash; Fred E. Ward.

No. 12—2:08 Class, Pacing, Overton Hotel Stakes, $500—6 Entries.

Miss Idaho, s. m. by Nutwood Wilkes, dam by Forest Clay, Jr.; D. L. Bachant. John R. Conway, ch. s. by Diablo, dam Lady Kohl by Le Grande; George Meese. Moy, b. m. by Prodigal, dam Minnine by Clay King; Morris Bros. Delilah, b. m. by Zolock, dam Gipsy by Gen. Booth; Homer Rutherford. Queen Pomona, b. m. by Pomona; E. Thompson. Diabless, b. m. by Diablo; J. W. Zibbell.

As the 2:13 and 2:16 trotting events failed to fill they were declared off, and a purse of $500 was offered on 2:14 class trotters. A purse of $500 was also offered for trotters of the 2:30 class, and two cup races will be arranged for members of amateur driving clubs. Entries to the 2:14 and 2:30 trots will close July 21st.

———o———

TULARE ENTRIES.

Tulare, Cal., July 2, 1908.

Breeder and Sportsman.—Herewith entries for the Tulare meeting to the stakes which closed June 15th.

Stakes Nos. 1, 4, 6, 7, 8, 9, 10 and 11 bave not filled, and we have reopened Stakes 6, 8 and 11, which will close on September 1, 1908. These are the 2:10 trot, 2:14 pace and 2:10 pace, purses $500 each.

Yours very truly,
W. T. INGWERSON.
Secretary.

Trotting, 2:14 Class—$500.

Little Louise, Montgomery Stock Farm, San Jose; Wild Girl, James Smith, Salinas; Kinney Al., T. H. Ramsay, Red Bluff; Dutch, W. B. Snyder, Fresno; May T., J. Twohig, Warm Springs; Ramona S., E. A. Swaby, Dixon.

District Pace, 2:35 Pace—$400.

Avalon, D. B. Moshier, Porterville; Ira Basler, C. E. Johnston, Visalia; Allic Glen, J. H. Nelson, Hanford; Joe Athby, H. O. Smith, Porterville; Valadore, G. A. Ingles, Fresno; Alice St. Clare, G. W. Kirkman, Exeter.

Pacing, 2:25 Class, Raisin City Stakes—$500.

Ruby H., G. W. West, San Bernardino; Avalon, D. B. Moshier, Porterville; Amado, Valencia Stock Farm, San Bernardino; T. D. W., T. D. Witherly, Irvington; Boton de Oro, A. Soiano, Los Angeles; Velox, G. W. Bonnell, Redlands; Allie Glen, J. A. Nelson, Hanford; Wanderer, W. B. Synder, Fresno; Chatterbox, H. Weimer, Pleasanton; Babe Madison, H. Johnson, Oakland; Joe Athby, H. A. Smith, Porterville.

Trotting, 2:18 Class—$500.

Charley M., M. J. O'Donohoe, Redlands; Ramona S., E. A. Swaby, Dixon; Bonetti, James L. Smith, Oakland; Chestnut Tom, G. T. Algeo, Stockton; Idolway, G. W. Kirkman, Exeter; Herbert Dillon, Josie S. Frary, Red Bluff; Lucy M., W. Manske, Huntington Beach.

Pacing, 2:20 Class—$500.

Adelante, E. E. McMahan, San Bernardino; T. D. W., T. D. Witherly, Irvington; Boton de Oro, A Solano, Los Angeles; Martinez Boy, J. G. Leggett, Hanford; Velox, G. W. Bonnell, Redlands; Wanderer, W. B. Snyder, Fresno; Chatterbox, H. Weiner, Pleasanton; Alice St. Clair, G. W. Kirkman, Exeter; Babe Madison, H. Johnson, Oakland.

Trotting, 2:24 Class—$500.

Wild Girl, James Smith, Salinas; Bolock, J. H. Kelly, San Bernardino; Lucy M., W. Manske, Huntington Beach; Anita, W. Hale, Bakersfield; Idolway, J. Kirkman, Exeter; Dutch, W. B. Snyder, Fresno; May T., J. Twohig, Warm Springs; Bonnetti, James L. Smith, Oakland; Vera Alton, W. H. Hinds, Oakland Herbert Dillon, Josio S. Frary, Red Bluff.

———o———

I. D Chappelle of Hillsboro, Oregon, has purchased the three-year-old colt Dr. Ullman by The Bondsman. As a two-year-old last season this colt started in two races in Kansas, winning second money in each. He was a close second in 2:25½ the fastest heat of the two races.

JULY FOURTH AT STOCKTON.

A large crowd was present at the Stockton racetrack Saturday afternoon to witness the San Joaquin Valley Driving Club's race matinee. The trophy series was inaugurated and the cups will be awarded at the close of the season. All of the events were good. The results were as follows:

First race—Class C; trot and pace:
J. Grigsby's s. m. Genevieve G. (trotter), by Wash. McKinney. Driven by G. T. Algeo.....1 1
M. Friedberger's blk. m. Black Beauty (pacer, by Booth.) Driven by M. Friedberger...........2 2
Mr. Hitchcock's b. g. Honest John (trotter), by Monocrome. Driven by F. H. Johnson........3 3
Time—2:43, 2:43.

Second race—Class A, trot:
H. T. Higginbotham's b. g. Allan Pollock, by Nutwood Wilkes. Driven by D. Lieginger..2 1 1
F. Lieginger's b. g. Bob Ingersoll, by Nutwood Wilkes. Driven by F. Lieginger..........1 2 2
F. J. Chalmer's blk. g. Auget Baron, by Baron Wilkes. Driven by P. J. Chalmers........3 3 3
Time—2:26, 2:25½, 2:27¼.

Third race—Class A, pace:
A. B. Sherwood's s. g. Prince A, by Charles Derby Driven by A. B. Sherwood 1 1
G. F. Wille's b. g. Gilt Edge Dick, by Daedalion. Driveu by G. F. Wille 2 2
Time—2:25, 2:23½.

Fourth race—Class B, pace:
A. W. Cowell's blk. m. Bonnie W. by Delphi. Driven by A. W. Cowell......................1 1
Burt Acker's b. g. Wiggler by Sidney. Driven by Henderson and Acker 2 2
Time—2:25, 2:33.

Fifth race—Class B, trot:
A. Capurro's br. m. Bell C. by Elector. Driven by A. Capurro 1 2 1
H. A. Prole's b. m. Lady Bird, by Elector. Driven by D. Lieginger 2 1 2
A. L. Archambeaut's s. m. Babe, by Guy McKinney. Driven by A. L. Archambeault....3 3 3
Time—2:35, 2:34, 2:34.

———o———

RACES AT STADIUM TO-DAY.

The Park Amateur Driving Club will give a program of six races at the stadium track in Golden Gate Park this afternoon. The entries being as follows:

Free-for-all pace, mile heats—A. Joseph's Alfred D, D. Hoffman's Mary K.

Class C trotters, mile heats—A. Consani's Presto, J. W. Smedley's Red Velvet, A. P. Clayburgh's Charles H, George D. Mackay's Quill, I. L. Borden's Barney Barneto.

Class D trotters, mile heats—F. J. Kilpatrick's Harry McKinney, G. Wempke's Blomada. E. Stock's Director B., C. F. von Issendorf's Vita Dillon.

Class A trotters, mile heats—D. E. Hoffman's Dr. Hammond, A. Joseph's Vic Schiller.

Class B trotters, three-quarter mile heats—F. J. Kilpatrick's Belle of Washington, M. W. Herzog's Lady Nell, F. W. Thompson's Lady Washington, E. Stewart's Peter Pan, G. R. Gay's Laddie G.

Class A pacers, mile heats—T. F. Bannan's Jim Chase, Captain W. Olsen's Zulu, G. E. Erlin's Toppey, H. M. Ladd's Ringrose.

The officials will be: Starter, T. J. Crowley; judges A. J. Molera, A. Melletz and S. Christenson; timers, J. A. McKerron and George R. Gay; marshal William A. Lange.

———o———

RIBBON PARADE FOR STATE FAIR.

Director C. W. Payne of the State Agricultural Society, announced at a meeting of the Sacramento Driving Club last week that arrangements have been completed for a grand ribbon parade at Agricultural park, Sunday, August 30th, the first Sunday of the state fair. The Agricultural Society will act with the driving club in carrying out the details of the parade, and this will be given in conjunction with some of the classes that are arranged by the state board. These classes include heavy horses and vehicles, and the new arrangement provides for decorated vehicles of all kinds, as well as led horses, and the parade is open to all.

Crouch & Sons of Lafayette, Ind., importers of draft and coach horses, authorize the society to offer four cups for the get of horses imported by them, both in draft and German coach horses. They will be judged on the day of the ribbon parade.

The Sacramento Driving Club is considering the advisability of offering a handsome cup to be competed for by its members in the parade, the best decorated vehicles to be the ones judged. Offers of prizes have been made by many of the merchants of Sacramento and the parade is sure to be one of the most interesting and charming features of the entire fair. The fact that it is open to everybody makes it broader in scope and will tend to make the interest in the parade more general.

———o———

There was no racing at Peoria, Illinois, July 3d on account of rain.

———o———

Drink Jackson's Napa Soda.

NOTES AND NEWS

Look out for Welcome Mack!

He won a heat in 2:07¼ at San Bernardino on the 4th.

They say 2:04 will not stop this son of McKinney this year.

The Chico Driving Association will hold a matinee August 5th for the benefit of the Chico Free Library.

George G. 2:05¼ after working a mile on Monday over the Readville track, showed lame and he may have to have a let up.

The Santa Rosa races filled very well and there will be some fast racing at the Breeders meeting which opens July 29th.

From the reports of harness racing held on tbe Fourth it is evident that trotting and pacing are quite popular in California.

Reports from Palatine, Ill., say that Charley Dean's Chamber of Commerce candidate. Minor Heir, has been a mile in 2:09 over a half-mile track.

U. R. Welcome 2:19½ was clear outside the money at Canton, Ohio, July 1st. He finished eighth in a field of thirteen where the fastest time was 2:14¼.

Lou Mativia has moved his string of horses headed by the handsome stallion Alton, to the Woodland track where they will be trained for their engagements.

The Woodland Driving Club will hold a matinee this afternoon. A good program has been arranged and the contests should be keen as the horses have been weli classified.

Sonoma Girl 2:05¼ has been 2:11, 2:09¾ and 2:10 for her trainer, Billy Andrews. The fast pacer Blacklock 2:04¼ is going good and sound for his trainer, having been two miles in 2:08 and 2:08¼.

Manager Benjamin promises a sensational program for the opening day of the big trotting and pacing meeting at Oakland, August 10th. There will be some record breaking in all probability, as great pains will be taken to have the track lightning fast.

Little Joe, the Diablo pacer in Charley Spencer's string at Woodland, worked a nice mile in 2:10 one day last week, with the last half in 1:03¾. The same day Spencer drove the handsome trotting stallion Monicrat a mile in 2:15.

Bonnie D. a bay gelding by Bonnie Direct 2:05¼, dam Electress Wilkes 2:28½, the dam of Lady Mowry 2:09¼, by Nutwood Wilkes, is offered for sale. This gelding is four years old, sound and all right. Can show a 2:30 gait and is a fast natural trotter. See advertisement.

M. H. Becker, of Portland, Oregon, claims the name Dialta for his three-year-old gelding by Diablo 2:09¼, dam Pet by Altamont. This youngster is a good one and shows considerable speed for the training he has had which has been very limited.

Dr. I. B. Dalziel, the well known and popular vererinary dentist, was in Boston last week, on his way to his boyhood home at Exeter, Maine. He will be back in San Francisco before long to resume his extensive practice, and will find a whole army of horses here waiting for him.

The Sacramento Driving Club has elected the following officers for the ensuing year: President, Isaac Christie; vice-president, Mr. McCullom; secretary, Sam Smith; treasurer, Dr. Weldon; board of directors—George F. Walsh, John Silva, Jay Wheeler, M. T. Hunt, H. C. Pike.

Dandy Frisco 2:11½ by Francisco 2:12, a well known pacer owned by A. F. Morris of Freewater, Washington, died last week at the Walla Walla track. Dandy Frisco made his record last year at Walla Walla when he defeated Knick Knack, Nelly E. and Princess Nutwood in a five heat race.

Major McKinley 2:05¼ dropped dead at Kansas City while going an easy mile on June 24th. He was owned by Harry Train of Kansas City. Major McKinley was a bay gelding by Redfro 30,490, dam Polly Louise by William L. 4244, grandam Belle (dam of Prince Eugene 2:28¼, etc.) by Edwin Forrest 49.

S. B. Wright of Santa Rosa, has received from F. W. Krempin of Newcastle, Australia, a handsome silk sash which was awarded the colt Zolock Patchen at a recent great horse sbow held in Australia. Mr. Wright sold the colt which is by Zolock 2:05¼ out of Maud Patchen, to Mr. Krempin, and the latter exhibited him at the show, winning the championship, and then paid the breeder of Zolock Patchen a neat complim nt by sending him tbe sash.

John Caldwell 2:08½ is getting into fine conditiou under James Thompson's careful management at Pleasanton, and worked a nice mile in 2:10 last Wednesday. Don't be surprised if the gelding by Strathway lowers his record a bit this year, and he might do it at Santa Rosa in the 2:09 trot if everything is favorable.

Millard Sanders' workouts with the Maywood Stock Farm horses last week were as follows: Ruth Dillon 2:15¼, a mile in 2:14¼ and a quarter in 31 seconds; Martha Dillon 2:29¾, a mile in 2:18½; Mary Dillon, a mile in 2:12¾; Harry Dillon, Emma Dillon and Ida Dillon, miles in 2:22, 2:25 and 2:26¼, respectively.

In the railroad accident at Oakland on the Fourth of July in which eight persons were killed, Mr. Geo. C. Nutting, of 2117 Golden avenue, this city, was one of the victims. Mr. Nutting was well known among the road drivers of this city and a few months ago purchased the fast pacing horse Byron Lace 2:14¼, which he used on the road. Mr. Nutting had a host of friends who will greatly regret to hear of his sudden taking off, and will sympathize with his family in their bereavement. He was the head of the Nutting Construction Company in this city.

There arrived at Salinas Tuesday morning, July 7th, six mares from Pleasanton where they were all bred to Henry Helman's grandly bred colt Alconda Jay during the season. They are Princess 2:13¾ by Eugeneer, Amy I. by Diablo, and a bay mare by Stam B., all owned by J. B. Iverson; Cecino by Mendocino, owned by Louis Iverson; Bay mare by Nutwood Wilkes, owned by J. F. Davis, and a bay mare by McKinney, dam by Nutwood Wilkes, owned by Robert Garside. This last named mare's second, third and fourth dams are by Altoona, Junio and Carr's Mambrino, respectively, and sbe is without doubt one of the best bred mares in California.

Since the courts decided that the Selby Smelting Company at Vallejo Junction was responsible for the death of horses killed by the fumes from their smelter they have settled many claims of farmers in that vicinity. Enos Dana, a prominent farmer near Vallejo, has received $3,000 for horses killed. He lost fourteen valuable horses. Other farmers have received smaller sums, while claims ranging from $10,000 to $15,000 have been entered, but are being disputed by the company. Since the litigation reached its height, about two years ago, the company has paid out over $30,000 for horses destroyed. They now assert that tbey have eliminated the lead from the fumes and that the horses can feed from the pastures in the "smelter zone" without further danger.

The question is often asked, How long will lockjaw germs live? Croci tells of a mule that succumbed to this trouble. The animal had chafed wounds on both sides of its back, which had been caused by a pack saddle. A second mule, owned by the same person. had the same saddle placed upon its back, which also chafed the skin underneath, causing tetanic infection and resulting in the death of the animal. After three years the owner bought a new mule and placed the same saddle on this animal which the dead animals had carried three years previously. After ten days it was likewise affected with tetanus and died. This animal had also two chafed wounds caused by the saddle. He concludes from this incident that the tetanus bacilli in the saddle were still virulent and had led to an infection of the wounds.

William Allen White says: "Notwithstanding the popularity of labor-saving machinery, a few things may be said to tbe credit of the horse as a motive power. Seldom does the driver have to crawl under him with a monkey wrench and a jimmy to adjust his works so that he may haul the buggy out of a ditch. When he is left standing at a hitching post, passing pedestrians don't hear his wheels rumbling away, clickety-click, plunkety-plunk, and no smoke is observed coming out of his ears. After a brisk drive he may exhale a wholesome aroma of perspiration, but he never does smell like a gasoline stove that needs cleaning, and you don't get covered with lampblack while unhitching him. The driver doesn't find it necessary to toot a horn every time he turns a corner or approaches a pedestrian. And a well trained horse is not apt to explode and smash the driver into small pieces."

One hears some talk now and then to the effect that May Earl 2:10¼ may prove the Sonoma Girl of the year. She is going very steady in her work for Mike Bowerman, and last Friday she worked four miles in 2:15, 2:05, 2:07 and 2:07¼ .The mare seemed to be merely jogging. This daughter of San Mateo 2:13¼, is regarded by those well informed in such matters as the greatest trotter in training. Bowerman says she stepped the mile in 2:05 well within herself and that he could have driven her the heat in 2:04 without distressing her. Bowerman leaves soon for the races with May Earl 2:10¼, Queen Heiress by Handspring 2:18½, dam Alix 2:03¾; Sister Collette 2:09¾, Ashland Wilton 2:17½, Miss Louise (4) by The Bondsman and Springer Todd (2) by Todd 2:14¾, dam by C. F. Clay. May Earl will probably make her first start at Detroit in the $3,000 2:11 class. In her 2:05 mile this mare stepped the last half in 1:03¼, last quarter in 30½ seconds.—Kentucky Stock Farm, July 2d.

TWO DAYS AT ALBANY TRACK.

Hundreds of people attended the races at Steve Bailey's Albany, Oregon, track on July 2d and 3d. The majority of the races were at half mile heats, best three in five. Some great prospects were developed at this meeting, Zolock and Zombro, the California sires, gaining new laurels from the performances.

On the first day Velma Z., a Zombro mare owned and driven by John Sawyer won the 2:25 trot easily, her fastest heat in 1:07, no measure at all of her speed. She is out of Mary A. 2:30 by Altamont, dam of Kinney Al. 2:14¼, Sawyer refused* $1,200 for Zelma Z. a week ago.

In a special pace the Zolock mare Josephine 2:20 won in straight heats from Zom Norte (formerly Lord Lister 2:16) by Zombro, the heats being in 1:03¼, 1:03½ and 1:02½, the pacers making a close finish in every heat, the judges finding it a hard task to separate them in the final heat.

On the second day Delilah 2:08, daughter of Zolock, went a mile in 2:07¼ in an exhibition mile to beat her record.

The summaries:

Trotting, 2:25 class, purse $100:

Velma Z. by Zombro (Sawyer	1	1	1
May Tilden by Altamont (Kirkland)	2	2	2
Dr. Fraser by Stam B. (Barrows)	3	4	3
Miss Louise by Zombro (Lindsay)	4	3	5

Time—1:07, 1:09, 1:06.

Special pace, purse $100:

Josephine by Zolock (Rutherford)	1	1	1
Zom Norte by Zombro (Mauzey)	2	2	2

Time—1:03¼, 1:03½, 1:02½.

Trotting, 2:17 class, purse $150:

Redskin by Red Cloak (Lindsay)	1	1
Dr. Frazer by Stam B. (Barrows)	2	3
Coma by Caution (Dr. Young)	3	2

Time—2:20, 2:26.

Pacing, 2:20 class, purse $100:

Alt (Sawyer)	1	1	1
Oregon Babe (Woodcock)	2	2	2
Delmont (Barrows)	3	3	3
Crochet (Lindsay)	4	dr	

Time—1:05, 1:05½, 1:05.

Trotting, road race, cup.

Alice May Norte (Ison)	2	1	1
Lady Barnhart by Zombro (Davenport)	1	2	2
Pearl (Logson)	3	3	3

Time—2:52, 2:54, 2:50.

Pacing, to beat 2:08:

Delilah by Zolock (Rutberford)................won

Time—2:07¼.

DON'T KNOW WHEN TO STOP.

There are some trainers who do not know when to stop in training youngsters, and in consequence each year many colts are knocked out. The youngsters show a lot of speed, and do everything they are asked to do, but the trainer keeps asking more and more, until the youngster collapses.

The writer remembers seeing a trainer work three yearlings, one warm morning in June, nearly the whole forenoon, simply because the speed they had been showing had created a lot of talk, and there was a big crowd of people out at the track to see them. The next morning, neither of the colts could trot fast enough to get warm, and but one of them ever got to the races, and he was not much of a trotter, but did succeed in getting a record of 2:26¼. They were all real trotters with a lot of natural speed, and were as promising youngsters as any trainer ever had, but the man who had them did not know when to stop, and they were ruined.

There used to be a stallion owned in Ohio who sired as much speed as any horse that ever stood for service, and his colts all showed early and extreme speed, but the trainer who had charge of the training and development of his colts was one of those men who did not know when to stop. He would work a big bunch of them every Spring and along in June sensational reports would come of the fast quarters and halves being shown by them. Every time anybody visited the track, and asked about them, this trainer would bring out one by one, and step them fast quarters and halves, just to let the visitor see them step. By the latter part of July, his whole string were ready for the hospital, and they were never heard of again. Few of the stallion's colts ever got to the races, and in a few years he got the reputation of being a failure as a sire, and even after his owner parted with the trainer, and placed his colt in other trainer's hands, and they began to show well, the injury had been done, and he still has the reputation of being an in different sire. There was nothing the matter with the stallion or the colts, but they were both ruined by a trainer who did not know when to stop.

The trainer who goes slow, and gives his colts careful training and uses moderation in working them. is the only trainer who will attain success in developing them.—Boston Courier.

SENSATIONAL TIME AT PEORIA.

Telegraphic reports of the Peoria meeting, which opened July 4th, are very meagre, but the California trainer, Wil Durfee, has done fairly well and won more than his entrance money in spite of the fast time made.

On the opening day he won the 2:14 trot with Clande Jones McKinney horse Corlokin, taking the first, third and fourth heats in 2.14¼, 2:12¾ and 2:12¼. The Zombro mare Zomelta won third money in the 2:24 trot. The fastest time in this race was 2:11½. On the 8th, Durfee won second money with Petigru in the 2:11 trot, and on Thursday, the 9th, got third money with Phoenix, "The Pig," in the 2:15 pace, the two heats of which were in 2:07¼ and 2:07½. The reports we have received cover the first, second, fourth and fifth days of the meeting and are as follows:

PEORIA, Ill., July 4.—Minor Heir, a brown horse by Heir-at-Law, owned by P. C. Isacs, Stoyestown, Pa., and driven by Charley Dean in the 2:18 pace at the mile track races here to-day, did the first heat in 2:05¼, breaking the world's record for green pacers in a first winning heat.

In the M. and M. purse of $5000 for 2:16 trotters, the feature of the day, Amy Brooks won in two straight heats.

The famous Ed Geers drove in several races. The summaries:

2:14 trot; purse, $600.
Carlokin, b. g. by McKinney (Durfee)....1 2 1 1
Othello, bl. g. by Prince Edward, by Membrino Gift (Fairbank) 5 1 2 2
Teaset, c. m. by Allenwood E., by Commodore Kitson (Gears) 2 3 3 3
El Victress, bl. m. by Elbenicia (Rosemear) 3 5 4 5
Time—2:14¼, 2:12¼, 2:12¾, 2:12¼.
True Tucker, Betty Wright and Patmont also started.

2:24 trot; purse, $600.
Fleming Boy, b. g. by Camera, by Lotta D. (Dean) 1 1 1
Mochester, b. h. by Moko, by Chestnut Belle (Geers) 2 2 3
Zomalta (Durfee) 3 3 2
Time—2:14¼, 2:11½, 2:13¼.
Don Z. and Josephine L. distanced.

2:11 pace; Clarke Bros.' purse, $2,000.
Charlie Hal (Snow) 1 1
Ponder, Jr. (Geers) 8 2
Elsie Allen (Levy) 2 9
Levy Patch (Custer) 5 3
Time—2:09¾, 2:11¾.

2:16 trot; M. and M.; purse, $5,000.
Amy Brooks (McDonald) 1 1
Spanish Queen (Macey) 2 3
Avtellay (Al. Thomas) 4 2
Loval (Geers) 3 8
Time—2:10¼, 2:09¼.
Black Silk, Souoma May, Roy Brook and Mighty Onward also started. Princess Borneo distanced.

2:18 pace (unfinished); purse, $600.
Minor Heir (Dean) 1 1 1
Kendig (Snow) 3 2 2
Dr. Bonney (Geers) 2 3 4
Filmah (Andersou) 5 5 3
Time—2:05¼, 2:11¾, 2:07¾.

PEORIA, Ill., July 6.—Fleming Boy to-day trotted the fastest mile ever covered by a green trotter in the third heat of the 2:29 trot, when he set a mark of 2:07½. Spill, in the 2:10 pace, negotiated the mile in the second heat in 2:06½. Summary:

2:13 pace: Lady of Honor won the fifth and sixth heats, Woodford D. won the second and fourth heats and Farmer Boy won the third heat. Best time, 2:08¼.

2:29 trot: Fleming Boy won the first and third heats, Alceste won the second heat and Vendetta won third money. Best time, 2:07½.

2:10 pace: Spill won in straight heats, Leslie Waterman second and Clourist third. Best time, 2:06½.

Peoria, Ill., July 8.—Amy Brooks, winner of the M. and M. stake here last Saturday, won the Hotel Foy stake to-day in two straight sensational heats from a field of five other starters. In the final heat Amy turned the mile in 2:05¼, the fastest trotting mile of the year, and equaling Sonoma Girl's fastest mile of last season, made at Libertyville. The summaries:

2:11 Trot; Purse $600:
Othello, bl. g. by Prince Edward (Fairbank...1 1 1
Petigru, b. h., by Kingward (Durfee)........3 2 3
Bonner, b. g., by Jayhawker (Rosemerepy)..4 3 2
Aunt Jerusha, br. m., by Director Wilkes (McMillan) 2 4 4
Time—2:12½, 2:10¼, 2:11¾.

Free-for-all Pace; Purse $800:
Baron Grattan, b. g., by Grattan (Geers)........1 1
Kruger, h. g., by Mercury (McDonald)..........3 2
Gallager, h. g., by Royal Rysdyk (McEwin)....2 3
Time—2:06¼, 2:06¼.

2:19 Trot; Purse $2,000:
Amy Brooks, b. m., by Haxhall (McDonald)......1 1
Spanish Queen, b. m. by Onward Silver (Macy)..2 2
Kid McGregor, b. h. by Kind Nutwood (Geers)..4 3
Brother Kilroy, b. h. by Milroy (Benyon)........3 4
Nancy Royce started. Minnie Lowry was distanced.
Time—2:06¾, 2:05¼.

PEORIA, Ill., July 9.—Hal Raven, owned by Dr. J. L. Wentz of Scranton, Pa., and driven by Snow, won the New National Hotel stake for 2:15 pacers in the great Western races here to-day in straight heats. The three-year-old pace proved to be the most exciting event of the day. John S., after winning the first heat, lost the second heat by a nose to Earl, Jr., and the deciding heat by a length. Summary:

2:15 pace; purse, $2,000.
Hal Raven, b. m. by Hal B. (Snow)............1 1
Prince A. Rundell, br. h. by Ashland Wilkes (Geers) 2 2
Phoenix, b. h. by Titus (Durfee) 3 3
Queen Walnut, r. m. by Walnut Boy (Taylor)..5 4
Dan D., Farmer Boy and Cold Steel also started.
Time—2:07¼, 2:07½.

2:21 trot; purse, $600.
Elwood Jim, b. b. by Reward J. (Lee) 1 1 1
Boquita Boy, b. h. by Grattan Boy (Whitney).2 2 3
Rodotto, bl. h. by Red Medium (McCarthy)..3 3 2
Mighty Onward, b. h. formerly Onward George, by Onward (Davis) 4 4 4
Horace G. also started.
Time—2:15¼, 2:15¼, 2:16¼.

Three-year-old pace; purse, $500.
Earl, Jr., g. g. by The Earl (Cameron)......2 1 1
John S., b. s. by Ira Band (Thacker).........1 2 2
Clover Patch, b. f. by Dan Patch (Snow).....5 3 3
Royal Lander, b. s. by Rex Americus (Wolverton) 3 5 4
Slum Beauty and Master McKerrom also started.
Time—2:12¾, 2:10¼, 2:11¼.

THE FOURTH AT SAN DIEGO.

Neck-and-neck finishes, heavy betting and unbounded enthusiasm were the order of the day at the Coronado race track yesterday afternoon, when the largest crowd that has ever yet turned out to see a horse race in this county crowded the grand stand and cheered for its favorites.

All of the nine heats of the harness races were close, giving the bettor a good run for his money, but the star finish occurred at the close of the second heat of the 2:16 pace, when Fox S. craned her neck over the line not six inches in advance of the nose of Geraldine, bringing in with her the money of the crowd. Both horses had been neck and neck all the way around, affording the prettiest race that has ever been witnessed on a local track.

The following officials are to be congratulated on the success of the day's events: Starter, C. L. Warfield; judges, George H. Clarke, J. E. Connell and A. G. Dahl; timers, John Gillons, S. M. Brown and Frank Edwards; clerk, George Anderson. The summaries:

First race, pacing:
Cora 1 1 1
Bluebird 2 3 2
Poggi 3 2 3
Time—2:27, 2:24½, 2:25.

Second race, 2:30 trot:
Babe 2 1 2
Colonut 3 2 1
Belle C. 1 5 3
Wanna G. 4 3 4
Rosewood ....5 4 dr
Time—2:26½, 2:30, 2:29¼.

Third race, pacing, 2:16 class:
Fox S. 1 1 1
Geraldine 2 2 2
Time—2:14½, 2:12½, 2:15.

ANOTHER 2:10 PERFORMER FOR McKINNEY.

When Welcome Mack won a heat in 2:07¼ at San Bernardino on the 4th of this month, he gave McKinney 2:11¼ his eighteenth 2:10 performer. Welcome Mack is a pacer and will be seen on the California circuit this year as he is entered at Oakland, Chico and Sacramento, as well as through the North Pacific Circuit. He is a brown gelding and is now twelve years old. His dam is the chestnut mare March Fifth by Hawthorne 10,935, son of Nutwood, second dam March Fourth, dam of Kilrain 2:22¾, Thornwood 2:27¼ and Paladin 2:29½, by Hambletonian 725, third dam Feany, dam of Elect Moore 2:27, by Bonner, son of Hambletonian 725, fourth dam Sophia by Williamson's Belmont.

Welcome Mack is first mentioned in the Year Book of 1902. He was then six years old and started in four races. His first start was at Oxnard, August 7th where he was secoud to Alford D. in 2:14¼, 2:12¼ and 2:13½. Two days later he won in straight heats over the same track in 2:20½, 2:22 and 2:24. Ten days later at Napa he finished second to Robert I 2:08¾ every heat in 2:13, 2:10, 2:11¾ and at Woodland, the following week he won third money in a race wherein he was beaten by Robert I. in 2:15¼, 2:15½ and 2:13¾.

The Year Books of 1903 and 1904 do not record him as a starter during those years, but in 1905 he made two starts and won hoth. At San Bernardino, November 10th of that year he won the 2:20 pace in straight heats, reducing his record to 2:12¼ in the last heat and defeating a field of eight good pacers. November 22d he started in the 2:20 pace at Los Angeles, meeting much the same field, the contending horse in both races being Victor Platte 2:12¾. Welcome Mack won the first heat in 2:13, then made a dead heat with Birdal in 2:12¼, won the third in 2:11¾, was beaten the fourth heat in 2:12¾ by Victor Platte and won the fifth in 2:12, winning the race.

In 1906 he made but two starts, both at the Los Angeles meeting in July. His first race resulted in his being beaten by Cuckoo in straight heats in 2:09½ 2:09¼ and 2:11¼. Welcome Mack was second in every heat of this race. A few days later he won the 2:09 pace, dropping the first heat to Bonnie Ailse in 2:12, and winning the next two in 2:10½ and 2:11.

Last year he was not started in any of the regular events, but appeared in matinees at Los Angeles, pacing several heats around 2:10. He is considered to be equal to a mile in 2:05 when right, and as he is entered against Sir John S. 2:04½ and other fast ones on the North Pacific Circuit it is more than likely that the horse winning from him will reduce its record.

ANSWERS TO CORRESPONDENTS.

Enquirer, Santa Rosa—Aggie G. was a chestnut mare foaled 1887. She was bred at Palo Alto. Her sire was Ansel 2:20 (son of Electioneer and Annette by Lexington) dam Gipsy by Paul's Abdallah, second dam untraced. Paul's Abdallah was by Hambletonian 10, out of a mare by Roehuck. Gipsey is the dam of Hernani 2:29¼ and grandam of Erastus C. 2:22. Trilby cannot be registered. Her sire is not registered, nor is her dam. Black Ralph's record was 2:40½ not 2:20. He sired many handsome roadsters and has three in the list—Belle Spencer 2:26¼ and Keepsake 2:29¼, trotters, and the pacer Killarney 2:20½. One of his daughters produced Tom Ryder 2:13½. He is registered as Black Ralph 10,687, sire David Hill 867, dam untraced. Reavis' Blackbird is registered as Blackbird 402. He was sired by Blackbird 401, dam by Capt. Lightfoot, son of Victor, he by Abdallah 1, grandam by a horse called Kentucky Eclipse. Blackbird 402 sired Mamie Griffin 2:12, Vic H. 2:12¼, and Ned Forrest 2:25½.

F. L. S., City—Yes; Egbert 1136 was inbred to Hambletonian 10, as he was sired by that horse, and the sire of his dam and grandam were both sired by him. Egbert sired 85 trotters and pacers in the list, 45 of his sons have sired 156 in the list, and 50 of his daughters have produced 72 with standard records.

H. M., San Francisco—Peter Pan was bred at Santa Rosa Stock Farm. He is by L. W. Russell (son of Stamboul and By By by Nutwood 600,) dam Biscari by Director 2:17, second dam Bicari by Harold.

CAN RECOVER FULL VALUE.

Horse owners will be interested to know that according to a recent decision of the Supreme Court of New York it is possible to recover the full value of a horse if he is killed in the course of shipment from one state to another, whether by freight or by express no matter if the railroad company or the express company is able to produce a limited liability contract, signed by the shipper.

The court's decision stated: "It is the plain purpose of the act to make it unlawful, by the device of a receipt, or contract, to provide for reduction of rates by exempting the carrier from liability, in whole or in part. The contract in that respect is to be disregarded, and the rights of the shipper are to be considered, as if no contract had heen made."

It should be borne in mind, however, that this decision was handed down under the interstate commerce act, and therefore applies only to the shipment of horses from one state to another.

NOT A HORSE DEALER.

The witness being sworn, was asked to state his name, residence and occupation, to which latter question he replied that he was a farmer.

"A farmer?" questioned the attorney.

"Yes, sir; a farmer."

"And where is your farm?"

"North of town about a mile."

"How much of a farm have you?'

"About three-quarters of an acre, I guess."

"Aud you say you're a farmer?"

"Yes, sir; a farmer."

"Now, isn't it true that instead of being a farmer you're a horse dealer?"

"No, sir."

"Well, haven't you bought and sold a good many horses in the last few years?"

"Yes, I reckon I have."

"Now, tell the jury about how many horses you've bought and sold in, say the last year."

"Oh, I reckon four or five hundred."

"And you say you are not a horse dealer?"

"No, sir! I'm a farmer."

"Well, now, if you're a farmer and not a horse dealer, explain to the jury why you have bought and sold between four aud five hundred head of horses in the last year?"

"Well, drawled the witness, "I was trying to find one that would suit me."

President Roosevelt has added to his stables a pair of coachers and a saddler. The President directed Mr. Moses Moses, of Baltimore, to get these horses. Mr. Moses, accompanied by C. E. Brown, D. V. S., of the Quartermaster-General's department, United States Army, went to New York and succeeded in carrying out the commission.

The pair are dark bay geldings, with black points. The only white on either is a star on the forehead. They are of the Electioneer family, being inbred Hambletonians. They stand 16 hands high, are perfectly mated, are high actors and can step along at 12 miles an hour. Mr. Roosevelt wanted the team for his own personal use.

The saddler is also for his use. The horse is 15.3 hands high and weighs about 1,050 pounds. He is a bay, with a white snip in the face and three white feet. His gaits are walk, trot and canter. He is 6 years old, stylish and very spirited.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

BEAR HUNTING ON THE DIVIDE.

The Grayback Mountain region on the Oregon-California divide is, it is claimed, one of the best big game hunting grounds in America. It is one of the most picturesque portions of the West, an uninhabited primeval wilderness. In the deep gulches, the boundless forests of pine, and over the endless ranges whose limit is the horizon; where the Applegate and the Illinois froth angrily between sheer walls of stone —roam the mule and the white-tail deer, the bear and the puma, the lynx, and the bobcat. The real sportsman finds in this region conditions that are ideal. It is no auto-touring country. The man who goes in there rides a broncho; other cayuses, well packed, transport the ammunition, the camp outfit and the grub kit.

Though the snow gets deep up on the Oregon-California divide in the winter time, the weather is not severe, and on the highest altitudes, which are from 4,500 to 5,000 feet, zero temperature is never known. So the bears hibernate but for a short time. They have been killed there in midwinter, and found in good condition—in better condition as to meat and pelt, than if killed in the spring, as the fur is heavier.

All species of the American bear, with the exception of the grizzly, are found there, including the brown, black and cinnamon. A few silver-tips, which are sort of half-brothers to the grizzly, are met. More black bears are found than any other. These, like the cinnamon and the brown, attain large size, weighing never less than 250 pounds, and tipping the beam as high as 600. From 400 to 500 pounds is the average weight.

The meat of the Northern California and Southern Oregon bear is always good, but attains its best savor during the hunting season, which is the latter part of summer and early fall. It is then that sweet acorns are ripe. These nuts grow in abundance on the Oregon-California divide, and the bear feed greedily upon them. A bear will abandon a bee tree for a feast of sweet acorns. The vast groves of sweet-acorn oaks on Grayback Mountain no doubt accounts for the number of bear found there.

Grayback is fifty-five miles south of Grant's Pass. The United States Forest Service has a camp on Grayback, near the Oregon Marble Halls, or caves, and has direct communication with the outside world by telephone; thus the big game hunter, even though in the midst of a wilderness with bear all around him, may still call up his friends and report the luck of the day.

The camp kit taken by the big game hunter is necessarily limited. The pack should be complete, but never over-loaded. There should be a frying pan and a coffee pot; bags of flour, salt and beans, as well as a slice of bacon and a little lard to help the frying. Space must also be made for small cans of salt and soda. Sugar is carried in a canvas bag, and the coffee and tea must not be overlooked. A "Dutch oven" is a very convenient thing when it comes to making biscuits over a campfire. It's not very heavy, and is the next best thing to a camp stove. A roll of woolen blankets for the bed, and a small shelter tent to protect the hunter from the frost and rain complete the outfit.

The man of experience, however, will always have a hunting knife and a "belt ax" strapped around the middle, as these two things are the most used articles of the outfit. Also, he will not overlook his tobacco and will carry his matches in a water-tight case. No white man, outside a dime novel, ever started a fire by rubbing two sticks together, or firing a pistol into a heap of kindling.

The native ranchers and trappers who occupy scattered cabins on the Oregon-California divide, always have two or three "b'ar dogs" about. The rancher knows just where to find the best groves of sweet acorns—he knows just where to go and find bear dogs help him in scaring bruin out of the dense brush.

Hunting bear on Grayback Mountain, as anywhere in the Northern California and Southern Oregon forests, is largely a matter of patience and persistence. The dense undergrowth makes it next to impossible to get within range of a bear by stalking, though this is a method used by some of the most experienced hunters. It means several hours of the hardest kind of work, following the trail or creeping upon a sweet acorn grove in which the bear are known to be feeding.

The ideal method is to locate a sweet acorn patch where the bears are in the habit of feeding. It is not difficult to find these. There are plenty of signs to indicate that Mr. Bruin comes there for his breakfast and dinner. When you have located such a patch, get up early and take a stand within range of it. If your rifle is true and your aim sure, you will have a bear, and possibly two or three of them before noon. Last season a party of Los Angeles hunters passed a week on Grayback. There were three men in the party and they bagged, all told, sixteen large bear, including one huge silver-tip.

To be a successful bear hunter in this region requires one to be a good long-distance shot. It is not necessary that the hunter be equipped with a gun, a broadside from which would kill an elephant. A 30-30 is plenty large enough. A ball from a rifle of this bore, if it hits the right spot, will bring down the biggest bear and require no second shot to finish him. A Coast mountains bear will carry several ounces of lead and be but little worse for it, if struck in the hams, but get him just behind and beneath the shoulder and he will settle down with hardly a quiver.

By getting an early start the big game hunting grounds on the Oregon-California divide can be reached in one day from the railroad. It is best, however, to use two and go by easy stages, for camping places are everywhere, with fish and small game in plenty to amuse on the way.

After the first day, the hunter finds naught but an unbroken wilderness. There are then no roads, and the trails are dim. He must keep to the ridges or follow the river. The ranges are broken by gulches and canons, deep cut, irregular, and down the depth of which creeks and streams go babbling. Glittering snow peaks rise here and there above the mountain billows, like whitecaps breaking the monotony of an ocean's endless blue. As the hunter gazes around him upon the unbroken expanse of smoke-blue ridges, he feels lost in the midst of a great mountain sea.

LARGE GAME IN FOREST RESERVE.

The expert hunters that the National Forest service brought to the Tahoe National Forest recently for the purpose of killing the wild and predatory animals that roam through the reserve, are getting excellent results. They have been persistently hunting the big game and were recently rewarded with bagging three large bear.

Word to that effect has reached the headquarters of the National Forest in Nevada City. Neither of the animals were caught by the traps that are constantly set. All three of the beasts were shot after being treed by the dogs the hunters brought with them from Lake County, where they were formerly engaged in pursuit of big game. These dogs are trained animals and invaluable to their masters.

The bear which the hunters bagged were killed in the vicinity of the American River where they have become quite predatory and annoying. One of the lot weighed in the neighborhood of 400 pounds, being one of the biggest to be caught in recent years.

Cattle herders will be glad to learn of the success of the hunters and to know that they will continue in quest of all manner of wild animals until the latter have been eliminated from the forest. Ranchmers the herders have complained bitterly of the raids that have been made on their cattle, which have been killed by the score. These complaints led to the employment of the hunters.

BIG HORN HUNT IN LOWER CALIFORNIA.

With five excellent pairs of horns of the rare bighorn mountain sheep, and several beautiful sets of deer antlers, a party of well-known business men of San Diego returned last week from Lower California on the Lower California Development Company's steamer St. Denis, after one of the most successful and enjoyable hunting trips of the year.

In the party were George M. Hawley, A. E. Roberts, S. H. Langdon, Ralph Ramsdell and Frank Turnbull. They left San Diego on the 25th of May on the steamer St. Denis and went direct to San Quintin, Lower California. At this place they secured a cook and guide and fifteen mules to be used as pack animals. Fully equipped with shotguns, rifles, a great quantity of ammunition, a large supply of provisions and other necessaries, they started inland over the wild and rugged trails of that region.. During the trip they went inland 130 miles south and east of San Quintin, as far as they could find water, bringing them within fifteen miles of the Gulf of California, which could be plainly seen from their high elevation.

The several sets of handsome deer horns they brought back were mute evidence of the kind of game they came in contact with, but only a small portion of what could be told by the five members of the party. Deer and sheep were quite plentiful, and according to statements made by Mr. Turnbull one or more of the former was secured every time they branched out for venison. Altogether eleven deer were brought down. The sheep also were seen in large numbers, but owing to the extreme ruggedness of the country, it was almost impossible in some cases to secure them after shooting. A total of eight large mountain sheep fell prey to the sportsmen's rifles.

The sheep was the particular game that the party was after. This animal is almost extinct in the United States. They are also fast becoming extinct in Mexico, although that section of the sister republic is considered one of the best spots in the world for hunting that variety of game. The sheep horns are now considered valuable relics and for that reason the specimens secured by the party are all the more highly prized.

In addition to sheep and deer, all kinds of small game was encountered in great quantities.

"The quail," said Mr. Turnbull, "why, it was a shame to kill them. They exhibited extreme tameness, and it certainly was an easy matter to drop them. Rabbits and other small game were also abundant, and there was not a day but what we had fresh meat in the way of game. When it comes to hunting, there is no place like that section; at least, not that we have found."

WILD TURKEYS LIBERATED.

To-day is to go down in the annals of the sportsman's journal as one of the most eventful this State has ever witnessed, states the San Bernardino Sun of June 30th, for with the rising of the sun above the mountains fifteen wild turkeys will be liberated in one of the most promising places high among the gorges of the Santa Ana canyon.

Yesterday Senator H. M. Willis arranged to take the bronze and white birds, brought recently from the wilds of Mexico by Commissioner Van Slyke, to the mountains and set them free. For some time data has been collected with reference to the best places to liberate the birds, and taking all information received, the most promising seems to be the point selected in the Santa Ana canyon.

The vicinity abounds in wild oats, berries and other feed, which the birds will take to, and there is a continual stream of pure water, besides which the undergrowth is such as will offer the birds protected resting places, where they can mount high above the prowling coyote, fox or other natural enemy.

This will be the first consignment of wild turkeys ever set free in the State of California. All the birds are in excellent condition, and the prospects are that they will at once take to the mountains, and that within a few weeks reports of brooding turkeys will be received here. There seems to be no reason to believe but that the birds will propagate rapidly.

Besides this consignment of white and bronze birds there are a large number of black turkeys, and these will be liberated when sufficiently large to be capable of caring for themselves among the mountains. The turkeys have been laying, and there are now a half a dozen eggs which will be set.

Senator Willis will be accompanied on this eventful journey by County Game Warden James A. Vale.

Hereafter huntsmen must bear in mind the law that guards these birds and makes it a serious offense for one to destroy them. It is proposed to vigorously enforce this law, and the man caught with either a wild turkey or Hungarian grouse in his possession will about wish that he had never been born.

In line with the policy to restock the mountains and streams with game and fish comes a letter to Fish Commissioner James H. Boyd, from the State Board of Fish Commissioners, notifying him to look for 160,000 trout this season for distribution among the mountain streams of the county, almost twice as many as have heretofore been assigned to this section. The fish will be received sometime during the coming month.

BRITISH COLUMBIA SPORTSMENS' CLUB.

Fifty business and professional men of Cranbrook, B. C., north of Spokane, organized the Cranbrook Fish and Game Protective Association at a recent meeting, with these executive officers: Archie Leitch, president; V. Hyde Baker and J. F. M. Pinkham, vice-presidents; Dr. F. W. Green, G. A. Wilson, F. A. Dunne, James Bates, F. E. Brian, Harry W. Drew, T. T. McVittie, Nels Hanson and William French, the executive committee, and C. M. Edwards, secretary and treasurer. The object is to co-operate with a similar organization established in Fernie five years ago to protect the game and fish of East Kootenai, which are being rapidly exterminated, owing to the apathy and indifference of the provincial and dominion governments.

Harry Herchmer, LL. B., president of the Fernie association, declared in his address at the organization meeting that the first duty of the combined organization was to bring pressure to bear on the provincial representatives and on the government to compel its recognition of the importance of preserving the game, big and little, and the fish of East Kootenai from the destruction with which it is threatened. They have the Indians from Alberta and the native Kootenai tribe to contend with, in what often proved a wholesale slaughter of big game; while around Fernie it has grown positively dangerous to go abroad, owing to the promiscuous shooting by every Italian, Slav and Jap who can lay hands on a firearm. These men destroyed everything, even the squirrels, chipmunks and insectiverous song birds.

Mr. Herchmer pointed out that this indiscriminate slaughter could be controlled by imposing a license to cost $2.50 a year, and this would bring a revenue of $8,000 a year, to be applied for more thorough protection. Bears, he said, should be put on the protected list, and neither trapped nor shot out of season. The district was the habitat of every variety of big game in the North American continent, except the caribou, which was confined to the Selkirk range, west of the Rockies. Thousands of dollars a year is spent in the district by sportsmen and naturalists in hunting trips. If the government does not at once interfere there will be soon left nothing for the Indians, the prospectors, the inhabitants, or those coming from a distance for the sake of the hunting and the scenery.

Secretary Edwards suggested that the British Columbia government be at once memorialized by the association to declare the electoral districts of Cranbrook and Columbia protected areas for five years under the game protection act. This stretch of country, together with the Fernie district, would include the region bounded on the east by the boundary between Alberta and British Columbia, on the north by the Vermillion, on the west by the Kootenai and on the south by the Elk rivers. Within its borders are found the big horn, mountain goat, grizzly,black and brown bear, blacktailed and whitetailed deer, elk, moose, beaver and every variety of winged game, to say nothing of the rainbow trout, the pluckiest fish that swims, which is plentiful in every strong creek. Five years more without rigid protection will see the last of the big game.

A memorial embodying Mr. Edwards' suggestions has been forwarded to the government.

THE GAME LAWS OF THE STATE.

C. A. Vogelsang, Chief Deputy Fish Commissioner for the State, has compiled the following data in connection with the game laws of the State:

Hunters' licenses are now required and they are to be obtained from the respective county clerks or the Fish Commission or their deputies. Licenses cost for:

Citizens of California, $1 per year.

Non-resident citizens of the United States, $10 per year.

Non-citizens (aliens), $25 per year.

Open seasons—Ducks, October 1st to February 15th doves, July 15th to October 15th; valley quail, ibis, curlew, plover, rabbits, rail and all shore birds, October 15th to February 15th; snipe (Wilson or English), October 15th to April 1st; trout, May 1st to November 15th; steelhead trout, May 1st to September 17th and October 23rd to January 31st; salmon, close season October 23rd to September 17th; lobster and crawfish, September 15th to February 15th; black bass, June 1st to January 1st; crab, November 1st to September 1st; clam, September 1st to May 1st; deer, September 1st to October 1st; tree squirrel, no open season.

What is always unlawful—To buy, sell, offer for sale, barter or trade, at any time, any quail, dove, pheasant, grouse, sage hen, snipe, ibis, plover, rail, or any deer meat or deer skins.

To have in possession doe or fawn skins.

To take or kill, at any time, does, fawns, elk, antelope, or mountain sheep.

To take or kill any pheasant, grouse, sage hen, swan or imported quail.

To run deer with dogs at any time, except to follow a wounded deer in open season.

To shoot half hour before sunrise, or half hour after sunset.

To trap or hold protected game or birds of any kind without having first procured written authority from the Board of Fish Commissioners.

To take, possess, or destroy nests or eggs of any birds.

To ship game or fish in concealed packages, or without your name and address

To buy or sell trout less than one pound in weight.

To take or have in possession at any time golden trout, Sacramento perch, sturgeon or female crabs.

To take red or green abalones less than 15 inches, or black abalones less than 12 inches in circumference.

To take any abalones with diving paraphernalia of any kind.

To take trout, black bass or steelhead, except with hook and line.

To take salmon, shad, or striped bass with a net less than 7½ inch mesh, or to use a set-net.

To fish with a boat and net without a license.

To fish for salmon, shad or striped bass with nets Saturday or Sunday.

To take fish, in any manner, within 50 feet of a fishway.

To take, buy, sell or have in possession striped bass less than 3 pounds in weight.

To take or kill meadow larks, robins, or any other non-game birds except bluejays, English sparrows, sharp-shinned hawk, Cooper's hawk, duck hawk, great horned owl, or California linnet.

To shoot on enclosed or cultivated land without permission.

To export dried shrimp or shrimp shells.

Bag Limit—Deer—Two (males) in one season. Ducks—Thirty-five in one day. Doves, valley and mountain quail, ibis, curlew, plover, partridge and rail—25 in one day. Trout—To have no more than twenty-five pounds or more than fifty fish in one day.

George Saubert, William Myers, Edwin Baker and Carl Lothrop of Spokane, while on a fishing trip below Spokane Bridge in northern Idaho, found a thin net, forming a veritable death trap, in a mountain stream near Mica peak. The case has been reported to the authorities of Idaho and arrests are likely to follow. Mr. Saubert said in speaking of the incident:

"There is a dam from which is a hundred-foot run of the water, and it was below this the net was stretched. The screen is about the size of a sand-sifting net, and there is no chance in the world of the fish getting through. When those guilty of this outrage want fish all they have to do is to close the dam gate, and, when the water has run out, the fish are there and helpless."

FAMOUS FISHING OF SANTA BARBARA CHANNEL.

Gifford Pinchot, head of the Forestry Bureau, Secretary of the Interior Garfield, and a party of friends, including many high officials at Washington, will be in Southern California this month, for a deep sea fishing trip.

They have chosen as their field of operations the island of Catalina, where there are tourists after every tuna and the sea bass are half blind by looking at the sun through glass bottomed boats full of school teachers on a vacation.

Within sight of Santa Barbara lie the Santa Cruz Islands, where fishing authorities of the world say there is the best fishing on the Pacific coast. The waters of these islands are alive with fish, including the much coveted tuna. The shores of the islands are indented with beautiful bays and coves. The trees and plants that grow on them have attracted scientists from all over the world. They constitute the greatest seal hunting grounds in America.

Between Santa Barbara and the islands is a channel that has been declared by marine authorities one of the finest stretches of salt water in the seven seas. Its waters are stocked with yellow tail, barracuda, bonita and sea bass that know not the glass bottomed boat nor the screech of the tourist. Within hailing distance of the Potter hotel is the best deep sea fishing in the world.

Gifford Pinchot is known as a first class sportsman of the Roosevelt school. This school prefers to leave the beaten track and go into new fields.

Mr. Pinchot is expected at Santa Barbara by officials of the Santa Barbara National Forest, during his stay in Southern California. He is the head of this department, and will combine business with pleasure. It is not likely that Secretary Garfield and others of the party will accompany him here.

If Santa Barbara sportsmen and the Chamber of Commerce can accomplish anything Mr. Pinchot will come here as the guest of the city and get some real deep sea fishing in this channel.

Herbert Earlscliffe of Montecito, one of the "big five" of the Tuna Club, a fisherman who has caught big fish in every corner of the globe, is now at Catalina. Before he left Mr. Earlscliffe said he would be glad to see Mr. Pinchot and tender him an urgent invitation on behalf of the Chamber of Commerce and the sportsmen of Santa Barbara, to come to Santa Barbara and try bis luck.

The matter will be taken up at a meeting of the board of directors of the Chamber of Commerce, and that body doubtless will authorize Mr. Earlscliffe to invite Mr. Pinchot in its name.

The visit of Gifford Pinchot and his party would give impetus to a movement for organizing a deep sea fishing club, that is now well under way in Santa Barbara. It would attract general attention to the channel islands as the premier fisbing grounds of the coast.

This is what Mr. Earlscliffe says of it:

"I have fished pretty much all over the world, and have enjoyed some fine sport at Catalina, in the Mediterranean, and a dozen other well known fishing grounds. But I never got finer sport than right here in the Santa Barbara channel and in the waters of the Santa Cruz Islands. The fishing here is far superior to that at Catalina.

"All we need is a fishing club, with means for weighing the catches, with the co-operation of boatmen, and an adequate supply of tackle, to bring Santa Barbara channel ultimately into prominence as a fishing ground.

"A meeting of sportsmen and boat owners called for the purpose of forming such a club, would be sure to bring results. We have several men here who are members of fishing clubs in Catalina, and for a long time they have wanted to see a similar organization here."

Mr. Earlscliffe said that on his return from Catalina, where he will attend the annual tournament of the Tuna Club, he would do all in his power to help with the organization of a deep sea fishing club in Santa Barbara. He said he would be glad to convey an invitation from the Chamber of Commerce to Gifford Pinchot and his party, and declared that the visit of these men would go a long way toward arousing interest in deep sea fishing here.

All the boatmen and launch owners can be counted upon to boost for the proposed club. In addition it will be necessary to get the co-operation of a number of disinterested sportsmen, so that the new organization shall be primarily of a sporting character.

Santa Barbara's neglect of her opportunities for sport on the sea is notorious. Mountain trails and saddle horses have been worked to death while the "mosquito fleet" in the bay grows no larger, and efforts to arouse interest in yachting have resulted in a half dozen cat boats and punts. According to Captain George Gourley, 90 per cent of the fishing is done by people from out of town.

"To the people from the interior who have made Southern California what it is the sea is the one great attraction," said he. "They can come to Santa Barbara and sit on the sand and listen to the sea waves which is very pleasant for old people and invalids. But there are a few people here who like to feel a dash of salt spray and the tug of a big fish, and if these people are ever going to get busy, this is the time."

Drink Jackson's Napa Soda.

SALT WATER ANGLING RESORTS.

The salt water fishing in San Francisco bay waters and at the ocean shore resorts reached from this city is taken advantage of by comparatively few anglers who in the main use tackle of the crudest, hand lines or bulky cane poles usually.

The possibilities of sport with the denizens of salt water are an appreciated factor with Southern California sportsmen who, by the way, do their fishing with up-to-date tackle, and find the ocean and shore angling second only to the delights of the trout stream.

When the fishermen of San Francisco and vicinity thoroughly exploit the matter then can they possibly find in the daily papers a directory such as we give below taken from the Los Angeles Examiner and which is warrant for any one who ever went afishing to feel the trill of anticipation. The variety here listed is not to be found in our more northern waters, but at that, there is enough of different kinds to give planty of sport with the right kind of tackle:

Where to Fish—Tide will be high at 9:51 a. m. tomorrow, Sunday, and low at 2:26 p. m., with a fall of about two feet only. This will make a sluggish current in the bays, and a light surf on the coast, not particularly favorable to good fishing.

Outside—Bass, barracuda, yellow-tail, skipjack, bonita, albicore.

Port Los Angeles—Bass, mackerel, pompano, halibut, perch, herring.

San Pedro Breakwater—Bass, sheepshead, whitefish.

Santa Monica—Corbina, yellowfin, halibut, mackerel, herring, perch.

Ocean Park—Yellowfin, bass, corbina, mackerel, herring, pompano, sea trout.

Venice—Pompano, yellowfin, mackerel, corbina, herring.

Playa Del Rey—Pompano, yellowfin, bass, corbina, mackerel, herring, sea trout, halibut.

Manhattan—Corbina, surf perch, yellowfin, sea trout.

Hermosa—Corbina, yellowfin, sea trout, surf perch.

Redondo—Yellowtail, bass, mackerel, corbina, yellowfin, herring, halibut.

San Pedro—Croaker, china croaker, bass, yellowfin, halibut, kingfish.

Bay City—Halibut, bass, sea trout, corbina, yellowfin.

Sunset Beach—Corbina, yellowfin.

Huntington Beach—Sea trout, corbina, yellowfin, kingfish.

Newport—Bass, halibut, mackerel, yellowfin, corbina.

Balboa—Surf perch, croaker, bass, halibut, corbina, yellowfin.

Although ordinarily the salmon have long before this time of the year commenced their run up the Tuolumne river, there are none coming up, according to the fishermen who have been making daily trips to the river, and the suggestion given in the following article from the Merced Sun is one which should be acted upon.

That the failure of salmon to run up the Merced river this season is due to nets that are being used in the San Joaquin river to stop the progress of the fish is the opinion of Warren Gibbons, who was engaged by District Attorney Shaffer to make an investigation of the Merced river, and who has just returned from his quest.

Gibbons made the entire trip down the river in this county in a boat to the point where the river empties into the San Joaquin, and despite the fact that he used a drag over the entire route he was unable to find anything that could possibly stop the fish had they once entered the stream.

Fishermen along the Merced river, who have lived there for years and who have been much surprised this season at the failure of the salmon to appear at their usual time, informed Gibbons that they had seen but very few fish in the river, while in other years at this time they were a common sight as they made their way to their spawning grounds. Those fishermen were certain that the fault lay in the San Joaquin river, and in proof of their contentions they stated that salmon on their way from the sea always selected the clearest streams and left the muddy San Joaquin as soon as possible. The Merced river is a particularly clear stream, and for this reason always in the past has had a strong run of salmon, but this year it is evident that the salmon are being stopped before they reach the mouth of the Merced.

Under the circumstances the matter will have to be dropped by the district attorney and passed up to the State Fish and Game Commission. The latter, however, have been very lax in the past in their attention to conditions in the San Joaquin, and unless the matter is forcibly put up to them and an investigation demanded it seems that there will be no salmon in the Merced river this year.

Eugene Williams and Perry Shea, two Watsonville lads, were out on Corralitos creek recently and each of the lads brought back the limit of trout. They were nearly all of fair size, too, running from five to seven inches in length, with the majority in favor of seven.

Striped bass anglers who have recently fished San Antone slough in Marin county have had only occasional luck, a few small fish have been caught.

AT THE TRAPS.

The blue rock contests in connection with the Olympic Games were held at Uxendon Shooting School Club grounds July 8th, 9th, 10th and 11th, near London, Eng. The nations competing were represented hy shooters from Belgium, Canada, England, Finland, France, Greece, Holland, Sweden and the United States. In addition to the main shooting ground, there were facilities for shooting on other parts of the ground, including the tower from which targets are trapped from a high elevation and taken overhead as they coue by.

At the San Luis Boat and Gun Club blue rock shoot Sunday, June 27th tbere were five events and some interesting scores made. In the first event of 10 blue rocks C. T. Grenfield broke straight, while James Guthrie got 9. The cluh event at 20 blue rocks gave A. B. Van Scoy and E. Taylor 17 each, while in the third event E. Taylor tied with A. H. Martin, each getting 17 blue rocks. In the fourth event, 20 hlue rocks, C. T. Greenfield scored highest, he getting 18. In the fifth event at 5 blue rocks a straight was shot by A. H. Martin, and Thomas Rhodes broke the local record by breaking 9 hlue rocks out of 5 double rises.

The score in detail was as follows at 10, 20, 20, 20 and 5 targets respectively: Greenfield 10, 16, 13, 18 —; Keller, 6, 14, 12, 12, 12, 3; Hill 5, 15, 14, 14, 4; Guthrie, 6, 10, 10, 10, 4; Martin, 9, 16, 13, 16, 5; Van Scoy, 6, 17, 10, 14, —; Taylor, 8, 17, 17, 16, —; T. Rhodes, 7, 14, 16, 16, —; J. Rhodes —, —, —, -3, —; Martin, —, 17, 17, —, —; Varney —, —, 14, 13, 4.

The next shoot will be held July 12th.

The Santa Rosa Gun Club held the final shoot for the season at the traps at Laddy Station Sunday, June 27th. A large crowd was out, which included a great many visitors from other clubs. From 9:30 in the moruing until after 2 in the afternoon, there was a continual cracking of guns and some good scores were made. The winners for the day were: W. H. Young, club cup, third time, which entitled him to keep it; Captain Edmunds, challenge cup, third time; Fred Meade, Du Pont trophy, third time It took a number of contests to decide these events. Beatty won the double bird event for the day.

The last blue rock shoot which will be given by the Owl Club of Modesto, this season was pulled off June 27th, and was well attended. The principal feature of interest was the race for the Du Pont trophy, and which, after a close contest, was won by Fred H. Chase, Chase made the phenomenal average for the entire series of 200 birds, of 94 per cent. Out of 200 blue rocks trapped during the race he broke 188. Henry Garrison was a close second with 187 out of 200. Other close contestants were C. R. Weeks, with 173; D. C. Davidson, with 171; V. B. Dale 157, and D. C. Wood, 143.

The regular weekly shoot of the Multnomah Rod and Gun Club of Portland, Ore., which was held at St. John, June 28th, was marked hy the participation of a large number of trapshooters who had not been out for some time. The meet was highly successful and the two new cups offered were captured hy Stoddard and Cullison. Stoddard also won the Du Pont trophy. W. W. Caldwell captured the Inman medal by breaking 49 out of 50, during which he broke 41 in a row. Cullison took second place in this event by breaking 48 out of 50.

The new trophy cup, which was won for the first time by Jack Cullison, is offered in open competition and Sunday's victor carried off the prize by breaking 73 out of the 75 targets shot at. Caldwell was second in this event.

The two new cups and the Du Pont trophy are to remain in competition until some shooters shall win them twice consecutively, when they shall become the permanent property of the successful gunner.

A great deal of interest has been aroused in the Multnomah Rod and Gun Cluh by reason of the challenge to a team shoot issued by the Rose City Gun Club, and next Sunday morning at the Fulton grounds, a team of marksmen from the Multnomah organization will be deligated to shoot against the representatives of the new club.

The scores of Sunday's shoot are as follows:

Cullison shot at 75 broke 73; Caldwell 75-72; Collier 100-96, Wagner 75-68, Stoddard 75-67, Howe 75-67, R. Shangle 75-72, Abraham 75-72, Hudson 75-60, Geiser 50-40, F. Shangle 50-39, Carlon 75-58, Thornton 75-56, Sternberg 100-70, Montgomery 75-50, Mrs. Young 50-30, L. Home 75-43, L. Young 75-36.

The Everett, Washington, Gun Club shoot for June 27th shows the following scores:

Event No. 1, 10 targets: Hulbert 6, Sumner 8, A. J. Agnew 3, Brooks 9, Olwell 4, Ted Agnew 5, Hulbert 4, Crosby 7.

Event No. 2, 15 targets: Wm. Hulbert 10, Sumner 10, A. J. Agnew 6, Brooks 8, Olwell 10, Ted Agnew 4, G. Hulbert 5, Crosby 13.

Event No. 3, 25 targets: Wm. Hulbert 20, F. Sumner 19, A. J. Agnew 13, Brooks 16, Olwell 17, Ted Agnew 18, G. Hulbert 11, Crosby 21, Westland 13.

The Hawaiian Gun Club's unknown angles shoot took place at the Kakaako traps near Honolulu on Wednesday afternoon, June 16th, and resulted in a win for I. W. Harvey with 9 out of 10. Harry Whitney and Irwin Spalding tied with 8 out of 10. In the shoot-off Spalding won, making 4 out of 5, against Whitney's 3 out of 5.

Howard Martin and Gray Howard tied at 18 out of 20 June 28th at the San Pedro Gun Cluh shoot. On the shoot-off Martin won. Next Wednesday the two new traps will be added, making five first-class shooting stands. One of these has been donated hy Bert Mackley, and one by Charles Gregory, for which the club wishes to publicly express it thanks.

The revolver shots of the California Rifles of Southern California have been organized into a company.

DOINGS IN DOGDOM.

A Portland subscriber sends us the following field trial notes:

Oregon's first field trial meet will be held September 24th and 25th, and already a dozen of the best-known dog fanciers of the Pacific Coast have entered Setters and Pointers for the trials, which will be held somewhere in Linn County, the home of the China pheasant. Portland will be well represented too, and most of the 30 members of the newly organized Oregon Field Trial Cluh will have one or two entries.

The dog fanciers of this city have been invited to attend a special meeting of the club Saturday night to talk over final arrangements for the trials and to discuss dog topics in general. It was expected to have E. S. Munger, an experienced trainer from Clyde, O., at the meeting hut the storms in the Middle West have delayed him so he will not get here. He is coming for the trials, however, and will open training quarters for hunting dogs near Harrisburg for 20 days before the meet. He expects to locate here permanently.

The interest awakened in fine hunting dogs here is producing results already. Until this spring, Portland had few first class Setters and Pointers from the practical standpoint. It had plenty of well-hred dogs and trail hunters, but it was lacking in dogs trained to follow birds by body scent. Several new ones have been shipped in, notable among which is E. I. Wheeler's Silver Lining. She is a finely bred animal.

D. W. Alton, of North Yakima, has hought a new Setter and shipped it all the way from Alabama. The dog came last week and is named Sport Danstone.

Among the non-resident sportsmen who have entered dogs and will be here for the trials are: D. C. MacDonnell, H. H. Abbott, N. F. Lyne and H. S. Rolston, all of Vancouver, B. C.; D. W. Alton, North Yakima; E. H. Cox, of Madera, Cal., vice-president Booth-Kelly Lumber Company, San Francisco; Judge C. N. Post and J. E. Terry, Sacramento; W. B. Coutts, Kenwood, Cal.; J. E. Lucas, Rosedale, Cal.; John Schumaker, Los Angeles, and H. W. Keller, Santa Monica, Cal.

J. A. Balmer of Cle-Elum, Wash., will judge the trials. There will be two contests, the Derby for puppies, and the all-age stake. There will be no members' stake, because of the lack of classy dogs here. The Oregon trials are the first in the Northwest this year. They will be followed by the Pacific Northwest at La Conner, Wash., and the British Columbia.

A rule of the club provides that: A dog cannot be withdrawn from a stake at any time after the fee to start has been paid, without the consent of the judge, and any owner or handler withdrawing a dog or dogs without the consent of the judge shall be debarred from any future trials held hy the club, or be penalized at the discretion of the club, and forfeit all their interest to the stakes.

Pasadena had something like 105 dogs, 150 entries (including teams and braces)—there was also about the same comparative number of absentees as at Santa Cruz. Three day shows with about one-third of the dogs absent, will soon, if continued, create a lack of enthusiasm that will knock the bottom out of the show promoters' boom (for personal interests only). During the show the hot weather made the benched dogs suffer intensely it is reported.

Game Warden Welch of Santa Cruz County, took last week from the Brookdale hatchery 30,000 trout fry, which he will place in the Brown's Valley and Corralitos creeks, to restock these streams, which have been for some time almost clear of fish.

Speaking of the deer season, which opens September 1st, Mr. Welch said: "From all appearances this season will be the best that we have had in ten years. The deer are plentiful. The hunters will have no cause to complain the coming season. They will find game to their heart's contest." It is his intention to stock the Sill ranch with Chinese pheasants and "Bob Whites" in the near future.

So far the Fish Commission has brought from Europe 500 pairs of Hungarian partridges, which have been distributed in fifteen different counties of this State. Reports received from seven of these counties show that the hirds have paired and nested and have adapted themselves readily to their new environment. The Commission has contracted for 500 pairs more of these birds to be delivered this fall.

Drink Jackson's Napa Soda.

Du Pont Smokeless.—At Sulphur, Okla., on May 14 and 15, Mr. J. S. May, of Midland, Texas, won high amateur and high general average with the best score ever made by an amateur in a two-days' tournament in open competition. His record was 396 out of 400, an average of exactly 99 per cent. Mr. May made runs of 139 and 158 straight. In making the above wonderful record Mr. Day used both Du Pont smokeless and "New E. C. (Improved)."

Recently one of the representatives of the E. I. Du Pone de Nemours Powder Company, when checking up magazine stock at Memphis, Tenn., discovered a case of shotgun shells which had been in storage at that point for the past twelve years.

As a matter of interest to the company they had the shells sent to tbe ballistic engineer for test, and the results prove that when they advertise "Excellent keeping qualities," they are well within the limit. The load in question was: 36½ grains of Du Pont Smokeless in a U. M. C. 2 5-8 "Smokeless shell, with 1¼ oz. of 7½ chilled shot. The test resulted as follows:

Pressure pounds per square inch, average 8578; velocity ft. secs. at 60 feet, average 864; pattern average 251.

Our ballistic engineer supplements bis report with the statement: "I tried some of these cartridges at the trap and they are as good a load as any one would wish."

Can you ask for a better talking point?

A Winchester Landslide—At the Sacramento tournament shooters of Red "W" products cleaned up everything in sight. Out of the thirty-eight shooters that took part in this tournament on the opening day, thirty-three used "Leader's." Of the forty-six that faced the traps on the second day, forty shot these well known shells. The longest straight run of the tournament was made by Mr. F. M. Newbert, shooting a Winchester shotgun and "Leader's", and was 79 straight. The first and second high amateur averages were won by Mr. F. F. Merrill and Mr. F. M Newbert, respectively. Mr. Merrill's score being 322 x 360, while Mr. Newbert finished with 321 x 360. Forty-eight per cent of the shooters participating used the Winchester repeating shotguns. The Individual Championship Trophy 20 targets per man, was tied for between C. J. Haas, E. Holling, J. W. Giblin and A. J. Webb on 19. In the shoot-off Mr. Wehb won. Messrs. Holling, Giblin and Wehb, always shoot "Leader's". The Three Man Team Trophy was captured by Messrs. Feuduer, Holling and Webb, the latter two gentlemen using "Leader" shells. Of the fifty-four Merchandise prizes sbot for, forty-nine were won by shooters using "Leader" shells and twenty-one sbot Winchester "pump" guns. During the two days tbere were sixteen perfect scores of twenty made, and of these thirteen were made by shooters using "Leader" shells, nine being made by shooters that used Winchester "pump" guns in connection with the above named shells.

Peters Points—Mr. L. H. Fitzsimmons tied for first professional average at Racine, Wis., June 7th, scoring 132 out of 150 with Peters shells.

At the Nebraska State Shoot held at Lincoln, May 26th-28th, Peters shells made a very unique record. There were 17 men who shot through the entire tournament using this ammunition, their total score being 9409 out of 10,200, an average of 92.3 per cent. Their scores following, it will be noted that the first ten of these men averaged 94.2 per cent:

John Sack 577, George Bouliver 574, Charles Holsworth 572, Will Veach 570, C. D. Linderman 565, G. A. Olson 562, A. Miller 560, B. F. Veach 560, A. H. Hardy 559, R. Klein 554, J. Bowers, 552, H. O. Harney 547, H. Hoffman 540, F. Copsey 536, W. Wiseman 535, Tom McCawley 531, A. A. Taylor 515—Total 9409—92.3 per cent.

At Charleston, W. Va., June 13th, Mr. O. J. Holladay was high gun with 97 out of 100, and a run fo 67 straight, using Peters factory loaded shells. Mr. Bertram Sentz was a close second with 95 out of 100, also with Peters shells.

At Hudson, S. D., June 12th, high amateur and bigh general averages were won by Mr. F. F. Slocum, of Alcester, S. D., who scored 145 out of 150 with Peters factory loaded shells. Mr. G. A. Olson, also shooting Peters, was high professional with 140 out of 150.

Mr. H. D. Freeman won high professional and high general averages the second day of the Dyersburg tournament, June 12th, scoring 192 out of 200 with Peters factory loaded shells. Mr. Guy Ward being second with 191, also using Peters ammunition.

At the Wisconsin State Shoot at Milwaukee, June 13th and 14th, Mr. J. M. Hughes tied for high average on the first day with 173 out of 180, and was second high for the entire tournament with 313 out of 330, all shooting Peters Ideal shells.

The demand for hunting licenses at the Oakland county clerk's office has fallen off by about 75 per cent from the last year, according to figures compiled June 25th. To date 215 renewals have been granted, while last year at this time more than 1,000 licenses had been issued. All licenses granted last year expire July 1st.

A nine pound striped hass was caught by Arthur Kavanagh of Lido two weeks ago above the dam in the Mokelunine river at Woodbridge.

Nevada City sportsmen have recently found wild pigeons plentiful in the vicinity of Lake City.

STATUS OF THE RUNNING HORSE.

(C. B. Whitford in Chicago Horseman.)

The present and future of the running horse in America is a matter about which thoughtful horsemen are much concerned, more especially those who have a fortune invested in breeding farms or racing stables. These owners and breeders are hopeful, although they do not lose an opportunity to sell one of their good horses for a poor price, and stand ready to consider a fair offer for their fine farms. In the near future the owners fancy there will be a reaction and a reinstating of the running horse into popular favor. This is more of a forlorn hope than a shrewd guess. It depends upon the point of view. Those who have no pecuniary interest in the ruuning horse, either as breeders, racing men or race promoters, see a different light. To them it looks as if the running horse has had his best days in America.

No class of men have occasion to be more grateful for the thoroughbred than the breeders and owners of trotting horses. Before the trotter was created the thoroughbred held a monopoly of speed characteristics. He represented more real horse to the inch or opund than any other horse living. For a long period of time he had been raced and whittled away and refined until all the spare substance was gone, the rought spots hred out of existence. He stood forth the pride of English horsemen who were responsible for his being, and in every part of the civilized world he was given a welcome. We of America took kindly to the thoroughbred when our country was in its swaddling clothes. We liked him better in our more mature life. When we became richer than the old Roman spendthrifts, we hrought to our shores the hest of the thoroughbreds England could produce. We had a genuine respect for this highly bred good horse, and we had the means with which to buy the best of his kind which could he coaxed upon the market. Fiually, we were able to breed as good thoroughbbreds in this country as they were in the home of the thoroughbred and we were proud of the fact.

We liked the thoroughbred, not alone because of the sport he furnished on tbe race course, but more particularly because he was a splendid expression of horse breeding. Indeed we recognized in this thoroughhred a horse which was the very refinement—the essence of the best of the horse species. For this reason he had a great hreeding value, as no matter on what sort of horse he was crossed he gave of his refinement. He was bred and raced under the proper plea that he was a distinct benefit to the horse breeding industry. He was a splendidly adjusted piece of machinery, with a halance and harmony of parts not to be found in any other horse. He was useful in refining and otherwise improving our common stock of horses. And fiually he was useful in laying the foundation upon which our splendid trotting horse structure has been reared.

For this much the breeders and owuers of trotting horses owe the thoroughbred a debt of gratitude.

In laying this trotting horse base the blood of the thoroughbred was necessary and it was used freely. Even after the trotting horse began to have some individuality to boast of, breeders continued to infuse the blood of the thoroughbred into the new horse group. Sometimes with success, often with disaster. At all events we laid the foundation of our trotting horse breed deep in the hlood of the thoroughbred, and finally came to the point in our breeding venture where we no longer needed the thoroughbred blood.

To be perfectly fair, the running horse may be said to have a little more refinment of breeding than the trotting horse has. He has been hred to his peculiar work much longer than the trotter has heen bred to his. But the difference is not so great as it is often held to he. When qualities become well fixed in a breed group, the matter of a few years, or even a century does not add greatly to the breed's value. The trotting horse has been bred for more than half a century in special lines, and while he has not got quite the refinement of breeding the thoroughbred has, he is nevertheless so well hred to his specialty that he transmits his breed qualities with a reasonable degree of certainty. He will he hetter as a breed specimen fifty years hence, hut for the present he is at last far beyond the need of more thoroughbred hlood, and is more suitable for use on other classes of horses than the thoroughbred.

While the thoroughbred—those of good bone and substance—may be relied upon to refine any other horse group, they may also be depended upon to hand down many characteristics desirahle enough for the running course, which would he found undesirable in a horse put to other uses. These undesirable characteristics have been bred out of the trotting horse, and in their stead useful characteristics have been fixed. The trotting horse is more docile than tbe runner, not to say more intelligent. His action is of a kind useful to any horse but the runner. In fact, the trotting horse has more utility qualities fixed in him hy breeding than any other horse used, either for speed or the saddle. Although he has never been given credit for his ability to sire splendid service saddle horses, it is nevertheless a fact that some of the most enduring of saddle horses owe their quality largely to their trotting horse inheritance.

Thanks to the original thoroughbred blood, we have a better horse in the modern trotter, and because we need no more of him to improve or help maintain our good breed, the thoroughbred has lost one of his greatest opportunities to serve us. We may not despise him because we have no further use for him. We may even have regrets that such an old breed, and such a good breed, has lost so important a part of his usefulness. Still the cold fact remains: we have used him with great success and have cast him aside.

Who needs him now as a breed founder!

No one. A better horse has been created from his blood to take his place as a hasis on which to rest new breeds.

There is no group of horses that may be used for fast work which cannot be better improved by the use of trotting horse blood than by the use of thoroughbred blood. All that is desirable in the running horse will be found in the trotter. All that is undesirable in tbe running horse has been bred out of the trotter. Conformation, strength, speed, are all the trotting horses inheritances, and along with it comes a docility and temperament not bred in the thoroughbred. And these trotting horse characteristics are transmitted with about the same degree of certainty as the running horse hands down his special qualities.

As to the comparative value of the trotting and running horse virtues there is little room for discussion. The runner goes faster at his peculiar gait, but it is doubtful if he uses up as much energy to the minute as the trotting horse. He goes faster because he goes at a gait which does not require the action or consumption of energy that is needed by the trotting horse for his style of going. The perfection of the speed and actiou producing machinery in the trotting horse is no doubt equal, if not superior to that of the thoroughbred. At any rate there is not enough difference to make any fuss about.

As to the choice betweeu getting this speed, action and endurance from the thoroughbred or trotter there is no question but what the trotter is the hest source. He stands to-day in the same relation to other horse groups that the thoroughbred stood fifty years ago. He has pushed the thoroughbred out of his old place, and as before noted, tbe ruuning horse no longer has a right to exist as a breed founder or improver of other horse groups. All manner of driving and riding horses may be better improved by the modern trotting horse than by the thoroughbred.

If this is true what is the status of the thoroughbred to-day, and what of his future?

He may exist for many years as a racing tool, pure and simple, provided tbe racing interests can find a way to race thoroughbreds without briuging down upon their heads the public wrath. Racing on the business lines which has marked the conduct of running meetings in recent years is not likely to be revived in our day and generation. It may be conducted as a sport by sportsmen, with public approval. But the commercial "sports" who have brought running meetings into disrepute will not in their lifetime see a similar class at the head of the racing industry in this country.

Running races might be made popular in this country if they were conducted on similar lines to what they are carried on in England. There short meetings are the rule. This condition has been undisturbed for more than a century, and for all we can see at this time the running race will he a popular form of sport in England for centuries to come. If we can be content to follow in the footsteps of the English turfmen, the thoroughbred may have some of his old time importance as a racing tool. In ante bellum days the thoroughbred had a secure place as a race horse. In Baltimore, in New Orleans, in Kentucky, Tennessee and other southern sections the thoroughbred was popular and turfmen were respected. After the war the southerners brought their horses north and taught us to like the running sport. So long as the meetings where they ran, were short, and the sport was in the hands of sportsmen, the sport thrived. But when racing the thoroughbred became a game, conducted by commercial spirits who were not sportsmen, that class of racing became unpopular, and finally has been prohibited, or made impractical everywhere.

We have seen the rise and fall oi the running horse and running horse races in a short generation. There may be a revival of these races some day, hut before that day comes there will have to he a regeneration of the running turf. Conducted as a sport by sportsmen it will find the public favor which it lost while being carried on as a mere commercial game by a gang of sports.

Until a regeneration of the running turf takes place, the thoroughhred horse will have little to do. Even if he should again become a popular racing idol, he will not regain his old place as an improver or founder of other breeds. That place will be occupied by the American trotting horse.

GOVERNMENT SCHOOL FOR CAVALRY HORSES.

A kindergarten school for army horses, a general training post for the cavalry service, is an experiment to he tried out by the United States Government. Herds of three-year-old horses, gathered from all parts of the land, unhroken to bridle, saddle or harness, are to he shipped to old Fort Reno, and given lessons in "what to do." This is the order of J. B. Aleshire, Quartermaster General of tbe United States Army.

Instead of a general military post, picturesque old Fort Reno is to be made a "remount station," a place where new mounts will be provided for cavalrymen. It is proposed to turn out more than one thousand head of horses and mules each year, ready for the military.

The cavalrymen who have heen stationed at the fort have gone to other posts, and just as soon as stables can be huilt the horse school will open. By July 1st the three-year-olds are expected to be on the reservation and the taming will begin. England and France have remount stations, but Uncle Sam has never attempted them before. If the one here proves a success it is prohable that all horses and mules in the United States will hereafter go through their course in school before graduating into regular army life.

"A horse usually lasts about seven years in the service," said Captain Letcher Hardeman, who is here arranging for tbe opening of 'school'." "A mule is good for ten years. The contractors who have furnished the army horses have been buying them between the ages of four and eight years. Our experiment will he with three-year-olds.

"There'll be no broncho busters here. We don't care for any man who would mount a three-year-old, sock a pair of rowels into its side and fight it until it's broken in spirit and broken in heart. That kind of breaking may do on the plains, but it won't do for the United States Army. A good cavalry horse must have a cavalryman's spirit. Nor will the cavalrymen themselves do the breaking. This work will be in the hands of civilians, under the supervision of army officers.

"The best trainers we can find will be employed. After the horses have been broken cavalrymen will teach them the game of war. No animal is to be roughly handled. Kind treatment goes a long way with a horse in cultivating a good disposition.

"We believe there is economy in a remount station. Not only will we get a better, more desirable lot of horses, but by taking them as three-year-olds we will get from one to five years' more service from them than when we took them four to eight years old. They may be bought cheaper, too.

"A rebellious, unwilling horse can almost disrupt a cavalry movement, and the sooner it has "I. C."—inspected, condemned—branded on its side the better off that troop of cavalry is."

Captain Hardeman says that not a great many horses are condemned for viciousness, but occasionally one entirely unfit for use is got rid of.

About 60 men will he employed at the Fort Reno station and they expect to break in 800 or 1000 head of horses and from 300 to 400 head of mules each year. The old barracks at Fort Reno have practically been abandoned for months. The fort is on a reservation over which bands of Cheyenne and Arapahoe Indians still rove, but they commit no depredations. The Darlington Agency is just a few miles distant, and "Lo" is careful that he does nothing which might prevent him from drawing his monthly pay. He remembers too, the Indian police, mounted on fast ponies, who feel the importance of their blue uniform and hrass buttons.

Captain Hardeman has just finished checking up the supplies which have been stored in the old fort, and has shipped them away to other depots. Only a few caretakers are now at the post, and their chief duty lies in wandering about the deserted barracks, waiting for the new stables to be built and the horses to come. Lively times are expected then.—New York Herald.

NEW FAIR ASSOCIATION AT SEATTLE.

J. W. Clise, president of the Washington Trust Company and owner of one of the finest stock farms in the Northwest, was elected president of the Western Washington Fair & Driving Association at a stockholders' meeting held iu Seattle, June 30th. Mr. Clise will be the directing spirit for the next year for the Seattle corporation organized for the purpose of holding an annual Western Washington fair and live stock exposition in the city of Seattle.

C. F. White, manager of the Grays Harbor Commercial Company, and D. E .Frederick, president of Frederick & Nelson, were elected vice-presidents; Herbert S. Upper, real estate man and capitalist, was made treasurer and Emmett C. Brown was elected secretary. The following directors were also elected:

J. W. Clise, C. F. White, D. E. Frederick, Herbert S. Upper, J. D. Farrell, vice-president and general manager of the Oregon and Washington Railroad Company; Dr. G. M. Horton and C. B. Yandell, secretary of the Seattle Chamber of Commerce. These directors will serve for the coming year.

The association, which is capitalized at $25,000, and numbers among its stockholders prominent business and professional men of Seattle, will at once construct a fairgrounds on East Madison street, near Lake Washingtou, where a forty-acre tract has been leased for a term of years from the McGilvra estate.

By the terms of the lease no gambling will be permitted and no liquor can be sold upon the grounds. It is the intention of tbe directors to give the people of Seattle and that section of the state a regular old-fashioned county fair that will become an annual institution with the social features and amusements that go to make great success of such fairs in the East.

The first annual fair will be held during the week of September 7 to 12 and every effort will be made to assemhle a comprehensive array of exhibits that will be a thorough exploitation of the agricultural, live stock, horticultural and other interests of the western part of the State of Washington.

A splendid program of harness racing has already been arranged, entries for six $1,000 stakes having closed May 25th. Additional purses will close August 10th.

THE FARM

PERSIAN SHEEP.

Colonel Charles Goodnight of Texas, founder of the famous ranch by that name, and owner of the largest herd of Persian lambs in America, says that within a few years it will be possible to excel Persia in the manufacture of fine cloaks from the pure-blood lamb skins. He owns nearly 200 head, many of which are full-bloods, and declares that among the 114 different varities of weeds grown in this country the Persian lamb eats 100 of them.

Secretary Rusk, under the first Cleveland administration, is responsible for the introduction of the new sheep, spoken of in the Bible, and so much admired by the patriarchs of Biblical times. Prior to this administration the Persian lamb and cloak industry belonged to a principality in Persia, and their importation to other countries was strictly prohibited by the ruling prince, who had a monopoly of fine cloaks made from the lambs. Secretary Rusk seeured six head and had them shipped to San Jose, Cal. From those a large and profitable industry has become possible.

Cloaks and caps made from the skins of these lambs are not only rare, bnt are very expensive; the eheaper grades ranging from $350 to $500. It is believed that even the more expensive eloaks costing from $1,500 to $2,000, can be produced in this country for less than one-half. In fact, Colonel Goodnight says the mixed breeds are capable of produeing a very high grade of fur, and can be raised for even less than the ordinary sheep in this country.

PREVENTING FENCE FLYING.

Here is a novel way for preventing fence flying: "Take good strong string, and tie a knot about three inches from the end; then take the end nearest the knot and pnt it around the tip end of the one wing, and tie a slip knot below the knot in the string, so it cannot pull up too tight on the wing. Then pass the other end of the string under the other wing, and have it just loose enough so that the chicken can keep its wings folded naturally, and tie same as other end. After it has been on about six weeks the string may be removed, and your chicken will stay in just as though it had never flown over a fence.

Sheep eat and thrive on weeds and material that other stock do not relish. Every fence corner, fence row and weed patch will be more completely cleaned by them than by the scythe or hoe. A hundred sheep could be kept on any western farm of eighty acres and one would scarcely miss the cost of their care and keeping. They return in fertilizers about ninety-five per cent of all they have eaten. There is an old Spanish proverb, "The sheep's foot is golden," originating doubtless from the fact that sheep enrich the soil. No expensive buildings are needed. Secure some good range ewes and a pure-bred ram of some breed and in a few years an excellent grade of sheep will result. We know a man over on the western slope who runs a little band of sheep on his home ranch and gives them very little attention yet they keep the pasture free from weeds and the returns from the lambs and the wool net a satisfactory profit.—Field and Farm.

LAW OF HEREDITY.

Now let me see if I can give you the law of heredity. Sometimes I have heard men talk about breeding and they say it is so unfathomable that you cannot understand it. There are many things that we cannot understand, but that is not saying but that there are some things that we can understand. You and I know that "two and two are four." Some men are measuring the distance to the sun and they also say that "two and two make four." There are some things that we understand and some things we ought to understand, and can understand and here is one thing we can understand and that is the law of the value of the full blood. I will illustrate it this way: Here is an animal right here that I want. He is a full blood. He has a dam, he has a sire and from those two, ancestors begin to multiply rapidly. Now as I stand by the animal selected I will give a brief definition of breeding as it is sometimes stated: Breeding, they say, is "like begetting like," now this sire suits me finely and t y say that he will heget like. No, not ays. That definition of breeding is b he truth and half a truth is as d a lie. The whole truth is that in breeding "like begets like or the likeness of some ancestor." That is where the trouble eomes in. Reversion comes in with all stock, and you ean now see why I lay so much stress on these things whieh are so essential to right breeding.

We cannot at this time expect to get everything, but I want to get from that sire pretty near what I find in him and added to that to be aided by those dams of great performanee and helped also by his sires that have been properly bred. I am willing now to take the law of breeding as I have given it; if he begets like himself it is all right and if he goes baek to his ancestors by reversion it is still all right. I have had men send me a paper pedigree and want to know what I thonght about the animal. A paper pedigree will only help a man to guess.

When you talk about using a grade bull you have to cut off one-half of that power and by reversion you are liable to go back to what you don't want and the danger is strong because the tendency on the part of the animal life and kind of life is to revert to the original type. The dairy animal is an artifieial eondition, nature will struggle to regain the original type. For natnre is zealous of strength and vitality. The God of all wisdom proposed to have life protected by vitality. We have made for ourselves the dairy animal by inereasing blood and changing the cirenlation of blood from vitality to milk giving. If we stop feeding, caring and breeding her carefully she will revert and so save vitality.

I know the value of full bloods bnt I want them of the right kind.—O. C. Gregg, before the Illinois State Dairy convention.

When a train load of cattle sold in Omaha the other day for $20,000 or exactly $8 per cwt. for every steer on board, the buyers for the paeking houses said they were among the finest ever seen on that market. The cattle were fattened on corn and alfalfa. The great packers have come to recognize that alfalfa fed cattle are of superior quality and are doing all they can to encourage feeders to feed the great proteid food with corn in such proportion as will enable the stock to utilize all the carbohydrates and oil in the corn. These they they cannot use without waste unless a protein ration is given as a neutralizer. We have always known that alfalfa was the best roughage that could be fed to cattle and we are glad to note that packers are beginning to see things our way.

Sulky and Cart for Sale.

One brand new McMurray sulky and one brand new McMurray cart for sale. Never been uncrated. Best made. Can save you some money. Address,

F. W. KELLEY,
Care of Breeder and Sportsman.
P. O. Drawer 447. **San Francisco.**

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.
Address this office,
BREEDER and SPORTSMAN.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.
SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.

Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best bred and best individuals on the Coast. Write for particulars. Address,
THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.
My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

ROHNERVILLE RACE TRACK FOR SALE.

One of the best mile tracks in California. Fenced, two grandstands, two pavilions, 35 stalls, abundance of water, good climate, right in one of the best towns in Humboldt county. Big horse center. Stalls can be rented year round. Great chance for a profitable investment.
Address,
L. FEIGENBAUM, 14 Spear St., San Francisco

BONNIE D. by BONNIE DIRECT 2:05¼

Is offered for sale. He is a bay gelding, four years old, a square trotter, sound, good looker, gentle and city broke. Can show 2:30 gait. He is out of Electress Wilkes 2:28½, dam of Lady Mowry 2:09¼, by Nutwood Wilkes 2:16½. MRS. D. V. TRUAX,
Near Park St. Station. 1126 Park Ave., Alameda.

"HOWARD SHORTHORNS"-QUINTO HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.
WILLIAM NILES & CO., Los Angeles, Cal.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to
S. B. WRIGHT,
Santa Rosa, Cal.

COLLIE AND BLOODHOUND PUPPIES FOR SALE.

Best bred Young Stock on the Coast. Sires and Dams winners on the Bench and Workers in the Field. Address
T. S. GRIFFITH,
Glen Tana Collie Kennels,
Spokane, Wash.

FIRST-CLASS MATINEE HORSE FOR SALE.

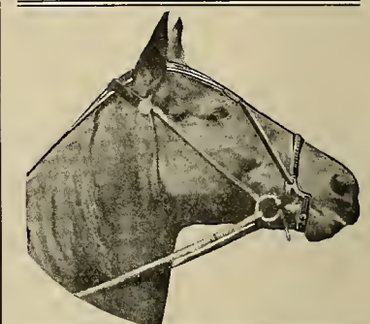
A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

BONNY McKINNEY YEARLINGS FOR SALE.

Three yearlings by Bonny McKinney 41383 are offered for sale. Two are fillies and one a stud colt. All are trotters, black in color, broke to harness, and from choice bred dams. Must be sold as I am compelled to vacate present location(by July 15th. For price, breeding of dams, and other particulars, address
H. BUSING,
Alameda Race Track, Alameda, Cal.

Ellis' Improved
Hutton Patent
Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

FLY TIME.

A plague of flies was one of the curses of Egypt, and in a modified state they have remained with mankind ever since. Everyone acknowledges that the fly is a nuisance but lately it is being proved that it is a dangerous nuisance, a distributor of dirt and disease. It is not a pleasant idea, that of the fly walking on the manure pile and then investigating the food supply or drowning in the cream vat, and yet because it is common and because flies are a temporary and passing plague whose influence for evil is disguised by its size, man turns to more important matters and the fly is allowed to continue its destructive work.

The fly is a dirty insect; its favorite breeding place and home is the manure pile. There it lays its eggs which are quickly hatched out into grubs, turn into adult flies and continue the round of producing more swarms. Wherever any organic matter is decomposing, there is the fly. If there is a sink hole near the house where slops are thrown, there the fly is found.

If the creamery waste runs into a shallow pond and decomposing spreads the odor of decomposing milk for a mile or so around when the wind is strong, then is the fly attracted by the odor. From such places to the milk vat is but a short flight and it is neither pleasant, appetizing nor profitable to allow flies, the product of the manure pile and fed on decomposing milk, to drown in the milk vat or be incorporated in the cheese.

One of these days the cheesemaker is going to recognize the fact that a good share of the profits are lost through the dirty milk channel and when that time comes flies will be eliminated along with the rest of the dirt producers.

Removing the breeding places and screening the windows will help wonderfully in reducing the pest and likewise save the money that now is lost in poor products.— Hoard's Dairyman.

---o---

A dairy record without a parallel in the county and doubtless without an equal in the State, says the Worcester Times, is that made during 1907 by the dairy of C. S. Morris of Portlandville, Otsego county, New York, the figures astounding old dairymen, who freely admit that it is exceptional and could only be accomplised by the best of attention and care, coupled with careful selection of cows for their milk producing qualities. The record for the past three years shows that Mr. Morris has made considerable advance in the producing ability of his herd. During the year 1905, 20 cows produced 9,276 lbs. of milk each and in the following year 21 cows gave an average of 9,554 lbs. each. In 1907, the banner year, 22 cows gave an average of 10,008 lbs. each, which was sold at an average price of $1.35 per hundred pounds, or 2.87 cents per quart. This gives an average income per cow of $135.10. It is interesting to note that these cows are all grade Holsteins and 15 of the 22 cows milked during 1907 have been in the dairy from three to five years.

---o---

The only thing about pasteurizing cream is to heat it and then cool it. It first goes into a receptacle that brings it to the temperature of 165 degrees, then it trickles down over a succession of pipes through which courses a stream of cold water. From the cooler the cream goes to the churn. The heating process is supposed to kill the germs of life that may be contained in the milk and is highly commended by the medical fraternity.

FARMS IN DENMARK.

Denmark has nearly 200,000 farms and farm gardens of 10 acres or less and about 100,000 farms of between 10 and 15 acres. There are less than 1000 farms in the entire kingdom of 500 acres or over, the aggregate of these last named being less than a million acres. There are 1,085 co-operative dairies with 158,170 members, 33 bacon factories with 91,000 members, and a co-operative egg exporting society with 500 local centers. The business transacted by these co-operative concerns is enormous.

---o---

BUTTER COLORS.

Some experiments with butter colors by the Wisconsin station resulted in the following interesting conclusions:

"First, some of the brauds of vegetable butter color now on the market are weaker than anilin butter colors. Nearly twice as much vegetable color was needed in some cases to produce the same shade of color in butter as was given by the analin color.

"Second, when the change was made from vegetable to analin butter color, some 15 years ago, butter makers were so accustomed to the weaker anatto color that they added too much of the stronger anilin color. This had a tendency to gradually accustom the consumer to a more highly colored butter than formerly had been made.

"The natural color of June butter is a sufficiently high color, and when only enough vegetable color is added to produce this shade there will be no danger of using so much as to impart a butter color flavor to the butter.

"Third, the vegetable colors now on the market impart a rather greenish-yellow shade to the butter. This is quite different from the bright or reddish-yellow given to the butter by the anilin colors.

"Fourth, some brands of vegetable color contain a decided flavor, imparted to them by the oil used in making the color. This flavor may be distinctly noticed in the butter when large quantities of such brands of color are used.

"Fifth, a great improvement in the strength and flavor of certain brands of vegetable butter color was noticed during the year these experiments were conducted, which suggests that the vegetable butter colors may eventually be improved so as to compare favorably with the anilin butter colors.

"Sixth, when butter was held in cold storage at 5 degrees below zero, no difference was noticed in the uniformity or the depth of color in the lots of butter to which anilin and vegetable coloring was added. Over 50 tubs of butter were beld in storage for different lengths of time, some of them being taken out when the butter was nearly a year old. Neither the vegetable nor the anilin colored butter showed any indication of fading or changing color while in storage.

"Seventb, butter can be satisfactorily colored with a vegetable color."

Stallions for Sale.

Frank Covey, seal brown stallion by Mendocino 2:19½, dam Rose McKinney by McKinney 2:11¼. This horse is 16 hands, weighs 1170 lbs., six years old on June 15, 1908, has best of disposition, grand looker and sure foal getter. Has been a mile in 2:30½ this year with five weeks work. Will sell at a low price—so low that any man can make twice the price with him in the stud next season.

Bay Stallion by Monbells 2:23¾ (son of Mendocino and Beautiful Bells), dam Sonoma 2:28 by Electioneer, second dam Sontag Mohawk, dam of 8 trotters in the list by Mohawk Chief. Four years old, 15.3, nicely broken and can show fast natural gait. Never trained.

Brown Stud Colt, two years old, by Kinney Lou 2:07¾, dam Almah 2:28 by Messenger Almont. Large, well-formed colt, paces and has been a quarter in 39 seconds with four weeks work.

Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:05½, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13½ and Pinkey H. 2:17. This colt is a beautiful dark chestnut, with a great deal of knee and hock action, and in good hands would make a show horse. Will castrate him and break to saddle if any one wants him that way. Is a very attractive and stylish fellow.

Will trade any or all of them for work or driving horses, as I am selling all racing stock and going out of the business.

The above horses can be seen at Pleasanton at any time and will be shown on the track. For prices and other particulars address

Dr. A. De FOE, Box 38, Pleasanton, Cal.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

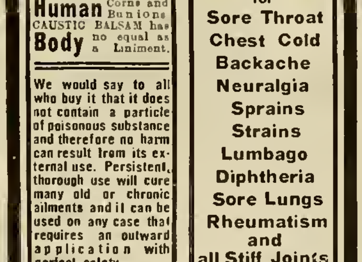
A Perfectly Safe and Reliable Remedy for
Sore Throat
Chest Cold
Backache
Neuralgia
Sprains
Strains
Lumbago
Diphtheria
Sore Lungs
Rheumatism
and
all Stiff Joints

REMOVES THE SORENESS--STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $120 00 paid in doctor's bills." OTTO A BEYER.

Price $1.50 per bottle. Sold by druggists, or sent by us express prepaid. Write for Booklet R

The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.



Washington McKinney 35751

At the Breeders meeting to be held on the historic Santa Rosa Stock Farm track, July 29 to Aug. 2, we expect to give standard records to the following sons and daughters of Washington McKinney —only two of which ever had any training until this year:

Belle of Washington, Trial 2:19
Ray McKinney, Trial 2:19
Fabia McKinney, Trial 2:25
Harry McKinney, Trial 2:28¼
Donello, Trial 2:27¾
Rex McKinney, Trial ¼, 34½ seconds
Reed McKinney, Trial ¼, 36 seconds
May Randall, Trial ¼, 34 seconds

and two others we do not now control. We will also reduce the records of Lady McKinney and McKinney Belle, obtained last year. We know of twenty others of the get of Washington McKinney which can be put in the list if trained. This great horse goes East next fall. Breed to him before he goes.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: $35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge. Good pasturage will be provided for $3.50 per month at owners' responsibility and risk.

PRIVILEGES FOR SALE

CARE AND USE OF STRAW.

In the care and use of straw the first requisite is to begin caring for the straw at the proper time, which is when the grain is mature enough to insure its becoming thoroughly dry in shock, stack or barn before being threshed. Having cut and shocked the grain at the proper season, the next requisite is to house or stack carefully, housing being preferable to stacking, of course, for both grain and straw. Permit the observatiou in this connection that either straw or hay stacked out will soon be a thing of the past. After having permitted grain to remain in barn a sufficient length of time to insure a right condition for thrashiug, secure the services of a thrasher whose work it will be to store away straw in shed and grain in granary, or otherwise, if so directed. The straw is now in shed, well cured and iu good condition for feed, bedding, or for market if desirable; but we would confine its uses to the farm, as the farm from which the straw is marketed becomes, in the course of time, sterile.

Shortly after thrashiug is done the season is at hand when the stock which has been roamiug over the green pastures all summer will enjoy having clean dry bed whereupon they may lie. Now the straw which has been so nicely cared for in the shed will not only furnish the above comforts for the stock, but will afford variety in the way of food for change from the more nntritious kinds of feed, which are, of course, indispensable. After winter has set in and the weather has become severe it will become necessary to have shelter for the stock and feed within their reach all the time. The shed with the straw therein will supply both of the above and will also keep droppings and bedding in condition to be spread upou the fields as fertilizer, thus repaying the farmer for caring for his straw and stock.

The shed and stables iu which the straw bedding has been used may be cleaned out at the farmer's leisure wheu weather is reasouably fair. It should be doue, however, only wheu necessary for proper care and cleanliness of stock, as by permitting the fertilizer to remain in shed rots it and makes it all the richer when it is not exposed to washiug rains and snows. Many more uses for straw on the farm might be given, but this article is sufficient to convince all that straw pays for its care.

By the purchase of a well-hred sire a good dairy herd can soon he huilt up and this is the cheapest way to improve the hreeding of the herd. A registered cow will give in her life of fourteen years probably not over twelve calves, and if six of these are heifers we have ahout the full increase. The sire will easily give fifty calves a year, if half are heifers that makes twenty-five a year or three times and a half as many in one year as the registered cow produced in her lifetime. The original cows on the place may probahly he of all types and classes. After these are culled out there will he a certain per cent of the offspring that are culls even in the third and fourth generation. These cows should be dried off and sold to the hutcher and will usually hring sufficient for heef to meet the cost of raising them, for they are young and fat when sold. While the new hlood introduced in the grade heifers will increase the production of the cows, we in turn must expect to increase the feeds used or at least the digestihle contents.

The great German economist Wolff was the first to call attention to the waste in feeding cows. If one knows how expensive feeds can he replaced with cheaper ones and fully as good results ohtained. Taking as a unit the weight of the living animal at 1,000 pounds, Wolff figures dry matter 25 pounds in weight, protein 25, carhohydrates 12.5 and fat 0.6 as a daily requirement. A larger cow should have more and a smaller one less. The practical feeder soon finds out that it was production rather than hodily weight that governed the amount of food a cow could profitahly handle. Some cows can do well on more concentrated feed than others. The halanced ration, therefore, is to be used as an indicator rather than a fixed rule. While it would he impossihle to study each cow in the dairy and feed her exactly to the pound the ration on which she could produce the hest, we can come at it in no other way.

STATE CONTROL OF WATER.

The Supreme Court of the United States has decided that a State has the right to control its own water supply. The decision was rendered in the case of the Hudson County Water Company versus Rohert M. McCarter, Attorney General of New Jersey, in which the State sought to restrain the company from supplying water from the Passaic river to Staten Island, New York. The company took the position that the law prohihiting such diversion was unconstitutional hecause it interfered with interstate commerce as well as with property rights, hut the New Jersey courts upheld the law as in line with the State's right to control its own natural resources. The Supreme Court's decision sustained the State view and against the water company. The opinion asserted in positive terms the right of a State to control the waters within its borders.

SPAVIN CURE

BREAK, TRAIN, WORK or BREED DURING Treatment. "Save-the-Horse"

Will Permanently Cure Under any Test.

THURMONT, Md., June 18, 1908.

Troy Chemical Co., Binghamton, N. Y.:

Gentlemen: Some time ago I ordered of you a bottle of "Save-the-Horse" Spavin Cure. I treated a case of Ringbone of long standing on a black horse I owned and cured him entirely after a veterinary had treated him unsuccessfully for six months or more. I am enclosing you check for $5 for which please send me as quickly as possible another bottle of "Save-the-Horse." Send under guarantee as before. Very respectfully,

G. DWIGHT HOTT.

A. B. & E. E. FRASER.

HILTON, N. Y., May 8, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: Please send us four bottles "Save-the-Horse." We have had good results from it. It cured one horse that it seemed almost impossible could be cured, and now the animal goes perfectly sound, after several veterinarians gave it up. Yours truly, A. B. & E. E. FRASER.

OTSEGO, Allegan Co., Mich., April 20, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen: The "Save-the-Horse" I bought of Tuttle & Clark, of Detroit, to use on the blood or bog spavin I wrote you about did the work. I am showing up what it did for me and recommending it. Yours truly,

R. MONTEITH.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it.

At Druggists and Dealers or Express Paid.

Back East Cheap

Low round trip rate summer excursion tickets sold to Eastern points on these dates:

July 21, 22, 23, 28, 29.
August 17, 18, 24, 25.
Sept. 15, 16.
Sept. 23, 24, 25 to Kansas City only.

Here are some of the rates:

Omaha	$ 60.00
Council Bluffs	60.00
Kansas City	60.00
Chicago	72.50
St. Louis	67.50
New Orleans	67.50
Washington	107.50
Philadelphia	108.50
New York	108.50

Tickets sold on July dates good for 90 days; those sold August and September good until October 31. Stopovers and choice of routes going and coming.

SOUTHERN PACIFIC

See nearest agent for details.

STARTING PAYMENTS

Due Aug. 9, '08.

Pacific Breeders Futurity Stakes No. 6---$7000

FOALS BORN 1906. NOW TWO-YEAR-OLDS.

TO START IN TWO-YEAR-OLD TROTTING DIVISION, $35

TO START IN TWO-YEAR-OLD PACING DIVISION, 25

Nominators must designate when making payments to start whether the Horse entered is a Trotter or Pacer.

Colts that start at Two-Years-Old are not barred from starting again in the Three-Year-Old divisions.

Pacific Breeders Futurity Stakes No. 5---$7000

FOALS BORN 1905. NOW THREE-YEAR-OLDS.

TO START IN THREE-YEAR-OLD TROTTING DIVISION, $50

TO START IN THREE-YEAR-OLD PACING DIVISION, 35

Nominators must designate when making payments to start whether the Horse entered is a Trotter or Pacer.

MONEY IN ABOVE STAKES DIVIDED AS FOLLOWS:

$1,000 For Three-Old Trotters.
200 For Nominator of Dam of Winner of Three-Year-Old Trot.
1,250 For Two-Year-Old Trotters.
200 For Nominator of Dam of Winner of Two-Year-Old Trot.
100 To Owner of Stallion, Sire of Winner of 3-Year-Old Trot when mare was bred.

$1,000 For Three-Year-Old Pacers.
200 For Nominator of Dam of Winner of Three-Year-Old Pace.
750 For Two-Year-Old Pacers.
200 For Nominator of Dam of Winner of Two-Year-Old Pace.
100 To Owner of Stallion, Sire of Winner of 3-Year-Old Pace when mare was bred.

Be sure and make payment in time. Address all communications to the Secretary.

Milwaukee, Wis. (State Fair)	Sept. 7-11
Peoria, Ill	Sept. 14-18
Springfield, Ill. (State Fair)	Sept. 25-Oct. 2

THE VALUE OF HORSES owned in California in 1907, as reckoned by the statisticians of the United States Department of Agriculture, was $37,224,000 or an average of $93.41 for a total of 396,000 head. This was three times the value of all the milch cows in the State and more than a third more than the value of all the other cattle. The horse industry is the greatest of all California animal industries and will continue to be for years to come. At the tax rate of 45 cents on each hundred dollars worth of assessed property the owners of California horses will pay into the county treasuries $167,508. In the palmiest days of the district fairs in California less than that sum was appropriated for the support of those institutions, at which premiums were offered for all sorts of farm and manufacturing products. It does look as if these appropriations should have been continued, especially as the money raised on horse values alone paid the entire appropriation.

THE CALIFORNIA CIRCUIT will open at Santa Rosa one week from Wednesday next. The track is in fine shape, the stalls all clean and ready for the horses, and a number of trainers are already on the ground. The prospects for the high class racing which has always been seen at Santa Rosa during the Breeders' meetings are as good as they ever have been and in the trotting division there is an opportunity of the track race record being lowered when the 2:09 class trot is decided. The climate of Santa Rosa is a big inducement for lovers of harness racing to attend meetings there, and the certainty of fast time and good square contests always draw a large attendance. Those who want to enjoy a four days outing in one of the prettiest and most thriving towns in the State, should arrange to visit Santa Rosa during the Breeders' meeting, July 29th to August 1st.

WHENEVER the associations that manage the running tracks in and around New York show that they are trying to obey rather than evade the laws against betting, the easier it will be for them to pave the way toward the passage of a new law that will permit a reasonable amount of wagering on race results. It is known to all that while the racing officials of New York protest that they do not countenance bookmaking at their tracks and have no connection with it whatever, they demand and secure a revenue each day from each bookmaker who operates on the track. The claim that these men are only charged a certain price for certain advance information as to scratches, weights, etc., is a measly subterfuge, as the money they pay is for the privilege of booking and is a source of big revenue to the associations. Whenever the betting in New York State assumes its old position as the mere incident of decent sport, it will be the easiest thing in the world to repeal the Hughes' law. There are thousands of dollars bet every year on the great football and other athletic contests, and no one ever thinks of passing a law to prevent it. Just consider for an instant, however, what a row would result if at these contests from fifty to a hundred bookmakers were doing business on the grounds aided by a gang of touts whose faces looked like choice collections from a rogues' gallery. If such a condition prevailed there would soon be a demand for the suppression of all athletic contests where betting is permitted, and we don't know but it would be a just demand and in the interest of true sport. Wagering as an incident of sport has never met with much opposition anywhere, but as a business it is in bad odor in every community. When the New York racing associations refuse absolutely to have any business relations with the professional gamblers, they will find but very little antipathy to the great sport of racing horses.

EVERY CALIFORNIAN is greatly pleased with the showing that William G. Durfee is making with his string of trotters and pacers on the Great Western Circuit. Starting last week for the first time this year at Peoria, Illinois, and continuing this week at Terre Haute, Indiana, he has been the largest winner of any driver at the two meetings and up to this writing, (Thursday morning), has won five races, two of which were for $2,000 and three for $1,000 purses, while his horses have never been worse than third. He has up to this time, five firsts, two seconds and two thirds to his credit and his total winnings for the two weeks are over $5,000. He has reduced the record of Carlokin, the McKinney trotter, from 2:13¼ to 2:08¼, of Copa de Oro the Nutwood Wilkes pacer, from 2:07¼ to 2:05¾, and given the green Zombro trotter Zomalta a mark of 2:12¼ in a winning race. Mr. Durfee has for several years been recognized as the leading trainer and driver in California, and his record on the Great Western Circuit this year where he has met the leading reinsmen of America, has confirmed the judgment as to his abilities which his California friends had already put upon him. Mr. Durfee is not only a first class driver but he is an excellent trainer as well, and it was the general opinion of all the eastern turf scribes who looked his horses over after he reached Wheaton where he kept them until the season opened at Peoria, that a better conditioned string had never been seen on that side of the mountains. Mr. Durfee's many friends and admirers here will be greatly pleased to read of his splendid showing thus far, and wish him continued good fortune in the way of future wins and lower records for his horses. He is a careful, painstaking, and hardworking horseman, with much more than average ability, and it is this combination rather than any element of luck that has placed him in an advanced position among America's best trainers.

MANAGER BEN BENJAMIN of the Alameda Fair Association announces that as no association has taken the dates during the week following the Santa Rosa meeting, he has decided to give another day's racing at Oakland and will open the meeting on Saturday, August 8th, instead of Monday, August 10th, as first announced. He will go to Santa Rosa next week and interview the horsemen in regard to two or three additional purses, and will try to arrange some good contests. Mr. Benjamin will put the 2:05 pace on the opening day, and the opportunity of seeing Sir John S. 2:04½ in a race should draw a big crowd as this horse has never raced any closer than fifty miles from San Francisco. No meeting held in California in years has been talked about so favorably in advance as the Oakland meeting and every harness horseman in California is boosting for "Ben Benjamin's meeting."

GOOD RACING AT UKIAH.

Everybody attended the races at the Ukiah race track Friday, July 3d, afternoon and all pronounced it the best afternoon's sport they had ever enjoyed. Besides the people of Ukiah there were visitors from Anderson, Willits, Hopland, and other places. It was clean sport, and no betting nor pool selling and the absence of drinking met with the approval of all classes and they were present with their wives and families. The racing was given by the Ukiah Driving Club.

The first event, trotting, half mile heats between Fred Jasper's Elizabeth W. and Horace Eldred's brown stallion Horace W., was won by the latter in two straight heats. The trophy was a $10 English whip donated by C. W. Bradford. The time was two minutes.

The second event also was decided in two heats, both won by Dr. S. L. Rea's bay mare Maxine, in 1:30 and 1:25. The other entries were L. Cunningham's Gertie R., Holbrook's Alta Dawn, and S. Johnson's John Wilkes. Second place was taken by Gertie R. in the first heat and by John Wilkes in the second heat. The trophy was a beautiful $10 robe donated by Will Street.

There was a flutter of excitement as the horses were driven out for the third and main event, Louis Charlton driving Rose Thorn, Abe Marks Cecille M., and Bud Smith Ayeress. The horses were in excellent condition and it was evident that each of the owner-drivers was out to win. The race was half-mile heats, the winner to drive nearest to 1:20. In the first heat Cecille M. took the lead and kept it until they rounded into the stretch, when the Colonel became flustrated and threw her off her feet. Rose Thorn took the heat in 1:14 2-5. The second and third heats were won easily by Cecille M. in 1:18 2-5 and 1:22 3-5. It was one of the prettiest races ever seen in Ukiah and another contest between them will surely draw a large crowd. The trophy was a $25 silver cup donated by A. H. Ewert.—Ukiah Times.

SAN FRANCISCO CLUB RACES TO-MORROW.

At the Tanforan track, twelve miles south of this city, easily reached by both steam and electric car lines, the San Francisco Driving Club will hold a meeting to-morrow afternoon with five races on the program. There are from seven to nine entries in each race and they have been so well classified that it will be a most difficult matter to pick the winner. The liveliest betting seen at any of the club's recent meetings should result as nearly every owner is pretty confident that he will win. The entries are as follows. W. J. Kenney will act as starter:

Free-for-all pace and trot—C. J. Lecari's Charley J., Luke Marisch's Little Dick, A. H. Scofield's Albert S., Mrs. Nutiug's Byron Lace, A. Hoffman's Kitty D., George Giannini's George Perry, Charles L. Becker's Walter Wilkes.

2:20 trot—J. J. Butler's Major Cook, G. Lindauer's Home Way, Fred Clotere's Monk, J. Danz's Babe, F. E. Burton's Nico, J. V. Galindo's Hunky Dory, Charles L. Becker's Charley B.

2:17 pace—J. Descbler's Prince D., George Kitto's Deroll, T. Corcoran's Lady Falrose, J. E. Burton's Sidney B., R. P. Giovauoni's Golden Buck, A. H. Scofield's Harry Hurst, George Erlin's Toppy, Charles L. Becker's Schley B.

2:20 pace—J. Danz's Belle, J. B. Campodonico's Lucero, J. Bonny's Mike Donnelly, H. Schottler's Dynamite, James O'Kane's King V., Mr. Hill's Coly Creed, H. Boyle's Margaret.

2:25 trot and pace—Joseph McTigue's Darby Mac, Louis Whiteman's Teddy W., H. Boyle's Docus D., M. Donnelly's Mabel R., Harry Werner's Chatterbox, H. Schottler's Wood Be, Charles Butler's Lady Cupid, Charles Buckley's Queen Eagle, W. C. Rice's Hickman Girl.

SONOMA DRIVING CLUB RACES.

Five hundred people were at the half-mile track, Sonoma, to see the harness races on July 4th. Results:

Road race, purse $10—Jason's mare, Belle, won in straight heats. Two Step and Juda also started. Time—2:44, 2:45.

Mixed, 2:40 class, purse $30—George Boyle's mare, Marguerite, won in 2:23 and 2:22½. Orleona, Cozy Corner and Babe also started.

Bigelow Stake, $100—Jos. Ryan's Mytle won in 2:17 and 2:18. A. Schwartz's Deroll was second, M. Lonergan's Vashti third.

Colt race, half-mile heats—James Tate's Hello Girl won first heat in 1:28, Emil Cornelius' Lena D. won second and third heats in 1:27 and 1:34. A. Marcy's Victoria third.

Mixed, 2:30 class, purse $50—Jos. Ryan's Bill Daly won. Sidney B. and Before Taken also started. Best time, 2:30.

The Arizona Fair will hang up $2,000 for a free-for-all trot this year and the same amount for a free-for-all pace.

WOODLAND DRIVING CLUB RACES.

Something over three hundred people enjoyed the second matinee of the local driving club at Woodland Stock Farm track on Friday of last week. The weather was very warm, hut the racing was excellent and the crowd remained throughout the afternoon.

The judges were A. C. Steveus (presiding), George Zimmerman and Dr. W. A. Joyce. The timers were Louis Matavia, Peter Friat and E. A. Swahey, Secretary W. A. Hunter acted as clerk.

Before the regular program F. N. Frary drove the yearling Corning Girl a mile in 2:35 the last half in 1:17½, a good mile for a yearling this early in the season. The results of the other races were as follows:

Special event:
Chiquita by Diablo (Carey Montgomery).....1 1
Seymow M. (J. E. Montgomery) 2 3
Mono Rose (Ora Wright) 3 2
Time—2:13, 2:13½.

Class A:
Tubelina by Tuberose (Rodman) 1 1
Billy M. (A. C. Stevens) 2 3
Herhert Dillon (F. N. Frary) 4 2
Rohin (Otho Marders) 3 4
Time—2:20, 2:19.

Class B:
Domingo hy Don Marvin Jr (E. Montgomery) 2 1 1
Leta H. by Nutwood Wilkes (W. Hashagen)..1 2 2
Banker G. (Whitehouse) 3 4 3
Nusta (Charles Marley) 4 3 4
Time—2:31¼, 2:31½, 2:32½.

SWEET MARIE WINS AT READVILLE.

Readville, Mass., July 10.—Sweet Marie won the free-for-all race at the New England Breeders' track for the trotting championship to-day, capturing the first and third heats and losing the second to Major Delmar, Wilkes Heart was a poor third, except in the second heat, when he took second place, after a hard struggle for the lead. The best time was made in the first heat, 2:06½.

In the first heat Major Delmar led by a length at the quarter pole, but Andrews drove Sweet Marie hard and won easily. Wilkes Heart had a slight advantage in the secoud until the homestretch was reached, when he weakened, allowing Major Delmar to win handily. In the final heat Sweet Marie trailed Major Delmar and Wilkes Heart until the later began to weaken. Then Delmar suddenly made a standstill break and Sweet Marie had only to jog to the wire. Summary:

Free-for-all trot, purse $2,500:
Sweet Marie, h. m., by McKinney (Andrews).1 3 1
Major Delmar, b. g. (McDonald) 2 1 2
Wilkes Heart, b. g. (Steele) 3 2 3
Time—2:06½, 2:08¼, 2:07¼.

ANSWERS TO CORRESPONDENTS.

J. L., Ferndale—Mr. Dingle is a chestnut horse hy Oruament, dam Nellie C. by King Alfonso. He was foaled in 1900.

E. F. K., Redding, Cal.—As the stallion Roscoe is not registered we have no record of his hreeding.

W. J. O'B., San Francisco.—The only accounts of the "Cow Boy" endurance race in Colorado last month we have seen were in the daily papers. If you will write to the sporting editor of one of the Denver dailies, he may be able to give you the particulars you desire.

Dr. H. C. Melrose—Star Pointer's dam was Sweepstakes by Knight's Snow Heels, grandam Kip by Mc-McMehan's Traveler.

T. E. Emlay, Oroville—We cannot find McArthur registered. There is another horse registered under that name. Babe Madison is standard and registered in Vol. 15, A. T. R. She is by James Madison out of Bahe Marion by Steinway. She is a hay mare foaled 1899. Any foal from this mare, if hy a registered trotting stallion, can be registered.

Thomas Barrett Jr., San Luis Obispo—We do not know the present address of Clarence Day or where the horse Dictatus is at present.

NOT WANTED IN CANADA.

An intimation in some of the eastern dailies that several managers of running tracks in the United States were looking to Canada as a place to continue the game that is getting into disrepute here, has called forth the following from the Canadian Sportsman:

"We want no long meetings over here, and we want no American carpet-baggers opening up new tracks in Ontario for the sole purpose of promoting the gambling end of the game. Petitious, if necessary, must be prepared to be sent to the Legislature at its next session, asking for the changes absolutely demanded by the new conditions that have arisen. No meeting should he allowed to run longer than 15 or 20 days, and no club should he permitted to hold more than two such meetings in the same season. Restrictive legislation is ahsolutely essential, and there would not likely be any opposition to the passage of such a measure through the Legislature; in fact, it is not possible to set up an argument against it that would be worthy of consideration. The hetter class of Canadian clubs now in existence have no wish to run long meetings, the great danger to be guarded against heing an inroad of outsiders hungry for the plunder they will expect to secure by gaining a foothold on Canadian soil.

McKINNEY'S TWELFTH 2:10 TROTTER.

At Peoria, Illinois on Saturday last Will Durfee drove the McKinney stallion Carlokin to victory in straight heats in a $2,000 purse for 2:14 class trotters, putting him in the 2:10 list the first heat in 2:09¼, reducing this record a full second in the next heat which was in 2:08¼, giving his sire his twelfth 2:10 trotter and his 19th 2:10 performer.

Carlokin had won a race on the opening day of the meeting, and last Wednesday won again at Terre Haute.

Carlokin is owned by Mr. Claude Jones of Modesto, Cal., who purchased him when a two-year-old from the Santa Rosa Stock Farm, where Carlokin was bred.

Carlokin is a hay stallion and has all the qualities of a race horse. He first started racing in 1904, when he was a three-year-old. He was trained hy H. S. Hogohoom that year and made his first start at San Jose iu the Breeders Futurity, in which race he was 3-2-3 and won third money, Murray M. winning the race in straight heats in 2:19½, 2:20½ and 2:20. This was on August 6th. On August 22d he made his next start in the Occident Stake at Sacramento. With hut four starters this race went to seven heats before Almaden, son of Direct and a McKinney mare was declared the winner. Carlokin was second the first heat, won the second in 2:21½ and the third in 2:22¼, aud was then 4-2-3-3 in the balance of the summary, dividing second and third money with Marvin Wilkes. One week later he was one of four starters in the Stanford Stake, which was won by Marvin Wilkes. This was a five heat race, Carlokin winning the second heat in 2:20¾ which was his record at the close of the year as he did not start again.

As a four-year-old Carlokin was not raced, but made a short season in the stud to a few mares, the majority the property of his owner.

In 1906, when a five-year-old he was trained some, but was not regularly raced, Will Durfee starting him once at Los Angeles in July. Carlokin finished second in each heat to Athasham who won in 2:15, 2:13¼ and 2:12.

Last year Durfee campaigned Carlokin on the Pacific Coast circuit, starting first at Pleasanton where he won two races with him in two days. In

CARLOKIN 2:13½

the first race after losing a heat to Marviu Wilkes in 2:16¾ he won the next three in 2:14¼, 2:15½ and 2:14¾. The following day he defeated May T., Buck and Yolanda in straight heats, the fastest of which was 2:16¼. At Santa Rosa he started but once, taking first money in straight heats from Vallejo Girl, Marvin Wilkes, Verona and Della Derby in the 2:17 trot with 2:13½ as his best time and a new record. The following week at Petaluma he started twice. The 2:17 trot went to him in straight heats, hest time 2:14. In the 2:14 trot four days later he won the first heat in 2:13½, lost the next two heats to North Star iu 2:15½ and 2:16, and then won the fourth and fifth in 2:15½ and 2:18½. His next start was at the California State Fair at Sacramento where he was third to Kenneth C. who won the race in straight heats in 2:13¼, 2:14¼ aud 2:16½. Carlokin had cut his quarter so severely just prior to this race that he was a very lame horse, hut being entered in the $5,000 purse at Salem he was taken north and could not do better than fifth in the race, hut won the consolation portion of the purse a few days later, trotting the second heat in 2:13¼. This finished his racing for 1907, and he was taken to Los Angeles and wintered in Durfee's string, with the idea of taking him east this year, Mr. Durfee having great faith in him as a race horse owing to his speed, gameness and racing qualities. Durfee has always said that Carlokin would be a 2:10 trotter, and that the stallion has entered this charmed circle in his second race tbis year is a vindication of Durfee's judgment that is not only prompt but complete.

Carlokin, as has been stated, was hred hy Henry and Ira Pierce at Santa Rosa Stock Farm. He was sired by McKinney 2:11¼, his dam Carlotta Wilkes heing one of eight mares sent from the farm in 1900, to he bred to the now champion 2:10 sire of the world.

Carlotta Wilkes had heen on the farm a good many years before comiug into much uotoriety as a brood mare. She was foaled in 1888 and hred by E. D. Wiggin of Boston, Massachusetts. In 1902 her daughter Volita hy Beau B. 32606 paced to a record of 2:15½, and in 1904, when Carlokin took a trotting record of 2:20¾ as a three-year-old Carlotta Wilkes took a place in the Tahle of Great Brood Mares. She was then sixteen years old. The following year her daughter Carlocita by Sidney Dillon paced to a record of 2:24¼ and her son Vallotta was given a place in the Great Table of Sires hy virtue of a record of 2:24 made by his son F. S. Turner 30840. In 1906 Lottie Dillon, another daughter of Carlotta Wilkes, took a record of 2:26¼ trotting, and in 1907 there suddenly jumped into the front rank of fast pacers, the mare Inferlotta 2:04¾ that is by Inferna 2:15½, son of Diablo, and out of Carlotta Wilkes. The performauce of Carlokin this year gives the old mare two 2:10 performers, hoth with race records, and fixes her fame as one of the greatest of California owned hrood mares.

Carlotta Wilkes is hy Charley Wilkes 2:21¾ a son of Red Wilkes, that had a record of 2:39 trotting as a two-year-old. The dam of Carlotta Wilkes is Aspasia by Alcantara 729, and her grandam by Clark Chief.

Here is a peculiar coincidence in the hreeding of the two fastest foals of this mare:

Carlotta Wilkes is out of a mare by Alcantara. Her daughter Inferlotta 2:04¾ is by Inferna a son of Diablo and Diablo is out of a mare by Alcantara. Carlokin 2:08¼ is by McKinney, he by Alcyone an own brother to Alcantara. It will thus he seen that when Carlotta Wilkes was bred to stallions that carried some of the same hlood as "the hest strain of her dam," she produced fast performers.

PARK AMATEUR DRIVING CLUB.

A strong wind made the stadium track in Golden Gate Park anything hut a pleasant place for people who had to stand to see the contests hetween horses owned hy members of the Park Amateur Driving Club, hut there was quite a large crowd out nevertheless. Fast time was out of the question under the circumstances. The racing was keen however, and the drivers pronounced the track, which has recently received a new coating of clay, as the best footing of any speed track in the State. Mr. T. F. Bannon, a memher of the club, made his first effort as a starter and made a success of it. He got the horses off well with scarcely any delay.

Dan Hoffman's Zombro mare Mary K. made the fastest mile during the afternoon when she won the second heat in 2:17¼ and then came back the third heat in 2:17½.

George Erlin's Toppy hy Delphi also won a good race, pacing two heats helow 2:20.

Mr. J. W. Smedley captured the first race in handy style, although Mr. Borden gave him a race for it in both heats with his horse Barney Barnatto.

Mr. Kilpatrick won the third race with the green trotter Harry McKinney hy his stallion Washington McKinney. The heats in 2:33 and 2:32 were pretty fair for a horse that had never heen raced before and had little or no training. Mr. Kilpatrick had all he could do however to defeat C. F. Von Issendorf's Vita Dillon, also a green trotter.

The officials of the day were: Judges, A. J. Molera, A. Melletz and G. Wempe; timers, J. A. McKerron and George R. Gay; secretary, F. W. Thompson, and marshal, H. M. Ladd. The results:

Trotting, mile heats:
J. W. Smedley's Red Velvet (Smedley) 1 1
I. L. Borden's Barney Barnatto (Borden)......2 2
G. D. Mackay's Quill (Mackay)...............4 3
A. P. Clayhurgh's Charles II (Clayburgh)....3 dr.
Time—2:26½, 2:26.

Free-for-all pace, mile heats:
D. E. Hoffman's Mary K. (Hoffman) 2 1 1
A. Joseph's Alfred D. (Joseph) 1 2 2
Time—2:19, 2:17¼, 2:17½.

Trotting, mile heats:
F. J. Kilpatrick's Harry McKinney (Kilpatrick)..1 1
C. F. von Issendorf's Vita Dillon (von Issendorf) 2 2
E. Stock's Director B. (Stock) ....3 dr.
Time—2:33, 2:32.

Pacing, mile heats:
G. E. Erlin's Toppey (Erlin)................1 2 1
H. M. Ladd's Ringrose (Ladd)...............3 1 2
Captain W. Olsen's Zulu (Olson) ....2 3 dr.
Time—2:18½, 2:20, 2:19½.

Trotting, three-quarter of a mile heats:
M. W. Herzog's Lady Nell (Herzog) 1 1
F. J. Kilpatrick's Belle of Washington (Kilpatrick) 2 2
Time—1:57¼, 1:50¾.

AMERICAN HORSES AT LONDON.

London, June 28.—In the International Horse Show which ended here last night, the horses of R. P. McGrann won more prizes than those of any other American exhibitor, the McGrann stahle, which included the winning Butfield pair, taking in all thirty-eight ribbons, of which ten were firsts and eight seconds. Mr. McGrann was to-day consequently, highly elated over the showing of his horses, his only disappointment heing that his champion mares, which were fresh from their winning in Philadelphia, received no place.

Walter Winans, who was the largest exhibitor, either English or American, and a firm believer in the hlood of the American trotting horse, did not win as many rihbons as McGrann, hut was especially pleased that his American trottiug-hred stock heat out the English hackneys, thereby bearing out his contention that trotters were the hest for road use.

That should be a great free-for-all at Hamline, Minn., with Highball 2:06¼, Sonoma Girl 2:05¼, Watson 2:07½, Angiola 2:06, Early Alice 2:07¼, Aunt Jerusha 2:10¾, and Wilkes Heart 2:06¼ taking part.

THE OREGON FUTURITY.

Following are the entries received in the Oregon Futurity No. 1 for foals of 1908, valned at $5,000, to be raced for at the Oregon State Fair in their two and three-year-old forms:

Bay colt, Greco-Maud Stamboureet; br. c. Diawood-Lady Lemo, F. E. Alley, Roseburg, Oregon.

Colt, Tidal Wave-Bessie L.; filly, Tidal-Wave-Altamont Maid, S. S. Bailey, Albany, Ore.

Della McK., b. f., Bonnie McK.-Birdal; G. A. Kelly, Walla Walla, Wash.

Grattan Gray, b. c. Gray Grattan-Nidda; foal by Hal B.-Lenmetta, J. E. Gray, Victoria, B. C.

Queen Grattan, c. m., Gray Grattan-Queen Dictatus, N. Blanchfield, Vancouver, B. C.

Tidalene, ch. f. Tidal Wave-Ollie Guy, E. R. Berwick, Shedds, Ore.

Bay colt, Teddy, A.-Agnes Mack; J. A. Badderley, Weston, Ore.

Granger, b. c., Hal B.-Miss Altalena, O. J. Brown, Gresham, Ore.

Vinconette, cb. f., Caution-Saffrona, Thos. H. Brents Walla Walla, Wash.

Analine, by Packline-Anilexa, J. D. Laidlaw, Waitsburg, Wash.

Ramona M., b. f., Bonnie McK.-Aberdeeno, W. E. Burnham, Walla Walla.

Foal by King Alexis-Queen Antrim, Chas. Naylor, Walla Walla.

Doritha H., b. f., Tidal Wave-Preacher, F. A. Hackleman, Albany, Ore.

Bay filly, Star Pointer-Trix, J. W. Dixon, Cal.

Bonnie McLynn, b. c., Bonnie McK.-Miss Lynmont, C. F. Leroux, Walla Walla.

Bay f., Geo. W. McKinney-Lady Woolsey; b. f. On Stanley-Nearly W., F. H. Holloway, Hemet, Cal.

Zecho, b. c., Zolock-Beulah, J. E. Reeves, Cornelius, Ore.

Foal by Sunny Jim-Palinda, H. C. Davis, The Dalles, Ore.

Ruby Light, by Aerolite-Bertha, Mrs.. Carrie E. Shreve, Cathlamet, Wasb.

Chestnut foal, Star Pointer-Transval, E. M. Conroy, Ogden, Utah.

Stella McKinney, br. m. Ed. McKinney-Ella W., C. P. Warburton, Modesto, Cal.

Bay filly, Alconda Jay-Electress Wilkes, H. H. Helman, San Jose, Cal.

Bay colt, Zombro-Janet B., L. H. Todhunter, Sacramento, Cal.

Bay filly, Alconda Jay-Lovely Dell, F. P. Hellwig, Alvarado, Cal.

Brown filly, Alconda Jay-Vera; b. c., Baron Bowlesdam by Owybee, Henry M. Ayer, San Jose.

Bay filly, Tom Smith-Kate Lumry; b. c. Tom Smith-Evangie, J. W. Zibbell, Fresno, Cal.

Bay filly, Padishah-Mayflower, W. F. Rodolf, Dilley, Ore.

Majesta, cb. f., by Zolock-Webfoot Bell, G. A. Westgate, Portland, Ore.

Hal Mann, blk. c., Hal B.-Miss Mann; Jean Reid, b. f., Bonnie McK.-MollieVaughn; foal by Ken West-Lady Broughton, W. L. Whitmore, Portland.

Lady Pearl, b. f., Stam B.-Diablo Girl, Arthur Glover, Salem, Ore.

Lady Hal, br. f., Hal B.-Lady Julia, H. G. Cox, McMinnville.

Brown colt, Geary-Grace Dell, R. L. Bewley, McMinnville.

Chestnut colt, Blacksmith-Babe, Geo. Branson, McMinnville.

Brown colt, Zolock-Bonita, Mrs. M. E. Becker, Portland.

Sibyl, b. f., Exaris-Danseuse; Elect, br. c., Exaris-Jennie, J. A. Munday, Vancouver, Wash.

Count Boni, b. h., Bon Voyage-Welladay; blk. h., Greco B.-Oniska; foal by Greco B.-Fortuna; foal by Zolock-Diavola, F. E. Alley.

Horse colt, Star Pointer-Sadie Mason, G. C. Schreiber, Berkeley, Cal.

Bay filly, King Alexis, Pat Hughes, Walla Walla.

Foal by Lovelace-Carrie S.; foal by Lovelace-Diablo Girl, Kincaid & Rickel, Eugene.

Futurity, br. c. Col. Mayberry-Lady Seymour, J. C. Hinshaw, McMinnville.

Al. Hal, b. c., Young Hal-Athalene; Fred Lock, b. c. Zolock-Miss Hascom, A. E. Heller, Los Angeles.

Nat H., b. c. Palite-Bee Stirling; Pimento, ch. c., Palite-Paprika, E. D. Dudley.

Sylvarion, b. c., Arion-Sylvia Jefferson; b. c., Expedition-Humboldt Maid; foal by Todd-Baroness Nordeau; foal by Bingen-Incognito; Bradon Direct, blk. c. Baron Direct-Bradon Lass; Directoire, br. f., Baron Direct-Episode; foal by Baron Direct-Cecil Woodline; br. f., Joe Kelly-Perris Harris; br. f. Joe Kelly-Nellie Bingen; foal by Joe Kelly-Miss Episode; foal by Don McKinney-Happy Lotta; foal by Don McKinney-Ebbiemard, Herbert Stock Farm, Denver, Colo.

Brown colt, Bon Voyage-Elisa S., W. L. Vance, Marysville, Cal.

Foal by Lovelace-Willamette Girl, W. R. Kincaid, Eugene.

Bay filly, Iran Alto-Maggie Malone, T. B. Gibson, Woodland, Cal.

Sir John R., Sir John S.-Madeline S., John Renath, Marysville.

Homebox, Holmdel-Melo, G. W. Gill, Salem.

Bay colt, The King Red-Fairy Bird; b. c., Alcone-Nemefar; ch. c., Letrado-Latatat, C. X. Larrabee.

Bay colt, The Commonwealth-Lent Andrews; b. f., The Commonwealth-Nettie Ham; b. c., The Commonwealth-Hazel Almont; b. c., The Commonwealth-Nettie Flacon; b. f., The Commonwealth-Lady Careful; b. f., Zolock-Maggie Caution; b. f., Zolock-Amy May, N. K. West, La Grande.

Silver Heels, sr. c., The Blacksmith-Gold Lace, Robt. Bryan, Carlton, Ore.

Yakima Wave, ch. c., Tidal Wave-Glen Tay, L. L. Yoder, Sunnyside, Wash.

Red Hal, b. c., Hal B.-Rambler Maid; foal by Hal B.-Esther M.; foal by Hal B.-Love Me, Fred T. Merrill, Portland, Ore.

Jessie Wilkes, b. f., Scarlet Letter-Morgan mare, J. H. Norris, Vancouver, Wash.

Captain Lare, b. c., Bonnie Tangent-Mae McKinney, Marion Putnam, Salem, Ore.

Brown filly, Hal B.-Bhima; foal by Hal B.-Vevo; blk c., Oregon Patch-Dictatress, Paul Wessinger, Portland.

Foal by Hal B.-Altalena, August Erickson, Oregon City.

Foal by Oregon Patch-Lady Beach, J. J. Kadderly, Portland.

Foal by Hal B.-Kate Maxwell, Geo. Maxwell, Vancouver, Wash.

Filly, Hal B.-Jessie M., Mrs. H. E. Armstrong, Cathlamet, Wash.

Sorrel filly, Tidal Wave-Malmont; s. f. Tidal Wave-Minmont, E. C. Keyt, Perrydale, Ore.

Chestnut colt, Tidal Wave-Bertha S., Murton E. DeGuire, Silverton, Ore.

Chestnut colt, Tidal Wave-Della Norte, J. C. Collins, Independence, Ore.

Bal filly by Hal B.-Bessie Lovelace, Stanley McKay, Portland.

Brown colt, Bon Voyage-Marguerite; br. f. Bon Voyage-Simmone, S. Christenson, San Francisco.

Callie Fagan, b. f., Teddy A.-Lady Lynmont, F. G. Ennis, Walla Walla.

Foal by Star Pointer-Eva Nutwood; foal by Jules Verne-Josephine; foal by Jules Verne-Fannie G., Glide Bros., Sacramento, Cal.

Foal by Zolock-Quenalene; foal by Bonnie Tangent-Golddust, John R. Dimick, Hubbard, Ore.

Bobbie Evans, b. c., Baron Bretto-Black Bess, John A. Todd, Spokane.

Birdlock, ch. c., Zolock-Snow Bird, F. E. Cornelius, Hillsboro, Ore.

Taylor Grattan, ch. g., Gray Grattan-Katie R., Rennie & Taylor, Victoria.

Bay filly, Iran Alto-Beautiful Bird, H S. Hogoboom, Woodland, Cal.

Bay filly, Iran Alto-Mrs. Weller, Jas W. Rea, San Jose, Cal.

Sorrel filly, Young Hal-Kitty Nutford, A. V. Cregrer Pasadena, Cal.

Bay colt, Young Hal-Glenora, G. W. Pearl, Pasadena, Cal.

Foal by Parovas-Rose Rial, R. A. Fitzsimmons Soap Lake, Wash.

Rubenteen, b. c., Rubenstein-Mollie C. Blynn, H. Squires, Portland.

Foal by Teddy A.-Nellie Lynmont, James Dacres, Walla Wala.

White Sox, s. c. Job Lots-Burlena, F. C. Smith, Mountain Home, Ida.

Halo, f., Zolock-Happy Maid, Thomas Holmes, San Bernardine, Cal.

Duroc Hal, b. c., Hal B.-Katie B., Ed. Dennison, Portland.

Brown filly, Hal B.-Etta James, William McQuillan, Hillsboro, Ore.

RACING AT EUREKA, JULY 3d AND 4th.

Trot and Pace, 2:40 class:
Telltale, trotter by Edwin B. (Hunt) 1 1
Cassene, trotter, by Cassiar (East) 2 2
Oakland Derby, pacer, by Chas. Derby (Davis) .. 3 3
Time—2:31½, 2:32½.

Pacing, named horses:
Gladys B. by Timothy B. (Bryant-East) ... 3 2 1 1
Sunrise by Timothy B. (Hunt) 2 1 2 2
Cyrus E. by Cassiar (East) .... 1 fell dead
Time—2:30, 2:27½, 2:30½, 2:33.

Trotting, 2:30 class:
Telltale by Edwin B. (Hunt) 1 2 1
Cassene by Cassiar (East) 3 1 2
Don by Wayland W. (Lock) 2 3 3
Time—2:32, 2:28, 2:25.

Free-for-all, trot or pace:
Carriar, pacer, by Soudan (East) 1 1
Jim Whitney, trotter, by Wayland W. (Hunt) .. 3 2
Lillian, pacer 2 3
Time—2:24½, 2:26½.

In tbe race for named pacers the four-year-old colt Cyrus E. by Cassiar, dam by Waldstein, owned by Ed. Bryant of Rohnerville, dropped dead just after passing under the wire as winner of the first heat of the race. This colt was one of the most promising pacers ever bred in California and had worked out a mile in 2:10 and a half in 1:02.

---o---

VALLEJO RACES JULY 4th.

Trotting, free-for-all:
Prof. Heald by Nutwood Wilkes (Smith) 1 1
Donnybrook (Halford) 2 2
Abe Lincoln (Shouse) 3 3
Time—2:23, 2:25.

Trotting, 2:30 class:
Vallejo Boy (Smith) 1 1
Reuben (Shouse) 2 2
Time—2:27, 2:29.

---o---

Drink Jackson's Napa Soda.

LAST TWO DAYS AT PEORIA.

Peoria, July 10.—Highball, in the free-for-all trot, in the Great Western races here to-day, after covering the first mile in 2:06¼, winning easily from Margaret O. and Oro, came back in the second heat and made the distance in 2:03¾, the world's record for geldings in any heat and equaling Sweet Marie's record for second heat made in 1907. Geers announced before the race that he would drive for a record

Copa de Oro by Nutwood Wilkes, a California horse, driven by Durfee, won the Leisy Brewing Company stakes of $2,000 for 2:07 pacers, from a large field in straight heats. Zomalto by Zombro, won second money in the 2:30 trot. Summaries:

2:30 trot, purse, $600:
Mochester, b. h. by Moko (Geers) 1 1 1
Zomalto, b. m. by Zombro (Durfee) 2 2 2
Decoration, c. g. by Gourig (Flynn) .... 3 3 dr
Time—2:11¼, 2:10¼, 2:11¼.

2:07 pace, purse, $2,000:
Copa de Oro, b. h. by Nutwood Wilkes (Durfee) 1 1
Star Patch, b. g. by Bourbon Patchen (McMahon) 9 2
Major Mallow, b. g. by Box Elder (Mallow) 2 7
Hal R., br. h. by Hal B. (McDonald) 8 3
Dick Allen, b. g. by Ben Hur (Kern) 3 8
Judge Wilson, Bonanza, Miss Georgia, Daniel J. also started. Shaugeran distanced.
Time—2:06¼, 2:06¼.

Free-for-all trot, purse, $800:
Highball, b. g. by Dr. Hooker (Geers) 1 1
Margaret O., br. m. by Onward (Davis) 2 2
Oro, bl. m. by Little Corporal (McCarthy) 3 3
Time—2:06¼, 2:03¾.

Peoria, Ill., July 11.—Carlokin, the California horse, won in straight heats the Union Brewing Company stake of $2,000 for 2:14 class trotters from a fair field in the closing card of the Great Western races here to-day and entered teh 2:10 list Alice Edgar, contender in the event, forced the issue early in both miles, but tired in the stretch.

Minor Heir, after winning tbe first and second heats of tbe 2:25 pace in slow drives, was driven by Dean to beat his time of 2:05¼ in tbe tbird mile. He went well to the three-quarter pole and had a new mark cinched, but he broke in the stretch and finished in 2:05¾. Summary:

2:14 trot, purse, $2,00:
Carlokin, br. h. by McKinney (Durfee) 1 1
Alice Edgar, b. h.by Moko (Bonyon) 2 2
Teasel, b. m. by Allenwood (Geersb) 4 3
Axtellay, b. m. by Axtell (Thomas) 3 4
Time—2:09¼, 2:08¼.
Elvietress, Lily King and Betsy Wright also started.

2:25 pace, purse, $500:
Minor Heir, b. h. by Heir at Law (Dean) 1 1 1
Bonner, b. g. by Clay Cecil (Whitney) 3 2 2
Dr. Bonney, blk. g. by J. H. L. (Geers) 2 3 3
Time—2:11¼, 2:07¼, 2:05¾.
Onfield distanced.

2:17 pace, purse, $600:
Nilmah, b. m. by Lord Shirley (Anderson) 2 1 1 1
The Emperor, s s by Constatine (Colston) 3 2 2 2
Prince Albert, g. b. by Onite (Conover) .. 6 3 3 3
Blake D. blg g. by Blake (Dorgan) 7 4 5 4
Time—2:11¼, 2:11¼, 2:11¾, 2:11½.
Hal Cassious, Pender Jr. and Sagerac also started.

---o---

SAN LUIS DRIVING CLUB.

A large crowd attended the matinee racing July 4th at the San Luis Obispo track. The racing was under the auspices of the San Luis Driving Club and was well managed. No betting was permitted and no alcoholic liquors were sold. It was the first racing seen in the town for eight years. The judges were Charles A. Youngloçe, Will H. Warden and Garrett L. Blosser of Santa Maria. Timers, R. S. Brown, Dan Shaw and O. A. Olson. Marshal, John S. Price.

Tbe events resulted as follows:

Class A, trotters:
Pauline H. (Ingram) 1 2 2
Black Bart (W. Mead) 2 1 1
Time—2:25, 2:30, 2:32¼.

Class C, gents driving race:
Robert A. (Andrews) 2 1 1
Al M. (C. Mead) 1 2 2
Major (Howard) .... 3 dr
Time—2:55, 2:50, 2:51.

Class B:
Portuguese Belle (E. Steele) 1 1
Bobby H (James Hall) 2 2
Time—2:39, 2:38.

Class D:
Jovita S (O. Sinsbeimer) 1
Topsy (J. Dolan) 2
Time—2:39.

TRAINING DISTEMPER

Horses in the sort of weather that is prevalent are liable to get what is called "training distemper" if no precaution is taken. It can be headed off and kept off by regularly administering Spohn's Distemper Cure. The remedy will not harm a well horse; in fact, is a help, and a horse already suffering an attack is quickly relieved by the Spohn preparation. It tones the system, restores appetite and is of general benefit.

Spohn's is sold by horse goods dealers and druggists at 50 cents to $1 per bottle.

Subscribe for The Breeder and Sportsman

NOTES AND NEWS

Sauta Rosa meeting opens one week from Wednesday next.

Copa de Oro's newest record is 2:05¾, and it will be lower still.

Will Durfee has won over $5,000 in purses during the past two weeks.

Have you seen those newest model sulkies at Kenney's, 531 Valencia street? They are the best yet.

The new pacing sensation Miuor Heir 2:05¼ is blind in one eye which he lost when a two-year-old.

Billy Andrews pronounces Sonoma Girl fit to race for her life and the best mannered horse he ever handled.

Highball's new mark of 2:03¾ looks as if Geers had concluded to give him the lowest record possible at the very first opportunity.

The late Jack Curry drove the famous Joe Patchen 2:01¼ in more races than any other trainer who ever handled the great pacer.

Charley T was second every heat of a four heat race at Hamline week before last and took third money. The time was from 2:13½ to 2:15.

About half the hay crop of the Livermore valley has been sold. The prices ranged from $10 a ton for volunteer to $15 a ton for choice wheat hay.

The high priced youngster Harvester is doing nicely for Mr. Geers. His best mile so far, was in 2:25, but he has been a quarter in 32¼ seconds.

Col. Abe Marks of Ukiah, had his trotter Cecille M. trained at the Santa Rosa track and as a consequence won a cup race with her at Ukiah on the 4th of July.

W. J. Kenney at 531 Valencia street, has several second-hand speed carts for sale that he has taken in trade for new sulkies sold. These carts have all been made as good as new and will be sold at bargain prices.

Amy Brooks 2:05¼ is not eligible to the M. & M. at Detroit, and it looks as if George Estabrook's mare Spanish Queen, had a look in for first money. It would be a popular win should the Denver mare get this prize.

Farmer Bunch won a trotting race with Alto McKiuney at Marion, Iowa, July 4th. The purse was $300 and Buuch won in straight heats, best time 2:32. Helock by Zolock was in the race and was third.

Homer Saxe shipped a fine pair of Clydesdale mares to Japan last month. The mares were both in foal and were purchased for breeding purposes. Mr. Saxe also shipped four fine saddle horses to Japan during the month.

The Oakland meeting will open on Saturday, August 8th, instead of Monday, August 10th as first announced. Manager Benjamin will soon announce two or three extra purses to fill out the program which will continue seven days.

The new race track at the grounds of the Portland, Oregon, Country Club and Livestock Association, will be ready for the horses to work over by August 15th. No less than twenty owners of troters and pacers have applicd for stalls and desire to move in as soon as the track is ready.

A yearling colt by McKinney 2:11¼, dam by Patchen Wilkes, second dam by Daniel Lambert, is one of the fastest lot trotters of his age ever seen by horsemen of Batavia, N. Y., where he is owned by the well-known horticulturist, Nelson Bogue.

The Peoria meeting which was the place of Will Durfee's first start this year, netted his stable over two thousand dollars. He won two firsts with Carlokin, one with Copa de Oro, a second and third with Zomalto and a third with Phoenix.

The State Fair Directors held an informal meeting this week and while there was no quorum present, it was given out that the haudicap pace for a purse of $1,000, offered by the association to close July 15th, failed to fill. It received but three entries.

Jonesa Basler 2:05¾ lowered the Bakersfield half mile track record nearly eight seconds on the 4th, when he paced a mile over it in 2:16¾. He paced the last half in 1:07 which is a full second faster than any trotter or pacer had ever before circled it.

Cecil won a heat aud second money with his gelding Joe Gans by Nearest in a five beat race at Port Huron, Michigan, July 7th. Joe Gans was fourth the first heat, won the second in 2:19¼ and second the next three which were paced in 2:17¼, 2:17¼ and 2:21¼.

Zoe Patchen a mare by Zombro won second money at Bradford, Pa., in the 2:30 class trot July 1st. The best time was 2:23½ in the third and final heat. Her place in the summary was 2-3-2. The following week she was a good second in a heat where the time was 2:20¼.

Three yearling pacers raced at Porterville on July 4th for a purse of $250. Alice Dunlap, owned by Cornell Bros., proved the winner in straight heats. The race was three-eights of a mile, best two in three. Alice Dunlap's time for the two heats was excellent —55¾ and 57 seconds.

The California horses are keeping up this State's reputation all right at the various meetings on eastern tracks. Sweet Marie 2:02, Carlokin 2:08¼, Copa de Oro 2:05¾, Zomalta 2:12¼, Diablo Mac 2:24¼, and a number of others have already won races across the mountains this year.

One of the best three-year-olds in Iowa this year is Gazote Jr., 2:27¼ by the California bred stallion Gazote 2:16¼ sou of Nazote 2:28½, own brother to Azote 2:04¾. A race record of 2:27¼ this early in the year is pretty good evidence that he is a fast colt. His trotting action is said to be nearly perfect.

Starting payments will be due and payable August 9th on all two year olds and three year olds that are to be started in the Pacific Breeders Futurity at Chico this year. For three-year-old trotters the starting payment is $50; for two-year-old trotters, $35; for three-year-old pacers $35; for two-year-old pacers $25.

Spill, the bay pacing gelding that "Red" Gerrety campaigned one season in the Middle West for W. A. Clark Jr., is now the property of Mr. C. H. Dixon of Los Angeles, who sent him east to race this year. At Peoria last week Spill reduced his record from 2:09¼ to 2:06¼ in a winning race. Spill is by Wawan a son of Woodline 2:19.

Mrs. E. W. Scripps of San Diego, Cal., has purchased from the former owner, Clarence Kerr, of Lexington, Ky., Barbarossa, one of the greatest show mares in the United States. The mare will be brought to San Diego, but it is thought will be entered in horse shows all over the country. The price paid is understood to have been $3,000.

Among the horses in training at the Bellingham, Washington, track are L. A. Carvasso's two-year-old Bonnie T. by Tennysonian, H. Thurston's four-year-old Jim Blaine by Capri, J. T. Cragg's Champ Walnut by Walnut Boy, A. Beneke's Phalto by Del Norte and G. M. Rouse's Tommy Lake by King Alexis. All these horses are being trained for speed.

Mr. D. L. Bachant, owner of that good trotter Athasham 2:09¾ was up from Fresno last week on his way to Santa Cruz for a few days at the seashore before starting on the circuit. Athasham is in Schuyler Walton's string at Fresno and is in fine shape. His first start this year will be in the 2:09 trot at Santa Rosa in which the best trotters on the coast this year are entered.

At Coopertown, North Dakota, De Ryder won first with Diablo Mac, fastest heat 2:24¼; second with Sherlock Holmes, fastest heat 2:10½, and second with Nutwood Princess, fastest heat 2:17¼. All these purses were $400. Half mile track. At Wimbleton, the week previous, Diablo Mac won his race in straight heats and Nutwood Princess took fourth money. De Ryder started no other horses at Wimbletou.

Mr. D. B. Stewart, one of the directors of the Spokane Interstate Fair, passed through San Francisco last week on his way to Los Angeles to see bis two-year-old trotter by Hal B. 2:04½ out of a mare by Silkwood 2:07, that Fred Ward is working. He received news before leaving Spokane that the colt had worked a mile in 2:24½ with the last quarter in 33 seconds. The colt is entered at the Oakland meeting.

The third matinee of the Woodland Driving Club will be held on Saturday, July 25th. This was decided at a meeting of the directors held last Monday evening. The first matinee was held on Saturday. The second was changed to Friday at the request of the business men, but the attendance of the business men was disappointing and not sufficient to justify the change. The country patrons who turned out in large numbers on both occasions, prefer Saturday, and hence the directors have gone back to the original day. Entries for the third matinee will close July 20th.

Mrs. Carrie E. Shreve of Cathlamet, Washington, has purchased from Lou Crellin of Ruby Hill Vineyard, Pleasanton, the filly Ruby Light, foaled this year, by Aerolite 2:11¾, dam Bertha, dam of four in 2:10, by Alcantara. Mrs. Shreve has entered Ruby Light in the Oregon Futurity and will secure a substitute nomination for her in the Pacific Breeders Futurity. Ruby Light is one of the best bred fillies living and Mrs. Shreve is to be congratulated on securing such a prospect. The sale was negotiated by Henry Helman of Pleasanton, who will doubtless have Ruby Light to train when the little miss is old enough to wear harness.

Mr. F. J. Kilpatrick of this city is makiug arrangements to exhibit his great stallion Washington McKinney at the Santa Rosa, Oakland, Chico, Sacramento State Fair, Salem, Oregon State Fair, at tbe big Portland Fair, and also at the Washington State Fair this summer. It is Mr. Kilpatrick's intention to give eight or more of Washington McKinney's get records at Santa Rosa during the Breeders' meeting this month, and he will permit the stallion to serve two or three approved mares at each place where the stallion is shown on the circuit. Mr. Kilpatrick is confident he owns one of the coming great sires of the world and desires to give him every opportunity to establish the claim as soon as possible.

A good picture of the pacer McFadyen (2:15½ as a two-year-old) appears on our front page this week. McFadyen was bred and raised and is still owned by E. D. Dudley of Dixon, and will be raced all through the Pacific Coast circuit this year. He is now a five-year-old, but took his record in 1905 when he won the two-year-old pacing division of the Breeders' Futurity in 1905. He was just beaten for first money in the three-year-old division by Magladi who paced her three heats that year in 2:11¾, 2:10½ and 2:12½, with McFadyen second in every heat although he was not a well colt by any means. He is showing a high rate of speed this year in Fred Chadbourne's hands, and is expected to be a pretty fair winner on the circuit, although he will be compelled to meet the hottest sort of company every time he starts.

Jacob Brolliar bred his mare My Way 2:15¼ by Stoneway, to the grandly bred young horse Best Policy, this year. Owing to the San Joaquin circuit cutting out the 2:14 pace he could not race My Way this year. Mr. Brolliar's filly by Zolock out of Stonelita 2:15¼ is a grand one. After she recovered from distemper this summer he set her to pacing and with three weeks' jogging on the road took her onto the track for the first time in her life and stepped her a mile in 2:41. Three days later he worked her a mile in 2:49 and let her step the last eighth in 16½ seconds, and those who were holding watches on her say she was stepping a two minute gait at the wire. She is big and fat, wears nothing but a harness and is supposed to be in foal to Best Policy. She is now a two-year-old and should she fail to prove in foal will be raced in the three-year-old stakes next year.

There have been innumerable efforts on the trotting turf to stop the evil of laying up heats and the still worse evil of pulling horses to avoid records, and tbe deliberate fraud of preventing a horse from either winning a heat at all and playing some other borse to win. To encourage all owners to try and win, the Lake Erie Circuit has offered a special prize of $2,000 to be awarded as follows: At the close of the Circuit, at tbe end of the last meeting the summaries of all the meetings in the Circuit will be tabulated and the four horses which have finished best in the summaries will divide the prize in the usual way, fifty per cent to the first, twenty-five to the second, fifteen to the third and ten per cent to the fourth. There is no entrance fee; it is an actual bonus to the horses that win the greatest number of races and a very important one, as a slight examination of figures will show. In this circuit the purses are all $400 each. If one horse won a race each week during the ten days of the circuit, he would win $2,000, less $400 entrance fee, or net $1,600 and if he headed the list of winners he wins $1,000 additional, thus increasing his earnings by over 60 per cent. The secoud horse wins $500, which pays all his entrance fee and gives him a bonus of $100.

The importance of small trotting meetings is a subject that has been under discussion more than once in recent years and there is mucb to be said in favor of them, writes Hawley. While it is very true that the large meetings, such, for instance, as compose the chain known as the Grand Circuit, furnish the sinews of war, afford the racing public the best exhibitions and bring together the greatest horses, tbereby doing more to improve the breed than any others, it should be remembered that in a country covering a vast area and in which there are millions of people interested in the sport of racing, there must necessarily be numbers that could never have an opportunity of gratifying their taste for such a pastime but for the country fairs and small trotting meetings held throughout the Union. There is after all comparatively little difference between a Grand Circuit meeting and one given on a less pretentious scale, as far as the horses themselves are concerned, for while at tbe former there can be seen trotters and pacers of international reputation and great ability, the contests are not always as interesting or exciting as those furnished by well balanced fields in wbich the rate of speed is not as great. The real difference between smaller meetings and the larger ones is found in the management, in the surroundings, in the stage setting, if you like, which represents the same difference that would be found between an extremely clever actor performing in a barn and a star walking the boards in the lyceum. If at smaller trotting meetings, the appointments were in keeping with the best that is found in the sport of racing, if the surroundings were attractive and the stands comfortable, if the starting was well done and the judging less grotesque than it is, that portion of the population of this country that is forced to view the light harness horse in his performances at country fairs and in small circuits would suffer less than it now does.

GREAT WESTERN CIRCUIT.

Durfee Wins Three Races in One Day at Terre Haute Track.

Terre Haute, Ind., July 15.—The racing opened here yesterday with a good attendance. After Citation had won the first heat of the 2:04 pace, it began raining, and the first heat of the 2:13 trot was won by the California horse Carlokin in the midst of a downpour which lasted for ten minutes and necessitated the postponing of further racing until to-day.

W. G. Durfee, the California trainer made a new record by winning every race of the three in which he started. The first he took with Carlokin quite handily, 2:09¾ in the second heat, being the fastest the horse was required to trot. Durfee won the 2:08 pace in the same fashion with Copa de Oro, Mrs. L. G. Bonfilio's handsome son of Nutwood Wilkes. This was a fast race as every heat was below 2:08 and the first in 2:05¾ is another new record for Copa de Oro, who looks like a 2:03 pacer. The third win of Durfee's was with the Zombro mare Zomalta who also took her race in straight heats getting a record of 2:12¼ and beating a field of pretty fair trotters, among them Ed. Geer's entry Kid McGregor, and the California mare Sonoma May, own sister to Sonoma Girl 2:05¼. Durfee has only been racing ten days since his arrival here and has already won over $5000 in purses, and has started against Geers, McMahon, Thomas, Lou McDonald, Benyon and others of the leading eastern trainers.

The three-year-old colt stake was won by the Jay Bird colt Justo, owned by Mrs. J. C. Adams of Phoenix, Arizona. The time was not fast, 2:26 being the best heat.

In the 2:04 pace Kruger, the gelding that H. K. Devereaux rode in 2:12 last year, the world's record for a pacer to saddle, ran away after a collision and was killed. He was scoring in the first heat of the 2:04 pace, carried over from yesterday, when Gallagher went to a break and swerved into him, one wheel of his sulky being knocked off. Kruger ran away, and near the first quarter pole he turned to the inner rail and knocked loose one of the sixteen feet long scantlings which lie on top of the rail fence. The end of the scantling entered the horse's body between the fore legs, and was forced through his belly until four feet protruded. Other than this there was no sensational occurrences, all the races being won in straight heats. The summaries:

Pacing, 2:04 class, purse $600

Citation, br. m. by Norvalson (McMahon)	1	1
John A., ch. h. by Eddie Hall (Geers)	2	2
Gallagher, b. g. (McEwen)	3	3
Mallow, br. g. (Mallow)	5	4
Kruger	4	

Time—2:04¾, 2:04.

Trotting, 2:13 class, purse $1,000:

Carlokin, br. h. by McKinney (Durfee)	1	1	1
Othello, blk. g. (Fairbanks)	2	2	4
Colonel Osborne, br. h. (Nuckols)	6	4	2
Teasel, ch. m. (Geers)	3	3	3

Alice Edgar and Lilly King also started

Time—2:11½, 2:09¾, 2:11¼.

Pacing, 2:08 class, purse $1,000:

Copa de Oro b.h by Nutwood Wilkes (Durfee)	1	1	1
Bonanza, b. g. by Alfonzo (Thomas)	5	3	2
Star Patch, b. g. (McMahon)	8	2	4
Judge Wilson, b. g. (Spencer)	2	5	5

Miss Gay, Shaughrun, Brendo, York and Hal R. also started.

Time—2:05¾, 2:07¼, 2:06½.

Trotting, 2:14 class, purse $1,000:

Zomalta, b. m. by Zombro (Durfee)	1	1	1
Kid McGregor, b. h. by Jay McGregor (Geers)	3	2	2
Brace Girdle, b. m. (McMahon)	2	5	5
Sonoma May, br. m. (Benyon)	5	3	4

Bouquita Boy and J. B. W. also started.

Time—2:14¼, 2:12¼, 2:12½.

Pacing, 2:15 class, purse $2,000:

Hal Raven, h. m. by Hal B. (Snow)	1	1	1
Queen Walnut, ro. m. by Walnut Boy (Taylor)	3	2	4
Alcelia, b. m. (Benyon)	5	3	2
Farmer Boy, b. g. (McDavid)	4	4	3

Dr. Bonney and Bonner also started.

Time—2:08, 2:08, 2:09½.

Mrs. J. C. Adams of Phoenix won the three-year-old stake with Justo, a bay colt by Jay Bird. Fastest heat, 2:26.

Terre Haute, July 16.—Jack Leyburn won the 2:09 trot here to-day in straight heats and earned a world's record for the fastest third heat ever trotted, covering the distance in 2:04¾. The previous record for a third heat was 2:05, made by Sweet Marie in 1905. She still holds the world's record of 2:03¾ for a record heat, made in 1906. In the race won by Jack Leyburn the California horse Sterling McKinney was third every heat. The three heats averaged 2:06, which is a quarter of a second slower than the record made by Alix fourteen years ago, when she won a race in 2:06, 2:06¼ and 2:05¼ over the same track. Durfee started but one horse to-day, Petigru, and it is the first time the California driver has been worse than third since the racing season opened. The summaries:

2:17 pace; $1,000:

Nllinah, b. m. by Lord Shirley (Anderson)	4	2	1	1	1
Woodford, b. h. by Walnut Boy (Taylor)	2	1	2	2	3
Star Patchen, blk. h. (Snow)	3	3	3	3	2
Eddie S., blk. g. (McEwen)	7	4	4	4	4

John Ward, Pender Jr., Edith F., Rex. L., Ding Pointer, Eliza Jane, Flash and Katie Welch also started.

Time—2:05¾, 2:08¾, 2:10½, 2:11¾, 2:12½

2:09 trot; $1,000:

Jack Leyburn, ch. g. by Alto Leyburn (Grady)	1	1	1
Margaret O., b. m. by Onward (Davis)	2	2	2
Sterling McKinney, br. h. (Shuler)	3	3	3

Just the Thing and Petigru also started.

Time—2:07¼, 2:06, 2:04¾.

2:20 trot; $5,000:

Amy Brooks, b. m. by Haxhall (McDonald)	1	1	1
Vendetta, br. h. by Bernadotte (McCarthy)	2	2	3
Spanish Queen, b. m. (Macy)	3	4	2
Fleming Boy, b. h. (Dean)	4	3	4

Loyal and Major Higginson also started.

Time—2:07, 2:07¼, 2:07.

Three-year-old pace; $500:

John S., br. c. by Ira Brand (Thacker)	1	1	1
Catherine Direct, b. f. by Direct (McMahon)	2	5	2
Bartles, b. c. (Benyon)	4	2	3
Clover Patch, b. f. (Snow)	3	4	4

Royal Lancer and Edward T. also started.

Time—2:10, 2:12, 2:15.

2:16 trot; $2,000:

Alceste, br. m. by Jay Bird (Geers)	3	1	1	1
Axtellar, b. m. by Axtell (Thomas)	1	2	3	3
Nancy Royce, blk. m. (McCarthy)	4	3	2	2
Black Silk, blk. m. (Dean)	2	4	4	4

Brother Milroi and True Tucker also started.

Time—2:10½, 2:11, 2:11, 2:13¼.

NEWS FROM THE NORTH.

(Portland Rural Spirit.)

Oregon's first futurity for foals of 1908 filled with about 150 entries.

The Everett, Wash., track is said to be in better condition this year than ever before.

L. B. Lindsey has moved his stable of trotters and pacers to the Albany track where he will train until the opening of the fall circuit.

Charley Rea, of St. Paul, Oregon, has secured the stallion Lord Dillon by Sidney Dillon, and will place him in the stud at this point.

Charles Flanders of Cathlamet, Wash., has bought through H. Osman, agent for J. N. McKay, the black mare Belle Orena by Zombro, dam Orena by Adirondack, price $350.

Homer Rutherford was down from the Fair Grounds this week and reports his horses all in fine fettle. His two-year-old trotter by Monocrat has worked in 2:24, halves in 1:06, quarters in :32.

C. M. Burkhart of Albany, Ore., has a filly colt out of his prize mare Alveta and sired by Stam B. It is a handsome showy colt and Mr. Burkhart has already refused to consider $200 for it.

J. C. Collins, of Independence, Ore., has a fine horse colt by Tidal Wave, out of a Del Norte mare, foaled May 8th. He is much like the old horse in appearance. Mr. Collins is very proud of him and has nominated him in the Oregon Futurity.

There seems to be a "stud hoss" war on at the fair grounds since the arrival of the two McKinney stallions Zolock and Zombro. They are both very excellent stallions, no better in America, and there should be no mud slinging in a race for business between two such grand horses.

James Erwin, the silent man, passed through Portland last week en route to the State fair grounds with Ken West's stable of trotters and pacers, including The Commonwealth 2:14, Satin Royal 2:15½; three-year-old trotter Hilgard by Kalispel; two-year-old trotter, Kitty Wealth by The Commonwealth; Cleopatra 2:19¼ (p); Del Kisbar (3) 2:25. His horses are all in fine trim and Satin Royal he thinks will be a hard one to beat this year.

Star King, Theadore Hennessy's four-year-old gelding, was a sensation at the meeting of the Butte Driving Club last week, negotiating the mile in 2:17½ and loafing much of the way. It was the first time the Larrabee-bred colt had ever appeared in public, and his work surprised even his friends. For more than a year the colt has been driven about town to a cart and Mr. Hennessy has used him like any of his other driving horses. Star King was bred on Brook-Nook Ranche and sold at auction in Butte last spring along with other four-year-olds from the Larrabee ranch. He was sired by Keeler 2:13¼, dam Star Luster, by Alaska; second dam by Robt. McGregor.

THE EEL IS A SLICK ONE.

Writing from Peoria "Marque" has the following to say of a pacer that is being greatly talked about in that section:

"The Eel is the most talked of horse here. You hear him discussed morning, noon and night, and when you see a cluster of men in earnest conversation you can lay a little 3 to 1 that The Eel is the subject matter of the talk-fest. When I shook hands with Mr. Geers, about the first thing he asked was: "Have you seen The Eel " I had not, whereupon he remarked: "That's the fastest green pacer we have seen in years." As evidence of the fact Mr. Geers related that he was driving Mr. Bonny, his Chamber of Commerce candidate, while Lafe Shafer was training Prince A. Rundle the other day, and The Eel simply smothered them in the stretch. Dan McEwen and his slippery steed went away behind the Geers pair and at the three-quarter pole was still three or four lengths astern. Half way down the stretch Mr. Geers heard hoof beats and immediately he and Lafe started to team their mounts. But about that time The Eel had slipped passed them with Dan calmly watching Mr. Geers, who was pulling up one of his best finishes. The Geers pair did their last quarter in 30 seconds (mile in 2:19¼), but all they could see of The Eel when nearing home was his white hind wheels.

For two years I have heard of The Eel and his sensational speed. They have charged him with miles around 2:03 and the like. I found him to be one of the neatest made and handsomest little stallions I ever cast my eyes over. He is of the thoroughbred type, 15.1½ hands, beautifully turned and symmetrically conformed, no corners or angles in his structure, but made to order throughout. He has one of the prettiest heads I ever saw on a horse and his color is a very attractive iron gray, with three white feet. His legs are like steel and all told The Eel seems to have but one fault, he wears the submarine harness. Dan McEwen is a reticent Canadian, not given to handing out exhaustive information regarding his pacer. However, I learned something of The Eel's history from him, although he closed up tightly when he spoke of speed. The Eel is standard and registered (No. 47194), being by Gamboleer, p. 2:22¼ His dam is Belle Bidwell by John L. 16581; second dam Belle, by Banker Rothschild 5747. He was bred by John Gibson, Deerfield, Mich., and was purchased by his present owner, S. W. Entricksen, Tavistosk, Ont., from Joel Bragg, a livery man of Deerfield. Mr. Entricken bought the colt as a yearling for a small figure, and in 1906, when The Eel was four years old, turned him over to Dan McEwen. W. L. Snow informs me that he timed The Eel in 2:04¼ at Syracuse, N. Y., but McEwen says that the best mile he ever drove him that year was one in 2:06¼. The past winter The Eel raced on the ice up in Canada, taking a lot of high class pacers into camp, including Nervolo 2:04¼, and winning, so it is related, a market basket full of money. But while The Eel boom was at its height along comes Charley Dean with Minor Heir, who just rambles an easy mile in 2:04¼, official 2:05¼. So the Canadian had to divide honors with a new speed star, and after Saturday's race there were many who opined that Minor Heir could burn holes in his Eelship, Jerry B., or any of the C. of C. steeds. So far as I could ascertain, The Eel's best mile this season was worked in 2:06¼ at Windsor.

FIX UP THE TRACKS.

Has it ever occurred to the average track manager what a dreary, prosaic, uninviting place a trotting track when no racing is going on is, and what a really beautiful and inviting place it could be made by the aid of a little judicious landscape gardening, a few banks of flowers, some neatly kept grass lawns, a few pretty bushes and a nice pond in the center field, with an automatic fountain with possibly a few waterfowl, swans or ducks to give a little life to the landscape. A track thus kept up, if it has a neat clubhouse, would attract many visitors both before and after the racing season. As a matter of fact the average trotting tracks are most woefully behind in catering to the comfort and convenience of the public, while the innate love of the artistic and beautiful is absolutely ignored. Trotting track managers have not progressed with the times. The best company of actors in the world to-day would not attract a paying audience in a theatre with the wooden benches and the accommodations of thirty years ago. The scenery, the lights, music and all the surroundings must be artistic, yet they are subordinate to the play, which is the attraction. Racing is of course the main attraction at the trotting track, but the public of today want and have a right to ask for modern grand stands with seats as neat and clean as they get at the modern theatre; they will not submit to the wooden benches of a by-gone generation. Once make a sport or pastime popular with the fair sex and its success is assured. The average woman is always looking for the spectacular and the beautiful and the colors that delight the eye. She likes the running races because of the bright silk and satin jackets of the jockeys, the comfortable chairs of the grand stand, the flowers and the lawns, and the music of the bands. There is no reason on earth why our trotting tracks should not be made just as attractive.—Sports of the Times.

Minor Heir, 2:05¼, drew the McMurray No. 15 Perfected Racing Sulky in his wonderful race at Peoria, Ill., July 4th, winning a new record for green pacing stallions in their first winning heat. The time was really better than 2:04, as the time by all outside watches was 2:04½, with the stallion a good two lengths behind the pole horse at the start.

Charlie Dean recognizes the McMurray Sulky as extremely fast, exceptionally stiff, besides being the easiest riding bike he ever used. It runs true.

If any of our readers are figuring on getting a sulky, and want one that will not only make new world's records for their horses, but win the money, we say, get a catalog and full particulars of this sulky from The McMurray Sulky Co., Marion, Ohio. Catalog is free, and the prices are right. All horsemen should have this Catalog.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

ECHOES OF THE GRAND AMERICAN HANDICAP.

[By Guacho.]

Editor Breeder and Sportsman: In 1904 it occurred to me that it might interest some of the readers of the sporting press to know what degree of penalty was imposed on our acknowledged best shots, by increasing the distance at which they were made to shoot in handicap matches, and at tournaments where this system of equalizing, as nearly as possible, men of various degrees of skill are found in competition.

But what gave me the greatest impetus was the erroneous idea, so commonly held by those who do not know, that even a few yards in rise brought our very best shots down to the level of only mediocre ones, so fatal is this narrow gap, when it relates to the work accomplished with the sbotgun at fast moving objects, which present so small a surface to the charge of shot, and the flight of which is so difficult to gauge with speed and accuracy as its ever varying distance increases from the shooter.

The raison d'etre therefore of the accompanying tables is to illustrate beyond peradventure that while our champions occasionally make great scores at such extreme distances in rise as 22, or ever 23 yards yet shoot they never so well, some 16 or 17 yard man is sure to eclipse them, unless by the rarest chance, the shooting he done in a perfect calm and with an absolutely faultless light—when, by accident a long distance man may outshoot himself, to his own amazement, and to the surprise of all who know how remote such an occurrence is.

Experience has taught the writer that the most parsimonious and proverbial stingy men, are the ones who are the most liberal when it comes to giving their competitors the longest distance even if they never give any one else anything, and moveover that those same men are never satisfied with the distance allotted them—so that while they try to make it appear that a long rise does not affect so good a shot as Jones—yet although they are far hetter shots than Smith—the latter should positively toe the same scratch as themselves—and so on ad infinitum.

With these few remarks as an introduction, I will proceed with my task, having in a measure relieved my system of a few pounds of surplus steam—for it has always riled me to hear it said that so short a distance as four or five yards cannot affect a good man's score, when every handicap hy distance ever held proves the absurdity of such a statement—and the fallacy of such erroneous impressions.

As it would be irksome to the reader, and confusing to many, I will not attempt to give in detail what my previous tables have shown, but will merely state that these clearly prove that every yard beyond 16 at which the shooter stands, is equal to deducting from his score one target for every hundred at which he shoots, and under adverse conditions of weather, wind and light may, and does penalize him two or more targets in every hundred. And every yard beyond 20, to any but the cream of the shooting talent, is actually worth more than that, whatever may be said to tbe contrary notwithstanding.

Of course we all know tbat no man can excel in trap shooting who has the least tendency to be a pokey, slow shot, for while such may do well enough on calm, still days, yet the instant he is called upon to shoot in a strong wind his hopes go glimmering, for what with the erratic flight of the target after it has lost its first impetus given by the trap, and the ever increasing spread of the charge of shot, it stands to reason that many targets will sail away untouched, or at least unhroken. Whereas the man who can catch them much quicker has every advantage, even if he has not the ability to point his gun straighter.

Therefore our best shots who know only too well all about this have cultivated such speed in their delivery that although they are placed far beyond the traditional 16 yard line, yet their targets do not often escape through the pattern of their full choke and well loaded guns—and right here it is that the greatest difficulty arises, for the knowledge that they must speed up, often causes them to accelerate their already lightning pace beyond the limit of accuracy and one miss follows another until the match is lost, so fast is the game to-day, so strenuous the competition. When a good steady shot misses a target at 16 yards he invariahly knows the reason—hut put him at 20 yards, and further, and he may miss identically the same kind half a dozen times in his string of 100 and never know what laid the goose egg. Not only that, but to miss and remain in ignorance of the cause is perplexing and annoying and tends to divert one's mind to such an extent that other misses creep in which would never have occurred otherwise.

1 hope I may be pardoned for having gone into the A. B C. of this interesting game, my only apology being that while every prominent and experienced shooter knows all this, and lots more doubtless beyon l my limited understanding. Yet many beginners wi are willing to learn may pick up a grain of information in which case I will feel amply repaid for what I am doing.

Well this year the Grand American Handicap tournament was held at Columbus, Ohio, on one of the most beautiful and suitable shooting grounds it has ever heen my good fortune to behold. The management, as always, devolved on the veteran Secretary, manager of the Interstate Association Elmer E. Shamer, past master, matriculated and absolute dean of the art, and one in whose ahle and willing hands all such affairs are hrought to a hrilliant and most highly satisfactory close. Under whatever stress of adverse circumstances or forhidding conditions, Mr. Shaner comes out smiling and serene, unruffled, unprejudiced, just, albeit a martinet as to rules, and this very quality is what has contributed most to his unparalled success.

This year for the very first time we have had good transportation to and from the grounds—a good clear sky line to shoot into and last, but not least, a first class restaurant where meals were nicely served at a very moderate price, a good clean inviting place, in great contrast to some others that could be mentioned.

The attendance, as might have been expected, was smaller than on some former occasions, that could have been predicted last Octoher and no prophet need have been invoked to do this, because with the general depression which has overcast the country at large in all hranches of trade and industry it naturally followed that many, however much they would like to have journeyed to Columbus, were deprived of the pleasure as funds were too low to permit their making the pilgrimage to their favorite shrine.

On the first regular day Mr. Chauncy M. Powers again demonstrated his superb skill hy scoring 100 straight at 16 yards and 20 straight at 19 yards, when the use of both harrels was permitted. He fired first 120 shots and smashed exactly 120 targets, going through the entire program without a miss. There is no use painting the lily and as to laud this sinewy, seasoned Indian would be doing so, 1 will let his own brilliant achievement speak for itself—adios.

Mr. George Maxwell, who is undoubtedly the greatest one armed shot on earth, performed such wonders that it is difficult to convey even a faint idea of his work by mere words or figures. Suffice it to say, that he actually scored more targets in the regular program than any other shooter and when it is understood that his left arm was amputated at the shoulder, in fact further into the trunk than the shoulder joint, then some idea may be gained of the phenomenal skill possessed hy this quiet and extraordinary marksman.

Mr. C. H. Ditto who won the Preliminary Handicap exhibited a volume of nerve in doing this, as he had to break his last 20 straight to land the trophy—such a statement loses much of its intrinsic value in print, but all those who have had it to do know only too well what kind of a proposition it is to go up against, and how seldom it is done.

Mr. Fred Harlow who won the Grand American Handicap event and who moreover tied in the Preliminary for second and third moneys, shot so well that it is hard to understand why so few knew of his ability before. At any rate, at 16 yards he displayed great skill and for an unknown shooter gave everyone a sensation they will not soon forget. As he did not shoot on the first day I am unable to present his name in my table "A" which I have heretofore always done in the case of the winner of the Grand American Handicap event. At any rate in his particular case this would not be of any value as all of his shooting would have been at 16 yards.

In the Amateur Championship event, all standing at 18 yards, shooting at 200 targets per man, Messrs. George Roll, C. H. Ditto, D. A. Upson and H.. E. Buckwalter tied on 183. On shooting off the first round at 20 on the tie Ditto and Upson fell out, losing 2 targets each against one each by Roll and Buckwalter. On the second string of 20 G. W. Roll gave us a touch of high life by scoring 20 straight and yelling "Pull" like a Comanche Indian at every shot. As Buckwalter lost 2, he lost his hold on the piece of plate and the championship at the same time—but just the same it was a fine shoot off from end to end.

In the Professional Championship, Messrs. Fred Gilbert and R. R. Barber tied on 188—a great score, and Fred gave us one of his old time treats by grinding into dust 20 straight on the tie to Barber's 17. This exploit, in the writer's opinion is a better tonic to Fred than all the medicine he could swallow in a year, and his many friends were delighted to see the Star of the West shoot in his old time form. His speed in this tie was extraordinary, and that coupled with his absolutely faultless precision made this exhihition worth coming miles to see. It was a regular slap hang champion form finish full of dash and hrilliant to an extreme.

Mr. Woolfolk Henderson of Lexington, Ky., shot splendidly and most consistently throughout the entire tournament scoring 490 out of 540 targets, truly a grand performance considering that 200 of these were shot at 19 yards. He tied the winner of the Grand American Handicap event and was only one target below high score in the Preliminary, so it is clear to see his was a great performance. Of course the winning of a prize always carries a certain amount of glamour with it which is perfectly natural and right, just the same it is a great satisfatcion to feel that one has performed so consistently through so long drawn out a struggle and moreover that no other amateur has broken a single target more in all of the events on regular program.

I could not close these remarks without mentioning the name of Mrs. Topperwein who shot through the entire program as no other woman could possibly have done and very few men can he said to-day to be her equals. This charming lady has a grace of manner and personal magnetism that attracts everyone whom she meets, and while at first the crowd of spectators followed her from score to score out of mere curiosity, this feeling soon makes way for one of great admiration at her dexterity and the faultless manner in which she handles ber gun. She asks no favor but stands on her allotted mark, attends strictly to business and can truthfully be said to be the idol of the shooting fraternity. Considering the fact that a wise and highly discriminating handicapping committee (moreover imbued with chivalrous sentiments—of course) placed this plucky, captivating Dinna at 19 yards. proves beyond cavil how high she stands in its estimation. Indeed a greater compliment could never be paid any woman entering these lists, than to ask her to stand at the same distance as that assigned to men of such national reputation as many who are to be found at this tournament in that column. A well known shooter is not at all apt to he misplaced by this committee because some one forming it is almost sure to know where to locate the contestant. It is the unknown quantity who generally creeps in and frequently is advanced a yard or two, simply because it is very difficult to obtain authentic and reliahle information as to his performance. Therefore when Mrs. Topperwein was given 19 yards as her handicap, that distance was accorded her based on her own skill and acknowledged merit, and her scores made all over the country attest as well to her remarkable proficiency as the most expert markswoman of whom we have knowledge; while her amiable and attractive manner and sweet modest disposition have made her hosts of friends and admirers wherever she has been and it affords me the greatest pleasure to have the privilege of saluting her and contributing my mite in singing her praisc. Salut Madame on vous aime et vous admire!

Should any one doubt the wisdom of introducing the shooting at doubles and also permitting the use of hoth harrels when needed in some of the events at these tournaments, all he need do is to observe the interest taken in this style of shooting by the large assembly of spectators eager to view this kind of work. The monotony of seeing five men stand in line, firing shot after shot naturally becomes irksome to the onlooker, for there is absolutely no variation to claim his attention or keep him interestcd in the game. It is pull, bang, dead or lost, from end to end, nothing spectacular, no elan, no spirit, just pull, bang, dead or lost from now to Doom's Day, a good deal of noise, standing room only, no shade, no fun, just squad after squad, day after day. and when all is done a garbled incomprehensible report in the next morning's daily paper leaving the spectator, if anything, still more confuscd and further out at sea.

Please remember this, gentlemen. It is from the spectators that we must recruit our ranks, they need replenishing from time to time and aything that makes the game more attractive is for the henefit of all concerned. So the advent of any new system is to be hailed with delight and while shooting at double targets is hy no means a new departure, yet it has been in disuse so long that this practice has become obsolete. There never has been any good reason for having ahandoned the double rise, for it is obviously good practice, enabling one to gain command of the gun and furthermore, undoubtedly increasing one's proficiency in all game shooting—to say nothing of adding the spice of variety to target shooting per se—therefore it is to he hoped the Interstate Association in returning to first and best principles has established a precedent that will be followed by all well regulated gun clubs.

The accompanying tables, be it understood, are not made up from picked material, but contain the names of twenty men, most of whom are known to the shooting public and trap shooters at large. Moreover the men selected are steady, reliable marksmen as it would be useless to endeavor to gather such statistics from a lot of in and outers who never perform twice alike. Further than this there has been no juggling done with the figures, i. e., the names of the twenty contestants were put on paper and afterwards their figures of merit were noted down. 1 mention these things as it might appear that I had skirmished about to make my tables fit one into the other, hut such was not the case as I did not know how the result would come out until all was done—then I found that it took two targets added to the handicap scores to equal the number hroken at 16 yards.

As will be seen the Roll of Honor is short, comprising only those who have stood their ground, and not heen put in since 1904. Naturally it cannot grow larger, nor is it likely to contract until old age, or the Happy Hunting Ground robs us of our champions all of whom have still the brunt of the fray against all comers, pinning their faith and staking their fame

and coin on their American-made shotguns and ammunition, backed by their own inherent American skill and pluck. Moreover it is a significant fact that ever since its introduction the Professional Championship of America has been won by men using Parker guns and their names and scores are as follows: 1906, Walter Huff, 145 out of 150; 1907, W. R. Crosby, 192 out of 200; 1908, Fred Gilbert, 188 out of 200.

In 1906 the Championship events called for 150 targets and in 1907 and 1908 this number was increased to 200.

It is plain to any unprejudiced and thoughtful mind that these particular events are much harder to capture than any handicap can possibly be, first because they call for double the number of targets and secondly because every contestant stands at the even distance of 18 yards.

Table A—Showing what distance handicap may accomplish.

Note—A, Handicap distances, yards. B, Actual score at 100 targets under handicap. C, Targets added to score, 2 per cent per yard. D, Total after adding allowance of 2 per cent per yard. E, Actual score made at 16 yards. F, Total at all distances, including added targets. G, Championship event, 200 targets at 18 yards.

C. G. Spencer (Highest score beyond 20 yards)—A 22 yards 91. B 91. C 12. D 103. E 97. F 200. G 186.

George Maxwell (Highest score in regular program)—A, 20 yards 91. B 91. C 8. D 99. E 98. F 197. G 187.

W. Henderson (Highest amateur score regular program, tied in G. A. H. event, divided 2nd and 3d money in Preliminary Handicap)—A, 19 yards 92. B 92. C 6. D 98. E 98. F 196. G 175.

C. M. Powers (Scored 120 straigbt, first day, entire program)—A 21 yards 84. B 84. C 10. D 94. E 100. F 194. G 182.

George McCarty (Winner Southern Handicap 1907)—A, 21 yards 88. B 88, C 10. D 98. E 95. F 193. G 170.

L. Barkley (Very prominent and most promising shooter)—A, 22 yards 87. B 87. C 12. D 99. E 92. F 191. G 184.

R. O. Heikes (The old war horse, "Daddy of 'em all")—A, 21 yards 87. B 87. C 10. D 97. E 94. F 191. G 181.

Fred Gilbert (Winner Professional Championship)—A, 22 yards 84, B 84, C 12. D 96, E 94, F 190, G 198.

W. D. Stannard (Very prominent and most promising shooter)—A, 20 yards 84. B 84. C 8. D 92. E 98. F 190. G 168.

W. R. Croshy (Winner Professional Championship 1907)—A, 22 yards 83. B 83. C 12. D 95. E 94. F 189. G 181.

L. S. German (One of the best in the game)—A, 21 yards 84. B 84. C 10. D 94. E 95. F 189. G 176.

W. H. Heer (Winner highest yearly average 1906)—A, 22 yards 79. B 79. C 12. D 91. E 97. F 188. G 186.

H. McMurchy (Once the equal of any man and now not far behind the best)—A, 19 yards 86. B 86. C 6. D 92. E 96. F 188. G 153.

C. A. Young (Scored 95 x 100 Preliminary Handicap, 1908)—A, 21 yards 86. B 86. C 10. D 96. E 91. F 187. G 177.

J. W. Garrett (One of the West's most brilliant shots)—A, 20 yards 89. B 89. C 8. D 97. E 89. F 186. G 179.

George Roll (Winner Amateur Championship, 1908)—A, 20 yards 85. B 85. C 8. D 93. E 93. F 186. G 183.

Ed. O'Brien (Winner on many fields)—A, 20 yards 83. B 83. C 8. D 91. E 95. F 186. G 184.

C. H. Ditto (Winner Preliminary Handicap, 1908)—A, 18 yards 89. B 89. C 4, D 93. E 91. F 184. G 183.

G. S. Lyon (Winner Preliminary Handicap, 1907) and Southern Handicap, 1908)—A, 20 yards 79. B 79. C 8. D 87. E 93. F 180. G 175.

J. R. Taylor (Very prominent and most promising shooter)—A, 22 yards 74. B 74. C 12. D 86. E 90. F 176. G 187.

Total at all distances and allowance—B 1705. C 186 D 1891. E 1890. F 3781. G 3585. 89.62 per cent in Championship event.

Recapitulation—Number of targets out of 2000 scored at 16 yards 1890. 94.50 per cent.

Number of targets out of 2000 scored at handicap distance 1705. 82.25 per cent. Adding two targets per yard beyond 16 yards per 100 shot at, 186 equals 1891. 94.55 per cent.

Difference between targets scored under handicap, plus allowance of two targets per 100 shot at and actual score at 16 yards, 1.

Explanation—Each of the above contestants shot at 100 targets at 16 yards and at a similar number in the Grand American Handicap event at distances varying from 18 to 22 yards. The total number of targets shot at by these 20 contestants is 2000 at 16 yards and 2000 at handicap distances. When shooting at 16 yards they scored 1890 targets. Whereas, when shootlng under their respective handicaps they scored only 1705. By adding two targets for every yard beyond 16 for every 100 shot at the result is an increase of 186 targets to the actual score of 1705, making it reach 1891, which is within one target of the scores made at 16 yards, viz. 1890.

In the Championship figures where such contestant shot at 200 targets at the uniform distance of 18 yards these men scored 3585 out of 4000 shot at or 89.62 per cent.

Table B—Roll of Honor. Showing a relative standing of the only contestants who have shot at 20 yards and beyond ln Grand American Handicap tournaments from 1904 to 1908 lnclusive, scores made hy them at 16 yards rise and also Championship scores at 18 yards 1906 to 1908 inclusive.

Note—A, Yards in handicap events. B, Targets scored in handicap events. C Targets scored at 16 yards. E, Total scored at all distances. F, Grand total shot at, at all distances.

C. M. Powers—1904: A 20 yards—; 21 yards 186; B 22 yards 91. A 277; B 281; C —; D 558; E 600.

Penalty imposed by shooting at 18 yards as against 16 yards, 2.97 per cent.

Penalty imposed by distance handicap as against 16 yards, 5.52 per cent.

Late fishing reports from Clarksburg state that black bass fishing is now excellent, a bit better in fact, than at any time since the season opened. The light winds, which are felt more on the water, are no doubt a great helper. R. Meil brought in one of the largest black bass from Washington lake that has ever been caught out of those waters. It weighed nine pounds after being out of the water twelve hours, in which time it probably shrunk a pound, making its original weight somewhere around ten pounds or more. F. Carrol and party caught 107 black bass in the Sacramento slough, and also six striped bass. The black averaged two and a half pounds each.

Tahoe fishing never was better, at this season, for many years past.

WILD TURKEYS AND THE FISH COMMISSION.

The article in your issue of June 27th headed, "Mexican Wild Turkeys Brought to California," would be very laughable reading were it not for its confessed waste of the sportsmens' money. When Mr. Van Slyke was sent to Mexico to secure these birds for the Fish Commissioners, the writer said that his trip would be a failure. My reasons for this prediction were twofold. First, he went to the wrong section of the country, and secondly he went at the wrong time. If there was anyone connected with the Fish Commission who had any knowledge of the habits and character of gallinacious game birds, the Board would have known that the time to trap turkeys is in the early fall when they first begin to congregate into large flocks, instead of attempting it during the nesting season or just previous to it. Again, at that season of the year the birds are working into the higher mountains, the hens seeking the densest jungles in which to hide away their nests, not alone from predatory animals, but from the gobblers as well, for it is the delight of a gobbler's life to destroy both the eggs and the young chicks. After the hens begin setting the gobblers generally work still higher into the mountains in small flocks. So it will be seen that the possibility of trapping is limited to a few scattered birds and the operation must be conducted in the worst possible country for the purpose. If Mr. Van Slyke had been sent after turkeys in the early fall and to a more suitable section which he would have found about 200 miles to the northeast of where he was, or to Arizona, no doubt he would have been more successful.

Just who furnished the information regarding the few birds he did bring I do not know, but certainly the published account is quite amusing to one who knows the wild turkey. The idea of a bronze turkey or white turkey being considered a wild turkey is somewhat funny. Again, what it described as the "pizon" is in fact the chachalaca, (ortalis vetula maccalli) a member of the cracidae family to which belong the curassows, guans and birds of that kind. The chachalaca has no relationship whatever to the grouse as stated in your article.

The statement that "an expert that has seen the birds that was brought from Mexico, declairs that there are only ten that are genuine wild Mexican birds," is most likely true. Then if there are "7 bronze turkeys and 10 white ones,"—all domestic birds—"five pizons, and a number of chachalacas," and only 26 in all, there can be no wild turkeys in the lot. A pretty commentary on the progress the Commission is making in stocking the State with new varieties of game, and the ability of their manager to get rid of the sportsmen's money without results. No wonder as stated in the article that "the birds are as domesticated as common barnyard fowl," when they have had three and a half centuries experience of domestication. Of course the progenitors of both the bronze and white turkeys were Mexican wild turkeys (meleagris gallopavo) the same as are all other domestic turkeys descended from the native Mexican species, and whether bronze, white or black still hear the peculiar markings of the native Mexican bird. But even so they could have been purchased from our own farmers at much less than $50 each.

Where Mr. Van Slyke made the mistake was in not buying the common dark colored turkeys, common in Mexico, and which he could have got for about $1 each of our money. He would have fulfilled his contract to the satisfaction of the Commissioners, for even their expert (?), who has no knowledge of the subject whatever, wouldn't have known the difference and could then have filled the unsuspecting reporters of the daily press with a good fill on "the excellent work the board is doing." In fact it would have done nearly as well anyhow, for the domestic hen is yet an expert in hiding her nest, and the young, if raised away from civilization, revert to the wild condition of their ancestors in the first generation.

If the Commissioners will send the next man to the Black Mesa of Arizona, they will get more birds and waste less money. Then when they turn what they get loose, if they will turn out two or three tame ones to each wild one they will make some adequate progress for the money expended. Or what is better still, leave the money in the treasury until a future governor shall appoint a board with a sufficient practical knowledge of the subject to handle so important an undertaking.

H. T. PAYNE.

Trout fishing is good now in all the streams of El Dorado county, which is an inducement to many to spend their vacation in this section. There were many passengers for the Lake last week from Placerville. Rupley's line sent out two passenger stages loaded with tourists and one loaded with baggage, while Bert Jones' auto carried a full load of passengers bound for the lake. Travel by way of Placerville is quite brisk at present, many tourists being headed for Lake Tahoe, Silver Lake, or the American river canyon.

According to the expert anglers of Santa Cruz the fishing this year in the San Lorenzo river and Boulder creek is the worst they have experienced in years. They attribute the poor fishing to a too late opening of the season, as all the good fish left the streams in April, the little fish remaining behind.

AT THE TRAPS.

The California Wing Club live bird sboot for July took place on the 12th inst. instead of the preceding Sunday. At this meeting fifteen shooters were at the score. The first event was the club medal shoot at 12 llve birds, $50 added, 3 moneys, high guns.

Nauman, 31 yards, and Schultz, 30 yards, each killed straight. The men in the eleven hole divided the balance of the purse.

Haight, 29 yards, Murdock, 29 yards, Ashlin, 29 yards, and Schultz, 31 yards, each scored clean strings in the afternoon club medal shoot, 12 live birds, $50 added, 3 moneys, high guns. In this race the men with 11 birds were not in the money.

The birds supplied were strong and lively. The day was over-cast and a slight breeze aided a number of birds in eluding the shot patterns.

A number of six bird pools followed the two regular club events. The score summaries follow:

Club shoot—E. L. Schultz, 30 yards, 12 birds. C. C. Nauman 31-12. W. E. Greene 28-11. C. A. Haight 29-11. W. E. Murdock 29-11. A. J. Webb 29-11. P. L. Murphy 30-11. P. A. McRae 31-11. C. J. Ashlin 29-10. E. Klevesahl 28-10. P. J. Walsh 30-9. R. C. Haas 26-9. E. C. Prather 26-9. Dr. D. A. Dollin 27-8. F. Turner 27-8.

Club medal shoot—C A. Haight 29-12. W. E. Murdock 29-12. C. J. Ashlin 29-12. E. L. Schultz 31-12. C. C. Nauman 34-11. P. J. Walsh 28-11. P. A. McRae 31-11. W. E. Greene 30-10. A. J. Webb 30-10. R. C. Haas 26-10. F. Turner 27-10. P. L. Murpby 27-9. E. C. Pratber 27-9. E. Klevesahl 26-9.

Empire Gun Club members met at the Alameda Junction grounds July 12th for the final trap shoot of the club for this season.

The Sweeney record medal was won by M. O. Feudner, who broke 15 straight in the event. C. H. Collier was second with 12 hreaks made at the May shoot, and F. L. Houpt third with a consecutive run of 10 breaks.

This race is an extremely hard one to win—heing a distance handicap continuous break, miss and out match. Starting at 16 yards, hack 2 yards for each 5 consecutive breaks until at 20 yards the shooter has to take douhle rises with 2 yards back for each 5 pairs hroken. From the foregoing it will be readily seen that a run of 15 straight is rather a hard task, but Feudner was equal to it.

C. H. Collier won the championship event for the season and also won first money for the day. Bert Patrick won second, F. L. Houpt third and J. B. Hand fourth.

Tbe two pairs of cuff-buttons offered as additional prizes cannot he distrihuted until it is decided whether F. L. Houpt or Bert Patrick has first choice of these prizes, as the matter now stands, Houpt and Patrick are tied in the event with sixty-eight breaks each. This tie was not discovered until after the grounds had been closed and hoth memhers left for home, but as F. L. Houpt had already entered a protest claiming three hirds that the scorer had marked lost in the May shoot, this must first be decided.

In the open to all event the final scores show F. L. Houpt high gun in the special handicap race, with Patrick second and Collier third. They scored 52, 51 and 47 respectively. Collier could easily have won the event, but by an oversight he failed to make up a back score for the June shoot which he missed in the event, and the total targets broken land him third instead of first.

Club championship race, 25 targets, 16 yards—J. B. Hauer 22, C. H. Collier 21, Frank Houpt 19, Bert Patrick 23, J. Peltier 19, W. Wood 17, Otto Feudner 22, William Price 22, Dr. Stevens 9, C. H. Collier (hack score) 20. The above scores classified contestants for the money match.

Money match race, 15 singles, 5 douhle rises, distance handicap—J. P. Hauer 17, Otto Feudner 18, C. H. Collier 23, Bert Patrick 17, Frank Houpt 22, J. Peltier 16, W. Wood 17, William Price 25, Dr. Stevens 12. Collier won first class money and Houpt second class money.

Billy Price shooting as a guest broke every target, 25 in all, this being the first time since the race was a feature of the club shoot for a number of years now, that a straight has been shot, Price shot Du Pont powder.

Special handicap race, 20 targets, 10 double rises, gun below the elbow at "Pull," 18 yards—J. B. Hauer 9, C. Collier 15, Bert Patrick 11, Frank Houpt 15, W. Wood 7, Otto Feudner 8.

Sweeney record medal—Contestants were privileged to re-enter four times. Otto Feudner 6, 5, 10, 15; W. Price 3, 2; J. B. Hauer, 3, 1; C. H. Collier, 2, 8, 1, 2; Frank Houpt, 9, 10, 7; Bert Patrick 6, 0, 4; Feudner making highest score in this event carried off the medal for the season.

Much of the success that is enjoyed by tlie gun cluhs in Los Angeles and vicinity is attributed to the enthusiastic and willing efforts of that prince of good fellows, "Bob" Bungay of the Crescent Bay Gun Club. At a recent meeting of Southern California trapshooters the following verbal tribute was paid to the Venice sportsman:

"One of the most enthusiastic sportsmen in Southern California is R. H. Bungay. He never shoots under 90 per cent, and is always ready and willing to talk guns or get up in the middle of the night to hunt or fish with any bunch of good fellows.

"And let it be added that there are not five men in the State of California who can give him two birds in a hundred, on a wager without having beart disease."

J. E. Enyart, president of the Medford Rod and Gun Club, has received the following from Frank Reihl of Tacoma, one of the crack marksmen of the northwest:

"Tacoma, Wash., June 27.—Mr. J. E. Enyart, Medford, Ore.—Dear Sir and Friend: How is the Medford shoot project coming on/ The boys are all looking forward to it, and you will have a good crowd. Hope you got the registration this week. I have word from Hip Justins of Frisco that he will surely he there.

"There is another proposition afoot. We are going to organize a hranch of the Indians out here to he known as the Pacific Indians. I thought it would he a good plan to formally organize at the Medford shoot and have suggested this to the hoys. It would he rather nice, I think, to put it down in history that the western Indians, destined to he a big organization, was inspired and formed at the Medford Boosters' shoot."

Frank Reihl was unanimously re-elected scribe of the eastern Indians. The hoys would not listen to Riehl's wishes, insisting that he was too good to lose.

The Medford shoot is hilled for August 13th-14th.

The honor of holding the first registered tournament on the Coast belongs to the Crescent Bay Gun Club of Ocean Park, Cal. The trouhle takes place August 7th-8th-9th. $500 added money, 4 moneys, 25 per cent in each class. Side pool, class shooting, 4 moneys. Side pool; high guns, 60 and 40 per cent. Special event August 8th for those shooting 80 per cent or less. Merchandise event August 9th, 25 prizes For further information address R. H. Bungay, secretary. This shoot should draw a large crowd.

It is very probable that tourney shoots at Santa Barbara, San Luis Ohispo following with a wind up at San Pedro, will keep smokeless powder hurners down south pretty husy next month. This project has heen under way for some little time past and should hring out a large crowd of shooters, many of them new men at tournaments.

J. R. Gorman of San Francisco, actually made the highest score in the four man pistol team contest at Bisley last week. He was the only man entered who used a revolver (Smith and Wesson and U. M. C. ammunition), all the other contestants used target pistols. In the individual contest, one claimed shot was disallowed. This would have put him in first place and made him the world's champion, as it was he won third prize. First and second went to two Belgian marksmen.

Some lively blue rock and live-bird shooting was held at Walnut Grove and Rio Vista July 4th. At the former place A. Brown and J. Fountain, hoth of Walnut Grove, tied for first honors with 42 out of 50. In the shoot-off Fountain won on the sixteenth bird.

"Doe" Stewart, the well known goose shot, distinguished himself at the Rio Vista shoot hy carying off the principal prizes.

Rifle and revolver shooting is gaining ground among Coast sportsmen daily. At the Shell Mound range the Oakland Revolver Cluh shoots are well attended. A revolver cluh was recently organized at Spokane. Down south regular revolver and rifle shoots are held weekly by a number of clubs. The Southern California Rifles, recently formed, has heen an extremely popular organization from the start, their range is at Redondo.

The Salinas Rifle Association, starting with twenty five memhers was organized two weeks ago.

The following were elected officers: Garth Parker, president, Victor A. Porter, vice-president; W. Charlton Smith, secretary; Rohert A. Fairley, treasurer; Clarence Tynan, general manager.

The new rifle corps will furnish Capt. Fnlle with the list of names of members and officers, who will forward the same to Washington, where Uncle Sam's officials will act on the same and in due time the requisition for rifles and ammunition will be forwarded. The Salinas organization will then he enrolled among the memhership of the U. S. sharp shooters.

NOTES FOR SPORTSMEN.

Du Pont Has Largest Average—

Out of a total of nineteen Grand American Handicap tournaments (ten at live hirds and nine at hlue rocks) shooters who used Du Pont Brands of Powder were the winning contestants. Out of over 3,000 competing guns in these American sportsmens' tourneys the Du Pont Powder was the powder used hy nineteen winning guns! This integral fact needs no further argument than this—results that show quality and superiority count.

Good Shooting Guns and Ammunition—

A Remington auto-loadlng shotgun won the Grand American Handicap in 1907 and again this year at Columhus last month.

Manager Elmer Shaner "mustered out" 363 tired "scatter-gun" warriors at the close of the 1908 tournameut. They left the hot, dusty firing-line to "beat it" for the quiet retreat of their homes, but not till the score board had heen carefully searched for the winners' names. The U. M. C. Remington column stood out fat and dull, for the majority of the winners had relied upon U. M. C. shells—4 of the 6 winners had won with them, and the winner of the Grand American had used a Remington Autoloading gun. Here they are: Preliminary Handicap, C. H. Ditto, 95 per cent, U. M. C. shells. Douhle Target event, H. E. Buckwalter, 18-20, U. M. C. shells. State Team event, Illinois Team No. 1, 470-500, U. M. C. shells. Roll, 97 per cent; Illinois Amateur, 95 per cent; Graham, 94 per cent; Young 94 per cent; Willard, 90 per cent. All used U. M. C. Grand American Handicap, Fred Harlow, 92 ex 100—18 ex 20, shoot off—Remington Autoloading Gun. Tom Marshall, twice winner, and George Maxwell, tied for second place with 91 per cent, shooting U. M. C. Amateur Championship, Geo. Roll, 183-200—19 ex 20, shoot off, 3 men tied and next 5 highest all shot U. M. C. And in addition: Highest Amateur and General Averages (regular targets), an Illinois amateur—U. M. C. shells. Highest general average at all targets (handicaps included), George Maxwell—U. M. C. shells. Longest run of tournament, 196 straight, an Illinois amateur—U. M. C. shells.

This makes two wins for the Remington Autoloading gun out of three attempts for the big prize. Mr. Harlow, the winner, said: "My winning of the Grand American was due to the accuracy, safety and easy handling of my Autoloading gun." U. M. C. shells never gave hetter satisfaction. That they enjoy and merit the honest confidence of the shooters is amply proved by the above.—Isn't that enough/

Peters Points—

Peters factory loaded shells won their full share of the honors of the Grand American Handicap Tournament at Columhus, June 22-25; in fact no other ammunition made a more consistent showing. The following shooters all used Peters shells, regular factory loads:

On practice day Neaf Apgar broke 116 out of 120; Leslie German 116; S. A. Huntley 114; H. E. Poston 113; C. D. Linderman 113; A. J. Stauher 113. These gentlemen tied for second, third, fourth and fifth places.

On the first day of the program Wolfolk Henderson tied for second with 98 out of 100; J. M. Hughes and Neaf Apgar third with 97; Harvey McMurchy and H. D. Freeman fourth with 96; L. S. German fifth with 95; F. E. Rogers, H. E. Poston, L. H. Reid, C. D. Linderman, F. D. Kelsey and Frank Foltz sixth with 94.

In the Preliminary Handicap Mr. Wolfolk Henderson tied for second with 94 out of 100, heing but one target hehind the winner. Mr. C. A. Young was high professional, hreaking 95 out of 100 from the 20 yard mark, and tying the winning score. This was the hest score made hehind the 18 yard mark during the entire tournament. Mr. Henderson tied for first in the Grand American Handicap, hreaking 92 out of 100 from the 19 yard mark, losing in the shoot-off by one target to an opponent who shot from 16 yards. Mr. H. D. Freeman broke 90 in the Grand American; B. V. Asher 89; James McVicker and W. A. Fishinger 88.

In the State team event, the Ohio team, comprising George Volk, Frank Foltz, Lon Fisher, W. R. Chamherlain and Jno. A. Flick, won second place by using Peters shells.

These scores under the very difficult conditions which prevailed throughout the tournament, were uniformly excellent, and certainly affords positive evidence of the dependence which may safely be placed in these goods at all times.

Winchester Winnings at G. A. H.—

This great event, the most important handicap on the shooting calendar, was won hy Mr. Fred Harlow, of Newark, Ohio, amateur, from a field of 331 of the best amateurs and professionals in the country. His score was 92 out of 100, and 18 out of 20 on the shoot-off of the tie. Mr. Harlow's triumph places him in the front rank of trap shots, and also again proves that Winchester shotgun shells can be loaded so uniformly and scientifically, that they shoot perfectly under all conditions in any kind of gun.

The first and second places were also won by Winchester.

The professional championship, 200 targets, from 18 yards rise, added more glory to tbe Winchester—the red W standard. Fred Gilbert won the event, shooting Winchester "Leader" shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barher with a score of 188 and 18 in the shoot-off.

In the Preliminary Handicap, Charles Young, shooting a Winchester Repeating shotgun, was high professional with a score of 95 out of 100, from the 20-yard mark.

Ithaca Guns.—

The Ithaca Gun Company, P. C. Department, Ithaca, N. Y., have an announcement in this issue which, no doubt, will interest many of our readers and sportsmen in general. Extra close shooting with even distrihution and goon penetration are essential qualities in a gun. These qualities the Ithaca Guns possess in a high degree, but send for their catalogue and special prices, ranging from $17.50 to $300.

The deer and dove season opened on Wednesday and was the occasion for drawing afield thousands of sportsmen in this State.

FAVORS THE MUTUEL MACHINES.

(The Stock Farm.)

When a bet is registered on a horse for a heat and the driver makes no effort to win, the bettor is cheated out of his money, and when the judges make no effort to prevent the practice of laying up heats, as is usually the case, the association is particeps criminis. If heat betting is absolutely essential on any troting course, it should be done through the medium of the pari-mutuel machine, and no tickets should be sold on the field. In this way it would be very difficult to fix a heat so that sure money could be obtained, unless, of course, a combination was formed and every driver pulled to permit one horse to win. The mutuel machines being inanimate objects can not rush into the paddock and make it worth while for drivers and owners to lay up heats, and for this reason the public that is invited to pay at the gate and asked to support racing could not be robbed of its money, as is frequently the case under present conditions. Racing the light harness horse attracts so many thousands throughout this country and there is such a widespread admiration for the American trotter, that if those in charge of racing can be made to eliminate the evils that now exist it will in the future have many more followers than it can now claim. Never before in the history of the trotter has the same interest been taken in the development of early and extreme speed, in racing for the classics that are offered each year as now, nor has there ever been a better market for high-class horses than is found to-day. Despite the financial condition of the country during the past six months, notwithstanding the legislative assaults that have been made against racing, the American trotter, his production and the development of his speed, have gone on without interruption. No greater proof of the prosperity of light harness racing need be shown than the success of the American Trotting Derby, no greater evidence of the widespread interest in the development of speed can be had than the entry lists of the futurites which have recently closed. Such a great sport, such an important industry, should he protected, and not allowed to be destroyed in order that the gambling element may fatten and thrive. Betting on horse racing is, in the opinion of many fair-minded honorable men, legitimate, and all that is necessary is that it should be restricted. If, however, something is not done in this direction, the whole fabric will be destroyed.

FLEMING BOY 2:07½.

The wonderful mile in 2:07½ shown by Fleming Boy in the third heat of his race at Peoria, Ill., on Monday, makes him the most formidable appearing candidate in the big M. and M. stake at Detroit.

Fleming Boy was purchased hy Charley Dean at Lexington, Ky., as a youngster, for one of his patrons, a Pennsylvania gentleman. He has been very carefully trained and schooled with the sole object of shaping him for the hig stake events, and his Peoria performance would seem to indicate that he is very likely to make good.

He was started once as a three-year-old merely to give him a little schooling in actual racing, and was then held over until this year. He is a five-year-old bay stallion by Camara 31114 by Expedition 2:15¾, dam Lottie Day 2:22½ by Disputant 2:18.

Camara 31114 the sire of Fleming Boy is out of Yuletide 2:28¼ by Lord Russell 4677; second dam Yolande (dam of Yuba 2:24½ and Yazoo 2:27½) by Belmont 64, third dam Young Portia (dam of Voltaire 2:20¼) by Mamhrino Chief II.

Camara is a bay horse, foaled in 1896 and at last reports passed to Cavin & Ferguson of Gallipolis, Ohio.

Lottie Day 2:23½, trotting, the dam of Fleming Boy 2:07½, is a daughter of Disputant 2:18, son of Harold 413, and Debutante by Belmont 64. Her dam is Miss Kendall by Horace Greeley, and she took her record at Lexington, Ky., in 1905.

HORSES IN PARIS.

In Paris, where automohiles went into general use hefore London and New York took them up, there is no talk of the displacement of horses by the motor vehicles. The New York Sun recently called attention to the fact that while New York and London are talking about the displacement of horses in the city streets and the possibility of their final disappearance from the cities through the growing use of electricity and of automobiles, the number of horses used in Paris grows at a rapid rate. The latest enumeration of the vehicles circulating in the French capital shows an increase in horse-drawn carriages for public hire alone of 33 1-3 per cent in eight years. In 17 years omnibuses and street cars have increased almost two and a half times in number. There are now 16,000 carriages for public hire drawn by horses, as against 12,000 in 1900, and the omnibuses and street cars have increased from 845 in 1894 to 2,000. Private carriages drawn by horses number 9,000, merchant wagons 18,700, trucks 40,000, carriages and wagons of the municipality 1,800. Of automobiles in Paris there are 12,000 in private ownership, and there are 2,250 automobiles for public hire. These figures will give encouragement to horse breeders for the conditions noted now in Paris will doubtless be present in London, New York and other large cities in a few years more.

LONG MEETINGS HAVE KILLED THE SPORT.

The gamblers have controlled for several years and have destroyed, or nearly so, the sport in many States, and until new conditions arise, the West at least will hear the hoof beats of the thoroughbred but rarely. Nothing has been so injurious to racing as the long-drawn-out meetings that have destroyed all semblance of sport, have drained the cities from which they drew their patronage, have checked the improvement in the breed of horses and have aroused the antagonism of many righteous men who have determined to eliminate what to them is a dangerous evil. In England where racing the thoroughbred is conducted on a higher plane than anywhere in the world, except France, meetings never last more than four days and as a consequence, no one locality is injured in any way by whatever evils may exist. In Australia, a country larger than this, many meetings are given of short duration and in Canada a movement is on foot looking to this end and if the plans of Secretary Frazier, the most influential racing official in the Dominion, are carried out, racing will be so curtailed that all danger of the disastrous results that have come in the United States, will be avoided. Surely it is a thousand pities that so superb a type as the American thoroughbred should have been the medium through which the birds of prey on the running turf should have grown fat. It is indeed a shame that so truly great a sport should have degenerated into a game, a business and an illegitimate one. Continuous racing has been its bane and has sounded its own death knell, and it would have been well for those in control of racing the thoroughbred to have patterned after at least one of the customs in harness racing and given meetings lasting only one week and changing the scene of operation from one place to another. The short meetings, even if they were followed by long journeys, have been the safeguard to light harness racing and have prevented any possibility of trotting meetings becoming obnoxious to the cities in the communities in which they were given. With all the error of judgment, the mistakes in management that have been made in conducting light harness affairs, trotting meetings have never been in the trail of the serpent—Kentucky Stock Farm.

JUDGES AND AMATEURS.

We have a fashion of looking for a peculiar class of behavior among professionals of all kinds which is not expected from amateurs. Yet most judges who have occasion to preside over professional and amateur competitions declare they would rather judge for the former than the latter class. Not hecause the amateurs in competition are disposed, as a rule, to take undue advantages, but rather because the professional from long service has a better knowledge of the letter and spirit of the laws.

In light harness horse races, infringement of the rules by professional drivers is usually a wilful and vicious violation. With the amateur driver, what he regards as an insignificant violation is the result of ignorance. Conscious of his desire to keep within the law, the amateur dislikes very much to have a starter call him to account, and as a general thing your amateur driver will answer a reprimand with back talk which in most cases would cost the professional a fine.

The good intentions of the amateur driver are all right, but he very often fails to see the ethics of competitive racing as the judge or the rest of the competitors do, and when be does those things which should not be done, he is offended at the starter who calls upon him to desist. For that reason, many good starters dislike to officiate in amateur races.

When a man elects to drive his own horse in a race against other "gentlemen" drivers, he should always bear in mind that the starter is in the stand to protect him and to protect the others who are in the race. The start cannot be made as some one driver thinks it should he made, but must be made according to the starter's idea. His word should be law, and no competitor, be he millionaire amateur or modest professional, has a right to question the starter's directions.

It should be less difficult to start an amateur race than a professional race, as gentlemen who drive their own horses are rated as among the men who work for the integrity of the turf in all things. They should invest their judges and starters with dignity and power. And this they should strive to maintain by correct conduct.

One recalcitrant amateur can make more unintended trouble in a race than the most vicious professional in the land. It is an easy matter to take one out of the sulky. The other, being a gentleman (?) is hard to unseat.

Fortunately, the great majority of our amateur drivers are true sportsmen and give judges and starters little trouble. These should frown a serious frown on any of their club members who refuse by their conduct to help maintain the integrity of amateur sportsmanship.—Chicago Horseman.

The pacing stallion Minor Heir, that took a record of 2:05¼, at Peoria, Ill., last week, was sired by Heir-at-Law 2:05¾, dam Kitty Clover hy Redwald 2:23½, son of Lord Russell, second dam Allista, by Attorney son of Harold, third dam Lady Hollister by Tramp, fourth dam by Green's Bashaw. He had no record until his Peoria race.

Drink Jackson's Napa Soda.

THE ROAN COLOR.

Roan seems to be one of the most tenacious and persistent of all colors in the equine family. When a stallion inherits this color from his dam it is often perpetuated for many generations. Jay Bird and his descendants illustrate this fact quite forcibly. Most of the sons and daughters of Vermont Black-Hawk were either hlack, bay or chestnut, but a roan mare, believed to have been of Morgan descent, was mated with Vermont Black-Hawk in 1842, and the produce was a roan stallion known as Esty's Black-Hawk.

Esty's Black-Hawk got one 2:30 trotter, viz, G. P. Floyd's old favorite the roan mare Lady Franklin 2:29¾. She was also known at one time as Carrie. Lady Franklin 2:29¾ produced two fillies by the bay horse Mambrino Star 2:28½, a son of the brown stallion Mambrino Chief II. One was chestnut in color and known as Lady Frank. The latter was mated with the brown horse George Wilkes 2:22 and the produce was the noted sire Jay Bird 2:31¾, a roan in color, now credited with 118 that have made records in standard time, 106 of which are trotters.

Jay Bird has perpetuated this roan color in some cases for several generations, and these remote descendants are still perpetuating that characteristic which began with some ancestor at least four or five generations prior to Jay Bird. The Year Book shows that 12 of the first 25 standard performers sired by Jay Bird were roan in color. The fastest trotter got by Jay Bird is the roan mare Hawthorne 2:06¼. The fastest trotting son of Jay Bird, however, as well as his most successful one as a sire of uniform standard speed, is the hrown stallion Allerton 2:09¼. The Tramp, by Jay Bird, is a roan horse and he is the sire of the roan colt Trampfast, that last season lowered the world's race record for two-year-old trotters to 2:12¼.

Margrave (3) 2:15½, by Baron Wilkes 2:18, dam Spanish Maiden 2:29¾, by Happy Medium 400, is another instance that shows the great tenacity of the roan color and its ability to dominate over other colors, when the odds are greatly against it. The majority of the ancestors of both Baron Wilkes 2:18 and Happy Medium, for several generations, were bay or brown in color, but Spanish Maiden 2:29¾, the dam of Margrave (3) 2:15½, was roan and so was Spanish Maiden's dam, the great hrood-mare Maggie Keene, by Mambrino Hatcher, a son of Mambrino Patchen 58.

The dam of Maggie Keene was Laura Fair (dam of Keene Jim 2:19¼), and she too was roan in color. Her sire was Rattler, by Stockbridge Chief, a son of Vermont Black-Hawk. The dam of Laura Fair was by President, a thoroughbred son of Kosciusko, by Sir Archy, but her second dam was by a Copperbottom stallion, and it was from this Copperbottom ancestor, sire of the fifth dam of Margrave, that the roan color was passed down to him.

Although Margrave derived only one sixty-fourth of his inheritance from that Copperhottom stallion, the influence from that source was so strong that 12 of the 34 standard performers credited to Margrave in the Great Table are roan in color.

Some writers when discussing the subject of breeding have ridiculed the idea that an ancestor six removes away can have any perceptible influence upon any of the qualities of any animal, but here is a case where the influence of an ancestor that number of removes is so unmistakable that it is apparent to all who are not totally blind. If that characteristic can be transmitted through so great a number of generations the same is undoubtedly true of any other characteristic or quality whether desirable or otherwise.

The roan color is not an objectionable characteristic, but these examples should serve as reminders to breeders that they can not exercise too great care in the selection of their breeding stock hoth stallions and mares, for when an undesirable quality is introduced of whatever nature, whether faulty action, undesirable conformation, unsoundness, a weak constitution or an infirmity of temper it is very difficult to eradicate the imperfection. Its detrimental influence is liable to be felt and manifested for many generations in a greater or less number of the descendants. —American Horse Breeder.

Main interest in the summer meeting over the Hamline, Minn., track centered in the free-for-all pace, which hrought together Lady Maud C., Argot Boy, Echo Jr. and Bill Bailey. The race was between Lady Maud C. and Argot Boy, hut the other two were fast enough to keep close to the leaders all the time, and this made the event doubly interesting. Walter Cox's old Grand Circuit pupil, Argot Boy, had wintered in California, but he was not quite up to beating the game mare that, with her brother, were the sensation of the pacing world last season. In the first heat Argot Boy got off well and held the lead hy ahout a length all the way round. In the second he held the lead until into the stretch, when Walter Palmer asked the mare for a sprint and she heat him from the distance flag home in the fast time of 2:05½. The fractional time of this mile was 0:31¼, 1:03¼, 1:35¾, 2:05½. Argot Wilkes paced the first mile in 0:31, 1:03½, 1:35, 2:06½. These two heats virtually decided the race, for Argot Boy, while going a good race, was not able to head the mare, and she won the next two heats in slower time, 2:07 and 2:08.

The Supervisors of Tehama county have voted $1,000 for the purpose of making an exhibit of the county's products at the California State Fair this year.

THE FARM

CHANGING STALLIONS.

The bane of the horse business and the cause of slow progress in grading up our horse stock is the habit of changing stallions every year, which is so common in many localities. Horse owners should grade up their horse stock just as any other classes of stock should be graded up, by a continual use year after year of sires of the same breed and the same type. Too many farmers, however, breed to a Percheon stallion this year, a Shire stallion next year and a Belgian stallion next year and keep up this indiscriminate mixing in the hope of getting the best possible cross with the result that in the course of time there is no uniformity and no great preference for any of the improved breeds of horses, as one breed will suit one locality and not suit another and the hest specimens of any of the breeds are vastly superior to grades and mongrels. The best stallion that can be bought is not very expensive when his cost is apportioned over a large number of foals every year. After a stallion of a certain breed has been purchased and has been found satisfactory, when his colts come along nicely and seem to grow out into good things it is a very good plan to stick to that horse until a large number of his foals are in the country. Before there is any chance of in-breeding, a new stallion of the same breed should be selected, special attention being paid to pick a horse that is especially strong in points where the former horse may have been weak. This practice should be followed year after year until all the horses in the community are of a uniform type and a uniform breed. Until this practice is followed there can be no great progress in the grading up of the horse stock of the country. Nothing can be gained by indiscriminate mixing of the breeds. When a breed seems to suit a certain locality, the best plan in tbe world is to stick right to that breed and improve the horse stock by using the best stallions ohtainable and saving the best mares for breeding purposes. When this policy is followed it will only be a matter of a few years until that locality is famous for many miles around as a good place to buy high grade horses. Buyers will come to buy mated teams or a carload of blacks or bays or whatever the color may be. The whole community will reap the benefit and it will only be a short time until the farmers in that community find out that grading up pays and the same principles will be applied in grading up the cattle, sheep and hogs until all the stock in that community is high grade or practically pure-bred. Don't mix breeds either in horses or any class of stock kept on the farm.—The Farmer.

—o—

Horace A. Bronson, a cattle breeder of Cortland, New York, who owns 300 head of pure Holstein cattle, believes that the tuberculin test is a fad if not a fake and results only in injury. He says: "Here is a case to prove that tuberculin is inaccurate. I had a very valuable blooded Holstein cow, America II Pauline, which responded to tuberculin when she was two, three, four, five, six and seven years old. Then I sold her. Two years later I bought her back and she was carefully tested by Dr Crawford of Pennsylvania, but did not respond. If she responded at two, three, four, five, six and seven years old, why did she not at nine?

—o—

For about twenty years heifer beef has taken second place to steer beef in Britain as a whole. In certain parts of England, especially from late spring until midsummer, heifers of handy weights and free from waste often command leading price per hundred weight, but given heifers and steers of the Black Polled cross, for instance, fed in the same way, the majority of customers, North and South, prefer the steers on the average.—Glasgow (Scotland) Herald.

SPAVIN CURE

BREAK, TRAIN, WORK or BREED DURING Treatment. "Save-the-Horse"

Will Permanently Cure Under any Test.

THURMONT, Md., June 18, 1908.
Troy Chemical Co., Binghamton, N. Y.:
Gentlemen: Some time ago I ordered of you a bottle of "Save-the-Horse" Spavin Cure. I treated a case of Ringbone of long standing on a black horse I owned aud cured him entirely after a veterinary bad treated him unsuccessfully for six months or more. I am enclosing you check for $5 for which please send me as quickly as possible anotber bottle of "Save-the-Horse." Send under guarantee as before. Very respectfully,
G. D VIGHT HOTT.

A. B. & E. E. FRASER.

HILTON, N. Y., May 8, 1908.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen: Please send us four bottles "Save-tbe-Horse." We bave had good results from it. It cured one borse that it seemed almost impossible could be cured, and now the animal goes perfectly sound, after several veterinarians gave it up. Yours truly, A. B. & E. E. FRASER.

OTSEGO, Allegan Co., Mich., April 20, 1908.
Troy Chemical Co., Binghamton, N. Y.
Gentlemen: The "Save-the-Horse" I bought of Tuttle & Clark, of Detroit, to use on the blood or bog spavin I wrote you about did the work. I am showing up what it did for me and recommending it. Yours truly,
R. MONTEITH.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thorougbpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

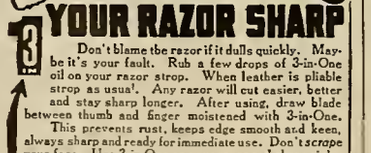
Stallion for Sale.

Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:05½, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13½ and Pinkey H. 2:17. This colt is a beautiful dark cbestnut, witb a great deal of knee and hock action, and in good bands would make a sbow horse. Will castrate him and break to saddle if any one wants bim tbat way. Is a very attractive and stylish fellow.
For prices and other particulars address
Dr. A. De FOE, Box 38, Pleasanton, Cal.



KEEP YOUR RAZOR SHARP

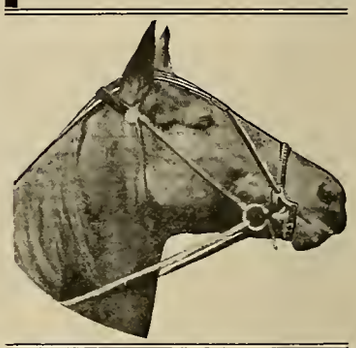
3-in-One

Don't blame the razor if it dulls quickly. Maybe it's your fault. Rub a few drops of 3-in-One oil on your razor strop. When leather is pliable strop as usual. Any razor will cut easier, better and stay sharp longer. After using, draw blade between thumb and finger moistened with 3-in-One. This prevents rust, keeps edge smooth and keen, always sharp and ready for immediate use. Don't scrape your face. Use 3-in-One on your razor and shave right.

FREE Write for liberal free sample and special scientific circular. Try it yourself. 3-IN-ONE OIL COMPANY, 102 New St., New York.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just tbe thing for your road horse, as this device has a neater appearance than an ordinary bit. Witb it you bave perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the borses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct** from us, as **we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged barness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

CURING ALFALFA HAY.

"As to how loug the alfalfa should be left on the ground before raking depends somewhat upon the weather conditions. The hay should be raked as soon as it is well wilted, before the leaves dry. Often alfalfa which is cut in the forenoon may be raked in the afternoon; or a good time to rake is in the forenoon as soon as the dew is on. When the purpose is to cure the alfalfa in the cock it may be raked almost green, allowing it to remain in the windrow until it is cured sufficiently to put into the stack. A great deal of alfalfa is put up in this way, and where alfalfa is grown on a large scale perhaps this is about the only practical way to handle it. However, there will be some loss of leaves by handling alfalfa which is cured in the windrow. If the alfalfa is placed in cocks it will require a considerably longer time to cure than if left in the windrow, but the hay will cure more evenly in the cock and will usually give a better quality of hay, preserving more leaves than when put up from the windrow. If the hay is raked when wilted, and left in the windrow until partly cured and then placed in the cock, probably it should not be stacked within two or three days, and if left for a longer interval it would probably make a better quality of hay, weather conditions being favorable.

"If the alfalfa is put into the cock rather green it will settle and shed the rain fairly well. It may be advisable and profitable in some sections of the country to practice covering alfalfa in the cock. Small canvas covers are now manufactured for that purpose. We have such covers at this station; however, we hardly ever use them except for special experiments. Alfalfa, well cocked, will pass through considerably rainy weather without being badly injured.

It is not possible to lay down any definite rules regarding the putting up of alfalfa. As to just how and when the hay should be handled depends a god deal upon the judgment of the farmer. It requires not only a knowledge of the subject, but experience in doing the work, if one would have the best sucess in putting up alfalfa.

'As regards the condition of alfalfa when it is fit to go into the stack, this general rule may hold good—that the hay should not be put into stack until it is cured to that extent that when a handful of the stems are twisted there will be no appearance of moisture on the broken surfaces. On the other hand, the hay should not be dried until the leaves are shattered and the stems are brittle. The leaves, as you know, contain a larger percentage of protein than the stems of alfalfa, and all precautions should be observed to save the leaves when putting up the hay.

'Also, the leaves may assist in curing out the stems. If the alfalfa is not allowed to become too dry in the swathe or windrow the effect of the stems, thus causing a uniform curing of the hay. When the leaves are quickly dried and shattered off the stems remain green even after long drying, and it is impossible to get properly cured hay put up in this way."—Prof. Ten Eyck.

ANTOINETTE FOR SALE.

The handsome bay mare Antoinette, sound and all right, kind and gentle, and a fast trotter, is offered for sale. She has won at matinees, trotting in 2:21 with very little work. Has worked out in 2:18 and can go faster. A lady can drive her and she is bred well enough to be a great brood mare. Has no record. Her sire is Antrim, sire of Anzella, 2:06¾, and her dam produced Antrima 2:15½, a full sister to Antoinette. She can be seen at the Pleasanton at any time. For any further particulars, write to the owner.

Washington McKinney 35751

At the Breeders meeting to be held on the historic Santa Rosa Stock Farm track, July 29 to Aug. 2, we expect to give standard records to the following sons and daughters of Washington McKinney —only two of which ever had any training until this year:

Belle of Washington, Trial 2:19
Ray McKinney, Trial 2:19
Fabia McKinney, Trial 2:25
Harry McKinney, Trial 2:28¼
Donello, Trial 2:27¾
Rex McKinney, Trial ¼, 34½ seconds
Reed McKinney, Trial ¼, 36 seconds
May Randall, Trial ¼, 34 seconds

and two others we do not now control. We will also reduce the records of Lady McKinney and McKinney Belle, obtained last year. We know of twenty others of the get of Washington McKinney which can be put in the list if trained. This great horse goes East next fall. Breed to him before he goes.

Washington McKinney is one of the handsomest horses in America. He stands 16.1 hands, weighs 1250 pounds, and is in every respect a grand specimen of a highly bred American Trotter.

Will make Season of 1908 at **The Rosedale Stock Farm**

Fee: $35. Return privilege or money refunded. Apply to or address **SAMUEL NORRIS, Santa Rosa, Cal.**

N. B.—Mares can be shipped on Steamer Gold to Petaluma where they will be met and led to Santa Rosa free of charge Good pasturage will be provided for $3.50 per month at owners' responsibility and risk.

PRIVILEGES FOR SALE

Or **E. P. HEALD, Pres.**

Campbell's EMOLLIC IODOFORM Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.
PRICE—25c, 50c and $1.00.
(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)
Jas. B. Campbell & Co., Manufacturers, 418 W. Madison St., Chicago, Illinois.

Sold by all dealers in Harness and Turf Goods. If not in stock ask them to write any Jobber for It.

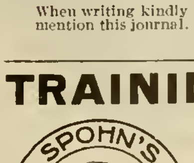
Sire of Gen. Watts (3), 2:06¾; Tom Axworthy, 2:07, and Guy Axworthy, 2:08¾

We have a few weanlings and some breeding stock for sale at reasonable prices

When writing kindly mention this journal. The Empire City Farms, Cuba, New York.

TRAINING DISTEMPER...



Ever hear of this? Yes, of course, you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c, and $1 a bottle; $5 and $10 a dozen Sold by all good druggists, horse goods houses, or express prepaid by manufacturers

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Indiana.

A certain sheep company up in Wyoming has discarded Shropshire bucks a..er several years trial because tbey are not adapted to existing range condi..ions. Much of the range is sandy and when the light fleece of the Shropshire becomes matted with sand the growth of the wook is checked. Many of them did not have more than a nalf inch of wool on their backs this spring. The sand does not work into the heavier fleece of the Merino in this way and Merino hucks will now be used and the black faced sheep gradually weeded out. The wool crop this spring showed that the owners are gradually working back to the ten-pound fleeces with which they started in the sheep husiness.—Denver Field and Farm.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the

BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From lts broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corintbian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. Tbere is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to tbe comfort and enjoyment of the guests of the hotel.

Rates reasonable.

INTERNATIONAL STOCK FOOD CO., Minneapolis, Minn.
CASH CAPITAL $2,000,000 LARGEST IN THE WORLD

M. W. Savage, sole owner of **"International Stock Food,"** and also of "International Stock Food Farm," **positively** Guarantees that His World Famous Champion Stallions, Dan Patch 1:55, Cresceus 2:02¼, Directum 2:05¼ and Arion 2:07¾ and his brood mares and colts eat it every day. You are specially invited to visit this Great Harness Horse Breeding Farm ten miles from Minneapolis, and see the practical results of the every day use of the greatest purely vegetable animal tonic ever used on a farm. It is constantly used and strongly **endorsed by over Two Million of the most up-to-date Stockmen and Horse Breeders** of the world.

THE GREAT ANIMAL TONIC

The Kind That Dan Patch Has Eaten Every Day since 1902 and during this time Dan has broken the world's record **12 times** and Astonished The Entire World with his wonderful condition, endurance and speed. **Try It For Your Horses.** Up to the close of 1907 Dan Patch has paced **10 miles** averaging **1:56** 2-5 and **20 miles** averaging **1:57** 2-5 and **31 miles** averaging **1:58** 1-10 and **82 miles** averaging **1:59** 68-100. These miles were paced over all kinds of tracks and in all kinds of weather. Dan is faster than ever. **Look Out For A Mile In 1:54** during **1908.** The combined records of all pacers and trotters that have ever lived do not equal Dan's record. **International Stock Food** tones up the system, purifies the blood, greatly aids digestion and assimilation and causes animals to obtain more nutrition from all grain eaten. It tones up and permanently strengthens the entire system, keeps stock healthy and saves grain by aiding digestion. It gives more "nerve force" which insures more speed for horses.
It Will Make Your Horse Two To Five Seconds Faster.
We guarantee 250,000 Dealers to Refund Purchasers' Money if it Ever Fails.
NAME THIS PAPER and we will ALSO MAIL YOU **FREE** a Large Colored Lithograph showing Farm, Stable and Fine Pictures of the Four Stallions named above. These Beautiful Pictures are made from life. **YOU WILL BE PLEASED WITH BOTH PICTURES.**

Dan Patch 2:05¼, the Gamest and Fastest green Pacer racing in 1907, has eaten International Stock Food every day for over two years. This remarkable pacer was sired by Dan Patch 1:55, has paced in 2:03¾ and promises to be the Next Two Minute Pacer. Dan Patch 1:55, the champion pacer and Fastest Harness Horse the world has ever seen is proving to be a Wonderful Sire of uniform speed. Watch his list as proof that he is one of the Greatest Sires in all horse history. If you raise a Dan Patch colt you have an Absolutely Sure Winner. **Dana Patch just sold for $10,000.00.** From a Good Mare you may raise a Dan Patch colt that will bring you from **$10,000.00 to $50,000.00.**

ABSOLUTELY QUINN'S OINTMENT REMOVES Curbs Splints Spavins Windpuffs Bunches

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: I have been using **Quinn's Ointment** for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal."

Price $1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

Ithaca Guns

Extra close shooting with even distribution and good penetration, are essential qualities that a gun must possess for the very best success at the traps.

Ithaca Guns have a world-wide reputation for their superior shooting qualities.

"Bob" Edwards, the veteran barrel borer, who first bored Ithaca Guns in 1883, is still at it—his experience at your command.

Every Ithaca Gun is guaranteed in every part—hammerless guns are fitted with three bolts and coil main springs, which are guaranteed forever against breakage, weakness or lost tension.

Send for Art Catalog and special prices; 18 grades $17.75 net to $300.00 list.

METALLIC CARTRIDGES

Any "old hunter" will tell you that

U M C

cartridges work well in every make of rifle. U. M. C. cartridges are used and preferred by "these men of the plains" who were brought up with a gun in their hands. Whether your rifle is Remington, Winchester, Stevens, or Marlin, U. M. C. cartridges are made by cartridge specialists to work well in it.

U. M. C. .35, .32, .30-30 and .25 Rem. cartridges are ready for the .35, .32, .30-30 and .25 Remington Autoloading Rifles which load themselves. U. M. C. cartridges are especially recommended for the Remington Autoloading Rifle, which is the ideal big game gun and big enough for the biggest game.

WINCHESTER Shotgun Shells

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

THE SEASON OF HARNESS RACING for 1908 will open ou this coast at Santa Rosa on Wednesday next when the Pacific Coast Trotting Horse Breeders' Association will begin a program of four days ending on Saturday. The program, which will be found in full on another page, is an excellent one, and all the best horses in training in California are now at the Santa Rosa track and will start during the meeting. It is very hard to explain to eastern horsemen who visit our State in the early spring and see the horses far advanced in training on all our tracks, why the racing season begins here so late. That a country which boasts of eleven months of sunshine during the year should be unable to start harness racing before the middle of July is beyond an eastern man's comprehension, especially when the sport commences in the Dakotas, Ohio, Iowa and Illinois, and even in New England by the 1st of June in spite of the fact that winter lasts in those States well into April. There is only one excuse that can be made for this condition of things and that is the lethargy of association and track managers in California. There is not a track in the State that is kept in condition but has many horses in training every spring, and probably a thousand trotters and pacers in training for speed in California during April and May, a very large proportion of which number are let up on by June 1st, owing to the fact that so few meetings are advertised. Were it not for the energetic and enthusiastic members of the North Pacific Circuit who meet and claim dates in January and anuounce purses in March, harness racing on the Pacific Slope would be of very little significance during the summer. If our California associations had some of their northern neighbors' rustling ability, there would be a Pacific Slope circuit organized that would take in seven or eight tracks in this State in addition to those where meetings are now held and racing would hegin in June and continue until November. Through the efforts of Mr. Ben Benjamin a new meeting has been added to the California Circuit, and will open at Oakland August 8th with a splendid program of racing. This will give San Franciscans' and others residing around the bay an opportunity to see the best trotters and pacers on the Coast, something they have not enjoyed for several years. If the Oakland meeting is successful, and there is every reasou to believe it will be grandly so, there will doubtless be arrangements made for a big fair and harness raciug meeting to be held in Oakland every year. A circuit will then naturally follow, of which Los Angeles, Fresno, Sacramento, Oakland, Stockton, Santa Rosa, Woodland and other mile-track towns would be members. Let us hope this can be accomplished.

——o——

A BRILLIANT SEASON of harness racing is foreshadowed by the performances of the horses at Peoria and Terre Haute, and when the Grand Circuit opens at Detroit next week we may expect some of the most sensational races and fastest time ever seen at the Michigan track. Minor Heir with a record of 2:01 in his second start, is the most talked about horse in the couutry, but Amy Brooks 2:05¼ trotting and Fleming Boy with a record of 2:07¼ trotting in his first start are pretty well forward when the "stable conversation" starts. The list of new 2:10 performers promises to be a large one and that McKinney will be well to the fore is evidenced by the fact that he already has two new ones in this list, Welcome Mack 2:07¼ and Carlokin 2:08¼, with two or three more ready to enter when occasion offers. California horses are already making an excellent showing in the early races. This State continues to breed and send east some of the best winners on the Grand and other Eastern circuits. The outlook is that our horses will win as much money and as low records this year as usual.

——o——

SOME EASTERN PAPERS have stated that Copa de Oro, the name of the fast pacer by Nutwood Wilkes that Will Durfee is campaigning so successfully, means "get the money." While this is what the horse is doing the name is Spanish and means "cup of gold." It is the term applied by the early Spanish settlers of California to the beautiful deep yellow poppies which cover our fields in the springtime and which have been adopted as the California State flower. The boys in Durfee's stable who care for Copa de Oro translated the pacer's Spanish name into "Cop de Dough" and from this the eastern newspaper scribes who are short on Spanish probably got their interpretation of the term.

——o——

AS A BIT OF EVIDENCE to show how popular this crusade against the running race track is becoming it is announced that Governor A. E. Mead of Washington, who is a candidate for renomination, declares that if elected this fall he will urge upon the Legislature the pasage of a law to prohibit gambling on race tracks in any form.

——o——

HORSE SHOW AT FRESNO.

The management of the Fresno County Fair has resolved to have a horse show in connection with the fair during the week of September 28-October 3 and has placed this department under the supervision of J. H. Fisber, who has had experience in this line in Kentucky with fine roadsters and saddle horses. There will be fourteen divisious in this class and the work expected of this department insures an attractive display. At noon on Wednesday of fair week all animals entered iu this class will be on parade. This will include the following classes:

Road and ladies' class for single drivers; road class for pair of driving horses, the horses to be not less than 15½ hands high and shown hitched to a heavy carriage. The saddle class will include three and five gaited horses ridden by ladies or gentlemen, including the combination class, that is, horses to be shown under saddle and then driven to a suitable road wagon or carriage.

In the class devoted to heavy horses there will be delivery horses, single and double and draft horses suitable for heavy draft work, as well as a four-horse work team. The show class will include also the Shetland ponies which will be used with saddle and attached to a suitable rig and handled by children under fifteen years of age.

It is possible that a small show track in front of the grand staud will be constructed to give a much better view of the parade to the spectator. Everything is being done by the management to have a good old fashioned County Fair.

Cresceus 2:02¼, the world's champion trotting stallion, has gone to Russia, and there are but two of his get on this coast. One is a mare owned by C. A. Harrison of Seattle, the other a two-year-old colt the property of Geo. H. Fox of Clements, California. This colt is now at Santa Rosa in Al McDonald's stable. Any person who has seen Cresceus or studied the pictures of the champion stallion will be struck with the wonderful resemblance the head of this colt bears to that of his illustrious sire. While Cresceus is a sorrel and the colt a bay, color is about the only thing in which those heads differ. In conformation, eyes, ears, muzzle, etc., the similarity is remarkable. This two-year-old is out of Silpan by Silver Bow, consequently he is somewhat inbred to Robert McGregor, his second dam is Kitty Fox by Pancoast, third dam by Dictator, fourth dam by Mambrino Time, fifth dam by Paddy Burns and sixth dam by Mosely's Copperhead. His breeding is all right, his looks are the same, and he is good gaited and speedy. He is just getting over an attack of distemper, but it didn't made him very sick and the flesh is on his ribs so that they do not show. Don't look surprised if this colt is a sensational trotter next year. His daddy was the greatest three- year-old that ever lived, taking a record of 2:11¼ in the last heat of an eight-heat race where he won over a field of eight horses in one of the hottest contests ever seen in this country. It was at Fort Wayne, Indiana, and the slowest heat of the race was the first in 2:15¼. Crescus was seventh in a field of thirteen that heat, but was second the next three heats in 2:13¼, 2:12¼ and 2:12¼. His three winning heats, the sixth, seventh and eighth, were in 2:12¼, 2:11¼, 2:11¼. No other three-year-old that ever lived has trotted such a race. Mr. Fox is to be cougratulated on owning a colt by the champion trotting stallion of the world.

——o——

A Los Angeles reporter says that the Zombro two-year-old Volante out of Mamie Elizabeth 2:20 by Red Regent second dam by Chimes, is one of the best ones ever seen at the Agricultural Park track. He is owned by Mr. C. A. Canfield and is being trained by Walter Maben. Volante is a beautifully turned, bright bay fellow with three white ankles, stands 15½ hands, and weighs in the neighborhood of 900 pounds. He wears 7-ounce shoes in front and 4-ounce behind, and practically no boots, aud no rigging of any kind. When in action his trot is faultless and as smooth as oil. He carries a good head and attends strictly to his business, is a close coupled, strongly built colt, with fine head and neck, yet gives a rangy impression. Altogether either on the track or in the stall he commands your attention. He is one of the few that can boast of having seven dams in his pedigree that are standard and registered. Maben broke him last year, and after two months' work drove him a quarter in 36½ seconds. He was then turned out and taken up the first of April this year, and has been working miles around 2:30, with halves as good as 1:08½, and quarters as fast as 33 seconds, a 2:12 gait; but Mr. Maben is not hurrying him, or, in fact, any of his charges, being perfectly content to make speed slowly.

——o——

On July 17th the Western Horseman said: "Millard Sanders has just commenced to put the edge on the Sidney Dillons that he has been bringing along so carefully. They are all going sound and look to be strong and healthy. His derby candidate, Ruth Dillon, trotted a mile in 2:11¼ last Friday and did it cleverly. She will be raced several times before getting to Readville. The pacing mare, Mary Dillon, went a mile a quarter of a second faster, and tbe following trotters worked like this: Martha Dillon 2:17½, Harry Dillon (3) 2:19, Emma Dillon (3) 2:25, Ida Dillon (3) 2:26, Carrie Dillon 2:30.

——o——

CAN'T KILL IT.

Henry T. White says: "Harness racing cannot be killed, no matter what the betting angle may be. Thousands of men who have made money in business and are making more all the time, buy, train, and race horses year after year with the full knowledge that if they have a really high class nag they may pay expeuses, but that 98 per cent of the horse-owning army must quit loser. There are horses from California, Arizona and every other western State trotting in the Illinois circuit right now—dozens and dozens of them—and they are only a drop iu the bucket. Geers is there with his stable, gathered from all parts of the land. Snow is on hand from New York, as is Murphy. Wickersham comes from Tennessee. There are three or four stables from Canada. Over in Michigan another circuit shows precisely the same condition of affairs, one of the best strings being owned by the president of the Amateur Drivers' Club of New York City.

Not one of all these hundreds of horses racing in the West is owned by a professional turfman. Every driver named above, if asked to whom his horses belong, will deal out a list of uames which includes all classes of business men, most of whom do not see their speed nags more than three times during the season. But they want the result of each race by wire as soon as it is over. They are perfectly willing to pay the big monthly bills. If the horse wins now and then it is fine. If he loses all the time the owner digs up a good excuse and writes another check.

"More harness horses are being trained this season than ever before, especially those which look to have class, and in cousequence entries to the events at the principal meetings have exceeded the anticipations of the secretaries."—Rider and Driver.

ALL READY AT SANTA ROSA.

Nearly every stall at the famous Santa Rosa track is occupied and on Wednesday next, when the meetnig of the Pacific Coast Trotting Horse Breeders' Association opens, tbe best horses in the State will be there ready to start in the races which have been arranged.

The track is in fine shape and every one expects the trotting race record to be beaten when the 2:09 trot is over. Dione 2:07¼ holds the track trotting record. but this was made in an effort against time. The trotting race record of the track is 2:10½, held jointly by Phoebe Childers and Diamont, who made their records in different races on the same day during the Breeders' meeting of 1900, and at this same meeting Dioue trotted to her record of 2:07¼ over this track.

The pacing record of the track is 2:04¾ held by Inferlotta, who was bred on the farm where the track is located.

The association has arranged a race for the first day between Sir John S. 2:04½, Mona Wilkes 2:06½ and Moy 2:07¾. This will be a great race and should fill the grandstand. While one can hardly expect these horses to beat 2:05 the first time out, they are all in fine shape and are working well. Mona Wilkes paced a mile in 2:06 at Pleasanton last week, which is the fastest mile ever paced ou that track. The Santa Rosa track is a couple of seconds faster than the one at Pleasanton so look out for a contest that will bring every spectator to his feet cheering for his favorite.

When the race for horses entered in the 2:09 class trot is called on Friday, the third day of the meeting, the old mark of 2:10½ will doubtless be lowered, as tbe entries in this race are Athasham 2:09¼, John Caldwell 2:08½, Wild Bell 2:08¼, R. Ambush 2:11¼, North Star 2:11¼, Era 2:11¼. and Fresno Girl 2:10½, the fastest field of trotters that has ever started in California. This race would attract attention on tbe Grand Circuit, and would be a feature at any of tbe big eastern meetings.

The program of the races, which begin Wednesday next, are as follows:

WEDNESDAY.

Free-For-All Pace.

Sir John S. 2:04½ by Diablo, dam by Alcantara Jr.; W. Vance.

Mona Wilkes 2:06½ by Demonio, dam by Nutwood Wilkes; Southerland and Chadbourne.

Moy 2:07¾ by Prodigal, dam by Clay King; Morris Bros.

2:24 Class Trotting, Sonoma Stakes, $1,000—Eleven Entries.

Lady Inez, b. m. by Nutwood Wilkes, dam Cora by Ira; El Nido Stable.

Judge Dillon, c. h. by Sidney Dillon, dam Eveline by Nutwood; Mrs. L. J. H. Hastings.

Alasandra, b. h. by Bonnie Direct, dam Alix by Nutwood Wilkes; Morris Bros.

Princess W., bl. m. by Geo. Washington, dam Urania by Ky. Prince; Frank J. Kilpatrick.

Wilmar, b. g. by Wildnut, dam Sweetwater by Stamboul; William Michelson.

Wenja, br. m. by Zolock, dam Molocka by Nutford; G. A. Pounder.

The Statesman, b. s. by James Madison, dam Creona by Algona; W. J. Ivey.

Dutch, b. s. by Athby; W. B. Snyder.

Tonopah, b. s. by Billups, dam Elisa S. by Alcantara Jr.; W. L. Vance.

Emily W., b. m. by James Madison, dam Cornelia Rose by Cornelius; Fred E. Ward.

Sidonis, b. s. by St. Nicholas, dam Hagar Wilkes by Nutwood Wilkes; W. H. Williams.

Special Race—Entries to Close Tuesday, July 28. Club Race, Free-for-All Trot.

THURSDAY.

2:30 Class, Trotting, Three-Year-Olds, Sidney Dillon Stakes, $400—Five Entries.

Debutante, b. f. by Kinney Lou, dam Athene by Dexter Prince; V. K. Dunne.

Hy You, br. m. by On Stanley, dam Hyto by Happy Prince; Homer Rutherford.

Bessie T., b. f. by Zombro ,dam Manila by Shadeland Hero.

Don Reginaldo, b. s. by On Stanley, dam Belle Raymond by Raymond; Fred E. Ward.

Nusado, br. s. by Nushagak, dam Addie B. by Dexter Prince; Woodland Stock Farm.

2:15 Class, Pacing, Sebastopol Stakes, $500—Eleven Entries.

Freely Red, b. m. by Red Medium, dam by Bourbon Wilkes; A. G. Dahl.

McFadyen, ch. s. by Diablo, dam Bee Sterling by Sterling; E. D. Dudley.

Kermit, cb. g. by Henry Nutwood, dam Two Minutes by Wildnut; F. E. George.

Memonia, b. m. by Demonio, dam May Norris by Norris; S. H. Hoy.

Queen Derby, br. m. by Chas. Derby, dam Addie Ash by Indianapolis; McGowan & Cuicello.

Rockaway, r. g. by Stoneway; G. A. Pounder.

Silver Dick, b. g. by Geo. McKinney, dam Miss Taylor by A. W. Richmond; L. L. Payton & Sons.

Wanderer, b. g. by Athby; W. B. Snyder.

Salva, b. m. by Dictatus Medium, dam Aunt Sallie by Benton Boy; C. Whitehead.

Fred W., b. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann.

T. D. W., b. s. by Nutwood Wilkes, dam Abaca Calendine by Wilkesdale; T. D. Witherly

FRIDAY

2:25 Class, Pacing, Three-Year-Olds, Chamber of Commerce Stakes, $400—Five Entries.

Lookout, br. s. by Searchlight, dam Bee Sterling by Sterling; E. D. Dudley.

Demonio Wilkes, b. s. by Demonio, dam Laura H. by Nutwood Wilkes; J. B. Nightingale.

Moortrix, b. s. by Azmoor, dam Trix by Nutwood Wilkes; James Sutherland.

On Bly, br. s. by On Stanley, dam Nellie Bly by Woolsey; C. O. Thornquest.

Georgie Z., b. m. by Lynwood W., dam Evangle by Shadeland Onward; J. W. Zibbell.

2:09 Class, Trotting, J. H. Gray Stakes, $750—Seven Entries.

Athasham, b. h. by Athadon, dam Cora Wickersham by Junio; D. L. Bachant.

John Caldwell, b. g. by Strathway, dam Annie; J. C. Kirkpatrick.

Wild Bell, br. g. by Wildnut, dam Bell Bird by Electioneer; F. J. Ruhstaller.

R. Ambush, br. h. by Zolock, dam May Kinney by Silkwood; Homer Rutherford.

North Star, b. g. by Nutwood Wilkes, dam Ivoneer by Eugeneer; C. Whitehead.

Era, b. m. by Zombro, dam Nellie K. by Gen. Grant Jr.; Frank Williams.

Fresno Girl, br. m. by Seymour Wilkes, dam by Richard's Elector; J. W. Zibbell.

2:19 Class, Trotting, F. S. Turner Stakes. $500—Ten Entries.

Monicrat, bl. s. by Woodman, dam Alticrat Jr.; J. J. Breen.

Verona, m. by Nutwood Wilkes, dam by Cal. Nutwood; F. Gommet.

Judge Dillon, c. h. by Sidney Dillon, dam Eveline by Nutwood; Mrs. L. J. H. Hastings.

Lady McKinney, b. m. by Washington McKinney, dam Danville Maid by Daly; Frank J. Kilpatrick.

Irene, b. m. by Martin's Florida, dam Birdie by Altamont; Robert Prior.

Wenja, br. m. by Zolock, dam Molocka by Nutsford; G. A. Pounder.

The Angelus, br. s. by Zombro, dam Hazel Kinney by McKinney and b. m. Laurel Leaf by Stam B., dam Laurel by Nephew; James Sutherland.

Wild Girl, br. m. by Wild Nutling, dam by Geo. Washington; James Smith.

Easter Bells, b. m. by Diablo, dam Elisa S. by Alcantara Jr.; W. L. Vance.

May T., ch. m. by Monterey, dam Melba by Nutwood Wilkes; J. Twohig.

SATURDAY.

2:20 Class, Pacing, Santa Rosa Stakes, $1,000—Ten Entries.

Highfly, b. g. by Nearest, dam Miss Gorden by Bismarck; T. W. Barstow.

Lettie D., b. m. by Boodle, dam Maud by Bertrand; A. M. Davis.

Diabull, ch. g. by Diablo; W. Griswold.

Charlie D., b. s. by McKinney, dam Flewey Flewey by Memo; J. C. Kirkpatrick.

Silver Dick, g. g. by Geo. W. McKinney, dam Miss Taylor by A. W. Richmond; L. L. Payton & Sons.

Mac O. D., b. h. by Zolock, dam Kentucky Bell; G. A. Pounder.

Josephine, b. m. by Zolock, dam Lady May by Newton N.; Homer Rutherford.

Solano Boy, br. g. by Father McKinnon, dam Minerva by Guy Wilkes; C. J. Uhl.

Joe Robin, bl. g. by Robin, dam Lady Lloyd by Sidney; C. H. Widemann.

Explosion, b. m. by Steinway, dam Flash; Fred E. Ward.

2:08 Class, Pacing, Overton Hotel Stakes, $500—Six Entries.

Miss Idaho, s. m. by Nutwood Wilkes, dam by Forest Clay Jr.; D. L. Bachant.

John R. Conway, ch. s. by Diablo, dam Lady Kohl by Le Grande; George Meese.

Moy, b. m. by Prodigal, dam Minnine by Clay King; Morris Bros.

Delilah, b. m. by Zolock, dam Gipsy by Gen. Booth; Homer Rutherford.

Queen Pomona, b. m. by Pomona; E. Thompson.

Diabless, b. m. by Diablo; J. W. Zibbell.

Club Race, Free-for-All Pace,

2:14 Class, Trotting—$500.

Chestnut Tom, ch. s. by Nutwood Wilkes, dam Zeta Carter by Director; Geo. T. Algeo.

Nogi, b. s. by Athablo, dam Cora Wickersham by Junio; Warlow & Warlow.

Della Derby, by Chas. Derby, dam Nora D. by Del Sur; Chas. Whitehead.

Berta Mac, br. m. by McKinney, dam Alberta; W. Parsons.

Queer Knight, b. g. by Knight; F. Williams.

At Mendota, Illinois, on July 8th such horses as Citation 2:03¼ and Hedgewood Boy 2:04¼ started in the free-for-all pace for a purse of $400, over a half-mile track, and they put up a good race. The best time was 2:08¼, breaking the track record half a second. Just imagine a California half-mile track association asking our 2:05 pacers to race for $400. The look the secretary would get from owners would freeze the water in the sprinkling wagon solid.

George A. Schneider of Cleveland will start the horses at Detroit next week and also at Kalamazoo the week following.

SAN FRANCISCO DRIVING CLUB.

With a crowd of at least 2,000 people to see the sport, the San Francisco Driving Club gave a program of five races, all for money purses at the Tanforan track, twelve miles south of San Francisco, last Sunday afternoon. The track was very slow, having a loose sandy covering that was put on especially for winter running racing, and will never make good footing for harness horses. A high wind prevailed during the day which also impeded the horses and prevented them going up to their records. The racing was good, however, and the crowd enjoyed it. W. J. Kenney, President of the club, acted as starter and got the horses off well in every race. The free-for-all was won by Giannini's George Perry in straight heats. In scoring for the first heat of this event, Albert S. stumbled, fell and turned a complete summersault, breaking both shafts of his sulky. His driver, Burton, was thrown clear over the horse's head, but landed on his feet like a trained acrobat and ran back to the fallen horse and held him down until the wreck was cleared. Albert S. was then drawn from the race. Tbe results:

Pace, 2:20:

H. Schottler's King V. (James O'Kane)	4	1	1
J. B. Campodonico's Lucero (Lercari)	1	2	2
H. Boyle's Margaret (H. Boyle)	2	3	3

Time—2:20, 2:25, 2:28.

Belle, Mike Donnelly also started.

Pace, 2:17:

R. P. Giovanoni's Golden Buck (Giovanoni)	3	4	1	1
George Kitto's Deroll (Schwartz)	4	1	3	2
F. E. Burton's Sidney B. (Burton)	1	3	4	4

Time—2:21, 2:21, 2:21, 2:23.

Lady Falrose, Toppy, Schley B. and Harry Hurst also started. Prince D. withdrawn after first heat.

Trot, 2:20:

Charles L. Becker's Charley B. (Becker)	3	1	1
J. J. Butler's Major Cook (Butler)	1	5	3
F. E. Burton's Nico (Burton)	2	4	2

Time—2:21½, 2:23½, 2:25.

Monk, Babe and Hunky Dory also started.

Pace and trot, 2:25:

M. Donnelly's Mabel R. (W. O'Kane)	1	1
Charles Buckley's Queen Eagle (Buckley)	2	2
H. Boyle's Docus D. (Boyle)	3	3

Time—2:25, 2:23¼.

Darby Mac, Chatter Box, Wood Be, Lady Cupid, Hickman Girl also started.

Free-for-all pace and trot:

George Giannini's George Perry (Giannini)	1	1
A. Hoffman's Kitty D. (Hoffman)	2	3
Luke Marisch's Little Dick (Burlak)	5	2

Time—2:17½, 2:18.

Charley J., Byron Lace, Walter Wilkes also started. Albert S. excused.

LAST DAY AT TERRE HAUTE.

Terre Haute, July 17.—The meeting came to a close to-day with the greatest performance ever made by a green pacer. Minor Heir, the bay son of Heir at Law 2:05¾, took the first heat of the 2:25 pace in 2:01½, came back the second in 2:01, and then after losing the third and fourth in 2:05½ and 2:08, settled and won the final heat and race in 2:07. The first two heats are the fastest two ever paced in a race, Prince Albert's heats in 2:02¼ and 2:00¾ having been the record since 1901. There were seven starters in the race, but only three finished. The horse that won the third and fourth heats was The Eel. Gordon Prince won third money, and the California horse, Phoenix, better known as "The Pig," was fourth the first heat, but had a pretty fair view of the anarchistic emblem in the second heat. The results:

2:13 pace, purse $1,000:

Twis G. B., br. h. by Twister (McMahon)	2	1	1	1
Riley Christman, b. g. by Happy Riley (Taylor)	1	2	2	3
Kendig, gr. b. (Snow)	3	3	3	2
Bob Manager, gr. g. (Orendorff)	4	4	4	4

Time—2:09, 2:09½, 2:10½, 2:11¼.

2:18 trot, $1,000:

Moving, b. m. by Red Medium (Patton)	1	1	1
Marvaletta, b. m. by Grand Baron (McDonald)	2	2	4
Redette, blk. h. (McCarthy)	3	5	2
Annette, blk. m. (Murphy)	4	3	3

Fortune and Belle Sprague also started.

Time—2:13, 2:10½, 2:14.

2:25 pace, purse $3,000:

Minor Heir, b. h. by Heir at Law (Dean)	1	1	2	3	1
The Eel, gr. h. by Gambolier (McEwen)	2	2	1	1	2
Gordon Prince Jr., blk. h. (Harrie Jones)	3	3	3	2	3
Phoenix, blk. h. (Durfee)	4	d			

Prince Arundel, Frank Allen and The Emperor also started.

Time—2:01½, 2:01, 2:05½, 2:08, 2:07.

"BEST YET PROCURED."

Mr. Joseph G. McLellan, Indian River, Canada, writes: Received your sample of Quinn's Ointment. Am pleased to inform you it is the best article I have yet procured. I am enclosing $1 for bottle.

For Curbs, Splints, Spavins, Windpuffs and all blemishes use Quinn's Ointment. Money back if not satisfactory. If cannot obtain from druggist or dealer, address W. B. EDDY & CO., Whitehall, N. Y. Price $1 delivered.

Drink Jackson's Napa Soda.

THE WAY OF A TOUT.

At the Benning track the other day, says the Washington Post, a Washington tout—a pretty green one, you'll be saying—got the buttonhole clutch on John Madden and spent five minutes trying to steer Madden onto one of his own two-year-olds.

"The tout didn't know the smartest horseman in the United States from a cake of soap, and he used up a lot of good hot breath trying to tell John what a ciuch Madden's Requital filly, Abandon, was for the next race.

"John let the tout talk. He wasn't busy, and the tout amused him. The tout told him that he was such pals with John Madden that Madden cried like a baby whenever they had to be separated for fifteen minutes or so, and a good deal more like that. Then Algy Dangerfield, the Jockey Club secretary, swung along and addressed Madden by name, and the tout, gasping like a stranded dogfish, took it on the lope for a shadowy corner of the grounds, where presumably he kicked himself some.

"Some of the biggest men in the racing game have had these entertaining encounters with touts who didn't recognize them, and I never met a turfman who didn't get some fun out of these incidents. One day Lucky Baldwin had his pet, Emperor of Norfolk, in a race at Washington Park, Chicago. Lucky figured with so much certainty that his great horse was in, as we say, that he had his commissioners in all of the big cities to get the coin down.

"Ahout an hour before the race the old man strolled up to the bar for a little drink. He was tossing in the drink when Spinner Laflin, a well-known Chicago tout of his day, ambled alougside. Spinner had been in a hospital for several months, and the great Lucky, who'd only been operating on the Chicago tracks for a short time then, was a new one on him.

"'Judge,' said Spinner to Lucky, 'I ain't no slaminsky, but I sure hate t' see good people like you look t' be let a wealthy chanct grease by 'em.'

"'Why,' said Lucky, looking as if he was pleased to be noticed by a person with a pair of field glasses slung over his shoulder, 'do you know something about this race/'

"'Do I know somet'in'?' almost groaned Spinner. 'Why, gran'pa, I'm back down town now, openin' wine on my winnin's.'

"'You don't tell me,' excitedly exclaimed Lucky. 'Well, I declare. You must have some remarakble information.'

"'C'mover here,' panted Spinner, taking Lucky by the lapel of his frock coat and dragging him off to a corner of the bar inclosure. 'Pop, you look right t' me. You look like class and like you'll stik th' route. Lis'nt t' me and git somet'in' f'r yourself.'

"'Indeed I shall!' put in Lucky, playing it along because he enjoyed it.

"'Pop,' went on Spinner, 'd'jevver hear o' that gay ol' maverick that owns 'bout half o' California an' got a mortgage on the rest of it? Lucky Baldwin, I'm spielin' about.'

"'Seems to me like I've heard that name somewhere or other,' said Lucky.

"'Uh-huh. All right,' said Spinner. 'Well, lemme tell you somet'in', gran'pa. If there's anythin' foxier 'n deeper 'n coinier racin' around these groun's than that same ol' shorthorn, Lucky Baldwin, then I'll lap up huttermilk f'r th' rest o' my life an' pertend t' like it.'

"'Is—er—is Mr. Baldwin represented in this race?' inquired Lucky, pretending to be eager to arrive at the point.

"'Is he represented in it?' repeated Spinner, in a tone of pity. 'Is the sun a-shinin'? Pop, he's got a pup in this race that'll be lyin' down poundin' his ear in his hox w'en all th' rest o' them woodchucks is roundin' the far turu. His one's named Emp'ror of Norfolk. The Emp'ror could win this if he had th' shingles, th' housemaid's knee, an' th' bubonic plague all at onct. Go to that one, gran'pa—Emp'ror of Norfolk, pipe th' name—there's all th' 8-t'-1 you can eat—and if he don't come home with th' carrots I'll snag a joh drivin' a truck f'r Marshall Field & Co. and start takin' a husiness course at th' night school!'

"'I really helieve,' said Lucky to Spinner, who was brick-red in the face by this time from the joy of having nailed a live one, 'that I shall follow your advice in this matter. The betting ring seems to be very much crowded to-day, though. Could I ask you to make the wager for me?'

"'Naw, I couldn't think of doin' it,' said Spinner, holding out his hand with a grin for Lucky's money.

Lucky pulled ont a yellow roll of the size of a prize squash and skinned off one of the hundreds into Skinner's mitt. The tout sailed into the ring and found a chalker who was laying 10 to 1 against the Emperor. He bought a ticket reading $1000 to $100 and vamped back to where Lucky was waiting for him at the bar.

"'You hold the ticket, if you please, young man,' said Lucky to Sninner when the tout offered to pass him the ticket. 'I never have any luck holding tickets myself.'

"Then Lucky passed with the tont onto the lawn to witness the race. The horses were on their way to the post. All of the friends of Lucky marveled to see him walking around the lawn and conversing chummily with one of the best known touts around the Chicago tracks.

"Emperor of Norfolk got away from the post on his toes, and when he came down to the wire all alone at the finish he was merely lolling in his boy's lap.

"'Awful poor, ain't I, gran'pa?' gloated Spinner. 'Putrid, ain't I? Didn't know a t'ing about Lucky's ace in th' cistern, did I, or nothing? Wait'll I go get th' kale on this ticket—meet me at the bar,' and the tont dashed for the ring.

"Lucky wandered up the lawn and over to the bar, picking up excited friends as he walked. By the time Spinner got the ticket cashed and reached the bar there was something doing in the bar inclosnre. Abont forty of Lucky's friends had formed a cordon around the old man, and they were dancing an Injun ring-around-rosy around him. The magnums were stacked up on the bar three deep, and the contents of the magnums were for anybody that swung along with a thirst.

"'What's the matter with old man Lucky? He's all right!' the bunch of dancers around Baldwin were howling at ten-second intervals.

Spinner, returning, saw this stuff and halted. He stood at the entrance to the bar for a minute or so, trying to grasp the meaning of the scene, and then the big white light splattered all over him.

"'Gov'nor,' he said, hoarsely, trying to slip the $1100 to Lucky after the cordon had broken up and the jubilant ones were drinking, 'I feel bum enongh. Don't make it any worse. Don't put nobody hep to it, that's all. I ain't asking f'r a 'ting, Gnv'nor, exceptin' please don't put th' gang hep. That'ud be worse'n rulin' me off—I'd never git th' last of th' kiddin'.'

"Lucky smiled. He was always a magnanimous old fellow, and he never was known to intentionally hurt even a stable boy's feelings.

"'In your jeans with the little roll, son,' he whispered to Spinner. 'I've had my fun out of it. I win about ninety thonsaud to the race if my boys got the money down right, and so it's all right. Your conversation saved me from being a heap nervous before the race, and so you're welcome to your bit.'"

ENGLISH HORSEMANSHIP.

A London dispatch says: The horsemanship of the English Life Guards, so long pointed out as a model for some of the armies of the world, seems in danger of proving the same sort of myth as the real bath tub, which, as every American tourist who has discovered England knows, had no existence so far as the traveler was converned, until a French hotel manager here, yielding to the threats of an American, decided to install a few in his hostelry.

In other words, it has been discovered that the English cavalry officers cannot manage their horses with a skill that compares with that of officers of foreign armies.

This has been demonstrated during the last ten days at the International Horse Show, where officers of the French, Italian, Belgian and Austrian armies have given exhibitions of equestrian skill that simply have dazzled beholders.

When his Majesty saw what an exhibition his officers made he was shocked, and it is said on good authority that he sent for Mr. Walter Winans and suggested to the latter that he let the British officers ride some of Mr. Winans' best horses in the contests, and Mr. Winans' mounts have been popular with these officers ever since.

Comments have been freely heard as to the inferiority of native horsemanship as compared with the foreign.

"Good Heavens! Look at them!" one disgusted Britisher was heard to exclaim. "They cannot fight and they can't even ride."

In justice to the English officers it should be said that fancy riding and jumping are not regarded in England as essential requirements of military horsemanship.

WILL RACE AUGUST 9.

The members of the Sacramento Driving Club decided at their last meeting to hold their next matinee meet on Sunday, August 9th, at Agricultural Park, and the preliminary arrangements of the same were given an informal discussion. The success of the last meet held in Sacramento, and the success with which the Sacramento horses met in the Stockton and Chico meets has heen most encouraging to the owners, and has served as a spur to have more such affairs.

The present plan of the club is to have six races on the card for the August meet. There will he the usual class events, and as a special feature it was decided to arrange if possihle an inter-city race, one in which the fastest steppers of Chico, Stockton, Sacramento and other places in the valley are to compete. This will, of course, be the drawing card of the day, for there is much rivalry between the respective owners of the fast speedsters.

A number of committees were appointed by Chairman I. Christy at the meeting, and will take up their duties at once, for it is the intention to make the coming meet the banner one of all. Thomas Coulter, H. E. Sardley and Frank Ruhstaller were named on the finance committee. The by-laws committee was made np of H. C. Pike, Oscar Wilbur, Charles Paine, Dr. E. J. Weldon, J. Wheeler and Charles Silva. Charles Paine will be chairman of the committee for the ribhon parade which the club is to hold at the State Fair, and will be assisted by H. E. Yardley and William Sayres.

Camara, the sire of Fleming Boy 2:07¼, is by Expedition, the same son of Electioneer that sired W. A. Clark's stallion Bon Voyage 2:12¾.

RACING THE HARNESS HORSE.

Some people have never been able to understand how it is that the owner of trotting and pacing horses will pay for the privilege of racing for their own money, and in some cases race for their own money and stand a cut out of it by the race promoters. The running horse people would not do it. They want added money in the stake events, and free purses. They figure that as long as they were giving the show the rare promoters should put up the prizes. If this were not done they would eat each other up through expense bills.

The trotting and pacing horseman sees the matter in the same way, and he also sees that at the present time associations cannot afford to put up the money to be raced for. Still, the light harness horseman races his horses under these conditions year after year.

It is very much like yacht racing. A man who really enjoys the sport will spend several hundred dollars in tuning up his yacht for the sake of the chance to win a cup worth less than one hundred dollars. Yachtsmen, as a class, are sportsmen. They are willing to pay something for their fun. Patrons of the light harness horse turf are sportsmen, too, and where they can affohd it they are willing to race at a loss for the love of the sport.
los for the love of the sport.

However, racing the trotter and pacer in this country is something more than a sport. Back of it all is a big industry, involving the breeding of thousands upon thousands of dollars worth of useful horses.

Viewed from the business point, breeders, who own large stock farms must either race their horses themselves or put them in the hands of sportsmen who will race them. A big farm and a large band of horses of good breeding are not profitable unless the stock of such a farm is backed by performance. Fast sires or dams are necessary. Producing sires or dams are nccessary, and some one mut put the farm product to the test furnished by the race course. So that if a man is a breeder he can fairly charge to his breeding expense account the cost of trying his horse product in public competition. The expense of racing is therefore not all loss to the breeder, for those horses which he breeds and races to a creditahle record reflect the merit of his stock, which swell the sales account. The man who owns a good stallion cannot reasonably expect the public to give liberal patronage to the horse unless he has demonstrated his ability to sire speed. The stallion which is well bred, is of good appearance and has a creditable record himself will be sought after even before he has had an opportunity to demonstrate his prepotency in the matter of speed. But his patronage will be limited until his produce have shown their excellence as race horses. The owner of a good stallion must therefore see to it that the horse's progeny has a chance to race. He must get the progeny in the hands of some sportsman who is willing to race for the love of the thing, or he must race them himself.

As between a horse of individual merit and one which is a good producer regardless of any other individual quality, the producer will find the most favor. Always he must fall back on the race course as a means of demonstration. Our theories of breeding are all very well in a way, but it is the practical results as shown on the race course that fixes the quality of a sire or a breeding farm's stock.

The race coure is a stimulous to breeding the trotter and pacer in more ways than one. People who love to race the light harness horse for the sport of it are constantly looking for new racing material, and when they choose to speculate in young untried horses they measnre their chances of success with a race course rule. The get of producing sires and dams, proven in actual competition, is what they seek. It is ahsolutely necessary, therefore, to maintain the race course as a means of determining trotting and pacing horse quality.

It was the plea of the breeders of thoroughbreds that the running turf was essential to the thoroughbred breeding interests. And it is the contention today that the breeding of the thoroughbred will not survive the fall of the running turf. This is probably true, but in a different sense from what it is regarding the light harness horse. The thoroughhred is produced merely as a racing tool. The trotter would be bred if all the race tracks in the country were closed. He can simply be bred better by the aid of the race track; better for other uses than racing. The relation of the running turf goes no further than the mere breeding of racing tools. With the stopping of racing there is no cause for the breeding of thoroughbreds.

Moreover, the trotter is a national product, and unlike any other animals bred on American soil, he brings money into the country from foreign lands. That is something worth thinking about. Anything we may produce and sell in foreign countries is a national hlessing. In times of national financial distress it is a good thing for the country if we have a few hundred thousand dollars' worth of trotting horses to exchange for foreign gold. If some of our own nice people should bear this in mind they will see another good reason for preserving the light harness horse race course.—Chicago Horseman.

Highball's owner, F. G. Jones of Memphis, is ready to match the gelding against any trotter in the world. As the owners of Sweet Marie, May Earl and several others are reportcd to be of the same mind in regard to their horses, a $10,000 free-for-all trot should fill pretty well this year.

NOTES AND NEWS

Santa Rosa next week.

Breeders' meeting will open Wednesday.

Sir John S., Mona Wilkes and Moy will start in the free-for-all pace.

They will come close to breaking the track record of 2:04¾ held by Inferlotta.

Fred Chadbourne worked Solano Boy a mile in 2:09 at Pleasanton last week.

Minor Heir 2:01, the champion of all green pacers, was educated on a half-mile track.

Henry Helman has driven Freely Red a mile in 2:12 very handily one day last week.

Fleming Boy 2:07¼, the fastest green trotting stallion, also got his schooling on a half-mile ring.

The proposed new speed track in Laveaga Park, Santa Cruz, is being surveyed and will soon be laid out and graded.

Mac O. D. 2:12¼ by Zolock is working well at Santa Rosa and should be able to reduce his record during the season.

Minor Heir 2:01 has worked quarters in 27 seconds and could land well inside the two-minute mark in a trip against the watch.

Pilot, the fast pacer by Abbotsford Jr., owned by Mr. Galindo of Oakland, is rounding to and may start in California before going north.

Alceste Jay 2:09¼, one of this year's new 2:10 trotters, is by Jay Bird out of a mare by Baron Wilkes. Henry Helman's young stallion Alconda Jay is also by Jay Bird out of a Baron Wilkes mare.

Justo, the three-year-old colt by Jay Bird, owned by Mrs. J. C. Adams of Phoenix, Arizona, won his race at Pekin, Illinois, this week and took a record of 2:13¼, the fastest mile by a three-year-old this year.

Al McDonald has quite a string of horses at Santa Rosa, where he located this spring. The majority are colts and fillies that he is getting ready for the stakes of this year and next.

Frank Turner's favorite Guy Dillon is trotting like a real race horse and his owner says can show a quarter in 31½ seconds right now. He will reduce his record this year.

Mart Rollins is training a handsome big bay mare by Lynwood W. that is liable to trot as fast as Charley Belden 2:08½. Mr. Rollins is in good health this summer and does his own driving.

R. Ambush 2:11¼ by Zolock 2:05¼ has grown and filled out since his last year's campaign and Homer Rutherford has him in fine shape for the races this year.

Joe Cuicello worked his mare Queen Derby by Charles Derby a mile in 2:10 after reaching the Santa Rosa track and she looks good enough to win in pretty fast company.

With the free-for-all pace on the first day, and the 2:09 trot on Friday, the Breeders' meeting has two drawing cards that should keep the crowd headed for Santa Rosa during all next week.

Sir John S. 2:04½ reached Santa Rosa on Wednesday of this week looking fit to race right now. He will start on the opening day of the meeting in the free-for-all pace.

Frauk S. Turner, mauager of the Santa Rosa track, gave a bull's head breakfast one day last week which was so greatly enjoyed that he has been asked to repeat it during the meeting next week. It will probably come off Saturday morning.

Ben Walker is at Santa Rosa and will have mounts behind some of the good horses. He will probably drive Silver Dick by Geo. W. McKinney in the 2:15 pace on Thursday.

The Zombros and Zolocks will be dropping into the list at about every Pacific Coast meeting this year. The San Bernardino meeting placed three by Zombro and two by Zolock in the list of new standard performers, a pretty good showing for one small meeting.

The San Luis Obispo Driving Association will give a meeting September 3d. The association is affiliated with the National Trotting Horse Association, and all races are governed by the rulings of that body. Some 65 local horsemen are members of the driving association, and hopes are entertained for a still further increase in membership in the near future.

At the Roseburg (Oregon) horse fair last week there was an exhibition trot for a half mile between Mr. F. E. Alley's Sonoma Boy 2:20, full brother to Sonoma Girl 2:05¼, aud J .H. Cousino's Major B. The latter won the dash by a length. Time, 1:12.

Don't overlook a well bred horse, even though he should not have a record. Camara, the sire of Fleming Boy 2:07¼, has no record, and Fleming Boy is his first standard performer. Camara was foaled in 1896, and consequently is twelve years old. Fleming Boy is a five-year-old.

Birdman, Thomas Ronan's roan stallion, is being talked about a great deal as a sire. Every one of his few colts that have been worked show speed and there will be several of them in the list in the next few years if they are raced. Birdman is by Antrim out of Birdie by Jay Bird.

Almaden (2) 2:22¼, winner of the Breeders' Futurity as a two-year-old and of the Occident Stake as a three-year-old, has closed a successful season at Sacramento and is now at Pleasanton, where C. A. Durfee will work him some this summer, with the idea of having him campaigned next year.

Fred Ward of Los Angeles reached Santa Rosa last Monday. He will be seen in the races with some of the good ones from Los Angeles and San Bernardino and may be erpected to be around the secretary's office when the purses are paid off, as his horses have a habit of getting some of the money at every meeting.

W. C. Hellman is breaking a yearling filly by his stallion Wayland W. out of Hattie Fowler, a daughter of Sonoma Girl's dam. The filly belongs to Sampson Wright of Santa Rosa and is a beauty. Mr. Wright owns a full brother to her foaled this year that he thinks highly of.

Frank Williams arrived at Santa Rosa from Los Angeles last Monday with the southern contingent. He has Era 2:11¼, Queer Knight 2:13½, and several others in his string. Era is lookiug all right in every way and is probably a faster mare than she was last year when she won the California Stake and other good races.

Dick Ables has a handsome big smooth-going black mare by Washington McKinney out of a mare by Secretary at Santa Rosa that is pretty nearly peaches and cream at the pace. He has had her but three weeks and a week ago drove her a mile in 2:22 without asking her for all the speed she had. As one might expect from her breeding, she is a beauty.

Frank Lieginger, secretary of the Stockton Driving Club, is one of the men occupying such a position that knows his business. He gets out a program that is worth something to the spectators. The sire of each horse starting is given if known, together with the name of the horse's owner and also the driver. Other club secretaries can take pointers from Secretary Lieginger.

The track record for pacing work-outs this summer, up to last Tuesday was 2:10¼ held by J. H. Barstow's good horse Highfly by Nearest. Mr. Barstow has never asked Highfly to show his best speed, but has kept him well within himself in all his workouts. This horse could show at two-minute speed last year, and as he looks to be in perfect condition now, there will be something doing in the way of speed when any horse hooks up with him in the races.

Ted Hayes trotter, Allasandro, by Bonnie Direct 2:05¼ out of Alix B. 2:24½ by Nutwood Wilkes, trotted a mile in 2:11¾ in his workout at Santa Rosa last Wednesday. Allasandro will be a starter in the 2:24 class trot on Wednesday next, where he will meet such good green ones as Lady Inez, The Statesman, Wilmar, Emily W., Judge Dillon, Wenja and others. It looks as if this will be a great race.

The Statesman, by James Madison, trotted a mile in 2:13½ at Santa Rosa last Tuesday and came the last half in 1:04 like a stake winner. He was driven by William Ivey, who has given this good green trotter his work this year. The Statesman will be a starter in the 2:20 class trot on the opening day of the Santa Rosa meeting next week and the horse that beats him will probably beat 2:12.

In the heat where he took the world's race record for geldings at Peoria, Highball reached the first quarter in 29¾ seconds, was at the half in 1:00 flat, passed the three-quarter pole in 1:30½ and then began to slow up, the last quarter being trotted in 33¼ seconds, with Highball very tired and stopped to a slow jog at the finish. Margaret O., who was second in this heat, was timed in 2:05¾.

The Latonia, Kentucky, running meeting has closed because it was run at a loss. Pari mutual betting did not enthuse life enough into the game to make it pay. When the Kentucky Trotting Horse Breeders' Association holds its meeting at Lexington next October, however, the same old successful meeting will be held with no betting but auctions and mutuals. The trotting meeting will pay because, being a legitimate sport, it does not depend upon the gamblers for existence, while the running meetings must get their support from the gamblers or go to the wall.

John Quinn is receiving many compliments from horsemen on the appearance and condition of Wild Bell 2:08¼. The son of Wildnut never looked as well in his life as he does now and he stepped a mile at Santa Rosa last week in 2:11, which is the track trotting record for this year's workouts. Wild Bell not only carries more flesh than last year, but has a shiny coat that denotes good health, and is acting well. His trotting action is about perfect in these fast trials, and he carries his speed to the end of the mile. He will be a very hard horse to beat in the 2:09 trot this year.

Nogi 2:17, the winner of all the Pacific Coast three-year-old trotting stakes last year, looks like a very high class trotter. The son of Athablo trotted an evenly rated mile in 2:11¼ at Santa Rosa last Tuesday, and Schuyler Walton could have driven him faster if necessary. Nogi likes to trot the first quarter of his miles at a rapid gait, but no matter how fast he rounds the turn he can then be taken back, and on turning into the home stretch is again ready to show his best speed. These are pretty good traits for a race horse to have. Nogi is in fine shape and looks to be up to almost any sort of race right now.

Fifteen teams and a large number of men are at work at the grounds of the Western Washington Fair Association, on East Madison street, Seattle, where Contractor E. C. Clark is building the half-mile race track and infield to be used during the fair to be held the week of September 7th to 12th. Good progress is being made in the work, and the contractor expects to have the track ready for the use of the association within a month. The officers of the association are receiving inquiries from intending exhibitors in all sections of the State, and it is assured that there will be large and varied displays of Washington's products. The association has become affiliated with the National Trotting Association, which will exercise jurisdiction over all racing events.

A meeting of the directors of the State Board of Agriculture was held in Secretary Filcher's office in the pavilion, Fifteenth and M streets, last week. Many suggestions for pavilion atractions were discussed, also various other matters relative to the fair. It was decided to add two special races to the program of class entries, one to be trotted and the other paced. The races will be mile heats. Any horse that has trotted or paced in a matinee race, and is owned by a member of any driving club, is eligible to entry. If more than three horses are represented, only two will be allowed to enter from each club. The horses must be driven by an amateur. A valuable silver cup will be given to the winners of the first places of each race, and a bronze or copper cup will be given to the winners of the second places.

Charles Holloway is authority for the statement that the polo pony Express, for which Paul J. Rainey paid $3,000 at Van Tassell & Kearney's recent remarkable closing out sale of Foxhall P. Keene's stud, is a straight trotting bred pony, raised on the Kuhn ranch, about one hundred and thirty miles east of Denver, Colo. Mr. Holloway ought to know, for he sold Express to Mr. Keene at Newport nine years ago. The little chap is now fourteen years old. He has been to Europe several times since Mr. Keene bought him, and he was considered one of the best ponies there as well as one of the best in this counthy. Mr. Holloway, who was formerly engaged in shipping range bred ponies from Colorado to the New York market, says that he is going back to his old line of business.—New York Herald.

Ted Hayes has selected a most appropriate name for his colt by Bon Voyage out of Ruth Mary by Directum. He calls him Viaticum, which is defined by Webster as meaning "provisions for a journey," and as the yearling has already trotted a mile in 2:38, last half in 1:15 and last quarter in 35½ seconds, he looks as if he would be able to pay all the expenses of his trip around the country to start in the stakes for 1909 and 1910 in which he is entered. Viaticum is now running out on pasture at Los Angeles, Mr. Hayes giving him that privilege last month right after he had shown that wonderful burst of speed. There is not a blemish or a pimple on the colt, and he has one of the soundest and best collections of legs and feet that can be furnished any colt. Bon Voyage is certain to be a great sire of colt trotters and Viaticum will be one of the first to prove the claim.

W. E. Skinner, vice-president of the National Western Livestock Association of Denver, and until last year general superintendent of the International Livestock show of Chicago, which organization he founded eight years ago, is the moving factor in the work of building up a northwestern circuit of livestock shows, covering ten large cities where shows are held already in a larger or smaller way. The circuit, Mr. Skinner believes, will be in operatiou so as to include the cities which have already interested themselves in the matter, in time for all 1909 shows. M. D. Wisdom, editor of the Portland Rural Spirit, is the father of the idea of such a circuit, so far as Portland is concerned. These are the cities to be taken in: St. Paul, Fargo (N. D.), Miles City or Billings (Mont.), Spokane, North Yakima, Seattle, Portland, Boise, Salt Lake and Denver. Mr. Skinner is greatly impressed with the site, which the local association has secured, declaring that it is absolutely ideal.—Portland Journal.

MINOR HEIR 2:01.

The pacer Minor Heir 2:01, the fastest green pacer that ever started, has plenty of good trotting blood in his veins. His sire is tbe double-gaited horsc Heir at Law that has a record of 2:05¾ pacing aud 2:12 trotting. Heir at Law was sired by Mambrino King and his dam is Estabella by Alcantara. Estabella has produced five in the list and has three sons and four daughters that have produced standard performers. Lady of the Manor 2:04¼ and Princess Helen 2:05¾ are from her daughters. The dam of Minor Heir is Kitty Clover by Redwald 2:23. Redwald is by Lord Russell, own brother to Maud S. 2:08¾, being by Harold out of Miss Russell by Pilot Jr. Kitty Clover's dam is Allista by Attorney, a son of Harold and sire of the dam of Alix 2:03¾, and the next dam is Lady Hollister by Tramp 308, grandson of Hambletonian 10, and the next dam is by Bashaw 50, whose sire was Vernol's Black Hawk aud whose dam was out of the Chas. Kent mare that produced Hambletonian 10. Minor Heir is about as intensely trotting bred as auy horse living.

A story goes with Minor Heir. He was bred and owned until last winter by J. B. Ewing of Jerseyville, Ill., and sent last summer to the Chicago trainer, Charles Dean, to be fitted for racing. He was five years old and bad shown 2:16 only, but Deau had not ridden many times behind him when he decided the horse had the sort of speed from which two-minute pacers are made, and from that day he followed a fixed plan in developing the pacer with that idea in mind. No fast miles were asked of him, 2:11 being his hest, and that in the fall.

During tbe winter the horse was jogged every day, but towards spring fell sick and lost so much flesh that to get him ready to race appeared a hopeless task. He was a good feeder, and to put meat enough on his ribs to stand a hard "prep" and then race was the problem. His diet was made a study. All sorts of green stuff in addition to hay and oats were provided, and "Bob" Bradley, who has been with Minor Heir ever since he was a colt and drove him one season on a rural mail route, attended to the preparation of the feed.

The first feed was given early in the morning, and at 11 o'clock at night the last one, consisting of boiled oats, was prepared. Being a horse of perfect disposition aud manners, Minor Heir did everything in the speed line he was asked to do without seeming to be at his limit. A mile in 2:08¾ over a half-mile track before leaving for Peoria showed Dean he had a 2:05 nag on a fast mile track, and in his first start the horse could have done even better.

Minor Heir is a handsome horse. His stable companion, the trotter Fleming Boy, is in the $10,000 M. and M. race at Detroit, and he won at Peoria in 2:07¼. He has been a half in 1:02 and a quarter in 29 seconds.

Both Minor Heir and Fleming Boy are owned by P. C. Isaacs of Stoyestown, Pa., for whom Dean bought them, paying $3,000 for the trotter as a two-year-old and $4,500 for the pacer.

MATINEE CLUBS PROSPEROUS.

When the powers that be let down the bars a little for the benefit of the matinee clubs there were a great many people who had visions of bad things that would happen to the light harness horse turf. Some of these clubs, it was held, would, in their semi-professional status, turn out to be neither good matinee organizations nor good professional bodies. They would get advantages which would tempt some one to do the things he should not do. In fact, there was to bc au astounding lot of bad come out of the hitherto good amateur clubs. So far this season there has been no sign of a fulfillment of any of these dark prophecies. The matinee racing never was in better shape, nor were the racing clubs ever as busy at this time of the year as they are at present. All of them, so far as is known, are living up to the letter and spirit of the law, and are prospering.

There is no reason why these amateur clubs should not be given the privileges they have received. It is an expensive venture to maintain a race track for strictly private races. If any way can be devised to put a little public money in these private treasuries it will have a good general influence on the harness horse racing spirit. Above all else it will help to build up a constituency that will patronize race meetings of a strictly professional character. Indeed there are many ways iu which the matinee clubs, when given a chance to do so, can popularize the spirit of light harnes horse racing.

When these clubs abuse the privilege given them by the parent organizations it will be time enough to talk about restricting their privileges. Meanwhile the more encouragement we give the amateur clubs the better it will be for the professional organizations and the sport in general.

A COMPLIMENTARY EDITORIAL.

It is generally true that an external remedy that is good for an animal is also good for the human body, and Gombault's Caustic Balsam is no exception to this rule. In fact, we sincerely believe that there is no liniment or external remedy on the market that is as good or as safe and reliable to apply to the human body as Caustic Balsam. We can safely recommend it in all cases where an external application could benefit. It is also cheaper according to cost because it requires very little, and that little is effective.—Editorial "Horse Review," Chicago, July 14, 1908.

Detroit races begin next Monday.

STOCKTON DRIVING CLUB.

In spite of the bot weather which made a seat in the sun very uncomfortable, there was a good attendance at the matince of the Stockton Driving Club last Sunday. The racing resulted as follows:

First race, Class D, mixed—

Jordan, b. h. (trotter), by Monocrome, J. Rowan. (Rowan) 1 1
Genevieve G., s. m. trotter), by Washington McKinley, J. G. Grigsby (Algeo) 2 2
Bud L., blk. g. (pacer), by Daedalion, T. B. Littleton (Johnson) 3 2
Black Beauty ,blk. m. (pacer), by Booth, M. Friedberger (Friedberger) 4 4
Time—2:40, 2:44½.

Second race, Class A, mixed:

Prince A., s. g. (pacer), by Charles Derby, A. B. Sherwood (Algeo) 1 1
Allan Pollock, b. g. (trotter), by Nutwood Wilkes, H. T. Higginbotham (D. Lieginger) 2 2
Bob Iugersoll, b. g. (trotter), by Nutwood Wilkes, F. Lieginger (F. Lieginger) 3 3
Time—2:20¼, 2:22½.

Third race, match for the pacing championship of Lodi—

Wiggler, b. g., by Sidney, Bert Acker (Algeo) 1 1
Alto Jr., blk. h., by Alto Genoa, James Pierano (Pierano) 2 2
Time—2:34½, 2:31.

Fourth race, Class B, pacing—

Bonnie W., blk. m., by Delphi, A. W. Cowell (Cowell) 1 1
Chappo, br. g. by Hawthorne, T. F. Donovan (Donovan) 2 3
Frank C., blk. h., by Gossiper, M. Henry (Henry) .3 2
Time—2:21, 2:26.

Fifth race, Class C, mixed—

Ramus, blk. h. (pacer), by Dexter Prince, Ed Lavin (Lavin) 1 1
Bell C., br. m. (trotter), by Elector, A. Capurro (Capurro) 2 3
Billy D., b. g. (trotter), unknown, H. S. Todman (Todman) 3 2
Modesto Maid (pacer), unknown, W. C. Maneer (Algeo) ....4 d
Time—2.32½, 2:37.

INTERESTING FACTS IN STATISTICS.

There are eighteen mares whose descendants in the first and second generations include 100 or more trotters with records of 2:30 or better, and as their tabulation reveals some interesting facts it follows:

Name.	Produced.	Sons Sired.	Daughters Produced.	Total.
Beautiful Bells	11	225	10	246
Alma Mater	8	220	1	229
Green Mountain Maid	9	200	10	219
Dolly	4	211	2	217
Miss Russell	5	190	11	206
Sprite	4	165	0	169
Gussie Wilkes	2	140	0	142
Beatrice	2	126	3	131
Alley	2	119	4	125
Jewel	2	119	0	121
Columbine	4	106	2	112
Lady Frank	1	108	0	109
Belle Patchen	1	106	1	108
Black Jane	2	103	1	106
Lady Bunker	2	104	0	106
Tackey	3	102	1	103
Lou	1	102	0	103
Nancy Whitman	2	100	1	103

The notable stallions produced by these mares—the best speed siring son in each instance being given, are: Chimes, Alcyone, Electioneer, Onward, Nutwood, Sphinx, Allerton, Prodigal, Wilton, Gambetta Wilkes, Anteeo, Jay Bird, Baron Wilkes, Simmons, Guy Wilkes, Pilot Medium, Axtell, and Robert McGregor. It will be noted that in the way of sires tbese 18 mares have furnished practically all the really great ones of their generation, especially when 2:10 trotting speed is taken as the basis of comparison. Under this test Miss Russell stands at the head, as she is represented by 2:10 trotting speed in the first, second, third, fourth and fifth generations.

AMERICAN BREEDERS.

In a statement made recently, Geo. H. Glover, professor of veterinary science of the Colorado Agricultural College, voices the sentiments frequently expressed in these columns. He says:

"We are annually paying tribute to the genius and foresight of European stock breeders to the extent of several million dollars. We go to Scotland for the Clydesdale horse, to France for the Percheron and the French Coach, and to England for the Shire, etc. This in itself is uot so bad, provided we make the best use of these breeds after we get them. No country on earth has better natural conditions for making and perfecting high class breeds of live stock than this, and yet it is a fact that aside from the American trotting horse and a hreed or two of pigs and chickens, we have uever produced in the entire history of this country one single pure breed of live stock. The Yankee who enjoys the reputation the world over for his keen business instinct has in this respect gianed the unenviable reputation of being the rankest kind of a sucker. We go across the water and pay thousands of dollars for pure bred sires, bring them over here, and thoughtlessly mate them with mares of every known breed without ever a thought of purity of blood or the ultimate establishing of pure breeds at home. All sorts of crosses have been made in this way and the result is that we have a heterogeneous mixture, lacking in uniformity, and a large percentage of them without merit. As a result again of this foolish practice we have a superabundance of horses without any particular qualities of excellence which go on the market as general purpose horses and command the lowest price in every market. Out of this heterogeueous collection of nonenities there are, of course, a few surprisingly good individuals; but the males should never be used for breeding purposes, as they lack in prepotency, or power to transmit their desirable characteristics to their offspring. The mares may be profitably bred, but always with the view of grading up by successive top crossng with pure bred sires of the same breed. Five such crosses are supposed practically to obliterate the native blood, and according to some of the stud books, produce what is known as pure bred horses. In general our farmers are quite particular about the breed and points of excellence of the horse used as sire, but the mistake has been in not persisting in using sires of one breed and of equal excellence until purity of blood, a greater degree of prepotency, and a uniform excellence of offspring are secured.

NEWS FROM THE NORTH.

(Portland Rural Spirit.)

Hal B. with 16 nominations in the Oregon Futurity leads all other sires; Tidal Wave is second with nine of his colts entered.

There will be no pool selling on the races to be held in Portland this fall. Portland has no State aid, but they expect to make the game self-supporting.

A. C. Lohmire wants to buy a nomination in the Transylvania for his trotter Red Skin 2:16¾. Charley thinks he will do to step along in front of the good ones this fall, and a trip to Lexington would be a good outing for him. This is no blacksmith dream.

When the Oregon State Fair made a success of harness racing without pool selling the "wise oues" said it was because the State Fair received State aid and no place could afford to cut out betting unless they received an appropriation. Watch Portland this fall.

The Portland Country Club is arranging for a chariot race this fall over their new grounds. H. C. Campbell, Julius Meier, Dr. Emmett Drake and G. A. Westgate have consented to drive. It is thought this race will be equally as thrilling as the head-on collision between two steam engines.

Wm. Jones of Reno, Nev., arrived at Portland recently, where he will make his headquarters. He brought with him two standard bred mares, Trixy by Brino Trix, dam Nettie M., by Singletou; Fanny Nixon by Rimac, dam by Brignolia; also the thoroughbred stallion Gold Quartz by Rey del Sierra, son of Joe Hooker, dam Ogzella by Norfolk.

HIGHEST CLASS RACES.

One of the most difficult racing problems tbat associations have to deal with is the bringing together horses of the very first class. A race between trotters which are regarded as being able to trot in 2:05 is a most desirable attraction. On paper it always looks to be a simple matter to bring a field of such horses together. All that appears necessary is the courage to offer a big enough purse. When it comes to the doing of this thing it is not quite as simple as it looks to be to bring it to a successful issue. Something happens before race day to cause witbdrawals and in the end the race is either declared off or else the public is treated to a race that is in uo sense a contest.

We have just had an example of this kind at Readville, when after providing a free-for-all of unusual interest, it was found necessary to declare the race off because one of the entrants was withdrawn. A good race was thus spoiled, and the association that tried to promote it is out a good bill of costs.

The public desires, above all things, witb regard to racing, to have the privilege of seeing the horses of championship class in a struggle for supremacy, and associations are justified in making an effort to satisfy this public demand. But experience has shown that it is rather an unprofitable undertaking.

It would appear, judging from past experiences, that the most likely way in which to bring these highest class horses together would be to make the race a good stiff sweepstake affair, with added money by the association giving the race. With a large forfeit at stake, those who nominated for the race would be likely to stay until it was absolutely necessary for them to declare out. Their forfeit would be acceptable to those who remained in.—Chicago Horseman.

The Horse Review says of Zomalta's Peoria race: "Zomalta, the green trotting mare in Durfee's stable, had she not been overlooked by the judges, would now have a record of 2:11¼, as she beat Mochester nearly a length in the first heat of the 2:30 trot. It was the old story of a high judge's stand and Zomalta finishing directly beneath it. Zomalta is easily a 2:10 trotter and I call her one of the handsomest mares now racing. By the way, she wears a "W" check, a device in common use ten years ago, but not seen on the big ring for several seasons."

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

A FISHERMAN'S REVERIE.

Ere the evening lamps are lighted,
And, light phantoms grim and tall,
Shadows from the fitful firelight
Dance upon the parlon wall,
Then the forms of the departed
Enter at the open door—
The beloved, the true-hearted,
Come to visit me once more.—Longfellow.

I sit alone in my study, save for the presence of my books, while without the wind dashes the rain against the reeking window pane. Now and then the house trembles beneath the fierce onslaught of the wind, and I find myself thinking compassionately of the poor unfortunates who are compelled to be abroad upon such a night. The glow of "the fitful firelight" lights hut a corner of the room, while all the rest is shrouded in semi-darkness. Rods, guns, and trophies of the chase adorn the walls above the hookcases. The very rug beneath my feet graced the back of a magnificent buck a year ago, and his head, properly mounted, adorns the dining-room downstairs. I felt a feeling akin to pity when he went crashing to his knees at the second creck of my 30-30 Winchester.

Faces of friends, too, help to adorn the walls, and they flash out, silhouetted against the blackness when the fire burns brightly. There, in that flash, I caught a glimpse of Hugh's face. Better friend man never had than honest John. I well remember when he and I were camping. It was years ago (we were students at the university then, and young and tender.) Our tent was pitched on Wolf river flats, and before morning a million, more or less, mosquitoes had gathered in that tent, and sleeping was out of the question. I remember with what fiendish delight I listened to John, when along in the wee sma' hours he groaned out, "Hell! is this what you call fnn?" Perhaps one reason why I enjoyed his remark was because I was studying for the ministry, and such lurid language was denied me. We were up before the lark that morning, bathing our swollen faces in the river. John caught two large black bass, and I nothing but rock bass. Oh, the irony of Fate! Back at the tent before 5 o'clock, we tried to wax enthusiastic over Nature's symphonies, but it was a dreary fizzle, and I think we were both glad to

Homeward wend our weary way.

But, John, if you will come back from the blizzardy West, I will give you an outing in a mosquito-proof tent; and—yes, I will not kick if you catch large black bass and I only measly little "rockies."

A terrific burst of wind seems almost to lift the house from its foundations, while all the windows ratle like the bones of an articulated skeleton. Somewhere downstairs a door bangs gloomily waking all the echoes. I rise and poke the fire viciously until it burns up brightly in protest and by its light I walk over to the desk and take from a familiar drawer a bunch of well-thumbed photographs. A hundred times have I looked at the, and they grow more precious with the speeding of the years, for they bring freshly to mind pleasureable incidents. Ere I return to my seat by the fire I step to the window and try to peer into the blackness outside, but can only see the pearly raindrops chasing one another down the pane. I hasten back to my Morris chair by the fire, and with a sigh of great content sink into its luxurious depths.

The first picture shows a man upon his knees on the brink of a little creek, trying to disengage a snagged hook without alarming the trout in the pool below him. At a glance one knows that the time is early spring, for the baby leaves have not yet concealed the harsh life of limb and branch. Well do I know the stream, for in all of God's out-of-doors there is not a wilder, more tangled, or harder stream to fish than that little northern Wisconsin creek. Ah! how vividly the events of that day come back to me, even to the minutest detail. That was the day Guy and Hattie visited the stream with us. Guy (or was it Hattie?) had never seen a trout; anyway, Guy had never angled for the sly beauties.

I remember that I watched Guy with a great deal of interest that day. The stream, not more than three feet wide and shallow in most places, was full of snags, while overhead the low-hanging vines and creepers reached out hooked fingers to catch our short lines. Guy led off, while I stood meanly in the background, waiting for the inevitable to happen. It happened soon. Drawing some six feet of line from his reel—to much by four feet for that water—he approached the litle stream with all the stealth of an Indian and dropped his baited hook into the bit of liquid silver. Zip! A trout had the worm almost before it touched the water, and was away with the speed of a falling star. Guy frenziedly jerked his line, but, of course, was several seconds too late—setting his hook hard and fast in a cedar log. Disliking to disturb the pool, he deliberately severed his line and fastened on a new hook; then, having shortened his line somewhat, he cast again. If my camera could have recorded the comical look of comingled expectancy, desire, fear and anger, I am sure that my fortune would have been made right there. His second attempt resulted like the first, save that he did not lose his hook. He drew the back of his hand across his perspiring forehead and shot a sheepish look in my direction, but I pretended to be engaged with a refractory reel. Then a Leonidas-like look of grim determination o'erspread his mobile countenance, and, shortening his line to about two feet, he dropped the hook into the water with an I'll-get-you-this-time air—and he did. He had learned his lesson. While he stood, his soul in his eyes, admiring the beautiful fish, I stepped up and offered congratulations.

That Shawano county brooklet was a hard stream to fish all right. Perhaps some sportsman will think two feet of line barbarous, but let him fish that stream or one like it, and I think that he will say it requires more skill to land a trout under such conditions than it does to land a three-pounder in the deep waters of the West Branch. Some men never could fish the stream—"baby fishing," they contemptuously dubbed it; but for four years I fished the haby brook, when the Red Gods would permit, and I learned to love its tangled banks and violet-environed pools. It is more than five years now since I followed its whimsical meanderings, yet this photograph brings it all back to me as I sit here by the fire tonight. The same heavy fragrance of the dogwood seems to assail my nostrils that filled the air five long years ago.

When I lay the photograph tenderly down I again become conscious of the roistering wind and heating rain. All the mad spirits of the air seem loose tonight, rioting ahout the house with devilish glee. I start to my feet when a brick loosened from the chimney by the wind strikes the roof and goes bounding down the shingles. "You must be getting nervous, old man," I mutter to myself, and poke the fire until it flames up again, driving the bovering shadows back to the far corners of the room. For a few moments I sit with elhows on knees, chin in hands, gazing into the dancing fire; then I sink contentedly into the chair once more and pick up two photographs pinned together.

It is a far cry from the Shawano county stream to Pine river in Waushara county, but distance and time are as nothing to the mind. Immediately nine years and a hundred miles have vanished, and I am back living those scenes over once more. The Pine river—sweetest, best and most loved of all Wisconsin's trout streams! God must have laughed for very joy when he created that stream. Geologists need not talk to me about the Ice Age, Erosion, etc. I know better. God made the Pine river—all along its banks you can discover his finger prints. We never really forget anything. Sometimes we forget where we have laid a certain memory; then something happens to remind us where we placed it and we go and pick it up again—that's all. So these pictures bring the incidents portrayed vividly to mind again.

Why, it was but yesterday—not nine long years ago—that wife and I were camping under the old pine tree. The month was August and the Dane's meadow was covered with a wealth of blossoms, golden-rods, asters, black-eyed Susans, wild sunflowers, and jewel-weeds rioted in glorious confusion. There was a subtle something in the air that indicated that the summer was on the wane, and,as always, it was dying in a blaze of color.

But to the picture. Whenever I wade the Pine below the old mill, a certain pool beneath the low-hanging tag alders is the cynosure of the hour. This pool I always fish from below, contrary to all rule and precedent. On the morning in question I had cast my flies well under the overhanging bank, and, floating down, they had attracted the atention of a large trout; slowly he moved along beneath the flies, without attempting to molest them; apparently he was not satisfied in his own mind as to their true character. I did uot move a muscle; indeed, I scarcely dared to breathe. So ahsorbed was I that I did not hear the "Snap, snap!" of the camera and the low laugh that I am sure must have accompanied it. Then all at once His Troutship made up his mind that my flies, though perhaps some unknown dipterous insects, were good to eat, and he took them with a rush. So sudden and unerpected was the attack that I jumped back in surprise, unconsciously setting the hook. It was a fierce little battle we fought there under the alders and willows, the trout and I. The fish took the initiative from the very first and rushed the battle. I was relegated to a very subordinate position indeed; all I had to do was to hold the rod and "follow on," as we used to sing in Sunday-schol. At last luck and good tackle conquered, and I brought the trout to net, with mouth wide open, some ten rods down stream. Then I became conscious of the presence and the camera. You can well understand why those pictures are of especial value to me.

Something else happened during the same trip. One day the Boy and I were fishing together, and I had reeled out over 100 feet of line in the rapids below the Pine; then as usual my hook had snagged. I was afraid to pull, for fear that my line would break near the reel, and a hundred feet of good line was too much to sacrifice all at once. I was in a quandary; what to do I did not know. Then that rascally hoy suggested that I disrobe and "go in after it." I tried to hire him to get the hook unfastened for me, but—'Nope; dad might not like it." I was between the devil and the deep sea, and I chose the deep. Aftr a hasty glance from the top of the bluff, to see if any spectators were near, I guilelessly disrobed and plunged in. Then that confounded boy ran to the tent and got the camera, and while my back was turned took my picture en dishabille. Of course, like all such pictures, it was good. I could have wrung his neck when I developed the roll of film. What's that? You want to see the picture? Well, I rather guess not; that picture is not for publication.

Strange how even infinitesimal incidents connected with that trip come to mind as I gaze upon the picture. In some respects that was the pleasantest outing we ever enjoyed.

The fire has burned down to a few glimmering coals. The storm still rages fiercely outside, but I mind not. In one of the lower rooms a clock begins to toll the hour, and I count. Twelve? Impossible! I start guiltily to my feet and take my watch from my pocket, bending low over the coals to read it. Yes, it is midnight. Behind me in the darkness the silent typewriter sleeps.—Rev. O. Warren Smith, in Sports Afield.

BASS, PIKE AND OTHER FISH.

If there is any one question discussed by the rank and file of Middle West fishermen above all others, it is this: "How can one tell which is which among muskellunge, pike and pickerel?"

In his "Bass, Pike, Perch, and Others," of the American Sportsman's Library, Dr. James A. Henshall distinguishes these fishes as follows:

"The muskellunge (Esox nobilier) has the upper part of both the cheeks and gill covers scaly, while the lower half of both cheeks and gill covers is naked, it has from seventeen to nineteen branchiostegal rays (the rays on the under side of the gill cover that, like the ribs of an umbrella, assist in opening and closing it during breathing). Its coloration is of a uniform grayisb hue, or when marked with spots or bars, they are always of a much darker color or shade than the ground color.

"The pike (Esox lucius) bas the cheeks entirely scaly, but only the upper part of the gill cover, the lower half being naked; it has from fourteen to sixteen branchiostegal rays; its coloration is a bluish or greenish gray, with elongated or pear shaped spots covering the sides, and which are always of a lighter hue than the ground color.

"The little Western pickerel (Esox vermiculatus) has both cheeks and gill covers entirely scaly, as have all the pickerels; it has from eleven to thirteen (usually twelve) branchiostegal rays; its coloration is greenish or grayish, with curvey streaks on the sides forming bars or reticulations; the color is quite variable, sometimes plain olive."

The late Edwyn Sandys, an authority on many fishing and hunting subjects, once wrote in Outing concerning this matter as follows:

"The muskellunge is subject to much variation in color, but this is a mater of locality and by no means to be depended upon should one be asked to decide if some big captive is a 'lunge or a specimen of the closely allied great Northern pickerel. The membrance of the lower margin of the gill cover is more reliable. In the 'lunge it is furnished on either side with seventeen to nineteen bony rays to facilitate closing and opening the gills. These bony rays, termed branchiostegals, spread and furl the membranes at the fish's pleasure, somewhat as the ribs of an umbrella or the sticks of a fan perform their function. The great Northern pickerel has from fourteen to sixteen of them, while the Eastern pickerel and the Western ,or grass pickerel, have twelve or thirteen.

"An easier identification mark, however, is found on the cheeks and gill cover. In the muskellunge the upper half of cheek aud gill cover is scaled, while the lower half of both is naked. The pike has a gill cover scaled like the 'lunge's but the entire cheek is scaled. The Eastern and grass pickerel have cheek and gill covers scaled all over. Hence, if only the upper half of the fish's cheek is scaled, its is a 'lunge; if the entire cheek and half the gill cover show scales, the specimen is a great Northern pike. Young muskellunge are distinctly spotted with blackish on a greenish or grayish ground. The mature fish shows less distinct markings, although they usually are discernible in the region of the tail. I have, however, seen big, old fish upon whicb the eye could detect no spot, the general color being grayish gren with a few dim reflections. Again, I have seen fine fish of a nondescript tint, as like that of an old, dry, rubber boot as anything I can think of. The young and old of the great Northern pike have the sides marked with oval whitish or yellowish spots, several shades lighter than the ground color—hence, a fish with spots darker than the ground color is a 'lunge; with lighter spots, a Northern pike. I have dwelt upon these distinctive marks in the hope that what has been said may aid in clearing away a bit of the misunderstanding covering these two fine fish. If the inexperienced angler will remember about the scales of the cheeks and gill covers and the color of tbe spots, he should make no error in his identification."

The fish editor will add merely that when the men who has caught pike and pickerel gets fast to a muskellunge he will not need to consult a book—he'll be very certain in his own mind long before he lands his fish.

OREGON WILDS INVITING.

The Oregon woods and mountains, long famous as one of the most productive big-game sections of the country, yearly attracts deer hunters and trout anglers from many localities less favored, many sportsmen from Southern California being among the periodical visitors to the northern State.

With deer scarcer in the local ranges than in former years, and the discomfiture of extreme heat and wearying tramps in getting access to the game haunts, a large number ot sportsmen will take their hunting trips this season to the northern mountain fastnesses.

Among the Californians who have become enamored of the Oregon sport is Attorney Frand W. Allander, a prominent attorney of Los Angeles, who with his family, will journey by auto to Snow Creek, Jackson county, Ore., and plan to leave the end of the weeek for a six weeeks' vacation among the pines.

The Allander party will join Sherman Powell near his camp on the Snow Creek, the exact location of this favored spot being at the intersection of the Snow and Red mountains, Snow creek being a tributary of the Rogue river, winding its course from the Cascades, the backbone of the dividing range between California and Oregon.

Hunters say the best time to go after deer is late in August or early in September, when the big game descends from the upper altitudes and inaccessible reaches of the snow-clad peaks, in search of tender grasses and ripened berries of the lowlands. Well-worn trails leading to the greenest feeding patches of the canons are found at intervals, and the sportsman who watches the deer paths cannot fail to find the object of his trip.

Scattered over the broken timber-covered divides are patches of madrona gnarled evergreen, similar in many ways to manzanita, and this is a favorable hiding place for game. During the middday, between the morning and evening feediug periods, he buck and his doe seek these madrona patches, instinctively knowing it as the safest spot in the whole woods. The madrona bark is thin as a cigarette paper, and cracks under the touch like a dry newspaper.

As a rule these patches are small and two hunters can easily work the quarry to uncover, giving one of the gunners a chance to shoot. Again when deer are startled in the open they invariably make for the madrona, and only leave it on further interference.

One of the handiest and most useful accessories of a hunting trip of any duration is a tin reflector for cooking purposes. In the form of a large bread pan, about 15 by 24 inches, or of less proportions, according to the size of the party, and folded by means of wire hinges at the side. This little contrivance is well worth taking along. In it biscuits can be browned to a nicety, potatoes may be baked, and meats roasted.

The whole process is so simple as to engender unbelief in the novice. The reflector should be placed not nearer than four or five feet from a small wood blaze, a coal fire being altogether too hot, and will invariably scorch the entrees. A simple wire girder placed across the hinges of the reflector will do nicely in holding the pan of food.

Los Angeles heer hunters who ventured into the hills the opening days have on the whole returned a disgruntled lot, bringing tales of sore feet, hard climbing under a fierce heat, and brush everywhere. The game is still feeding in the upper ranges, and it takes a day or two of hard climbing before the hunter can hope to find likely deer territory.

Not a sign of a deer has been seen in the San Gabriel hills (a year ago many tracks were noticed), while tbe Old Baldy region, conceded to be the most favored game section of the South, has been scoured by a number of gunners, and deer are scarce, two bucks being the sum total of game shot to date, as far as reported.

Billy Burke and Johnny Holmes were the two fortunate hunters who brought in the deer, both bucks being shot at the head of Lytle creek. Burke and Jack Martin started Tuesday from the city and followed the tip of "Happy" Jack, a mountaineer of Lytle creek, that several deer had been watering daily near his ranch, climbed straight to the head of the creek—hut found no sign of deer. On the next day Burke stumbled over fresh tracks near the timber line, and shot the buck about dark.

Holmes, accompanied by George McHugh, brought into camp a 200-pound buck last week, finding the deer on the east side of the mountain. Joe Hill and Ben Misner of Duarte made their killing in Fish Canyon between Monrovia Peak and the Duarte divide. Hill declared he bad located the game at a canyon stream a week previous, and had scattered feed for the buck, and going to the spot early Wednesday morning shot his prize just after sun-up.

Marion Wood, a fifteen-year-old youngster of Santa Monica, shot the first buck in the Santa Monica hills It was an 86-pounder, and was killed at the head of Topango Canyon. Frank Machade of the bay town, also succeeded in killing a good-sized deer. He was hunting in the same canyon.

State Fish Commissioner George Mills has shipped 40,000 trout fry to Ely, Nevada, for distribution in Duck, Steptoe and Murray creeks, and White river. All these streams are closed until 1910.

THE SOUTH REPRESENTED.

Michael J. Connell, Los Angeles capitalist, world-wide big game hunter, and a prominent sportsman of the State, has been appointed by Governor Gillett to serve on the State Board of Fish Commissioners. The announcement of his appointment is enthusiastically received by southern California sportsmen interested in the proper protection and propagation of fish and game in the State, and especially in Southern California.

Commissioner Connell supercedes John Bermingham Jr. of Pinole, who had served on the State board since February, 1903. George Stone of San Francisco and F. W. Van Sicklen of Alamda, both appointed in May of last year by Governor Gillett, are the two remaining members of the Commission. Tbey heartily concurred in the appointment of Mr. Connell, and will immediately co-operate with him in securing beter protection of game throughout the State.

For several years sportsmen down south have endeavored to secure a southern representative on the State board. The northern representatives, while aiding in the propagation and protection of fish and game, were not acquainted with the needs of this section. The Los Angeles County Protective Association has been handicapped by lack of funds.

According to the last reports of the State Commission, $26,191.80 was the amount of the tax received from gun licenses from the eight southern counties, of whicb amount Los Angeles county paid $12,525, San Diego $3,017, San Bernardino $3,224, Riverside $2,477, Orange $1,942.60, Santa Barbara $1,871.25, Ventura $1,561.25, Imperial $559.

Commissioner Connell stated recently that the State Commission has an abundance of funds and is ready to do what is necessary for the southern game preserves. He says the board is already considering plans to establish a game farm, modeled after those in Eastern States, and further will consider very shortly the selection of a site for the establishment of another fish hatchery similar to the Eel River, Sisson and others. Black bass and trout will be planted in many streams in the local Coast ranges; striped bass, so highly prized by anglers for its game and table qualities, will also be extensively planted in the mountain lakes and larger streams.

Headquarters for the commission in Southern California will be in Los Angeles, and, acting in conjunction with Game Wardens W. B. Morgan and H. I. Pritchard, deputies will be appointed to carefully patrol existing game locations, and establish needed preserves.

———o———

ANTI GAME AND FISH MONOPOLY.

Senator Curtin of Tuolumne, who prides himself on his knowledge of constitutional law, which he has studied more than "part of a while," says the Legislature will almost certainly repeal all the State laws forbidding hunting and fishing on private lands and providing penalties therefor. He quotes from a decision of the United States Supreme Court to the effect that the ownership of wild game is in the State, and accordingly be argues that the State may withhold or grant to individuals the right to shoot game on any private lands or catch fish in streams flowing through lands subject to private ownership.

The gun clubs and other parties having "preserves" for duck shooting, or enclosed flowing waters stocked with fish at the expense of the State, will no doubt resist any such attempt to deprive them of the exclusive privileges they now claim. But if the Legislature has such power to throw down the bars to the public it should be exercised. In some instances in this State, as on the McCloud river, trout streams have been fenced in for miles by private land-owners, although those same streams have been stocked or replenished with fish at the cost of the State, which likewise uses her police power to prevent the taking of trout and other fish, as well as game, out of season.

The Sacramento Bee long since suggested that such fencing out of the public from streams belonging to the State would probably not be ustained if the question of trespass were taken before a competent court. And the State Supreme Court has recently said:

"To the extent that waters are the common passageway for fish, although flowing over lands entirely subject to private ownership, they are deemed for such purposes public waters, and subject to all laws of the State regulating the right of fishery."

Cau it be held that the State has authority only to protect tbe fish in streams flowing through private lands, and not the right to give the public access to the waters for the purpose of taking the fish in such manner as it may by law provide?

It would seem that Senator Curtin is right, and that if proper effort be made in the Legislature the special legislation which "gentlemen sportsmen" have hitherto enjoyed will become a thing of the past.

It is of course entirely right and proper to protect private lands from unreasonable intrusion or trespass. But no citizen of the State should be deprived of the natural right to land on the bank of any river, or to follow the bank wherever it may lead, for the purpose of fishing or shooting. The water's edge should be an open thoroughfare, wherever the stream forms part of a river system, such as the Sacramento and its tributaries.

Drink Jackson's Napa Soda.

THE AUSTRALIAN BLACK DUCK.

When the sportsman, wading gently through the reeds of the margin of a swamp or lying on the bank of a river or creek, hears amid the melodious gabble and piping of many kinds of waterfowl the loud quark! quark! of black duck, his heart is glad within him, for, next to the scrub turkey, the black duck is hte best of all Australian game birds, both as affording sport and for the table. Not heing an ornithologist, I cannot give my readers the several scientific names of the bird; but in an ancient school book of mine it is called Anas superciliosa, and its plumage described fairly correctly. In other respects I think I know a good deal about it, for I was born in a part of the colony of New South Wales where, among the swamp estuaries, and tidal lagoons, black duck literally congregated in swarms, freely associating with teal, wood duck, waterhens, and black swans. When we were boys, my brothers and I not only shot them in great numbers with our cheap, old-fashioned muzzle-loaders, but the aboriginals showed us how to trap them, and taught us much as to their habits, when to expect them, and when they would migrate; how to handle the eggs when taking some of them from a nest, and much else. In those days there were quite a number of coastal aborigines, wandering up and down their various districts, extending from the Queensland border to Cape Hope; and with the tribes in the northern part of the colony we were very familiar, especially with those inhabiting the country about the Tweed, Richmond, Clarence, Bellenger, and Macleay rivers. As a rule, the white settlers on the coast treated these poor people very badly, although they interfered with no one, and lived solely on fish and game. The latter was very plentiful, especially in the wet season, five or six kinds of duck, teal, geese, and black swans abounding, and kangaroos, wallabies, and other smaller marsupials filled the scrubs, and fed in droves of hundreds in the open country. On one occasion I came across a party of blacks camped at a series of lagoons and swamps a few miles inland from Crescent Head. There were about forty in all, including gins and picanninnies. They told me that they had come to the lagoons for a week's fishing and hunting, and they showed some of the results of netting one of the lagoons a few hours previously—an enormous pile of bream and whiting. At the time it was raining heavily, and I was glad to take shelter under some sheets of bark propped up on saplings and boil a billy of tea, and one of the gins griled me a fish. I told them that I had come to the lagoons expecting to find geese there, but so far had seen nothing but teal; whereupon they told me that I had come too soon—the geese would not begin to arrive for three nights from then, but that at daylight, on the fourth day, I should find the swamps were covered with them, and they indicated the direction from which the birds would come. After staying a few hours and shooting some teal I left, disappointed, to return to my temporary home, the pilot station at Macleay river heads (north side). The rain continued to fall steadily for the next two days, and the pilot boat's crew and I noticed many flocks of duck flying past seaward, heading south, but no geese. However, about 9 p. m. in the evening of the third day, after the rain had almost ceased, and there was a fair moonlight, we heard the honk! honk! of wild geese, and, ruuning outside, we saw a long liue of birds, numbering many thousands, flying past. The blacks kere absolutely correct.

Three of us started off at daylight with a packhorse, and on arriving at the swamps, found them occupied by vast numbers of geese, and my aboriginal friends had already been at work with their boomerangs and killed scores of the birds. At sunset we had sbot all that the packhorse could carry.

To return to the black duck. The term "black" is hardly correct, for the bird's plumage generally is a dark brown, but this varies considerably. It is found all over the Australian continent, from Cape York to the Leeuwin, New Zealand, Tasmania, the Pacific islands, New Guinea, the Philippines, and Java. I bave shot them in Samoa, New Ireland and New Britain and shall always remember one glorious day on an inlet of Admiralty island when two white traders and I half filled a whaleboat with black duck in a few hours, providing the officers and crew of the trading vessel of which I was supercargo, a delicious cbange from the eternal salt and tinned meats we had been living on for montbs past. Some Australians cal! this fine bird the "buff-eye-browed duck," "brown duck," but black duck is tbe usual term. Its general color, above and below, dark brown, each feather margiued with fulvous white; bill, leaden blue; legs, yellowish brown; head, blackish brown; superciliary stripe, a broad band from the base of the upper mandible, passing below the eye; chin and throat pale buff; from the gape, extending on to the ear coverts a mottled band of dark brown; sides of neck, buff white, mottled with brown; wings dark brown; speculum, glossy green, bordered anteriorly with the black tips of the greater wing coverts; the under wing coverts and axiliaries snow white.

The breeding season in Northern New South Wales begins very early. July is the usual time, and it lasts till towards the end of the year. I have, however, known them, after heavy rains, when the swamps lagoons and water holes are overflowing, to begin building their nests early in June. The birds sometimes build on the ground, but they prefer a hollow stump, or the interior of a prone and hollow log. Isolated clumps of reeds in the center of the swamps are also favored, and at one great swamp [illegible]

Herbert River district in North Queensland I found a number of nests all on the margin and on the ground among the reeds, coarse grass, and debris of a species of wild sorghum cane. The nests are, although carelessly made, yet not easy to discover, generally being concealed by standing reeds, grass, or herbage of some sort. The number of eggs varies from six to ten, although I have occasianally found some with eleven, twelve, and twice found thirteen. The eggs are of a lovely light buff color, tinged with green. The shells are very strong, and the eggs lie upon a bed of fine grass or moss mixed with down, contributed by both the male and female bird.

The New South Wales ahorigines say that if the eggs are toucbed by the human hand when tbe ducklings are ncar tbe time of cbipping their shell the parent birds, when they return to the nest, will savagely destroy all the remaining eggs. (I bave known half-bred Muscovy ducks to do this.) This they will sometimes also do when the eggs are quite fresh. The blacks, however, are very remorseless: they like ducklings "in the shell," and gorge themselves upon them, after partially roasting them in hot ashes. They also showed us how to remove some of the eggs by taking a piece of ti-tree bark and lifting out such eggs as we wanted, taking care not to let the fingers touch any of those left in the nest.

Black duck shootlng in shallow swamps or lagoons by moonlight is an exciting sport. If, however, the water is deep, it is very hard to recover a wounded bird. It will dive and doubling under water, come up perhaps 30 yards away, but always where the water is deep. Tbey are such swift swimmers and fliers, however, that it requires a quick and good shot for moonlight shooting, even when the water is alive with the birds. Then, too, the gleam of the gun barrels is very disconcerting to the shooter. A good plan is to dull the harrels a brown color and stick a piece of white lead on the sight.

In the settled districts black duck are very shy and will take to flight the moment they see a man on foot, and they can only be approached in daylight under cover of some sort. Still, by patience, the sportsman is bound to get a shot, especially when several flocks of them rise at once, for they will often wheel round and round several times, and os come within easy range. Although the bird will sometimes remain for months on the brackish waters of tidal rivers or lagoons, its flesh is never or seldom fishy in taste, as is sometimes the case with the European wigeon.

When we went on any of our shooting excursions on the coast, we always looked forward to the glorious repasts at the close of a day's sport, when the camp fire glowed, and the breasts (only) of half a dozen duck were grilling on the bright coals, after being sprinkled with pepper and salt. Nothing is more delicious than grilled breast of duck with damper and tea, especially if you have fixed your camp in a sheltered spot and the night is fine. We were, I fear, very wasteful, never cooking anything but the breast, which alone we plucked, throwing the rest of the hird away. On one occasion a party of four of us had a lovely day's sport on some lakes in the vicinity of Wreck Bay (New South Wales). We were in a small steamer cruising for humpback whales, and met with such stormy weather that we had to run for shelter to a snug little nook under the lee of Green Cape. The lighthouse keepers told us that some lakes a few miles away were covered with waterfowl, which had congregated in thousands ever since the bad weather began, and, there being no settlers in that vicinity, the birds were not a bit shy.

Leaving early in the morning, a few hours' walk brought us to a chain of picturesque lakes, bordered with open forest, and never before had I seen such a gathering of aquatic birds. There were thousands of ducks of several sorts—teal, waterhens, white and black cranes, "Nankin" herons, black swans, pelicans and sea gulls, all mixing freely together. A numher of tiny reed and scrub-covered islets seemed to be alive with them, and the air was filled with their calls. We all made great bags, especially of teal and wood duck. So plentiful were the latter that one of our party, a lad of of thriteen years of age, got five out of seven with both barrels. They were standing close together on the branch of a tree about thirty feet above the water; in fact, a man could have made a big bag even with a rook rifle, for there was excellent cover everywhere.—"Australis."

Col. A. V. LaMotte, the superintendent of the Northwestern Pacific Railway's fish hatchery near Ukiah, reports that he still has over 1,000,000 young trout in the troughs at tbe hatchery, and that although he has placed over 500,000 in various streams that there seems to be no decrease in the number of young fish.

Last week the hatchery shipped 40,000 young trout to Marin county where they were placed in Lagunitas creek, 20,000 were also shipped to the Sisson's hatchery where they will be allowed to mature and be used for breeding purposes. The State Board of Fish Commissioners desire to cross the steelheads with the other species of trout, it is reported, and hope to thus hring forth a new specimen of the gamy fish. Mr. La Mot.e has thus far transplanted about 500,000 fry in local streams, and the work of restocking streams will go steadily forward until the available supply is exhausted about Ukiah, Willett's and along the line of the railroad.

AT THE TRAPS.

At the Carnation Gun Club shoot, South San Francisco, Sunday, July 19th, Joe Pisani won the Du Pont trophy after shoting off a tie. Geo. Sylvester and Ferrier tied with Pisani on 18 out of 25 targets. Pisani broke 7 out of 8 and won the trophy. Each of his opponents lost two birds in the shoot-off.

Geo. Sylvester was high gun with 20 out of 25 in the club race. Ferrier, Perpoli and P. Finnochi each broke 19. In the first event, 25 targets, Pisani and Sylvester broke 21 targets each.

The scores in three events follow:

Event No. 1, 25 targets—G. Sylvester 21, J. Pisani 21, G. Ferrier 18, Perpoli 15, Finnocchio 13, Patton 12, Weideman 12, W. Barry 12, Carlson 11, B. Barry 10, H. Rose 10, Lafourguett 10, P. Ferrier 7.

Event No. 2, 25 targets—G. Sylvester 20, J. Ferrier 19, M. Perpoli 19, Pisani 17, P. Ferrier 13, E. Barry 12, Carlson 11, Weideman 10, Lafourguett 10, W. Barry 10, O. Eggers 7.

Du Pont trophy, 25 targets—Pisani 18, Sylvester 18, Ferrier 18, Carlson 16, Perpoli 15, O. Eggers 14, W. Barry 13, Weideman 13, P. Ferrier 13, E. Barry 11, Finnocchio 10.

The Vallejo Gun Club's 100-bird handicap for the Senate Cup was decided July 12th and J. V. O'Hara was the winner with 85 out of 100, which is very clever shooting, as a high wind hlew over the traps all day. Following are the high scores: O'Hara 85, Grimes 82, Roney 79, Blockader 76, Coe 75, Clark 75, Rose 66, Magistrini 64, Hirschle 64, and King 30 out of 50. Every shooter was handicapped from his previous record. The cup is the handsomest and most costly ever coutested for by the club, being of solid silver, and was donated by C. L. Wisecarver.

Paymaster Brown, Mr. McClintoch and Mr. Waters of the U. S. S. Maryland were guests of the club and made some excellent scores. Mr. Brown showed that he is entitled to shoot in the expert class. The ownership of the Dupont trophy and Ballistite medal will be decided next month when the club will close the season with a merchandise tournament.

The Key City Rod and Gun Cluh of Port Townsend, Wash., will hold a series of eight shoots, 200 targets in all, for a trophy donated by the Du Pont Powder Company.

The postponed monthly shoot of the Golden Gate Gun Club will take place at Ingleside tomorrow.

Everett (Wash.) Gun Club scores Sunday, July 12th, were the following:

First event, 10 targets—Wm. Hulbert 8, Sumner 5, Ted Agnew 2, Russell 6, Horan 7, Solberg 3, Glen Hubert 6, J. A. Swalwell 2, Westland 7, Manning 2, Olwell 6, Gardiner 5.

Second event, 15 targets—Wm. Hulbert 13, Sumner 11, Ted Aguew 8, Russell 10, Horan 5, Solberg 6, Glen Hulbert 11, J. A. Swalwell 9, Westland 11, Manning 4, Olwell 12, Gardiner 8.

Third event, 25 targets—Wm. Hulbert 15, Sumner 12, Ted Agnew 13, Russell 16, Horan 13, Solberg 11, Glen Hulbert 15, Swalwell 13, Westland 24, Manning4, Olwell 16, Gardiner 20.

At Raton, N. M., July 4th, the Gun Club tourney was well attended. The prize winners in the main event at 50 targets were: Hugh Moore broke 46, B. Sherrod E. L. Fugate 36, T. Fitzsimmons 35, Wm. Oliver 34, Dr. Tate 33, C. A. Whited 32, L. H. Goehring 29, A. L. Hobbs 29, W. G. Hughes 28. In the second race at 25 targets the winners were: Sherrod 21, Hughes 21, Kramer 19.

In the consolation race at 15 singles the winners were: E. Ruth, Dr. Connett, T. D. Lieb and C. E. Coleman.

Thc final trap shoot for this season of the San Luis Boat and Gun Club took place on the 12th inst. The program called for four events, opening with a 10-bird race, followed by three 20 target matches. The winners for the season were: C. T. Greenfield first prize, P. J. McCaffrey second prize, James Guthrie third prize; J. C. Hill fourth prize; J. E. Van Schaick fifth prize.

Greenfield and McCaffrey shot off a tie at 20 targets for first prize. The former won on 16 to 14. A summary of scores follows:

E. Taylor 7—8—13—16; J. C. Hill 8—13—13;—17; C. T. Greenfield 9—14—18—16; J. E. VanSchaick 7—16—15—13; F. W. Keller 5 — — —; James Guthrie — — 13—13; Thomas Rhodes 6—18—15—17; P. J. McCaffrey —14—19— —; J. A. Renetzky —10— —; Mr. Brentner — — —15; Mr. Varney — — —14.

Philo Jacoby of San Francisco, probably the oldest expert rifle shooter of the country, and the only living member of the famous California rifle team that won the national centennial shoot in 1877, was in Los Angeles two weeks ago, the guest of the Turner's Rifle Bund, in a special shoot at Schuetzen Park.

Jacoby made the highest individual score in the famous centennial gunners' celebration, and led the Golden State contingent in capturing the team honors for the State. The Turners are at present holding but one monthly shoot, with practice tryouts twice a month.

Commenting on the recent revolver match at Bisley, Eng., a local sportsman writes:

"Marksmen who shoot at the Shell Mound targets are indignant at the treatment accorded J. E. Gorman of San Francisco, who was included in the Olympic team, which won the championship of the world at the recent Bisley shoot. In the individual shoot the local shot was at his best, and kept peppering the center of the target. When his target was returned to him when he had finished shooting he found that he was credited with a miss. Gorman claimed that this could not be the case, as he was shooting so true that it was almost impossible for him to miss the target entirely. He claimed that two bullets had gone through the same hole, a thing which is not unknown in pistol shooting, but the English officials refused to listen to the protest, and declared the shot counted as a miss. It was suggested by Captain Sayers, skipper of the American team, that Gorman be allowed another shot, as there was no proof that he missed the target, but the suggestion availed nothing, the judges declaring that their original decision stood. The Americans further pointed out that, when hundreds of people were watching the shoot from the shooting stand, it was more than likely that some one would have made an explanation had the shooter registered a miss after shooting so consistently.

"The protest will not he allowed to drop, as the United States revolver Association has taken up the matter and will again bring it before the notice of the Olympic officials. Despite the fact of the local man's shot being recorded as a miss, Gorman succeeded in securing third place and winning the hronze medal. Had the disputed shot counted, Gorman of San Francisco would now be champion of the world. Just to sbow that he had it on the man who beat him, Gorman defeated the Belgian in the team shoot, and incidentally made the highest score on the American team. Not content with this, he intends following his opponent to the field of Waterloo, where a big shoot is to take place early in August, and there Gorman hopes to further redeem himself.

"It seems a strange thing that such a point should arise at a meet of the importance of the Olympic games, and it is unlikely that such a dispute will ever again arise. When a match is being shot for the cbampionsbip of the world, it would seem only proper to give the marksman a clean target for each shot, instead of allowing him to pump ten bullets into a radius of about six iuches. A good pistol shot never goes farther from the center of the target than six inches, and the possibility of two bullets going through the same bole is apparent. Just why the shooters were compelled to fire at the same target ten times is one of the jokes which only an Englishman can understand. The targets cost about 10 cents a hundred, and it could scarcely have been economy which prompted the officials to he so stingy with their targets. Local marksmen aver that had a clean target beeu used for each shot Gorman would now he the champion."

J. S. Hunter, deputy game warden for San Mateo county, has notified all sportsmen through the press that the deer season in that county does not open until August 1st. The State law declares the open season to be from July 15 to September 30, hut grants to counties the right to restrict the season. San Mateo has applied the law by cutting the season a fortnight. Hunter reports that deer are fairly plentiful in thc soutbern part of San Mateo county, and also in Santa Clara and Santa Cruz counties, and that so far there have been only minor violations of the game law.

Game Warden Welch of Santa Cruz county announces that the deer season in his county will not be open until the 1st of September and that the minimum fine for killing deer out of season is $50.

Another Victory for U. M. C.—

Bill Price, the popular gunsmith, 636 Market street, San Francisco, accomplished the feat of breaking 25 straight (15 singles and 5 double rises) at the Empire Gun Club grounds last Sunday, using his Remington and U. M. C. shells, a feat that has never been accomplished before on the grounds of the Empire Gun Club in this particular race.

"Bob" Bungay, one of the most enthusiastic sportsmen in Southern California, broke 96 out of 100 and 48 out of 50 at the Crescent Gun Club shoot at the Venice traps last Sunday using a Remington "Pump" gun and U. M. C. ammunition.

Mr. Frank Reihl of Tacoma, was high gun at the recent two day tournament at Yakima, Wash., where the best in the northwest mixed up on the firing line. He did it with a Remington "Pump" gun and U. M. C. shells.

At the Carnation Gun Cluh shoot July 19th the feature event, the Du Pont trophy race, was won hy J. Pisanl with a Remington gun, U. M. C. shells and Du Pont powder.

At the three club shoots of this newly organized club all of the shooters but one used U. M. C. shells.

Red W Goods on Top Again—

Twenty-seven of the thirty-one contestants that participated in the Fresno, California, Inaminate Target Tournament shot the dependable Winchester "Leader" shells.

The first high amateur average was made by E. C. Ickes 188x200; second, L. Holsclaw 181x200; third, George Stone 174x200; fourth, Fred Stone 171x200, and fifth R. R. Caldwell 169 x200. All the above gentlemen shot "Leader" shells—the shells they always shoot.

Drink Jackson's Napa Soda.

THOROUGHBRED AND TROTTER.

(American Horse Breeder.)

Opinions of honest, intelligent men differ radically upon many important questions. Men sometimes change opinions which they have held for years. All opinions should be founded on facts. Those that are of any value must be the result of a careful, intelligent, unprejudiced study in search of the truth, as revealed by well-established, incontrovertible facts.

Demonstrated facts never change. The opinions and emphatic assertions of the most noted writers do not affect them in the least. They may be ingeniously covered up, and totally ignored, but they remain facts just the same.

In another column of this paper will be found an article, headed "Status of the Thoroughbred," copied from the Horseman and Spirit of the Times. The author, . B. Whitford, is an entertaining writer, and his articles contain many excellent ideas, but some of the assertions expressed in the above named article we believe to be erroneous. One of them is the statement that the trotter "is at last far beyond the need of more thorougbred blood." (This article appeared in the Breeder and Sportsman of July 11.)

What evidence has the author of the above to offer to prove that such is the case? Thirty years ago John H. Wallace, author, and then proprietor of the American Trotting Register and also of Wallace's Monthly, advanced the same idea and ridicule was heaped upon the breeders who experimented with thoroughbred blood to improve the speed and racing qualities of the trotter, by Mr. Wallace and his followers. The discussion of the effect of thoroughbred blood upon the trotter has continued from that day to the present and has sometimes waxed pretty warm.

There are certain well-established facts that have a bearing upon this question and shed some light upon it. The discussion of the effect of a near thoroughbred cross upon a trotter began in earnest not long after the world's champion trotting record was lowered to 2.14, by the wonderful mare Goldsmith Maid. The first trotter to take so fast a record at 2:10 was Jay Eye See. He was by Dictator 113, a son of Rysdyk's Hambletonian 10 and Clara. His dam was Midnight by Pilot Jr. 12, and his second dam was Twilight, a running-bred daughter of Lexington, by Boston.

Maud S. lowered the record of Jay Eye See several times and fnally placed the world's champion trotting record at 2:08¾. Her sire was Harold 413, a son of Rysdyk's Hambletonian 10. Her dam was Miss Russell by Pilot Jr. 12, and her second dam was Sally Russell, a running-bred daughter of Boston ,the sire of Lexington, that got the second dam of Jay Eye Sec 2:10.

The first trotter to beat the record of Maud S. was Sunol, that lowered the world's champion trotting record to 2:08¼. Sunol was by Electioneer 125, a son of Rysdyk's Hambletonian 10. Her dam was by General Benton, a fast trotter, and her second dam was Waxy, a running-bred daughter of Lexington. This seems to indicate that, up to that time, a near thoroughbred cross improved the speed ability of the trotter.

Pilot Jr. 12, that got the dans of Jay Eye See 2:10 and Maud S 2:08¾, was by pacing Pilot, and his dam was by Funk's Havoc, a running-bred son of Sir Charles, by Sir Archy. It was claimed by some that the speed of Jay Eye See 2:10 and Maud S 2:08¾ was due to the fact that Pilot Jr., sire of their dams, was by a pacer, but Sunol 2:08¼, that took a faster record than either Jay Eye See or Maud S., did not inherit a pacing cross from her dam.

This caused the unprejudiced practical breeders of trotting stock and the unbiased students of the breeding problem to believe that the speed ability of those three trotters was due to combining the blood of Hambletonian 10, with that of Boston, and that a pacing cross, of itself alone, unaided by a close thoroughbred racing cross, was not a potent factor of trotting speed.

There were some superficial students of the breeding problem, who evidently had not studied the subject of heredity, that could not see how it was possible for a trotter to derive any beneficial qualities from a horse that could not trot, but, on the contrary, had been bred for centuries to race at the running gait. They insisted that though a running-bred foundation might be a good one to start with it would be ruinous to continue to add further fresh infusions of running blood to trotters.

Nearly all the papers that were devoted to the trotting breeding industry were edited by men of that belief, men who thought they were benefiting the cause by discouraging breeders from experimenting along the line of breeding that had produced the first three trotters to take records of 2:10 or better.

We do not know that any systematic attempt to improve the trotter, by the use of first-class thoroughbred blood, has been made by any prominent breeder, since the death of Governor Stanford, founder of the successful Palo Alto establishment. Yet, notwithstanding that, and in spite of all that has been written by well-meaning persons against the use of thoroughbred blood, when breeding for trotting speed, an analysis of the pedigrees of Lou Dillon 1:58½ and Directum (4) 2:05¼ will show that both of them inherited a near cross of the thoroughbred Williamson's Belmont. Lou Dillon 1:58½ is the fastest trotter by the records, yet produced, and Directum holds the world's champion four-year-old trotting record.

The thoroughbred race horse has been bred for centuries by the most intelligent breeders in England and America, whose aim has been to improve the speed ability, the inclination to win, and the endurance of that class of animals. They have made their selections of brood-mares and the stallions with which to mate them, with the object in view of combining those most important of race-winning qualities in the highest possible degree. They long ago learned that purity of blood was one of the chief requisites of success.

It has been demonstrated most conclusively that animals whose blood had been contaminated by cold crosses, though some of them might race successfully, could not perpetuate race-winning qualities equal to those which they themselves possessed. A striking illustration of that in America was the stallion Potomac, by imported Diomed. Potomac was a very successful race-horse, yet was a comparative failure, or far inferior to many others of his day, as a sire of race-winners, though some of the best mares of their day in Virginia produced foals by him. An investigation of his pedigree revealed the secret of his failure. His dam was by Pegasus, a well-bred horse. His second dam was by Young Yorick, a cold-blooded horse. His third dam was by a half-blooded horse; his fourth dam by a common wagon horse, and his fifth dam an ordinary plough mare.

Cold, cart horse blood is just as detrimental to speed at the trotting or pacing as at the running gait. Unfortunately the blood of most of the trotters in this country is contaminated to a greater or less extent with cold blood. Until that cold blood is eliminated, or so greatly diluted that its influence is obliterated, the trotter cannot be brought to the highest possible state of perfection, so far as speed ability, courage and endurance are concerned. Animals that have inherited even a remote cross of cold blood cannot be depended upon to produce speed with great uniformity.

The only way to overcome this difficulty, in our judgment, is by a judicious and systematic introduction of the right kind of plastic thoroughbred blood. Judging by past experience this should be done, as it was in the cases of the great brood-mares Columbine, Midnight, Miss Russell, Alma Mater, Mary Mambrino, Dolly, Jessie Pepper and others, by mating thoroughbred mares of the right conformations, good dispositions and some trotting action, with some of the best of such stallions as have inherited the greatest proportion of the blood of Columbine, Miss Russell, Alma Mater, etc., then saving the fillies, produced by these crosses, and mating them with the best of other highly bred trotting stallions of kindred blood.

It would take several generations to eliminate all the cold blood, or overcome its influence, but by pursuing this course systematically for a sufficient length of time it would be possible to create a breed of trotters as pure blooded as the thoroughbred race horse, superior in speed ability and other racing qualities to any trotters yet produced, and far superior, for transmitting extreme speed with uniformity, to any breed of trotters that ever has been, or ever can be, produced by any other method of breeding. The man, or the company of men, who will found a breed of trotters on that basis and adhere to that system of breeding will eventually accomplish more of trotters than has been accomplished by all the Trotting Registers, Year Books and standard rules in the way of improving the most valuable qualities ever invented.

Of course there are turf writers who will ridicule such an idea. There have been short-sighted men in all ages that were opposed to any and all attempts of progress; men with no regard for the future, that measured and weighed everything by the immediate profit on their investment. Had the whole world been of that class America would have remained a wilderness till the end of time. There would never have been a steamship line established, or a railroad built.

Several of the most important qualities that are essential to success as a race-winner are identically the same in the trotter and the pacer as in the thoroughbred runner. Some of them are speed ability, endurance and courage. The first two are physical qualities and the last named largely a mental one. The thoroughbred race horse had been bred especially for those qualities and the improvement of them for centuries before any attempt was made to found a breed of trotters. It was from the thoroughbred that the fast trotter and the fast pacer inherited those important race-winning qualities. The only essential difference between the race-winning trotter, pacer and runner is in the gait, and a conformation favorable for trotting or pacing action. The best authorities on heredity now assert that the qualities which combined make an individual are all independent of one another, and that by a proper selection of sire and dam, any one of these qualities may be changed without affecting any of the other qualities, hence the gait or habit of action of the thoroughbred may he changed and all of his high-class racing qualities be retained unimpaired. It cannot be done in every case, but it can be accomplished by perseverance.

It is generally conceded that as a rule the sire has greater influence in determining the gait and conformation than the dam, and this accounts for the fact that far greater improvement among trotters has been made by mating thoroughbred mares with stallions that were good-gaited trotters and possessed a strong inclination to stick to the trotting gait when urged to the limit of their speed, than by the reverse method of breeding.

Many writers seem to think, or try to convey the idea, that all thoroughbreds are wild, vicious, rattle-headed animals than can't be controlled in harness, and that all trotters which have a thoroughbred cross close up must possess that characteristic. There is a vast difference in the temperament and disposition of different thoroughbreds. Trainers who have had the most experience with trotters that inherited a large share of thoroughbred racing blood do not describe them as wild, rattle-headed, foolish, vicious animals.

No trainer that ever lived had more experience in training and handling trotters that inherited a large infusion of thoroughbred blood close up than did the late Charles Marvin. Every one who was acquainted with Mr. Marvin knows that he was a candid, fair-minded man. In Mr. Marvin's work on "Training the Trotting Horse," Mr. Marvin said as follows:

"My experience has been, in training horses from thoroughbred mares, that their heads are as good as the average trotting-bred horse's head. This experience has been, it is true, with the get of Electioneer, a sire with great brain-controlling force, and it may be that had I handled the same number of half-bred horses by some other sire it might have been different. However, I am not telling what my experiences might have been, but what they were.

"In selecing a thoroughbred mare, to breed to a trotting stallion, we pay great regard to form, action and head. Some thoroughbreds are more brainy and level headed than others, and from one of these of right conformation, bred to a stallion, like Electioneer, of great brain and action controlling power, the chances of getting a high class trotter are good. I do not claim that you can produce trotters as uniformly this way as by breeding from trotting mares, but you can, with the properly mated sire and dam, get horses of high class by this line of breeding, horses of great finish and hard, fine quality. We have, I think, demonstrated at Palo Alto, that some horses, at least, can control the action of the thoroughbred, and where that can be done I have no hesitation in declaring my preference for a good dash of thoroughbred blood.

"I do not advise any breeder to sell his trotting-bred mares and buy half-bred, or thoroughbred mares, nor do I advise him to patronize a stallion simply because he has thoroughbred blood; but what I do advise is that when you find a good horse, or a good mare, a horse that is a trotter, or a mare that is a producer, that has plenty of thoroughbred blood, do not let that scare you away from them, but rather value them the higher for it."

Many believe that Electioneer was superior to all other trotting stallions for controlling the action of thoroughbred mares, but it is remarkable if such were the case for there is not the slightest doubt that his second dam was by the running-bred Iron's Cadmus, and from a thoroughbred daughter of Jerry, by Pacolet. It is not improbable that the superiority of Electioneer over other stallions for controlling the gait of offspring from thoroughbred mares, was due to the fact that no other stallion had so good opportunities for doing so.

There are good-dispositioned, level-headed animals among thoroughbreds. The majority of them, no doubt, are more sensitive than cold-blooded animals, but it properly handled from colthood by men who will treat them kindly, the majority of them will be found to be kind and tractable. Speaking of Don Victor, a thoroughbred son of Williamson's Belmont, Mr. Marvin said: "I saw him trot a mile in 3:12 at twenty years old. He was a fair race horse (as a runner.—Ed.), but was afterwards used as a doctor's hack. Mr. Marvin drove him in his late years, and found him a good road horse."

The statement of a candid, conservative, conscientious man like Mr. Marvin, and one whose experience in handling trotters that had inherited large infusions of thoroughbred blood close up, is entitled to greater weight than all the opinions of all the theorctical writers in the world. We believe the time will come when a breed of trotters will be established along the lines that we have suggested. It is to be expected that the party, or parties, who undertake to do so will be criticised and ridiculed as severely as was Dr. Herr for mating a mare so full of thoroughbred blood as was the dam of Mambrino King 1279, with Mambrino Patchen 58, the dam of the latter being by a thoroughbred, and his second dam by the son of a thoroughbred, but Mambrino King proved the best son of Mambrino Patchen, as a sire and perpetuator of speed, while his most successsful daughter as such was Alma Mater, and her dam was the thoroughbred Estella.

It has been stated that some who have experimented with thoroughbred crosses have not been successful, but the same is true of many who have bred in "orthodox trotting lines," and the proportion of failures is probably far greater among the latter than the former. We would not advise any small breeder, of limited means, to undertake to create a breed of trotters even on the lines suggested above, for establishing the best breed of trotters in the world and placing it on a paying basis requires time, patience, good judgment and money. So it does to start an apple orchard on the soil in New England that is best adapted to raising first class fruit, but in time it proves a profitable investment.

THE FARM

TWO SIDES TO THE BUSINESS.

There are two sides to the fruit growing business, raising it and selling it. Two farmers lived near each other in southwest Missouri. One of them raised the finest apples about the country and he seemed to do a fair business; but he was always saying that he lost each year on the crop. The other used to pile up some dingy, withered fruit into boxes, put it on the train and his bank account was the envy of his neighbors. This was the condition for 10 years. The latter was the business man but the former raised the best fruit. It dawned on the expert fruit raiser one day that he lacked ability to place his fruit on the best paying basis and to secure the best market price for it. But he had lost so much money by getting in with brokers who had no standing that he decided to make a change.

"I'll raise the apples," he said to the other fellow, "and you sell them." The other agreed and they put their fifty acres together. In a short time both were able to run up to St. Louis once a year and look after their affairs. One sold fruit and the other raised it. There are tricks to all trades and the business man of the two spent all his time making careful study of the market conditions. He took all the newspapers—referred to credit firms and went to the cities in search of the best markets for their fruit. He didn't lose anything because he knew the standing of his customers before he sold to them. There was little risk. These two farmers had found out the secret. In a short time they bought more land with the profits and now they have one of the principal apple-raising farms in the State of Missouri.

VITRIFIED BRICK SILOS.

Vitrified brick makes an excellent silo in some instances. Such a silo should be well coated with cement within and also coated with pitch after completion. This coating of pitch will preserve the mortar. Re-enforcing wires should be laid on the bricks and embedded in the mortar to give it extra stability. For this purpose No. 4 wires are best and it will pay to use them by all means. One should be used for every four courses of brick. If iron door frames are used and the wires are attached to that it will be a better and more durable arrangement.

When the time comes to wean the pigs, cut down the sow's ration to water and little grain. Take away the strongest pigs first, leaving the weaker ones to suckle for a few days. This method will give the weak pigs an extra chance and will dry up the sow without injury. When she is giving a large supply of milk and all the pigs are taken away at once her udder is often ruined and she becomes unable to suckle another litter. When first weaned, feed the pigs from three to five times a day. While with their mother they took their meal at least every two hours and too sudden a change is detrimental. After they are growing vigorously cut down to two meals a day and when they weigh seventy-five pounds each and are on good pasture feed once a day and that at night. When first weaned, feed the pigs some skim milk if possible. It makes the change from mother's milk easier. Whole milk is good but as butter fat is worth $400 to $740 a ton, it is expensive pig feed.

MEAT FOR PULLETS.

It has been proved that pullets should be raised on a half meat diet. There is perhaps nothing which a fowl at the age of four weeks needs as much as cooked or raw meat. In this respect it is of paramount importance to feed those chickens meat that are destined for the stew pot or the oven. A fowl that is cooped up and fed on a reasonable amount of meat along with the grain will fatten without becoming tough. The meat fed to the chicken that has been cooped up for the table use will add plenty of sound flesh to it, and the cooping will fatten it. If a chicken runs loose all day it will get so tough from the strengthening of the muscles due to the exercise that it will be almost unfit to eat.

Two lots of chickens were experimented on recently with a great deal of success. One lot of the same hatching were fed only on curd, skimmed milk and grains. Another lot were given dried blood, animal meal and, lastly, plenty of meat adhering to the bone. With this animal diet, however, some mixed grains were fed to the small chicks. The chickens fed on the animal diet were some weeks ahead of the grain-fed lot and were off hand some weeks beforehand. With ducks an experiment of this nature was more than startling. The ducks fed on the animal diet flourished in a manner beyond belief, for eating purposes. Give the fowls plenty of meat.

The number of hogs that may be pastured profitably on an acre depends very largely on the amount of grain fed. Probably from six to eight hogs, under ordinary conditions is about the right number. This will allow enough alfalfa to grow to make three fair crops in the season. The fields should be small rather than large so that the part nearest the water and sheds will not be kept too close to the ground and that at the farther end of the field left untouched.

THE TWENTY-EIGHT-HOUR LAW.

The United States District Court of Wyoming has rendered a decision of great importance to the railroads and to shippers of live stock, in the case of the United States against the Union Pacific railroad, for the alleged violation of the old twenty-eight-hour law in keeping live stock on the cars longer than the time limit specified. The defense of the railroad was that it had not wilfully kept stock in the cars and its doing so was due to pressure of business, engine failures, etc. The District Attorney demurred, but the demurrer was overruled and this action of the court virtually dismisses the case and nineteen others of similar nature. The government has appealed the case to the Circuit Court of Appeals and in all probability the fight will be carried to the United States Supreme Court. The issue will depend practically upon the interpretation of the word wilfully. It is claimed by legal lights that the insertion of the word wilfully in the penalty clause practically invalidates the law.

A fire extinguisher is easily compounded from common lime 20 parts, common salt 5 parts and water 75 parts. Mix well and put in thin bottles. In case of fire a bottle so thrown that it will break in or near the fire will put it out. This mixture is better and cheaper than many of the high-priced extinguishers sold for the purpose of fire protection.

FOR SALE.

Handsome bay mare, seven years old, about 16 hands high. Sound, well broken and gentle in every way. Sired by Chas. Derby, dam Allie Stokum by Richard's Elector. High-class road mare and a good prospect for a race mare. With three months' work last year, trotted a mile in 2:18, half in 1:06, driven by an amateur. To see the mare and for further particulars write or apply to

W. DIXON,
2310 Encinal Ave., Alameda, Cal.

PETER SAXE & SON, 911 Steiner St., San Francisco, Cal., Importers, Breeders and Dealers for past thirty years. All varieties Cattle, Horses, Sheep, Hogs. High-class breeding stock. Correspondence solicited.

Sulky and Cart for Sale.

One brand new McMurray sulky and one brand new McMurray cart for sale. Never been uncrated. Best made. Can save you some money. Address,

F. W. KELLEY,
Care of Breeder and Sportsman,
P. O. Drawer 447. **San Francisco.**

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.
Address this office,

BREEDER and SPORTSMAN.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.

SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.

Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best bred and best individuals on the Coast. Write for particulars. Address,

THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.

My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

BONNIE D. by BONNIE DIRECT 2:05¼

Is offered for sale. He is a bay gelding, four years old, a square trotter, sound, good looker, gentle and city broke. Can show 2:30 gait. He is out of Electress Wilkes 2:28½, dam of Lady Mowry 2:09¼, by Nutwood Wilkes 2:16½. MRS. D. V. TRUAX,
Near Park St. Station. 1126 Park Ave., Alameda.

"HOWARD SHORTHORNS"-QUINTO HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.
WILLIAM NILES & CO., Los Angeles, Cal.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to

S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address

S. H. HOY, Winters, Cal.

Stallion for Sale.

Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:05½, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13½ and Pinkey H. 2:17. This colt is a beautiful dark chestnut, with a great deal of knee and hock action, and in good hands would make a show horse. Will castrate him and break to saddle if any one wants him that way. Is a very attractive and stylish fellow.
For prices and other particulars address
Dr. A. De FOE, Box 38, Pleasanton, Cal.

ANTOINETTE FOR SALE.

The handsome bay mare Antoinette, sound and all right, kind and gentle, and a fast trotter, is offered for sale. She has won at matinees, trotting in 2:21 with very little work. Has worked out in 2:18 and can go faster. A lady can drive her and she is bred well enough to be a great brood mare. Has no record. Her sire is Antrim, sire of Anzella, 2:06¾, and her dam produced Antrima 2:15½, a full sister to Antoinette. She can be seen at the Pleasanton at any time. For any further particulars, write to the owner,

THOS. RONAN, Pleasanton, Cal.

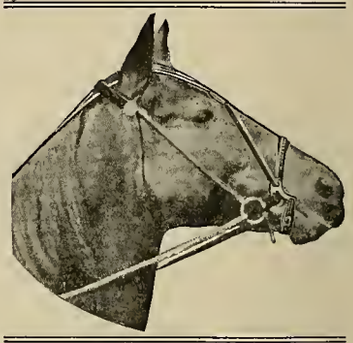
Hutton Patent
Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct** from us, as **we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

N. B.—Our Illustrated Catalogue No. 42, containing cuts and descriptions of everything used on the horse (many new goods) will be mailed free to any address upon application. Write for one at once, addressing Dept. "C."

PREVERVING MANURE.

There are several ways of preserving manure during the summer months so that but little or none of the elements of fertility are lost in the decay. Perhaps the most simple as well as the most effective way is the one that has been practiced in France for centuries. This way is also practiced on a number of the most successful garden farms in the East. The base where the manure heap is to stand is dug a few feet lower than the surrounding ground. The bottom of this is cemented over or a few inches of compact clay is placed therein and tamped down till but little if any of the liquid can escape through it. A shed is placed over this to shut out the excess of moisture and to keep the sun from shining on the heap. The manure is thrown in this depression and well tramped and enough moisture applied to keep the manure thoroughly damp if not wet. In France considerable water is applied and then an old pump is set into one side of the hole and the excess water that stands in the bottom of the hole is pumped up again over the manure as it is needed to keep the heap wet. As a result fermentation is slow and the manure is in the very best of shape for application just before the fall plowing is to be done or in the winter time.

On the north side of the barn is an excellent place for the heap, but in all cases there should be a shed over the heap to shut off the heavy applications of moisture that are always given by the heavy rains. If too much water is applied and the excess is allowed to soak away or run away down the side hill, a great deal of the fertility is lost by what we call leaching. In this way not only a great deal of the nitrogen is lost, but also a great deal of the mineral elements. Therefore, the manure should have a shed and only enough of the rain water allowed to fall upon the heap to keep it amply moist. The bottom of the heap should be lower than the surrounding ground so that none of the elements will be washed away in case there should be a too great application of water.

HOW MUCH HAY TO FEED.

A correspondent residing in Idaho relates that he can not understand why the Breeders' Gazette says that a pound of hay for each hundredweight the horse weighs can be sufficient daily ration. He states that feeders in this district count on 30 to 35 pounds of hay per day for each horse and that he persoually is feeding a team weighing 2,200 pounds a ton of hay each month. The editor of the Gazette replies "Most farm horses get far too much hay and often poor hay at that, which accounts for the prevalence of heaves in regions where tame grass is grown. The digestive apparatus of the horse is small and easily filled up. As a result, when great quantities of hay, which is not of great nutritive value in any case, are forced on any horse the organs become unduly distended, the horse is logy, in time becomes potbellied and is always overhurdened with the food he eats. Hundreds of experiments have been made by the great horse-owning corporations and individuals in all countries to discover the best rations for horses of all sorts and weights and doing all sorts of work. These all prove that right around a pound of hay per diem for each hundredweight is as nearly correct as may be, though as we have stated a hundred times the rule is not absolutely rigid, but should be used as a basis of experiment to discover just the proper amount. If a pair of horses weighing 2,200 pounds eats 2,000 pounds of hay in 30 days they are eating about 66 pounds a day, which in our judgment is practically a daily waste of around 40 pounds of forage; this, of course, supposing that the horses are working and consuming a reasonable grain ration, and not merely subsisting on hay alone, which is a very different matter."—Husbandman.

RATIO OF CREAM TO MILK.

How many quarts of standard cream can be obtained, with a good separator, from a hundred quarts of 4 per cent milk?

To answer this question fully will require quite a little calculation. In the first place, the word "standard" must be defined. If it means a legal standard of fat, that may differ in different states. The Babcock test deals in per cent. It will therefore be necessary to reduce the hundred quarts of milk to pounds, which we find to be 222. There will be a small fraction over, but we will drop this for convenience. In this amount of 4 per cent milk there will be 8.88 pounds of fat. This will make 44 pounds, or 22 quarts, of 20 per cent cream; 35.5 pounds, or 17.75 quarts, of 25 per cent cream; 27.5 pounds, or 13.75 quarts, or 30 per cent cream; 25 pounds, or 12.5 quarts of 35 per cent cream; 22 pounds, or 11 quarts, of 40 per cent cream. In making these computations I have called a quart of milk 22-9 pounds and a quart of cream 2 pounds, and while cream varies slightly in weight as between the thin and the thick cream the weights are near enough to illustrate the point taken and to ascertain within reasonable limits the number of quarts of the different richness that would be obtained from the 100 quarts of milk.—Tribune.

The most practical dippers of cattle are discounting Beaumont petroleum for the more efficacious arsenic solution. The formula for 500 gallons of dip is arsenic eight pounds, washing soda twenty-five pounds, soap twenty-five pounds and pine tar two gallons. The arsenic and washing sola are boiled in twenty gallons of water for fifteen minutes. The soap is dissolved in boiling water and the pine tar poured into this. All the ingredients are then thoroughly mixed with enough hot water to make up fifty gallons. This dip is sufficient to make a 500 gallon lot of dipping fluid strong enough to put ticks out of business without hurting the stock.

The London Meat Trades Journal in an editorial says the retail prices of meats have made a substantial advance in that country. It is pointed out that the supply of native bred stock has for some time past been short in numbers and deficient in weight and quality, and that in the United States and Canada the supplies of live cattle, sheep and refrigerated beef were on a steady diminishing scale. Under such circumstances, says this authority, it is but natural to expect that prices all around should advance materially, but more particularly for the choicer grades.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For Human Body the —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

We have a few weanlings and some breeding stock for sale at reasonable prices

When writing kindly mention this journal. The Empire City Farms, Cuba, New York.

According to the Henderson Journal of Kentucky, a gentleman who is in a position to know, when talking about the scarcity of mules on the market and the remarkably high price the animals are bringing, said that there never were so few mules offered for sale as now. In St. Louis, where generally plenty of mules can be found, it is almost impossible to purchase any. A car load would exbaust the supply of mules in that city. When asked if he could give reasons for this state of affairs, he said that the United States was shipping more mules to foreign markets than was ever before known in the history of the country. He stated that 40,000 of the animals were used on the Panama Canal, and as the work is very hard, many of this number die every year and have to be supplier from the United States. This continued demand, which will continue for several years, will keep the price of mules up to the top notch. With these conditions and the outlook for high prices, farmers all over the country are turning their attention to mule raising.

Race No. 14—Coos County Derby—Running—1 1-8 mile, owned in District January 1, 1908, purse $400.
Race No. 15—Running—3-8 mile, 2-year-olds, owned in district, purse $100.
Race No. 16—Running—½ mile, Consolation for Non-winners, purse $150.

CONDITIONS:

All harness races to be governed by the American Trotting Association rules as far as practicable. All harness races to be mile heats. All entries to close with the secretary at the fair grounds at 12 o'clock, noon, **August 25th.**

Entrance in all purse races five per cent of the amount of the purse, and five per cent for winners; four or more to enter and three to start. No money given for a walkover. Entries not accompanied by the money will not be recognized. Nominations to be made in writing, giving the name, age, color, sex, sire, dam (if known, and where not known the fact shall be stated) and colors of the driver. This rule will be strictly enforced. In case the purses above given do not fill with four complete entries, the board has the power to reduce the amounts of the purses as in its judgment seems proper. The board reserves the right to declare a race off or postponed on account of inclement weather. Any horse distancing the field shall be entitled to first and third money only. In all purse races for harness horses the winning horse to have 60 per cent, the second 30 per cent, and third 10 per cent of purse offered, for running races 70 per cent to the first, 20 per cent to the second and 10 per cent to the third horse.

Except as above in all running races rules of the California Jockey Club will govern as far as practicable.

How to get to Marshfield: Take Coos Bay Steamers from San Francisco: M. F. Plant, Eureka and Czarina. Fare on horses $10 and up, according to valuation. Passengers $10.

From Portland: Take steamers Breakwater and Alliance, or any other steamer plying between Portland and Coos Bay. Fare on horses, $10 and up, according to valuation. Passengers, $10.

Address all communications to

BEAUTIFUL BELVEDERE!
—THE—
Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

TRAINING DISTEMPER...

Ever hear of this? Yes, of course, you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c. and $1 a bottle; $5 and $10 a dozen. Sold by all good druggists, horse goods houses, or express prepaid by manufacturers

WINCHESTER Shotgun Shells

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

When buying guns or ammunition remember that WINCHESTER SHELLS AND GUNS WIN

GREAT RACING AT SANTA ROSA.

Mona Wilkes Beats Sir John S. and Gets Pacific Coast Record.

Sensational horses draw the crowds. The announcement that Sir John S. and Mona Wilkes would meet at Santa Rosa iu the free-for-all pace the opening day of the Breeders' meeting, drew a larger attendance than has heen seen at that track on a first day in many years.. The crowd expected to see sensational speed and were not disappointed, for the mare hy Demonio 2:11¼ out of Trix by Nutwood Wilkes, beat out the great stallion Sir John S. 2:04½ in the second heat by a neck in the sensational time of 2:03¼ amid the cheers of the crowd. It was a wonderful mile for the first pacing race of the year on the circuit. They took the word for this heat about as near nose and nose as two horses could be seut away. Sir John, having won the previous heat had the pole and the mare was in outside position the entire mile. When the word was given ou the third score Sir John S. shot to the front aud reached the quarter in 31 seconds, Mona Wilkes being over a length behind at this point. At the half in 1:01¾, tbe two flying pacers were in the same relative positiou, but here Chadbourne hegan one of the greatest drives ever seen on a California track and the space between the two gradually lessened. At the three-quarters the mare was lapped on the stallion in 1:31¼, and the yell went up "She's got him!" Vance, the veteran owner and driver of tbe stallion began calling on his horse to stand off the rush of the mare, and though he responded nohly he conld not shake her off. Into the stretch they turned head and head. Vance shook his whip over the horse and Chadbourue, crouching a little lower in his sulky, with his teeth set in grim determination, gave the lines a slight shake which the little mare seemed to understand as she squatted a little lower and dug a little harder to get her nose in front. On they came, while alternate cries of "Sir John!" and "Mona." rang out from two thousand throats. Every man, woman and child were on their feet yelling like mad. It was a horse race, and the best ever seen on this side the Rockies. At the distance Mona had her nose in front of the stalliou hut he came again and in another stride was even with her once more. Chadbourne glanced at him out of the corner of his eye, seut Mona a wireless, and the mare was a neck to the good in two strides. Under the wire they flashed with Mona Wilkes a good neck in front of Sir John S. and 2:03¼ was quickly hung out hy the timers. Then the result was announced and Director Crowley stepped out on the track and told the people they had witnessed the fastest heat ever paced in California by a California horse, its only equal heing the mile of 2:03¼ made by the great John R. Gentry 2:00¾ at Los Angeles some years ago. When the mare was hrought ont for the r heat she and her driver were given an ovation, and there was also applause for the great stallion that had made her set a new record for the track. This heat was tame in comparison with the second, and the mare won it handily in 2:06¾, Mr. Vance driving hard as long as he saw a chance to beat the mare, hut wisely easing his horse up in the stretch and not punishing him. Sir John was heaten, but he was not disgraced, as the time of the second heat was more than a second faster than he had ever paced hefore, and being but a neck hehind he had gone the mile in practically the same time as that given the mare. The fact that he had made a heavy stud season and was not up to such a race was sufficient reason for his being heaten, and his admirers all predict that he will turn the tables on Mona before the season is over and get a record below 2:03¼.

It was two o'clock on Wednesday when starter A. C. Stevens of Woodland, rang the bell and called up the horses for the first race of the afternoon which was a $200 purse for two-year-old trotters. Three colts responded. Easter, a bay colt by Monicrat 29,789 grandson of Nutwood, driven by H. Rutherford; Prince Lock chestnut colt hy Zolock 2:05¼, driven by his owner G. A. Pounder of Los Angeles and Silk Hal, black colt by Hal B 2:04½ owned by D. B. Stewart of Seattle and driven by Fred Ward, were the starters.

On the strength of a reputed workout in 2:23 Silk Hal was made favorite at $10 to $8 for Prince Lock and Easter in the field. Starter Stevens only scored them a few times before giving them a pretty start aud as they trotted around the first turn it looked as if the favorite had been well selected. But here Rutherford set sail with Easter and be seemed to just walk away from the others and as he passed Silk Hal the latter broke and was soon third horse and a distance out. Silk Hal hroke the second time but finally made up a lot of ground. Easter won a handy mile in 2:27¼ with Prince Lock sccoud and Silk Hal third.

Easter was now the favorite at $10 to $6 for the other two, but when the three colts were sent off to a pretty start in the second heat Prince Lock began to show that he was of the McKinney family and was not headed during the whole mile, winning in 2:24, a good heat for two-year-olds in their first race. He won the heat by a leugth from Easter who seemed a little tired at the finish.

While Silk Hal seemed to have the most speed he made frequent breaks even in scoring and was not as good as he had shown in his work. The third heat and race went to Prince Lock in much the same fashion as the second, but in the final heat the hlack colt was secoud at the finish, the heat in 2:24¼

Prince Lock the winner of this race is by Zolock 2:05¼, dam Molahka by Nutford, and is an own brother to Zolabka that took a record of 2:23½ last year as a three-year-old. He is also full brother to the mare Wenja owned by Mr. Pounder, that started in the 2:24 class trot on Wednesday.

The talent having received an upset in the first race of the day, concluded they could surely pick the winner in the second race which was the 2:24 class trot for a purse of $1,000 and had six starters. They had seen Ted Hayes work his colt Alsandra a mile in 2:11¾ and they gave $10 for him while Fred Ward's mare Emily W. brought $7 and the field, comprising Lady Inez, Judge Dillon, The Statesman and Wenja sold for $5.

As soon as the word was given it was seen that the heat was between Alsandra and The Statesman. The latter is a stout made horse with regular action and great speed, and he out trotted Alsandra around the turn, but the colt hung on to him until he made a break and The Statesman marched out in front and Jce Cuicello brought Lady Inez up into second position. The half was reached in 1:06.

The other three by this time were floundering in the rear, Wenja having made a bad break and the others not seeming to be able to trot fast enough to keep up. Alsandra showed bis speed however and around the far turn he gradually worked up into second place and from the thre-quarters home the two leaders had a contest that was worth seeing. The Statesman finally winning it by a narrow margin in 2:11¾. Ivey drove the horse in a fine heat. Lady Inez was a good third and the other three saw Col. Marks of Ukiah wave the piece of red flannel without craning their necks.

A good start was given the three remaining horses in the second heat and as hefore The Statesman went to the front and led to the quarter. Alsandra made a hreak but quickly recovered. The two were lapped at the half in 1:06½, and again Alsandra broke hut got on his feet and kept trying. Another great race through the stretch resulted, but Ted Hayes in as good a drive as anyone ever saw heat the Madison horse a half length, with Lady Inez a good third.

In the third heat The Statesman made a break just after the word was given and Alsandra was in the lead at the quarter. Then he broke and The Statesman got in front and they went this way to the half in 1:08. Joe Culcello then brought Lady Inez up and she took the lead soon after passing the half and won very handily in 2:14.

The race now looked to be at the mercy of the Nutwood Wilkes mare as she was the freshest of the three, and she had little trouble in getting the next two heats in 2:17 and 2:16, second money going to Alsandra and third to The Statesman.

The free-for-all pace was then called. Sir John S. was favorite in the pools at $10 to $8 for Mona Wilkes, and quite a number were sold. When the horses appeared on the track the mare looked to be in the very pink of conditiou, which was undoubtedly the case, while several were making excuses for Sir John S. His coat did not have that polished appearance which is evidence of thorough grooming and good condition, but he paced with the same long easy stride that carried him to a mark of 2:04½ and a record of not a losing race last year. It did not take Starter Stevens long to get them off. Both were on their stride, but Sir John had the pole and got away nearly a length in front. As he rushed to the quarter in :31, the half iu 1:02 and the three-quarters in 1:34½ with the mare unable to get her nose in front of him it looked as if he were her master at the game. Chadbourne never quit driving Mona however and she never flinched. She had gone the entire mile at least ten feet out from her competitor and when they paced the last quarter in 30½ seconds, making the mile in 2:05 her head was nearer the winner's than when she went away. She finished game and witbout having received even a tap from the whip or a word from her driver, while Vance was compelled to touch his horse several times in the stretch to keep him in the lead.

Five minutes before the time was up Mona Wilkes was in harness again and ready for another try at it. The full time was up before Sir John came out however and it was very evident that the heat had told on him to some extent. The account of the second and third heats of this great race has already been given. It is not probahle that the time made in the second heat of this race will he beaten this year as there are to he no races at Woodland and that is the only track in the State that is as fast as the one at Santa Rosa.

The officials who were in the stand during the races on Wednesday were:

Judges—F. J. Kilpatrick, F. H. Burke and T. J. Crowley.

Timers—C. A. Durfee, S. B. Wright and John Thoms.

Starter—A. C. Stevens.

Clerk—Fred W. Thompson.

Before the regular events started a trotter and pacer were given time records. Results:

Trotting to heat 2:30:
Red Robin, b. s. by Robin (Whitehead)......2:25¼

Pacing to beat 2:25:
California Dillon, ch s. by Sidney Dillon (Turner) 2:18¼

Trotting, two-year-olds, purse $200:

Prince Lock ch. c hy Zolock-Molabka by Nutford (Pounder)	2	1	1
Easter, b. c. by Monicrat-hy Alto Rex (Rutherford)	1	2	3
Silk Hal, blk. c. by Hal B.-by Silkwood (Ward)	3	3	2

Time—2:27¼, 2:24 2:24¼.

Trottiug, 2:24 class purse $1000:

Lady Inez, h. m. by Nutwood Wilkes-by Ira (Cuicello)	3	3	1	1	1
Alsandra b. c. by Bonnie Direct-Alix B. 2:24½ (Hayes)	2	1	3	2	2
The Statesman, b. s. by Jas. Madison-by Algona (Ivey)	1	2	2	3	3

Judge Dillon, Wenja and Emily W. distanced first heat.

Time—2:11¾, 2:12, 2:14, 2:17, 2:16.

Pacing free-for-all purse $300:

Mona Wilkes, h. m. by Demonio-by Nutwood Wilkes (Chadbourne)	2	1	1
Sir John S., h. s. by Diablo-by Alcantara Jr. (Vance)	1	2	2

Time—2:05, 2:03¼, 2:06¾.

On Thursday the three-year-old trot was won by Don Reginaldo by On Stanley, driven by Fred Ward, in 2:19¼, 2:26¾ and 2:26½. Bessie T. by Zombro winning the second heat in 2:26.

The 2:15 was won hy Queen Derhy, driven by Joe Cuicello, taking the third, fourth and fifth heats in 2:11¼, 2:11¾ and 2:16¼. Silver Dick took first heat in 2:09¼ and Memonio the second in 2:09½.

——o——

J. C. Adams, Presideut of tbe Arizoua Territorial Fair Association, is now in the east where he is trying to secure some of the hest and fastest horses racing on the Grand Circuit, for the meeting at Phoenix in November.

PARK AMATEUR DRIVING CLUB.

Four coutests and a walkover made up the program of races at the stadium track in Golden Gate Park last Saturday afternoon when the Park Amateur Driving Cluh held a matinee. What gave promise of heing a hot contest between the club's Class A trotters Telephone and Vic Schiller, was ended after each had won a heat by the withdrawal of Vic Schiller owing to going severely lame during the second heat, Mr. Joseph mercifully pulling the gallant old trotter up and withdrawing him from the race.

Mr. H. M. Ladd won a nice race with his pacer Ringrose, defeating Zula and Toppy in straight heats.

Mr. J. W. Smedley won the event for Class C trotters also in straight heats with his handsome mare Red Velvet, Geo. Erlin's Moffat D. getting the place.

The Class B. trot took three heats to decide, Mr. Geo. Gay finally winning with Laddie G. the Zombro gelding, trotting the last mile in 2:18½ a splendid performance.

There was but one horse to start in the Class D. trot, and Mr. C. F. Von Issendorf drove his mare Cita Dillon the mile in 2:31 and was awarded the blue ribbon for the walkover.

S. Christenson acted as starter during the afternoon and did good work. The other officials were: Judges, A. J. Molera, G. Wempe and A. Melletz; timers, J. A. McKerron and N. Franklin; marshal, H. M. Ladd, and secretary, F. W. Thompson. The results:

Trotting, free-for-all:
A. Ottinger's Telephone (Ottinger) 2 1
A. Joseph's Vic Cchiller* (Joseph)............1 2
*Withdrawn.
Time—2:20, 2:33.

Class B, pacing:
H. M. Ladd's Ringrose (Ladd) 1 1
G. E. Erlin's Toppey (Erlin) 3 2
Captain W. Olsen's Zulu (Olsen)..............2 3
Time—2:16, 2:18.

Class C, trotting:
J. W. Smedley's Red Velvet (Smedley)........1 1
G. E. Erlin's Moffat D. (Erlin)................2 3
I. L. Borden's Barney Barnato (Borden)......4 2
A. P. Clayburgh's Charles II (Clayburgh) 3 4
Time—2:25½, 2:25¼.

Class B, trotting
George R. Gay's Laddie G. (Gay) 3 1 1
M. W. Herzog's Lady Nell (Herzog) 1 3 2
F. W. Thompson's Lady Washington (Thompson) 2 2 3
Time—2:22, 2:19, 2:18½.

Class D, trotting—C. F. von Issendorf's Cita Dillon a walkover. Time—2:30½.

GETTING READY AT CHICO.

Writing from Cbico under date of July 21st, Mr. L. B. Daniels says:

I have our new track in fine shape and when the Breeders come here in August they will be surprised because the horses will surely step some over it. We started on 75 more stalls on Monday and will soon have them completed as we have twenty men at work.

I will be at Santa Rosa for a day or so during the meeting to get a line on about how many horses are coming here. We want to have accommodations for all.

All the horses working here are doing well. Barney Simpson has seven head. His best one is tbe black mare by his stallion Arner 2:17¾. She has been miles around 2:14 with some fast quarters every few days. He also has two very promising Kinney Lous that belong to Col. Park Henshaw. One is a trotter, the other a pacer, and while they have only been worked a very little it looks as though 2:25 would be easy for either right now.

Mr. Sangster came up from Marysville last week with seven head. They all look to be in fine shape although I have not seen them at work yet.

I bave eight head in my string, five of them by Moormont. They are all doing nicely. My little filly Gladys Moor trotted a mile here at our matinee on the 4th in 2:29¾. I worked her a mile in 2:27½ this morning, with the last quarter in 34 seconds. She suits me. The hest in my string is Harold B. the hig chestnut pacer by Kinney Lou. It has got so that 2:10 is easy for him, and the boys will have to look out for him next year in the slow classes.

WOODLAND DRIVING CLUB.

The third matinee of the Woodland Driving Club took place last Saturday and was well attended. All the events were decided in straight heats, but there were several close finishes and the races were most interesting. The results:

Special, pacing:
Seymow M. (Montgomery) 1 1
Tubelina (Rodman) 2 2
Time—2:16½, 2:17.

Class A:
Herbert Dillon (Herspring) 1 1
Domingo (Montgomery 2 3
Robin (Rodman) 3 2
Time—2:27, 2:24

Class B:
Hattie Hero (Jacobs) 1 1
Maywood (Norton) 2 3
Banker G. (Whitehouse) 3 2
Time—2:52, 2:41.

SOME MORE ABOUT MINOR HEIR.

"He is here." The successor to Dan Patch has arrived in Minor Heir, 2:01, a record made in the second heat of tbe 2:25 pace at Terre Haute Friday. All the high estimates that have been made of him are now justified and more so, says a correspondent of the Chicago Horseman. When Charley Dean stated privately to some friends who were visiting him one workout day, a short time before the Dean stable was shipped away to the races, that Minor Heir was the fastest horse in the world, not a man present failed to discount his judgment on the dapper bay pacer, although admitting his handling of The Broncho would make him able to not only judge the class of horse he was getting ready but a two-minute rate of speed was not a novelty to him, and known to be a man of cool judgment with conservatism, his policy in all things, it now dawns upon the men that heard his prophecy that he was right and more than right.

What Minor showed at Peoria was completely eclipsed by his performance against The Eel at Terre Haute in the 2:25 pace. His first two heats last week were in 2:01½ and back in 2:01 slowed down in each heat certainly as much as half a second.

Each mile he went to the half in 1:00 flat and the second mile he was at the three-quarter pole in 1:30 and in this mile it is certain that he could have finished the mile beyond a doubt in 2:00. That he is a champion is the opinion of all the greatest reinsmen that saw his thrilling performance. Some of their opinions:

Mr. Geers—He is the fastest horse we have ever had; can beat all pacers. Outclasses Baron Grattan, Citation and other 2:04 pacers by long odds.

W. L. Snow—He is faster than Dan Patch; can beat two minutes easy and can wipe out the unsbielded record of 1:59 to-day.

These opinions seemed to voice the judgment of the horsemen after the race. Now that he is both holder of the record for fastest new performer and also holds the world's record for fastest five heat race, a little history of his handling may be of interest.

He is now six years old, a dark bay in color with black points and is as trim in model as any harness horse living. He is even more showy in action than John R. Gentry. He has what might be termed a short back and strong coupling, nicely moulded quarters and a perfect set of legs both in size and conformation. His legs were fired when a colt for splints but otherwise are to the eye perfect.

His breeder, J. B. Ewing, Roseville, Ill., sent him as a four-year-old to A. D. Patton of Humboldt, Iowa, who brought him up to a mile in 2:14¼. In the early part of 1907 he was kept in the stud at Mr. Ewing5s livery barn in Roseville, Ill., Minor having thirty-five mares bred to him. On July 7, 1907, he landed at Dean's Farm, Palatine, Ill., and his training began for the year. Up to that time he had never displayed any thing to warrant his future greatness. He was well liked and made a couple of starts, the last one being at the Kalamazoo, Mich., fall meeting, where he was timed a mile in 2:11, and surprised a few people by his showing. He was then shipped hack to the Dean establishment and during the winter became the property of P. C. Isaacs, Storytown, Pa., the purchase price being $4,500, which looked to be his full value. During the latter part of the winter and as late as the early part of May he was quite thin in flesh, and plainly showed the effects of his sickness to such an extent that some men of wide experience thought it doubtful of his getting into good form this year. His early spring work and in fact his training all season has been a series of surprises to hoth his trainer and the critics who frequent the Palatine training quarters during the spring fitting. A mile in 2:08¾ was easy for him with the last half in 1:03¾ and a quarter in 29 seconds over the half mile track (faster than ever The Broncho had paced one over the track) still failed to impress anyone but Mr. Dean that Minor Heir was a "phenom," and a quarter at Peoria in '27 4-5 did not prepare the public for what he did at Terre Haute. After his two miles in 2:01½ and repeated in 2:01 pulled up each time they are fully aware that the fastest horse yet foaled is now here.

Some say every champion has a different gait and I think this is true of Minor Heir. At a 2:20 clip he seems to rock a little but when stepping a quarter in 30 seconds each leg seems to be hurled forward by a powerful spring and he seems to strike hut the tips of his toes to the ground and hound away like a ball. He is one of the plainest rigged and shod pacers that I have ever seen, wearing a six ounce bar shoe in front, perfectly plain save for a small straight calk at the heel, set straight with the shoe. The web of the shoe is perfectly flat and offers not the slightest resistance to the ground. The hind shoes weigh tbree ounces and are of the bar pattern also with a slight rim projection. He is driven in a blind bridle, carries his head very comfortably, just at medium height and when scoring or jogging slow he has the cockiest airy way of trotting ever seen. He wears front tendon quarter and cornet hoots which is his full racing complement of protection.

A champion never appeared before that was made practically in one year, the ones of the past taking years of training and a gradual reduction of their records taking place until their final achievement. Such has not been the case with Dean's horse, his total work being a spring's training as a four-year-old and from July on as a five-year-old and the present season's story is told. He is a northern trained half-mile track product that equals anything in the line of pacers yet produced and excels any pacer living or dead in his ability to go heats and carry his dizzy flight of speed to the finish. Not to the most experienced eye did he display the least sign of being all in and lobbing home as some of our champions have done at the end of their great miles.

Never has any of our great champions been able, asked, or allowed to do as was the case with Minor Heir such great flights of speed in one day. In his five heats three halves were paced in one minute flat, another was done in 1:00½. Eight different quarters were paced in 30 seconds or better and another in 30¼, which would have put any previous champion out of business.

He makes the second pacer Dean has marked in 2:01 or better, which is a world's record for one trainer and places the Palatine man again in the spotlight as a speed maker. I visited Minor Heir's stall Saturday morning after his race and not tbe slightest sign of his awful performance was visible. That he is a champion is certain and where he can place the record without the use of wind shield time alone can tell.

JACK LEYBURN 2:04¼.

The race trotted by Jack Leyburn at Terre Haute was a brilliant one, but his race at Detroit last Monday where he won in 2:05½ and 2:04¼, making a new record for trotting geldings in a two heat race, was a brilliant performance. "Jack Leyburn," says the American Sportsman, was one of last season's successful Grand Circuit performers. His record was made at Lexington in a winning race. During the season he was pitted against many of the fastest trotters of the season, and indicated again and again that he was an extremely fast trotter, and to those who were advised as to his ability, his record of last week will not furnish any great surprise. He was a successful money winner, and while he won only two races in the Grand Circuit, he won something like $7,000 in purses. He started eleven times and retired with two first moneys, four seconds, four tuirds, and was once fourth. He had some previous racing experience, for as a three-year-old he had started in three races securing a record of 2:15½. He is now six years old, and did not race as a four-year-old. His first start for this season was at Terre Haute in the 2:09 trot where his three winning heats proved to be the world's record for the fastest three heats for a trotting gelding. The former record was held by W. J. Lewis, whose three heats in 2:06¼, 2:06¼ and 2:06¼ an average for the three heats of 2:06¼ were the tastest until reduced last week. The time for Jack Leyburn's three heats, which are now the world's record for a trotting gelding were 2:07¼, 2:06¼ and 2:04¾, an average of 2:06 for the three heats. Previous to that week the fastest heat ever trotted in a race was 2:05, record held by Sweet Marie, which has now been reduced hy the performance of Jack Leyburn to 2:04¾. The fastest two heat race ever trotted by a gelding up to Monday last was the 2:05¾ and 2:06 of the Monk in 1902.

The facts briefly recited here are of sufficient importance to give Jack Leyburn a place among the fastest trotters, and so brilliant a mile at the beginning of the season will serve to attract more than the usual attention to him.

He has a splendid trotting inheritance. Briefly told, he was sired by Alto Leyburn 2:24½, he by Allerton 2:09¼, he by Jay Bird. Alto Leyburn's dam, Criterion 2:29¾ (dam of seven) hy Crittenden; grandam Mamie by Star Almont 6673.

Jack Leyburn's dam is Elsie Leyburn 2:27¾ by Expedition 2:15¾, he by Electioneer. His grandam, Skillful 2:17½ by Onward 2:25¼, while his third dam is Mamie by Star Almont, grandam of Alto Leyburn 2:24½. Star Almont was a son of Almont 33, out of a daughter of Blood's Black Hawk. This is strong trotting blood reinforced by creditable records on both the sire and dam's side.

Jack Leyburn was bred by P. P. Parish, Midway, Ky., raced last year by Edward and Thomas Madden and sold by them last winter to his present owner, Senator James P. McNichol of Philadelphia.

Lon McDonald's sensational trotter, Amy Brooks, is a light bay mare of medium size, a bony head and somewhat light neck. She is very muscular, however, and has especially heavy quarters. She wears a nine-ounce barred shoe and two-ounce toe weights in front, the toes of her shoes being slightly squared. Behind, she wears perfectly plain and rather light shoes. Her gait is not showy, but is powerful, heing round and true, both in front and behind. She carries her head low, much as McDonald's other great trotter of a few years ago, Sadie Mac, 2:06¼, did, and McDonald owns up that this feature of her way of going had much to do with his purchase of the mare. When McDonald first began Amy Brook's preparation for her campaign at Selma, Ala., last winter, she did not act as though she would fulfill her promise of the fall before, and not until in March were much hopes entertained that she would be ready to start in her early stake engagements. Once she started to improve, however, she came into form rapidly and a month ago it was seen that she was a trotter of unusual merit, although even McDonald had no idea that she would he able to beat 2:06 the first week in July.

Drink Jackson's Napa Soda.

TROTTING AND PACING RACES.

For quite a length of time there has been a fierce campaign waged against the running meetings as gambling institutions, but this has really had no influence on the popularity of light-harness racing. Everybody seems willing to admit that without the income from gambling privileges the running horse meetings would bring financial deficits. It is claimed that it is demoralizing to the characters of the young men of the nation to allow open gambling, and it is this class that will soon be the leaders in our business affairs. As one writer puts it: "The racing form was carefully studied daily and favorites on the day's events were installed on the merit of their previous performauces. The bettor did not know the condition of the horses nor of the track, nor who would have the mount in many instances, and was almost sure to lose his money. Speculation on racing events assumed such proportions and the demoralizing effects were so pronounced that the most of the States have enacted legislatiou prohibiting bookmaking on races under the penalty of both fines and imprisonment. With the light-harness horse meetings it is different, for they are supported hy not only the gate receipts, but from the entrance fees as well. Just think of the multitude of people who attend the meetings when it is announced that some champion trotter or pacer is to appear, for the stars are by no means few at the present time. They are coming right along with each succeeding season, and long ago Flora Temple was sure to bring out the masses, only to be followed by such fleet ones as Goldsmith Maid, Dexter, Nancy Hanks, Joe Patcheu, Robert J., John R. Gentry, Alix, Cresceus, Dan Patch, etc. Now we have our Sweet Marie, Highball, Sonoma Girl and others that attract equally as large crowds. Thus large gate receipts are received and many times they are sufficiently large enough to defray all the expenses of the meet. The people after witnessing the performances of some of the stars become more infatuated with the harmless sport, their admiration of the light harness horse is increased, and it proves to be an ample inceutive to bring forth such an attendance that attractions for betting are not necessary. The entry fee and the percentage deducted from the winners promotes successful trotting and pacing meetings, and, sometimes, these receipts exceed the amount of the stake or purse hung up. The addition of the admission and grand stand fees, except in inclement weather, amply insure against financial losses. There is another thing that might he mentioned in this connection, and that is that uearly oue-half of the harness events are brought off in connection with State, county and district fairs as special attractions for the people. As has been said, and truly, too, "the trotter is able to maintain his popularity as a speed performer without concomitants of gambling. The men who are racing trotters and pacers follow the sport as a pleasing pastime and not as a function of speculation. Many of the best trotters in the his.ory of the turf have been sold at fabulous prices for pleasure driving purposes. Aside from racing performances speed has a commercial value that appeals to the wealthy classes for recreation and road use."

EIGHTY-SEVEN STILL ELIGIBLE.

The July declarations in the $50,000 handicap which will be raced at Readville on August 24, the week of the Grand Circuit meetiug, leave a magnificent total of 87 horses still eligible for the final payment on August 22. Moreover, not a single notable horse that was nominated has been dropped. This practically insures a field of starters such as in quantity and quality have never before turned for the word on a race track either in this or any other country and promises to provide a thrilling spectacle on that notable occasion. As the day for the race to be decided draws nearer, the demand for seats increases, but the management has made provision to handle the crowd, no matter how large its numbers.

The programme is a very attractive one. The total of the purse offerings is $95,000, the largest ever given by any association for a single meeting. The Massachusetts, for 2:14 class trotters, purse $9,000, will be raced on Thursday. The two-year-old trotting and the three-year-old pacing divisions of the American Horse Breeder Futurity, for foals of 1906 and 1905, respectively, will be decided on Monday; the three-year-old division of this futurity, for foals of 1905, on Friday.

There were very few horses declared out in the various events on the July payment. In the Massachusetts only one horse was dropped, and in the others the numbers were comparatively small.

A feature of the programme will be a consolation handicap race, to be decided on Saturday, August 29, a stake of $25 each, with $1,000 added by the association, open to all trotters which start at the meeting and do not win $200 or more. Conditions will be the same as those governing the big handicap race, with the exception that the purse will be divided 50, 25, 15 and 10 per cent.

The bay horse Congressman Sibley 2:09¼ by Cecilian, by Electioneer, dam by Mambrino Egbert, dropped dead from heart disease at Fort Collins last week while being worked out on the track. He was formerly owned by Judge E. A. Colburn of Colorado Springs, but more recently fell to J. L. Gray of Fort Collins.

BEAUTY AND UTILITY.

The quality of beauty is a theme as old as poetry or philosophy. Objective and subjective beauty have confounded wise men and scholars for ages, and we are still deceived by those pleasing forms that we regard as one kind of beauty and those utility characters we look upon as beauty of another kind. In one respect all those things which please the eye and do not offend the senses are primarily beautiful. But these may hold little of beauty for other eyes expert in detecting the fitness of things. To such eyes the useful is more beautiful.

This higher form of beauty is discovered in degree according as the subject is more or less expert in knowledge and judgment respecting the use of the thing for which it was created. But as no one may hope to become so wise as to measure with exactness the valuc of utility and ornamental parts we are likely always to find room to differ about the two kinds of beauty in one object, no matter whether that object is a twenty-story office building or a trotting horse. Always we are likely to have the quality and respective value to consider of that kind of beauty which is merely ornamental—pleasing to the eye and other senses—and that kind of beauty which derives its quality from its usefulness; its fitness for the uses to which it is put.

Young horsemen in particular, and many, too, who have known the trotting horse for years, are unable to fairly judge the worth of a horse because they are not skilled in separating the horse's objective and subjective beauty. To do this is not a very difficult matter if one goes about it in the right way. The two may be separated and judged apart, and a judgment reached in this way will give a better idea of value as a whole than any judgment reached by a consideration of the horse as a whole.

The average man will judge a trotting horse by his objective beauty marks. These are the things that stand out promiuently. They are conspiculously in evidence and attract so forcibly that the subjective beauty parts—the essential trotting horse qualities—are obscured.

A good looking horse fills the eyes of all horse lovers. But the good looking horse with defects fatal to the work for which he was created does not deceive the expert judge. He looks beyond the pleasing parts to learn if those parts which have to do strictly with utility are of proper forms and expression. A good judge feels all the mere ornamental beauty a horse may have and feel the quality, too, of that beauty which grows out of the utility parts. So that the beautiful horse makes one impression on a class of judges who are carried away with objective beauty and another impression on those who are able to look beyond this and measure subjective beauty.

Some people who are counted fairly good judges of a trotting horse are so sensitive to the effects of mere objective beauty that their judgment of the worth of the utility parts is seriously impaired. The horse with a beautiful head, beautifully carried on a beautiful neck is an attractive creature, particularly if he has a large eye with a pleasing expression. If his fore top and mane are of good length and lie well, these add to his beauty or pleasing appearance. If his coat is flat and glossy, his tail of good length and carriage the ornamentation is improved. If he is clean of limb and free from small blemishes his beauty is still further heightened.

We see all these things in the beautiful horse in repose. We are attracted to them. They command our attention. We admire them individually and collectively. As we go over them from different points of view the presence of these beauty parts and their harmony become fixed in our mind's eye, and the absence of blemishes calculated to mar the beauty of the whole makes the impression still more pronounced.

If the horse has a kindly yet spirited feeling and expresses it in his movement his beauty is greatly enhanced. It is difficult to feel that this is not a good horse. He looks it and acts it. And by his looks and acts many fair judges are deceived.

Instead of allowing these obviously beautiful parts to attract him to the extent of deception the really good judge of a trotting horse separates the objective and subjective beauty parts, measures each by itself and reaches a final judgment of the horse's value as a whole. The good judge likes the ornamental in the trotting horse. He puts a fair value on pleasing parts and style. But he does not count these the essential qualities of the horse, and is not blinded by them to the horse's greater beauties or faults.

No horse will trot faster for having what we all regard as a beautiful head. We like to have such a head on our horse. We like such ornamentation as beautiful mane, tail and coat. But we kuow and should always bear in mind that these things neither help nor hinder his speed. It is the superficial judge who is carried away with the beauty which is mere ornamentation and concludes the handsome horse with a pleasing harmony of bad utility parts is a good trotting horse. And it is this same superficial judge who pronounces against the "homely" horse which may have an abundance of quality in all those parts upon which his usefulness depends.

Measuring the worth of those beauty parts of the trotter that are purely ornamental is a matter of the greatest simplicity. Almost any one with half an eye for a horse can pick out beautiful horses. It is all a matter of impression. These beauty parts do not have to be sought with a keen eye and mental acumen. They seek the judge. They stand out boldly and attract. They please. The judge has only to stand and look. Serious thought is not necessary. The beautiful forces recognition.

Not so with those forms and combinations of forms the expert judge calls beautiful parts and a beautiful harmony of parts in the trotting horse. It requires knowledge, born of experience and study, to know what kind of shoulder formation is necessary in a horse which will trot fast and easily. It requires a discriminating judgment in those who really know to decide just how much slope of shoulder is best, just what degree each angle should have, just how much width there should be and just how the whole sboulder formation should operate to give the horse balance and a free, easy forward action. The placing of the feet depends upon the shape and set of the shoulder, and if we are not able to decide upon the exact points of contact for the feet with the ground, the more we know of forward action from actual study, the better will we be able to find these best points of contact, and by artificial means remedy defects.

The man who is familiar with the working of various kinds of shoulder conformation has not, as might be supposed, an ideal shoulder. He had it once upon a time, but experience and study taught him something of the law of harmony of parts, and he learned that different types of horses needed different types of shoulders and these good shoulders were a modification of his ideal.

This kind of beauty expressed in shoulder conformation is not for the superficial judge who is easily impressed with ornamental beauty. The beautiful shoulder is only beautiful to the student who is able to recognize it when he sees it.

And so with the shape and set of the hind legs as related to other speed parts. And so, too, with strength of hack and quarters. The good judge has a good idea of the amount of strength that is necessary in these parts to maintain a good action. Too much substance is lumber. Too little is weakness.

With good action and sufficient strength to maintain it there must be enough volume of lung power properly placed for the horse to endure the strain of a fast pace. And all these utility parts of strength, action and lung power must be harmoniously adjusted. It is the practiced eye that recognizes this adjustment and detects at once those parts that are out of harmony with the whole utility machine. According as this adjustment is good or bad, according to the quality of the separate parts themselves, the measure of their beauty as a whole is reached.

We often see a very "homely" horse on the race track beating with ease a number of horses with great objective beauty. And people who do not know good parts when they see them marvel at the results. They are carried away with the ornamental beauty of the horse with poor utility parts, and overlook or are not able to recognize the real quality of the utility parts of the "homely horse."

In brief, to judge a horse well, and do it with ease, the safest plan is to first study the two kinds of qualities necessary to take into account. To know all those parts which have to do with mere ornamentation and to know those which are essentially utility parts. Once these two groups of parts are fixed in the mind as separate entities, it becomes a simple matter to look at a horse and fix the attention to either one group of parts or the other. A little practice will enable a man to look over all the utility parts of a trotting horse without being blinded or in any way influenced by the presence or absence of ornamental parts. With the two separate groups of parts in his mind a man may reach a more satisfactory judgment regarding a horse's worth than he can by viewing the horse and allowing one set of parts to crowd the other in his mind. A little practice is all that is necessary for a man to separate the ornamental from the useful and to see each clearly by itself.—C. B. Whitford in Chicago Horseman.

The programme that the New England Breeders' Association has announced for the Grand Circuit meeting at the Readville track August 24-29, is the most remarkable in the history of the trotting turf. For six days raciug the sum of $95,000 is hung up for the harness horses. This is the largest amount of money ever given at a trotting meeting. By adding another day to the programme the association has made it possible for the horsemen to race the greater part of their horses twice the same week, which will make up for the vacant week between Readville and Hartford.

The Readville people have advertised the Consolation handicap, a stake of $25 each, with $1,000 added hy the association, open to all trotters which have started and not won $200 or more during the meeting. Race to be the same distance and conditions governing the American Trotting Derby. Stake and added money divided, 50 per cent to winner, 25 per cent to second, 15 per cent to third and 10 per cent to fourth. Entries to consolation handicap close August 23rd, at 7 p. m. The Readville folks are not only enterprising but they are original.

The American Horse Breeder says that it is a singular fact that the trotters Amy Brooks 2:05¼, and Fleming Boy 2:07½, two of the first four new 2:10 trotters of the season, are not eligible to registry as standard under the present rules of the American Trotting Register Association, and none of the produce of Amy Brooks 2:05¼ will ever be able to get into the standard department of that re[illegible]

NOTES AND NEWS

CALIFORNIA HARNESS RACING DATES.

Santa Rosa (Breeders' Meeting)	July 29-August 1st
Oakland	August 10-15
Chico (Breeders' Meeting)	August 19-22
Sacramento (State Fair)	August 29-Sept. 5
Bakersfield	September 14-19
Tulare	September 21-26
Fresno	September 28-October 3
Hanford	October 5-10

NORTH PACIFIC FAIR CIRCUIT.

Bellingham, Wash	Aug. 24-29
Everett, Wash	Sept. 1-5
Seattle, Wash	Sept. 7-12
Roseburg, Oregon	Sept. 7-12
Salem, Oregon	Sept. 14-19
Portland, Oregon	Sept. 21-26
North Yakima, Wash	Sept. 28-Oct. 3
Spokane, Wash	Oct. 5-10
Walla Walla, Wash	Oct. 12-17
Lewiston, Idaho	Oct. 12-17
Boise, Idaho	Oct. 19-24

THE GRAND CIRCUIT.

Detroit	July 27-31
Kalamazoo	August 3-7
Buffalo	August 10-14
Poughkeepsie	August 17-21
Readville	August 24-28
Long Branch	August 31-Sept. 4
Hartford	Sept. 7-11
Syracuse	Sept. 14-18
Columbus	Sept. 21-Oct. 2

GREAT WESTERN CIRCUIT.

Peoria, Ill.	July 3-10
Terre Haute, Ind.	July 14-17
Pekin, Ill.	July 21-24
Springfield, Ill.	July 28-31
Kalamazoo, Mich.	August 3- 7
Galesburg, Ill.	August 11-14

Dubuque, Ia.	August 24-28
Hamline, Minn. (State Fair)	Aug. 31-Sept. 4
Milwaukee, Wis. (State Fair)	Sept. 7-11
Peoria, Ill	Sept. 14-18
Springfield, Ill. (State Fair)	Sept. 25-Oct. 2

Mona Wilkes 2:03¼.

This is the Pacific Coast record.

And was made Wednesday, July 29th, 1908, at Santa Rosa track.

Justo (3) 2:13½ is a full brother to Alceste 2:09¼, being by Jay Bird out of Eastmorn by Baron Wilkes.

The 2:10 list is growing so rapidly that in tabulating pedigrees now-a-days but little attention is paid to recording any performances slower than 2:10.

W. A. Clark Jr.'s discard, Spill, seems to be winning right along where the heats are between 2:06 and 2:08. His record is now 2:06¼ and he can reduce it.

The Expedition blood is showing up pretty well. Camara, sire of Fleming Boy 2:07¼ is by Expedition and the dam of Jack Leyburn 2:04¼ is by the same horse.

Will Durfee has declared Del Coronado 2:09¾ out of the $50,000 handicap. The stallion has made quite a season since he was taken east and Durfee wisely concluded not to start him in the big race.

James Sterling has taken charge of J. Ryan's string of trotters and pacers at Sonoma, among which is tbe good one Bill Baily who promises in Mr. Sterling's hands to make a good showing in tbe races this fall.

In the list of entries sent out by Secretary Powell of Fresno, Vallejo King was named in the three-year-old pace, when he should have been placed with the two-year-old trotters. This colt is by Gen. J. B. Frisbie.

On being questioned by one of his fair parishoners as to why he drove fast horses, a Pennsylvania clergyman said: "Madam, when the infidel, the agnostic and the unbeliever try to pass me on the road I show tbem the vanity of worldly things."

The well known horse breeder Col. M. W. Savage of Minneapolis, Minnesota, sells none of his fillies and is keeping all those by Dan Patch 1:55¼, Directum 2:05¼, Cresceus 2:02¼, and Arion 2:07¾, for future brood mares.

Mr. Geers says that Minor Heir 2:01, is the greatest pacer tbat has yet appeared, and believes he could beat the unpaced record of 1:59¼ any good day and track, and, further, that he can beat any pacer living in a race of heats. Anyone with a chip on his shoulder, please take notice.

Director Frank H. Burke of the State Agricultural Society will meet representatives of the Chico, Woodland, Stockton and Sacramento driving clubs at Sacramento this evening to confer with them regarding plans for club races during the State Fair in September.

Zomalta 2:08½ by Zombro 2:11.

Copa de Oro 2:04¼ by Nutwood Wilkes 2:16½.

The Santa Rosa track now holds the State record for pacers.

Demonio 2:11¼ has a new 2:10 performer in Memonio 2:09½.

Zomzro 2:11 now has five in the 2:10 list and three of them trotters.

George G. 2:05¼ has been declared out of the $50,000 handicap.

Amy Brooks 2:05¼ is eight years old and bas raised a mule colt.

The Readville people will distribute $93,000 in purses and stakes at the big meeting in August.

Nutwood Wilkes has now joined the list of stallions that have produced two 2:05 performers.

The Nevada Agricultural Society will hold a fair and race meeting at Reno from September 7th to 12th

The new fair association at Seattle is building a grand stand large enough to seat twenty-five thousand people.

Tbere are prospects of a race this year between Highball 2:03¾ and Sweet Marie 2:02. If it comes off it should be worth going a long distance to witness.

Nine new performers for Washington McKinney and a 2:10 performer for his full brother Geo. W. McKinney is a pretty good record for one family in one day.

Sidney Dillon, Robiu, Zolock, Monicrat, James Madison Bonnie Direct and Nutwood Wilkes had new standard performers to their credit as a result of the first day's racing at Santa Rosa.

Silk Hal, the two-year-old colt owned by D. B. Stewart of Seattle, is by Hal B. 2:04½ out of a mare by Silkwood 2:07. On his breeding he should pace, but he is a trotter and a fast one.

Vallejo parties have organized a club to hold racing every Saturday and Sunday. One harness race and three or four running races make up the program and give the books a chance to make a few dollars.

The race at South Park, Eureka, on June 19th, between the mares Belle Stocks and Gladys B. for $500 a side was won by Belle Stocks. Gladys B was favorite and won the first heat in 2:24, after which Belle Stocks won three heats in 2:25, 2:25½ and 2:26¼.

Mr. G. A. Pounder of Los Angeles got the best and the worst of it when he started Prince Lock and Wenja, full brother and sister on the same day at Santa Rosa this week. He got first money with one and the flag with the other.

Such a race as was put up by Mona Wilkes and Sir John S. at Santa Rosa this week is seldom seen, and when it is considered that these two great pacers were sired by the full brotbers Demonio 2:11¼ and Diablo 2:09¼, it is a still more remarkable performance.

Twelve stakes of $1,000 each, and two of $2,000 is the menu for the horsemen who take their trotters and pacers to the Arizona fair this year. Entries close September 15th and the program will be fonnd in our advertising columns this week.

Charles Flanders of Cathlamet, Washington, recently purchased a royally bred filly called Belle Orena. She is by Zombro 2:11, first dam by Adirondack, second by Rockwood, third by Bellfounder 62, fourth by Comet and fifth by Waterloo. Belle Orena is a very handsome mare.

Congratulations to Geo. Estabrook of Denver. He has won the M. & M. and doubtless feels happy. We would rather he had won it with the California bred mare Perfection, for which he paid $10,000 and then was so uufortunate as to lose her. But he has won it and here's hoping he may do it again.

Eleanor Gates Tully, the authoress, has purchased a number of Arabian horses from Homer Davenport, and will exhibit them at the California State Fair. Horse breeders will be pleased to learn that this exhibition is to take place as it will give them a chance to inspect these much talked about horses.

The California State Agricultural Society will give two cup races during the fair next month, one for trotters, the other for pacers. Any horse that has trotted or paced in a matinee race, and is owned by a member of any driving club, is eligible to entry. If more than three horses are represented, only two will be allowed to enter from each club. The horses must be driven by an amateur. A valuable silver cup will be given to the winners of the first places of each race, and a bronze or copper cup will be given to the winners of the second places.

W. J. Kenney, 531 Valencia street, sold a number of new carts this week. A very handsome road cart was shipped to Dr. Tucker of Oroville, Charles Spencer of Woodland purchased a new black sulky and H. Schottler got a McMurray long shaft speed cart that is a daisy. Kenney has three or four good second hand road carts for sale at greatly reduced prices.

Tbird payment of $100 was made on 87 trotters nominated in the $50,000 Readville handicap. The total amount received in entrance from these three payments is $31,300. Tbe last payment is the fourth, which is due August 2d, the sum of $200 being then payable on each horse that accepts the bandicap. The big race will be a success financially and otherwise.

The Chico Driviug Club will hold a meeting on August 5th for the benefit of the Chico Free Library. Harold B. a five-year-old pacer hy Kinney Lou, bred by Col. Park Hensbaw, but now owned by the Barnard Livery Company of Chico, is to be driven a half mile against time by his trainer, L. B. Daniels. It is tbought this green pacer can cover the distance in very close to one minute.

Corning Girl, the yearling pacer by Loring, son of Nazote, paced a half mile in 1:12¼ at the Woodland track one day last week, and as she seems to thrive on work, may succeed in reducing tbe world's yearling pacing record of 2:20¾ made by Belle Acton on October 14th, 1892. Mr. F. N. Frary is pointing Corning Girl to lower this record and the Woodland borsemen who have seen the filly at work believe she will be able to do it if she keeps sound.

Jack Leyburn's three heats in 2:07¼, 2:06 and 2:04¾ establish a new world's record for a trotting gelding for a three heat race, the average of the three heats being just 2:06. W. J. Lewis formerly held this record with an average of 2:06¼. Jack Leyburn's three heats come near to being tbe best in a race for trotters of either sex, averaging only a small fraction of a second slower than the world's record made by Alix in 1894, also over the Terre Haute track.

Kendig that won two heats in the 2:18 pace at Detroit on the opening day of the meeting is by Rokeby 2:13¼, son of Director and Lilly Stanley 2:17¼ the mare that the late William McGraw raced through the California Circuit for Coombs Bros. twenty years ago.

Demonio 2:11¼ now has a faster performer to his credit than any of Bertha's famous sons. Demonio's full brother Diablo 2:09¼ is the sire of Sir Albert S. 2:03¾.

Joe Hamilton sire of Kate Hamilton, dam of Zomalta 2:08½, the latest addition to Zombro's 2:10 list, is by Echo 462, out of the thoroughbred mare Belle Mason by Williamson's Belmont, grandam Lucy Johnson by The Pony, great grandam Catalpa by Frank, etc. Belle Mason is recorded in volume four of the American Stud Book. Joe Hamilton is a full brother to Bob Mason 14,438, and Re-Echo 14,439. Bob Mason is sire of Waldo J. 2:08, Fred Mason 2:09. Virginia 2:09½, Blasa 2:12¼, Rozelle 2:14, and others.

Horses bred at Brooke Nooke Ranche, Montana, are making a good showing at their first appearance this season. Star King, a four-year-old gelding by Keeler 2:14¼, stepped a mile in 2:17½ at Butte, Mont., the first week of July; Minimum, by Alcone, another Brooke Nooke horse, gained a record of 2:21 at Butte; Alt, a green pacing gelding by Alcone, won a race of half-mile heats at Albany, Ore., July 3rd, stepping one heat in 1:06 and the remaining two in 1:05 each, and Lost Bird, by Alcone, won the three-year-old trot at Albany with his best mile in 2:48½.

When Jack Leyburn trotted that great race at Terre Haute in 2:07¼, 2:06 and 2:04¾, the California bred stallion Sterling McKinney 2:09¼ was third each heat and a good third at that. A correspondent of The Horseman says: "I don't think any horse has made as much improvement in appearance as has Sterling McKinney over his looks last fall at the time of his retirement. He was considered quite homely then, but is now as fat and round as a show horse and up to more than he could do at the close of 1907. Shuler has improved him both in manners and looks and be trotted a sparkling good race, being timed better than 2:07 in Jack Leyman's 2:04¾ heat.

A magnificent grand stand will be erected at the Golden Gate Park stadium. The plans adopted are from one suggested by Mr. Frank J. Kilpatrick of this city and drawn by Reid Bros. It provides for ten rows of seats all tbe way round the three-quarter mile oval and when completed will seat 100000 people. It will, however, only be built in sections, the first to be about 300 feet long. In this there will be a grand entrance to the seats and the field. Under tbe seats will be dressing rooms for the participants in athletic and other events to take place in the stadium arena. Other sections will be built year after year as required until it is expected the building will extend the entire circuit of the track. Under one section it is proposed to construct stalls where horses may be cooled out after speed contests on the track.

A WORLD'S RECORD.

At Sauta Rosa ou Thursday of this week Mr. Frank J Kilpatrick owner of the stallion Washingtou McKinney, gave nine of the get of that horse standard records. This is a world's record and a wonderful performance. Full particulars next week.

JOHN R. GENTRY'S CALIFORNIA RACES.

After Mona Wilkes won the second heat of the free-for-all pace at Santa Rosa on Wednesday last in 2:03¼ there was considerable talk about the California record. Mr. Marshall's mare had paced the fastest heat ever made in California by a California bred horse, and the time had only bcen equalled in this State when the great pacer John R. Gentry 2:00¾ raced at Los Angeles in 1899. At the meeting in the southern metropolis that year, John R. Gentry 2:00¾. Joe Patchen 2:01¼ and Anaconda 2:01¾ were engaged for two races. The first was on the opening day of the meetiug and tbe other on the closing day. The summaries of these two races are here given, as they will interest many of our readers.

October 21, 1899, Free-for-all pace:
John R. Gentry by Ashland Wilkes (Andrews)..1 1
Anaconda by Knight (Keating)..................2 2
Joe Patchen by Patchen Wilkes (Dickerson)....3 3
Time—First heat: 0:31¼, 1:02¼, 1:35½, 2:05.
Second heat: 0:31¼, 1:01¼, 1:33½, 2:04.

October 28, Free-for-all, pace:
John R. Gentry (Andrews) 1 1
Joe Patcben (Dickerson) 2 2
Anaconda (Keating and Jeffries 3 3
Time—First heat: 0:30½, 1:00½, 1:32, 2:04¼.
Second heat: 0:30¼. 1:00½, 1:32¾. 2:03¼.

WILL RACE AT TANFORAN.

The Eagles of South City are making elaborate preparations for their picnic to be held at Tanforan race track Sunday next. One of the features will be thé races held by the San Francisco Driving Club. There will be three events and the fastest horses of the club are entered. W. J. Kenny will act as starter. There should be several redhot finishes.

Entries for the races follow:

2:25 pace—Dorcus D, H. Boyle; Billy Ellsworth, O. Taylor; Electioneer, J. Paulson; Dynamite, H. Schottler; Coly Creed, S. Hill; Mike Donnelly, J. Bonney.

2:17 pace—Golden Buck, R. P. Giovanoni; Lady Falrose, T. H. Corcoran; Walter Wilkes, C. L. Becker Toppy, G. Erlin; Deroll, Geo. Kitts; Sidney B., E. Burton.

2:20 class—Charley B., Charles L. Becker; Nico, E. Burton; Direct Steinway, A. Bardness; King V, James O'Kane; Eden Vale, D. Roberts; Mabel R., M. M. Donnelly; Hunky Dory, J. V. Galindo.

The big fair and trotting meeting to be held at Los Angeles tbis fall is now said to be an assured fact. The money necessary has all been subscribed and advertisements will soon be out. It is proposed to have a fine program of trotting events, with the purses worth $1,000 eacb in most instances. The date of the opening of tbis big fair has been set for October 24th.

Secretary Filcher says the prospects are for the largest exhibition of finely bred horses this year that have ever been shown at the California State Fair. Thoroughbreds, trotters, draft and coach horses, Arabians, Shetlands and others will be exhibited. The fair will draw a big crowd this year.

MORE RECORDS TO THE McMURRAY SULKY.

Season's Record for Four-Year-Old Fillies.

Alceste, 2:11, at Terre Haute, drew the No. 15 "Perfected" Racer, made by The McMurray Sulky Co., Marion, Ohio, driven by Geers. Mr. Geers remarked in the presence of many trainers and drivers that "The McMurray Sulky Co. make as good a sulky as is made to-day."

Moving, 2:10¼, won a new record for the season for four-year-old fillies, to a No 15 "Perfected" McMurray Sulky. J. R. Patton, Atlanta, Illinois, owner, says there is no equal for this sulky.

Manager H., 2:06½, wins a new record for himself hooked to his "McMurray" No. 15 "Perfected" Racer. Both his owner, Dr. Hawkey, and trainer, Mr. Fullager, are exceptionally well pleased with the bike. The McMurray Sulky is a record getter, a money winner surely. It pays to have the best. You can get a full description of this great sulky by writing to The McMurray Sulky Co., Marion, Ohio.

TRAINING DISTEMPER

Horses in the sort of weather that is prevalent are liable to get what is called "training distemper" if no precaution is taken. It can be headed off and kept off by regularly administering Spohn's Distemper Cure. The remedy will not harm a well horse; in fact, is a help, and a horse already suffering an attack is quickly relieved by the Spohn preparation. It tones the system, restores appetite and is of general benefit.

Spohn's is sold by horse goods dealers and druggists at 50 cents to $1 per bottle.

"WITHOUT A PEER."

Clifford Horner, New Egypt, N. J., writes: "I am no stranger to the use of Quinn's Ointment. Have had it in my stable many years. By persistent application removed a splint large as half an egg. For thickened tissues caused by bruises or cuts it has no equal. For all ailments that absorbents are used for I recommend it to be without a peer." For Curbs, Splints, Spavins, Windpuffs, and all blemishes use Quinn's Ointment. If cannot obtain from druggist or dealer address W. B. Eddy & Co., Whitehall, N. Y. Price $1, delivered.

GRAND CIRCUIT OPENS.

Will Durfee Wins Two Races on Opening Day, and Puts Zomalto in 2:10 List.

Detroit, July 27.—A big crowd of trotting horse enthusiasts attended the opening of the Grand Circuit at the State Fair Grounds track this afternoon and saw Jack Leyburn make a new two heat race record for trotting geldings when he won the free-for-all in straight heats in 2:05½ and 2:04¼. He did not seem to experience any difficulty in defeating his field and some of his admirers freely expressed the opinion that a mile in 2:02 or better is within his reach at the present time.

Will G. Durfee of California started his horses in two races during the day and won both events. In the 2:25 trot he took the second, third and fourth heats with the Zombro mare Zomalta, reducing her record to 2:08½ in the second heat, giving Zombro a new 2:10 performer. Zomalta is the second trotter Durfee has put in the 2:10 list this year.

The Nutwood Wilkes stallion Copa de Oro, won the 2:06 pace in straigbt heats for Durfee, beating a good field of eight fast pacers and taking a new record of 2:04¼. The summaries:

2:25 trot, purse $1,000, three in five heats:
Zomalta, b. m. by Zombro-Kate Hamilton (Durfee) 2 1 1 1
Brace Girdle, b. m. (McMabon)..........1 4 4 5
Ward, b. h. (L. McDonald) 6 2 2 2
Kid McGregor, b. h. (Geers) 3 3 3 3
Roy Brook, b. h. (Hogan) 4 5 5 4
Prince Kohl, Noama, St. Peter, Nancy Boyce, Haynes and Sonoma May distanced .
Time—2:09¼. 2:08½, 2:09¾, 2:12.

2:18 pace, purse $1,000, three in five heats:
Brownell, ch. h. by Alcander-Annie D., by Kent (Snuderlin 3 2 1 1 1
Kendig, g. h. by Rokeby (Snow)......1 1 2 3 3
Pender Jr., ch. h. (Geers) 2 3 3 2 2
Thoughtful, ch. g. (Cox) 4 4 4 4 4
Time—2:13½, 2:12, 2:11½, 2:14½, 2:15.

Free-for-all trot, purse $1,500, two in three heats:
Jack Leyburn, ch. g. by Alto Leyburn-Elsie Leyburn, by Expedition (Grady) 1 1
Margaret O., b. m. (Davis) 2 3
Oro, blk. g. (McCarthy) 4 2
Wilkes Heart, b. g. (Stelle) 3 4
Time—2:05½, 2:04½.

2:06 pace, purse $1,500, two in three heats.
Copa De Oro, b. h. by Nutwood-Atherine, by Patron (Durfee) 1 1
Major Mallow, b. g. (Mallow) 2 2
Bonanza, Hal C., Princess Helen, Star Patch, King Direct, Jude X and Alice Pointer also started.
Time—2:04¼, 2:04¾.

Detroit, July 28.—Minor Heir, after making a bad break in the first heat of the Chamber of Commerce $5,000 race for 2:13 class pacers, to-day, won tbe second, third and fourth heats handily. The first heat went to The Eel in 2:03, and Minor Heir's heats were in 2:04¼, 2:05 and 2:04½, every one faster than any heat in any previous C. of C. race. Will Durfee caught the flag in the first heat with Phoenix, and Geers and McMahon had their horses distanced in the fourth heat.

The 2:24 pace went to Geers' entry, Prince A. Rundle, and the 2:16 trot to Axtellay, driven by Al. Thomas. The summaries:

2:24 pace, purse $1,000, three in five heats:
Prince A. Rundle, br. h. by Ashland Wilkes (Geers) 2 1 1 1
Alcelia, b. m. by General Forest (Benyon) 1 2 2 2
Woodis, b. m. (Colby) 4 3 3 3
Jerry Patcheñ, br. g. (Wilson ....3 dis
Time—2:10¼, 2:09¾, 2:10¼, 2:11

2:13 pace, Chamber of Commerce stake, $5,000; three in five heats:
Minor Heir, b. h., by Heir-at-Law (Dean)..8 1 1 1
The Eel, gr. h., by Gambolier (McEwen)..1 2 4 2
Jerry B., ch. g. (Cox) 3 3 2 4
Hal Raven, b. m. (Snow) 2 6 3 3
Bob Manager, gr. g. (Orendorf)..........6 5 5 5
Miss Adbell, b. m. (Shank) 5 7 8 6
Twis G. B., br. h. (McMahon) ....4 4 6 dis
Dr. Bonney, blk. g. (Geers) ....7 8 7 dis
Phoenix, blk. h. (Durfee) ....dis.
Time—2:03, 2:04¼, 2:05, 2:04¼.

2:16 trot, purse $1,000; three in five heats:
Axtellay, b. m., by Axtell (A. Thomas)..2 5 1 1 3
Aquin, b. h., by Aquilin (Tilter)......3 1 7 5 1
Black Silk, blk. m., by Symboleer (Dean) 1 8 4 4 5
Queen of Woolcliffe, b. m. (Castle)....5 2 2 2 2
Composer, b. g. (Lasell) 9 3 5 7 4
Marveletta, b. m. (A.McDonald)......4 6 3 3 4
Sid Axworthy, ch. g. (Cox and Mahoney) ....7 dis
Raffles, blk. g. (Burgess) 8 4 6 6 6
Olive F., dn. m. (Gahagan)............6 7 dis
Time—2:09¼, 2:10¼, 2:10¼, 2:11, 2:13.

Detroit, July 29.—With tbree out of six starters winning heats, the 1908 renewal of the Merchants and Manufacturers' Trotting Stake proved one of the hardest fought since the institution of the event in 1889. Spanish Queen, owned by George H. Estabrook of Denver, won first money under the five-heat plan of racing, although the old fashioned system might have given the honor to Alceste, driven by Geers.

Fully 12,000 people turned out and saw the exceptional work on a fast track. Fleming Boy, in the stable of Dean, whose entry won the Chamber of Commerce stake was a strong favorite Fleming Boy led all the way in the first heat, finishing an easy winner while Spanish Queen barely saved her distance after a break. Next time Spanish Queen acted finely and, collaring Fleming Boy at the three-quarters, she came so fast that he broke and gave the heat to the Denver mare. The third heat was a repitition. Fleming Boy was leading past the three-quarter pole and left his feet in the stretch, Spanish Queen jogging home.

Fleming Boy showed them the way in the fourth mile, breaking again in the stretch, and this time when Spanish Queen came by she was attended by Alceste, that mare beating ber by half a length. Spanish Queen took the lead at the half in the fifth heat, as Fleming Boy was tired, and again in the stretch Alceste rushed and beat her in the last few yards.

Under the five heat rule, Spanisb Queen, standing best in the summary, took first money, and Alceste second. There were cheers for the last heat winner, also for Spanish Queen and Driver Macey, who was presented with a floral flag. Summaries:

2:15 pace, purse $1,000, three in five heats:
Arthur J., b. g., by Eugene Ross (Stokes) 1 1 1
Star Patchen, blk. h. (Snow) 2 2 2
Miss Castle, br. m. (Castle) 3 3 3
Shadeland Nutlear, b. h. (Cares)............4 4 4
Our King, b. g. (Downes) 5 5 5
Gene Whitcomb, b. m. (Sprague) 6 6 6
Time—2:08¼, 2:07¾, 2:09.

2:24 trot, Merchants and Manufacturers' Stakes, $10,000, three in five heats:
Spanish Queen, b. m. by Onward Silver (Macey) 5 1 1 2 2
Alceste, br. m., by Jay Bird (Geers)..2 3 3 1 1
Fleming Boy, b. h., by Camara (Dean)..1 2 2 3 3
Donnie Way, b. m. (Lassell) 3 4 4 5 5
Vandetta, br. h. (McCarthy) 4 5 5 4 4
Time—2:08, 2:07¼, 2:08, 2:07¼, 2:07¾.

2:10 trot, purse $1,000, two in three heats:
Hamburg Belle, b. m. by Axworthy (Andrews) 1 6 1
Sterling McKinney, b h by McKinney (Shuler) 2 1 2
Susie N., br. m. (Colby) 7 2 6
Chimes Belle, b. m. (Titer) ....5 3 d
Munic, ch. h. (A. F. McDonald).............3 7 d
Mochester, b. h. (Geers) ....6 5 d
Time—2:05¼, 2:14, 2:07¼.

The time in the above race does not look exactly right, although it came over the wire that way. Unless there was a collision or some other accident, a mile in 2:14 in a 2:10 trot looks to be peculiar to say the least.

2:09 pace, purse $1,000, two in three heats:
Red Bow, b. m. by Redfield (McMahon)........ 1 1
Charley Hal, b. g. (Snow) 2 2
Brenda Yorke, b. m. (Nuckols) 7 3
Miss Georgia, br. m. (Gerrity) 5 4
Leslie Waterman, ch. g. (A.McDonald)........ 4 5
Raoul W., b. g. (B. Wilson).................. 6 7
William C., br. g. (Murphy)..................10 6
Rushville, b. g. (Gahagan) 9 8
Shaughrau, b. g. (Geers) 8 9
Major Brino, blk. h. (Richie)................ 3 d
Arrow, b. g. (Cox) .... d
Time—2:04¼, 2:05.

Detroit, July 30.—More sensational racing marked the fourtb day of the Grand Circuit harness meeting, and the average time for four heats, 2:07, has seldom been equaled. The 2:04 pace turned out to be the biggest surprise of the year, Baron Grattan winning it in four heats. Black Lock was a hot favorite in the big field of eight, but was unsteady at first and refused to try later along.

Dewitt won the 2:11 trot, Will Durfee's entry, Carlokiu, getting fourth money. The 2:12 pace went to Leone. Chas. De Ryder was outside the money with Charley T. and Argot Boy in the races in which they started. Summaries:

2:12 pace, purse, $1,000 three in five heats:
Leone, ch. m. by Tommy Y.(McMahon).10 4 1 1 1
Fred D., gr. g. by Dr. Douglas(Downer) 1 1 3 2 3
The Liar, b. h. (Cares).............. 5 10 2 5 2
Dr. Fox, b. g. (Gahagan)............ 4 2 5 6 5
I. X. L., b. g. (Trudell).............. 3 8 6 4 4
Nilmah, b. m. (Anderson)............ 2 3 7 7 d
Lady of Honor, ch. m. (Thomas)...... 7 9 4 3 d
Rex, blk. h. (Orendorf)............... 6 7 8 8 d
Milton S. Jr., ch. h. (Cox)............ 8 5 10 d
Requisition, b. g. (Cunningham)...... 6 9 d
Time—2:07¼, 2:07¼, 2:07¼, 2:09¼, 2:09¼.

2:11 trot, stake, $3,000, three in five heats:
Dewitt, b. g. by Cecilian (Andrews)...10 8 1 1 1
Octoo, br. g. by Great Heart (McLane) 4 1 4 7 7
Nahma, b. m. by Peter the Great (Burgess) 1 4 5 6 5
Carlokin, b. h. by McKiuney (Durfee). 8 2 8 3 6
Genteel H., br. h. (W. B. McDonals)... 2 5 3 2 2
Locust Jack, gr. g. (McHenry)....... 9 3 2 8 3
Harry Banning, b. g. (Burns)......... 5 10 7 4 4
Charley T., blk. g. (De Ryder)........ 7 6 6 5 8
May Earl, b. m. (Bowerman)......... 3 7 9 9 d
Just the Thing, br. m. (Orendorf).... 6 9 10 d
Time—2:07¼, 2:07½, 2:08½, 2:08½, 2:10.

2:04 pace, purse, $1,500, two in three heats:
Baron Grattan, b. g. by Grattan (Murphy).2 2 1 1
Gallagher, b. g. by Royal Rysdyk (McEwen) 5 1 2 2
John A., ch. h. by Eddie Hal (Geers)......1 3 3 3
Jenny W., b. m. (Sunderlin)..............3 6 4 ro.
Citation, b. m. (McMahon)................4 4 7 ro.
Reproachless, blk. m. (B. Shank)....... 6 5 8 ro
Argot Boy, b. g. (De Ryder)............ 8 8 [illegible]
Black Lock, blk. h. (Andrews)..........
Time—2:03¼, 2:03½, 2:03½, 2 [illegible]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

UPLAND SHOTING AND LIGHT WEIGHT GUNS.

The man who loves a well broken Setter or Pointer and his favorite shot gun, who delights in a long, hot tramp afield after game birds, when be pulls up at a cool spring or stops a few minutes at some friendly rancher's house, so thirsty that his mouth is full of cotton and his hunting coat pockets hulging with doves or valley quail certainly has had an enviable and well earned few hours of healthful recreation and enjoyable sport.

Quail hunting over the rounded knolls and along the canyons in this State tests a man's wind and staying powers as well as his nerve, skill and good judgment. A valley quail like his Eastern cousin the famed "Bob Wbite," breaks cover with a nerve tingling whir-r-r! so that even a veteran field shot will often get a mild case of "rattles" when he suddenly gets mixed up with a big covey of birds, and will find himself guilty of some wretched shooting. Of course, your good shot quickly recovers his form and centers his birds with beautiful precision. But, with the novice, it is really amusing to watch his vain efforts to line up his bird. Perhaps a dozen or more quail will break cover, at short range, with a Gattling like percussion of whirring wings and the kid at the game stabs his gun convulsively in two or three different directions, trying to pick a bird. He complains that by the time he gets a bead the quarry is too far away. By and by he drops a bird. Then watch him swell up and look chesty. You ask him how many he's grassed. "Aw two or three," he will answer, at the same time tapping his hunting coat complacently. And at night he's tired, hungry and happy, with, maybe a half dozen quail. So it goes, its the greatest shooting on earth, and the veteran and novice alike, yea and even a number of fair sex whom we could mention never tire of the allurements of the sport. Some shooters are content with a moderate number of birds, others never quit till the limit is safely stowed away.

As of the valley quail, so might we, comparatively, recount the pleasures of dove and snipe shooting in this state, but with the "hoodlum of the valley" rests tbe palm of precedence. The queer kinks of flight the English or Wilson snipe is capable of for a few yards until he settles into a fairly even flight is a puzzler for the best of guns—this gives the zest to snap shooting. Nor is the dove a whit behind scolopax in doing some erratic wing stunts on the late afternoon fly-ways. The shooting on the water-hole line of flight is a picnic compared to the aerial promenade the hird takes towards the close of day, and at that, one must lead and point the lead spout at the right spot to score, and this, apparently easy trick bas often fooled the best of them.

Small bores, the sixteen gauge shotgun, yes and 20's as well, are rapidly becoming favorite field and upland fowling pieces with Coast sportsmen. These little (?) guns are light to handle, require no recoil pads to ease the jar of the exploding shell and kill cleanly without mutilating the game. A 16 gauge is just as deadly as a 12 gauge, but with its smaller pattern the shooter must hold a little closer, all the more satisfaction in bagging a nice string of birds without using a cannon to get them.

To be a good field shot doesn't merely mean killing the birds in flight, but, it also necessitates an intimate knowledge of the habits of game birds—their feeding places, where they love to bask in the warm sun and dust themselves in fine powdered sand just as domestic fowls do, and where they like to retreat from the midday heat. All this comes from field experience.

Don't think that the small bores will not stop a whizzing teal in full flight, the graceful drake sprig as he makes the final circle over the pond, or a lordly mallard settling to the decoys. One should see Mrs. W. W. Richards in a blind on her pond at The Limit preserve in the Suisun marsh to get a good line on the capable work of a 16 gauge on broadbills. "Ole Bill" himself in a nearby pond will also show stunts with his smallbore that would make the "artillery men" open their eyes. Indeed, so far as efficiency goes, the small bore's value is not of recent knowledge, for instance, the gun issued to all the employees of the Hudson Bay Company, whose forts, trading posts and lonely camps are strewn all over British America, is a 20 gauge single-barreled smooth bore. The Indian and half-breed hunters up there shoot a solid round ball for big game and with shot they have a deadly weapon for small game.

The signs of the times point to the 16 gauge and the 20 gauge as the coming scatter guns. They are just right for upland shooting. And that Coast shooters are beginning to like the little firearms is evidenced by the fact that all of the dealers and gun stores carry a plentiful stock of 16 and 20 gauge shells.

In this respect particular attention is called to the article in this issue on "Small Bore Guns" by Captain Arthur W. Du Bray (Guacho) well known to and popular with Coast sportsmen, and throughout the United States, the Dominion and Mexico for tbat matter.

SMALL BORE GUNS.

(By Guacho.)

Being unaware as to the status of the 20 gauge shotgun in California, much to my own regret do I say it, I would like to present to your readers a few facts that perhaps may be of sufficient interest to warrant their reading this article.

Some years ago while duck shooting in Southern Texas, I saw some of my friends do such great work with their 20's that it occurred to me, then and there, that if so narrow a gauge could be made to perform so well there must be a great future in store for these handy little guns, and ever since then I have left no stone unturned with a view of learning as much as I could about them. Be it clearly understood I make no claim to have discovered anything—I merely absorbed whatever I could at the time, and ever since I have delved and experimented, going into the theoretical and practical phases of this, to me, most interesting subject, hoping by dint of perseverance to introduce a gun, that for many kinds of shooting would be found to have and to hold its place in any sportsman's cabinet. As was to be expected I naturally subjected myself to much ridicule at first, alheit coming for the most part from persons who knew absolutely nothing about small bores, or at least nothing regarding the kind I advocated, but as I expected this, in fact as I probably would have done the same myself prior to my Texas education, I have gone serenely along and much to my gratification have lived to see the 20 gauge come fairly into its own, and I further predict that time will come when many more small bores will be used as their utility is better understood.

Before taking up this interesting subject I wish it distinctly understood that I in no way would detract one iota from the superlative merit of the traditional and well established status of the universal 12 gauge gun, for there is absolutely no gauge, so far as we know to-day, that for all kinds of shooting from goose to snipe and as a trap gun can outclass a good 12—none in fact as an all around gun that can compare with it—still under certain conditions, and for some particular kinds of shooting a good 20 bore will be found to answer every practical purpose, and, when long tramps over rough ground, climbing steep hillsides, or wading and dragging oneself through marshes, deep sticky mud and soft meadow land, a saving of weight in gun and ammunition more than counterbalance the more powerful shooting qualities that can be gotten out of guns of wilder gauge and much greater weight. Where so many have erred, and most naturally, has been in equipping themselves with extra light small bores, just because some gun makers delight in turning out such, the small frames, slender tubes and diminutive guns all over, being admirably adapted to this shaving down process which reduces the weight, and at the same time the effectiveness of the weapon. All very light, feather weight guns possess a certain allurement when handled in a gun store because there is a sense of being able to pitch them with the greatest ease, and speed, on any given object. This delusive charm, however, immediately evaporates when these frail and fragile toys are put into active service, for they have either to be underloaded, for their gauge, or else they will be found to jump and kick so severely that no accurate shooting can be done with them—not so much because the guns themselves do not perform well enough but far more from the fact that the shooter becomes gun shy, knowing that he will get a sharp punch every time he pulls the trigger. There is always a vast difference between the heavy backward push of an overloaded weighty large bore, and the sudden vicious slap of a little light stock that raps one on the cheek and shoulder, and the latter soon gets on one's nerves, especially when many shots are fired in quick succession. So, however valiantly the shooter may have commenced he gradually reduces his charges and presently finds himself using 28 gauge loads in his 20 or 20 gauge charges in his 16 and so on. Naturally his erstwhile enthusiasm on his small bore diminishes and he probably puts it aside, sells it for a mere bagatelle and goes back to his 12. One such desertion will do more harm to the prospective users of small bores, tban all the good work and words, ten converts to it can accomplish, because it is human nature to accept evil report on mere say so whereas volumes of indisputable evidence are demanded to establish confidence in anything—especially when that is a departure from time honored and established custom.

All things considered a good sound serviceable 20 should weight not less than 6 pounds and if it has 30 inch barrels and is intended for longer range and heavy shooting a few ounces more will be still of advantage. It should be chambered for 2 7-8 or 3 inch shells in which 2½ drams of bulk nitro powder a full complement of good elastic wads, and 7-8 of an ounce of shot. If the gun is to be used for any open prairie shooting it is best to have one or both barrels full choke, but by having one barrel say ¾ choke one can't go very far wrong. Such a gun will be found a perfect treasure when snipe shooting over boggy ground and for duck shooting over decoys it is absolutely all one could wish.

When, however, the gun is meant for upland game in thickets or dense timber then tbe open barrel should be hored to cover a 30 inch circle at from 20 to 25 yards and the left make same pattern 10 yards beyond. A properly made, well balanced and well fitting gun built on tbese lines is the most delightful fowling-piece one can imagine, as it can be carried with comfort over any kind of ground all day long without producing that weariness and bodily fatigue so detrimental to the enjoyment of the day's sport. The celerity with which a 28 inch barrel, 6 to 6¼ lbs., 20 gauge can be mounted and aligned is something astounding to those who have never tried one, particularly if it has light muzzles and a heavy breech the better to facilitate fast handling and improve its balance. In the southern States for quail shooting these open bore 20's are doing great work and are becoming more and more popular in the hands of progressive sportsmen every year—great as was the prejudice against them before their handiness and serviceability were known. Quite aside and apart from the weight of the gun its ammunition is a great factor in recommending it, because one hundred 20 gauge loaded cartridges weigh three pounds less than the same number of 12 gauge game loads. This saving of dead weight means a great deal, especially when game is scarce, walking hard and camp a long way off. The bulk of these cases is also worth considering for one can carry forty or fifty in the pockets of the game coat without the least inconvenience, in fact by distributing them properly their presence is scarcely felt, so that when we cut off weight and bulk of ammunition, and weight of gun besides, without detracting very much from the effectiveness of either we certainly are marching in the right direction.

The principal advantage inherent to all large bores is that they undoubtedly have greater killing power, at long range than those of smaller caliber, principally because by using larger charges of larger shot one obviously obtains better results. For instance a properly built and well regulated ten gauge loaded with 1½ ounces of No. 3 or 4 shot driven by a full charge of powder will certainly be a more deadly gun at extreme ranges than a 20 with only its 7-8 of an ounce, that stands to reason, and if we would have as many pellets flying through the air when shooting our 20's, just see how much smaller shot we must use. So it is well to keep inside of rational limits when speaking of the killing power of any gun and while our well tried and cherished old time ten bores were ousted by the board because fashion so decreed, yet for certain kinds of shooting, no gun of smaller gauge, purely on its own merit, can displace them—and all of us who have passed the half century mark know this beyond a peradventure.

After all is said and done our present guns, as a rule, clearly outshoot the majority of the men who use them, for as the range at which shooting is done increases so does the forward lead and none hut the very best shots need ever hope to master that art with any certainty, especially when duck shooting owing to the different sizes of the birds and the ever varying speed with which the different kinds fly, to say nothing of the delusion occasioned by a dim or hright light, or at times hardly any light at all. Indeed far too many game birds are being wounded as it is from being fired at beyond the really sporting range of any gun, to say nothing of being sprinkled at most unreasonable and impossible distances by men whose sole object seems to be to see how many shots they can pour into a covey or flock, blazing away so long as they have an unexploded cartridge left in their guns. The untold agony inflicted on these harmless hirds, that never should have been shot at at all, is too horrible to contemplate. Nevertheless the marshes whenever duck shooting is done will reveal great numbers of these mutilated and tortured birds, hare skeletons, swimming ahout, unable to fly or procure food, until at last some animal or bird of prey more humane than man, mercifully kills and devours them. But the sportsman who desires the most benefit from using the small bore is the one who shoots upland or who pursues game that necessitates much walking, and here these light, portable little guns are perfect jewels and the pleasure of having done good clean work with a 20 bore has to be experienced to be fully understood.

From my own standpoint I consider that any man who lauds and recommends any particular kind of gun basing his knowledge regarding it solely from his own personal experience, is attempting to introduce something that may, like a boomerang come back at him, because there are so many different kinds of widely diverging situations and extremes in one way and another that have to be duly considered. So to say that one particular caliber, weight, style of boring, or in fact to attempt to lay down the law hard and fast solely on one's own experience, or fancy, is a most precarious undertaking, and no one who has gone through the endless variety of all kinds of game shooting is apt to arbitrarily do this if he is endowed with an average degree of common sense. Knowing this, I discretely kept silent regarding the use of 20 bores for a long time and only after I had thoroughly satisfied myself and had seen many others use them, did I venture to openly advocate their use, and I can truthfully say that so far as I know, when used within their sphere no gun could possibly have given greater satisfaction.

I make no claim that a 20 is a more sportsmanlike gun to carry afield than a double 12, because such

reasoning is wrong. So long as a man does not exceed his limit, observes the game laws of the country in which he shoots, takes the birds that fly his way when shooting with a companion, and in all other respects deports himself as a gentleman should, it matters not what is the gauge of his gun nor the cut of his coat and it is narrow minded to argue otherwise, but of one thing gentlemen rest assured, you have never seen or heard of a pot-hunter or game butcher using a small bore gun, for there is nothing in these reduced calibers that can appeal to such.

From some unaccountable reason the general idea prevails that a 20 bore is necessarily a very close shooter, judging I suppose this to be so from the narrowness of its caliber. This is erroneous, as the pattern made by any gun depends entirely upon its choke regardless of its gauge, height or length, and I have a 20 that at 20 yards when using 2* drams of bulk nitro powder and 7-8 of an ounce of No. 8 shot covers very nicely a 30 inch circle, although of course the outer fringe of the pattern is not thick, yet at that short distance owing to the great velocity of even such small pellets, such game as quail or woodcock is instantly killed without being riddled beyond recognition, or made unfit for use even if caught with the centre of the charge. The left barrel of that gun gives about the same nice even, large spread at 30 yards and I cannot conceive of a better one for such quail shooting as we have in the Southern States where 90 per cent of the birds bagged are gathered withiu 25 yards. Regarding California quail I know nothing, never having shot one, but I would judge most of this is done at longer range, therefore one needs a closer shooting gun. So perhaps one regulated to shoot a large spread at 30 yards in one barrel and full choke in the other would he about right, hut I frankly disclaim to give advice here, as I prefer to let those who know, select their own style of boring.

With a view to dispel what I believe to be a popular fallacy regarding the narrow patterns made by small bore guns, as compared to those obtained from the standard 12 gauge, I submit the following which I trust may in a measure illustrate the actual size of killing circles made hy guns of various gauges and style of choke at twenty five yards:

Purdey, 12 gauge cylinder gun gave a killing circle of 25 inches.

Parker 12 gauge full choke gave a killing circle of 17 inches.

Parker 12 gauge modified gave a killing circle of 2_ inches.

Parker 16 gauge cylinder gave a killing circle of 28 inches.

Parker 16 gauge full choke gave a killing circle of 18 inches.

Parker 20 gauge cylinder gave a killing circle of 29 inches.

Parker 20 gauge full choke gave a killing circle of 20 inches.

Parker 28 gauge cylinder gave a killing circle of 25 inches.

Parker 28 gauge full choke gave a killing circle of 19 inches.

As will be observed I have taken as a basis for comparison the shooting of my Purdey game gun, the right barrel of which is an improved cylinder—hardly any choke—knowing that those justly celebrated guns are renowned the world over as first class game guns, and that no better standard could be selected for that purpose. The other guns are all Parkers varying in gauge from 12 to 28 and choked as stated.

If this table affords any indication of what guns of different gauges can be expected to do, I trust my reproduction of it will be of service, as my sole object in getting it up has been to throw a little light on the size of the killing circle one may expect to ohtain when using 20 bore guns. The 12 gauges were loaded with 37 grains of Du Pont and 1⅛ ozs. No. 9 Tathams' chilled shot. The 16 with 33 grains and one oz. The 20 gauge with 30 grains and 7-8 of an ounce and the 28 gauge with 26 grains and ¾ of an ounce. Same kind of powder and same size of shot used in all the guns and Winchester shells and wads—in all respect first class ammunition and every one a perfect gun of its kind.

Some years ago I asked Messrs. Parker Bros. to have guns of different gauges built with a view of testing these for velocity, and as these guns all had 30 inch barrels and weighed approximately the same, I think I came very near learning sometbing about them. The trials were conducted hy the Winchester Repeating Arms Company at their famous range in New Haven, and over a chronograph the accuracy of which is unsurpassed, having served to formulate and determine the various charges loaded by this celebrated company, whose unexcelled shot gun ammunition holds all the principal individual professional championships to-day.

In order to make these tests as nearly alike as possible all the cartridges were loaded on the same day from same keg of powder and same sack of shot, and all fired within a very short space of time so that atmospheric conditions were identical. The shells used were Winchester Leader excepting in the 28 gauge when Repeater cases had to be used there being no Leaders of that gauge.

Velocities of guns of different gauges taken over a 100 foot range:

12 gauge, 34 grains Du Pont, 1 oz. No. 7 chilled shot, 903 feet sec.

12 gauge, 37 grains, Du Pont, 1⅛ oz. No. 7 chilled shot, 921 feet sec.

12 gange, 43 grains, Du Pont, 1¾ ozs. No. 7 chilled shot, 963 feet sec.

16 gauge, 34 grains Du Pont, 7-8 oz. No. 7 chilled shot, 948 feet sec.

16 gauge, 37 grains Du Pont, 1 oz. No. 7 chilled shot, 969 feet sec.

20 gauge, 28 grains Du Pont, ¾ oz. No. 7 chilled shot, 902 feet sec.

20 gauge, 32 grains Du Pont, 7-8 oz. No. 7 chilled shot, 941 feet sec.

20 gauge, 34 grains Du Pont, 7-8 oz. No. 7 chilled shot, 974 feet sec.

28 gauge, 25 grains Du Pont, 5-8 oz. No. 7 chilled snot, 973 feet sec.

28 gange, 28 grains Du Pont, & oz. No. 7 chilled shot, 978 feet sec.

If we are to be guided by what the chronograph teaches, we see that the 20 gauge with its 32 grains and 7-8 charge gives a velocity of 941 feet seconds, whereas the 12 gauge game load of 37 grains and 1 1-8 ozs. gives but 921 ft. seconds. So that as so slight a variatiou in speed isnegligible, i. e., only 20 ft. seconds. Yet the little 20 if anything has the advantage of whatever difference exists. When, however, the 12 gauge is loaded to its limit of 43 grains and 1¼ ounces then it gives a velocity of 963 ft. sec. as against 974 when the 20 is loaded with 34 grains which in reality is an overcharge and should never he put into any 20 bore gun unless it has extra heavy breech ends, and furthermore should never be put into a case shorter than 3 inches, thereby allowing a full supply of fairly soft wadding, true to gauge, i. e. No. 20 as wads of larger size than the bore of any gun greatly increase the pressure.

My own personal experience inclines me to believe that 32 grains of bulk nitro powder and 7-8 of an ounce of shot, properly wadded and crimped shell, will do about all one can expect from a 20, and although I have fired thousands of Winchester Leader factory loaded shells with those charges I have never met with even the semhlance of a mishap, but I have used only heavy breech Parker guns bored regulated to shoot these charges. There being no 20 gauge crusher gauge in this country I cannot say what the pressure on the wall of the barrel is, but I know it is very much greater in small than in large bores, so due caution should always be used. It is of greatest importance that shells having nothing but the very best and toughest primers he used, as a defective cap by being perforated may break a gun stock, to say nothing of possibly causing more serious damage. It is always most prudent when shooting large charges in any gun, to examine the primer after a shot has been fired, and if it is found to have been upset, i. e., driven back into the plunger hole, then one may expect trouhle at any moment, because there is evidently too much gas pressure at that point and far more than the primer can with safety withstand. I know whereof I speak on this subject as I have had annoying experience which might have been serious, but never when using Winchester shells.

We know how tenaciously the Englishman holds on to what experience has taught him, and his fathers before him. We also know that he has pinned his faith resolutely and manfully to the 12 gauge guu and it is very doubtful if any gauge will ever supplant it. Yet many of England's very hest game shots are using 16 gauge loads in their feather weight 12's, and recent developments would indicate that the redoubtable 16 gauge may have come to stay over there, for really there does not seem to be any good reason why a man should use a 12 bore when he shoots light 16 gauge charges from it, especially as the 16 gauge does not have to be whittled down so fine as the 12, to reduce its weight to the regular standard. A well built 16 is a tremendously powerful gun, and when of sufficient weight to withstand 3 drams to 3 1-8 drams of powder and one full ounce of shot it is, if properly bored and loaded a mighty hard gun to heat and this I know from having seen extraordinarily long range and clean killing with them.

I must repeat that I cannot write authoritatively on California game shooting, especially as relates to quail. So I have studiously avoided to air any ideas thereon, as it is far better to remain silent when one is not sure, than to expose one's ignorance on any one point thereby incur doubt and misgivings however well one may have treated the great bulk of any subject.

Some day if fortune favors me I hope to learn something about California guns, for I cannot believe that all in all there can be a better place to shoot, no hetter and more companionable men to shoot with, than in the glorious State of California which I still hope to some day call my permanent home.

A coast steamer recently brought to San Francisco, 150 giant turtles from Magdalena bay, Lower California. Turtle soup and turtle steaks for the past week has been on the bills of fare of all the leading hotels and restaurants in the city.

The capture of these huge chelonians is attended with some degree of sport and excitement as well as hard work.

The Orcutt Gun Cluh has leased the Silva ranch containing Black and White Lakes and will build a club house andbarn. Jerry Brush who had charge of the cluh's preserves at Guadalupe Lake for two years will be keeper of the new preserve.

Drink Jackson's Napa Soda.

SPORTSMEN ENJOY DOVE STEWS.

The annual dove stew of the Grass Valley Sportsmen's Cluh was a reunion of sportsmen and good fellows representing every section of the State. The famous gathering this year came off on July 16th, and was not a whit behind in every respect the many previous yearly meetings. The Grass Valley Tidings gives the following account of the affair:

"The out-of-town guests of the Grass Valley Sportsmen's Club have come and gone, the local guests have settled down into the routine business and bard work, and the campstew of 1908 will live only in memory. Yet the fame of these events and tbe hospitality of the club will go ringing down into history and will give the town and the club a reputation that will attract attention to tbem from wberever a guest happens to wander. For this annual picnic was no exception to the twenty-seven that bave preceded it, unless it were a happier, a freer and jollier crowd than ever gathered in the woods before.

The men who had the work of picking and cleaning the doves that went into the dove stew are willing to take an oath that there were close to two thousand hirds, but those wbo merely looked at them would place the estimate at about fifteen hundred, which would be about correct. They were evidently more plentiful than in any previous year, and there were few hunters wbo did not come into the grounds with the limit or close to it.

From soon after midnight until 10 o'clock in the morning the guests were arriving on the grounds, and as soon as each party would arrive they were taken in charge, escorted by President George W. Root or some of his assistants to the breakfast table, and there would be set before them tbe finest breakfast that man would care to order. Large, juicy steaks, succulent lamb chops, liver and bacou. Hamburg steaks, with onions, tomatoes, potatoes and salads to help make the toothsome menu more palatable. W. H. Smith was in charge of the corps of breakfast cooks, and there is a great deal of credit due for the very clever manner in which the guests were handled and served. There was little waiting, no complaining and very hearty eating.

By 11 o'clock there were few men on the grounds who were not busy at some work of preparation. There were potatoes to peel, doves to pick hy the hundreds, rabbits to skin, and then there was the work of cleaning all tbe fifteen hundred doves, which was no small job. With fifteen to twenty men at the different work of drawing aud cleaning it was a comparatively short time before they were ready for the kettles.

Following tbis there was entertainment by Teddy Hall, Doctor Dobbins, George Carson, J. G. O'Neill, Ben Penhall, Mr. Overman and a number of others.

About 3 o'clock the official announcement was given out that the stew was ready. There was no confusion Every man had his number, which corresponded with the number on the table, and quietly he found his way to the seat that had been reserved for him. The stew was all that could be desired. Maurice O'Connell has no apologies to make and he was the subject of congratulations all afternoon.

When all had satisfied the inner man President Root rapped for order and called upon many for short remarks. After a hlessing by the Rev. E. H. Hadlock, C. A. Vogelsang, Chief Deputy Fish Commissioner of California, was called upon. He outlined in brief the plans of the future in regard to fish and game protection and propagation, and spoke very entertainingly and intelligently.

Harry T. Payne, who enjoys the distinction of being president of the California Fish and Game Protective Association, spoke on the subject of "Sportsmanship." He is fully versed with all the details of this subject and could talk about it for hours. He called to mind the fact that there were many faces that were missed during recent years, and paid a tribute to the old guard of the Sportsmen's Club.

Hon. E. S. Birdsall of Auburn spoke on the good feeling that exists between Placer and Nevada Counties, and F. M. Rutherford saw to it that Truckee was given its proper place in the minds of those present. Ted Hall sang "My Own United States." Doctor Barr of Marysville spoke for a few moments and was followed by Doctor Dobbins with a song. Judge F. T. Nilon spoke of the annual outing and said it had come to be looked upon as a national holiday.

The subject "Grass Valley" was responded to hy C. E. Clinch in his characteristicly pleasant manner and J. V. Snyder responded as the representative of Nevada City. George L. Jones contributed his part to the entertainment with a talk on "The Spirit of the Law." After Hank Kneeland had spoken briefly the band played "The Star Spangled Banner" and the day came to a close.

Colusa sportsmeu are not oblivious to the temptations of a congenial gathering to enjoy the delights of an outing with a dove stew as the storm center of attraction.

For several weeks, those who were invited, had been looking forward to the dove stew outing, that was to be held on Sunday, July 19th, and now that it has passed and gone the twenty-two who were present are telling of the delightful time they had

The party, all in autos, left Colusa early Sunday morning for the Charles Moutoux place in the western foothills where doves were quite plentiful. Arriving there camp was made and everything gotten in readiness for the great stew that was to follow.

The party was divided and stationed at different points and between story telling, talks on the political situation and lounging around in the shade of the friendly oaks shooting was occasionally indulged in and when time came for the feast it was found that there were seventy nine toothsome birds ready for the pot.

Jesse Poundstone was selected as chef in chief and the stew he dished up was fit for the kings. Taken all in all the day was a most enjoyable one and will not soon be forgotten by the following sportsmen who attended: B. H. Burton, Tennent Harrington, Will Harrington, E. C. Barrell, G. W. Showler, G. F. Scott, Dr. W. T. Rathbun, Jesse Poundstone, A. B. Jackson, G. W. Tibbetts, J. F. Campbell, J. H. Balsdon, S. C. Bowman, Judge H. M. Albery, E. Weyland, Jos. Boedefeld, H. L. Houchins, Thomas Rutledge, W. H. Ash, Frank Freeman of Willows and C. M. Wooster of San Francisco.

The members of the Wheatland Gun Club sustained their reputation for hospitality on July 19th at their annual dove stew, which was held at the Armstead farm in a pretty little grove near Bear river, about one mile south of Wheatland. There was plenty of stew for everybody, and Jim Kesner, the chef, was voted just about the best ever, for serving this most savory dish.

A large crowd was present from different points in the valley. Many stayed until quite late in the evening, and passed the time enjoyably in pleasing jest and humorous anecdote, trap shooting and various games.

The Wheatland Club can be assured that all invitations will he promptly responded to in any event they may undertake in the future.

L. B. Sargent is president of the association and Judge W. M. Rich is secretary, while the following well-known Wheatland people were active in arrangements for the outing and comfort of those present: Frank Enochs, A. C. Stagner, E. E. Monson, P. F. Enochs, George Ostrom, James Burdick, J. M. Johnson, Charles Mahon, Bert Armstead and L. L. Kemmerer.

DOVE HUNTING NOTES.

Reports from many sections are that doves are very plentiful this year, but this early in the season the birds are, in many sections, too young to be shot, and many of the old birds are still looking after their young in the nests.

In this respect we quote the Sanger News of July 18th, which states:

"The California game law as applied to doves is an instance of the selfishness and heartlessness of the sporting clubs of the big cities whose committees go before our legislatures, and draft the bills for the opening and closing of the shooting season. Ducks and quail are protected beyond their breeding seasons, and it is well known that doves nest and hatch much later than either of these, but just to supply something for the hunters' guns during the summer, nearly all game laws have provided for an open season for doves beginning anywhere from June 1st to July 15th. This is nothing less than brutal when one thinks of the thousands of fledglings left to starve by the death of parent birds, and the supervisors have done well to extend the closed season one month, and could do nothing more humane than to extend it another month."

In Fresno county a special ordinance extends the closed season to August 15th. This is good as far as it goes, but in August as many birds will be found in the nest as in May, June or July, and by rights the open season in the San Joaquin Valley should extend from October 1st to March 1st instead of July 15th to January 1st as provided in the state law. Deputy Commissioners say they will strictly enforce the law if anyone is found killing doves before August 15th.

One result of the shortened season is that Fresno huuters, it is claimed, cross over into Madera county for their dove shooting. This has led to the arrest of several Fresnoites for shooting on enclosed or posted ground without permission of the owner.

In the vicinity of Modesto many limits have been shot since the 15th of July.

An effort was made to shorten the season in Merced county recently, the move was made too late to be effective. The matter was taken up by the sportsmen of the county with the result that an agreement was signed by many hunters not to shoot doves until August 15th, which action will meet with the approval of all sportsmen.

The Los Angeles dove hunters have been numerous among the foothills during the past few days. The doves are so numerous that the average hunter has been obliged to cease hunting early in the day by reason of limits falling to the guns.

Frank Merrill of Stockton, last week entertained as his guests for a dove hunt Clarence Haight, representative of the Du Pont Powder Company; "Hip" Justins, representative of the Remington Arms Company and the U. M. C.; Ed. Garrett, President of the Callahan Company, and Mr. Rube Haas and Clarence Ashlin of San Francisco.

Hans Moore and party, from Los Angeles, recently returned from the headwaters of the Mojave river with a great catch of trout, the fish all averaging from 10 to 16 inches in length. The party fished two days on the upper stream with great success, driving [illegible] from Hesperia.

CALIFORNIA GAME AND FISH PROTECTIVE ASSOCIATION CONVENTION.

In announcing the call for the Association's annual meeting Mr. E. A. Mocker, secretary-treasurer states:

"The Santa Cruz Rod and Gun Club, under whose auspices our next meeting will be held, having asked for an earlier date than usual, and the same having been granted for good and sufficient reasons, our next meeting will be held at Santa Cruz, beginning August 13th.

"As the legislature will meet next January, and there being many matters requiring the attention of our Association, as full attendance of our membership as possible is very important. It is to be hoped that every local club in the State will have its delegates, and that every individual who can possibly spare the few days necessary for the good of the cause in which we are laboring will be present and lend his voice and counsel in our efforts to secure such legislation as will ensure the better protection of our game and fish, and the proper and intelligent expenditure of the money we are contributing for that purpose.

"The Santa Cruz Club is putting forth every effort to make this meeting the most enjoyable of any in the history of the Association.

"As the dates named will be in the height of the salmon season, some proud sport with this large fish can be expected.

"Take a few days vacation, go to the sea shore, breathe the salt air and help a cause dear to your own heart."

Each affiliated club or association is entitled to a representation of five delegates.

Through the kindness of the Southern Pacific, the Santa Fe and Northwestern Pacific Railroad Companies a special rate of one fare and one-third for the round trip to the Convention at Santa Cruz, on August 13, 14, 15, 16, 1908, will be obtainable by delegates and visiting sportsmen.

In purchasing a first class ticket for Santa Cruz it is necessary to procure from the ticket agent a "receipt certificate account of C. G. and F. P. Ass'n." This certificate after endorsement by the secretary at Santa Cruz will entitle the bearer to a return ticket by paying one-third fare. Delegates may purchase tickets for the going trip, and "receive certificates" any time between August 3d and 16th. These certificates for return tickets will be honored any time between August 13th and 18th, 1908.

The officers of the association are: President, H. T. Payne; vice-presidents, C. L. Powell, Pleasanton, W. J. Keating, Santa Cruz, M. J. Connell, Los Angeles, H. A. Greene, Monterey, W. A. Correll, Riverside. Executive Committee, W. W. Richards, chairman, Oakland, C. W. Hibbard, Los Angeles, T. C. Kierulff, San Francisco; M. J. Connell, Los Angeles, G. A. Deiter, Santa Cruz. Membership Committee, E. A. Mocker, Capitola, E. C. Morgan, Grass Valley, Louis Herzog, Ocean Park. Secretary-treasurer, Edwin A. Mocker, Capitola, Cal.

SAN CLEMENTE ANGLING.

Apropos of the recent trip of devotees of salt water angling to San Clemente Island a recent press dispatch gives the following interesting account of results:

With the return of the boatmen of the Clemente fishing party, some fish stores not on the bills are leaking out. Gifford Pinchot, in all probability, made the most remarkable play of a yellowtail ever made in Southern California waters. He and Prof. C. F. Holder were fishing off the east point of Clemente with Mexican Joe as boatman when Mr. Pinchot had a heavy strike, taking several hundred feet of line.

The tackle was light, 3-6, and a heavy sea was running which added to the difficulties, yet the angler played his fish for five hours, under the greatest possible disadvantage. The fish made its fight for the first four hours on the surface, giving splendid battle, and only the greatest skill of the fisherman prevented it from breaking away. On the third hour the engine broke down, adding to the difficulties. Senator Flint and Assistant Attorney-General Woodruff had gone ashore and the anglers were drifting out to sea.

They waved—put up a rag of a sail—and then tried to skull the heavy launch with the one oar, but could not move her. All this time, Mr. Pinchot was playing the fish which towed it with the tide two or three miles. For two hours they drifted out to sea to the southwest in the unmanageable craft trying to reach the island, and then the unexpected happened—the engine started—Mexicau Joe having taken it apart.

The fish, which was always off eighty feet or so, now went to the bottom—some 200 feet, three miles from where they hooked it, away off to the southwest of San Clemente, and just as they expected to land, the giant yellowtail which might have smashed all records, ran into the kelp and broke the thread of a line after five hours of the best contested fight ever put up on light tackle in any waters.

The anglers repeatedly saw the yellowtail on the surface as it circled the boat from eighty to one hundred feet away and it doubtless would have given Mr. Simpson's record fish a close run.

The anglers of the Washington party all agreed that Senator Flint had them "fished to a finish." He caught the biggest fish, and fished less, and the oldest anglers in the bunch said that the Flintonian system was too much for them. It is rumored that the Senator is to issue a Flint code on sea-angling which can be attached to the rod and be read as you fish.

Assistant Attorney-General Woodruff, who was for four years in the Yale crew and football team, and later coached Pennsylvania, made some remarkable catches, and he and Senator Flint and Dr. Houghton are to be made honorary members of the Light Tackle Club. Mr. Pinchot is an honorable member of the Tuna Club.

The government official angling party declared that the waters of Santa Catalina contained the most remarkable fishing grounds in the world. The hospitable drawing-room of the Tuna Club has entertained a large number of famous anglers this last week, and any night a dozen or more world-famous anglers can be met there exchanging opinions and experiences.

Black sea bass fishing at San Clemente does not compare with that off Santa Catalina. Charles F Holder took the only fish on light tackle of the party, the fish being a small one under 100 pounds.

The United States Inspector is to examine the lanuches of Santa Catalina this week. Each launch must in the future have a sail, two or four pair of oars in case of a break-down, good life preservers and a breaker of water. Most of the launches have a perfect equipment, but all should carry four oars, have appliances for a sail and have iron rowlocks in the side and astern, so that they can be propelled.

TRAINING THE BIRD DOG.

C. B. Whitford, the well known writer on heredity and other subjects pertaining to the turf and field has just pubilshed through the Outing Publishing Company, a book on Training the Bird Dog, which is of peculiar interest to horsemen in that it treats the subject of training on general principles, applicable alike to the horse or dog.

As is generally understood the modern Setter and Pointer are bred on lines similar to those which are followed in the breeding of the trotting horse. The question of conformation as related to speed and endurance is of first importance in the bird dog. He must be so formed that he can be worked at a very fast pace. Then he must have good manners and natural mental faculties just as this quality is desired in a trotting horse.

The development of the raw material into a finished product is what Mr. Whitford concerns himself in his work. He proceeds upon the theory that a well bred Setter or Pointer with good form and good disposition and mentality can be brought to a high state of perfection by his methods of encouraging and developing the good qualities instinctive in his subject, and repressing those undesirahle qualities which are also instinctive, or in other words, he points out the way in which it finally becomes a matter of habit for the dog to do the right things in the right way, without having the desire to do the wrong things.

The method is largely a matter of anticipation on the part of the breaker. That is the breaker is taught to expect the dog to do certain things under certain conditions, and those things which are proper are encouraged in the very intent, while those which are not proper are discouraged before a bad habit is formed, all this saves breaking and its evil consequences.

Our best horse trainers to-day are using similar methods in the development of their horses. Instead of allowing bad habits to form, the very intention of doing wrong is checked before a habit can be formed.

The work is interesting to horsemen as well as to sportsmen who fancy recreation with gun and dog, because of its simple and logical method of animal development.

The author has the novel distinction of being the only author of a work on dog breaking who has won a field trial prize. Gladstone, Adam's Drake, Bow, Faust and other well known field trial dogs were handled in their day by Mr. Whitford.

After an absence of many days shoals of king salmon have again come in shore and all of last week Monterey's mammoth fleet of midget fishing boats hovered in the sea off Pacific Grove. By actual count there were about 200 boats in the strip of ocean ahout half a mile long. Boats averaged catches of five to six fish of sixteen pounds each.

The run of salmon expected off the Golden Gate and in San Francisco bay four weeks ago were in evidence last week "off the heads." The fish were feeding on sardines and anchovies, the ahsence of which bait for the time being is attributed to adverse northerly and nor' westerly winds.

This week there was quite a large run of salmon in the bay off Santa Cruz, the catch on Thursday counting up 75.

Seventy thousand brook trout will be planted in the north fork of the Feather river by the California Fish Commission.

Another consigument of 12,000 trout from the Brookdale Hatchery is scheduled for Corralitos Creek. The distrihution of fish in all the mountain streams of this country is now under way and in another season Santa Cruz county may be recognized as the "Angler's Paradise."

Drink Jackson's Napa Soda.

AT THE TRAPS.

The Golden Gate Gun Club shoot at Ingleside last Sunday brought out a fair attendance of shooters—many of the club members finding the attractions of deer hunting and dove shooting stronger than clay pigeon smashing.

Clarence Ashlin and William Price tied in the Du Pont trophy race, the latter winning on the shoot-off. This gives Price a credit of two wins for the handsome trophy. In the "new" Du Pont race at double rises, Billy Ashcroft was high gun with 14 breaks. In the regular club race at 50 targets Edg. Forster won first money. A summary of scores follows:

Club shoot, 50 targets—Forster 43, Price 41, Murdock 38, Haight 37, Ashlin 34, Sinkey 34, Taylor 28, Haas 26, Asbcroft 26, Knick 25, Biller 25.

Du Pont trophy, 25 targets, distance handicap—Price 16 yards, broke 18, Ashlin 16-18, Haight 20-17, Iverson 18-16, Haas 16-14.

New Du Pont trophy, 10 double rises—Ashcroft 14, Sinkey 12, Haight 11, Taylor 11.

The California Wing Club August shoot at live birds is the card at Ingleside to-morrow.

The first semi-annual registered tournament of the Crescent Bay Gun Club will be held at Venice on August 7, 8 and 9, bringing together about seventy of the finest shots in the West, and will be the first of a series of meetings to be brought off in rapid succession by the gun clubs at Santa Barbara, San Luis Obispo, Medford, Or.; Denver, Riverside, Redlands and Bakersfield, and repeated later in the year.

At Venice Interstate Association rules govern throughout the programme, and the division of purses will be under the class system, with $500 added money. A number of professional shots, representing makers of arms and ammunition, will take part, but these will shoot for targets only.

One Leggett trap and three Expert traps, arranged according to the Sargent system, will be used.

There will be ten regular daily events of twenty targets, and an extra event of fifty targets on the second day, August 8, for shooters who have shot at 200 targets or more and scored 80 per cent. or less in regular events; also a merchandise event of fifty targets on August 9. There will be extra pools, and contestants may enter all regular and side-pool events.

The tournament will be under the management of C. W. Clement, as secretary and cashier. He will be assisted by Robert H. Bungay, secretary of the Crescent Bay Gun Club.

The Coast tournaments scheduled to follow in the near future will be held at Medford, on August 13, 14. Santa Barbara August 18, 19, San Luis Obispo, August 22, Denver, September 1, 3, and at Riverside Redlands and Bakersfield later in the fall with added money and trophies for each.

Everett (Wasb), Gun Club scores at the regular weekly shoot July 19th, were:

Event 1—10 targets:

Sumner 8, Wm. Hulburt 8, Westland 8, Ted Agnew 5, Glen Hulburt 2, Al. Agnew 7, Russel 5, Olwell 9, Swalwell 3, Solberg 1.

Event 2—15 targets:

Sumner 13, Wm. Hulburt 11, Westland 13, Ted Agnew 9, Glen Hulburt 8, A. J. Agnew 7, Russel 6, Olwell 9, Swalwell 7, Solberg 9.

Event 3—25 targets:

Sumner 17, Wm. Hulburt 20, Westland 16, Ted Agnew 8, G. Hulburt 13, A. J. Agnew 16, Russel 18, Olwell 20, J. A. Swalwell 13, O. A. Solberg 7.

But four shooters were at the Crescent Bay Gun Club shoot July 26th—the majority of the boys had dove fever, the birds being plentiful in that section. Bob Bungay broke fifty blue rocks straight, his percentage in 200 birds was 88.2. Captain Bartlett broke 83 out of 100 targets. F. Brennan scored 82 per cent and Frank Bungay rolled up 75 out of 100.

A Eureka correspondent sends us the following:

"The Eureka Gun Club decided at a meeting held last night at Buhne's Branch Store to hold a shooting tournament on Saturday and Sunday of fair week (in September), at the club grounds south of town.

"Dick Reed and F. Willitts, two San Francisco sportsmen, were present and assured the members of the club that a number of crack marksmen from all sections would be glad to participate, and accordingly invitations will be sent to the various gun clubs from Portland to San Diego.

"Many suggestions were made as to the manner of holding the tournament which will be arranged for by the entire club. The tournament will be followed by a two weeks bear hunt in which the visiting sportsmen will participate, and many a panther and bear will surely meet its fate. The last day of the tournament will be the occasion of a big barbecue, and the awarding of prizes to those making the best scores.

"The club will issue a souvenir program of the tournament and hunt which will be freely distributed among all similar organizations on the coast."

By breaking 70 out of 75 blue rocks at the Multnomah Rod and Gun Club's weekly shoot July 19th, Charles Wagner won the class A cup and is able to keep it permanently, because he has won it twice before.

Another prize to be shot for has been presented by the Du Pont Powder Company. It is a handsome trophy and will be shot for by shooters averaging under 75 per cent.

Frank Howe has been appointed captain of the team to be selected to shoot against a picked team from Seattle in the near future. In addition to Howe the rest of the team will probably be Jack Cullison, William Caldwell, Harry Ellis and Charles Wagner. All of these experts have been shooting above 90 per cent, and as a team have averaged about 92 per cent for the past month.

Fully 400 spectators and shooters were present at the shoot, a summary of scores follows:

Wagner shot at 100, broke 93, Abraham 100-93, Cullison 100-92, Caldwell 100-91, Howe 100-91, King 100-91, Young 100-88, F. E. I. Nagle 100-84, Robinson 75-63, Long 50-38, Sternberg 100-76, Wilkinson 100-75, Montgomery 100-74, Campbell 100-72, Woehn 100-72, Moore 100-72.

Expert trap shots of Seattle and Portland have practically concluded arrangements for a contest for $500 a side to be decided in the near future. A challenge came from Portland and was promptly accepted by the Seattle men. Two teams of five men each will compete, and each man will put up $100. The time and place of holding the shoot is yet to be determined. Centralia and Tacoma have been suggested, but in case neither of these places is selected, the shoot will take place either in Seattle or Portland. It is quite likely, however, that the shoot will take place on neutral ground.

The Portland team will be selected from M. Abraham, Jack Cullison, W. W. Caldwell, Charles Wagner, Frank Howe and Harry Ellis. The Seattle team will be selected from among E. Ellis, Ed. Garrett, McLaughlin, Guist, Junker, Hall and Dr. Purdy.

The tournament to be held at San Luis Obispo is already being arranged for by San Luis shooters. C. W. Clement was recently in that burg and conferred with interested sportsmen in regard to the event.

A Tacoma team composed of five crack shots from the South Tacoma Gun Club went to Seattle July 26 to meet a like team from the Seattle club in a match shoot at 500 birds, 100 to the man. The Tacoma team, selected was, J. C. Dague, J. C. Jensen, Jack Cooper, E. W. Cooper and E. E. Young. The Taeoma men challenged the Seattle team largely for the purpose of familiarizing themselves with the range on which the big state shoot will be held the latter part of August.

The following scores were made in the practice shoot July 23d: J. Cooper 18, 21; Jensen 20; Dague 20, 22; E. W. Cooper 22; William Myers 15.

The tryouts of the United States Revolver Association, originally announced to take place at the Shell Mound, Oakland, ranges in August, will not come off until September 6th, according to present arrangements. The meetings will last for six days, including September 13th. Consequent on the change of dates for this shoot, the Golden Gate Pistol and Rifle Club will postpone its big prize shoot so as to run simultaneously with the championship meeting. The Golden Gates announce a very enticing prize list and a big entry list is assured. The Independent Rifles will shoot at the Shell Mound targets to-day and will be the only organization out for practice. The monthly medal shoot will be held during the afternoon and many valuable prizes will be distributed to the winners.

Gorman, who made such a remarkable showing on the American team which won the world's championship, is expected home toward the end of August and the members of the Shell Mound Pistol and Rifle Club are planning a reception for him.

VENICE SHOW.

The Venice of America Kennel Club's second annual show, July 23d, 24th and 25th in the skating rink at Venice was voted a successful and well conducted show by exhibitors and a large attendance of visitors. James Ewins of Los Angeles judged all classes to the satisfaction of the majority of those interested—kicks were few and far between. About 150 dogs were benched, accounting for nearly 200 entries. "Billy" Ballantyne of Irish Terrier fame, was here, there and everywhere and filled the role of Superintendent most acceptably.

R. F. Cochran, Freeman Ford and Kingsley N. Stevens composed an effective and painstaking bench show committee.

The quality of the show was excellent in many breeds. The club is to be congratulated on the large number of cups and special prizes donated for the various breeds.

The special trophy awards and principal wins were:

Best kennel of Foxhounds, Maj. W. Arthur Phipps' Langley Chum and Langley Drag, also club cup for best.

Best St. Bernard, J. L. Flannagan's Rover. Best Great Dane, Frank R. Valk's ch Major II. Best Russian Wolfhound, Charles L. Givernaud's Manifesto. A new dog recently purchased from Mrs. B. Kippel.

Best Pointer bitch, Imprimis Kennels' Ch. Faith II Winners dogs—1 Imprimis Kennels' Imprimis Vaquero, res J. L. Anderson's Spot All. Winners bitches—1 J. L. Anderson's Lady Bess; res. Imprimis Kennels' Imprimis Navajo.

Best English Setter, Imprimis Kennels' Imprimis Lochinvar. Winners dogs—1 Imprimis Lochnivar; res V. A. Knehn's Ch. Mallwyd Beau. Best English Setter bitch and first winners, Capt. Huron Rock's Sue Gladstone.

Gordon Setters, winners, Homer Kennedy's Fanny.

Best Irish Setter in novice or limit J. M. Grover's Prince. Winners, 1 Thomas W. Savage's Don; res. Prince. Best bitch Thomas W. Savage's Nan.

Best Field Spaniel, A. E. Morrow's Don.

Best Black Cocker, George A. Nieborger's Uvas Surprise. Best parti-color, W. H. Dennis' Cymbeline. Best red, Kingsley N. Stevens' Brownland Babbie.

Best Dachshumde, H. Dclorey's Fritz.

Best Collie dog B. and H. McDonald's Vern The Clausman. Best Collie bitch and best California bred B. and H. McDonald's Vern The Clansman's Daughter. Other than sable and white, 1 open R. Wallace's Dictator.

Best English Bulldog, George McLean's Moston Monarch. Best bitch (over 40 pounds) G. D. Green's Desdemona. Best California bred, G. H. Young's Ross Boy. Winners dogs, 1 Moston Monarch; res Ch. Endcliffe Advance. Winners bitches, 1 Endcliffe Valentia res Mersey Queen.

Best Dalmatian, Freeman Ford's Arroyo Conquest.

Best Airedale dog, Lee Garnsey's Aireshire Lad.

Best Bull Terrier dog, C. B. Gill's Tedcote Wonder. Best bitch, Mrs. George Flexner's Lady Hazel. Winners bitches, 1 Lady Hazel; res. R. Roos' Willamette Starlight.

Best French Bulldog, Mrs. E. E. Edelhoff's Fortuna Docteur. Best in limit, Fortuna Fifiue.

Best Boston Terrier dog, Freeman Ford's Ch Boylston Prince II. Best bitch, Mrs. M. F. Severance's Endcliffe Topaz.

Best smooth Fox Terrier bitch, J. P. Browne's Garston Darkie. Best smooth dog, W. W. Stettheimer's Tallac Marlin. Best smooth puppy or novice, J. R. Huddlestone's Ramona Script.

Best wire Fox Terrier, J. P. Brown's Ch Humberstone Record.

Best Irish Terrier, Mrs. E. F. Morgan's (Millbrae Kennels) Endeliffe Curate. Best of opposite sex, N. Nissen's Portland Bee.

Best English Toy Spaniel, Mrs. R. P. Cochran's Ch Dreamwolde Don Quixote. Best bitch, Mrs. Cochran's Lady Betty.

Best Japanese Spaniel, Mrs. Charles Givernaud's Nogi. Best Toy Poodle, Fortuna Kennels' Frou Frou. Best puppy or novice Toy Poodle Fortuna Desire.

Best Chihuahua, Miss Holmes' Tiny. Best Toy in the show, Nogi.

Best dog or bitch any breed, in the show W. W. Stetthcimer's Tallac Marlin.

Best Pacific Coast bred, in the show, Imprimis Kennels' Pointer Navajo.

Best dog or bitch, in Foxhound, Setter, Pointer, Russian Wolfhound or Bloodhound classes, Imprimis Kennels' Pointer Ch Faith II.

At a meeting of the board of directors of the Interstate Fair held recently at Spokane, Wash., it was decided to make the regular annual dog show of the Spokane Kennel Club one of the features of the fair this fall. An appropriation of $300 was made by the fair board toward the cups and medals for the winning dogs.

At a meeting of the kennel club T. S. Griffith was elected president and A. B. Jackson secretary. The club is expecting a large entry list of dogs for the fair this fall.

Mr. Griffith has imported two new collies which he will show this fall. One of these is Glen Tana Pop, which Mr. Griffith declares is the finest Collie ever sent to the Northwest.

Chas. Klein, who is associated with Mr. Griffith in breeding fine dogs, has imported three red Cocker Spaniels from the Woodstock kennels.

At the Calgary show, July 6, 7, 8 and 9, Judge Cole, Glen Tana Squire (by Ch. Squire of Tytton) won first open winners, best Collie dog in show and also best dog of any breed in show. Glen Tana Pop won first puppy and first novice. Glen Tana Karl (a son of Glen Tana Squire) won second puppy. If his mouth would have been even he would have beaten his sire.

Much to Mr. Griffith's disappointment, the best Collie in the bunch, Glen Tana Sybil, was overlooked by the attendants and judge, until after the ribbons had been placed, when the judge publicly stated that he regretted the oversight, as she was the best Collie bitch in the show.

In specials, the Glen Tana Collies won the Bankers' cup, Dominion Hotel cup, medals from Canadian Kennel Club, and prizes for the best brace and best kennel of four.

Spokane dates are October 7th to 10th inclusive and Mr. James Cole of Kansas City, will pass on all breeds.

The Pacific Coast Collie Club propose to hold a show in Los Angeles in December. The officers of the club are: W. J. Morris, 2941 La Salle street, Los Angeles, president; George Nicol of Los Angeles, first vice-president; Edward Coldron, second vice-president; Bert McDonald of Glendale, secretary; M. Stuart of 873 East Thirty-ninth street, Los Angeles treasurer.

William F. Wattson's English Setter bitch Rod's Sylvia whelped June 21st six puppies (3 dogs) to Sir Mark.

THE FARM

THE COLTS HOOFS.

To grow feet in the best possible manner the colt should be driven into the stable once a month, when on grass, and the feet should then be carefully inspected. As a rule, it is necessary to shorten the toes, and this should be done with the rasp—in fact, no other instrument should be used for the trimming of colts' feet. Where the toes are kept short the quarters will usually take care of themselves, for the frogs will bear upon the ground and keep the heels properly spread. The frog should be particularly noticed for if it gets out of contact with the bearing surface the foot will very rapidly lose its proper shape; the heels will contract and the walls at the quarters become brittle, weak and prone to split, either from above or below. Where a "quarter-crack" appears it is a difficult matter to bring down a new growth of sound hoof without firing and blistering, so that prevention is all important. There is no need to cut out the sole or "open the heels," as it is called. The frog and heels should be left absolutely untouched and they can not be too well developed. The sole will take care of itself, for nature will throw off dead horn as required. Keep the walls rounded at the ground surface, the toe short and the frog prominent and, with but few exceptions, horses will go to market in the best possible condition so far as the feet are concerned, to command a profitable price.

In this connection it may be added that sound feet are best produced by adequate feeding of nutritious food. Horn comes from the nitrogenous constituents (protein) of the food and for this reason a complete ration should be used for the growing of colt frame and sound hoof-horn, for corn alone can not be depended upon to produce good sound feet. Sudden changes of food, periods of sickness, exposure to inclement weather for months at a time all have an injurious effect upon the feet; therefore it is important to shelter the colt well, feed him regularly and generously and protect him as much as possible against the ravages of disease. Train the feet in the way they should grow and when they are mature they will not be so liable to depart from sound form and substance.

When the hoofs have been properly developed they are very apt to be quickly and injuriously changed in shape and condition by the erroneous, hurtful methods of a blacksmith who has not studied the anatomy of the horse's foot. The owner should supervise the shoeing of his horses and in addition to the use of shoes of proper weight and form, the following points should be attended to: The frog is to be left untouched by knife or other instrument; only that portion of the sole which is dead and loose is to be removed; the bars are to be left alone; the heels are not to be "opened" by a couple of deep notches; the outer surface of the walls is not to be rasped, with the exception of a slight depression under each nail point to allow of proper clenching; the shoe is to be fitted to the foot and not the foot to the shoe; the shoe is not to be applied to the sole when red hot, unless a light touch is necessary to show where horn must be rasped away to furnish a proper seat for the shoe; the rasp is to always be used in preference to the knife or buttress; shoes should be reset or replaced once a month; nails should be of the best quality, not too large and not driven too high or too close to the sensitive structures within the horny box of the foot; the feet are to be kept as truly level as possible and, while keeping the toes comparatively short, the heels are not to be unnaturally lowered.

SPONTANEOUS COMBUSTION.

Many farmers complain about spontaneous combustion in barns where hay is stored. One correspondent asks if this is an actual result of storing hay improperly. No doubt fires occasionally originate in large quantities of hay by spontaneous combustion. However, some of these fires might be started by smokers, tramps or children. The danger from spontaneous combustion can be materially lessened by keeping the barn doors and windows closed. Instead of trying to air out the hay by opening the doors and windows, keep them closed for it takes a circulation of air to make a fire. While filling the mow keep the hay evenly distributed, not permitting it to pile up in the middle and roll off to the sides. Most of the cases of spontaneous combustion are where green hay is dumped in the middle of the barn and allowed to pile up and roll off to the sides. The result of this practice is that the middle becomes very dense which develops an intense heat. The hay on either side being loose permits of a circulation of air that makes combustion possible, for as above stated we can't get fire without air. We never hear of a fire in the silo. Some authorities claim that there is never spontaneous combustion in a hay mow less than twenty feet deep.

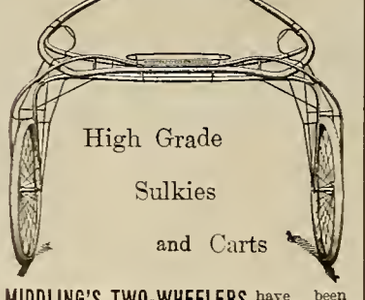
Colemans Rural World says that scientists of the Department of Agriculture are puzzled for a name for a new animal—half African zebra and half American hurro—which has been born at the Experiment Station of the Bureau of Animal Industry at Bethesda, Md. This is the first time that the zebra and hurro have been hybridized. The officers of the department are elated over the success of the experiment. The zebra is a male presented to President Roosevelt by King Menelik of Abyssinia. The offspring shows slight resemblance to the zebra, and has faint stripes.

Mare, Colt, Buggy and Cart FOR SALE.

Four-year-old chestnut mare, standard bred, by Mendocino, dam Largo by Dexter Prince, with colt by Bon Voyage at her side. Colt entered in Breeders Futurity Stake No. 8 and in the Western Horseman Stake. Mare about 15½ hands high, gentle, well broken and a good roadster. With one month's training showed a half in 1:12 last year. Ball bearing buggy and McMurray cart. Will be sold cheap as owner is going east. Address or apply to D. C. THOMPSON, 760-59th St., Oakland, Cal.

BEST FOR LEAST MONEY

JOHN MIDDLING'S



MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

Send for catalogue and prices to

JOHN MIDDLING, White Pigeon, Mich.

Sulky and Cart for Sale.

One brand new McMurray sulky and one brand new McMurray cart for sale, Never been uncrated. Best made. Can save you some money. Address,

F. W. KELLEY,
Care of Breeder and Sportsman,
P. O. Drawer 447. **San Francisco.**

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.
Address this office,
BREEDER and SPORTSMAN.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.
SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.

THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.
My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

BONNIE D. by BONNIE DIRECT 2:05¼

Is offered for sale. He is a bay gelding, four years old, a square trotter, sound, good looker, gentle and city broke. Can show 2:30 gait. He is out of Electress Wilkes 2:28½, dam of Lady Mowry 2:09¼, by Nutwood Wilkes 2:16½. MRS. D. V. TRUAX,
Near Park St. Station. 1126 Park Ave., Alameda.

"HOWARD SHORTHORNS"-QUINTO HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.
WILLIAM NILES & CO., Los Angeles, Cal.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to
S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

Stallion for Sale.

Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:05¼, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13¼ and Pinkey H. 2:17. This colt is a beautiful dark chestnut, with a great deal of knee and hock action, and in good hands would make a show horse. Will castrate him and break to saddle if any one wants him that way. Is a very attractive and stylish fellow.
For prices and other particulars address,
Dr. A. De FOE, Box 38, Pleasanton, Cal.

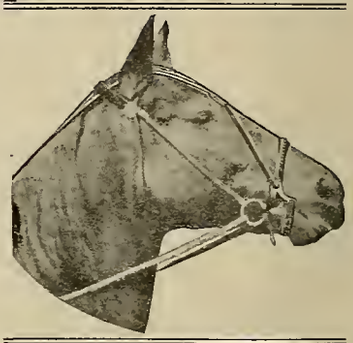
FOR SALE CHEAP.

Handsome bay mare, seven years old, about 16 hands high. Sound, well broken and gentle in every way. Sired by Chas. Derby, dam Allie Stokum by Richard's Elector. High-class road mare and a good prospect for a race mare. With three months' work last year, trotted a mile in 2:18, half in 1:06, driven by an amateur. I will also sell a fine set of harness and pneumatic tired buggy, good as new. To see the horse, etc., and for further particulars write or apply to
W. DIXON,
2310 Encinal Ave., Alameda, Cal.

PETER SAXE & SON, 911 Steiner St., San Francisco, Cal., Importers, Breeders and Dealers for past thirty years. All varieties Cattle, Horses, Sheep, Hogs. High-class breeding stock. Correspondence solicited.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by hits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **gennine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct** from us, as **we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

N. B.—Our Illustrated Catalogue No. 42, containing cuts and descriptions of everything used on the horse (many new goods) will be mailed free to any address upon application. Write for one at once, addressing Dept. "C."

BURN ALL CARCASSES.

In nearly every community will be found the careless farmer who disposes of his dead hogs by throwing them into the river. In most cases this is a criminal offense and should be prosecuted severely. No matter whether hogs thus disposed of have died of a contagious disease or not, contamination is bound to ensue as the body decomposes, which makes the water productive of germs.

When hogs die upon the farm the best method of disposing of the carcass is by burning. This not only destroys the carcass but also any disease germs that may be lurking in it and removes the possibility of the animal becoming a further source of contamination. Where a dead animal is buried the grave should be dug very deep and the earth firmly packed above it. Shallow graves are often opened by dogs or other animals and any germs present are apt to be scattered considerably. Where burying is resorted to, if stones or other hard substance are mixed with the earth put over the carcass, it will often keep the body from being dug up.

An excellent veterinarian recommended the following treatment for worms in horses: Give every morning in a wheat bran mash one of the following powders: Powdered wormseed 2 ounces, powdered spigelia root 2 ounces, granulated sugar 6 ounces. Divide into five powders. Give the first thing in the morning before the other food has been eaten, and wait an hour before feeding any other food. An hour after the last powder has been given give her a six drachm dose of Barbadoes aloes and a tablespoonful of ginger as a drench. This will physic away the worms. She must not be worked when physicking except at very slow, light work.

FARM NOTES.

Small farms, well and intelligently worked, are more profitable than large ones half cultivated.

It is always economical to keep the wagon well greased and all farm machinery in good order.

Nature has provided a leguminous crop for every part of the earth where it was intended that man should farm. Cowpeas, soy beans and Japan clover in the south, crimson clover in the eastern slope, red clover in the central States, alfalfa in the west and Canada peas in the north show how thoroughly the distribution has been effected.

See that the hames as well as the collar is properly adjusted. You may thus save sore shoulders on your work animals.

Enough waste timber can be picked up around most farms to keep the kitchen fire going. Fence rails and discarded outhouses are put to good purpose if sawed up and used this way.

The application of four inches of water in depth over the surface of a field on which plants are growing fairly well is sufficient to moisten the soil to the depth of four feet, providing it is evenly distributed without loss. In practice a larger volume is required if it is desired to moisten the soil to this depth. This difference between theory and practice is readily explained. In irrigating in the usual way the top layer of soil receives far too much water. Part of this seeps into the second and third feet, a part passes off into the air in the form of vapor, and the remainder is left in the top layer or is utilized by the plants. Now in this process of distribution from the surface downward a large amount is wasted. The greatest loss of water is from the surface of moist soil into the air.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

Campbell's EMOLLIC IODOFORM Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.

PRICE—25c, 50c and $1.00.

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

Jas. B. Campbell & Co., Manufacturers, 418 W. Madison St., Chicago, Illinois.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

Race No. 15—Running—3-8 mile, 2-year-olds, owned in district, purse $100.
Race No. 16—Running—½ mile, Consolation for Non-winners, purse $150.

CONDITIONS:

All harness races to be governed by the American Trotting Association rules as far as practicable. All harness races to be mile heats. All entries to close with the secretary at the fair grounds at 12 o'clock, noon, **August 25th.**

Entrance in all purse races five per cent of the amount of the purse, and five per cent for winners; four or more to enter and three to start. No money given for a walkover. Entries not accompanied by the money will not be recognized. Nominations to be made in writing, giving the name, age, color, sex, sire, dam (if known, and where not known the fact shall be stated) and colors of the driver. This rule will be strictly enforced. In case the purses above given do not fill with four complete entries, the board has the power to reduce the amounts of the purses as in its judgment seems proper. The board reserves the right to declare a race off or postponed on account of inclement weather. Any horse distancing the field shall be entitled to first and third money only. In all purse races for harness horses the winning horse to have 60 per cent, the second 30 per cent, and third 10 per cent of purse offered, for running races 70 per cent to the first, 20 per cent to the second and 10 per cent to the third horse.

Except as above in all running races rules of the California Jockey Club will govern as far as practicable.

How to get to Marshfield: Take Coos Bay Steamers from San Francisco: M. F. Plant, Eureka and Czarina. Fare on horses $10 and up, according to valuation. Passengers $10.

Registered Trade Mark

SPAVIN CURE

CHERRYVALE, Kansas.

Troy Chemical Co., Binghamton, N. Y.:

My horse was badly afflicted by a thoroughpin, one of the worst cases I ever saw, and I was told there was no cure for it. I had it opened up, but it came back again, and seemed to grow larger. I drove him just the same and was not laid up during treatment. Used your medicine and the thoroughpin is now completely removed. Yours truly,

I. S. STRICKLER.
MILTON, Cal.

Troy Chemical Co., Binghamton, N. Y.:

Dear Sirs: Enclosed you will find $5 for which please send me a bottle of "Save-the-Horse."

I sent for a bottle for a horse that had a curb and am glad to say that it cured him.

Yours truly, C. HUNTINGTON.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it.

WINCHESTER Shotgun Shells

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

TRAINING DISTEMPER...

SPOHN'S DISTEMPER CURE

Ever hear of this? Yes, of course, you did, but under a different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces, and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHN'S"

Is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c. and $1 a bottle; $5 and $10 a dozen. Sold by al good druggists, horse goods houses, or express prepaid by manufacturers

Back East Cheap

Low round trip rate summer excursion tickets sold to Eastern points on these dates:

August 17, 18, 24, 25.

Sept. 15, 16.

Sept. 23, 24, 25 to Kansas City only.

Here are some of the rates:

Omaha	$ 60.00
Council Bluffs	60.00
Kansas City	60.00
Chicago	72.50
St. Louis	67.50
New Orleans	67.50
Washington	107.50
Philadelphia	108.50
New York	108.50

Tickets sold on July dates good for 90 days; those sold August and September good until October 31. Stopovers and choice of routes going and coming.

SOUTHERN PACIFIC

See nearest agent for details.

STARTING PAYMENTS

Due Aug. 9, '08.

Pacific Breeders Futurity Stakes No. 6---$7000

FOALS BORN 1906. NOW TWO-YEAR-OLDS.

TO START IN TWO-YEAR-OLD TROTTING DIVISION, $35

TO START IN TWO-YEAR-OLD PACING DIVISION, 25

Nominators must designate when making payments to start whether the Horse entered is a Trotter or Pacer.

Colts that start at Two-Years-Old are not barred from starting again in the Three-Year-Old divisions.

Pacific Breeders Futurity Stakes No. 5---$7000

FOALS BORN 1905. NOW THREE-YEAR-OLDS.

TO START IN THREE-YEAR-OLD TROTTING DIVISION, $50

TO START IN THREE-YEAR-OLD PACING DIVISION, 35

Nominators must designate when making payments to start whether the Horse entered is a Trotter or Pacer.

MONEY IN ABOVE STAKES DIVIDED AS FOLLOWS:

$3,000 For Three-Old Trotters.	$1,000 For Three-Year-Old Pacers.
200 For Nominator of Dam of Winner of Three-Year-Old Trot.	200 For Nominator of Dam of Winuer of Three-Year-Old Pace.
1,250 For Two-Year-Old Trotters.	750 For Two-Year-Old Pacers.
200 For Nominator of Dam of Winner of Two-Year-Old Trot.	200 For Nomiuator of Dam of Winner of Two-Year-Old Pace.
100 To Owner of Stallion, Sire of Winner of 3-Year-Old Trot when mare was bred.	100 To Owner of Stallion, Sire of Winner of 3-Year-Old Pace when mare was bred.

Be sure and make payment in time. Address all communications to the Secretary.

E. P. HEALD, Pres. **F. W. KELLEY,** Secy.

366 Pacific Building, San Francisco.

New Edition of John Splan's Book

"Life With the Trotter"

Price, $3.00, Postpaid.

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish.

A BIG REVIVAL of the sport of harness racing is promised at Oakland track next week during the four days meeting which opens on Wednesday, August 12th and continues for the rest of the week. This meeting was inaugurated by Ben Benjamin, the popular sporting editor of the San Francisco Chronicle, and but for his being taken suddenly and severely ill too weeks ago, it would have opened this afternoon with an excellent program and beyond any doubt a large attendance. Mr. Benjamin's illness is such that he will be confined to his bed for several weeks longer, although we are happy to state that he is considered out of danger at the present time.

Mr. Frank J. Kilpatrick of this city consulted with Mr. Benjamin's friends last Sunday at whicb time it had been given out that the meeting would have to be declared off, and immediately set to work to see if the meeting could not be given. To think is to act with Mr. Kilpatrick, and it did not take him long to get the thing going at full speed again, aud the prospects are now most bright for some brilliant racing at Oakland next week.

The entire program of races advertised will be given, the only change being that the twelve events will be crowded into four days instead of extending them over six as originally advertised. This will give three races each day which will make as fine a program of racing as has ever been given in California.

There has never been a meeting better advertised than this one and every person that has any admiration for a light harness horse is at work "boosting" for it.

The racing will start on Wednesday with three contests that should fill the big grand stand.

The free-for-all pace in which Sir John S. 2:04½ will again meet Mona Wilkes 2:03¼ is the talk of the State already. There are many who will argue all day and all night, "and then some," that the mare is fast onough to again show him the way through the stretch as she did in that memorable heat at Santa Rosa last week when she beat him a short head in the fastest heat ever paced on the Pacific Coast. But there are just as many who are perfectly confident that Sir John S. can out pace Mona any part of the mile when he is in condition. They argue that the mare had been worked many heats better than 2:10 before the Santa Rosa meeting, and was keyed up to just such a race, while Sir John S. had not been driven a mile as fast as 2:12 since the close of his stud season at Marysville June 1st. As one pretty wise horseman remarked: "When I see a horse do what Sir John S. did last year I can't believe that he was himself at Santa Rosa this year." As the owners and drivers of both these great pacers are confident their horse can win, get your ticket for Oakland next Weduesday as there is bound to be one of the greatest horse races ever seen in America there on that day.

This race will not be the only one, however. The 2:20 trot has a field of trotters entered that will cause all kinds of money to pour into the pool box, and the person wise enough to pick and back the winner can fill his pockets.

Of the horses entered in this event, six started in the 2:24 trot at Santa Rosa last week and the race went to five heats. When it was over Mr. J. B. Smith's beautiful little mare Lady Inez had won first money and a record of 2:14, made in the third heat. Morris Bros' young stallion Alsandra had second money and a mark of 2:12, while C. Silva's The Statesman, which had won the first heat in 2:11¾, the fastest heat of the race, only had third money. Lady Inez had out-lasted the others, but like Mona Wilkes she bad the advantage of being "keyed up," and when she meets these horses at Oakland on Wednesday next they may be in better condition. Besides, there are other horses in this race that did not meet the tbree horses mentioned at Santa Rosa, but in other races showed tbat they are dangerous factors. There is Lady McKinney that was just beaten by Easter Bells in 2:11½. She must be considered in any forecast of the 2:20 class trot at Oakland, and there are others.

The two-year-old trot should also make a great contest. Tbey split heats in this event at Santa Rosa with only three starters, and each of the two defeated owners is anxious to have another try at the winner, Prince Lock. There are ten two-year-olds entered for the Oakland race however, so the conditions are different.

The program Wednesday is an excellent one for an opening day. It will furnish just as good racing as they are having on the Grand Circuit and every lover of the light harness horse should aim to be at the Oakland track Wednesday when the first race is called. It looks as if the crowd is certain to be a large one.

COMPARE THE RACING at Santa Rosa last week, where the largest purse was $1,000, with that at the Grand Circuit meeting heing held at Kalamazoo this week, and you will see that California horses can put up some pretty good racing right here at home. The green trotters at Santa Rosa on the opening day beat 2:15 three times with one heat in 2:11¾. The two-year-old trotters beat 2:25 the first time out this year, and the free-for-all pacers went in 2:03¼ only a quarter of a second faster than the time made by Th Eel at Detroit iu a heat when he beat Minor Heir 2:01, the fastest pacer now on the Grand Circuit. In the 2:15 pace two different horses entered the 2:10 list and every heat was better than the class of the race. There were three heats from 2:11½ to 2:12½ in the 2:19 trot, three better than 2:10 in the 2:20 pace, and three hetter than 2:08 in the pacing event of that class. Look over the summaries of tbe Santa Rosa meeting in this issue and compare them with those of the Grand Circuit and see if we don't have some pretty good racing right here at home.

PLAN AN AMATEUR CIRCUIT.

The Los Angeles Driving Club, according to the Times of that city, is planning an intercity matinee circuit, composed of Santa Ana, San Diego, San Bernardino, Riverside and Los Angeles, to be inaugurated at the opening of the season in November, with a meeting at each track once a month in addition to the regular weekly local matinees at the home track.

All the tracks mentioned are within easy distance for shipping, and an owner can reach any of them by leaving in the morning in time to drive and get home that night. There is such a circuit in the north that takes in Chico, Sacramento and Stockton.

It is also suggested that at the end of the season the winuers in their respective classes in the two circuits should meet on a track mutually agreed upon and race for cups representing the championships of the State. A double team race might be made a feature of the intercity circuits, and two winning teams could meet for a challenge cup.

Those planning the southern circuit say it would not be necessary for one man to own both horses of a team, so long as they were owned by members of the same club they could represent that club, and the cup, after beiug won by the same association the requisite number of times, could become the property of that club, and be engraved with the names of the horses and their owners and drivers.

¾ The two parent associations, the National and the American, recently passed a law permitting an admission fee to be charged at matinees without penalizing the competing horses with either records or bars. Local harness men say this should put enough money in the treasuries to keep tbe tracks in order, furnish the cups, and give professional race meetings in the spring and fall if they so desire.

In the towns above suggested there are three or four hundred horses capable of miles in from 2:30 to 2:10 or better on a trot, and the pacing brigade three or four seconds faster, so there is no scarcity of material for the different classes.

Entbusiasts argue that it will start a good-natured rivalry and will benefit the horse industry throughout the State, for after an ower has been beaten, two or three times and cau't find a reason in the excuse book he will get anotber borse, not only for his own gratification, but for the honor of his town.

FOR THE STUDENTS OF HEREDITY.

A London dispatch to the New York Sun presents some interesting facts for the consideration of those who make study of heredity in its various phases. The Sun dispatch is as follows:

Some interesting data relating to the transmission of hereditary traits have been collected by two Dutch physicians, Doctors Heymans and Weissman. The investigations, which have covered a considerable period of time, have been carried on with the co-operation of more than 3,000 other Dutcb doctors, each of whom uudertook to transmit to the investigators complete studies of the characteristic traits of all children visited professionally. The following conclusions have been recorded, it being promised, on the evidence of numbers presumably, that the ability to coordinate thought and give expression to it rapidly was in most instances inberited from tbe father.

Forty-four per cent of the sons of mathematically-minded men, including scientists, inherited the love of and aptitude for science from their fathers, and only 14 per cent of the daughters of such men. In the case of mothers who were devoted to scientific pursuits, 100 per cent of the sons inherited the gift, and not one among the girls.

Girls showed a distinct tendency to copy any roving disposition which existed in the motber, the boys following in the father's footsteps in respect to either a roving or a stationary disposition.

The gift of clever talk and assurance in company, as well as the quality of self-study or self-criticism, was shown to come in every case in both boy and girl from the father, never from the mother.

All traits which gave evidence of good nature or sensitiveness were to be referred to the influence of the father, very rarely of the mother. Tendencies toward foibles of crime were to be ascribed almost wholly to the father. In the case of melancholia, dementia, epilepsy, and imbecility, the father's influence prevailed in at least 90 per cent of cases.

Strangely enough to record, interest in sports, such as cycling, skating, hunting, fishing, and parlor games, came almost invariably from the mother, likewise the tendency to be very neat in dress. On the other hand, punctilio in affairs of business and bonor was ascribed entirely to tbe father's side.

In the matter of literary ability evidence was conclusively in favor of the father, though artistic talent was in the greater percentage of cases traced to the mother.

Only a fraction over two per cent of all the mental characteristics traced were shown to be outside the sphere of heredity.

BETTING ON THE M. & M.

It had been thought that Spanish Queen would be the favorite, but the first ticket showed that the Chicago bunch thought differently, for Fleming Boy was given that position. The pools were not like those of the M. & M. races of some years, in fact they compared to the size of the field. A few were sold at over $300 and tbe total kept falling.

In the first big. one Fleming Boy brought $165, Spanish Queen $100, Vandetta $65, Florence C. $30, Alceste $20 and Bonnie Way $5. Then it was Flemming Boy $180, Spanish Queen $100, Vandetta $80 and the field for $25.

When the first cboice reached the $100 mark, Spanish Queen was held at $55, Vandetta $45 and the field at $20. The great drop at which most tickets were sold had Fleming Boy $50 and the field $56.

After the first heat Fleming Boy brought $50 against $40 on the field, and when Spanish Queen had won her first mile she sold at even money, against the rest of them. Before the fourth heat Spanish Queen brought $50 against $15.

Over 150,000 was handled on the event, the two auctioneers working for over five hours on this event alone.

SANTA ROSA MEETING.

Fast Racing and Close Contests the Rule During Four Days Last Week.

The four days meetiug which ended at Sauta Rosa last Saturday furnished some of the best racing ever seen on the Pacific Coast. The Coast record was lowered to 2:03¼ pacing, the Santa Rosa track trotting race record reduced to 2:09½, and during the meeting three pacers entered the 2:10 list. But one heat was trotted faster than 2:10, but there were thirteen heats paced helow that time.

There has never been a meeting where contests were closer, several nose and nose finishes heiug seen during the four days, aud any number of heats won hy a neck in the hottest kind of a drive.

One of the most remarkable features of the meeting was the sensational record made by Mr. F. J. Kilpatrick with the get of his stallion Washingtou McKinney. Mr. K. had advertised that during the meeting he would endeavor to mark eight of the get of this magnificent son of McKinney, and named the following: Belle of Washington, Ray McKinney, Fabia McKinney, Harry McKinney, Donello, Rex McKinney, Reed McKinney, all trotters, and May Randall a pacer. Mr. Kilpatrick more than made good. He not only gave these eight standard records, driving them himself, but gave McKinney Belle a trotting record of 2:19, a material reduction from her record of 2:30 made last year. As the eight new records were all made in one day it was a unique performance, as never before has an amateur driver given standard records to eight horses, sired hy his owu stallion. A remarkable thing in regard to this performance is that several of these horses had less than one month's training, which is strong evidence that Washington McKinney is a most prepotent sire. The stallion was exhibited on the track during the afteruoons of the first and last day of the meeting and was universally admired.

The conduct of the meeting throughout was excellent. There was not a race but which was honestly won and hut few heats that were not driven for by every driver in the race.

The starting by Mr. A. C. Stevens, of Woodland, could not have been improved upon. Every starter will have a few poor starts during a meeting, no matter how hard he tries, hut Mr. Stevens had less than any man that has handled the flag in California. He makes no claim of heing a professional, heing a Yolo county farmer, hut his work at the meetings held in his own county, where he is one of the directors of the County Fair Association, has attracted attention of the Breeders' Association and the State Fair management aud he has been engaged to start at Sacrameuto and Chico.

The judges' stand was filled during the meeting by directors of the association. Those who officiated during the week were: Directors F. H. Burke, Robert S. Brown, Frank J. Kilpatrick and T. J. Crowley, three of these gentlemen heing in the stand each day. Their decisions were not questioned and not a protest was filed duriug the four days racing. The timers who held official watches during the meeting were C. A. Durfee, J. W. Thoms, S. B. Wright, Geo. W. Berry, D. R. Misner, and John A. McKerron, of which three were in the timers' stand during each day. Fred W. Thompson, Secretary of the Park Amateur Driviug Club made an excellent clerk of the course, and the stand book in which he recorded the results officially will be one of the neatest Secretary Gocher of the National Association receives this year. The meeting was beyond question one of the most successful ever given in California.

The first race of the second day's program was one for three-year-old trotters, in which three good-looking youngsters started, Fred Ward's Don Reginaldo by On Stanley, after being forced to trot the first mile in 2:19¾ to keep in front of the Zombro filly Bessie T, lest the second heat to her in 2:26, and then won the next two in slightly slower time.

The only other race of the day was the 2:15 class pace which resulted in quite an upset for a few who thought they had framed up a sure thing. There was a field of eight in which four were known to be very speedy. E. D. Dudley's Diablo horse McFadyen 2:15½, has shown as fast work as any horse in training at Pleasanton track this spring and was picked as a sure winner, while Sam Hoy's mare Memonio and the Southern California horse Silver Dick, behind which Ben Walker had the mount, were credited with 2:10 speed and had their backers. Queen Derby, owned by J. B. Smith of San Francisco and driven hy Jos. Cuicello, also had a following. In scoring for the first heat McFadyen did not seem to be himself and had none of that wonderful speed shown in his work. When they were given the word he failed to rush to the front as was expected and Chadbourne saw that something was wrong and pulled him up, getting the flag. The favorite was bleeding at the nose and when taken to the stall, hled quite freely. The heat was a fast one, Ben Walker getting the ghostly gray horse from Los Angeles to the wire first in the fast time of 2:09¼, Memonia being second and Queen Derhy third.

In the secoud heat Hoy and Walker had a great contest for the heat, the former winning with Memonia in 2:09½, after a furious drive. The judges noticed that Joe Cuicello hrought Queen Derby out of the hunch at the finish of this heat and seemed to be trying for second position, so they called him to the stand and told him that his mare would he closely watched in the next heat, and a new driver put up if it looked at all suspicious.

The warniug was heeded and Queen Derby took the race then in straight heats, while Memonia and Silver Dick fought for second money which was won hy Hoy's mare.

Friday, Third Day.

Every seat in the grandstand was filled aud at least two thousand persons saw the races this day. A $400 purse for pacing three-year-olds hrought out four starters. Moortrix, a half-hrotber to Mona Wilkes 2:03¼ and Aerolite (3) 2:11¾, being by Azmoor out of Trix by Nutwood Wilkes, was the favorite, and won in straight heats in the easiest manner, not being extended at any part of it, the fastest heat being in 2:14½ and the slowest 2:15½. This colt is surely capable of a mile very close to 2:10.

The second race of the day, the 2:09 trot aroused a great deal of interest. Wild Bell and Ambush divided favoritism, hut Athasham and John Caldwell had plenty of backers. Starter Steveus got them away very promptly and well lined up, Wild Bell having the pole, with John Caldwell in second position, Athasham third and R. Ambush on the outside. Soon after the word was given Wild Bell broke, followed by Caldwell and Athasham, the latter making some wild plunges. Amhush kept his feet and trotted around the others into first place, leading at the first quarter, which was reached in the slow time of 34½ seconds. Wild Bell recovered his feet and Quinn set sail for Amhush and passed him by the time the half mile pole was reached. He was leading hy three or four lengths as the last quarter pole was passed, but Rutherford began a drive that sent Amhush a little nearer at every stride. The race between these was a grand one through the stretch, Wild Bell winning by a head in 2:09½, Athasham third and John Caldwell last.

Wild Bell was now a little hetter than an even money favorite over the field. The quartet went away with a rush in the second heat, Wild Bell leading at the first quarter by a length, Athasham second two lengths in front of Ambush with Caldwell hringing up the rear. These positions were maintained with very little variation until the head of the home stretch was reached and here Rutherford brought Amhush up so fast that Wild Bell left his feet and Ambush went on and won by four leugths, Athasham second, Caldwell third and Wild Bell last. The time was a second slower but was a new record for R. Ambush.

The heat winner uow ruled favorite for a short time hut Wild Bell money was plentiful. In the third mile Athasham rushed out in front when the word was given and led to the quarter in 33¼ seconds. Wild Bell was first at the half by two lengths however and again the two favorites made a two-horse race of it through the stretch, Wild Bell winning amid much enthusiasm by half a head in 2:12. Caldwell was last all the way.

As Wild Bell had two heats and seemed to he a fresher horse than R. Amhush, the race was conceded to him, hut when Starter Stevens sent them off head and head for the fourth heat, James Thompson, driver of John Caldwell, notified the veteran of two grand circuit campaigns that the time had come for him to make a showiug of the speed he was credited with in the Year Book. Caldwell realized the importance of the occasion and with a Major Delmar rush, led to the eighth pole in fifteen seconds, increasing the lead to four lengths at the quarter in 31½ seconds, and was first at the half by two lengths in 1:04½. It began to look now as if the fourth heat would be the fastest heat of the race and that James would have to explain to the judges what had detained him in the previous heats. But Wild Bell was giving him a merry chase by this time, and although Caldwell led into the stretch in 1:37½, his race for the wire suffered in comparison with his race away from it, and he gradually slackened his speed in spite of the fact that Thompson plied the whip most vigorously. At the distance post Wild Bell was a length in front and increased that distance to two lengths at the wire with the mile in 2:11. Caldwell was second, but it only gave him fourth money, and the race went to the heat winner, R. Amhush getting second money with Athasham third.

The higgest upset of the week came in the next race. On the strength of a workout mile in 2:09½ a few days previous, Mr. Frank J. Kilpatrick's handsome mare, Lady McKinney was made a favorite at even money over the field. Wenja sold as second choice for a while, hut in most pools it was Lady McKinney against the rest. When they came up for a start, Easter Bells, driven by her owner, W. L. Vance of Marysville, had the pole, Wenja was in second position, The Angelus third, Monicrat fourth, Wild Girl fifth, Verona sixth and Lady McKinney and Irene back in the second tier. In scoring it seemed hard for Dick Ables to bring the favorite up with the bunch and it was noticed that she was pacing very often as they came to the wire Starter Stevens was patient with them, however, and finally sent them away to a fairly good start hut Lady McKinney broke and dropped back several lengths. Easter Bells led to the quarter in 33¼ seconds with Wenja second, and Monicrat third. Lady McKinney finally got to trotting and was all of two distances behind. Every one thought Ables would not try to win the heat from where he was hut he let his mare move along and when Easter Bells led at the half with Wenja second, Lady McKinney was third and gaining. As they turned into the stretch the Lady had passed Wenja and was making a hold hid for the heat. It was a thrilling race down the stretch, the cheering being the greatest of the meeting. It looked for a moment as if the Washington McKinuey mare would win, but Easter Bells seemed to have no end of speed, and without being urged by whip or spur heat Lady McKinney out by a short half length in 2:12½. Lady McKinney was timed the last half of this mile in 1:03½ and came the last three-quarters in 1:35¼, a 2:07 gait.

In the second heat Lady McKinney got a very poor start, heing several lengths behind when the word was given. Again Easter Bells went to the front easily, maintaining her position throughout the mile and again Lady McKinney trotted a fast mile, faster than the winuer went, but lost it hy a length in 2:11½ with the last half in 1:04½. Monicrat was again third, and trotting an excellent race, hut a little outclassed by the two mares.

The third heat was very much like the second, except Lady McKinney received a much hetter start. Easter Bells had all kinds of speed however, and was as steady as a clock and won the race very handily, although Lady McKinney made a great race through the stretch. Monicrat was awarded third money aud Wenja fourth

Mr. Vance, owner of the winner, was congratulated as warmly by Mr. Kirkpatrick as he was by many others who crowded around to shake his hand. Easter Bells is oue of the best prospects that has appeared on the circuit for a 2:08 trotter among the slow class horses. She is a full sister to tbe great pacer Sir John S. 2:04½, and looks something like him, although not so large. She is an easy-gaited trotter and her race was a surprise to Mr. Vance who had not worked her a heat anywhere near the time she showed in this race. She seems to have perfect manners, although ouce or twice she scored on a pace. Aithough every heat was in fast time she seemed to be going easily at the finish and came out fresh as a daisy after each mile and after the race. Lady McKinney was beaten, hut there was no disgrace in such a defeat.

Saturday, the Last Day.

Three good races brought out another large attendance on Saturday, the last day of the meeting. The opening event of the program was the 2:20 class pace, in which the McKinney stallion Charley D., owned by Col. J. C. Kirkpatrick of San Francisco, ruled a strong favorite over the field. The handsome stallion was in the pink of condition and admirahly driven by James Thompson, never left the result in douht. From start to finish of every heat he was in the lead, going well within himself, pacing the first heat in 2:08¼, the second in 2:09½ and the third in 2:09¼, giving McKinney his third 2:10 performance for the year and the twentieth in this fast list. Second honors in this event went to Solano Boy, a hrown gelding by Father McKinnou, a son of Demonio 2:11¼. This gelding is owned by C. J. Uhl of Vacaville, who used the horse on the road and discovered last winter that he had speed. Solano Boy was entered in the May Day races at Dixon where the events were all half-mile heats and won two heats in 1:08½ and 1:07. Uhl thought him good enough to spend a little money on and sent him to Sutherland & Chadbourne at Pleasanton about the first of June, so he has had but two months training. As he was a good second every heat in his first start in a mile race where the heats were all below 2:10, he looks to be a mighty good pacer. His dam is hy Guy Wilkes 2:15¼.

John R. Conway, owned hy George Meese of Danville, was made favorite for the 2:08 class pace, for which there were four horses, all with records below 2:10. The Zolock mare Delilah, driven by Homer Rutherford, was a well-played second choice however, and gave the favorite backers quite a scare before the race was over. In the draw for position Conway secured the pole, with Miss Idaho, behind which Ben Walker held the reins, in second place. Delilah third and Moy, driven by Ted Hayes, on the outside. There was little scoring in any heat. In the first Moy made a dash for the pole as soon as the turn was reached and led at the quarter with Conway second. Delilah had indulged in a tangled break soou after getting the word and was at least 150 yards behind the leaders before she got squared away. After passing the half, Chadhourne worked Conway into the lead, Ben Walker, by a furious drive up the back stretch, getting into secoud place with Miss Idaho. Rutherford instead of giving Delilah an easy heat as it was expected he would, after getting so far hehind, drove the mare for all she was worth, aud although Conway had paced a 2:09 gait to the three-quarters, she was lapped on him there and the two started a great race through the stretch, hut Delilah broke and the race was between Conway and Miss Idaho, who came the last quarter in 30¾ seconds, Conway winning. Delilah was last. The heat was in 2:07¾, a new record for John R. Conway.

In the second heat Rutherford got Delilah to the front before the first eighth was paced and led at the quarter with Conway second. Delilah led at the half in 1:03½. Walker, getting Miss Idaho in front of Conway and they maintained this position to the finish, Delilah winning the heat in 2:07¾. Miss Idaho second, John R. Conway third and Moy fourth.

Delilah pools brought more money now but Conway was still the favorite. To an even start Delilah led to the quarter in 32¼ with Idaho second and Conway third. The second quarter was paced in just 30 seconds, with Delilah in the lead by a length at the half. Around the far turn Conway gradually gained on the mare and in one of the hardest fought heats ever seen, the stallion beat the mare through the stretch and won in 2:07½, the fastest heat of the race. All were tired and it looked to be the stallion's race.

In the fourth heat Chadbourne took the stallion out in front leading at the quarter from Delilah by a length, Rutherford having evidently concluded that he would reserve Delilah's speed for the finish. Conway led to the head of the stretch, and here Rutherford brought his mare up and a whipping finish began.

The last quarter was paced in 32 seconds, both leaders very tired, the stallion outlasting the mare and winning by a length in 2:09½. It was an excellent contest throughout and the time, three heats below 2:08, was enough to make them tired.

Then came the 2:14 trot, the last race of the meeting, and as had been the case in all but two events during the entire four days, it resulted in a defeat for the favorite.

There was but four starters, Nogi selling for more money that Berta Mac, Della Derby and Chestnut Tom in the field. In the first heat Nogi took the lead with Chestnut Tom second, Berta Mac indulging in a bad break soon after getting the word and making a series of them during the mile. Nogi was not trotting as he should, but he sailed along in front and the race looked like the incoming of the Atlantic fleet to San Francisco bay. Nogi won the heat very handily in the slow time of 2:15¼, with Chestnut Tom second, two lengths back, Berta Mac third and Della Derby last.

In the second heat Nogi again led by two lengths to the quarter, but Berta Mac was acting more like a trotter and Chestnut Tom having broke, dropped to the rear. Nogi and Berta Mac made a race of it for the balance of the mile, but the mare beat him by three lengths to the wire in 2:11¼, a new record for the daughter of McKinney and one that makes her a good prospect for his 2:10 list.

The third heat Nogi and Berta Mac trotted like a double team to the half, but there the mare gradually worked herself ahead and in a race that lasted to within a few yards of the wire, she won in 2:13¼.

The third heat was easy for the mare and she won it in 2:14¼, Nogi finishing as if he were tired and was evidently not in condition, as in none of the heats did he show the speed he had shown in his work the week previous.

This ended one of the best harness meetings ever held at the Santa Rosa track, and while the receipts did not equal the expenditures by a few hundred dollars, every one got their money and the Breeders' Association uncomplainingly shouldered what financial loss there was.

The complete summaries of the four days racing, together with a full report of all time records made, follows:

First Day.

Trotting, Two-Year-Olds, $200:

Prince Lock, ch. c. by Zolock-Molahka by Nutford (Pounder) 2 1 1
Easter, b. c. by Monicrat-Alta Reina 2:27 by Alto Rex (Rutherford) 1 2 3
Silk Hal, br. c. by Hal B. by Silkwood (Ward)..3 3 2
Time—
First heat—:37, 1:13½, 1:51, 2:27¼.
Second heat—:37, 1:11½, 1:48, 2:24.
Third heat—:37, 1:11¾, 1:49½, 2:21¼.

Trotting, 2:24 Class, $1,00:

Lady Inez, b. m. by Nutwood Wilkes-Cora by Ira (Cuicello) 3 3 1 1 1
Alsandra, b. s. by Bonnie Direct-Alix B. 2:24½ Hayes) 2 1 3 2 2
The Statesman, b. s. by Jas. Madison-Creona by Algona (Inez) 1 2 2 3 3
Emily W., b. m. by Jas. Madison (Ward)..d
Wenja, br. m. by Zolock (Pounder)......d
Judge Dillon, ch s. by Sidney Dillon (Burnell) ....d
Time—
First heat—:34, 1:06, 1:40, 2:11¾.
Second heat—:34, 1:06½, 1:40, 2:12.
Third heat—:34, 1:08, 1:41, 2:14.
Fourth heat—:35½, 1:10, 1:44, 2:17.
Fifth heat—:33½, 1:07, 1:41, 2:16.

Pacing, Free-for-all, $300:

Mona Wilkes, b. m. by Demonio-Trix by Nutwood Wilkes (Chadbourne) 2 1 1
Sir John S., b. s. by Diablo-Elisa S. by Alcantara Jr. (Vance) 1 2 2
Time—
First heat—:31, 1:02, 1:34½, 2:05.
Second heat—:31, 1:00½, 1:31¾, 2:03¼.
Third heat—:30½, 1:01¼, 1:32¾, 2:06¾.

Second Day.

Trotting, Three-Year-Olds, 2:30 Class, $400:

Don Reginaldo, br. s. by On Stanley-Belle Raymond by Raymond (Ward) 1 2 1 1
Bessie T., b. f. by Zombro-Manila by Shadeland Onward (Chadbourne) 2 1 3 2
Nusado, br. s. by Nushagak-by Dexter Prince (B. Walker) 3 3 2 3
Time—
First heat—:35½, 1:09½, 1:13½, 2:19¾.
Second heat—:36¾, 1:15, 1.52, 2:26.
Third heat—37½, 1·13¼, 1·51¼, 2:26¾.
Fourth heat—:37, 1:13, 1:50½, 2:26½.

Pacing, 2:15 Class, $500:

Queen Derby, b. m. by Chas. Derby-Addie Ash by Indianapolis (Cuicello) 3 3 1 1 1
Memonio, b. m. by Demonio-May Norris by Norris (Hoy) 2 1 2 2 3
Silver Dick, g. g. by Geo. W. McKinney-Miss Taylor by A. W. Richmond (B. Walker) 1 2 3 3 2
Freely Red, b. m. by Red Medium (Helman) 6 4 4 4 4
Salva, br. m. by Dictatus Medium (Whitehead) ....4 6 d
Rockaway, rn. g. by Stoneway (Pounder) 5 d
Fred W., b.g. by Robin (Rodrignez)....7 d
McFadyen, ch g. by Diablo (Chadbourne) d
Time—
First heat—:32, 1:04¾, 1:37, 2:09¼.
Second heat—:31¾, 1:04., 1:37, 2:09½.
Third heat—:32¾, 1:05, 1:38½, 2:11¼.
Fourth heat—:32, 1:04, 1:38½, 2:11¾.
Fifth heat—:32, 1:04, 1:38, 2:13¼.

Third Day.

Pacing, Three-Year-Olds, 2:25 Class, $400:

Moortrix, b. c. by Azmoor-Trix by Nutwood Wilkes (Chadbourne) 1 1 1
On Bly, br. s. by On Stanley (Thornqust) 2 2 2
Demonio Wilkes, b. s. by Demonio (Smith)....3 3 3
Lookout, br. s. by Searchlight (Ward)....4 4 4
Time—
First heat—:33½, 1:06½, 1:41, 2:14½.
Second heat—:33¾, 1:05½, 1:39½, 2:14½.
Third heat—:34, 1:06½, 1:40, 2:15½.

Trotting, 2:09 Class, $750:

Wild Bell, br. g. by Wildnut-Bell Bird by Electioneer (Quinn) 1 4 1 1
R. Ambush, br. h. by Zolock-May Kenney by Silkwood (Rutherford) 2 1 2 3
A.hasham, b. s. by Athadon (Walton)....3 2 3 4
John Caldwell, b. g. by Strathway (Thompson) 4 3 1 2
Time—
First heat—:34½, 1:05¼, 1:37½, 2:09½.
Second heat—:32½, 1:01½, 1:37½, 2:10¼.
Third heat—:33¼, 1:06½, 1:41, 2:12.
Fourth heat—:31½, 1:04½, 1:37½, 2:11.

Trotting, 2:19 Class, $500:

Easter Bells, b. m. by Diablo-Elisa S. by Alcantara Jr. (Vance) 1 1 1
Lady McKinney, b. m. by Washington McKinney-Danville Maid by Daly (Ables)....2 2 2
Monicrat, blk. s. by Woolmon (Spencer)....3 3 4
Wenja, br. m. by Zolock (Pounder)....7 6 3
Verona, b. m. by Nutwood Wilkes (Sharp)....5 4 6
Irene, b. m. by Martin's Florida (Prior)....4 7 7
The Angelus, b. s. by Zombro (Chadbourne)....6 5 5
Time—
First heat—:33¼, 1:06½, 1:41, 2:12½.
Second heat—:34, 1:07, 1:40, 2:11½.
Third heat—:33, 1:05½, 1:39¼, 2.11½.

Fourth Day.

Pacing, 2:20 Class, $1,000:

Charley D. b. s. by McKinney-Flewy Flewy by Memo (Thompson) 1 1 1
Solano Boy, b. g. by Father McKinnon-Minerva by Guy Wilkes (Chadbourne) 2 2 2
Explosion, b. m. by Steinway (Ward)....5 6 3
Mac O. D., b. h. by Zolock (Pounder)....4 4 4
Lettie D., b. m. by Boodle (Davis)....3 3 d
Josephine, b. m. by Zolock (Rutherford)....6 5 d
Diabull, ch. g. by Diablo (B. Walker)....7 7 d
Time—
First heat—:32½, 1:03¾, 1:36½, 2:08¼.
Second heat—:32½, 1:03½, 1:37½, 2:09½.
Third heat—:32¾, 1:05¼, 1:38¼, 2:09¼.

Pacing, 2:08 Class, $500:

John R. Conway, ch. s. by Diablo-Lady Kohl by Le Grande (Chadbourne)....1 3 1 1
Delilah b m. by Zolock-Gipsey (Rutherford) 4 1 2 2
Miss Idaho, ch. m. by Nutwood Wilkes (B. Walker) 2 2 3 3
Moy, b. m. by Prodigal (Hayes)....3 4 4 4
Time—
First heat—:32, 1:04½, 1:37, 2:07¾.
Second heat—:32, 1:03½, 1:35¼, 2:07¾.
Third heat—:32¼, 1:02¼, 1:35½, 2:07½.
Fourth heat—:32¾, 1:04¾, 1:37½, 2.09½.

Trotting, 2:14 Class, $500:

Berta Mac, br. m. by McKinney-Alberta by Altoona (Helman) 3 1 1 1
Nogi, b. s. by Athablo-Cora Wickersham (Walton) 1 2 2 2
Chestnut Tom, ch. s. by Nutwood Wilkes (Algeo) 2 4 4 4
Della Derby, blk. m. by Chas. Derby (Whitehead) 4 3 3 3
Time—
First heat—:33, 1:07¼, 1:42, 2:15¼.
Second heat—:32½, 1:05, 1:39¼, 2:11¼.
Third heat—:33¼, 1:05, 1:39¾, 2:13¼.
Fourth heat—:33, 1:05, 1:39¾, 2:14¼.

Trotting Against Time.

Time—2:22.
California Dillon, ch. s by Sidney Dillon, dam Caritone by Antonio (Turner) ....won
Time—2.18¼.

WILLIAM BRADLEY BUYS BINGEN 2:06¼.

The most interesting and important piece of trotnitg news that has come out of New York City this summer was made public on Saturday last, 25th inst., when William Bradley of this city, announced his purchase, from A. H. Parker of New Bedford, Mass., of the renowned stallion Bingen 2:06¼. The price remains private, but is pretty accurately calculated to have been about $40,000. In November, 1907, Mr. Bradley purchased Todd 2:14¾, one of Bingen's greatest sons, at auction, for $30,000. Todd died very unfortunately, but six months later—May 17 last—at his owner's magnificent new Admaer Farm, Raritan, N. J. Very shortly thereafter Mr. Bradley made an offer of $30,000 for Bingen, which was refused, the price asked being, it is said, $50,000. It is believed that, in the final consummation of the purchase, the difference was split, as the saying goes, between the two sums named.

As Bingen's fame is not only national but international, as the founder of the leading early speed family of the present day, we need not enter into the details of his history other than to say that he is now 15 years of age, that he was bred by A. S. McCann and foaled the property of David Bennett, Lexington, Ky., who sold him when a yearling for $800 to E. H. Greeley, Elsworth, Me., who in turn sold him to the late J. Malcom Forbes, Ponkapoag, Mass., in 1895, when two, for $8,000. At the sale of the horses of Mr. Forbes' estate in 1904, he was purchased by Mr. Parker for $32,000 and, until last week, had been that gentleman's property. His sire is May King 2:20 son of Electioneer; his dam Young Miss, by Young Jim son of George Wilkes. He was one of the premier trotters of his day and divides the world's record for five-year-old stallions, 2:06¾, with Ralph Wilkes. As a sire his success has been the most sensational of any horse now before the public. At the beginning of the present season he was credited with thirty-six standard performers and several more have been added to his list already this year. Among his get are Admiral Dewey 2:04¾, Codero, 4, 2:09¾, Totara 2:09¾, Capt. Bacon 2:10¾, Vice Commodore 2:11, Gay Bingen, 3, 2:12½, Lord Revelstroke, 3, 2:12¾, Blue Hill, 2, 2:15¼, The Leading Lady, 2, 2:16¼ etc. etc. Wonderful early speed is the marked quality of his blood; he has already futurity winners to his own credit not only, but already his sons are siring them.

Bingen has been making the present stud season on lease at W. R. Janvier's Silver Spring farm, Ticonderoga, N. Y., and his book was announced full some time ago. He will undoubtedly be removed to Ardmaer Farm and placed at its head as soon as his contract duties at Ticonderoga permit.

MISTAKE SOMEWHERE.

In the issue of July 8th of the North Pacific Rural Spirit, the statement was made that Charles Ray of St Paul, Oregon, had secured the stallion Lord Dillon by Sidney Dillon, and would place him in the stud at that place.

On seeing this statement, James J. Summerfield, the Santa Rosa veterinarian wrote to the Rural Spirit that his stallion Lord Dillon by Sidney Dillon had not been leased but would remain in the stud at Santa Rosa.

The Rural Spirit published Dr. Summerfield's letter and added the following comment:

"The horse referred to in our squib of July 8th was purchased by Mr. Ray from J. B. Smith of Pasadena, California, therefore we are both right. Mr Summerfield has his Lord Dillion registered as The Lord Dillon 39587, and Mr. Ray has his Lord Dillon, whose registered number we do not know."—Editor Rural Spirit."

There is evidently a mistake as to the identity of the Lord Dillon that is in Oregon. It is true that Dr Summerfield's horse, which is by Sidney Dillon out of Roblet 2:12 by Robin 28370, second dam Eveline, dam of Maud Fowler 2:21¾, the dam of Sonoma Girl 2:05¼, is registered as The Lord Dillon in volume 17 of the American Trotting Register, but the horse registered as Lord Dillon 29966 is not by Sidney Dillon at all, but is an eastern bred horse by Baron Dillon, dam Agilsa by Argyle. We hope the Rural Spirit will publish the breeding of the horse which Mr. Ray has secured so the matter may be settled to the satisfaction of all concerned.

A movement is on foot to run a special train from Philadelphia to Readville for the big handicap race in August.

PAN AMERICAN STABLES.

Buffalo, N. Y.

SPOHN MEDICAL Co.

Gentlemen:—Ship me at once one dozen Spohn's Cure for Distemper, etc. Have used it since you have it on the market. It has never failed me as a cure or preventive. It is a splendid conditioner, appetizer, and worm remedy. The best is none too good for me, and so I stick to Spohn's Cure.

Yours truly,
W. L. SNOW, Trainer

NOTES AND NEWS

Oakland meeting opens next Wednesday.

Be there and see Sir John S. and Mona Wilkes in their great race.

The track is being put in good condition for fast miles.

The best racing seeu in this vicinity for years will be given at Oakland next week.

Illmo by Klatawah 2:05½, took a record of 2:14¼ in the 2:19 pace at Ottawa, Ill., last week.

Gordon Prince, Jr., was separately timed in 2:04½ when he finished third to Minor Heir in 2:01½ at Terre Haute.

The stallion Vice Commodore, 2:11, by Bingen, has been shipped to Billy Andrews, at Detroit to be prepared to reduce his record.

John R. Conway 2:07½ is the way this son of Diablo writes his name now. Geo. Meese, his owner, now wears a smile that won't come off.

Nancy Hanks 2:04, dam of Admiral Dewey 2:04¾. Lord Roberts 2:07¼, foaled a fine colt by Todd 2:14¾, at the farm of John E. Madden, Lexington. Ky., a few days ago.

If Delilah gets off just right on a fast track this summer and there is a horse in the race than can drive her out, there need not be astonishment if her mark is 2:04 when the heat is ended.

James Farley of strike breaking fame, drove his pacer, Judex 2:06¼, a mile in 2:04½ in his work at Poughkeepsie recently, and after doing so offered to match him against any sidewheeler in the country.

Fred Ward was so unfortunate as to get Emily W. distanced in the first heat of the 2:24 class trot at Santa Rosa, owing to her making a had break. She is a fast mare, however, and can trot a mile in 2:10 under favorable conditions.

Many of the great brood-mares of the past were small. Green Mountain Maid was only about fifteen hands high, Clara, the dam of Dexter 2:17¼, was fourteen hands; Minnehaha was 14¾ and Alma Mater fifteen hands high.

Charley D. looks like the highest class pacer on the circuit this year that is not entered in the free-for-all. Some of the boys think Tommy Murphy will give the McKinney horse a harder race than Solano Boy did when he tackles him at Oakland.

The contest between the 2:09 class trotters which was so keen at Santa Rosa, will be renewed all through the circuit, and the same horse will not win all the time. These trotters will furnish some mighty interesting races during the summer.

Berta Mac, with a new record of 2:11¼ made in a winning race is starting off pretty well this early in the season and it looks as if Henry Helman will repeat his last year's performance with her when he made her win over $4,000 in purses for her owner Worthington Parsons.

The Brooklyn breeder John H. Shults has a promising candidate for the Kentucky Futurity in the chestnut filly Sadie Worthy, by Axworthy 2:15½, out of Serpolita 2:25½, by Mendocino, the sire of Monte Carlo 2:07½, Frank Phillips drove her a mile in 2:17 at Poughkeepsie recently, letting her trot the last quarter in 30¾ seconds.

We are indebted to I. B. Dalziel for a number of excellent photographs of some of the leading horses that raced at Detroit, where our townsman attended the recent Grand Circuit meeting held there. Mr. Dalziel will he home soon and we expect him to give us an account of what he has seen and heard on a three mouths' trip across the continent.

Frank S. Turner, manager of the Santa Rosa Stock Farm, states that he will keep the outside and inside tracks there in shape for training after November 1st, and stall rent will be free. The Santa Rosa mile track is one of the best in California during dry weather, and the three-quarter mile track, which was built especially for winter use, has proven to be as good as any winter track on the coast.

A great sale of Shorthorn cattle will take place at Woodland, Saturday, September 12th, when the entire Enterprise Herd will be sold. There are 36 bulls in this herd, and is said to be the best bred and best individual collection ever consigned to public sale on this Coast. Those interested in well bred cattle should send to H. P. Eakle Jr., Woodland, Cal., for a catalogue. The auctioneer will be Col. Geo. P. Bellows of Maryville, Missouri. See advertisement in this issue.

The ink was hardly dry on the pages of the eastern turf papers that had heralded Jack Leyburn as the greatest trotter of the year, when along came the California bred stallion Sterling McKinney and gave him a good beating at Kalamazoo. Sterling McKinney has a full brother in California, the stallion Unimak, owned by Captain C. H. Williams of Palo Alto. Unimak made the season at Rush & Haile's farm at Suisun this year, but will be trained and raced next year and is expected to get a low record.

Charley Spencer drove a good race with Monicrat at Santa Rosa, and while he was up against two such fast ones as Easter Bells and Lady McKinney, headed the second division easily enough. When Spencer traded for this stallion last spring Monicrat was not thought to be a good racing prospect, but Spencer has him going nicely now and will surely mark him in 2:15 this year unless he has to go up against 2:10 trotters all the time. Monicrat got his first standard performer during the meeting, the two-year-old Easter that took a record of 2:27¼ in the first heat of the colt trot, being hy him.

Alta Reina 2:27, bay mare foaled 1890, that took her record as a trotter when three years old, is now the dam of two standard trotters and is eligible to registration under rule 4. She is by Atto Rex 6821, dam Jay by Jim Hawkins, second dam by Mormon Chief. At the San Bernardino meeting held July 3d and 4th this year, Alta Reina's daughter Alta Reva by Zombro trotted to a record of 2:28, and at Santa Rosa last week her son Easter by Monicrat won the first heat of the two-year-old trot in 2:27¼. Alta Reina was bred by Mr. E. B. Gifford of San Diego and is now owned, we believe hy Mr. S. B. Wright of San Bernardino.

Secretary F. W. Kelley of the Pacific Coast Trotting Horse Breeders' Association, went to Chico this week to make arrangements for the hig trotting meeting which will open there on Wednesday, August 19th and at which the Breeders' Futurity Stakes will be decided. Secretary Kelley found the new track at Chico to be all that has been claimed for it and states that the outlook for great racing during the meeting is excellent. Excursions are to be run on both the Southern Pacific and the Northern Electric lines from all points north and south of Chico in the Sacramnto Valley and large crowds are expected every day of the meeting.

Alton, the fast pacing stallion by Altamont, owned by Lou Mativia of Dixon, Cal., met with an accident two weeks ago, which will doubtless prevent him being raced this year. Alton was entered all through California and the North Pacific Circuit in the 2:20 class pacing events, and was expected to heat 2:10 in every race in which he started. It is hoped that the injury he received will not prevent his being trained next year, as he is not only very fast but one of the handsomest pacers in California. Mr. Mativia had set his heart on giving Alton a low race record, and is greatly disappointed in not being able to race him this year.

Knowing that there will he a larger stock exhibit at the State Fair this year than ever hefore, Secretary Filcher, of the State Agricultural Society, is preparing a pamphlet which will enable every visitor to Agricultural Park to ascertain the name, breed, hirthplace and owner of every horse, heifer, bull and hog on display. Secretary Filcher proposes to place a number on the stall of every animal exhibited. A list of the exhibits will be handed to every person entering the park, and it will only be necessary to turn to the number corresponding with the stall number to get the history of any animal on display. This is the first time such a catalogue has been prepared.

Last Saturday morning at Santa Rosa, Ted Hayes took his young stallion Alsandra 2:12 out for his regular work and after a couple of slow miles let the son of Bonnie Direct 2:05¼ step a fast mile. Hayes could hardly believe his own watch when the mile was ended, but the time was verified by a half dozen horsemen who had timed it carefully. Alsandra had stepped the mile in 2:09 flat with the last half of it in 1:02½, and did it so easily that he did not look to he going better than a 2:12 gait. Alsandra is a nice gaited trotter and one of the best bred young horses in California although he cannot now be registered. It is probable he will be eligible before long as his dam Alix B. 2:24½ is being used as a brood mare and her foals will be given an opportunity to secure standard records. Alsandra is Alix B's only foal, but she is now in foal to her owner's stallion The Lord Dillon by Sidney Dillon. Mare and stallion are the property of Dr. J. J. Summerfield of Santa Rosa, while Alsandra is owned by Morris Bros. of Montana. Alix B. is by Nutwood Wilkes, out of Sister to Little Albert 2:10, by Albert W., next dam Old Star by Roach's American Star, and next dam Dolly hy Black Hawk 767. The link in this chain that prevents the registration of Alsandra is that Roach's American Star, the sire of his third dam is not registered. The dam of Alix B. 2:24½ is also the dam of Joe Pinkett 2:17½, but he is a pacer. Alsandra represents the Big Four of the trotting family as he carries the blood of Geo. Wilkes, Electioneer, Nutwood and Director. We expect to see him in the 2:10 list before the season ends.

Sonoma Girl was stepped a mile and a quarter the other day in 2:40, a 2:08 gait.

P. W. Hodges has worked his stallion San Francisco by Zombro a mile iu 2:11, but has not started him yet, and the entrance money must he piling up pretty well, as he is entered in all the largest purses on the Grand Circuit.

Henry Helman, who drove Freely Red in the 2:15 pace at Santa Rosa and could get no closer than fourth at the finish, overheard the judges admonishing Joe Cuicello after the second heat of the race, and when the latter won the third heat Helman went to the stand and said: "Judges, I wish you would give me the same kind of a talk you did Joe. It improved his mare's speed wonderfully, and I am ready to try most anything to make my mare hurry along a little faster."

Easter Bells, that won the 2:19 class trot at Santa Rosa is a full sister to the pacer Sir John S. and looks to be a sure 2:08 trotter. She went to pacing this spring and was entered in the 2:20 class pace at Oakland for next week but shifted back to the trot, and is surely nicely gaited at that way of going. She is a fine looking bay mare and Mr. Vance drove her an excellent mile. His stallion El Tonopah by Billups is also out of Elisa S. 2:16, the dam of Sir John S. and Easter Bell.

The first side of the Breeder and Sportsman went to press on Thursday this week and inadvertently the advertisement of Washington McKinney which appeared last week (wherein it was stated that Mr. Kilpatrick would try to give eight of the get of his horse records at Santa Rosa) was not changed, but appears in its original form again. While it makes rather peculiar reading at this time, it is good evidence of a prophecy that has been fulfilled, as every horse named was given a standard record, as can he seen by referring to the records of the Santa Rosa meeting on Page 5.

Moortrix, winner of the three-year-old pace at Santa Rosa where he took a record of 2:14½, could have paced much faster had it been necessary. He is out of James Marshall's great hrood mare Trix dam of Mona Wilkes 2:03¼ and Aerolite 2:11¾, the three-year-old that paced a public trial in 2:05½ last year. Moortrix is by Azmoor, son of Electioneer, and is the handsomest one of the three foals of the old mare that have records. Azmoor was out of the running bred mare Mamie C. by imported Hercules, second dam by Langford, son of Williamson's Belmont, and took a trotting record of 2:30¼ as a four-year-old, which he reduced to 2:20½ later on. In Moortrix Mr. Marshall has a colt that will doubtless pace fast enough to credit Trix with three 2:10 performers by different sires.

THE OAKLAND PROGRAM.

First Day, Wednesday, August 12th.

2:20 Trot. $2,500—Lady Inez, Emily W., Wenja, Prince H., Judge Dillon, Zella Mac, Buddie G., Yosemite, Silver Hunter, Princess W., Lady McKinney, May T., Sidonis, The Angelus, Rey McGregor, Monicrat, The Statesman, Blanche T., Irene, Herbert Dillou, Bonnetti, Hunkey Dory, El Tonopah, William H., Ben Russell, Prof. Heald.

Free-for-all Pace, $1,000—Sir John S. 2:04½, Mona Wilkes 2:03¼, Moy 2:07¾.

Two-Year-Old Trot, $600—Virginia Lee, Parana, Rautstrau, Silk Hal, Leta Dillon, Prince Lock, Easter, Eddie G., Queen Alto, Ella M. R.

Second Day, Thursday, August 13th.

2:20 Pace, $2,500—Queen Derby, Boton de Oro, Explosiou, Mac O. D., Josephine, T. D. W., Madera Girl, Freely Red, Sister Bess, Silver Dick, Joe Robin, Alton, Kermit, Charley D., Albert Direda, Little Joe, Alto Jr., Easter Bells, Pilot, Tom Murphy, Salva, Highfly, Lettie D.

Three-Year-Old Trot, $900—Debutante, Guy Direct, Miss Dividend, California Boy, Nusado, Anjella, Stam Bird, Don Reginaldo, Siesta, Idolway, Hy You.

2:09 Trot, $1,000—Athasham, John Caldwell, Wild Bell, R. Ambush, North Star, Era, Fresno Girl.

Third Day, Friday, August 14th.

Consolation Purse, 2:20 Trot, $500—For all horses that start and do not win money in this class on Wednesday.

2:08 Pace, $900—Queen Pomona, Delilah, John R. Conway, Miss Idaho, Magladi, Welcome Mac, Young Hal, Moy, Diabless.

2:30 Trot $750—Princess W., Dutch, Hester, Alsandra, Wilmar, Ramona S., Wild Girl, Princess Christina.

Free-for-all Pace, Amateur Drivers, Cup—Entries to close later.

Fourth Day, Saturday, August 15th.

2:14 Trot, $900—Little Louise, Kenneth C., Queen Knight, Nogi, Yolanda, Vallejo Girl, Kinney Al. Princess W., Lady McKinney, Berta Mac., Richie Baron, Dutch, Lucretia, Della Derby, Chestnut Tom.

Consolation Purse, 2:20 Pace, $500—For all horses that start and do not win money in this class on Thursday.

2:14 Pace, $900—Ray O'Light, Grace McKinney, Rockaway, Wanderer, McFadyen, Radium, Diabull, Fearnot, Memonia, Pilot, Lodi Girl, Fred W., Boton de Oro.

Free-for-all Trot, Amateur Drivers, Cup—Entries to close later.

RACING AT KALAMAZOO.

Kalamazoo, Mich., August 3.—The defeat of Jack Leyburn by Sterling McKiuney this afternoon in the 2:09 trot was the feature of the opening day of Kalamazoo's first meetiug as a member of the Grand Trotting Circuit.

Tbe meetiug, with a combination of the Great Western and Grand Circuits, was succcssfully inaugurated, although before a rather small crowd, about 2,500 persons being present. Summary:

2:16 class, pacing, purse $1,000—Minor Heir took three straight heats. Time, 2:03, 2:06¾, 2:02¾.

2:17 pacing, purse $1,000—1sinetta took three straight heats. Time, 2:07¼, 2:09¼, 2:10½.

2:24 class, pacing, purse $1,000—Nancy Royce took the first, second and fifth heats. Time, 2:13¾, 2:13½, 2:13½. Loyal took the third and fourth heats. Time, 2:13¼, 2:17¼.

2:09 class, trottiug, American Hotel stake, purse $2,000—Sterling McKinney took second, third and fourth heats. Time, 2:06¾, 2:07¾, 2:07¾. Jack Leyburn took first hcat. Time, 2:07¾.

Kalamazoo, August 4.—The second day of Kalamazoo's first grand circuit meeting was favored with a fast track, but a stiff breeze was blowing from the southeast aud a smattering of rain in the late afternoon marred the day. The rain was not heavy enough, however, to make any material change in the going. All three events of the day were decided in straight heats. Summaries:

2:07 trot stake, $1,500:

Wilkes Heart, br. g. by Great Heart (Steele) 1 1 1
Daniel, br. g. (Andrews) 2 2 2
Watson, ch. g. (Loomis) 3 3 3
Early Alice, b. m. (Taylor) 4 4 4
Time—2:09¼, 2:09¼, 2:08¼.

2:10 pace, purse $1,000:

Major Brino, blk. g. by Wild Brino. (Rickey) 1 1 1
Charley Hal, b. g. (Snow) 2 2 4
Leslie Waterman, ch. g. (Lon McDonald) 9 9 2
Dr. Fox, b. g. (Gahagan) 4 3 5
Fred D., gr. g. (Doner) 3 5 8
William C., br. g. (Murphy) 7 6 3
Rex, blk. h. (Orendorf) 7 4 10
Robert Kernan, b. g. (Douglas) 5 7 9
Flora Directum, ch. m. (Hersy) 6 10 6
Milton S. Jr., ch. g. (Cox) 10 8 7
Lady of Honor, ch. m. (Thomas) d
Time—2:08, 2:07¼, 2:08.

2:13 trot, stake $2,000:

Dewitt, b. g. by Cecilian, dam by Lord Wilkes (Andrews) 1 1 1
Carlokin, br. h. (Durfee) 2 6 2
Teasel, ch. m. (Geers) 3 2 3
Alice Edgar, b. m. (Benyon) 5 3 5
Harry Danning, b. g. (Burns) 6 4 4
Raffles, br. g. (Burgess) 4 5 6
Busy, b. m. (Cares) d
The Aloma, ch. h. (Cox) d
Time—2:09¼, 2:09¾, 2:09¼.

Kalamazoo, August 5—The handsome mare Spanish Queen, owned by George Estabrook of Denver, tbat won the M. & M. at Detroit last week, justified the confidence of her friends to-day when she won the Burdick House purse of $10,000, the banner offering of the Kalamazoo Grand Circuit meeting. Her nearest competitor was the mare Alceste in the Geers' stable, and Alceste made the winner equal her record of 2:07¼ to win the second heat. But for the break made by Spanish Queen when she was leading down the back stretch in the first heat there would undoubtedly have been but three heats trotted.

The summaries:

2:20 class, pacing, purse $1,000:

Alcelia, b. m., by General Forest (Benyon) 1 1 1
Pender Jr., ch. h. (Geers) 2 3 2
Jerry Patchen, br. g. (Wilson) 5 2 5
Joe Gans, b. g. (Cecil) 3 5 3
Prince Onward, b. g. (Douglass) 4 4 4
Time—2:14¼, 2:11¼, 2:13.

2:16 class trot, purse $10,000:

Spanish Queeu, b. m., by Onward Silver (Macey) 9 1 1 1
Alceste, br. m., by Jay Bird (Geers) 1 2 4 5
Axtellay, b. m. (Thomas) 5 5 2 3
Prince C., br. h. (McHenry) 4 7 6 2
Time—2:10¾, 2:07¼, 2:11½, 2:12½.

Munic, Aquin, Raffles, Charles Thomas and Vendetta also started.

2:19 class, trotting, purse $1,000:

Marvelletta, b. m, by Grand Baron (Lou McDonald) 3 5 1 1 1
Cereal, b. m., by Boreal (Andrews) 4 1 2 3 2
Milbam b g. by Prince Exum (Douglas) 1 4 3 4 4
Robert L. Jr., b. g. (Steele and Geers) 2 2 4 2 3
Time—2:13¼, 2:15½, 2:13½. 2:16, 2:14¼.

Jos Astral and Redette also started.

2:14 class, pacing, purse $1,000:

Shamrock, ch. h., by Chamois (Loomis) 1 1 1
Burlington Maid, b. m. (Sunderlin) 2 2 3
Minnie M., ch. m. (Hoffman) 3 3 2
May Bird, b. m. (Cornell) 4 4 4
Time—2:14¾, 2:10¼, 2:13.

KALAMAZOO, Mich. August 6.—Hedgewood Boy paced the fastest two-heat race of the season to date at Recreation Park this afternoon. Hamburg Belle in winning the 2:11 trot in straight heats, gave the track a new record of 2:05¼ for trotters. Jerry B. won the Hotel Rickman $5000 purse for 2:13 class pacers in straight heats after a stubborn battle with the blind mare Halraven.

Rain fell nearly all the morning and automobiles were used to dry out the course.

The summaries:

2:13 pace, Hotel Rickman purse, $5000:

Jerry B., ch. g. by Argot Wilkes (Cox) 1 1 1
Halraven, b. m. (Snow) 2 2 2
The Liar, b. h. (Cares) 5 3 3
Miss Castle, br. m. (McMabon) 3 5 6
Star Direct, ch. h. (Boone) 7 4 4
Priuce A. Rundle, br. h. (Geers) 8 6 5
Phoenix, blk. h. (Durfee) 6 7 d
Bob Manager, gr. g. (Orendorf) 4 d
Miss Abdell, b. m. (Shank) d
Time—2:07¾, 2:07, 2:06¼.

2:11 trot, purse $1000.

Hamburg Bell, br. m. by Axworthy-Sallie Simons, by Simmons (Andrews) 1 1 1
Locust Jack, gr. g. (McHenry) 3 4 2
Othello, blk. g. (Fairbanks) 4 2 3
Octoo, b. g. (McLane) 2 3 4
Mechester, b. h. (Geers) d
Just the Thing, br. m. (Patton) d
Time—2:07¼, 2:09, 2:05¼.

2:17 trot, purse $1000.

Sid Axworthy, ch. g. by Axworthy (Cox) 5 5 1 1 2
Queen of Woodcliffe, b. m. (Castle and Gahagan) 1 3 4 5 1
Black Silk, blk. m. (Dean) 3 1 5 2 4
Composer, b. b. (Benyou) 2 2 2 3 3
Dand K., b. g. (Burns) 4 4 3 4 dr
Time—2:15¼, 2:12¾, 2:12½, 2:13, 2:13¼.

Pace, 2:05; purse $1500

Hedgewood Boy, ch. h. by Chitwood (Sweet) 1 1
Red Bow, b. m. (McMahon) 6 2
Judex, b. g. (Farley) 3 3
Major Mallow, b. g. (Mallow) 4 5
Dana Patch, b. m. (Hersey) 8 4
Princess Helen, b. m. (Sunderland) 5 7
R. F. D., blk. g. (Robinson) 7 6
Alice Pointed, b. m. (McDevitt) 2 d
Black Lock, blk. h. (Andrews) dis.
Reproacbless, blk. m. (Shank) dis.
Aileeu Wilson, blk. m. (Wilson) dis.
Time, 2.03¼. 2:03¾.

AT LOS ANGELES TRACK.

William Garland is working his bay gelding Romeo regularly, getting him in shape for the fall matinees. He is iu Walter Maben's barn.

Dr. William Dodge is preparing his two matinee horses by giviug them road work about town. A few days' track work before the races will get them fit.

L. J. Christopher is using one or two of his horses in delivery wagons, but with light loads and only enough for exercise so that when they get back to the track aud are hooked to a sulky or light cart they will feel like runniug away.

Dr. J. A. Edmonds, secretary of the Driving club, is busy with several teams getting the polo field in condition and putting the grounds at Agriculture Park in order. Tbe main avenue from the entrance gate to tbe grand staud is greatly improved and the proposed flower beds under the line of pepper trees in front of the stables will add greatly to the appearance of the grouuds. The track itself is always good and one or two days last week it was lightning fast.

Trainer Norton, who is in charge of W. A. Clark's yearlings, is jogging them a couple of miles a day, but is not asking them to show him any quarters or even eights.

Beulah, the speedy chestnut pacing mare in "Ted" Hays' barn, is working miles regularly round 2:17 in preparation for the Montana circuit.

J. S. Stewart has two or three very promising youngsters that he is training with the intention of starting later in the season at Chico and Fresno. Oue is Easter D., a bay pacing filly two years old, by Diablo, dam of Athadon. She has been stepping miles round 2:15 and has been a quarter in :30½ seconds. She is a little off at present as she is having trouble with her baby teeth and is irritable, and does not hesitate to show it to any one entering her stall.

A bay filly three years old, by Zombro, is another that Stewart thinks particularly well of. He drove her a mile a short time ago and she covered it so easily that be thought his watch was wrong when it showed him 2:17. Last week with a pacer alongside she negotiated the mile with apparently equal ease in 2:14 and the last quarter in 32¼ secouds. These two and probably a bay five-year-old named Drummer Boy, by Zolock, will form his campaigning stable. The latter is working miles nice and easy round 2:23 and 2:24.

SAN FRANCISCO DRIVING CLUB RACES.

South San Francisco acrie, Order of Eagles, held a picnic at Tanforan Park on Sunday last, at which the San Francisco Driving Club furnished the principal amusement by giving four races. The heats were closely contested and there was lively betting on each event. The results were as follows:

First race—Mike Donnelly won, Dynamite second, Billy Elsworth third. Best time 2:30.

Second race—Walter Wilkes won, Sidney B. second, Deroll third. Best time 2:20.

Third race—King V. won, Mabel R. second, Nico third. Best time 2:18½.

Fourth race—Kitty D. won, Little Dick second, Toppy third. Best time 2:17½.

Drink Jackson's Napa Soda.

CLOSING DAY AT DETROIT.

Detroit, July 31.—The Blue Ribbon meeting, the first of the Grand Circuit series, came to a successful close to-day. The attendance for the five days has been equal in numbers to that of any Grand Circuit meeting held here, while the horses that have taken part in the events have been up to the standard of former years. The contests have been sharp in the majority of the races and the time fast.

The California mare, Zomalta, driven by Will Durfee, who won here early in the week and installed herself as a member of the select 2:10 list, was favorite over the field at odds of 5 to 2 to win the 2:20 class trotting. She won in straight heats in much slower time than her record.

Durfee did not meet with the same success in the 2:07 class pacing with Copa de Oro, who had also been a winner for him earlier in the week and whose performance installed him as the choice for the race. After five fast and furious heats the Californian was defeated. The average time of the heats was 2:05½, almost approaching the world's record for the same number of heats paced. The finishes in all the races were close, and in each heat at least three horses passed under the wire lapped and "teamed" by their drivers for all that was in them.

The 2:13 class trotting also furnished a five-heat contest, but failed to furnish the features of the 2:07 pace. Colonel Osborne sprinted away with the first heat in 2:08¾, but was easily heaten the succeeding heats. The feature of the race was that the finish in the third and fourth heats were very close. The summaries:

2:20 trot, purse $1,000:

Zomalta, b. m. by Zombro (Durfee) 1 1 1
Loyal, b. h. (Geers) 2 5 2
Annette, blk. m. (Murphy) 4 2 3
Cereal, b. m. (Andrews) 3 3 4
Robert L. Jr., b. g. (Steele) 7 4 5
Diablo Mc., b. g. (De Ryder) 6 6 6

Redette, Brother Milroi and Jo Astral distanced.
Time—2:10¾, 2:11, 2:11¼.

2:07 pacing stake, $3,000:

Darkey Hal, blk. m., by Star Hal (Snow) 1 3 5 1 1
Copa de Oro, b. h. (Durfee) 8 2 2 2 3
Eph Cinders, ch. g. (Christ) 9 5 10 8 2
Major Mallow, b. g. (Mallow) 5 4 3 5 4
Judex, b. g. (Farley) 3 9 4 7 5

Auto, George Gano, Manager H., Rollins and Captain Derby distanced.
Time—2:04¼, 2.04¼, 2:04¼, 2:05¼. 2:09¾.

2:13 trot, purse $1,000:

Prince C., br. h., by Martyr (McHenry) 4 3 2 1 1
Teasel, ch. m. by Allan Downs (Geers) 2 2 1 3 2
Busy, b. m., by Rocco (Cares) 5 1 3 2 3
Colonel Osborn, b. h., hy Shea Alcone (Nuckals) 1 4 8 7 6
Alice Edgar, b. m. (Benyon) 3 5 4 4 5
Murray M., b. h. (Durfee) 7 6 5 6 4

The Aloma and Billnice distanced.
Time—2:08¾, 2:10¾, 2:12¼, 2:11¾, 2:11¼.

WILL RACE TO-DAY AT STADIUM.

Members of the Park Amateur Driving Club will give a program of six races at the three-quarter mile track at the stadium in Golden Gate Park this afternoon, races to start promptly at 1:30 o'clock.

The officers of the day will be: Judges, A. J. Molera, T. F. Baunou, N. Franklin. Timers, J. A. McKerron, G. Wempe. Starter, S. Christenson, Marshals, W. Lauge and H. M. Ladd.

The program of races will be as follows:

Class E, Trotters—C. F. Von 1sendorf's Ceta Dillon, G. D. Mackay's Quill, F. J. Kilpatrick's Rex McKinney

Class A, Pacers—D. E. Hoffman's Mary K., Thomas H. Browne's Victor Plate, A. Joseph's Alford D.

Class A, Trotters—A. Ottinger's Telephone, George R. Gay's Laddie G., D. E. Hoffman's Dr. Hammond.

Class B, Pacrs—Capt. W. Olsen's Zulu, H. M. Ladd's Ringrose, G. E. Erlin's Toppy.

Class B, Trotters—A. Ottinger's Lady 1rene, J. W. Smedley's Red Velvet, F. J. Kilpatrick's McKinney Belle, G. E. Erlin's Moffat D., M. W. Herzog's Lady Nell.

Class C Trotters and Pacers—D. Newel's Little Doc, A. P. Clayburgh's Charles II, F. J. Kilpatrick's Fabia McKinney, I. L. Borden's Barney Barnato.

Class D, Trotters—E. Stock's Director B., G. Wempe's Plumara.

The above races will all be mile heats, best two in three.

HORSES AT FERNDALE.

Under date of July 31st, Mr. W. B. Alford writes: "Ferndale seems to be the horse center for Humboldt county this year so far as training is concerned, as the half-mile track is one of the best in the State, and some fast time is looked for at our annual fair in September. We have at present the following stables:

Robert Noble, tbe veteran trainer, has three horses, F. Miser five, Wirt Friel one, W. B. Alford two, W. J. East five and M. Lewis five. F. Dougherty and Iran Ricks have a number of runners in training also. These horses make a good showing on workout days and the track is a lively place then. We look for the best fair ever held in Humboldt county this fall.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

NOISELESS GUNS.

The first public demonstration in the United States of a noiseless firearm was made in New York before the Board of Managers of the Society for the Prevention of Cruelty to Animals one day last month by Hiram Perry Maxim, the inventor of the weapon. Mr. Maxim leveled an ordinary .32 calibre Winchester rifle remodeled according to his invented device, and loaded with ordinary ammunition, at two city directories placed one in front of the other, clicked the trigger and drove a flat-nosed bullet six inches through the solid paper without noise enough to be heard in the next room. When the eight members of the Board of the New York S. P. C. A. assembled to witness the test they had automobiles ready and wanted to take Mr. Maxim up in Westchester somewhere. But the inventor declared that he could just as well fire the gun in the rooms of the society at Madison avenue and Tweuty-sixth street, and some of the board members were a bit fearful of police interference. After they heard a click and a smothered "bong" of the escaping powder gas, no louder than the dropping of a tenpenny nail ou the floor, they were convinced that Mr. Maxim's new rifle is what the inventor says it is. Mr. Maxim explained later that the demonstration he gave the Board of Managers of the S. P. C. A. was pursuant to the urgent request that had been made by the society that he furnish the organization with a more humane weapon for use in abattoirs and big meat packing establishments. Pending the tests that are to be made of his army rifle by the ordnance department of the United States Army, Mr. Maxim said that he had designed a noiseless rifle to be used in the butcheriug of animals. A gun which can drive a bullet into the brain of a steer with absolutely fatal results and without noise enough to frighten the other animals lined up behind iu the killing driveway will be much more efficacious, according to the statements the S. P. C. A. officers made to Mr. Maxim after his test, than the present haphazard and sometimes cruel method of slaughtering beef with a hammer. All of those who witnessed the test made in the society's rooms were unanimous in the belief that the weapon which may become the deadliest in warfare may also serve a humane purpose in a less glorious function.

The gun which was used in the demonstration before the Society for the Prevention of Cruelty to Animals board differs materially from that which the inventor has perfected for the tests before the army board. Mr. Maxim explained in an interview that he had purposely sacrificed much of the velocity of the bullet in order to insure the projectile going into the head of the slaughtered animal and no further. With a soft-nosed bullet such as was used the penetrating power of the special abattoir gun Mr. Maxim has designed is comparatively small. The army rifle which the inventor has uow perfected and which he is testing in his work shops at Hartford, Conn., preliminary to the demonstration which is to be held before army officers some time iu the next two or three months, is a very different weapon from that designed to slaughter beeves. Mr. Maxim gave a general description of the gun's construction. He said: "Because I have not yet secured my patents in Europe I cannot enter upon a further detailed description of the main features of my noiseless firearm or publish any pictures or charts of it, for that could be construed by any European government as a fair delivery of the secret of my invention. I can say this much—that my new gun will differ from the present army rifle only in the harrel. The same ammunition in clips of six shots can be used, as in the present weapon, and there need be no change either in the amount or the quality of the explosive behind the projectile. The ordnance hureau of the army has stipulated that I cannot make the army rifle any longer than the present one, and it has conceded that I may be allowed to sacrifice 10 per cent of the present velocity if I can turn out a noiseless weapon. I have rigorously adhered to the rules they lay down as to the position of the bayonet, straps, etc., and I have sacrificed no more than 10 per cent of the present velocity. I will have a noiseless gun up to every standard set at the proving grounds at Sandy Hook or Springfield when the army officers are ready for the tests." Mr. Maxim added that Germany was greatly interested in the noiseless firearm, and that he had been approached unofficially by the German government in the matter of an army contract there.

General William Crozier, chief of ordnance of the army, when interviewed in regard to the "noiseless gun," said that his bureau had had no correspondence with Hiram Percy Maxim in regard to his noiseless gun, which was demonstrated in New York. If Mr. Maxim perfects an army rifle and submits it to the War Department for trial, General Crozier added, its possibilities will be investigated. A board of army officers would be appointed to make thorough test of the new rifle and it would be subjected to trial. A noiseless gun, it was explained by army ordnance experts, will have advantages similar to those obtained by the introduction of smokeless powder. Sharpshooters will be able to secrete themselves in ambush without betraying their location by the noise of their guns. If noiseless guns were adopted by all armies of the world, it was added, war would develop into a game of hide-and-seek. For use in naval warfare the noiseless gun is of little advantage over the guns now in use.

Following the demonstration described above comes a press dispatch last week descriptive of a "powderless, noiseless gun, which discharges 100 shots a second."

Without any sound except the patter of bullets as they made holes through targets constructed of pine boards, 100 shots a second were discharged from a noiseless and powderless gun in the loft of the Standard Meter Company's factory at No. 245 Robinson street, Flatbush.

At the demonstration, which was made by the inventor of the gun, Frederick Bangerter, a mechanical engineer, were several mechanical experts, who had been specially invited to witness the test.

No one was permitted to inspect the gun, which was completely hidden by a wooden inclosure constructed around it in a corner of the loft. Not even the muzzle of the weapon could be seen. Through a hole iu the casement ran a funnel-shaped hopper into which Bangerter dumped the steeel bullets.

Before the demoustration began Bangerter explaiued that his invention does not require explosives of any kind, and that compressed air has nothing to do with the discharge of the bullets. The mechanism, he explained, is simple—so simple, in fact, that any one with a bent for machinery would understand it if once permitted to examine the gun.

Power from a 7-horsepower electric motor supplied the propelling force which discharged the bullets. This power was transmitted by a belt which ran from the fly wheel of the motor through an opening in the casement and over another wheel which was connected with the gun's mechanism.

No sound except the whirl of the wheel came from the gun inclosure when the power was turned on. Bangerter did not enter the little room housing the weapon, for once the power is turned on it is not necessary that any oue should be near the gun.

Into the bopper he poured the bullets and from the hidden muzzle of the gun came the steel bullets. There was no explosion, no smoke and no click of shells being forced empty from the magazine. The only sound that came from the gun was the dropping of the bullets into the fuunel.

For ten seconds the hullets were fed into the gun. The spectators' crouching behind a wooden partition that had been erected to protect them from rebounding shots, saw the target, which was about ten feet square and sixty feet away, riddled with holes within a second after the rain of steel began to rattle on the half-inch pine boards. The bullets were three-eighths of an inch in diameter.

Within two seconds there was a big gaping hole in the center of the target. Five feet in the rear of the first target was a second target, also constructed of half-inch pine, and behind that, five feet away, was a third. Having demolished the first obstruction the bullets tore through the second, and when the power was turned off, the third target was riddled with bullets.

The Alameda County Fish and Game Protective Association gave a barbecue last year which was such a decided success that it was decided to make it an annual event.

At the recent anuual meeting a committee consisting of George Beck, John McGlinchey, David McDonald, F. H. Donahue and C. L. Crellin was appointed to take charge of this year's barbecue. They held a meeting on Monday and decided upon Sunday, August 23d, as the date and the Cresta Blanca picnic grounds as the place.

The barbecue will begin at 11 o'clock and will be followed by after-diuner talks by a number of prominent speakers from abroad. The afternoon will be devoted to games and other diversions.

This outing is the big event of the year and sportsmen will be present from all sections of the bay district to atteud as the Association's membership roll contains the names of prominent advocates of game protection in Alameda and adjoining counties. Local sportsmen who do not now belong may have the privilege of attending by paying the annual membership fee of $1. Any one of the following collectors are authorized to receive fees and issue official receipts: E. J. Sweeney, Oakland; C. W. Riser, Centerville; Charles Helms, San Leandro; Lee Wells, Pleasanton; Earle Downing, Pleasanton; C. L. Powell, Santa Rita; H. W. Morrill, Livermore; George Beck, Livermore.

Barracuda, one of the gamiest and most delicious of edible fish are now running off Long Branch, Southern California hy the millions and the trolling for them affords the finest kind of sport for the salt water fishermen and fisherwomen who go out after them.

TRAP SHOOTING FOR THE NOVICE.

Lives there a man who at some time or other has not been filled with an almost overwhelming desire to tackle a gun and go out and shoot something, and who has never done anything of the kind?

If such a man exists he has my pity, but his boy, if he has one, can command my sympathy a thousandfold. No boy who is worth his keep is indifferent to the delights of hunting, shooting and outdoor sports in general, and if these natural inclinations are suppressed until they finaly disappear with advancing years, there is a reason and a good one, too. The father does not know how to shoot and so he is timid with firearms and cannot teach the boy.

The boy, never having been taught or even allowed to handle a gun, wastes his youth in wistful longings until the deadly years have done their work and he is, in this respect, as much of an ignoramus as his chicken-hearted progenitor, and the boy of the next generation suffers in turn.

Thus is the vicious circle formed and thus will things remain until some father breaks from the beaten path and leads his enthusiastic heir into field and marsh and fen.

But, some one will say, there is no sport going afield equipped only with a gun, and an unquestionable inability to hit anything smaller than a barn. The objection will be raised that there is not sufficent game within reasonable distance of the large centers of civilization to enable one to familiarize himself with the gun and become a good marksman. Finally, others will contend that gunning is a pastime too expensive for the man of moderate means, and that proficiency in markmanship cannot be attained by one who is limited to but one or two weeks afield of each year.

Let us silence all these town-bound grumblers in a single paragraph. Reasonable and sufficient skill as a marksman is very easily reached by the average man, and once possessed, the art is never wholly lost. During the "open seaon"—that is, during the months in which hunting may be legally enjoyed—there is ample game for the sportsman, if not for the pot hunter, within a few hours' ride of any community. Duck shooting is the sport of sports, in my own estimation, and between October 1st and the end of the year I can hag enough wild fowl to suit any right minded gunner. Aside from the initial outlay for gun and equipment, which need not be large, especially in view of the sport to be had and the benefits to health and happiness from the outdoor life which their possession means, the subsequent expense is well within the means of any one who can take a vacation at all.

And, lastly, he who would become a "good shot" in the field, though he may never claim the title of expert, can, at auy time of year, whenever he has a few hours to spare, cultivate skill and improve his aim by shooting clay pigeons from the trap—a clean cut sport with no fuss, no muss, and, alas! no feathers. Almost any farmer outside the city limits, but within easy trolley distance none the less, will, for a small consideration, allow you to set up your trap and go to work in some field not devoted to pasturage; for the trap occupies no appreciable space and the broken targets do not in any way interfere with the cultivation of the soil nor injure growing crops.

Go to your sporting goods dealer, who sells guns, ammunition, fishing tackle and the like. He will refer you in a twinkling to those of his customers who are devotees of rod and gun, and then the freemasonry of sportsmanship will do the rest.

The trap will cost $5 and a thousand clay pigeons—enough to last three or four months of moderate shooting—will he $5 more. Ten dollars gone, with the trap itself a permanent investment; while if a few friends club with you the expense will be materially lessened, although, of course, a larger supply of targets will be needed.

Now for the gun. If you have one, very good! If not, you may be able to borrow one; again, very good! Otherwise, you will buy one; better yet! How much will you pay? Not less than $25 and by no means more than $50, unless "money is no object." Then go as far as you like. As the actual value of a watch is measured by its ahility to keep time, so is the true merit of a gun dependent upon the accuracy of its shooting qualities; and I firmly believe it is impossible to manufacture more than $50 worth of a gun; beyond that the money goes for fancy work and decoration.

The best gun for general purposes, whether at the trap or in the field, will he a hammerless 12 bore with 30 inch barrels of any standard make. Certainly I have my favorite gun, and so will you, as soon as you get one to fit you and become accustomed to its use.

This gun should weigh from seven and a quarter to seven and three-quarters pounds and the right barrel should be a "cylinder," while the left is a modified "choke" hore. The "cylinder" is, as the word implies, of a uniform caliber throughout, while the "choke" bored barrel is constricted at certain points, with the result that the shot leaves the muzzle in a more compact mass and will carry further and spread less. Hence if you miss with the right barrel—pray pardon the thought—a shot from the left offers another chance before the quarry is out of range.

For a woman or a small boy a lighter gun of 16, of even 20 gauge, may be used for target practice, but the one recommended above is best for all general purposes, even for duck and geese, as well as at

the trap, and the cumbersome 10 and 8 bores are rapidly passing into disuse except by the professional pot hunter.

By the way, do you know how the "gauge" or "bore," of a gun is determined? A steel ball, eight of which weight a pound, will just fit the barrel of an 8-gauge gun, while one of which twenty weigh a pound will just fit a 20-gauge barrel, and there you are. Please pardon the digression.

Pages might be written on the "fit" of a gun, and would fill you with confusion about the length of the stock, "amount of drop" and like technicalities, but let us look at it in this way: Pick up a gun of the quality you intend to buy and see if it feels right as to weight—neither too heavy nor too light. When you find one that is satisfactory in this respect, hold it naturally by the side and then bring it quickly to the shoulder, taking rapid aim at some small object about twenty feet distant. If the gun "comes up" in this way easily and unobtrusively, as though it were almost a part of yourself, and you do not have to crane your neck or stretch your arm or crook your elbow awkwardly, it "fits," and you will never exchange it for another of far greater value which does not meet this all-important requirement.

You now have your gun, although you have not left the shop, and it immediately devolves upon you to memorize the followiug cardinal rules, for, until you have committed them permanently to your mind, you can never go shooting with me nor with any gunner of my acquaintance: 1. Don't point your gun at any one when it is loaded. 2. Don't point your gun at one one when it is not loaded. 3. Don't point your gun at any one at all. 4. Don't be a fool.

When you have succeeded in firmly implanting these wholesome principles in your brain you may purchase some ammunition. For trap shooting, and for that only, you will need, in a 12-gauge gun, shells loaded with 3 drams of smokeless powder, and one and one-eigbth ounces of No. 7½ chilled shot. Never mind about wads and the like, and do not try to load your own shells. Factory loaded paper shells are good enough for anybody and have long ago superceded brass shells and hand-loaded shells. For a smaller bore gun and for women's or boy's use, a lighter charge of powder—two and a quarter to two and three-quarter drams, with the same charge of shot wil be right. Such shells will doubtless have to be loaded to order, as these charges ar not ordinarily kept in stock. They cost about $3.00 per hundred. Hand-loaded shells come as high as $4.50 per hundred, but they are not worth it, for trap shooting at any rate, however desirable they may be in the field.

The next thing is practice, followed by practice, and concluded with practice. First of all, do not load your gun; stand in your room or in the hallway of your house, and, selecting a small object, such as a figure in the wall paper or the corner of a picture mouldiug, as a target; stand in an easy position, with your empty gun at your side, then bring it up suddenly to the shoulder and taken instant aim. If the gun "fits" this motion of the arms will be almost involuntary and the gun will seem like a part of yourself.

When you can "spot" the mark every time, select other points in various parts of the room, and still standing in your original position, try aiming quickly at different angles.

The odd moments of a week, at least, may well be devoted to this sort of thing, and it should be persisted in until you practically forget the existence of the gun, just as the man who wears glasses does not appreciate that he has them on. When this degree of proficiency has been attained suspend an apple or a potato by a long string either out of doors or within the house, and set it swinging, slowly at first and later with increasing sweep and rapidity. Stand about thirty feet from the moving target, which should hang well above the level of the head, and practice faithfully with the empty gun until you are able to spot it with reasonable accuracy "on the wing."

Now for the trap! But leave your shells at home! Clay pigeons cost half a cent each and often may be used several times, as they do not always break when they fall. Cartridges cost nearly six times as much, and, onee exploded, their day of usefulness is done. There is no particular object in shooting holes in the air until you have at least a fighting chance of hitting the mark once in a dozen shots. Practice at the pigeons for a few days just as you did at the picture moulding and the swinging potato, and, with a friend, or a sturdy boy, to load and spring the trap, try to "cover' the targets as they soar majestically skyward.

By the time you are ready to begin shooting in earnest, and such is your desire to smell powder that your patience is doubtless well nigh exhausted. Stand by the side of the trap, a little to the right, and when it is set and the puller is behind you with the lanyard in hand, load the right barrel only, hold the gun with the stock below the level of your elbow and cry "Pull!" As the target sails gracefully away raise your gun quickly, aim carefully and deliberately and fire the instant you catch the sight. To paraphrase Rip Van Winkle, "Bang goes der gun and"—in all probability—"away goes der pigeon!"

"If the aim has been true you will doubtless shoot over, because of the recoil, but the chances are far greater that you will shoot under the mark at first. The moment you have fired, "break" the gun, remove the empty shell and do not reload until ready for the next shot and the puller is out of the way.

It is not well to use more than twenty-five shells a day at first or the arm, shoulders and nerves will become exhausted and good work will be impossible. Never mind about the recoil, or "kick," of the gun. Hold the butt firmly to the shoulder and if it hurts at first it will only be a few days before it is entirely unnoticeable.

When you can break 15 out of 25 targets with reasonable certainty, begin to stand further back of the trap until you are shooting from the official 16 yards as laid down by the rules. You may never wish to shoot in tournaments, but it is just as well to master all the technical features of the game.

Now practice as frequently as may be during the spring and summer, and when the autumn winds begin to blow and the dry leaves rustle lazily on the ground and the hoar frost spangles the dun-colored grass at daybreak, you can take the boy and with every probability of success get the real thing—"but that's another story."—By J. B. Cooke in Texas Field and Sportsman.

George Neale, game warden for Sacramento county, filed his annual report with the Board of Supervisors recently. In the report he makes the recommendation that the supervisors authorize the purchase of a glass tank in which to exhibit at the State Fair the different species of fish found in the waters of the Sacramento river. He also recommends that the tank after it has served the use at the State Fair shall be placed in the Sacramento chamber of commerce so that visitors to the capitol city can get an idea of the food fishes of the river.

The game warden has been provided by the State Fish Commission with a fast launch to be used by him in patroling the Sacramento and San Joaquin rivers to prevent illegal fishing in those streams. He reports that by means of the launch he has been able to put a stop to illegal fishing, and has made nine arrests and taken several miles of nets which were being improperly placed in the stream so as to prevent the fish from going up the river.

Three dozen Hungarian partridges have been given to Sacramento county by the Fish Commission, and the game birds are now held in captivity by the game warden. He will liberate them, as they show a disposition to mate and nest. These birds are protected at all times by the State game law, and are not to be shot as game. The "Bob White" quail placed in Sacramento county three years ago by the game warden are reported to be thriving and multiplying in great numbers. Mr. Neale reports that the quail are fast spreading to all parts of the county, and will soon be in great enough numbers to be killed as a game bird.

A detailed report was made of the arrests and convictions of violators of the fish laws during the year. The fines imposed amount to several hundreds of dollars, and show that the fish and game officers have been exceedingly active in this county during the time covered by the report. It is a noticeable fact that almost all of the violators are foreigners.

The dove law appears to be creating all sorts of complications throughout the valley, says the Porterville Messenger. There are scarcely any two counties in the State having the same dove law. In some counties the open season begins as early as the 15th of July, as it does in Tulare, while in others, as in Kings county bordering Tulare, the season does not open until the 15th of August. In a number of places doves have been hunted in one county and then carried into another and this is a violation of the game law as much as if the doves were hunted in the county in which the open season was not yet in effect. A number of arrests have been made and it resolves itself into the proposition of a man eating the birds in the same county in which the law gives him this right to kill them.

Although the deer and dove season is not yet two weeks old more deer and dove have been shot than in all last season between July 15th and October 15th. Old hunters who have never missed a season in Southern California report that more deer have been seen this year than in any previous year. The northern country, about San Francisco, is not as good for deer hunters this year as it was last season, and little interest is being taken by the San Francisco nimrods. Because of the large quantity of water, which covered the lowlands about the suburbs of Los Angeles last year, the dove hunting was poor, but local hunters have more than made up for last season's discrepancy in the dove line.

The members of the Grass Valley Sportsmens' Club are to have a privilege that will be worth while and there will be a greater desire than ever on the part of many hunters and fishermen to join its ranks. The club is to have the exclusive control of Lake Vera as far as fishing is concerned, and in return they will protect the fish in the lake and will stock it further with more bass and also with crappie, a species of bass that is hardy and very game. Dr. I. W. Hays and M. L. Elliott of Nevada City went to the lake a few days ago and within a short time landed twenty-five of the finest bass either had ever caught.

Salinas and King City sportsmen have reeently found bucks numerous in Thompson's Gulch and Reliz Canyon, near King City. A number of bucks have also been secured near the "Pinnacles."

Drink Jackson's Napa Soda.

A RECORD BEAR HUNT.

In all the annals of Tehama county hunters and even in the unwritten traditions of the hills there is nothing to equal the feat of one hunter killing nine bears in as many days, and from three trees—three from each tree.

This is what Lee Green did two weeks ago out in the Tom Head country, on the South Fork Canyon of the Cottonwood.

There were three bears in two trees and four in the third and every bear but one fell at the crack of Green's rifle.

At the tree with the four bears in it the hunter thought it hard lines that every one of the varmints started down at once, so he couldn't shoot fast enough and one got away.

At it was, however, Green holds the record. He brought eleven bear scalps to Red Bluff to claim the bounty of $5 each. This was promptly allowed on the certificates of County Clerk Kuhn, so that Mr. Green took home $55 as the reward of his three-day's hunt.

He modestly spoke of his wonderful killing. Those who do not know his prowess as a hunter and might doubt his veracity need only look into his clear blue eyes to find abundant confirmation of his story, aside from the trophies themselves he brought down with him, says the Red Bluff Sentinel. He can, with his rifle, pluck the tail feathers out of an eagle soaring in the air. His trained dogs are the wonder of all the hill country. There are eight or ten of them and their tonguing resounding through the canyons is music to his ear.

"The first morning out," said Green, "when twenty miles from the Pettijohn place, the dogs had struck a trail working toward a canyon when I heard a calf piteously bleating. I thought the little animal had been caught in the brush and I hurried to investigate when I found the dogs heading for the same place. There I discovered that the calf I heard had been attacked by a bear and the trail of bruin had been followed by the dogs. The bear lost no time in seeking safety up a nearby tree. I didn't know her two cubs were up the tree with her at all until I had killed and skinned the mother bear. Then I plucked the cubs off handily.

"I thought that was enough bear for one day, so I camped nearby after the strenuous experience of the early morning, having been less than an hour in despatching the three. The next morning early I set out again and the dogs treed three more bears before sunup, like the first, all up one tree—a mother and two cubs. I got all these and again rested from the labors of the chase, having now used six shells to make the killings. I had carried only 17 shells on the hunt.

"The third morning I had my most exciting experience, with three full grown bears and one cub all up one tree. As soon as I came in view the animals scrambled to get to the ground. They stood not upon the order of their descent but just fell a-tearing. I shot as fast as I could but missed one which got away. For some unaccountable reason when the dogs, probably from the excessive scent scattered in the fight that must have taken place before the bears were forced to seek safety up the tree, refused to follow the escaped bear and in no way could I urge them on. My old reliable Snooks, a dog never failing me, unfortunately was distanced in the early stages of this hunt, so she was not in the pack at the killing or there would have been four bears from one tree instead of three. I felt tired and thought my ammunition too scant for another day and so I quit and came home. The two other bears were captured in the same locality."

Mr. Green further stated that he considers there are lots of bears remaining in the woods out there and also cougars and other varmints. He recently heard a cougar screaming and actually mistook it for the voice of a woman in distress. Mr. Green is a professional hunter and trapper in that region and the great Trinity forest reserve. He says that up about Mount Yolobolo there are lots of deep gorges and timbered canyons where the bear and cougar abound and that he has found hunting and trapping in there much more remunerative than his former pursuit of working for wages. He and his wife and three children live out there in a picturesque mountain cabin in the great timbered country on what is known as the Cold Fork of the Cottonwood.

Col. LaMotte, Superintendent of the Northwestern Railway hatchery, near Ukiah, reports that 60,000 small fry were shipped from the hatchery last week to stock Potter valley creek. The young fish are being put there as they will get the water which runs from the power house in the upper end of the valley and it is expected that they will do exceedingly well as the conditions are very favorable. There are still some 800,000 young trout in the hatchery but they will be planted as soon as possible as the hot weather is diminishing the water supply in Gibson creek and running the tanks low.

W. C. Coyne, a Redding angler, landed a rainbow weighing 7 pounds 14 ounces whilst fishing in the McCloud one day last week. Mrs. Price, a fair member of the party caught a 6 pound fish the same day.

Striped bass are very plentiful in Russian river at present from Duncans down to the mouth. They are very shy of every lure offered however.

SAN FRANCISCO FLY-CASTING CLUB.

Mr. J. B. Kenniff will represent the San Francisco Fly-Casting Club at the Chicago tournament next week under the auspices of the National Association of Scientific Anglers. The meeting will be directed by the Illinois Bait Casting Club. The prizes will be diamond trophies in each of the following events: Salmon fly, Distance fly, Accuracy fly, Dry accuracy fly, Accuracy bait, ¼ oz., Accuracy bait, ½ oz., Distance bait, ½ oz.

Mr. Kenniff goes East with the best wishes for his successful competition from a host of Coast sportsmen. That he is deserving of the enthusiastic support of the angling fraternity is proven by his splendid performances this year and in the past at Stow Lake—a specimen of his style is suggested by the scores he cast at the lake last Sunday as given below. If skill, determination and courage are factors in the race he should come out of the contest with winning colors. The scores made at the last club contests follow:

Sunday Contest No. 8. Classification Series, Stow Lake, August 2, 1908. Judges: Messrs. H. B. Sperry, Dr. W. E. Brooks and T. C. Kierulf, Referee, Mr. J. B. Kenniff, Clerk, E. O. Ritter. Weather cloudy, wind southwest.

		1	2	3 a	3 b	3 c	4

NOTE: Event 1—Distance casting, feet. Event 2—Accuracy, percentage. Event 3—Delicacy; (a) accuracy, percentage; (b) delicacy, percentage; (c) net percentage. Event 4—Lure casting percentage.

Fraction in lure, tenths; fraction in net delivery, sixtieths; fraction in all others, fifteenths.

AT THE TRAPS.

The Union Gun Club will hold a shoot at Ingleside to-morrow, the special feature, open to all, being the Du Pont trophy match, 20 targets, distance handicap, 16 to 22 yards.

Portland shooters have keept up their shooting enthusiasm steadily this season. At the shoot on July 26th Adolph Woelm won the Class C cup with a score of 39 out of 50. Abraham won the Inman medal with a score of 45 out of 50. Will Lipman has issued a challenge on behalf of a team composed of Harris Ellis, Jack Cullison and Dick Carlon, who, he says, would like to have a match with a trio composed of Charles Wagner, Frank Howe and W. W. Caldwell. The scores were: M. Abraham, shot at 100, broke 92, W. Caldwell 100-87, C. Wagner 76-62, F. E. Shangle 75-60, Frank Howe 100-80, Ed. Young 100-79, W. E. Carlon 100-75, G. McMillan 50-38, Harry Ellis 100-73, Jack Dillon 100-73, Ed. Bateman 50-36, Alolph Woelm 100-71, Billy Fecheimer 100-70, H. T. Hudson 50-34, Moore 100-61, Sternberg 100-54, W. Sbangle 20-10, Nicholsen 100-48, Ellis 25-11.

The Venice tournament started yesterday and will be concluded to-morrow, there is a good attendance of contestants. Hip Justins and Dick Reed of this city are present.

A Globe, Arizona, sportsman writes us as follows: "The Globe Gun Club's older members were given something of a surprise yesterday afternoon (July 26) when some of the new members showed up on the proving grounds and cracked down rather more than their share of the blue rocks. Here are the scores made out of a possible seventy-five: M. L. Naquin 52, P. P. Greer 49, H. R. Murphy 48, J. G. Naquin 39, Collins 49, Edgar 51, Perkins 65, Williams 66.

There was a stiff wind blowing throughout tbe shoot, and the scorcs made under the conditions were all the more remarkable."

Trap shots of Montesano, Wash., are interested in the local gun club's Du Pont trophy shoots at a total of 200 targets. The results in two shoots are as follows:

First shoot—G. L. Ide 13, Dan Hill 7, Frank Smith 16, B. F. Owsley 14, Arvid Pearson 12.

Second shoot—Frank Smith 10, Edward Rogers 7, B. F. Owsley 17, Dr. J. W. Edwards 18.

The Eureka Gun Club fifth and sixth shoots were shot July 19th. The scores were:

Reed 22 out of 25, Willett 22, Kelly 21, Noble 18, Parker 21, Janssen 21, Perrott 20, C. C. Falk 19, C. O. Falk 18, Greenhurg 12, Fernell 12, Stone 14, Hampton 12, Durnfold 17, Wilson 18, C. Smith 17, Lawdon 13.

Pitted against the cream of professional shots of America and some of the best amateur trap shots in the country, Charles H. Julian, a well known sportsman of San Diego made an enviable showing in the preliminary try-outs at the Grand Eastern handicap at Boston, Mass. Out of a total of 100 blue rocks he broke 86. This can he considered a remarkable showing under the circumstances. The wind was blowing a gale and other incidents interfered with the shooters. The best score of the day was 96 out of a possible 100. Tbree others made 88, 89 and 90, but many of the best known crack shots in the country dropped far below Mr. Julian's score. Mr. Julian, accompanied by his wife, went to Boston to attend the Master Plumbers' convention and heing there at the time, took part in tbe tourney.

Bob Bungay broke 111 out of 125 at a recent Venice Gun Club shoot, including a 50 straigbt.

California Wing Club members had a rare bunch of fast birds to stop on the 1st inst. at the Ingleside traps. A strong westerly breeze in tbe afternoon also tended to make thiugs interesting for the shooters.

The cluh medal shoot in the forenoon was the first event of the day. Nielsen Jr., Nauman, Ashlin, "One Barrel Pete" Murphy and Ed. Garrett, recently a familiar figure at the Seattle traps, all scored straight Feudner's second bird, hard hit, dropped dead out, five other guns were also in the eleven hole.

The afternoon match at 12 birds gave Haight, Walsh, Munday and E. Klevesahl the chance to get in line for straigbt scores. Nauman lost his sixth bird dead out, as also did Schultz. In this race, seven guns were in the eleven row.

Following tbe two regular events pool shoots were in order until tbe supply of birds was exhausted. Haigbt, Prather aud Garrett divided the purse in the first pool shoot. In a second six bird race Prather scored 6, Munday and Walsh 5 each. Munday won the third pool shoot with 6 straight. Munday lost but 4 birds out of 42 shot at during the day. Nauman lost 2 out of 30, Haigbt and Garrett 1 each out of 30.

Club medal shoot, 12 pigeons, distance handicap, $50 added, 4 moneys, high guns:

Dr. J. Auhurn Wiborn, the popular Bulldog fancier and Charles Breidenstein of San Francisco are back from Klamath Hot Springs where they enjoyed a fortnight's outing. Tbe fishing, at the headwaters of Shovel creek and other streams reached from the springs was excellent. The Shovel creek trout were remarkahle for their beauty of coloring. Deer and dove shooting were factors of sport the twain indulged in. The Doctor bagged a splendid six point buck with a beautiful head and antlers. The deer weighed close to 200 pounds. Breidenstein shot a fine four pointer. B., who has a well earned local reputation as a chef, took charge of the hotel kitchen on two occasions and dished up a venison stew and a dove stew tbat was partaken of by over 70 guests of the hotel, neeedless to say that the praises vouchsafed for these culinary masterpieces were numerous and enthusiastic.

C. C. McCray last week killed a 1200 pound grizzly bear that for some time past had been terrorizing the people and killing stock in the vicinity of French Gulch, Shasta county. When the slain auimal was brought in the people of that section gathered in such numbers that a stranger would have imagined a circus had come to town.

DOINGS IN DOGDOM.

The Ladies Kennel Association will hold a show in Oakland, the Oakland Kennel Club having given permission to the lady fanciers to run a two or three day show in its territory. The initial show of the L. K. A. promises to be a good one.

San Mateo Kennel Club show will come off at Tbe Crossways, Burlingame on Admission Day, September 9th. It is reported that 125 cups have already been donated for specials.

Frank F. Dole of New Haven, Conn., will judge most of the classes. This will be Mr. Dole's first appearance on the Coast, he is by no means unknown to us and we predict a hearty and enthusiastic welcome to the Bull Terrier premier.

Mrs. W. C. Ralston is down on the list for Cockers and it is pleasing to note that the selection of the popular proprietor of Delverton Kennels will receive the solid support of the Cocker fancy.

Mrs. Phil Wand will judge Dachs. Having devoted her atteution to the breed for years and being the owner of winning champions for many seasons insures ribbon awards that will meet with the approval of exhibitors. Mrs. Wand's initial entry as a judge is a matter of pleasing anticipation to our show goers.

James Sweeney of Colma, who is to judge the Greyhounds, should draw a larger entry than we have had for years. Mr. Sweeney has hred and coursed some grand dogs and is now tbe owner of a few that will win anywhere in the world, on the bench or on the turf.

Charles K. Harley will judge Fox Terriers and that means much for the classes of the breed. Mr. Harley bas tbe proud distinction of breeding a dog at his kennels, Wandee Knight, that took the measure of the best the East could put against him at a Westminster Kennel Club show.

G. S. Halliwell, a breeder of Boston Terriers, who is second to none in that breed, will pass on the toy breeds.

Entries for the Pacific Coast Derby closed August 1st.

"Billy" Ballantyne has two young Irish Terriers which he proposes to send East this fall or winter. His good bitch Belfast Colleen is heavy in whelp to his winning young dog Belfast Ignito. Competent judges of the breed claim that this dog can turn down any Irish Terrier now on the Coast. Belfast Housemaid was recently bred to Ignito, who by the way is in great demand as a stud dog. Mr. Ballantyne also has a strong predeliction for the Bulldog, his Belfast Beauty is now heavy in whelp to Jim Ewin's good one, Moston Bar None. He has a bitch puppy by Moston Monarch out of Belfast Cricket that he will match against any California hred one of her age and would not be averse to barring Eastern bred ones now here. He has bred a champion or two that won "in the thick of Eastern competitions" and should know the two breeds if anybody does. Belfast Kennels stands for quality with the Irish Terrier fancy.

Independence, on the west bank of the Willamette River, in Polk County will he the scene of Oregon's first field trial for high-class hunting dogs, September 24th and 25th. With the assistance of Joseph Hirschberger and Dr. Otis B. Butler of Independence, the newly organized club had no difficulty in getting fields and fences to negotiate, and the promoters are delighted with the prospect, for it is located in the center of the best China pheasant belt of the State.

The club has been met hy unexpected cordiality on the part of the farmers and the members feel that besides improving the breed of hunting dogs in the State, they are going to work wonders for a better understanding between the farmers and city sportsmen, and that it will ultimately work out for better game laws for Oregon.

The farmers have gauged all city sportsmen by a few who have run over their crops shot their chickens and their cows and slaughtered the game birds without rhyme or reason, and most of them do not know that such sportsmen are as much detested in the city as in the country.

Thc best sportsmen hunt fairly. They ought to meet the farmers half way and show them the same consideration they expect themselves. The members of the Oregon Field Trial Club are pledged to that, and their annual meets ought to be kind of conventions for talking over the improvements of game protection.

The State Fish Commission, it is reported, opened a branch office in Los Angeles this week in rooms 401-402 Wright-Callender building, Fourth and Hill streets. The new member of the board, Mr. Michael J. Connell, will have his office there, as will also H. I. Pritchard, Deputy Commissioner, and W. B. Morgan, county game warden. A clerk will always be in attendance to answer questions concerning game and fish, and all kinds of literature touching these hranches of sport will be on file and available to the public.

Reports from San Bernardino state the Hungarian grouse turned loose some weeks ago in several portions of the county indicate that the birds have taken kindly to their new home and are already increasing in numbers. Several of the birds have young broods hatched off and the chicks are doing finely. The experiment is a success in the estimation of the game authorities.

HOW THE M. & M. WAS TROTTED.

People went to the state fair grounds to see what had been anuounced as one of the greatest renewals of the Merchants & Manufacturers' stake race. They saw it all right. It proved to be among the best contests this or any other stake in the country has ever known. The field was the smallest, but they fought it out from the first score, to the end of the fifth heat, the palm going to Spanish Queen. Modern rules gave the money to this mare, for in the days of the survival of the fittest it is not unlikely Alceste would have won, and the word Geers would have appeared again in the column of winning drivers

The time shows what sort of a struggle it was. Trotters that were unmarked in June raced five heats, the slowest in 2:08 and the fastest iu 2:07¼, wonderfully consistent work in this particular.

Whether the race was won by the best oue in the lot is a matter of opinion. Fleming Boy was favored in the early betting on the form he had displayed at Peoria, and elsewhere, for he had a race record of 2:07½. He is a good going young stallion and mayhe Charley Dean made a mistake with him. Dean worked the horse before the race, the best mile around 2:14, but hrushed him through the last quarter in thirty seconds. At the time it was said this would not do him any good and bis race showed it, for one heat was in good form and then he grew unsteady, losing the opportunity of his life.

Spanish Queen is a trotter all the way through. An Onward Silver, she is a race mare and she raced to the end, succumbing in the last two heats only when outfooted. A mistake put her out of the reckoning in the opening mile, but she was good after that, one of the safe sort, with a lot of speed when called upon by her driver.

Alceste was a surprise. "She is a good mare," said Mr. Geers, the day he came to town. He did not expect to be a contender for first money, hut thought sbe might save her entrance. She did more than this, earning second. Alceste is oue of the old-style, racing all day long. She does her work in the last part at the call of her skillful driver. She came very fast in the final miles, and will bc a troublesome thing to beat down the big line.

These three are first-class trotters, compariug favorahly with the crop of greenies of other years. Much was expected of Vandetta, but little came- excepting disappointment. Florence B. was no account in spite of the confidence of the owners. Bonnie Way is clever for a four-year-old, a 2:10 trotter without doubt.

,Never were conditions more favorable for a big event than yesterday. The track was very fast and the air warm. The stand was crowded and the enclosure under it was filled, one of the biggest turnouts that ever welcomed the trotters in this part of the country.

When the M. & M. horses came out it was seen that the field was the smallest the event ever had known. Starter Schneider formally presented the half dozen, and there was applause for all of them, most of it being tendered Fleming Boy, Spanish Queen and Alceste, the last-named because Geers was driving her.

The scoring was a little tedious as Vandetta, Alceste, Spanish Queen and Florence C. took turns in runniug, and the starter wanted them all level when he gave the word. When they did get away, they were in good positions and Fleming Boy dug right in, trotting from fourth place into the lead and pole. Bonnie Way followed him and just as they reached the turn Spanish Queen made a bad break and dropped back.

Flemiug Boy, Bonnie Way and Alceste was the order at the quarter, and the trio went easily along the back stretch, reaching the helf in 1:05. Vandetta was then on even terms with Alceste, but dropped back on the far turn, Fleming Boy letting out a few links and trotting at a 2:00 clip to the three-quarters. Alceste went hy Bonnie Way at the head of tbe stretch, but the journey home was easy for Fleming Boy, as Geers's mare could not catch him.

Spanish Queen had come fast after she settled and just beat the flag, which fell in the face of Florence C. That mare had heen going all right until she passed the three-quarters. She broke very hadly at the head of the stretch.

This heat made the stake look easy for Dean, who had taken the pacing classic the day before, hut horse racing is uncertain. There was a hand for the trim stallion before the second mile and when the word was given, Fleming Boy held the pole, Spanish Queen being on her good hehavior and dropping in at his side. Vandetta hroke on the turn and Bonnie Way was third at the quarter.

Spanish Queen quickened her pace on the back stretch, but Fleming Boy had some to spare and was a length to the good at the half. By this time Alceste was coming and had reached third, the first three going in about the same order to the three-quarters. The quarter around the bend was ln thirty-one seconds, and Spanish Queen was at Fleming Boy's flank. Gaining as they swung into the stretch, she came up on even terms with him in a rush and they got straightened out and Fleming Boy hroke.

"He's up," yelled the crowd. Spanish Queen trotted along about her business. Fleming Boy settled quickly, and Dean came on again with hlm, but no use, for Gus Macey was looking over his shoulder when Spanish Queen won by a length in 2:07¼. her record.

Ths heat changed things a whole lot. Men who had a picture of Dean winnlng both stakes took another look, then started to hedge. Fleming Boy was just as full of trot apparently when he scored for the third heat, but those who had seen him trot the quarter at a two-twenty clip just before the race, shook their heads. He showed them the way again, this time faster, for he was at the half in 1:03. Spanish Queen had trotted into second on the back stretch and she started to close up from the half. Coming at a great rate, she made Fleming Boy trot the quarter in thirty-one seconds to keep a lead on her.

Fleming Boy was almost a length to the good when the stretch was reached, but the mare was coming at top speed. She overhauled hlm and when they were an eighth of a mile from home the stallion gave it up with a break that tossed off the possibility of winning the heat. Spanish Queen jogged home and Fleming Boy caught and came on second.

Nohody has much question at this stage, for Fleming Boy looked to be beaten. Spanish Queen seemed to have the speed at any part when Macey called on her. Fleming Boy went out in front in the fourth mile and Spanish Queen was alongside of him for a while, then dropped back a little, carrying him the half in 1:03¼.

Alceste began to show class and cut down the distance between herself and Spanlsh Queen while Fleming Boy was going easily enough out in front. When they swung into the stretch Macey called on Spanish Queen and the mare stepped up to Fleming Boy at a clip which caused him to break at the draw gate. It appeared easy enough from there, but Geers had Alceste in motion and that mare came a very fast last quarter, gaining at every stride. Macey shook up Spanish Queen and while the mare responded she could not stall off Alceste, that one winning by half a length in a well-timed drive.

How the crowd did yell, after this heat. Geers, always a favorite here, was going to win again—people didn't think of the five heat-rule. When atteution was called to the conditions all hands started to figure, and then it was patent that if Spanish Queen finished as good as second in the fifth heat, the money would go to her owner, Geers not having a chance.

It turned out that way. Fleming Boy, up to his old trick, took tbem away and was in front at the half, but he tired and dropped back without a break. Spanish Queen aud Alceste had it to themselves and while it could not improve his position, Macey drove to the end, but Geers beat him with Alceste, winning the fifth heat in the remarkable time of 2:07¾.

---o---

THE C. OF C. OF 1908.

Ten thousand cheering people saw one of the greatest and fastest pacers ever seen on the turf, win the greatest and fastest race ever seen in the historical Chamber of Commerce stake on July 28th, when that remarkable pacer Minor Heir once more demonstrated his great speed and racing class.

It was a great race and a record-hreaking one, the time 2:03, 2:01½, 2:05 and 2:04½ being the fastest ever seen in this event and the Michigan state race record for pacers. The average time 2:04¼ heing two seconds faster than the best previous record made in this event.

The big crowd came to see this race and they began to arrive early and one hour before the race was called the grand stand stand was filled, and the crowd was still pouring in. They wanted to see the starters and in the premilinary warm up hefore the race the movements of the horses were eagerly watched and their condition commented on.

Dean was early out with Minor Heir and his hlood like appearance and racy air caught the crowd at once, and a ripple of applause swept over the crowd. He is a handsome horse, probably the handsomest fast pacer which has yet appeared and there was that in his jaunty air aud rich cherry coat which made the old timers think of that old-time pacing star," The Little Red Horse," John R. Gentry. It was the first sight the most of the crowd had had of the new star and he caught their fancy, and he was indeed enough to make any trotting horse "hug" enthuse.

Not a big horse, not a little horse, but a clean-cut, well-built horse, which looked the race horse in every line and while some of the critics thought he showed just a slight indication of nodding, but when he got into action ln real earnest there were no signs of nodding, and it was probahly just a habit he has in jogging. He filled the eye of the crowd and no horse ever caught on with an audience quicker than this new western wonder.

Then came the Eel and what a receptlon the Canadians, who were out in full force, gave him. He is the idol of every horseman from across the linc, and they were loyal to him and cheered the gray stallion and his driver, Dan McEwen, with a hearty will.

He is a racy looklng gray horse, muscular and strong, and that he has a flight of speed second only to his successful rival, Minor Heir, was shown by his mile in 2:03 ln the opening heat. He wears the straps and many boots, but he can pace and pace fast, and he made no mean appearance, although not so classy looking as Minor Helr. ,

It was no bad looking field of pacers and while Minor Heir and the Eel attracted the bulk of the attention, Jerry B., Hal Raven, Snow's good looking blind mare; Mr. Geers' entry, Dr. Bonney, and the others came in for a share of the applause. Thls prellminary parade of the stalwarts increased the lnterest and when the race was called, the big audieuce was stirred with enthusiasm. Down under the stand the speculators were packed and the first tlcket sold was as follows: Minor Heir, $125; The Eel, $85; Jerry B., $25, and tbe field made up of Hal Raven, Bob Manager, Phoenix, Miss Adbell, Twis T. B. and Dr. Bonney, brought $15 Just before the race the selling was Minor Heir $100 and the field $65.

The enthusiasm ran high when the horses appeared for the work in the first heat and no big crowd ever showed more interest and excitement than this one. They hoped and expected to see a great race and tbey were not disappointed. Twis G. B. had the pole aud he led the way to the quarter in 30¼ seconds, and The Eel, who drew ninth, aud got away in fourth position, was quickly alongside and he went lapped with bim to the half in 1:01½.

Minor Heir, who drew third position, was back with the others, hut not far behind, and just before the half was reached, Dean, who was apparently getting ready for a dash for the front, began his drive. The stallion responded and be raced around the outside of tbc bunch and for the first time showed his extreme speed and the crowd 'woke up to the fact that the favorite was rapidly mowing down the distance between him and the leaders and he quickly overhauled them and then Twis G. B. dropped back and Minor Heir began his chase after the Canadian, and when The Eel went hy the three-quarters in 1:31¼ he was steadily overhauling him. The crowd cbeered and the Canadian began to look anxious. The Eel was stepping like a two minute horse McEwen was taking no cbances, and he was urging him on with right good will. Just as they rounded the last turn and began the journey to the wire ,and Minor Heir seemed certain to pass his rival, he pumped high in the air and made a long running break, and a chorus of Oh's! went up from the big audience. It was a terrible break and he took a long gallop and the field came up, passed him and the heat was at the mercy of The Eel, who won eased up in 2:03 and Minor Heir just barely beat the flag. It was a great mile, and the crowd cheered McEwen and the gray stallion to tbe echo.

Minor Heir came into his own in the second heat and he made no mistakes this time and he clearly showed, that, regardless of his defeat in the first heat, he outclassed his field. Dean set him going when the word was given and the crowd gasped with astonishment at the extreme speed he showed. He shot to the front like a flash of light going away and had tbe pole so quickly that he was at the quarter in 30 seconds, and had started down the back stretch before some of the field were straightened away. The pace was a dizzy one and the Eel made a little jump, but was soon on his stride again and attempted to go with him, but Minor Heir paced away from him on the first turn. He was pacing like a runaway horse and was away off in the lead, and reached the half in one minute flat, and The Eel and the others well hack. The Eel made another try, but the bay stallion was on his good behavior now and he romped along to the three-quarters in 1:32, and it was easy for him to the wire and he finished pulled up in 2:04¼. The Eel paced a creditable mile, but he was not equal to the task of heading this flying machine of Deans' which could have stepped a second or more faster had he been forced out.

Jerry B. raced The Eel home and the gray horse won the place in a brush to the wire. Minor Heir was never headed in tbe third heat and while The Eel attempted to go with him from the wire, the bay horse shook him off and stepped away from him handily to the quarter in 30¼ seconds, and at the half in 1:02 he was far in the lead and going easily.

The field was fairly well bunched and The Eel was drawing away from them and McEwen headed him for the leader far in front, but he went to a break near the balf, and dropped away hack and Jerry B. was the contending horse and Cox made a strong bid with the chestnut gelding, but the clip was too dizzy, and he went to a break, and Minor Heir won again with ease in 2:05. Hal Raven in the third position. Minor Hcir made short shift of the fourth heat and won about as he pleased in 2:04½, and was apparently all ready and primed to go faster had he been called on to do so. Twis G. B. and Bob Manager went with him around the first turn, but Dean simply guided Minor Heir to the quarter ln 31 seconds and he stepped down to the half like breaking sticks in 1:03.

McEwen made one try with The Eel and he stepped fast around the field and rounded the last turn and headed home almost in striking distance of Mlnor Heir, but Dean just asked him to let out another link and he did it and drew away quickly and was several lengths in the lead at the wire, and McEwen seeing his efforts were futile, gave up the fight and Dean, looking back and seeing he had the race won, let loose of his horse's head slightly and he made a little break running under the wire. The crowd cheered and as Dean walked up to the stand he smlled and raised his cap to tbe crowd. He had a right to smile as he had just won the fastest Chamber of Commerce stake ever paced and gave the grand circuit their first real sight of his latest and greatest pacing star.

THE FARM

HEALING ANIMAL WOUNDS.

Animals on the farm are continually being injured by accidents that happen in a thousand different ways. Barb wire cuts are most frequent and a word or two of advice as to the proper treatment in the hands of farmers will not be amiss. The first thing to gain a correct understanding of a sane and effective method of treating wounds is to remember that nature does the healing and that remedies applied are simply for the purpose of assisting nature. The right mental attitude in this respect will tend to eliminate a thousand and one nostrums which are tried in rapid succession in the belief that there is somewhere, if it could only be fouud, a specific remedy with magical influence to bring about the desired recovery in a marvelous way. Mankind has been diligently seeking such remedies for thousands of years and is still keeping up the search. It is time that such a view of the situation, which is based purely upon superstition, should be eliminated and that we get down to principles based upon scientific research, and instead of groping blindly in the dark seeking the "where," let us always be ready to inquire "why."

The ordinary wound will heal of itself if not interefered with. This interference may be from germ infection, parasites or too much meddling with various applications on the part of man. Now, let us suppose a case. A horse has a badly lacerated leg from contact with a barb wire. The first thing to do, of course, would be to stop the bleeding. This can be accomplished by a tight bandage of clean, white muslin, tied directly over the wound or above it. Often the bleeding artery will protrude, and a thread can be run under it with a needle and the artery tied. Do not use flour, dirt or cobwebs or anything of that sort on the wound; they are unnecessary and may produce a dangerous infection.

Having stopped the bleeding, remove the clots of blood and cut off the ragged edges of muscles with shears. A pan of antiseptic solution should be provided. One of the best and cheapest antiseptics on the farm, good for man or beast, is Creolin. Add a teaspoonful of this to a pint of water that has been boiled. Place the knife, shears, etc., in this solution, and wash the hands before beginning. After having cleaned out the wound, wash it thoroughly with the antiseptic solution. See that there is good drainage from the wound at the bottom. Do not allow it to start healing with a pocket that will hold pus. As it is practically impossible to keep a wound on a horse antiseptic, it is not advisable for the farmer to tie up the wound; leave it exposed to the air and apply the antiseptic wash several times a day. Three good antiseptics are, corrosive sublimate, which can be purchased at the drug stores in tablets all ready for use; formalin is good, as is also a solution of boracic acid. After about a week, it is well to change to dry dressing, a powder composed of equal parts of boracic acid and charcoal and iodoform makes a very good dry dressing. Clean, air slaked lime, powdered over the wound twice daily, is very satisfactory. The so-called "proud flesh" is only unhealthy granulation. It is seldom advisable for the farmer to interfere with this condition by using caustics; the results are usually disastrous. Better in this case to call in a qualified veterinarian. If maggots should get into the wound, a little turpentine or chloroform will help bring them to the surface, where they may be picked out. I did not mention sewing up the wound, for the reason that in case of the ragged barb wire cut, it is very seldom worth while to do so.

A wound to heal properly must be gotten clean and free from germs from the start and then kept clean. Remember that it is largely a matter of keeping dangerous germs out and giving nature a chance. Too much interference is often the cause of tardy healing of wounds.—George H. Glover, D. V. M., Veterinarian, Colorado Agricultural College, Fort Collins.

CASTRATING YOUNG PIGS.

Experiments carried on show that there is a great deal of difference in the effect that castration has when performed upon young pigs say two weeks old, and those that are four, six or eight weeks old. The orgaus are not at this early age well developed, the blood flow to them is not great and the tissues are in a growing state. Hence little blood is lost, the wound heals quickly and little shock or danger is attendant upon the operation. When the pigs are older, they suffer much greater shock, and do not recover from it so easily. They do not do well for eight or ten days, in fact are practically at a standstill and it takes some time to get them on the gain again. For this reason it is advisable to attend to castration when the pigs are young. It is a very needful operation, however, and one that really has to be performed even if the pigs are a little older than they should be.

In castrating pigs, particularly old ones, it is advisable to make the cut low, so that all liquids will drain out well. The skin heals more quickly than the inner tissues, and if blood or anything of that sort is left incased trouble results. The cords should always be drawn out well before being cut off, so that they will not grow again and form lumps. Good clean cuts should be made in all cases, and the wound should be thoroughly disinfected with coal tar preparations, carbolic acid solution or something of that nature. It is uot advisable to castrate on a hot day, unless a pasture with plenty of clean mud, is at hand, in which the pigs can wallow. This will tend to cool the parts, and keep flies and insects away. Speed, cleanliness and accuracy are all vital to the proper castration of pigs.

One of the best whitewashes to use in the interior of poultry houses is made of four ounces of crude carbolic acid to each three gallons of whitewash. This will destroy all lice and mites that are hiding in the house, if it comes in contact with them.

SHORT-HORN SALE

at Woodland, Cal., Saturday, Sept. 12

We will offer the entire Enterprise Herd, including the herd bulls and show cattle of last season. We do not hesitate to say that this is the best bred and best individual collection ever assigned to public sale on the Coast.

36——BULLS——36

They are the kind and type the farmers and rangemen are looking for. They are Eastern bulls thoroughly acclimated, of serviceable age, large, strong, and thrifty. This lot was personally selected by Mr. Dunlap from prominent breeders in the East, this being his eighteenth shipment. They have been fed no grain since reaching this coast, simply good pasture and alfalfa hay and will be presented in the best possible condition for future use. This is undoubtedly the best lot of range bulls ever offered on the Coast.

Sale to be held on the Enterprise Stock Farm, 4 miles south of Woodland. Busses will meet all trains at Woodland and lunch will be served on the farm. Sale to begin at 12:30 p. m. All are cordially invited to attend. Write for descriptive catalogue mentioning this paper. Catalogues ready Aug. 20th.

Auctioneer, H. P. EARLE, Jr.
G. P. Bellows, Maryville, Mo. R. M. DUNLAP.

T. B. Gibson, Woodland, Cal., will sell the preceding day, Sept. 11th. Parties wishing can attend both sales.

Sulky and Cart for Sale.

One brand new McMurray sulky and one brand new McMurray cart for sale, Never been uncrated. Best made. Can save you some money. Address,

F. W. KELLEY,
Care of Breeder and Sportsman,
P. O. Drawer 447. **San Francisco.**

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.
Address this office,
BREEDER and SPORTSMAN.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.
SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.

Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best bred and best individuals on the Coast. Write for particulars. Address,
THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.
My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alamcda avenue, San Jose, Cal.
Phone—Black 2841.

BONNIE D. by BONNIE DIRECT 2:05¼

Is offered for sale. He is a bay gelding, four years old, a square trotter, sound, good looker, gentle and city broke. Can show 2:30 gait. He is out of Electress Wilkes 2:28½, dam of Lady Mowry 2:09¾, by Nutwood Wilkes 2:16½. MRS. D. V. TRUAX,
Near Park St. Station. 1126 Park Ave., Alameda.

"HOWARD SHORTHORNS"-QUINTO HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.
WILLIAM NILES & CO., Los Angeles, Cal.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to
S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

Stallion for Sale.

Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:05½, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13½ and Pinkey H. 2:17. This colt is a beautiful dark chestnut, with a great deal of knee and hock action, and in good hands would make a show horse. Will castrate him and break to saddle if any one wants him that way. Is a very attractive and stylish fellow.
For prices and other particulars address
Dr. A. De FOE, Box 38, Pleasanton, Cal.

FOR SALE CHEAP.

Handsome bay mare, seven years old, about 16 hands high. Sound, well broken and gentle in every way. Sired by Chas. Derby, dam Allie Stokum by Richard's Elector. High-class road mare and a good prospect for a race mare. With three months' work last year, trotted a mile in 2:18, half in 1:06, driven by an amateur. I will also sell a fine set of harness and pneumatic tired buggy, good as new. To see the horse, etc., and for furtber particulars write or apply to
W. DIXON,
2310 Encinal Ave., Alameda, Cal.

PETER SAXE & SON, 911 Steiner St., San Francisco, Cal., Importers, Breeders and Dealers for past thirty years. All varieties Cattle, Horses, Sheep, Hogs. High-class breeding stock. Correspondence solicited.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct** from us, as **we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

G. S. ELLIS & SON
Harness and
Turf Goods
Manufacturers
430 MAIN STREET
CINCINNATI

N. B.—Our Illustrated Catalogue No. 42, containing cuts and descriptions of everything used on the horse (many new goods) will be mailed free to any address upon application. Write for one at once, addressing Dept. "C."

TO MAKE MONEY WITH SHEEP.

It is safe to say that if actual data were available to show the cost of sheep production, it would be found that many self-satisfied farmers would not be making a cent on their sheep; yet, if asked, they would probably have a great deal to say about the money to be made in the sheep business. The trouble is not with the sheep business; money can be made in it; but not by the farmer who rushes into it heedlessly, and uses no judgment about its management. Sheep raising must be placed upon a business basis, if money is to be made out of it, and it takes just as much acumen and sound sense to conduct it properly as it does to manage any other business.

Figures are the things that count; and without them even the shrewd man is likely to be misled. A new barn or a piece of fencing may seem very desirable; but unless it can be shown that the barn or fence can help to yield a proportionately increased income, it will not pay to build it. Many a man goes onto the reefs in the sheep business because he makes too great an outlay for buildings, fences and other accessories. It is many times the man with the least apparent equipment who makes the most net profit. He sees to it that every fence is used instead of standing idle nine-tenths of the time, and he likewise uses every inch of comfortable and sanitary barn room he has to good purpose.

Some farmers think that just because they have the necessary feed on the farm they don't need to charge the sheep up with that. It is true that sheep are the cheapest feeders upon the farm, since they utilize forage and other waste materials, yet they must be charged up with the cost of producing these, however high or low that may be. If marketable feeds are fed, these must be charged at the full market price.

Another item to be considered is the cost of labor necessary for their care. With proper management this can be reduced to a very low figure but the way barns, feeding facilities, and pastures are arranged on most farms, it amounts to a great deal.

Even when all the necessary charges are made against sheep, they can be made to do this, only when they are good sheep, and are properly managed. By good sheep, pure breeds are not meant; indeed for average farm purposes grades pay better; but by a good sheep is meant one that has a firm uniform fleece, on a good sized body, that is hardy and healthy, and can produce and grow one or two lambs yearly. The way to get such a flock is by using a good ram, and judiciously selecting from his offspring. Then with this well-selected flock, management is necessary. No man can make money in the sheep business, unless he really gives thoughtful consideration to it, and conducts it on a strictly business basis.

—o—

Other things being equal a nice even lot of wethers will thrive more satisfactorily and bring greater returns for feed than fattening flocks made up regardless of size, uniformity and condition.

The government has shipped twenty Jersey milk cows from New Orleans to the Panama canal zone. They were secured in Texas and are supposed to be immune from Texas fever. The shipment is largely an experiment, the object being to obtain a supply of fresh milk for patients in government hospitals. If it proves a success other animals will be shipped. In the past efforts to get fresh milk for the canal hospitals have been in the way of shipping fresh milk under refrigeration, but this has not been altogether successful, and for this reason the government will try keeping cows in the canal zone.

—o—

TO KEEP THE FLIES AWAY.

This is the time of year when cattle owners inquire concerning the value of fly exterminators and a proper recipe for preparing same. There are several good fly repellers on the market at the present time and it is often cheaper and more convenient to buy the prepared preparations rather than to use the home-made mixture. When made at home a preparation of four parts fish oil and one part crude carbolic acid makes a mixture which when carefully applied will keep off the flies for four or five days after each application, provided the cattle are not out in drenching rains. If a little kerosene is added to thin the preparation it can be put on with a sprayer. The advertised preparations are made by experienced people and are quite effective in repelling insects.

GOMBAULT'S
CAUSTIC BALSAM

Entrance fee five per cent and an additional five per cent from money winners. Rules of the American Trotting Association to govern, except as otherwise provided. Six to enter and four to start. All classes having six entries will be raced if there are four horses to start. Money divided 50, 25, 15 and 10 per cent. No race longer than five heats. Money divided in accordance with the summary at the end of the fifth heat. For further information and entry blanks, address

Phoenix has one of the Fastest Mile Tracks in the World.

R. A. KIRK, Secretary, Phoenix, Ariz.

The smallest sheep in the world are probably those of the Cameroon region of West Africa. A specimen sent to the national history museum was only nineteen inches high, though an adult ram. It had stout horns about one and one-half inches long, and the coat consisted of coarse hair about an inch long with no trace of wool. The general color was chestnut red, the buttocks, under parts and most of the legs being jet black.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

SPAVIN CURE

As they sometimes are — As "Save-the-Horse" can make them

Indian Head, Sask., Canada, May 28, 1908.
Troy Chemical Co., Binghamton, N. Y.:

Dear Sirs: You will find enclosed photo of my stallion Game Keeper. When I got him his right hind leg used to swell from hoof above the hock. Save-the-Horse reduced it, as you will see by photo. No matter how long he stands in stable it never enlarges. Yours truly,

JOHN LYNCH.

Thurmont, Md., June 18, 1908.
Troy Chemical Co., Binghamton, N. Y.:

Gentlemen: Some time ago I ordered of you a bottle of "Save-the-Horse" Spavin Cure. I treated a case of ringbone of long standing on a black horse I owned and cured him entirely after a veterinary had treated him unsuccessfully for six months or more. I am enclosing you check for $5 for which please send me as quickly as possible another bottle "Save-the-Horse." Send under guarantee as before. Very respectfully,

G. DWIGHT HOTT.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it.

At Druggists and Dealers or Express Paid.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using **Quinn's Ointment** for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give **Quinn's Ointment** a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequaled. **Price $1 per bottle** at all druggists or sent by mail. Send for circulars, testimonials, &c.

WINCHESTER Shotgun Shells

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

THE OAKLAND MEETING gives every indication thus far of being a complete success financially and otherwise. Two weeks ago there was great douht of its being held at all. Ben Benjamin, promoter and manager of the affair, had been taken suddenly ill with typhoid fever, and his friends were seriously considering the advisability of declaring the whole thing off. The Pacific Coast Trotting Horse Breeders' Association was appealed to and asked to give the meeting for Mr. Benjamin, but the Board of Directors could not see their way clear to assuming the responsibility. Mr. Frank J. Kilpatrick then conceived the idea of asking every owner and trainer who had a likely starter in any of the races advertised to sign an agreement to the effect that should they win they would agree to accept 80 per cent of the money due them in case the receipts should only amount to that proportion of the expenditures. The horsemen readily accepted this proposition, shipped their horses to Oakland, and advertising and hooming the meeting was resumed. Everyhody helped. The only knock the meeting got was from the weather, which was anything hut favorable. Track Superintendent Grant of the California Jockey Cluh immediately put a hig force of men with water wagons, rollers and scrapers at work on the track and hy opening day it was in pretty fair condition, a little slow of course, hut safe. A rule was made thal the free list would he suspended in all cases except to the trainers, the grooms and the press. On Wednesday, the opening day, two thousand persons went through the gates, the largest crowd that has been seen on the first day at any meeting ln years. The racing has been excellent and the time fast for the conditions. In every race so far every driver has used his utmost endeavors to win. There has been betting on the events hy the auction and mntual systems, but it has been conducted in an excellent manner with an entire absence of the touts and nrofessional gambling element. The grandstand has been occupied every day with many people from the interior of the State, and there has been genuine enthusiasm over every close finish. The meeting has been a clean one and has helped the sport of harness raciug immensely. Had Manager Benjamin kept his health we believe the meeting would have been even more successful, as during the days of uncertainty as to whether the races would be held or not, a few shipped their horses to Chico and did not return, while many persons who had planned to spend the week at Oakland, made other arrangements. The result of this meeting only emphasizes the fact that harness racing only needs concerted action and work to make it successful everywhere in this State. It is true that much credit is due Mr. Kilpatrick for suggesting the plan hy which the meeting could be held and for putting his indomitahle energy into it, but every owner and trainer who agreed to the plan and helped it along is entitled to the same credit. The four days at Oakland track this week sbould he a lesson to every person connected in any way with the industry of breeding and training and the sport of racing harness horses. It shows what can be done by united action. The San Francisco and Oakland daily press is entitled to much of the credit. They gave up much space to advertising the meeting and giving vivid and accurate accounts of the racing. Without this assistance the attendance would not have been near so great. The meeting has been a success, and every person who has helped in any way to make it such, will he willing to make the same effort again should circumstances require. Much of this work was done because it was for the benefit of Manager Ben Benjamin, who as sporting editor of the San Francisco Chronicle has won the esteem of every lover of the harness horse in California and whose efforts to revive trotting and pacing races in this locality received the immediate endorsement of every person interested in the sport. It is the universal hope and wish of the harness horse fraternity that Mr. Benjamin may soon he restored to health and he able to continue the plans he had outlined for the formation of a California circuit next year.

—o—

W. O. McGEEHAN, one of the San Francisco Chronicle's best writers on sporting topics paid the crowd at Emeryville on the opening day of the trotting meeting this week, the following neat compliment:

"The harness horse is king at Emeryville now where the runner once reigned. The crowd that attended the opening of the Alameda County Fair Association's meet yesterday was evidence of it. It was a different crowd than the dope-reading multitude, but there was more genuine enthusiasm in it than was ever displayed by any that follow the runners. There were pretty women with fresh faces from the hay cities and from the interior towns, where the horses are almost memhers of the family, and men with good, honest tan on their faces—men who know more ahout horses than they do of gamhling. Tbey were not the sort of crowd that would haunt the cigar-store pool-rooms."

—o—

The show of Clydesdales at the lately held Highland & Agricultural Society's expositiou at Aberdeen, Scotland, is characterized hy those who saw it as one of the hest made in Scotland in later years. In the class for aged stallions the unusual spectacle of a stallion and one of his sons coming first and second was presented. Baron o' Buchlyvie and Perfect Motion came one, two, their relationship heing as stated. Memento, a frequent winner of highest honors, was third. The great colt Gartly Bonus, owned hy A. & W. Montgomery, was first among the three-year-olds. He is a son of Everlasting. Two-year-olds were a hig show, the Montgomerys again coming first with Baron Hopetoun, a son of Baron's Pride. The lairds of Netherhall and Banks once more came out on top in the yearling section, their representatives on that occasion heing another son of Baron's Pride. Among the aged geldings Wm. Clark, Netherlea, was first with a five-year-old of unknown breeding. Royal Ruhy hy Baron's Pride won the Cawdor Cup for mares, with Minniewawa the runner up. Nerissa, the first prize two-year-old, by Baron's Pride and out of a mare hy Royal Favorite, was female champion of the show. Chester Princess also by Baron's Pride was the winning aged mare for Mr. Kerr and the same owner's Marilla came home in the lead among the three-year-olds.—Breeders' Gazette.

Sterling McKinney 2:06¾, before he reduced his record at Kalamazoo, was sold hy V. L. Shuler of Indianapolis, who sold him to Messrs. Pardee & Gleason of Lock Haven, Pa., for $25,000, an additional $10,000 to be paid if the horse trots in 2:03½ or better. Sterling McKinney will he in Geers stable from this on, and it is predicted the extra ten thousand will have to he paid before the season of 1908 is ended. He can trot in 2:05 now.

STARTERS IN BREEDERS FUTURITIES.

Largest Fields in History of These Colt Stakes Will Start.

From the number of three and two year olds on which starting payments were made on Monday last in the Breeders' Futurities to be decided next week at Chico, the prospects are for the largest fields that have ever started in the three-year-old events and the two-year-olds will also be well represented.

Seventeen three-year-olds had final payment made on them, twelve of them trotters and five pacers. In the three-year-old trot are Katalina, the winner of the two-year-old event of last year, Idolway that was second, Bessie T. who was third, and Debutante who was fourth and Nusado who was fifth. In addition to these four are eight others out of which may come a winner.

The three-year-old pacers paid up on are Ray O'Light 2:13½ winner of the two-year-old event last year, Conqueror 2:16 who was second to him, Moortrix who was third and has taken a mark of 2:14¼ this year, On Bly and Capt. Gorgas. These five all started in last year's two-year-old pace and finished in the order as named.

The two-year-old trotting stake has seven on which starting payment was made. Of these four have started this year. Prince Lock 2:21½ has won at Santa Rosa and Oakland. Easter 2:27¼ took a heat and second money at Santa Rosa and divided second and third money at Oakland, Ella M. R. started at Oakland and took fourth money. Virginia Lee was a starter at Oakland hut was last in the race. The three unknown quantities in the race to he trotted at Chico are Eddie G., King Kohlan and All Style.

The two-year-old pace will he a race without any forecast or form which the starters have shown in previous races. There are four to start, three colts and a filly. Easter D. the filly is by Diablo, Teddy Bear, Godolo and Jim Logan, the colts, hy Del Coronado, Zombro and Chas. Derhy respectively.

Jim Logan is out of Effie Logan, dam of Sir Albert S. 2:03¾.

The list of those on which starting payments were made in these four stakes are as follows:

Three-Year-Old Trotting Division Futurity Stake No. 5—$3,300.

Godollo, br. c. by Zomhro, dam The Silver Bell by Silver Bow; L. H. Todhunter.

Jim Logan, b. c. hy Chas. Derhy, dam Effie Logan by Durfee; J. Elmo Montgomery.

FAST RACES AT THE STADIUM.

Many of the professional trainers whose trotters and pacers bave been racing at Oakland this week, attended the matinee of the Park Amateur Driving Club at the stadium track in Golden Gate Park last Saturday afternoon and saw some of the best racing this amateur club has put up this season. The professional gentlemen were highly pleased with the sport and praised the track as one of the best they have ever seen. The racing was fast for the class in every event, several of the winners showing greater speed than ever before in their matinee races.

Of the six races, all were decided in straigbt heats but tbe one for Class A trotters, and in this the very handsome trotter, Laddie G. by Zombro, defeated the old campaigners Dr. Hammond and Telephone, after the bottest sort of a contest and lowered his record to 2:16 in the last heat, the fastest in the race. He was driven by his owner, Mr. George R. Gay, who handled his horse in a manner to draw the plaudits of the crowd. An amateur reinsman of limited experience, Mr. Gay is developing into one of the best reinsmen of the club. Telephone was his nearest contestant in the first heat, but Laddie G. outtrotted Mr. Ottinger's horse and won in 2:21.

In the second heat Dr. Hammond settled down and Mr. Hoffman made a hard drive with the son of Chas. Derby, beating Laddie G. to the wire in 2:16¾, but in the third heat Laddie showed that he was still faster and won handily, trotting the mile in 2:16. Many good judges think this horse would be a 2:10 trotter with regular training.

D. E. Hoffman won the Class A pace with his mare Mary K. by Zombro in straight heats, the time 2:15¼ and 2:14 showing that she has considerable class.

Mr. Erlin's win with Toppy in the Class B pace was quite a contest and the first heat in 2:15¾ is pretty good evidence that this pacer may yet get back to his old form when he won in 2:10 on the circuit.

The summaries:

First race, Class A, pacers:

D. E. Hoffman's Mary K. (Hoffman)	1	1
A. Joseph's Alford D. (Joseph)	2	2
T. H. Browne's Victor Platte (Browne)	3	3

Time—2:15¾, 2:14.

Second race, Class A, trotters:

G. R. Gay's Laddie G. (Gay)	1	2	1
D. E. Hoffman's Dr. Hammond (Hoffman)	3	1	2
A. Ottinger's Telephone (Ottinger)	2	3	3

Time—2:21, 2:16¾, 2:16.

Third race, Class B, pacers:

G. E. Erlin's Toppy (Erlin)	1	1
H. M. Ladd's Ringrose (Ladd)	2	2
Captain W. Olsen's Lulu (Olsen)	3	3

Time—2:15¾, 2:17½.

Fourth race, Class B, trotters:

George E. Erlin's Moffat D. (Erlin)	1	1
M. W. Herzog's Lady Nell (Herzog)	2	2
A. Ottinger's Lady Irene (Ottinger)	3	3

Time—2:21, 2:20½.

Fifth race, Class C, trotters:

A. P. Clayburgh's Charles H (Clayburgh)	1	1
C. F. von Issendorf's Cita Dillon (Von Issendorf)	2	2

Time—2:28½, 2:24½.

Sixth race, Class D, trotters:

G. Wempe's Plumada (Wempe)	2	2
E. Stock's Director B (Stock)	2	2

Time—2:48, 2:36.

LAST DAY AT KALAMAZOO.

The meeting at Kalamazoo ended on Friday with three races on the card. The 2:08 class pace was won by Darkey Hal, but the California horse Copa de Oro gave him the hardest kind of a race and won the second heat in 2:03¼, the fastest heat of the day. Summaries:

2:14 Class, trotting, purse $1,000:

Teasel, ch. m., by Allan Downes (Geers)	1	1	1
Red Cross, b. g. (Loomis)	2	3	2

PORTLAND TO HAVE A FUTURITY.

Beginning in 1910 and continuing each year thereafter the Portland Country Club and Livestock Association will give a futurity stake each year for trotters and pacers. This stake is for colts and fillies foaled in the State of Oregon and will have a value of $5,000 divided as follows: $600 for two-year-old pace in 1910, $900 for two-year-old trot in 1910; $1,600 for three-year-old pace in 1911; $2,000 for three-year-old trot in 1911.

MATINEE AT STOCKTON.

The raciug under the auspices of the San Joaquin Valley Driving Club at the track Aug. 2d brought out quite a crowd and some very exciting and close finishes kept up interest in light harness racing. The two novelty events—the four-minute drive for ladies and the mule race—furnished a lot of sport and amusement. The following are the results:

First race:

Bud L., pacer by Daedalion (J. L. Johnson)	1	1
Jordan (J. Rowen)	2	2
Black Beauty (M. Friedberger)	3	3

Time—2:42½, 2:39.

Second race:

Lady Irene, pacer by Diablo (Joe Jones)	1	3	1
Cranky Thorne pacer by Hawthorne (C. Helm)	3	1	2
Bounie W. (A. W. Cowell)	2	2	3
Prince A. (A. B. Sherwood)	4	4	dr

Time—2:17, 2:19½, 2:19.

Tbird race:

Auget Baron, trotter by Baron Wilkes (P. Chalmers)	1	1
Allan Pollock (H. Higginbotham)	2	2

Time—2:25½, 2:31.

Fourth race, running, 5-8 mile dash:

Tipwing (George Harrison)	1
Bess (F. Murphy)	2

Fifth race, Lodi special:

Alta Genoa Jr, pacer by Alta Genoa (G. Periano)	1	1
Wiggler (Bert Acker)	2	2

Time—2:22½, 2:19½.

Sixth race:

Lady Bird, trotter by Elector (H. Prole)	1	1
Belle C. (A. Capurro)	3	2
Ramus (Ed. Lavin)	2	3

Time—2:36, 2:41.

Seventh race, free-for-all, ladies' four-minute novelty race; no watches being carried by anyone riding or driving in race:

First heat:

Mrs. Knapp	[illegible]
Mrs. Wille	3:58
Mrs. J. Breidenbach (third prize)	3:55
Mrs. A. G. Shippee	4:07
Mrs. J. Grigsby	3:50

Second heat:

Mrs. Knapp (first prize)	3:52
Mrs. Wille (second prize)	3:49

Eighth race, novelty mule race:

Maud D. (Grigsby, rider)	1
Don Biggs (Murray, rider)	2
Bul Tafti (Donovan, rider)	3
Hooch (Higginbotham, rider)	4

Time—6:32.

CHICO LIBRARY GETS A BENEFIT.

The Chico Driving Club gave an afternoon of racing at tbe new track there on August 5th for the benefit of the public library of that town, at whicb there was a good attendance.

The first event for local roadsters was won by William J. O'Connor, who piloted his horse Panic to victory in straigbt heats, tbe time being 2:54 and 2:45½. Mr. I. F. Eaton with Babe and Mr. Wendell Miller with Nadine alternated in finishing second.

The second event, the novelty race, was a good feature, there being seven starters to try for the closest drive to four minutes. The event was won by Jesse Chandler, a lad 14 years of age, in the employ of L. B. Daniels at his training stables. Young Chandler drove a thoroughbred horse called Dutch John with whom he had been faithfully practicing and acquainting himself with the desired gait. The lad made a hit with the grandstand and a contribution netted him several dollars for his clever drive. The contestants finished as follows: First, Jesse Chandler in 4 minutes flat; tie for second, Ed. Service and Harry Barnard, time 3:59 and 4:01 respectively; third, W. J. O'Connor, 4:08; fourth, Mr. Gibson, 3:49½; fifth, T. H. Barnard, 3:44 1-5; sixth, Clarence McFeely, 4:10.

L. B. Daniels then started his pacer Harold B. by Kinney Lou 2:07¾ to show a fast half. The pacer covered the first eighth in 15 seconds flat, then overreached and caught his front shot, wrenching it nearly off. Mr. Daniels pulled his horse up and did not try to finish the half. There was no blacksmith at the track to fix the shoe so the exhibition was postponed to a later date.

The last race of the day was the most interesting as it was very closely contested and took four heats to decide. The entries were: The Barnard Livery Company's Gladys Moore, Henry Butters' Lulu Mac, J. J. Sangster's Directrome, and Barney Simpson's John Mack.

Lulu Mac won the first heat in 2:37½ and John Mack took the second in 2:33½.

Then Sangster's horse took the tbird heat in 2:30½ and the fourth in 2:31½.

The judges for the day's races were J. W. Zibell, B. F. True and J. H. Torrey, and the timers were G. H. Taylor, J. O. Simms and Wm. Perley.

College Maid 2:11¼ an eleven-year-old daughter of Wildbrino 10073, that took her record in Montana last year when she won a $1,000 purse for 2:25 class pacers, is to be seen in guideless stunts on the North Pacific Circuit this year. She will appear daily at the big Portland fair and is reported to show miles below 2:10.

Drink Jackson's Napa Soda.

STOCKTON AND SACRAMENTO DRIVING CLUBS.

(Union.)

Despite a high wind, carrying clouds of dust a fair crowd was in attendance at Agricultural Park, Sacramento last Sunday, when the driving clubs of Stockton and the capital city held a joint meeting. Close finisbes, and good time, considering the strong wiud, made the day one of enjoyment, in spite of all handicaps of the weather.

Kelly Briggs, Frank Wright's speedy animal, held to form in tbe match race with Cranky Thorne, owned by C. Helms of Stockton, allowing Crankie to take the first heat, and then winning the second and third heats in impressive style. Briggs performed like the old campaigner he is, and more than justified the predictions of his backers. This was the feature event of the day, and Wright was given a good reception when he drove to the judges' stand to receive the blue ribbon of the winner. The fastest time of the race was made by Cranky Thorne in the first heat, when that speedy but erratic animal did the mile in 2:13¾, the best time of the day.

One untoward event marred the otherwise smooth progress of the day. In the first heat of the fourth race, Prince A., owned by A. B. Sherwood of Stockton, stopped suddenly after passing the wire, and caused McDougal, owned by J. Petch, and driven by B. F. Long, to collide with him. Both sulkies were smashed, and Long was dragged several yards, fortunately receiving no injuries other than a few bruises. It was a most unjustifiable accident, however, and but for a good temper displayed by McDougal, which ambled along, without attempting to run away, the results might have been serious for the driver. Sherwood was not driving his own horse, and he vacated the starter's stand in favor of Frank Ruhstaller during the progress of the race.

Ray Dittus' Kruger proved the "goat" of the afternoon. He refused to start with the others, and acted bad generally, although handled well by his driver. In the last heat of the fifth race, Kruger, which was trailing the others at the start, took it into his mind to leave the track, and accordingly cantered out of the gate. Dittus drove him back into the track, and Kruger, although outdistanced all the rest of the way, showed that he possesses a world of speed, if he takes the notion to go.

Stockton horses won the second, fourth and sixth races, the other events going to the Sacramento entries. Ike Christy's Briarwood disappointed his admirers by losing to Lady Irene in the second race, the Stockton horse taking the two final heats.

A. B. Sherwood of Stockton acted as starter; D. A. Young of Stockton and Frank Ruhstaller, and A. L. Folger of Sacramento were the judges, and Frank Lieginger of Stockton, and W. C. Tuttle were in the timers' stand. Edward Paine was the track marsbal.

Results:

First race, Class E:

Flyaway (F. Silva)	3	1	2	1
Billy George (G. Vice)	4	4	1	2
Ramus (E. Lavine)	2	3	3	3
Derby Mac (Fagin)	5	2	dr	
Sterling (O. E. Wilbur)	1	dr		

Time—2:29½, 2:43½, 2:42½, 2:45.

Second race, Class A:

Lady Irene, Jones, Stockton	2	1	1
Briarwood, (Christie)	1	2	2

Time—2:20½, 2:23½, 2:26½.

Third race, special:

Kelly Briggs, (F. Wright)	2	1	1
Cranky Thorne (Helms, Stockton)	1	2	2

Time—2:13¾, 2:14½, 2:16½.

Fourth race, Class B:

Prince T. (Sherwood)	2	1	1
The Judge (J. J. Heenan)	1	2	2
Blanch T. (C. Silva)	3	3	3
McDougal (J. Petch)	5	4	dr
Cavalier (M. nos)	4	dr	

Time—2:20, 2:23¾, 2:24.

Fifth race, Class C:

Bounie W. (Cowell)	1	1
Advance (J. Petch)	2	2
Kruger (Ray Dittus)	3	3

Time—2:29, 2:20½.

Sixth race, Class D:

Cappo (Donovan)	4	1	1
Allen Pollock (Higginbotham)	1	2	4
Protection (H. C. Pike)	2	3	3
Presto (M. T. Hunt)	3	4	2

Time—2:29, 2:29, 2:30.

VALUABLE FILLY DIES.

Mr. E. A. Gammon, manager of the Bonnie Brae Farm and Warehouse at Courtland, California, has received word that his filly by Star Pointer 1:59¼ out of Cleo G. by Yosemite, was found in pasture on August 1st with a leg broken near the stifle and had to be destroyed. This filly was a yearling and a half sister to Easter Direct 2:09¼ (trial 2:03¼) and of Cleo Dillon that is entered in all the Futurity Stakes in California. Charles De Ryder, who broke and drove this filly as a weanling and also as a yearling until he went east last May reported her the fastest thing of her age he had ever handled, and believed she would be able to take the two-year-old record away from Directly 2:07¾. Her loss is a severe one for Mr. Gammon and all horsemen will sympathize with him. However Cleo G. has a Star Pointer filly now at her side and is in foal again to the old champion.

MARQUE TALKS ABOUT CALIFORNIA HORSES.

(Horse Review.)

Aside from the racing at Detroit the most important news of the week was the sale of Sterling McKinney 2:09¼. After his race on Wednesday, when his owner, the too-courteous V. L. Shuler of Indianapolis, let him jog home in 2:14 only to be beaten by the favorite, Hamburg Belle, whom he might easily have distanced, in the next heat, there were numerous gentlemen who had noted his terrific speed in the first and third heats, who expressed a desire to own the stallion. But Mr. Shuler, despite the loss of several thousand dollars on Sterling's race, insisted on naming a figure which made the average man feel a trifle outclassed. Messrs. Pardee and Gleason of Lock Haven, Pa., however, wanted the horse and finally got him at $25,000, an additional $10,000 to be paid if Sterling should trot in 2:03½ or better. Both gentlemen are personal friends and admirers of Mr. Geers and without solicitation on his part, the horse was turned over to him Thursday afternoon.

Sterling McKinney's story is that of the rejected stone. Many trainers bad a try with him and, although he is sound and, perhaps, the best-bred son of McKinney, all gave him up as a dismal failure. Shuler who has turned out a lot of good trotters, including Lockheart 2:08½, Greenleaf 2:10½, and others, purchased Sterling at an Indianapolis sale for $750, he having been consigned by Hon. Sterling R. Holt, who had bought him several years before from the Durfees, in California. Shuler gave the horse a lot of road work and managed to hang him up so that he could trot holes in the air. Charles Durfee told H. M. Gentry, when the latter bought McKinney: "Remember this, that when you get a sound McKinney and have trained it till you are ready to admit discouragement and want to give up the job, just then is when you want to begin training it in earnest. Some of them won't trot when young, but all will learn to trot fast if you stay by them long enough!" Perhaps this advice applies to the case of Sterling and perhaps, too, Shuler found the key to him after all the other trainers had looked in the wrong place.

I bave never seen a horse who seems so much like a thing of rubber as this stallion. He uses himself like an acrobat and wben hitting a fast lick seems to bound over the ground like a rubber ball. His mouth is very sensitive and last year he was given to breaking when there was no apparent cause, but he has terrific speed and can go the route. Mr. Geers jogged him with a blind bridle on Friday, and, after dismounting, said that he thought the horse would go in it better than if rigged with an open one, as Shuler always had him. Sterling can trot in 2:05 now and certainly has a chance to earn for Shuler that additional $10,000.

It is not uncommon for horse enthusiasts to throw a few fits about the fast ones and one of our pet faults is to tell of the improved appearance of this or tbat record breaker. But just the same I am going to state tbat Sweet Marie is one mare that has steadily improved in looks from the time she first came over from the Pacific Coast. When I saw her then she seemed a trifle gross and almost masculine, but when I looked at her the other day I was struck with her finished, racy appearance. She is in good form, too, as evidenced by two miles last week in 2:04½, 2:04¾. Billy Andrews told me that she was ready for an awful mile right now. Last July at Indianapolis she suffered azoturia and it left her a trifle of the balance of the season. In fact 2:05½ at Galesburg was her best 1907 mile, either in work or exhibitions. When she meets Jack Leyburn at Belmont Park, Philadelphia, in August, we may have to hang up a new race record.

George G. 2:05¼, the unbeaten trotter of 1907, is going sound again. I caught him the last quarter of a slow mile in 29½ seconds last Friday. Alta McDonald, his trainer, informed me that George had tbe same trouble last season, but it left him as it is doing now. A swelling came on the inside of his right hock and gradually worked down the leg and disappeared. George is fat as a prize porker and about as handsome as geldings ever get.

Frank Colby showed the boys a good four-year-old filly in Marie N., (3) 2:29¼, by Marengo King 2:29¼, son of McKinney, a horse that died two years ago. Marie trotted a mile in 2:14, last half in 1:04, and did it is you like to see one.

"Red" Gerrety intended giving Bon Voyage (3) 2:12¾, a time record of 2:10 or better last Friday, but as a strong wind was blowing, he concluded to wait until this week at Kalamazoo. Bon Voyage worked a mile in 2:11¼ and did a quarter of another mile in 30 seconds. He is in fine condition, but will not be raced for a few weeks yet.

The trotting stallion San Francisco, by Zombro 2:11 dam by Nutwood Wilkes 2:16½, was entered in the M. & M., but was witbdrawn the last minute. I made inquiry regarding him and was told that he had trotted three-quarters of a mile over the Detroit track in 1:34. He must be a very classy trotter. P. W. Hodges of Pleasanton, Cal., has him and I am informed will give the horse a few races over the half-mile tracks before tackling the big ring.

---o---

At the California State Fair this year, Fred H. Chase & Co., will sell on Friday, September 4th, fifty head of Poland China hogs, all high class animals. On the following day tney will sell for the estate of Thos. Waite, a line lot of Jersey cattle, Berkshire hogs and South down sheep.

JUSTO 2:10¼, SHOWS HIS QUALITY.

Justo, by Jay Bird-East Morn has given us a fore taste of the colt quality of 1908. He won a surprisingly good race at Pekin in 2:13¼ and followed this up by winning the next week at Springfield in 2:10¼. Such an exhibition of trotting speed in July is truly sensational and indicates that before the futurities in which he is engaged are on, he will have let out a few more links of speed and stand within hailing distance of the sensational records made late last season by General Watts 2:06¾ and Kentucky Todd 2:08¾. To be sure it is a short but severe route from the 2:10¼ mark to a mark three or four seconds lower. Still Justo is a rugged colt in point of fact and breeding, and may therefore be expected to train on. Moreover he is in good hands for trainer Hall is a patient man and may be relied upon to take this speedy Jay Bird colt along in a rational way. The manner in which he reeled off his first heat in 2:10¼ and then came back in 2:11¾ shows very plainly his fast heat did not strain him seriously.

It is passing strange, however, that those who contend for a continuous show of records in the pedigree cannot reconcile the breeding of Justo with their theory. Yet they are forced to forget their theory for the moment and praise this horse's breeding. They do this on the strength of the fact that the same ancestry, not higbly developed which is responsible for Justo has given us a long list of trotting horses of the highest class. Justo bas a sister, Alceste 2:09, which "came out" quite recently, and came with such a flurry she all but landed the great M. & M. prize, and she is still coming, and before the season ends is quite likely to step into a still higher class than the one in which she now moves.

Justo and his sister Alceste are by Jay Bird-East Morn; Jay Bird by George Wilkes 2:22, dam Lady Frank. East Morn by Baron Wilkes 2:18, dam Kincora. All this is good producing blood, but as for records, there are only five record horses in the fourteen near ancestors of Justo and his sister. Jay Bird, had speed, it is true, and might have taken a low mark under the process of severe development. He is given a mark of 2:31¼, but the fact that he was not trained to a lower mark is good evidence that be was not over-developed. The same may be said of Belle Patchen, the dam of Baron Wilkes. She was given a mark of 2:30¾.

So far as the official returns go it would seem that Justo is in a class by himself, having pretty much all of the rich futurities at his mercy. But we have unofficial reports from the training grounds of other three-year-olds which indicate that Justo is likely to have good company to contend with when it comes time to race for the big three-year-old events. However, what the others may do in a real race is problematical. Justo has shown his quality.—Chicago Horseman.

---o---

GOOD PURSES FOR ARIZONA FAIR.

The Arizona Territorial Fair which is to be held in November has advertised twelve purses of $1000 each and two of $2,000 each as follows:

Trotting—2:29 class $1,000; 2:24 class $1,000; 2:19 class $1,000; $2:15 class $1,000; 2:12 class $1,000; 2:09 class $1,000; free-for-all, $2,000.

Pacing—2:25 class $1,000; 2:20 class $1,000; 2:16 class $1,000; 2:12 class $1,000; 2:08 class $1,000; 2:04 class $1,000; free-for-all $2,000.

Rules of American Trotting Association to govern.

Six to enter, and four to start.

Money divided 50, 25, 15 and 10 per cent.

No race longer than five heats. Money to be divided in accordance with summary at end of the fifth heat.

A horse distancing tbe field or any part thereof will be entitled to only one money.

Entries close September 15, 1908. Horses may be entered at any time before September 15th, and any record made by horses after they have been entered will be no bar. All horses not entered until September 15th must be eligible upon tbat date.

Horses entered prior to September 15th can be declared out on that date, by written notice to the secretary, and a payment of 3 per cent.

Entrance fee 5 per cent, and an additional 5 per cent from money winners.

---o---

A RACE MEETING AT ARROYE GRANDE.

From the Recorder of Arroye Grande we learn that a racing association has been formed in that town and the following officers elected: President, T. J. Steele; vice-president, T. J. Burnett; secretary, Jake English. Directors, Harry Howard, Frank Newlove, T. J. Steele; track manager, J. E. Aspey.

A sufficient number of men have signed an agreement to pay $25 a year for a period of three years to insure the ground rent and funds will be contributed to do the necessary preliminary work. The race meet will be held immediately after the Santa Maria races, probably in October. Nearly all the horsemen who have entered horses in the Santa Maria and San Luis Obispo race meets have signified their intention of taking their animals to Arroye Grande, so that three days of amateur racing is assured.

Measures will be taken this fall looking toward holding a fair in conjunction with the meet next year, and it is likely that this will be an accomplished fact next fall.

FIRST HEAT OF THE C. OF C.

Here is the description of the first heat of the Chamber of Commerce stake at Detroit this year as taken from the American Horse Breeder one of the leading turf journals of America:

"As if shot from a gun The Eel sailed away from his field and opening up length after length, raced on to the wire, winning by ten lengths from the blind mare, the nearest horse, in sensational time, and the fact that McEwen actually eased up the gray son of Gamboleer a hundred feet from the wire made the Minor Heir enthusiasts sit up and rub their eyes in sheer amazement. Coming around the far turn Minor Heir racing in the bunch left his feet and when Dean could not catch him after he pulled him wide he ran him under the whip and barely missed the flag, which by unanimous consent of the drivers had been placed at the long distance.

The fact that Minor Heir was a well-played horse, a sensational horse, a prospective champion or a public idol should not have deterred the judges from following the strict letter of the rule, a procedure which would have sent Minor Heir to the stable. Official leniency to one horse was a gross injustice to eight others, which were entitled to a rigid and judicious application of the rules under which the entries were made.

But the judges did not apply the rule and Minor Heir stayed in. Some believed him to be off and out of the hunt. The Eel stock went up and soared two to one over the field.

As if to complete the disaster Schneider sent the heat winner away all tangled up, off his stride, and with head to one side. McEwen was obliged to let him go to a break to straighten him. By the time The Eel was flat, Minor Heir had flown far to the front and keeping far away as if on the wings of the wind he fairly spread-eagled his field. In tbe last two heats he ran away from his field out of gun-shot and when tbe last heat was over old horsemen shook their heads, at the uncertainty of horse racing as exemplified by "stand bungles."

---o---

Perry of the Horse Review says: "Among the good trotters which I have recently seen are the pair of McKinneys, which C. F. ("Farmer") Bunch brought all the way from California. They are named Alto McKinney and Zella Mac. The latter is a great deal on the Sweet Marie pattern, although hardly as handsome as that great mare. She stands all of 16¾ hands and is built in proportion all over. All she wears in the way of rigging is a pair of coronet and passing boots behind. When in action she carries her head medium. Last fall she was started about twenty-five times in Virginia, the Carolinas and Georgia, and obtained a record of 2:26¼. She is now five years old. Her dam was Minnie Alto, by Iran Alto 2:12½; grandam Princess, by Dawn 2:18¾; third dam Editb, p. 2:10, by Dexter Prince. Alto McKinney is also five, and also out of an Iran Alto mare Flirtilla, the next dam imp. Flirt, the dam of Flambeau. He has no record, but has trotter three heats in 2:20. With the improvement which all McKinneys show with age, both of these horses should be fast trotters. The other horse which Bunch brought over is Kelly's Light, a four-year-old by Searcblight, p. 2:03¼. He has been converted to the pace about a month, but can beat 2:20 now."

---o---

Breeders should understand that the best horses are always in demand, says a good authority, and that it is a waste of time and money to breed and other kind. In this respect the best stallions and mares should be used in breeding operations. The process of elimination is almost, if not quite as great a problem in breeding trotters as that of individual selection. Many a breeder permits the use of a stallion or a mare in his breeding operation when he knows that the produce is undesirable. He hesitates to eliminate one or both, as should be done. The improvement in the breed means an improved and constantly increasing demand, both local and foreign. This should be the end sought to be obtained. There is no reason why the demand for the trotter should not become constantly larger. Breeders and owners have a two-fold opportunity. First, to foster and increase the demand second, to use their best judgment to improve the breed at every step. If this is done, the greatest possible future is assured for the light harness horse.

---o---

An old and experienced horseman says: "My experience has been that no horse can be successfully driven with anything like a severe bit. I never saw one that was ever broken of the habit of pulling in that way. If you put a severe bit in the horse's mouth and pull on it, it makes the horse mad and irritates him; the further you drive him and the harder you pull him the more he will pull against it. When I was a boy, almost every trotter I saw would pull in a disagreeable manner when being driven at top speed. It is not the case now. Horses are not trained to pull on the bit, but simply to take a pleasant hold so that the driver does not have to pull his arm nearly off in working his horses, or in driving a race.

---o---

Next Monday, August 18th, the result of the work of the handicappers for the great $50,000 trot at Readville will be announced. The race will be trotted August 28th, and the biggest crowd ever seen at a trotting track is expected.

---o---

Drink Jackson's Napa Soda

NOTES AND NEWS

Good racing and good crowds at Oakland.

Don't miss to-day, the last day of the meeting.

The new 2:10 list will be longer than ever this year.

One of Minor Heir's caretakers had $35 on him in a winter book at 30 to 1.

F. N. Frary drove his horse Herbert Dillon a mile in 2:16 at Woodland last week.

Zomalta 2:08½ by Zombro, was the only horse to win two races at the Detroit meeting.

Inferlotta 2:04¾, will be left east this fall and be bred to some noted stallion in the spring.

The list of new 2:10 performers for 1908 will be the longest of any one year in trotting horse history.

Chiquita, Carey Montgomery's pacer by Diablo, went a half mile in 1:01 on the Woodland track one day last week.

Good horses bring good money. Sterling McKinney sold for $25,000 cash and $10,000 more when he trots in 2:03½.

R. Ambush's mile in 2:10 at Oakland is as good as 2:07½ at Santa Rosa. He is one of the best looking stallions ever bred in California.

The Pacific Coast Trotting Horse Breeders' Association's annual meeting will open at Chico on Wednesday next. The outlook is for the greatest meeting the association has held in years. The program is certainly an excellent one throughout.

Charlie D. is the largest money winner on the circuit so far, having won $1,000 at Oakland and $500 at Santa Rosa. He will probably keep the lead through the season.

Wild Bell, Athasham, John Caldwell and R. Ambush will make a good race of it every time they start. They have met twice now and Wild Bell and Ambush have a race apiece.

Well, Jack Leyburn defeated California's pride, Sweet Marie, but another McKinney, the stallion Sterling McKinney, showed him the way to the wire at Kalamazoo.

Hodson, the well-known photographer, has on exhibition at the Oakland track, some beautiful paintings of well-known horses. Those of The Limit and Washington McKinney are especially fine.

At the races held Sunday, August 2d, at Vallejo, a race for trotters was won by Dr. McFarland's Tom Mack, with Shouse's Abe Lincoln second, and Jackson's Donnybrook third. Time 2:24, 2:26½, 2:27.

Zoe W. 2:22½, pacing, is not only a new performer for Zombro 2:11, but is the fourth standard performer for the late Lida W. 2:18¼ by Nutwood, dam of Nutwood Wilkes 2:16½, etc.

Justo 2:10¼ is now the way to write the name of Mrs. J. C. Adams' Jay Bird colt. He won a race at Springfield, Illinois, July 28th, the two heats in 2:10¼ and 2:11¾, pretty good time for a three-year-old in August.

The McKinney blood is certainly making a wonderful showing in the 2:10 list. The old horse has three new 2:10 performers this year and his sons Zombro and Zolock have each had a new 2:10 trotter added to their lists.

There is no reason why a successful harness race meeting should not be pulled off at Oakland every year. The attendance at the Oakland track this week shows that there is much interest in the sport, and this can be greatly increased.

Prince Lock will probably be the favorite for the two-year-old trotting division of the Pacific Breeders' Futurity at Chico, for which there will be six or seven starters, but the chances are that it will be a horse race from start to finish.

Nutwood Wilkes 2:16½ has a new honor. He is the only stallion that has sired one with a record better than 2:04 that is also sire of a daughter that has produced one with a record below 2:04. He has sired Copa de Oro 2:03¼ and Trix, the dam of Mona Wilkes 2:03¼.

Mona Wilkes looks to have all the races in which she is entered this year at her mercy. She looked as fresh and pert after her two heats at Oakland, Wednesday, as though she had only been out for a little jog. Mona is sound as a bullet and one of the most cheerful, pleasant drivers ever seen on a race track.

Sweet Marie was defeated in straight heats at Philadelphia, August 11th, in her match race with Jack Leyburn. The gelding trotted the first heat in 2:05¾, two seconds faster than the record held by Cresceus over the same course. The second heat was a second better than the record, Leyburn going in 2:06½.

There has been no racing at Buffalo this week. It is intimated that the association there took advantage of the weather clause in the rules and declared the races off from day to day, although there were several days on which racing could have been held.

The stallion owned by Mr. James B. Smith of this city that was sent to Charles Ray of St. Paul, Oregon, will be called St. Dillon instead of Lord Dillon, as that name has already been claimed and registered. St. Dillon is by Sidney Dillon out of Ladywell by Electioneer, second dam Lady Lowell, dam of two in the list by Shultz's St. Clair.

P. J. Williams advertises his good stallion Monterey 2:09¼ for sale, also the fast gelding Yosemite by Monterey. Yosemite has trotted miles in 2:16½ and a half in 1:06. He is a good prospect for the green classes next year. Mr. Williams is retiring from the horse business for good and all, and will sell these horses at a bargain.

In the report of the Santa Rosa races which appeared in this journal last week, it was stated that Wild Bell heat John Caldwell two lengths in the fourth heat of the race which was troted in 2:11. This was an error. John Caldwell was only a half length behind Wild Bell at the finish of this heat, and a photograph of the finish clearly shows this.

Queen's Honor 2:17½ by Parole 2:16, that won the only trotting race pulled off at the Denver meeting in June, later showed a mile in 2:12¼, last half in 1:02½, and last quarter in 29½ seconds, but an accident which she sustained last year has again bothered her so she has been bred to The Bondsman. She was regarded about as good as her stablemate Spanish Queen 2:07¼.

Budd Doble left on Wednesday of this week for Boston, where he will arrive on Sunday next. He has been engaged by the New England Trotting Horse Breeders' Association to act as one of three horsemen who are to handicap the horses entered in the $50,000 trotting race which is to come off over the Readville track on August 28th. The handicap will be given out on Tuesday next.

Bert Morgan, a yearling colt by Bon Voyage 2:12¾ out of Silver Haw by Silver Bow 2:16, owned by Geo. Stickle of Angeles, and being trained by John Phippen at Pleasanton, just romped a quarter in 43 seconds at the trot one day last week, seeming to be playing all the time. Here is the making of a very fast colt. He was bred by S. S. Stiles, and is a half brother to the latter's Futurity candidate Helen Stiles that will probably start at Chico next week.

The American Horse Breeder aptly says: "If the founder of Palo Alto breeding establishment had not made the great mistake (?) of mating Cuba, a thoroughbred daughter of imported Australian (and from Bettie Ward, by Lexington), with the trotting stallion General Benton, there would have been no DeWitt 2:08½ to have won first money from that good field of trotters in the 2:11 class at Detroit, Mich., on the 30th ult.

Helen Stiles, the three-year-old filly by Sidney Dillon, dam Silver Haw by Silver Bow 2:16, owned by S. S. Stiles of Oakland, unfortunately developed a splint on her near front leg a few days ago, which made her quite lame. Mr. Stiles had her fired and blistered in the hopes of getting her in shape to start in the Breeders' Futurity at Chico, in which she was thought to have a good chance to get some of the money, and in which stake she is fully paid up on.

A press dispatch from Memphis, Tenn., states that "if negotiations started by E. Irwin, a Kansas City stockman, end successfully, the famous two minute track where Lou Dillon, Dan Patch and other famous harness horses created their world's records against time, will be transformed into a stockyards. A local report is to the effect that E. E. Smathers, whose struggles on the track and in the court with C. K. G. Billings for the famous Memphis gold cup ended in charges of 'doping,' is behind the move."

Nearly every turf scribe that reported the Detroit meeting said that the mare Alceste, driven by Ed. Geers, would have beat Mr. Geo. Estabrook's mare Spanish Queen in the M. & M., had the race been decided on the old three-in-five plan, but the $10,000 race at Kalamazoo last week proved that Spanish Queen was Alceste's superior at the old style of racing as she beat her handily for first money. At Detroit Spanish Queen trotted four very hard heats and won two of them while Alceste had no hard work except in the two heats she won. All the evidence of the M. & M. goes to show that Spanish Queen would have won first money even though the race had been drawn out further than it was.

THE KINNEY LOU COLTS ARE FAST.

Previous to this season there bad been only two of the get of Kinney Lou 2:07¾ trained. Diamond Mc worked a mile in 2:16 last year as a four-year-old, and the two-year-old filly Debutante went a mile in 2:26 in her only race. This year in her first race she had the hard luck, which was partly due to collision to get the flag in the first heat, which was trotted in 2:19½. Ten minutes later she worked a mile in 2:19½ As she is a very level headed filly her friends expect her to give a good account of herself in her coming engagements which include the Breeders' Futurity, the Stanford and Occident stakes. The following is a complete list of all the others of Kinney Lou's get that have received any training, 16 in all. Four of the number are the same age as Diamond Mc, viz 5 years, and were sired before Mr. Doble purchased the horse and before he had made a regular season in the stud. The rest are all 2 and 3 year olds. Harold B. pacer, owned and trained by Lawrence Daniels of Chico, has been a mile in 2:10½ and a quarter in :29½ seconds.

Barney Simpson trained for three months at Chico two mares for Col. Park Henshaw one trotter and one pacer and both could step in 2:25. Both these mares were very fat when Barney got them and had never had any work consequently they were only lightly trained and turned out July 20th until after the hot weather is over. Mr. Simpson, than whom there is no beter judge of young prospects believes the trotter to be the making of a high class performer. Kinuey G., pacer, owned by Charley Gill of San Jose has been a mile in 2:20 over a half-mile track. George Therekauf of San Jose has a three-year-old gelding that he has trained himself and has worked in 2:28 on a half-mile track. Chadbourne & Sutherland trained for three months a three-year-old colt owned by H. W. Meek of San Lorenzo and stepped a mile in 2:27 over the Pleasanton track.

J. W. Zibbell worked a three-year-old colt owned by John Offutt of Petaluma three months last spring and he showed a mile in 2:30. F. W. Kimble of McKittrick, Cal., owns a two-year-old filly that he sent to Schuyler Walton at Fresno last December. She was then so poor from a severe case of distemper that she could hardly stand alone. June 15th she was turned out for the summer but Mr. Walton had worked her a quarter in :35¾, eights in :17. All the boys at Pleasanton last February saw Dick Ables drive the two-year-old out of the dam of Lady Mowry a half in 1:14¾ with scarcely any work and considered him the greatest young trotting prospect they had ever seen. Scarcely less phenomenal was the black two-year-old filly owned by P. W. Bellingall that could brush a 2:20 gait with her first set of shoes on. J. C. Herbert of Denver owns a three-year-old colt which he purchased from Martin Carter a year ago. His dam is Queen C. 2:28½ by Nutwood Wilkes 2:16½. He is only being lightly worked but Mr. Herbert writes that it will be an easy matter to give him a standard record at their State Fair next month. The other six are in Budd Doble's stable at Santa Clara and at present are being worked over the Brace half-mile track. They are four three-year-olds and two two-year-olds and although they have only had track work since July 1st they are all showing speed enough to step to a standard record most any time.

In all there are eighteen of Kinney Lou's colts that have had some training. Fifteen trotters and three pacers, and each and every one has shown speed. Every one of the bunch could be given standard records this year, and only two were worked before this season.

Only one has been trained with the view of racing this year and she will probably be the only one to face the starter. That is the filly Debutante.

RACES AT LOS ANGELES.

Two match races, which resulted in a third, came off at Agricultural Park, Los Angeles, last Saturday. All were at half-mile heats. The first was between Honest John, Rex and Bud B. In the first heat Honest John won easily, with Rex second and Bud B. third. Bud B. did not appear for the second heat, which Rex took six seconds faster than the first. This discouraged Honest John's owner, and he conceded the race to Rex without the formality of a third heat.

In the second race, Near Girl won both heats with ease, Gray Bess beating Esquimo for second place. This started an argument between the owners of the two horses, which resulted in a half-mile dash for $60 in which Esquimo turned the tables on the mare and beat her handily by two lengths. Summaries:

Half-mile pace:

J. McClelland, Honest John (McClelland)	1	2
H. Martin, Rex (O. Moore)	2	1
L. Berker, Bud B. (Berker)	3	dr

Time—1:16; 1:10½.

Half-mile, pacing:

Near Girl (Moore, owner)	1	1
Grey Bess (Wint, owner)	2	3
Bud B. (Berker, owner)	4	2
Esquimo (Asten)	3	4

Time—1:16, 1:16.

Half-mile dash, pacing:

Esquimo (Moore)	1
Grey Bess (Wint)	2

GOOD CROWDS AT OAKLAND.

Meeting Which Ends To-day Will be a Successful One in Every Way.

The harness meeting planned and exteusively advertised by Ben Benjamin of this city to take place this week at the Oakland track, which came very near being declared off on account of the sudden and serious illness of its promoter, bids fair to be one of the most successful ever held in California. After the Pacific Coast Trotting Horse Breeders' Association had turned down a proposal that it represent Mr. Benjamin in the conduct of the meeting, Mr. F. J. Kilpatrick offered to take the management and put the program through, provided the horsemen who had made entries in the races programmed would assist him. They responded unanimously, and the racing, the attendance and the enthusiasm shown during the week, are proofs positive that harness racing is popular in this section and only needs enthusiastic boosting to make it successful here as it is elsewhere. The attendance on the opening day was the best in years, and while the weather has been anything but favorable there bave been good crowds every day of the meeting thus far.

While the time made may seem slow, the racing has heen good throughout the week. Superintendent Grant has done excellent work in making the track safe and none of the horses racing have been injured or made sore by the footing. The track was built especially for winter running races, consequently is very difficult to put in shape for harness horses, but Superintendent Grant has done well and given the horsemen a safe if not a fast track.

First Day.

When the horses were called for the first race, five good two-year-olds came on the track. Prince Locke, a tall chestnut son of Zolock, driven hy his owner G. A. Pounder of Los Angeles was favorite, Easter, bay colt by Monicrat, and winner of a heat at Santa Rosa was second choice. He was driven by Homer Rutherford. H. S. Hogoboom was up behind Queen Alto by Iran Alta 2:12¼, J. Twohig had the mount behind Ella M. R. owned by Martin Carter and sired by his horse Lord Alwin, a full brother to the famous John A. McKerron 2:04½, and C. B. ("Det") Bigelow drove Virginia Lee, a pretty bay filly by Iran Alto, owned by T. B. Gibson of Woodland. This race was over in two heats and does not require much description. Prince Lock drew the pole and Easter was next to him. At the word the two trotted out in front as if they had the race to themselves but when the back stretch was reached Hogohoom gave Queen Alto her head and she increased her speed so that she sailed by hoth leaders and rounding the far turn was two or three lengths in the lead of everything. It looks for a minute as if the field was the hest horse, but on entering the stretch Queen Alto slowed up a little, as was natural for a two-year-old short of work, and Prince Lock was soon alongside making a fight for first place. Pounder drove his colt for all that was in him and Hogohoom did the same with the filly. The latter broke about 150 yards from the wire and Prince Lock won in 2:21½, very fast time for a two-year-old on such a track. Easter was third.

In the second heat Hogoboom contrary to his own ideas, but acting on the advice of others, concluded to wait with his filly until well into the stretch before making his drive. His own plan was to get out in front and stay there as long as he could. The advice he got did not help him any and he saw Rutherford beat him for second place in the heat, and the two divided second and third money.

The 2:20 class trot had a field of eight starters. Mr. F. J. Kilpatrick's mare Lady McKinney by Washington McKinney driven by Dick Ables, was made favorite at $20. Emily W. a daughter of James Madison driven hy Fred Ward brought $11, the Nutwood Wilkes mare Lady Inez driven by Joe Cuicello brought $10, while the other five Wenja by Zolock, driven by G. A. Pounder, May T. by Monterey piloted by her owner James Twohig. Monicrat by Monwood driven by Charles Spencer. The Statesman by James Madison driven by William Ivey, and Judge Dillon by Sidney Dillon driven hy Whitehead, were all put into a field and brought $7.

May T. had drawn the pole and Starter Stevens soon saw that he had a very hard field to get away on even terms. After considerable scoring he sent them back to the barn before getting a start and let the two-year-olds whose time was up come out and finish their race.

When the 2:20 horses came out again they acted a little better and soon they were sent away to a rather straggling start. The Statesman and Lady Inez went to the front, with the former in the lead and at the half were in that position, but here Ward got his mare out of the huuch and set sail for the heat which he won handily from The Statesman with Lady Inez third. Wenja fourth and Lady McKinney fifth. The time was 2.17¾, slow even for the track.

It was seen that Lady McKinney had none of her speed and Ward's mare was made favorite justifying the confidence placed in her by winnlng the next heat and the fourth, after losing the third hy reason of getting in a pocket and making a break. That heat was won by Mr. Pounder with Wenja ln 2:18½. The second heat went to Emily W. ln 2:15½ which was a falr mile under the conditlons, but this race should have had three heats ln better than 2:15 had the horses been up to the form they showed at Santa Rosa.

Charles Spencer made a good showing with Monicrat, and finished in third position twice, hut was outside the money at that. According to the conditions of the race all horses not standing to win money at the end of the third heat were sent to the stahle, leaving but four to start ln the fourth heat.

When the race was over Emily W. had won first money, Weuja second, Lady Inez third, and The Statesman fourth.

The free-tor-all pace, in which the two great pacers Mona Wilkes 2:03¼ and Sir John S. 2:04½ were to meet proved a great disappointment. The mare was fit to race for the proverbial ransom of a king, but Sir John was entirely off and in the first score down sbowed that he did not waut to race. He spoiled several starts by breaking, a new thing for him, and finally hegan bolting for the outside fence. As he had drawn the pole, this became a dangerous performance and but for the coolness of Chadbourne when Sir John swerved against his mare, a serious collision might have resulted. At the request of Starter Stevens however, Mr. Vancc gave up the inside position in scoring and tbey were sent away at rather a slow speed head and head. The mare shot to the front and when Vance called on Sir John the horse made a bolt for the outside of the track and when he was straightened out Mona Wilkes was a hundred yards in front. It was only a jog for the mare to pace the mile in 2:12½ and while Sir John was inside the flag it was on sufferance. It was seen that a great contest would not be seen between the two horses that day, but many thought the second heat would result in a better showing. Sir John acted some better, but did not have any of that marvelous burst of speed that made him the undisputed champion of coast racing last year and when they were seut away the little mare took the lead from him so easy tbat she went the whole mile with her ears pricked, and finished lengths in front of him in 2:07½ pulled up. The stallion bolted as he finished his mile and looked and acted like a horse that was entirely out of condition. There were many cheers for the mare and much sympathy for Mr. Vance, who is as gentlemanly a driver as ever pulled line over a horse. The grief of Mr. Vance's little six-year-old daughter, whose love for Sir John amounts almost to worship, was truly pathetic and when her father took her in his big strong arms to comfort her, the scene was one to cause eyes to moisten that are seldom in that condition.

There is only one explanation for the showing made by the stallion in this race. He had made a long season in the stud at Marysville and the track being poor tbere Mr. Vance had no opportunity to give him any fast work before going to Santa Rosa where he did not expect to race, but to get his horse ready for this Oakland contest. Asked to start bim at Santa Rosa he consented and though beaten in the race Sir John S. paced a full second faster than he had ever shown before. "If such a mile when short of work does not sore him up and put him out of condition, he is the greatest horse in the world," said one horseman after the Santa Rosa race. The race did just that, and the result was seen Wednesday last. If Sir John S. is not started again for a few weeks, but allowed to take it easy until he is feeling well again, he will doubtless get back to his old form, and when he does there will be the greatest horse race ever seen this side of the Rocky Mountains when any pacer now on this coast leads him to the wire.

Trotting, Two-Year-Olds, $800:

Prince Lock, ch. g. by Zolock-Naulahka by Nutford (Pounder)	1	1
Queen Alto, br. f. by Iran Alto by Director (Hogoboom)	2	3
Easter, b. c. by Monicrat-Alta Reina by Atto Rex (Rutherford)	3	2
Ella M. R., b. f. by Lord Alwin (Twohig)	4	4
Virginia Lee, b. f. by Iran Alto (Bigelow)	5	5

Tlme—2:21½, 2:28.

Queen Alto and Easter divided second money.

Trotting, 2:20 Class, Greater Oakland Stakes, $2500:

Emily W., b. m. by Jas. Madison-Cornelia Rose (Ward)	1	1	5	1
Wenja, blk. m. by Zolock-Naulahka by Nutford (Pounder)	4	2	1	2
Lady Inez, b. m. by Nutwood Wilkes-Cora by Ira (Cuicelo)	3	4	2	3
The Statesman, b. s. hy Jas. Madison-Creona by Algona (Ivey)	2	5	7	4
Lady McKinney, b. m. by Washington McKinney (Ables)	5	6	4	
Monicrat, blk. s. by Monwood (Spencer)	6	3	3	
Judge Dillon, ch. s. by Sidney Dillon (Sanford)	7	7	8	
May T., ch. m. by Monterey (Twohig)	8	8	6	

Last four were ordered to the stables after the third heat.

Time—2:17¾, 2:15½, 2:18½, 2:21.

Pacing, Free-for-all, $500:

Mona Wilkes, b. m. by Demonio-Trix hy Nutwood Wilkes (Chadbourne)	1	1
Sir John S., b. s. by Diablo-Elisa S. by Alcantara, Jr. (Vance)	2	2

Time—2:12½. 2:07½.

Second Day.

Thursday was a cold, raw, cloudy day, with a biting wlnd and no sun, making out of doors very uncomfortable to all who had forgotten to provide themselves with overcoats or wraps. The crowd at Emeryville was just about half what it was on opening day, but the racing was excellent and the people remained until the last heat was decided.

Two of the races were on the plan of every heat a race, the 2:20 class pace being the only one that was decided on the three-in-five system. The three-year old trot had but four entries and the favorlte Don Reginaldo, lame as he was, had almost a walk-over, as he seemed to outclass the other three. The race was three heats, every heat a race, and the On Stanley colt won each as he pleased in slow time, 2:28¾ being the best mile.

The 2:20 pace had a field of ten horses, but it was a gift for the McKinney stallion Charley D., who won in straight heats, the fastest of which was in 2:10¼, eoual to about 2:08 on a good track. The Gossiper gelding Tom Murphy was expected to make Charley D. stretch his neck in this race, but he was not able to do it. Pools sold on this race before the first heat at $60 for Charley D. to $20 for the field.

There were four starters in the 2:09 class trot whicb was on the three heat plan. Wild Bell was the favorite before the race. He trotted a good race, but R. Ambush had the most speed and won the first heat in 2:10, which gave Zolock a new 2:10 performer and broke the track trotting record, as well as making R. Ambush the first new 2:10 trotter on the coast this year.

Wild Bell won the second heat in rather easy fashion, but in the third heat, Rutherford brought R Ambush up fast in the stretch and the Zolock stallion trotted Wild Bell off his feet in the race to the wire and won handily in 2:12. It was an excellent race throughout. The summaries:

Three-year-olds, 2:20 class trotting, Athenian stake, $900:

Don Reginaldo, br. c. by On Stanley, dam by Raymond (Ward)	1	1	1
Siesta, br. s. by Iran Alto (Davey)	3	2	2
Dehutante, b. f. by Kinney Lou (Chadhourne)	2	3	3
Nusado, br. c. hy Nushagak (Spencer)	4	4	4

Time—2:29¾, 2:28¾, 2:31.

2:20 class pacing, Alameda County stakes, $2,500:

Charlie D., b. h. by McKinney, dam by Memo (Thompson)	1	1	1
Queen Derby, br. m. by Charles Derhy (Cuicello)	6	2	2
Josephine, h. m. by Zolock (Rutherford)	2	4	4
Tom Murphy, b. g. by Gossiper (Chadbourne)	4	3	6
Lettie D., b. m. by Boodle (Davis)	3	5	8
Mac O. D., b. g. by Zolock (Pounder)	5	9	3
Silver Dick, gr. g. by George W. McKinney (Walker)	7	7	5
Freely Red, b. m. by Red Medium (Helman)	8	6	7
Explosion, b. m. by Steinway (Ward)	9	8	9
Joe Robin, blk. g. by Robin (Rodriguez)	d		

Time—2:11, 2:10¼, 2:11½.

2:09 class trotting stakes, $1,000:

R. Amhush, br. h. by Zolock, dam by Silkwood (Rutherford)	1	2	1
Wild Bell, br. g. by Wildnut (Quinn)	2	1	2
John Caldwell, b. g. by Strathway (Walker)	3	3	3
Athasham, b. s. by Athadon (Walton)	4	4	4

Time—2:10, 2:11¾, 2:12.

Against time to beat 2:25¼ pacing:

Zoe W., b. c. by Zombro (Twohig) won.

Time—2:22½.

ABOUT SPANISH QUEEN.

The strong-hearted bay mare that won the Merchants and Manufacturers' stake, is an interesting thing to watch, says an Eastern writer. Her mannerisms will give oue an idea that she is somewhat notional, but Gus Macey handles her with a whole lot of consideration, patience and best of all a pair of light hands. He certainly had the hardest horse to drive in the race, for according to those who know, the mare was broken very late and is not now thoroughly educated.

One of her peculiarities is in scoring. Every time the bell called the field back, she would trot down to the high board fence at the turn and pausing, would slowly walk up close and stop. Standing there with ears forward and a look of genuine interest in her countenance she would gaze for half a minute at the scene beyond, and Macey each time would patiently wait for her to finish her observation. When she had apparently satisfied her curiosity, she would turn on her own initiative and jog back to resume the battle.

Corning Girl, the filly by Loring, that is being trained by F. N. Frary at Woodland for the purpose of lowering the world's yearling pacing record this fall, worked a mile heat last week in 2:27¼ out in third position, and finished strong. The little miss does not weigh ouite 600 pounds, but is strong and very active and Mr. Frary is very confident he will lower the record of 2:20¾ held jointly by Belle Acton and Paul D. Kelly. Corning Girl is owned by W. H. Sampson of Red Bluff.

Mr. Chris. Anderson of Arcata, Cal., owns the mare Theresa by Waldstein that has a colt now at foot sired by Theresa's full brother. The colt is a good strong youngster, perfect in every way, and while closely Inbred looks as if lt would develop into a good horse. It was not Mr. Anderson's intention to mate Theresa that way, but accidents will happen. Mr. C. A. Durfee once owned a very handsome filly by McKinney that was out of a daughter of that horse and while small was perfect otherwlse. The filly died from distemper when three years old, or lt would have been trained.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

AT THE TRAPS.

The opening day of the first semi-annual tournament of the Crescent Bay Gun Club at Venice, August 7th, produced some of the greatest shooting ever done in southern California. An amateur squad of five men, consisting of J. E. Vaughan, Mark G. Lane, R. M. Arnold, Gus Knight and F. B. Mills, broke ninety-eight out of their 100 targets in the first event, this performance was duplicated later by a professional squad composed of Capt. George E. Bartlett, Clarence A. Haight, Fred Willett, D. W. King Jr., and Harry Hoyt.

Bartlett and Willett tied for first high professional average with 186 out of 200; Dick Reed was second with 182, and Haight third with 181.

This record was beaten hy the amateur high averages when Knight and Bob Bungay tied for first with 188, Louis Breer took second with 187, and Vaughan secured the third with 186, tying the highest professional score. The hest run of the day was made by Willett, who broke 66 in succession. His performance, in pulling himself together after a bad start in which he missed 6 out of 20, making the highest run, and tying the best professional score, was an achievement of high order.

Forty-one competitors were entered, including many famous "shots" and promising amateurs, and good shooting was the rule. Among the professionals were D. W. King Jr., and Hip Justins, who hardly struck their gait during the day. The list of amateurs included W. H. Varien of Pacific Grove, E. C. Ickes of Fresno, James Gibson, C. D. Hagerman and Sam Smith of Los Angeles, who are recognized as dangerous opponents in any company.

The tourney was opened at 9:30 o'clock with a shot by Capt. Bartlett, and six men made straight scores of 20 each in the first event. These six were King, Vanghan, Lane, Arnold, Mills and Ickes.

The events were all class shooting, Sargeant system. The rapid and machine-like work of the professional squad would have been a good object lesson for range riflemen. They came to the firing line, fell into position, called their targets, and changed their places, without comment or criticism, while their guns spoke like the ticks of a clock.

A record of 8000 targets hroken in five hours hy forty men, divided into eight squads and entered in ten distinct events, attest the discipline of the marksmen and efficiency of the management.

Secretary R. H. Bungay was in charge of tbe field, and C. W. Clement acted as cashier. The ground officials were Lee Harris, Sam Jackson, Thomas Brown, Fuller and Krokon.

At noon Capt. Bartlett gave an exhibition of fancy shooting with various rifles and a "pump' shotgun. With the latter he lifted a tin can in the air and drove it thirty yards away under the impulse of the six shots from the magazine. With the rifles he performed a number of difficult feats in snap shooting, even making confetti from sheets of colored paper thrown in the air. After forty minutes of such work, he was called immediately to the traps, and resuming his shotgun hroke thirty-nine out of forty blue rocks, almost without a pause.

The excellent shooting that marked the first day of the tournament was continued Saturday and improved upon as the same ideal weather conditions prevailed and the marksmen struck their gait. To R. M. Arnold of Oxnard, fell the high average honors of the day; he succeeded in hreaking 192 out of 200 targets, making a straight run of 88 targets during his performance and heating the record of 188 targets established the first day. Gus Knight of San Bernardino, divided second honors with F. B. Mills of Long Beach, hoth of whom broke 188 targets apiece out of 200, they were hard pressed by R. H. Bungay of Ocean Park, who came in third with 186.

In the squad shooting the five amateurs, who the day before estahlished the record of 98 per cent of targets hroken, again came to the fore with the same percentage made when Vaughan, Lane, Arnold, Knight and Mills stepped up to the traps during the first event in the morning, four of them breaking 20 each and one 18. The straight run of 88 made by Arnold was tied hy D. W. King Jr., while Fred Willet came uncomfortahly close to the mark.

The high gun for the two days of the tournament was Gus Knight, who hroke 376 targets out of 400, with R. H. Bungay's 374 in second place and R. M. Arnold, third, with 373. Bungay gave the veteran from San Bernardino the fight of his life, being ahead of Knight up to the last event, when Bungay by bad luck, lost 3, while Knight smashed the entire 20.

Among the professionals Fred Willet was high gun for the two days with 372 hroken out of 400; Dick Reed came second with 368 and C. A. Haight, third, with 364.

In the special event for shooters, who averaged 80 per cent and less, A. B. Thomas won out by breaking 40 out of 50 targets; H. Mitchell came second with 39 and J. H. Baker, third, with 37.

All the events were pulled off with clock-like regularity, thanks to the efforts of R. H. Bungay, the manager of the tournament, and Secretary C. W. Clement. Everything necessary was on hand, the grounds in first-class condition, no delay of any kind was occasioned.

During the noon intermission Captain Bartlett gave another astounding exhibition of his skill with a Remington automatic rifle, placing the bullets at will into all sorts of targets thrown into the air, not only hitting the targets, but hitting them in specified places.

The tourney closed on Sunday after setting a pace which will be hard for others of the circuit to follow. More than a dozen experts shot so closely together that it was anybody's race almost up to the last shot, and they were breaking records, too. Gus Knight carried off the amateur record of the State with high average for three days or 565 out of 600, and two separate squads broke 98 out of 100 targets on the same day, one of them repeating the feat on the day following, or three times for this tourney. Denver was advertised throughout the country for doing it once.

Here are some of the features:

High gun for one day—R. M. Arnold, 192 out of 200.

High run of tourney—R. M. Arnold, 88.

"Miss and out" event—Fred Willett, 55 birds straight.

Highest score out of 100—F. B. Mills, 99.

Shortest time of squad on 100—Capt. Bartlett, C. A. Haight, Fred Willett, D. W. King and Harry Hoyt, 3½ minutes.

In Sunday's events Dick Reed claimed his own and estahlished high professional average for the tourney; made a clean score of 25 in the merchandise event, and followed that by winning the "miss and out" event with 22, or a total of 47 straight in the last two events.

Hip Justins also found himself in better form, and took second high for professionals with 186, equaling the best of the two previous days, while Capt. Bartlett was third with 185.

In the amateur squads, Mills, Knight and Bungay tied for high gun with 189; Vaughan was next with 185, and Arnold followed with 182, Knight made high run for the day with 78.

Genial Fred Willett, after carrying off the professional honors for two days in great form and winning the hardest fought "walk around" that any of the ten entrants in the "miss and out" event ever saw, found that the strain had told, and broke 23 birds less than his previous strings.

A feature of the tournament was the three days' race hetween Knight and Bob Bungay for first place. They were never far apart, and when, in the last round, the veteran Knight made a clean score of 20 and landed two points ahead, his victory was greeted with applanse.

The five highest amateur averages for the tourney were: Knight 565 out of 600, Bungay 563, Mills 559, Vaughan 556 and Arnold 555. The three professional high averages were: Reed 558, Haight 543, and Justins 539. Mills holds the coast record of 120 straight, made last summer.

Dr. Taber is an expert rifleman, having won three gold medals at the Charleston meeting of the National Scheutzenhund, and King's medal in the Eagle shoot of 1907. Vaughan is known wherever marksmen congregate. Cashier Clement says he has paid Mills more prizes than any man he ever met.

These and the scores of others, commonly shooting on grounds of their own choosing, confront the small squad of half a dozen salaried men, who are called professionals hecause they are under pay and sent where orders specify, hut never shoot for prizes. The "pros." are representatives of manufacturers of guns and ammunition and fine all-around shots, but making no specialty of trap shooting. Their presence makes a success of any meeting, and their great work is not always sufficiently recognized.

On Sunday a squad of five of them called and fired at their 100 targets in 200 seconds, an average of one shot every two seconds, in rotation, and hroke nearly every one.

Crescent Bay Gun Club, first semi-annual blue rock tournament, 10 events, 20 targets each, Venice, Friday August 7, 1908:

The Venice tournament was the first semi-annual shoot of the cluh, and is the first of a series of similar meetings to he held in rapid succession at Medford, Ore., San Luis Obispo, Denver, Redlands, Riverside, Bakersfield and Fresno, under the auspices of the gun cluhs of the respective localities.

The Santa Barbara cluh, which expected to hold the third meeting of the circuit, has withdrawn its announcement for the present half-year, preferring to have its contests take place while the shooters are swinging the circle the second time.

The eighth regular shoot of the Eureka Gun Club was held August 2d. There will be three more club shoots held this season, the final meeting is billed for the last day of the club's annual tourney in September. The scores in the club match at 25 targets were: C. O. Falk 21, G. W. Wilson 16, J. K. Durnford 15, W. Parker 21, J. Janssen 20, W. L. Perrott 17, G. W. Smith 24, C. C. Falk 17, C. Cmith 16, W. Noble 17, C. V. Jackson 12, W. B. Strong 13, H. Kelly 19.

The Martinez traps have been a steady attraction for Contra Costa shooters this season. On the 2d inst. live birds instead of inanimate targets was the program. We notice that Lee Dunham of Antioch, who used to be a familiar figure at the powder burnings several years ago was one of the contestants. Frank Hodapp of Martinez, also stays with the game. The first race was at 12 pigeons. F. Joost and Mersich divided first money. Durham won second and third was divided by Hodapp, McDonald and McClellan.

Mersich was high gun in the six bird race. The scores were:

Twelve pigeons—S. Mersich 11, F. Stewart 7, F. Joost 11, A. E. Blum 6, F. Hodapp 9, M. Joose 7, G. McDonald 9, J. McClellan 9, H. Veale 5, Lee Durham 10.

Six pigeons— S. Mersich 6, F. Joost 4, M. Joost 3, F. Hodapp 4, H. Veale 4, F. Stewart 5.

F. Joost won the gold charm offered by Baker and Hamilton.

The El Paso Gun Club's sixteenth annual tournament will come off at El Paso, October 13th, 14th 15th. There will be $500 in cash hung up for blue rock events and a $100 added purse for a live bird match. 20 birds, $20 entrance. The El Paso shooters count on an attendance of at least 75 shooters.

Eureka sportsmen are working hard for a successful blue rock tournament—the first annual tourney of the Eureka Gun Club September 19th and 20th. The program calls for 150 birds each day. A large attendance is counted on if assurances from many points are any criterion. Following the trap shooting a keen bit of sport is provided through the medium of a grand bear hunt in one of the most wild portions of Humboldt county, and that will alone be worth taking the trip for.

The Union Gun Club shoot at Ingleside drew a fair attendance last Sunday. The main event was the Du Pont trophy shoot at 20 targets. George Thomas won the trophy by default. Murdock and Thomas were high with 17 breaks each, Murdock declined to shoot off. E. Holling, who scored a win in March, was not present. Mrs. Thomas and Mrs. Byrne made creditable scores from the 14 yard peg. The scores were:

From 18 yards, re-entry—D. Burfeind 16, 14, 14, 11; Butler 9, 10; A. E. Hoelle 14, 15, 16, 11, 12; Ashlin 14, G. Thomas 17, 13, 16; W. Price 11, 11; Haas 12; L. Ragland 12, 10; W. Murdock 15, 17.

From 16 yards—T. L. Lewis 11; N. Norgrove 10, 9; F. Ragland 8. Primer 7. Byrne 14.

From 14 yards—Mrs. Byrne 12; Mrs. Thomas 6.

At a recent shoot of the Morenci Gun Club the Arizona shooters rolled up some excellent scores. In the club race at 25 targets the results were: Dr. Tuthill 21, Kelley 8, Horn 9, M. McDean 19, Dr. Perkey 18, Hyde 18, Dr. Tuthill 25, Heeley 16, McLean 18, Horn 15, Hyde 21, Perkey 20, Kelley 11, McLean 20, Hyde 20, Perkey 18, Tyler 14.

At Gallup, N. M., a gun club was organized this month. A trap ground has been fitted up and regular shoots are now in order.

Carson City and Gardnerville trap shots, between whom there is considerable rivalry, came together again two weeks ago at Carson City with the result that the Gardnerville team of seven men won out by a margin of 11 targets after shooting off a tie.

A fine new club house and new traps for the Spokane Rod and Gun Club, to take the place of the old traps at Natatorium park, will be constructed on Moran prairie within the next few weeks. Andrew Johnson, who makes a business of taking care of dogs at his place on Moran prairie, about a mile outside the city limits, has given a long time lease on his property and will be made the caretaker of the grounds, club house and traps.

It is planned now to put in a fine two-story club house, making it a pretty and convenient spot for visitors. On the top story a balcony overlooking the traps will be provided for spectators, and the top floor will be fitted with tables and chairs for refreshments and rest.

The club will remove its traps now installed at Natatorium park grounds. In every other way the grounds will be made equally adapted to big trapshooting tournaments as the old grounds at Natatorium Park.

One big advantage marks the change and which is, in a measure, responsible for the shift. The club will now be shooting against a sky background. At Natatorium Park the high bluff across the Spokane river so often proved to be a big handicap that the club long decided to make a change at its first opportunity. It tried to do so last fall before the big northwest trapshooting tournament, but could not get suitable grounds.

In this big tourney such crack shots as Fred Gilbert, whom year in year out average is something like 98, could do no better than 90, and other equally great shots fell off from 5 to 10 per cent. All was blamed to the false background and the shifting wind that blows down the canyon. A sky background is always considered the ideal range, and this is what the club will now have.

While no definite plans have been laid in that direction it is quite likely that the club will make a bid for some big tournaments in the near future. There are a large number of good shots in Spokane and the sport is quite popular with spectators, hundreds of whom turn out to see big tournaments, and the city is well able to take care of big tournaments. All that has hindered before has been the bad background.

New officers were elected at the meeting, when the deal was closed for the new grounds. E. J. Chingren was elected president. Mr. Chingren is the best average shot of the club and has for the last two years captured all sorts of medals and trophies at various shoots all over the northwest.

The new traps will be ready within a few weeks and the new clubhouse by November. The club will spend about $1,000 on the improvements.

What promises to be one of the most popular clubs of Bisbee, Ariz., was organized last week as the "Bisbee Revolver Club." Dr. C. L. Caven was chosen president, C. M. McKeehan vice-president, J. F. Burgess, treasurer, and Alf. E. MacKenzie secretary.

The following committees were appointed: Executive committee, N. C. Bledsoe, A. M. Sinclair, F. J. Hart, John Foster, H. B. Hanscom. Range committee, C. M. McKeehan, Alf. E. MacKenzie, N. C. Bledsoe. By-laws, James Nichols, N. C. Bledsoe, A. E. MacKenzie.

Target shooting with the pistol and revolver, as a sport, may be said to have originated at the annual meeting of the National Rifle Association in 1886. Prior to that time the weapon has been considered as inaccurate. The matches held in 1886 proved to be so interesting and successful that target shooting with the pistol and revolver became instantly popular all over the country, and has grown in interest and enthusiasm since, some remarkable scores having been made.

The Bisbee Revolver Club will be affiliated with the United States Revolver Association, which includes the U. S. Army teams, and expects to be represented at the matches which are held each year over the country. Arizona is the natural home of the revolver, and many excellent shots are to be found here.

Applications for membership in the new club will bring the total to fifty, and the organizers are confident that they will have 100 members in a comparatively short time. Almost every Arizonian has a revolver of some kind, and the rules of the U. S. Revolver Association are so liberal that practically all of them may be used in the matches.

SMALL BORE GUNS.

(By Almo.)

Knowing well the many sportsmen of California who are and have been using small bore shot guns, or I should say "fowling pieces," and having used as small as 28 guage; and knowing well when friend Guacho learned so much of them in my home for twenty years "Texas." I read with great pleasure Guacho's knowledge of the 20 guage. This summer I have been at work testing 20 guages for the dense powders. I have used thousands of shells and to put it all down without crowding your paper, my experience on targets and pressure guages is as follows: Your gun is useless unless you can throw enough pellets of shot over a thirty inch target at thirty yards, and No. 8 shot is as small as can be used on quail in California, Texas, or New Mexico. I found one ounce of shot was the amount required to cover the target so as to make sure of your bird. The great 20 bore crank of Texas used one and one-eighth in long shells and he did wonderful work on the coast, and at the trap, as one ounce will give the pattern. I found 18 to 20 grains of dense powder wadded with one elastic felt and two pink edge wads, with card wad over shot in 2 7-8 inch shells gave the penetration. I found a less amount of shot of no value for reliable work. I worked day after day with the finest choke boring tools ever made but until I got enough shot to make a pattern I failed. My next experiment was for stringing of shot, I use the same machine that the best London makers use, and with dense powder I found a thirty inch barrel the best to hold the shot charge compact and without stringing. The gun that strings its charge of shot is a failure. I do not advise the use of small bores for wild fowl, a twelve is not large enough to throw the large shot, say one and a half ounces without too much recoil. As 20 guage shells cannot be found on the market loaded with one ounce of shot, they can be obtained from the large gun stores of San Francisco whose advertisements are found in this journal.

When a demand is created our cartridge makers will meet it, as so many cheap small bores are made for boys' use. I have been informed it would not be safe to market loaded shells fit for high grade 20 and 16 guage guns, knowing well that the breech pressure is much greater in small bores. I have seen several four blade Damascus barrels of 16 guage swelled at breech almost to take a 14 guage shell, and I know of one re-bored for 14 guage doing good service for two seasons. Many 16 guages made ten years ago are not safe as the bore of barrel is not tapered enough to the shell chamber, these guns can be tapered by a good gunsmith, and as a rule the barrels will be safe with a one ounce load.

Up to the end of last month there were taken out in Shasta county 1028 hunters' licenses—all of the $1 variety. In Trinity county 256 licenses have been issued for the current year.

Drink Jackson's Napa Soda.

NORTHWEST NOTES.

(By August Wo...)

Charles Sheldon of New York, millionaire, clubman, author, mighty hunter and a Yale man of '90, has just returned from a hunting expedition in the interest of science. He has been camped at the base and above the timber line on Mt. McKinley, the highest peak in the United States, the last 12 months. Mr. Sheldon offered his services to the biological survey of the agricultural department five years ago, and since that time has given all the specimens of animals and birds he secured to the government. It is his fad, his way of enjoying himself. He says that the 12 months he has spent in the wilderness near McKinley has been a most pleasant year. It gave him opportunity to study nature, which is his hobby. He asks nothing for his work, and does not even take a set of moose horns or a pelt of any of the many big animals he has killed. He said among other things in the course of a chat the other day:

"I have killed about 40 or 50 grizzlies and never have I seen one of them that did not try to get away. I never had any thrilling escapes nor did a bear ever charge me. Bears are afraid of men and I have never seen any other kind. That might not sound like a good story, but the fact is I have longed to meet a bear than would put up a fight. Then, again I have never killed a bear that measured over 6½ feet. I have heard of bears being larger than that, but I have never seen them. I can take a bear skin and make it 12 feet long, but that would not only be stretching the skin but the truth, and I prefer the truth when it comes to my work. Yes, my work, or sport, as it may be called.

"I spent a pleasant winter in the Tanana and I am bringing back hundreds of specimens of mammals from the little wood mouse to the moose. I have not any big heads. They are what we call mature heads. In fact, all that I brought down were mature specimens. Nothing will be known as to whether I found any new species until the department at Washington examines and compares them.

"I got between 10 and 15 grizzlies. The largest was six and one-half feet long. We only measure the bear from the tip of the nose to the base of the tail. And all measurements are made when the animal, after being killed, is laid out on the level ground. It is very eask to get a 10 or 12 foot pelt out of a six foot bear, for few skins stretch so easily as a bear's hide. I could have made some of mine large, but preferred to be accurate.

"The moose and other mammals killed or trapped were mature specimens. I could have killed many animals during the winter, but preferred to select only what I thought either big or fairly good specimens. I got many mountain sheep, but these, too, were the same as killed in other parts of Alaska. In fact I saw no new specimens of any kind of animals or birds."

When Mr. Sheldon went into the McKinley district last July he chartered a steamer to carry his supplies up the Kantishna and he then used pack horses to the head of the Toklat, where he established headquarters. He had "Kid" Carstons, a noted guide of the Tanana running between Fairbanks and his cabin all winter carrying in supplies and taking out pelts and specimens of game. During December and January Mr. Sheldon made his way up the slopes of McKinley to see what altitude sheep and other game roamed in mid-winter. He lived above timber line for some time.

From the Spokane country Mr. Sheldon will go direct to Washington, D. C., to turn over the specimens secured and have the films developed that he used up during the winter, for he has hundreds of photographs of game in its wild state.

Mr. Sheldon has traveled from Mexico to the Arctic circle and spent one summer at the head of the Pelly and McMillan rivers in the Yukon with Selous, the great Africau hunter, made famous by Rider Haggard in "She" as Allen Quartermain.

"Bob" Huggart, trapper, hunter and guide in the East Kootenai district, north of Spokane, has just returned to civilization from the head waters of St. Mary's river, which backs into the mountain fastnessess of the snow-capped Selkirks, in Southeastern British Columbia. He had what he terms "a pretty tolerably fair" season with marten, though, he says, the fur runs lighter in color and the catch was below the average of the early days. This he attributes to an epidemic among the snowshoe rabbits in the spring of 1907.

"Bob," as he is lovingly called by his friends and companions in the north country, told of the wholesale destruction of the cariboo by cougar over his trapping lines. Cougar are numerous in the St. Mary's Valley; so thick, in fact, that he counted the remains of over 50 cariboo along the trails and in the immediate vicinity of his cabin in the mountains. Deer, too, he siad, suffered severely from the havoc wrought by the cats.

A small band of black-tailed deer frequented a bottom near "Bill" Meachem's ranch in the main valley of the St. Mary's country last winter. A cougar or two began to kill them off until four or five survivors boldly took shelter in Meacham's paddock, within a few yards of his door, seeming to recognize that the big cats would not dare to come close to the abode of man. These deer became tame and continued feeding almost within touch of where their protector was cutting his firewood or feeding his stock.

Huggart maintains that the present bounty of $15

by the provincial goverument is far from being a sufficient inducement for a man to hunt cougars, since successful pursuit of the animals is impossible without employing dogs. "Bob" does not care for big dogs as used by President Roosevelt in his Wyoming expedition, but prefers the rough, red Irish terrier as the ideal animal for sport with either cougar or bear.

"If your terrier (let him be not more than 24 pounds in weight, cat-footed, well ribbed-up and especially provided with brains) takes to the game of bear-baiting, he and a companion of his own quality will make it highly interesting for the most savage grizzly," he said, adding:

"If ursus horribilis be around the dog will pick up the trail easily enough, and then in due time you are likely to hear the hunting bark of those little four-footed daredevils and the loud roars of ungovernable rage from the gray, surly monarch of the waste places. If your dogs know their business you need be in no hurry, for they will hold their heast in a space not much bigger than a circus ring.

"The bear is the star slow performer of the aggregatiou," continued Huggart, in telling of the work of his two dogs, called Patsy and Nettie. "Patsy delivers a rear attack and swings the bear to protect his southern frontier. Nettie is there to give him a shrewd uip in his most tender susceptibilities, and so continuous a genial, hilarious exhihition of the healthy exercise.

"A few minutes of this circular evolution makes the bear's head swim, and then he naturally goes staring, raving, rippiug mad, the whole way through his nose to his rudimentary stump of a tail. Patsy and Nettie positively laugh in keen enjoyment of the perilous sport and bark sharply, as much as to say, 'Hurry up, up, up; we have him, have him, have him. And he's mad. We're attending to his south and going north. Hurry up!'

"Never will they, if they value their lives, attempt a frontal attack until your bullet crashes through the hrain of your quarry, and then both pile onto separate ears and shake with all the valor of their mighty, gallant, plucky little souls.

"Scott Thornberg of Kasso, B. C., had a couple of wire-haired kennel terriers that held up as many as twenty-three silvertips in their day and never got a scratch worth mentioning. To small, active dogs that understand the game, the worst kind of hear is easy work, but with the cougar it is entirely different. There are times when the smallest one will make a mountain lion climb the tallest tree in the vicinity, when the hunter can kill the hrute with a shotgun, but when one of the breed is fairly cornered it will fight like a doped devil. No matter how quick or clever the dogs may be some of them are bound to get ripped or disemhoweled.

"Fifteen dollars will not induce a man to risk the lives of his little friends for the sake of a panther's hide and head, and unless the bounty is increased materially, Mr. Felis Conoclor will continue to increase and the deer and cariboo to decrease proportionately.

"Just to give you an instance of the cbeek of these cats. I'll tell you what happened the other day. I don't usually pack a gun when I'm making a round of my traps, as every ounce counts in the mountains, especially when you are on snowshoes. Well, one day in April, I was making for the high ground, when a cougar started to follow me in plain sight. A cougar will never attack a human being if it is not cornered. But this fellow stalked me for ahout six miles. I didn't like the style of his actions and fiung a few rocks at him. He sheered off at that and I saw no more of him. Likely enough he folowed me back to the cabin, hut kept out of sight. That is their mode of stealthy pursuit, though it never ends in an attack."

Huggart says that the St. Mary's country is never hunted by either Indians or white men, as the ground is rough and dangeious, but goats are plentiful and afford good sport for any one who likes that kind of sport. There are also plenty of sheep on the main range across the valley of the Kootenai river.

Another brood of Hungarian grouse has been reported to Game Warden James Vaie, this time from the head of Cleghorn canyon, on the east side of the Cajon. A rancher named Burton notified Vaie that he had seen a flock of seventeen small birds with the old hird, and this, following close after the news of a brood seen in Yucaipa, gives the sportsmen a feeling of confidence that the birds have hatched at least several broods in different parts of the range, and that the basis has been established for the addition of the grouse to the game birds of

Tom Klipstein, Elmer Daniels, Henry Klipstein and Ben Garrett, Bakersfield sportsmen, returned last week from the Sam Young Meadows and report fine hunting. A large party is camped at the Klipstein Ranch and during the last four days no less than nine deer have been brought into camp, a fine bunck being killed hy Elmer Daniels.

A late report from Hollister states: Of all the dove seasons, the present one seems to be the best by far in many years. At no time have the reports brought in from the shoots been more satisfactory, and there have been very few disappointed nimrods who have had tc return home minus enough game to make a good meal. Incidentally, the eating qualities of the seaso[illegible]'s kill has been of the best.

DOINGS IN DOGDOM.

Entries for the Del Monte show close to-day. George Thomas of Hamilton, Mass., a familiar to the Coast fancy will judge all classes it is reported. The show will come off at Hotel Del Monte on August 28th and 29th.

W. B. Coutts is at present training his string of dogs for the Oregon Feld Trials at Harrisburg.

The fanciers hailing from the "valley of Anahuac" are in line and have formed a kennel club. From the press notice given below it would seem that there is a hrilliant field open for some of our home talent to "put them right" and "do them good."

The Mexican Kennel Club was formally organized at a meeting of dog owners held in the City of Mexico, July 12th. "Mexico Kennel Club" was chosen as a name for the new organization instead of "Mexican Kennel Cluh" which had been originally suggested. Officers were chosen, committees named for the preliminary work and the first steps taken for putting the organization on the very highest plane.

The officials elected at the meeting were: Joseph Ketchum, president; George Miller, vice-president; George (Peek-a-Boo) Robinson, treasurer; J. Sanderson, secretary and Harrington Jones show manager.

Annual dues are to he $10 to be paid half yearly and the list of memhership is to be kept open for three months. All those joining in that time will be considered charter memhers. Those joining after that time will pay an initiation fee of $5 in addition to the annual dues.

A stud hook is to be estahlished and the matter of conditions under which dogs might be registered was left in the hands of a committee consisting of Joachim Armor, George Miller, W. G. Robinson L. L. Lewis and Fred Davis.

Preceding the appointment of the committee there was considerable discussion of the matters at issue, some being in favor of making a start by allowing a general registration, even without a pedigree, while the other section held that the stud hook would be valueless if other than dogs with a pedigree were admitted. The majority seemed to think that there should be at least a showing that the dog came from pure hlooded sources even if the owner could not actually furnish a full pedigree.

The secretary was requested to get copies of the charter and hy-laws of other kennel clubs as a guide in the adoption of charter, by-laws and rules for the Mexico Kennel Cluh. An invitation committee consisting of Joachim Armor, George Miller and Fred Davis was named for the purpose of inviting the owners of well hred dogs in Mexico to become memhers.

It was announced at the meeting that handsome money prizes had heen offered for a rat killing contest hy Fox Terriers which might be registered with the club. The offer has heen made by Alejandro de la Arena that he would give $200 for the Fox Terrier killing twenty-five rats in a pit in the best time. Colonel E. Sly-Goddard offered $100 for the second best, and W. G. Robinson $50 for the third.

The matter was brought hefore the club and it was decided that it should he left in the hands of a committee consisting of Alejandro de la Arena, Colonel E. Ely-Goddard, W. G. Rohinson Fred Davis and L. L. Lewis to frame the conditions of the competition and to decide upon a date.

The meeting adjourned after a general discussion of club development and while nothing was done officially, there was a decided sentiment in favor of a hig hench show within the next six months.

A recent press dispatch from Gridley, Butte county, states: The hass are hiting fine these days. Parties of fishermen and women who have visited Butte creek report good catches with the spoon. An examination of the stomachs of twenty-five bass last Tuesday revealed that about the only food available in the creek now is other fish. In only one instance was other matter found in the stomach of a black bass, and in that case it was a dried fig.

Striped hass and hlack hass are more or less numerous in the Feather river, and occasional catches of both sorts are reported. The Japanese and the Greeks pay little attention to the laws, probahly knowing nothing about them, and caring nothing either, and they take fish of all sizes and in all sorts of ways.

Pike are voracious and when hooked fight fiercely. They are not so highly esteemed as the bass, and fortunately for the other game fish they are not numerous in the streams of the vicinity.

For the past two weeks salmon trolling outside the Golden Gate has been of a nature most satisfying to the devotees of salt water angling. Last Sunday 25 launches were clustered in fishing water and so close together that they could hardly keep out of each other's way. The catch was a numerous one, the fish being of fair size and in fine condition.

Salmon are said to be running off Capitola. The boats brought in fifteen Tuesday, last week, whereas on Wednesday more than 200 were were brought in, and they were large fish, too. Salmon in Santa Cruz bay will be heard from soon, it is hoped, as there are a lot of fishermen all over the State waiting for the news that salmon are on the run, which means lots of fun.

TRADE NOTES.

Recent Du Pont Wins.

The record high average (for 1908 at least) was that made by Mr. L. S. German of the Du Pont Company, when attending the West Virginia State shoot at Jacksonburg, W Va., on June 10 and 11. Mr. German's score was 592 out of 600, an average of 98.4 per cent. When making this record Mr. German used Du Pont smokeless.

On July 9th, at Shamokin, Pa., Mr. O. S. Sked made a run of 128 straight, using Du Pont smokeless.

The Du Pont Company is justly proud of the record made by its powders at the Eastern Handicap, Boston, Mass., July 14th to 16th of this year. Mr. George Lyon of Durham, N. C., won the Eastern Handicap, and Mr. A. B. Richardson of Dover, Del., won second money in the same event. Mr. H. E. Buckwalter of Royersford, Pa., won the Preliminary Handicap. These three amateurs used Du Pont smokeless. An Illinois amateur won high amateur average for the entire tournament, while Mr. L. S. German won high general average for the entire tournament, both using Du Pont smokeless.

Winchester .30 Government Cartridges.

Among military men no cartridge is better known than the .30 U. S. Government and it is with this cartridge that they particularly desire to become expert. Realizing as they do the varying quality of these cartridges as made by different manufacturers, the majority bave long since learned to pin their faith to the famous Winchester make. The Winchester company make the only sporting rifle adapted to this well-known cartridge, and when loaded with soft-point bullet it is widely used by hunters of big game. The experience the Winchester company has had in catering to the demands of the sporting goods trade for this cartridge has been very valuable and has enabled them to hring their product up to perfection. This bas been evident by the showing made by the Winchester .30 Government ammunition at the military matches during tbe last year or two. For two successive years the President's Match for the Military Championship of the United States has been won with these cartridges and many other notahle matches too numerous to mention. No more trying test than tbis is possible and it demonstrates the high quality of Winchester .30 Government ammunition. With the modern and complete plant that the Winchester compauy has, it is possible for them to turn our cartridges of unvarying quality, so they can all be relied upon to shoot exactly alike. This is very important in fine shooting, where a slight difference in recoil or velocity serves to throw off the aim. To guard against this, use only Winchester make of ammunition, aud when buying look for the red W on the box.

Peters Points.

At Holly Springs, Miss., July 24th, Mr. Clarence C. Hakins, Woodstock, Tenn., won high amateur and high general average, breaking 189 out of 200 with Peters factory shells. Mr. C. C. LeCompte tied for high professional with 188, also with Peters shells.

Mr. L. I. Wade won high general average at Lufkin, Tex., July 24th, scoring 92 out of 100. He used Peters ammunition.

At Brunswick, Ga., July 21-23, Peters shells won about everything in sight in the way of honors. Mr. C G. Westcott was high amateur with 551 out of 600, with a run of 89 straight. Mr. H. B. Freeman won high professional and high general average with 565 out of 600. Messrs. Guy Ward and A. M. Hatcher tied for second professional and second general average with 561. All used Peters ammunition.

At Pearl Beach, Mich., July 22nd, and 23rd, Mr. L. H. Reid won second professional and second general averages, breaking 292 out of 300 He shot Peters factory loaded shells.

Mr. H. W. Cadwallder won second professional average at Champaign, Ill., July 22nd and 23rd, scoring 379 out of 400 with Peters shells.

Mr. L. H. Reid tied for high average at Pearl Beach, Mich., July 22nd, with 144 out of 150. He also broke 148 out of 150 on the second day, and won high general average for the two days—292 out of 300. He shot with Peters shells.

At Lincolu, Neb., July 4th, Mr. C. D. Linderman was high gun, shooting Peters factory loaded shells. The score was 98 out of 100

At Perry, N. Y., July 23rd, Mr. F. D. Kelsey won high amateur average, shooting from 16 and 20 yards using Peters factory loads. Mr. Neaf Apgar won high general average at Newton, N. J., July 25th, breaking 146 out of 150 with Peters shells.

Quality Counts

The following communication is a testimonial of the merits of Ithaca guns that is convincing and practical:

"Corona, Cal., June 27, 1908.

Ithaca Gun Co., Ithaca, N. Y.

Gentlemen: Please send me your catalogue and special prices. About twenty-five years since, I purchased a 10 gauge gun of your make, and it has not cost me a penny for repairs. The barrels are getting pitted for lack of care, and I want a new gun.

Very truly,

H. A. PRIZER."

Steelhead are reported to he plentiful in the mouth of the San Lorenza river at Santa Cruz.

BREED QUALITY FOR PROFIT.

A mistake which most men make when first engaging in the trotting breeding business is in stocking up too heavily with brood mares, and those that do not show the highest quality. This is especially true of men of moderate means, that embark in the business for the profit which they bope to attain from their investment, rather than as a source of recreation, says the Horse Breeder.

If a beginner has a farm witb capacity for carrying forty head of horse stock, he will be more likely to succeed, or at least less likely to become discouraged, if be starts with not more than ten first-class brood mares. Such mares can be bought at very reasonable figures, provided a man is a good judge of successful blood lines, of conformation, of gait, of quality and of character. The latter is of great importance. It is indicated by the countenance, as expressed by the eye, which is the window of the brain.

Good judges of equine character, like good poets, "are born, not made," The ability to judge accurately is a natural gift which some men possess, and unless born in a man it cannot be acquired by cultivation to a sufficient extent to make a man an expert, or even proficient in that line. Unless a man, who is ambitious to succeed, has that gift he should seek the aid of some honest, competent man who does possess it and leave the selection of the mares largely to him.

It is not always the highest-priced mare or those with tbe fastest records that produce the fastest trotters, and it need not surprise the beginner if some of the mares selected can be bought at low prices, owing to having strong wills which prevent them from being pleasant, all-purpose animals for farm and family use, as was the case with the dam of Ralpb Wilkes 2:06¾, the fastest trotters sired by Red Wilkes, and also the fastest produced by any daughter of Mambrino Patchen 59. This mare was so high strung that she would not work on a plow, and for this reason the man who owned her before she had been tried as a brood mare, exchanged her even for a mule.

The dam of Sweet Marie 2:02, was of a similar temperament, and was sold with Sweet Marie in utero for $60, to be paid for in hauling junk. Mares of a similar temperament to the dams of Sweet Marie and Ralph Wilkes 2:06¼, and that have a similar blood inheritance are very liable to produce high-class trotters, and so are mares that are such inveterate pullers on the bit as to make them unfit for pleasure driving on the road or successful race winners, provided they have the right kind of blood inheritance.

The man whose farm is capable of carrying forty head and who starts with ten mares, if he has good luck, will probably raise on an average six foals a year. If he keeps these foals until maturity or until they are five years old and fits them for the market his farm will then be fully stocked. It is probable, however, that he may find customers for some of his most promising youngsters at good prices before that time, provided they are well entered in futurity stakes, but the beginner should not make too much calculation upon tbat. He should always be ready to sell when a good price is offered, except perhaps in the case of a few fillies each year, that he may wish to reserve for brood mares. Unless he has a large bank account or a sure income of good proportions from some other source than his farm he should guard against hecoming so overstocked as to be compelled to sell. Forced sales, as a rule, mean to the seller ruinous prices, that are far helow the actual cost of production. There is more profit, or at least less risk of loss, in raising a few first-class, choice animals than a great number of an ordinary or medium-grade.

Those who breed on a small scale should endeavor to combine as many desirable qualities as possible in the animals. A good horse of good size will always sell for more money in the market than a small animal of equal speed and quality. Quality and finish, however, will always command higher prices than size, either for the track or road.

A small sized, trim built, stylish animal that is noted for quality and finish will always outsell a large, coarse horse of equal speed, that is lacking in quality and finish.

The average size of the offspring of a sire and dam can be increased by generous and judicious forage and grain rations, after the foal is weaned. The only way to improve quality, however, is by selecting animale that possess the desired attrihutes in a high degree, and whose ancestors were noted for quality.

o

Director Cbarles Paine of the State Agricultural Society, has been authorized by Crouch & Sons of Lafayette, Indiana, one of the biggest and most important firms in the country devoted to the importation of big coach and draft horses, to offer special premlums to exhibltors of these animals. These prizes are up in addition to the premiums for the get and also for the mares bred to the imported coach and draft animals brought into this country hy Crouch & Sons. The premiums will take the form of cups and other handsome prizes, and will be an added inducement to the horse lovers to exhlbit their big animals.

o

Spanish Queen has about won herself out for Geo. Estabrook of Denver and will have a pretty good balance to her credit before the season is ended.

SADDLE HORSE REGISTRATION.

The Chicago Breeders Gazette of July 29th, contained the following:

After April of next year the register of the American Saddle Horse Breeders' Association will accept pedigrees under only two rules. The first rule is that the horse must have a registered sire and a registered dam. The second rule is that the horse must have a registered and dam that is a thoroughbred and registered in the American Stud Book. The thoroughbred is the fountainhead of the saddle horse and the decision to accept the blood of the running horse through dams that are recorded in the American Stud Book for thoroughbreds was very logical. Experiments with the introduction of trotting blood in the attempt to produce high-class saddle horses have not been crowned with much success, but the opening of the door to the progeny of thoroughbred mares was one of the wisest decisions ever reached by a pedigree register association. It is harking back to the foundation blood of the breed, and affords breeders a wide field for the extension of their operations which had in some instances become too much hampered by inbreeding. These two rules will apply next year to stallions, mares and geldings.

Meanwhile, recognizing the conversatism of the Southern character, and knowing that some valuable strains of saddle blood had not been brought within the covers of the register either on account of ignorance of the value of registration or indifference to it, the association authorized its executive committee to admit to registration in tbe fortbcoming volume the pedigrees of stallions and mares which were worthy of acceptance, before the doors were finally shut against all except those descended from horses already on record. The time for application for this "special dispensation" expired July 1st, and the executive committee has devoted two sessions to a consideration of the applications. Something like half a hundred applications were accepted after a rigid scrutiny under standards formulated by the committee which would insure a large preponderance of saddle horse blood. Especially was the standard for stallions applied rigidly. Some seemingly useful stallions were denied registration because they were not sired by a registered saddle stallion. No stallion was admitted unless his pedigree complied with that condition. More latitude was allowed with mares, but care was taken that recognized saddle horse blood was present in the pedigrees of accepted mares in such degree as would insure against disappointment when those mares were put to stud duty. Blood has long been the foundation of the registration in this book and the executive committee has done its work well, with due regard to this fact.

The anti-betting race track legislation of New York State has greatly alarmed Kentucky breeders of thoroughbreds, and the industry threatens to become pretty well demoralized, unless a way out of the difficulty can be devised. Whatever the final effect of this legislation on tbe breeding of thoroughbreds—and we do not share the belief that it will be wholly destructive—it will certainly stimulate markedly the production of saddle horses. Under the rule admitting to registry in the saddle horse book the progeny of a thoroughbred mare, got by a registered saddle stallion, a large number of thoroughbred mares will he stinted next season to saddle stallions. One Kentuckian who is well posted, estimates that at least 500 such mares will be bred in 1909 to saddle stallions. Already one of the most famous saddle stallions in Kentucky, which has acquired a reputation for siring big, well-built and good-acting horses, has been leased for next season by two owners of thoroughbred mares for exclusive use in their own studs, and it is probable that the services of all the high-class saddle horse sires will be taxed to their limit by the bookings of owners of thoroughbred mares. Whatever may be the competition of mechanical devices with the carriage horse, invention holds out no threat to the breeder of saddle horses. The bicycle long since ran its losing race against the saddle horse and the demand for saddle horses was never broaded and keener, or at hetter prices. When such horses as the famous Carolina, whose superb front affords the subject of our cover page illustration this week, may be produced by skillful breeders of saddle horses, a permanent market is assured—and a market not limited to this continent. The more general use of thoroughbred blood will extend markets over seas for our saddle horse.

o

Mrs. Carrie E. Shreve of Cathlamet, Washington, who recently purchased the filly Ruby Light from Lou Crellin of Pleasanton, for $600, has been offered $1,250 for the filly by Mr. W. T. McBride of Portland, Oregon, who is the owner of the good two-year-old Bonnie McKinney also the mare Peaches, in Henry Helman's string. Mr. Shreve says that while $1,250 seems a good price for a four months old filly, sbe considers her worth more, as her sire Aerolite (3) 2:05½ is surely a two-minute pacer. Aerolite's dam Trix is the dam also of Mona Wilkes 2:03¼ and Moortrix (3) 2:14¼, and Ruby Light's dam Bertha is the greatest broodmare in the world. By all laws of heredity Ruby Light should produce a 2:10 performer every time she has a foal from a good stallion.

o

Klatawah 2:05½ is siring speed. A three-year-old by him trotted a mile in 2:12½ at Springfield, Illinois, and was a close second to Justo a heat in 2:11¼.

FROM SOUTHERN CALIFORNIA.

Los Angeles, Aug. 9.—There is plenty going on at Agricultural Park these days, even if a great many of the horses are away at the races in different parts of the country. There are a number of matinee horses being worked enough to keep them in condition and a few weeks preparation will key them up to their speed and fit them to answer when the bell rings.

The yearlings and two-year-olds are out in force every day and a more promising lot would be difficult to find at any track. Every one of them is good gaited and the majority exceptionally so, and nearly all are capable of showing a 2:40 gait in spots and some faster time. As for the two-year-olds it is doubtful if their own trainers know how fast they are, for they have not been "strung out" for a full mile, but halves in 1:08 on a trot and 1:05 on a pace gives a pretty fair idea of tbeir class.

Elleen, owned by C. A. Canfield, is a flashy looking iltle lady. She is a very strongly-built, compact filly with quarters, chest and shoulders like a two-year-old but relieved by a fine head and neck. She has a long swinging gait and acts like an aged horse when turned for the word. Walter Maben has been a quarter in 0:40 seconds with her.

Modista is another yearling that belongs to the same owner and is by the same horse, her dam being Sue 2:12¼ by Athadon. She is a big rangy bay with a star and white strip in her face, is gaited for speed, yet goes close to the ground and looks racy all over. The first time she was hooked to a light cart she stepped a quarter in 43 seconds and has been improving ever since. Neither of these youngsters are afraid of anything on the road or streets and in the stalls are like pet dogs, even witb strangers.

Charles H. Tbayer is the owner and trainer of a colt that invariably attracts attention whenever he appears on the track. He is a jet black stud hy Thayer's stallion Six Bells, his dam by Rex Gifford 2:14. He is named Paradise Bells, and looks more like a two-year-old and a big one at that, for he stands 15½ hands and weighs 870 pounds. He is not a bit awkward or clumsy and is rangy built, with an almost thoroughbred head and neck. He carries himself like a drum major wben going and does not wear boots. The second time he was asked, he negotiated the quarter in 39¾ seconds. When startled at anything, instead of breaking he tries to get away from the object on a trot.

Lottie Linwood is a chestnut as pretty as her name. She is marked a good deal like Elleen and is a full sister to Sonoma Girl. She is a strong built filly and beautifully gaited. George A. Pounder let her step a quarter in 35 seconds, a 2:20 gait, before he went out on the circuit with his string.

Walter Maben received yesterday a big brown yearling colt hy Zomhro to break and handle from J. H. Bohan. He is not yet halter broken.

The filly by Searchlight, dam Fiesta, tbat Bohan sold to T. A. Ramsey of Riverside last Spring, won her first race last week, taking a mark of 2:19 flat, thus putting Fiesta in the great hrood mare list. Mr. Bohan's mare Rapidan Dillon, hy Sidney Dillon, work-a mile recently iu 2:10¼, last half in 1:04, last quarter in 31 seconds.

Zombro has nineteen of his get in the list now, six having achieved that distinction already this season. If he only had the chance he deserves, he would probably be one of the great sires of this country.

Radium, by Stowaway, a four-year-old belonging to A. W. Kirkland, was recently worked a mile by Trainer Mosher in 2:14¼, last quarter in 31¾ seconds on a pace.

Ted Hayes shipped Buck and Richie Baron to Oakland Thursday evening to join Alsandra and these will be taken up through Oregon and Washington.

J. E. Heller will not start his colt Hal McKinney, by Hal B. 2:04½ as he intends startiug him next year against world's record for three-year-olds (2:05½) that has been held by Klatawah for over ten years. This colt has been a half in 1:04, a quarter in 30½ seconds aud an eighth in 14¾ seconds this year, and a number of miles round 2:16.

Three days after his race at Santa Rosa, where he got a record of 2:12. Alsandra was worked a mile by his owner and trainer, Ted Hayes, in 2:09, last half in 1:02½ and the last quarter in 30 seconds. Tbat should be speed enough for the slow classes and stakes he is eutered in through the northern circuit.

Modicum 2:17¼ trotting, has been bred to Alsandra and bas been turned out for the season. Hays bas turned over to Norton, who has W. A. Clark's colts in charge, his yearling Viaticum who went a mile this summer in 2:38 and half mile in 1:15.

The trotting horse enthusiasts who went from here to the Santa Rosa meeting say they all had a good time and saw two or three exceptionally good races and any number of good horses, how good they did not find out till too late to save the money they had played on Sir John S., Alsandra and Emily W. They declare that J. C. Kirkpatrick, the manager of the Palace Hotel in San Francisco, has the best green pacer out this year in the West, if not the best ever out here. He is a typical McKinney called Charlie D. and is entered in al the slow stakes.—The Times.

o

George G. 2:05¼ has recovered from the lameness which caused him to be declared out of the $500 handicap and while he is as fat as a pig has been a quarter in 29½ recently.

THE FARM

PURE BRED SHEEP ON NATIONAL FOREIGN RANGES.

Many sheep breeders, especially those of the East, will be surprised to learn that pure bred registered sheep may be raised and run on the open ranges of the west in large bands without any diminution in the grade or quality of the product as compared to the parent dams and sires with which the flocks were started. The first requisite, however, is that an entirely satisfactory range, properly protected from the intrusion of other flocks and upon which there is certain to be the necessary amount of forage, water, etc., must be assured. At the present time this condition exists only upon private lands and within the National Forests of the west which are under the administration of the Forest Service.

A noteworthy example of what can be accomplished in breeding high-grade sheep on properly controlled open range is that of Allen Bros., who graze about 3,000 head of registered Cotswold sheep within the Uinta National Forest in the State of Utah. These bands are the increase of about 200 head of prize winning stock from the Royal Stock show in England and the International show at Chicago, purchased and imported to Utah by Allen Bros. since 1892. They have been grazed within the Uinta National Forest since 1903, upon ranges which are practically ideal for sheep grazing purposes, being well watered, grassed, and shaded, and protected from the grazing of other sheep. Careful breeding is developing a pure bred type of Cotswold entirely adapted to western range conditions, yet equal to anything raised under fences in the eastern United States or in European countries.

This is a simple case that demonstrates what range control within the National Forests is enabling the stockmen of the west to do. There are quicker and greater returns to be secured from the raising of high-grade stock than from inferior mongrel breeds, but in many sections stockmen have hesitated to invest in registered sires and dams because of the uncertainty of securing ranges upon which feed and water are absolutely assured and without which such ventures would not be remunerative or so successful as the running of inferior grades of stock better adapted to the severe range conditions that are commonly encountered because of over-stocking and lack of control.

On National Forest ranges the number of stock allowed is only what the range is sufficient to sustain under all conditions, and a stockman who secures a permit to graze stock on these ranges may embark upon the business of raising high-grade cattle and sheep with every reasonable assurance of success.

ALFALFA PALACE PLANNED.

While "corn is king" alfalfa is undoubtedly "queen" in the western states and to his queen, King Corn is to build a palace in Omaha which will be one of the special features of the National Corn Exposition to be held there December 9 to 19. The "Alfalfa Palace" is being planned by the directors of the corn show because of the increasing interest in the crop and its growing importance as a food for cattle. The palace is to be built of bales of alfalfa and lined with exhibits of alfalfa and other grasses. Valuable premiums are to be offered for the best types of the alfalfa plant, and many

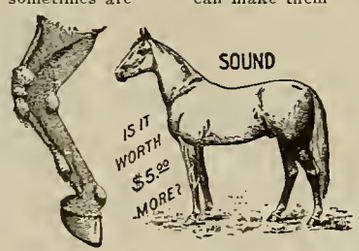
"SAVE-THE-HORSE"
Registered Trade Mark
SPAVIN CURE
As they sometimes are — As "Save-the-Horse" can make them



CHAS. TAYLOR & CO., Broomcorn Brokers.
Arthur, Ill.—Your Save-the-Horse was recommended by Mr. Checkley, now postmaster of Mattoon, Ill., for Curb, and after using the medicine as per directions in three weeks the lameness and enlargement had completely disappeared and have never returned, and that was five years ago. Since then I have used it on a badly strained leg, which threatened to result in a Bog Spavin and Thoroughpin, with a complete cure. I am driving a little road mare to-day which I cured of a Bone Spavin which had refused to yield to Biniodide of Mercury and Cantharides and a rigid firing with a red hot No. 8 wire.
CHAS. TAYLOR.

BROOKSIDE MILLS.
Knoxville, Tenn.—Please forward one bottle of your Spavin Cure. I used a bottle some time ago, and I am glad to report that it entirely cured my horse of ringbone. WM. T. LANG.

Our guarantee is not mere words, mind you, but a signed contract, made absolutely legally binding to protect purchaser to treat any case named in the document.

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it.

At Druggists and Dealers or Express Paid.

STUD BOOKS FOR SALE.
The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.
Address this office,
BREEDER and SPORTSMAN.

For Sale or Trade.
A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.
SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.
Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best-bred and best individuals on the Coast. Write for particulars. Address,
THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.
Higbfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.
My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

"HOWARD SHORTHORNS"-QUINTD HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.

JACK FOR SALE.
Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to
S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.
A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

Stallion for Sale.
Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:06½, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13¼ and Pinkey H. 2:17. This colt is a beautiful dark chestnut, with a great deal of knee and hock action, and in good bands would make a show horse. Will castrate him and break to saddle if any one wants him that way. Is a very attractive and stylish fellow.
For prices and other particulars address
Dr. A. De FDE, Box 38, Pleasanton, Cal.

FOR SALE CHEAP.
Handsome bay mare, seven years old, about 16 hands high. Sound, well broken and gentle in every way. Sired by Chas. Derby, dam Allie Stokum by Richard's Elector. High-class road mare and a good prospect for a race mare. With three months' work last year, trotted a mile in 2:18, half in 1:06, driven by an amateur. I will also sell a fine set of harness and pneumatic tired buggy, good as new. To see the horse, etc., and for further particulars write or apply to
W. DIXON,
2310 Encinal Ave., Alameda, Cal.

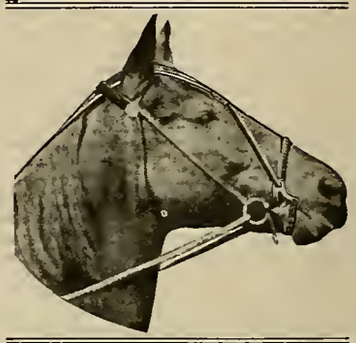
Ellis' Improved Hutton Patent Checking Device
Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts, and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.
Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

growers will secure hay presses and modern machines for baling the alfalfa. Much attention is to be given alfalfa at the National Corn Exhibition as it is now recognized that it is a necessary food for stock. The best authorities have demonstrated that cattle cannot use to advantage all the carbo-hydrates and oil in corn without a protein ration. It is a waste to feed straight corn to stock in preparing them for market and the big packing houses are now paying better prices for the stock fattened on a mixture of corn and alfalfa. Then the mixture is cheaper. Few feeders are still of the opinion that they can afford to feed straight corn worth from 60 to 65 cents per bushel to cattle for which they receive from $6.50 to $8 at the outside. For this reason those interested in agriculture are to secure exhibits and give demonstrations of interest to every grower or feeder of alfalfa, when the big palace is opened at Omaha in December.

---o---

DOING UP THE WOOL.

Washing sheep has entirely gone out of practice in the west within the past twenty years but it still pays well to keep the wool free from all unnecessary filth, straw, burrs, etc., and it pays, too, to put it up neatly and with only the white clean inside exposed. Neglect of these little costless things often takes from 1 to 5 cents from the price of a clip; only when wool is very high and many bidders are trying to get it, do these things fail to cost dearly.

In handling wool, it must be remembered that the white clean surface from next to the sheep is always more or less oily, and that if it only touches the floor, all the dust and litter there is sure to be picked up and the appearance of the wool seriously injured.

If the wool is to be stored away at all before being sacked, too much pains can not be taken to keep the white surface of the well-done-up fleece as clean and white as when it came from the sheep. If clean horse blankets, sacks or wool bags can not be had on which to pile the wool, it will pay to spread both under and over the wool some old news or building paper, and if the room in which the wool is stored is not wind and dust proof, the top of the pile should be well covered with something.

By far the better way is to have wool sacks handy and sack the wool as it comes from the sheep.

---o---

Save some of the best young hens for breeding purposes. Eggs from thrifty 2-year-old hens are pretty sure to hatch.

---o---

Poultry manure is worth not less than $12 a ton. But if you store it where it will get wet, it will not be worth much of anything.

---o---

You might about as well throw your hen manure into the creek as to mix it with ashes or lime. Peat or muck is the best to use as an absorbent.

---o---

Underfeeding stunts growth and over feeding is a waste of food and of time.

Second Southern Oregon District Fair
MARSHFIELD, ORE.

Aug. 26 to 29, '08.

Entries close Aug. 25, '08

SPEED PROGRAMME

Wednesday, Aug. 26th.

Race No. 1—Pacing—Eligible to 2:15 class, best 3 in 5, purse $400.
Race No. 2—Pacing—3-year-olds and under owned in district, best 2 in 3, hobbles barred, purse $200.
Race No. 3—Running—7-8 mile dash, purse $150.
Race No. 4—Running—3-8 mile dash, purse $150.

Thursday, 27th.

Race No. 5—Trotting—3-minute class, best 2 in 3, horses owned in district January 1, 1908, purse $200.
Race No. 6—Pacing—2:40 class, best 2 in 3, hobbles barred, purse $300.

Race No. 8—Running—5-8 mile, 3-year-olds and up, purse $200.

Friday, 28th.

Race No. 9—Trotting—3-year-olds and under, best 2 in 3, purse $100.
Race No. 10—Merchant's Stake—Trotting—2:25 class, best 3 in 5, purse $400.
Race No. 11—Running—½ mile, best 2 in 3, purse $200.
Race No. 12—Running—½ mile, 4-year-olds and under, owned in Coos county, entrance closing August 15, purse $200.

Saturday, 29th.

Race No. 13—Trotting—2:40 class, best 2 in 3, purse $300.
Race No. 14—Coos County Derby—Running—1 1-8 mile, owned in District January 1, 1908, purse $100.
Race No. 15—Running—3-8 mile, 2-year-olds, owned in district, purse $100.
Race No. 16—Running—½ mile, Consolation for Non-winners, purse $150.

CONDITIONS:

All harness races to be governed by the American Trotting Association rules as far as practicable. All harness races to be mile heats. All entries to close with the secretary at the fair grounds at 12 o'clock, noon, **August 25th.**

Entrance in all purse races five per cent of the amount of the purse, and five per cent for winners; four or more to enter and three to start. No money given for a walkover. Entries not accompanied by the money will not be recognized. Nominations to be made in writing, giving the name, age, color, sex, sire, dam (if known, and where not known the fact shall be stated) and colors of the driver. This rule will be strictly enforced. In case the purses above given do not fill with four complete entries, the board has the power to reduce the amounts of the purses as in its judgment seems proper. The board reserves the right to declare a race off or postponed on account of inclement weather. Any horse distancing the field shall be entitled to first and third money only. In all purse races for harness horses the winning horse to have 60 per cent, the second 30 per cent, and third 10 per cent of purse offered, for running races 70 per cent to the first, 20 per cent to the second and 10 per cent to the third horse.

Except as above in all running races rules of the California Jockey Club will govern as far as practicable.

How to get to Marshfield: Take Coos Bay Steamers from San Francisco: M. F. Plant, Eureka and Czarina. Fare on horses $10 and up, according to valuation. Passengers $10.

From Portland: Take steamers Breakwater and Alliance, or any other steamer plying between Portland and Coos Bay. Fare on horses, $10 and up, according to valuation. Passengers, $10.

Address all communications to

FRANK G. MICELLI, Secy., Marshfield, Oregon.

Or **WALTER LYON,** Asst. Secy., Marshfield, Oregon.

BEST FOR LEAST MONEY

JOHN MIDDLING'S

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

Send for catalogue and prices to

JOHN MIDDLING, White Pigeon, Mich.

Washington McKinney 35751

At the Breeders meeting held on the historic Santa Rosa Stock Farm track, July 29 to Aug. 2, we gave standard records to the following sons and daughters of Washington McKinney—only two of which ever had any training until this year:

Belle of Washington 2:26½	**Donello 2:30**
Ray McKinney 2:28½	**Rex McKinney 2:29¾**
Fabia McKinney 2:19¾	**Reed McKinney 2:29½**
Harry McKinney 2:29¾	**May Randall 2:22**

and reduced the record of McKinney Belle from 2:30 to 2:19.

During this meeting Lady McKinney was second to Easter Bells in 2:12½, 2:11½, 2:11½. Lady McKinney, timed separately, trotted the three heats in 2:10½, 2:10¾ and 2:11.

Washington McKinney having closed his season at Santa Rosa will be shown at

CHICO, Aug. 17-22

Campbell's EMOLLIC IODOFORM Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.

PRICE—25c, 50c and $1.00.

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

Jas. B. Campbell & Co., Manufacturers, 418 W. Madison St., Chicago, Illinois.

We have a few weanlings and some breeding stock for sale at reasonable prices

When writing kindly mention this journal. The Empire City Farms, Cuba, New York.

Without the shepherd dog the sheep business would be an expensive proposition in the mountains. Taken when they are young these dogs are trained to follow sheep and hunt them when they go astray. The dog will climb cliffs where a man cannot go, find a stray sheep and bring it down. If it were not for these dogs, therefore, many would stray off and become lost from the flock, fall into the way of wolves and other enemies and be killed. One herder usually takes about 1000 sheep and two dogs. The herder is also armed with a good gun. The custom is to round up the flock every night and have one particular bedground. The sheep are anxious to get together, as they seem to realize that it is for their safety. If a disturbance occurs at night the dogs are first to discover it and at once set out to find the enemy. They also bring back the sheep if they have been scattered.

The man who raises grain often loses sight of the fact that each kernel, whether of wheat, oats or corn, has an individuality of its own: that comparatively few of them are superior: that a large proportion of them are inferior and that all others are only of medium quality. If a farmer has a reasonably good variety of grain it will not pay him to discard it and purchase some new strain. If he will go to work and grade his seed by means of a good fanning mill, take out from five to ten per cent of the very best kernels from his wheat, his oats and his barley bins he can raise wheat worth while.

The Southdown is one of our best mutton sheep. Its flesh is tender, juicy, fine grained, of good flavor and yields a large proportion of good meat both to live and dead weights. They are the smallest of medium wooled breeds that have been imported into this country, but owing to their compact form they weigh remarkably well in proportion to their size.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

SHORT-HORN SALE

at Woodland, Cal., Saturday, Sept. 12

We will offer the entire Enterprise Herd, including the herd bulls and show cattle of last season. We do not hesitate to say that this is the best bred and best individual collection ever assigned to public sale on the Coast.

36——BULLS——36

They are the kind and type the farmers and rangemen are looking for. They are Eastern bulls thoroughly acclimated, of serviceable age, large, strong, and thrifty. This lot was personally selected by Mr. Dunlap from prominent breeders in the East, this being his eighteenth shipment. They have been fed no grain since reaching this coast, simply good pasture and alfalfa hay and will be presented in the best possible condition for future use. This is undoubtedly the best lot of range bulls ever offered on the Coast.

Sale to be held on the Enterprise Stock Farm, 4 miles south of Woodland. Busses will meet all trains at Woodland and lunch will be served on the farm. Sale to begin at 12:30 p. m. All are cordially invited to attend. Write for descriptive catalogue mentioning this paper. Catalogues ready Aug. 20th.

Auctioneer. H. P. EAKLE, Jr.
G. P. Bellows, Maryville, Mo. R. M. DUNLAP.

T. B. Gibson, Woodland, Cal., will sell the preceding day, Sept. 11th. Parties wishing can attend both sales.

Branch Hospital, corner Webster and Chestnut Streets,

SAN FRANCISCO, CAL.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

R. V. HALTON, Manager,
Hotel Belvedere,
Belvedere, California.

Veterinary Dentistry

INTERNATIONAL STOCK FOOD CO., Minneapolis, Minn.

CASH CAPITAL $2,000,000 LARGEST IN THE WORLD

M. W. Savage, sole owner of "International Stock Food," and also of "International Stock Food Farm," positively Guarantees that His World Famous Champion Stallions, Dan Patch 1:55, Cresceus 2:02¼, Directum 2:05¼ and Arion 2:07¾ and his brood mares and colts eat it every day. You are specially invited to visit this Great Harness Horse Breeding Farm ten miles from Minneapolis, and see the practical results of the every day use of the greatest purely vegetable animal tonic ever used on a farm. It is constantly used and strongly endorsed by over Two Million of the most up-to-date Stockmen and Horse Breeders of the world.

THE GREAT ANIMAL TONIC

The Kind That Dan Patch Has Eaten Every Day since 1902 and during this time Dan has broken the world's record 12 times and Astonished The Entire World with his wonderful condition, endurance and speed. Try It For Your Horses. Up to the close of 1907 Dan Patch has paced 10 miles averaging 1:56 2-5 and 20 miles averaging 1:57 2-5 and 31 miles averaging 1:58 1-10 and 62 miles averaging 1:59 68-100. These miles were paced over all kinds of tracks and in all kinds of weather. Dan is faster than ever. ☞ Look Out For A Mile In 1:54 during 1908. The combined records of all pacers and trotters that have ever lived do not equal Dan's record. International Stock Food tones up the system, purifies the blood, greatly aids digestion and assimilation and causes animals to obtain more nutrition from all grain eaten. It tones up and permanently strengthens the entire system, keeps stock healthy and saves grain by aiding digestion. It gives more "nerve force" which insures more speed for horses. **It Will Make Your Horse Two To Five Seconds Faster.** We guarantee 250,000 Dealers to Refund Purchasers' Money if it Ever Fails. NAME THIS PAPER and we will ALSO MAIL YOU FREE a Large Colored Lithograph showing Farm, Stable and Fine Pictures of the Four Stallions named above. These Beautiful Pictures are made from life. YOU WILL BE PLEASED WITH BOTH PICTURES.

Dana Patch 2:05¼, the Gamest and Fastest green Pacer racing in 1907, has eaten International Stock Food every day for over two years. This remarkable pacer was sired by Dan Patch 1:55, has paced in 2:03¾ and promises to be the Next Two Minute Pacer. Dan Patch 1:55, the champion pacer and Fastest Harness Horse the world has ever seen is proving to be a Wonderful Sire of uniform speed. Watch his list as proof that he is one of the Greatest Sires in all horse history. If you raise a Dan Patch colt you have an Absolutely Sure Winner. Dana Patch just sold for $10,000.00. "From a Good Mare you may raise a Dan Patch colt that will bring you from $10,000.00 to $50,000.00.

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

THE CALIFORNIA STATE FAIR is the next place where the trotters and pacers that have been putting up such wonderful racing at Santa Rosa, Oakland and Chico will be seen. The racing opens on Saturday next with the Occident Stake for three-year-olds as the drawing card, and as there are several likely starters in the event that have not appeared in any of the colt stakes so far trotted this year, the race will have an added interest. It is the richest stake for three-year-old trotters on the coast, and will this year have a value of nearly $3000 to the winner. The State Fair promises to be the best that has been given in many years. Live stock of all kinds will be shown in large numbers and the display of agricultural and other products of the state will be very extensive. Our readers cannot enjoy a more profitable week than one spent in Sacramento during the State Fair, which will open on Saturday, August 29th, and close the following Saturday. Reduced rates will be given on all railroads.

THREE ADDITIONAL PURSES are advertised this week by the Tulare, Fresno and Bakersfield associations, the same purses to be given by each. They are for $500 each and for the free-for-all pacers, the 2:14 class pacers and the 2:09 class trotters. Entries do not close until September 7th, which is after the horses move north to Oregon that are to be raced there. This will give all the fastest trotters and pacers who remain here in California an opportunity to race on the Central California circuit of fairs, where there are always big crowds and good tracks to race over. Horsemen are advised to look over the advertisement in this issue and make entries by September 7th.

Jonesa Basler 2:05¾ by Robert Basler, and Richard B. 2:17½ by Woolsey, have been matched to race at Hudnut Park, Bakersfield, during the latter part of September. There has been considerable rivalry between the owners of these two horses for some time and the question of which is the faster of the two, can only be settled by a race.

Drink Jackson's Napa Soda.

GREAT RACING AT CHICO.

Trotters and Pacers Lower Records in Split Heat Races on New Track.

(By Ben Allen.)

CHICO, Aug. 20.—One hardly knows how to divide the triumph which came to the Breeders' Association and the new Chico track at Speedway when the nineteenth annual meet of the Pacific Coast Trotting Horse Breeders' Association began here yesterday. The track was lightning fast, the weather perfect for racing, and the crowd hungry for the sport of his majesty, the light harness horse.

The new track at Speedway had been heralded as fast, but the horsemen could not believe that a course which was a grain field only last April could be tranformed into more than a mediocre track in such a short time, but the first day's racing proved that it is all its promoters claimed for it and a little more.

L. B. Daniels had charge of the construction of the track, and the veteran horseman certainly showed that he knew his business. As soon as the drivers made one circuit of the speedway they began to wax enthusiastic, and their praises of the track can be heard on all sides.

The attendance was good on the first day, and the tumultous applause that greeted the grand racing of the afternoon would have done credit to a crowd of double the size. One five and one six-heat race for the first day was a brilliant start, and the soft twilight of the Sacramento valley was falling when the heroic old campaigner John R. Conway came under the wire the winner of the sixth heat of one of the grandest races ever witnessed on a California track. And this was on top of a five-heat race in the 2:14 trot, the second heat of which was stepped in 2:08 by the phenomenal McKinney mare Berta Mac.

When the horses were called out for the 2:14 trot three starters appeared, Vallejo Girl being excused by the judges. Berta Mac, driven by Helman, was equal favorite with Nogi, the bay stallion being in the hands of S. C. Walton. The mare behaved very badly in this heat, leaving her feet no less than three times during the circuit of the track. Nogi, nicely driven by Walton, was extended to win. Berta Mac managed to take second from Ritchie Baron, which was outclassed throughout the race.

For the second heat Nogi again went out in front and led the fast mare by two lengths to the half pole. Here the fleet daughter of McKinney let out a wrap, and when the home stretch was reached she was working like one of a team with the handsome bay stallion. Then a fight began down the stretch with both drivers earning their pay, but the effort was too much for Nogi, and as he tired Berta crossed the line an easy winner by a length. When the time of 2:08, the fastest heat trotted in a race on this coast this season, was hung out the crowd cheered wildly.

In the third heat the interest was at a fever heat, and the mare seemed to know it, for she was slightly flighty. She went out in front and held good until the three-quarter pole, when the little bay stallion began to creep up on her. It was a pretty fight down the stretch, but Berta left her feet at the flag, and Nogi flashed under the wire an easy winner in 2:11.

The belief was general that the mare would go to pieces in the fourth heat, but Helman held her in the lead going nicely until the half was reached, when she again left her feet, and Nogi was a length to the good when she caught. Her nose was at Nogi's sulky when they swung into the stretch, and Walton sought to stave off her rush by going to the whip. But again the stallion faded at the flag, and Berta evened up the heats by winning in hollow style in 2:11.

Berta was not to be denied in the fifth and deciding heat of the race. She went out in front, and although she repeated her trick of breaking at the half pole she caught so quickly that she kept the lead to the end, winning by four lengths in 2:12.

The second race, the 2:20 trot for the $2000 California stakes is easy to describe, for there was nothing to it but Ward's good mare Emily W. from start to finish. May T. showed a flash of her real class by taking second in the third heat and forcing the winner to trot in 2:11½, the fastest heat of the race.

The Statesman was scratched in this race, and there was a field of but five starters.

When the 2:08 pacers answered the clang of the starter's bell the noblest struggle of the day began, and when it was over everyone was ready to crown John R. Conway the stoutest hearted horse that ever wore harness.

Moy was scratched, so only five horses faced the starter, but it was a choice field, with Delilah the topheavy favorite. Diabless was taken out in front by Zibbell, and Chadbourne, behind John R. Conway, raced her to the home stretch, where the pair became a team, but Diabless blew up and the chestnut stallion won by four lengths from Delilah, which made a strong finish from an apparently hopeless position in the rear.

John R. led all the way in the second heat and almost walked in when Delilah stopped badly at the seven-eighths pole. Magladi came with a rush from the rear, and took second.

In the third Conway led to the half pole, when Miss Idaho, cleverly driven by Walton, nosed him out of that position. Chadbourne began to lash the game old stallion at the three-quarter pole, and as usual he responded. Seeing he had Miss Idaho beaten, Chadbourne quit pouring in the leather, and Magladi whirled by on the outside, winner by a neck of a heat paced in 2:07.

No longer despising Magladi, Chadbourne, in the fourth heat, kept at the whip until John R. was past the wire, but the judges decided that Ward's brown mare had won by a scant nose. The grandstand thought their hero had won again, but there was no disposition to question the decision of the judges.

Magladi laid back in the fifth heat, but the heroic old John R. was fighting again, and the revivified Delilah had to step in 2:10½ to beat him by a neck.

The fighting stallion had completely won the heart of the crowd, and when it was known that he would have to submit to another whipping finish a cry of pity went up. But, as one horseman put it, John R. likes the whip better than oats, and the grand old stallion took all that Chadbourne could pour into him. It meant a three lengths' victory in the sixth and deciding heat, and when the big chestnut loafed back to his barn he received an ovation that seldom falls to the lot of a horse.

In this race F. E. Ward was fined $50 for laying up Magladi in the first and fifth heats, and Rutherford was fined a like sum for doing the same trick with Delilah in the third.

Summary:

First race—2:14 class trotting; stakes $800; best three in five:

Berta Mac, br. m. by McKinney (Hellman)	2	1	2	1	1
Nogi, b. s. by Athablo (Walton)	1	2	1	2	2
Ritchie Baron, br. g. by Baron Wilkes (Hayes)	3	3	3	3	3

Time—2:10½, 2:08, 2:11, 2:11, 2:12.

Second race—2:20 class trotting; California stakes; best three in five; purse $2000:

Emily W., b. m. by James Madison (Ward)	1	1	1		
Lady Inez, b. m. by Nutwood Wilkes (Cuicello)	3	2	4		
May T., ch. m. by Monterey (Twohig)	5	4	2		
Monicrat, bl. s. by Monwood (Speucer)	2	5	5		
Wenja, b. m. by Zolock (Pounder)	4	3	3		

Time—2:13, 2:13, 2:11½.

Third race—2:08 class paciug; purse $800; best three in five:

John R. Conway, ch. s. by Diablo (Chadbourne)	1	1	2	2	2	1
Magladi, br. m. by Del Norte (Ward)	5	2	1	1	4	3
Delilah, b. m. by Zolock (Rutherford)	2	3	4	3	1	2
Miss Idaho, ch. m. by Nutwood Wilkes (Walton)	4	4	3	4	3	0
Diabless, b. m. by Diablo (Zihbell)	3	5	d			

Time—2:07, 2:09, 2:07, 2:08¼, 2:10½, 2:13½.

As our correspondent's report of the second day's races could not reach us in time for this issue we simply give the summary of the races as reported by telegraph.

Two-year-old trotting division, Pacific Breeders' Futurity Stake No. 6, $1450, best two in three:

Prince Lock, s. c. by Zolock (Pounder)	2	1 1
Ella M. R., b. f. by Lord Alwin (J. Twohig)	1	2 3
All Style, br. c. by Stam B (Quinn)	3	3 2
Easter, b. c. by Monicrat (Rutherford)	4	4 4
Eddie G., b. c. by Tom Smith (Zibbell)	5	5 5

Time—2:16¾, 2:21, 2:18.

2:14 class pacing, purse $800, best three in five:

Memonia, b. m. by D m o (Hoy)	1	1	1
Radium, blk. s. by Stoneway (Mosher)	2	2	3
McFayden, ch. s. by Diablo (Chadbourne)	4	3	2
Rockaway, r. c. by Stoneway (Pounder	3	4	d

Time—2:09½, 2:10¾, 2:11.

Three-year-old pacing division, Pacific Breeders' Futurity Stake No. 5, $1481.50, best three in five:

R y o' Light, b. c. by Searchlight (Whitehead)	1	1	1
Moortrix, b. s. by Azmoor (Chadbourne)	2	2	2
Conqueror, br. c. by Direct Heir (Walker)	3	3	3
On Bly, br. c. by On Stanley (Thornquest)	5	4	4
Captain Gorgaz, br. c. by Marvin Wilkes (Quinn)	4	5	5

Time—2:11, 2:09, 2:09.

—o—

ANSWERS TO CORRESPONDENTS.

A. H. Stevens, Lodi—Zombro won thirteen races out of seventeen starts the year he was three years old, and was three times second. He trotted forty heats in standard time that year and got a record of 2:13.

S. W. L., Corona—Atto Rex 6821 was foaled 1884. He is by Attorney 1005 (Son of Harold 413 and Maud by Abdallah 15) dam by Brougham 800 (son of Hambletonian 10 and mare by Woburn 342 also by Hambletonian 10) second dam Flora, pedigree not traced.

W. A. Stuart, Eureka, Cal.—Horses can be registered as non-standard that are not eligible to registration as standard. By forwarding a certificate of the breeding, together with the fee, to the American Trotting Register Association, any horse not eligible to registration as standard will be registered as non-standard. The 0 in front of the register number of a stallion shows that he is registered as a pacer.

CLOSE OF OAKLAND MEETING.

Some of the Best Racing Ever Seen in California Fails to Draw Large Crowds.

When the meeting advertised to be giveu by the Alameda Fair Association, opened at Oakland on Wednesday of last week, tbe crowd in the grand stand was the largest that had been attracted to a harness meeting in many years, and those who were acting in the management of the affair for Mr. Ben Benjamin who was aud is yet lying very ill, were of the opinion that the meeting would be successful financially as well as otherwise, but they were doomed to disappointment. The race between Mona Wilkes and Sir John S., which had been expected to furnish a great contest and increase the interest in harness racing, resulted in a fiasco, greatly disappointing many. Then the weather suddenly turned cold, a slight rain fell and heavy wraps were needed for comfort. The attendance fell off one half on the second day, the tbird day was no hetter, and when Saturday came with no feature event that could be depended upon to act as a drawing card, it was a foregone couclusion that the horsemen who had agreed to accept a reduction in the purses rather than to have no racing at all, would not get very much for their efforts. After collecting all available assets, not counting entrance fees unpaid, it was found there was only enough money to pay sixty per cent of the purses to those who had won them. To the everlasting credit of the horsemen however, nearly every man of them accepted the reduction with good grace and expressed themselves as pleased to have aided in carrying out a plan that left no discounts or any bills but their own.

Had Mr. Benjamin kept his health there is little doubt but he would have carried the meeting through to a successful termination, but many features he had intended to introduce could not be carried out by those who accepted the task of conducting the meeting and there was nothing left to do but to hold the races and let the horsemen suffer the loss. There is considerable entrance money yet due Mr. Benjamin and if this is all collected the purse winners will receive over 80 per cent of the amounts won.

The racing was excellent every day. Meetings are rarely given anywhere that have as large a proportion of close contests as were witnessed at Oakland. Head and head finishes were of daily occurrence, and there was not an event on the regular program where anyone was not trying to win. But one instance occurred during the entire week that gave any race the appearance of not being strictly on the square, and in this the driver was severely punished.

The races of Wednesday and Thursday were fully described in our columns last week. The meeting opened Friday with an attendance of less than 1,000, there being not quite three hundred paid admissions.

The first race on the card was the consolation of $500 for horses that won no money in the 2:20 class trot on Wednesday. There were but three starters in this event, May T. by Monterey, Lady McKinney by Washington McKinney and Judge Dillon by Sidney Dillon. May T. drew the pole and acted badly in scoring, making breaks often and delaying the start, although she seemed to have more speed than either of the others. Lady McKinney was decidedly off and did not show any great speed at any time during the race. When they were finally sent away, May T. was trotting squarely but was three lengths hehind the other two. Lady McKinney swung into the stretch in the lead, and then May T. began to show her speed and one hundred yards from the wire passed Lady McKinney and led her by a length or more. About thirty yards from the goal May T. hroke and as the judges were unanimously of opinion that Twohig made no effort to pull her to her gait, they awarded the heat to Lady McKinney. The time was 2:18¾.

According to the conditions of this race there were to be but two heats. The next heat the driver of May T. took no chances, but got his mare away well and won all the way round, trotting the heat in 2:16¾. He was loudly applauded at the finish.

The next race was the 2:08 pace, and as at Santa Rosa it resulted in a hattle from start to finish. The first and second heats went to Delilah in 2:08¾ and 2:08¼ which was a heart hreaking rate of speed as the track was deep and holding. In the first heat Fred Ward brought Magladi through on the rail as the horses turned into the stretch and had the hottest sort of a finish between Rutherford with Delilah and Chadbourne with Johu R. Conway. Delilah had about half her head in front of Magladi at the wire while Conway was a half length hack. The finish of the second heat was also very close, Conway being second this time, with Magladi third. In the final heat Conway won by a scant margin from Delilah. In every heat of this race the crowd in the grand stand was on its feet cheering the contestants.

There were four starters in the 2:30 class trot, and on his race at Santa Rosa Alsandra 2:12 was made favorite. There was a surprise for the wise ones, however, when the word was given and William Michelsen's big bay gelding Wilmar made a procession of the race with himself as the drum major in each heat. Splendidly driven hy John Quinn, Wilmar trotted all three heats without a hreak or a mistake of any kind, and when the time of the last heat was hung out as 2:14 flat the crowd saw that Wilmar was all that has been claimed for him as a fast trotter, as he could have trotted faster.

The last race of the day, the free-for-all pace for amateur drivers, resulted in the only scandal of the meeting. After Dan Hoffman had finished fifth the first heat and fourth the second heat with his Zombro mare Mary K., he drove her around the others on the far turn in the third heat and led to within forty yards of the judges' stand, where he pulled her up and allowed Toppy to win. As pools had been sold on the race and heat, there was a loud roar from the crowd of angry bettors, and Hoffman was called to the stand. He acknowledged that he had pulled his mare, but offered as excuses that he thought she was about to break, and also that as his mare and Toppy both represented the same driving club, that he did not think he had violated any rule in permitting Toppy to win. The judges considered Hoffman's actions as inexcusable, however, and expelled him, as well as declaring all bets off on the race and the heat.

The first heat of this event was an excellent race between Luke Marisch's Little Dick, driven by Victor Verilhac, and I. L. Borden's Cresco Wilkes, driven by Frank J. Kilpatrick. Cresco Wilkes was short of work and could not last out the mile, but Mr. Kilpatrick drove a great heat with him and landed second in the field of six horses. The second heat went to George Erlin's Toppy in 2:14½, the fastest of the race. Little Dick was second in this heat and evidently tired. The third heat was also won by Toppy, with Mary K. second, Little Dick third and Kitty D. fourth. Cresco Wilkes and Charlie J. were distanced in the second heat. The first and second prizes, silver cups, were awarded to the owners of Toppy and Little Dick, respectively.

Saturday, the last day of the meeting, a large crowd was expected, but only a little over $500 was taken in at the gate, which would be considered large receipts at Santa Rosa, but is not much of a showing for a track located in the midst of over a half million population. The track was heavy and the weather anything but favorable for fast time, but the racing was excellent throughout the day and close finishes were the order in nearly every heat.

In the first event of the day, the Fresno four-year-old Nogi turned the trick on Berta Mac, the McKinney mare that had beaten him at Santa Rosa two weeks hefore, and led her to the wire the first two heats in 2:14½ and 2:13½. In the first heat Berta Mac indulged in several breaks and left the race at the finish to Nogi, Vallejo Girl and Della Derhy, who finished in the order named, with Berta Mac fourth.

In the second heat Helman got Berta Mac trotting more steadily, however, and when the fight came in the stretch she forced Nogi out in 2:13½ ,a good mile for the track, and was not far behind him at the finish.

In the third heat Helman's mare showed her gameness. She kept her feet nearly all the way and also kept close to Nogi, who set out to make the pace. In the hottest sort of a drive in the stretch she beat Nogi out in 2:13½. This race, like several others on the program, ended with three heats, and Nogi was declared the winner of the race, Berta Mac taking second money, Vallejo Girl third, and Della Derhy fourth.

Four pacers that had started in the 2:20 class stake on Thursday and got no money, came out to race for a consolation purse of $500. The conditions limited this race to two heats, but they resulted in close finishes both times. In the first heat George Pounder's Mac O. D. got the verdict from Explosion in a whipping finish. Ben Walker rated the gray ghost Silver Dick along nicely the second heat and in the stretch set out to heat Mac O. D. to the wire. Both horses were driven, and lifted by whip and rein the last hundred yards, while the crowd stood on its feet and cheered them on. Silver Dick got part of his head in front at the wire and won the heat from Mac O. D., while Explosion was third and Joe Robin fourth.

The 2:14 pace for a purse of $900 was raced on the three-heat plan, every heat a race. There were six starters and McFadyen was made the favorite, with Ray O'Light second choice. When the word was given Whitehead took the three-year-old Ray O'Light, out in front, and was closely followed by Sam Hoy with Memonia. Going up the hack stretch Chadbourne, who had dropped to the rear with McFadyen, owing to a hreak, started his horse up to catch the leaders. Just as he started to pass Snyder, driving Wanderer, the hopples on Wanderer broke and the horse swerving, there was a collision between the two. Both went down, but soon got to their feet, held their horses, and led them on around. The heat resulted in a hot finisb between Memonia and Ray O'Light, the former winning by the narrowest sort of a margin in 2:11½, with Rockaway third and Fred W. fourth. On hearing accounts of the accident from Chadbourne and Snyder both were permitted to start again.

In the second heat McFadyen, after being held back to avoid hreaking around the first turn, was driven hard to catch the fast flying leaders, and in the race through the stretch finished second, driving Memonia out in 2:10½, Ray O'Light being third and very close up. Rockaway and Fred W. were distanced in this heat, and Wanderer did not start, being withdrawn.

Having a good position now at the start, Chadbourne drove a careful and well-rated mile in the third heat and beat Ray O'Light out by a narrow margin in 2:13½, Memonia being third. The showing made by Ray O'Light in this race showed him to be a great three-year-old, and it was askiug a good deal of him to race against aged horses.

The last race of the meeting was a cup race for amateur drivers. It was a free-for-all trot. There were three horses entered by members of the Park Amateur Driving Club, and one by the San Francisco Driving Club. D. Hoffman's Dr. Hammond, Charles Gay's Laddie G. and A. Ottinger's Telephone were the representatives of the Park cluh, while Charles Becker's Walter Wilkes was the sole entry from the San Francisco club. No pools were sold on this race. Walter Wilkes was supposed to have the speed of the four, and Mr. Frank J. Kilpatrick, who was driving Dr. Hammond, concluded that the only way to defeat the son of Sable Wilkes would be to trail him to the head of the stretch and then race him through the stretch. When the word was given Walter Wilkes took the lead, as it was thought he would, and Mr. Kilpatrick dropped in behind him witb Dr. Hammond. These positions were maintained until the three-quarter pole was reached. When Mr. Kilpatrick pulled the Derby gelding out to make the race, when the backstrap of the harness broke, and he had about all he could do to keep his horse from breaking and was lucky to get inside the distance at the finish. Laddie G. was second and Telephone third, Walter Wilkes winning in 2:14½, a new record for the brown gelding.

The next two heats, though well contested throughout, were won hy Dr. Hammond in 2:14¾ and 2:18, and Mr. Kilpatrick was congratulated on all sides for his superb reinsmanship, as it was this alone that landed the old campaigner a winner over such a field of horses. The second heat, in 2:14¾, when the condition of the track is considered, is as good a mile as Dr. Hammond ever trotted.

This closed a meeting which, while not a financial success, had resulted in splendid racing on each of tbe four days and done much to revive the popularity of harness racing in this locality.

OLD ASSOCIATION WINS.

The long fight for possession of the Los Angeles Agricultural Park was ended last week when the Supreme Court upheld the decision of the Superior Court of the southern city giving the property to the Sixth District Agricultural Association. This association was organized under the law passed in 1880 authorizing the incorporation of the agricultural districts of the state in order that they might conduct affairs.

When the state ceased to make appropriations for these fairs another corporation, called District Agricultural Association No. 6, took possession of the property. The original directors brought suit against the directors of the new corporation for possession of the park and the rental collected for its use. This suit was won hy the original corporation, and the possessor of the property appealed on the ground that the older association was improperly named. The Supreme Court held that, under the law, there could only be one corporation in each district, and the natural decision was that the first organized is the legal owner of the park. Possession of the property was given to the old association, and it was given judgment for $5484 in rentals.

This decision means that the beautiful grounds in Los Angeles known as Agricultural Park will be retained as a fair grounds for the people of the district and that it will not be cut up into town lots and sold as was threatened. If the same determined fight had been made by the members of the Santa Clara Agricultural Association against the sale of the San Jose fair grounds, that beautiful property would now be owned by the people instead of being cut into lots that people are afraid to buy on account of fear of the title.

MINOR HEIR PACES IN 2:00¼.

But four horses have paced a faster mile than Minor Heir, the son of Heir-at-Law 2:05¾, who in a race against time at Galeshurg, Ill., on August 14th, paced a mile in 2:00¼. The four horses that have beaten this time at the pace are Dan Patch 1:55¼, Auduhon Boy and Star Pointer, whose records of 1:59¼ are the same, and Prince Alert 1:59½. In his trial last week Minor Heir got away fast on the second score, reached the first quarter in 29½ seconds, the half in 58 seconds and the three-quarters in 1:29¾. Tbere was a strong breeze on the back stretch, which caused the slow third quarter. The mile in 2:00¼ shows that the last quarter was paced in 30½ seconds. Those who saw this trial believe that Minor Heir will pace below two minutes this year and be second only to Dan Patch at the close of the seasou.

On hearing of the performance of Minor Heir at Galesburg, the directors of the association at Peoria, Ill., immediately wired the owner of the horse an offer of $2000 for a race to beat his record, the trial to take place during the Great Western Circuit meeting at Peoria Septemher 17th. The offer was accepted.

OFFICIAL SUMMARIES OAKLAND MEETING.

Following are the official summaries of the trotting and pacing events held at Emeryville track, August 12th to 15th, 1908, at the meeting of the Alameda Fair Association:

First Day.

Trotting, Two-Year-Olds, $800:

Prince Lock, ch. g. by Zolock-Naulahka by Nutford (Pounder) 1 1
Queen Alto, br. f. by Iran Alto by Director (Hogoboom) 2 3
Easter, b. c. by Monicrat-Alta Reina by Alto Rex (Rutherford) 3 2
Ella M. R., b. f. by Lord Alwin (Twohig) 5 4
Virginia Lee, b. f. by Iran Alto (Bigelow) 5 4

Time—
First heat, 36, 1:11¾, 1:45¾, 2:21½.
Second heat—:38, 1.15, 1:51½, 2.28.

Trotting, 2:20 Class, $2 500:

Emily W., b. m. by Jas. Madison-Cornelia Rose (Ward) 1 1 5 1
Wenja, blk. m. by Zolock-Naulahka by Nutford (Pounder) 4 2 1 2
Lady Inez, b. m. by Nutwood Wilkes-Cora by Ira (Cnicello) 3 4 2 3
The Statesman, b. s. by Jas. Madison-Creona by Algona (Ivey) 2 5 7 4
Lady McKinney, b. m. by Washington McKinney (Ables) 5 6 4
Monicrat, blk. s. by Monwood (Spencer) 6 3 3
Judge Dillon, ch. s. by Sidney Dillon (Sanford) 7 7 8
May T., ch. m. by Monterey (Twohig) 8 8 6

Last four were ordered to the stables after the third heat.

Time—
First heat—:35, 1:09½, 1:44, 2:17¾.
Second heat—:35½, 1:09½, 1:41½, 2:15½.
Third heat—:34½, 1:08¼, 1:43, 2:18½.
Fourth heat—:35, 1:10¾, 1:43¾, 2:21.

Pacing, Free-for-All, $500:

Mona Wilkes, b. m. by Demonio-Trix by Nutwood Wilkes (Chadbourne) 1 1
Sir John S., b. s. by Diablo-Elisa S. by Alcantara, Jr. (Vance) 2 2

Time—
First heat—:35, 1:06, 1:41, 2:12½.
Second heat—.33, 1:01¾, 1:36, 2:07½.

Second Day.

Three-Year-Olds 2:20 Class Trotting, $900:

Don Reginaldo, br. c. by On Stanley, dam by Raymond (Ward) 1 1 1
Siesta, br. s. by Iran Alto (Davey) 3 2 2
Debutante, b. f. by Kinney Lou (Chadbourne) 2 3 3
Nusado, br. c. by Nushagak (Spencer) 4 4 4

Time—
First heat—:39, 1:15, 1:51½, 2:29¾.
Second heat—:35½, 1:11, 1:49¼, 2:28¾.
Third heat—:36¾, 1:13, 1:51½, 2:31.

2:20 Class Pacing, $2,500:

Charlie D., b. h. by McKinney, dam by Memo (Thompson) 1 1 1
Queen Derby, br. m. by Charles Derby (Cuicello) 6 2 2
Josephine, b. m. by Zolock (Rutherford) 2 4 4
Tom Murphy, b. g. by Gossiper (Chadbourne) 4 3 6
Lettie D., b. m. by Boodle (Davis) 3 5 8
Mae O. D., b. g. by Zolock (Pounder) 5 9 3
Silver Dick, gr. g. by George W. McKinney (Walker) 7 7 5
Freely Red, b. m. by Red Medium (Helman) 8 6 7
Explosion, b. m. by Steinway (Ward) 9 8 9
Joe Robin, blk. g. by Robin (Rodriguez) ....d

Time—
First heat—:34, 1:06¼, 1:39¼, 2:11.
Second heat—:32¾, 1:06, 1:38½, 2:10¼.
Third heat—:33, 1:06¼, 1:38, 2:11¼.

2:09 Class Trotting Stakes, $1,000:

R. Ambush, br. h. by Zolock, dam by Silkwood (Rutherford) 1 2 1
Wild Bell, br. g. by Wildnut (Quinn) 2 1 2
John Caldwell, b. g. by Strathway (Walker) 3 3 3
Athasham, b. s. by Athadon (Walton) 4 4 4

Time—
First heat—:33, 1:05, 1:37¾, 2:10.
Second heat—:33¼, 1:05½, 1:38, 2:11¾.
Third heat—:33, 1:05½, 1:38¾, 2:12.

Against time to beat 2:25¼ pacing:
Zoe W. b. c. by Zombro, dam Lida W. 2:18½ (Twohig) ....won
Time—:36, 1:12¼, 1:47¼, 2:22½.

Third Day.

2:20 Class Trotting, Consolation, $500, Two heats:

May T., ch. m. by Monterey, dam by Nutwood Wilkes (Twohig) 2 1
Lady McKinney, b. m. by Wash. McKinney, dam by Daly (Ables) 1 2
Judge Dillon, ch. s. by Sidney Dillon (Whitehead) 3 3

Time—
First heat—:34¾, 1:10, 1:43, 2:18¾.
Second beat—:35½, 1:09½, 1:44¾, 2:16¾.

2:08 Class Pacing, $900:

Delilah, b. m. by Zolock (Rutherford) 1 1 2
John R. Conway, ch s. by Diablo (Chadbourne) 3 2 1
Magladi, br. m. by Del Norte (Ward) 2 3 3
Miss Idaho ch m. by Nutwood Wilkes (Walton) 4 4 4
Moy, b. m. by Prodigal (Hayes) 5 5 5

Time—
First heat—:31¾, 1:03½, 1:36¼, 2:08¾.
Second heat—:31½, 1:03¾, 1:36½, 2:08¼.
Third beat—:31½, 1:04½, 1:37½ 2:11.

2:30 Class Trotting, $750:

Wilmar, b. g. by Wildnut, Sweetwater by Stamboul (Quinn) 1 1 1
Alsandra, b. s. by Bonnie Direct (Hayes) 3 2 2
Princess Christina, b. m. by Dexter Prince (B. Walker) 2 3 3
Dutch, b. h. by Athby (Snyder) 4 4 4

Time—
First beat—:34, 1:08¾, 1:42½, 2:15.
Second heat—:34¼, 1:08½, 1:41½, 2:17¾.
Third beat—:33½, 1:06½, 1:40, 2:14.

Free-for-All Pacing, Amateur Drivers, Silver Cup:

Toppy ch. g. by Delphi (Erlin) 3 1 1
Little Dick (ch. g. by Dictatus (Verlihac) 1 2 3
Mary K., b. m. by Zombro (D. Hoffman) 5 4 2
Kitty D. ch. m. by Dictatus (A. Hoffman) 6 3 4
Cresco Wilkes, b. s. by Nutwood Wilkes (Kilpatrick) ....2 d
Charley J., blk. g. (Lecarl) ....4 d

Time—
First heat—:32¾, 1:05½, 1.39½, 2:14¾.
Second heat—:33¼, 1:05¾, 1:39½, 2:14½.
Third heat—:33, 1:05½, 1:40½, 2:15½.

Fourth Day.

2:11 Trotting, $900:

Nogi, b. s. by Athablo (Walton) 1 1 2
Berta Mac, br. m. by McKinney (Helman) 4 2 1
Vallejo Girl, br. m. by McKinney (Davey) 2 3 3
Della Derby, blk m. by Chas Derby (Whitehead) 3 1 4

Time—
First heat—:32½, 1:07¼, 1:41¾, 2:14½.
Second heat—:32¼, 1:05, 1:39, 2:13½.
Third heat—:32½, 1:06, 1:40, 2:13½.

2:20 Class Pacing, Consolation, $500, Two heats:

Mae O. D., b. g. by Zolock-Kentucky Belle (Pounder) 1 2
Silver Dick, gr. g. by Geo. W. McKinney (B. Walker) 3 1
Explosion, b. m. by Steinway (Ward) 2 3
Joe Robin, blk. g. by Robin (Rodreguez) 4 4

Time—
First heat—:33½, 1:07¾, 1:40½, 2:14.
Second heat—:33, 1:07, 1:41, 2:14¾.

2:14 Class Pacing, $900:

Memonia, br. m. by Demonio (Hay) 1 1 3
McFadyen, ch. h. by Diablo (Chadbourne) 6 2 1
Ray O'Light br r. by Searchlight (Whitehead) 2 3 2
Rockaway, rn. g. by Stoneway (Pounder) ....3 d
Fred W., b. g. by Robin (Rodriguez) ....4 d
Wanderer, br. g. by Athby (Snyder) ....5 dr

Time—
First heat—:32, 1:05¼, 1:38½, 2:11½.
Second heat—:31½, 1:05, 1:37½, 2:10½.
Third heat—:33½, 1:06, 1:39¼, 2:13½.

Free-for-All Trotting, Amateur Drivers, Silver Cup:

Dr. Hammond, ch. g. by Chas. Derby (F. J. Kilpatrick) 4 1 1
Walter Wilkes, br. g. by Sable Wilkes (C. L. Becker) 1 2 2
Laddie G. br. g. by Zombro (G. R. Gay) 2 3 4
Telephone, b. g. by Direct (A. Ottinger) 3 4 3

Time—
First heat—:33¼, 1:08, 1:41¾, 2:14¾.
Second heat—:33¼, 1:08½, 1:41, 2:14¾.
Third heat—:35, 1:09¾, 1:43½, 2:18.

Against time, to beat 2:30¼ Trotting:
Queen Alto, b. f. foaled 1906, by Iran Alto, dam by Director (Hogoboom) ....won
Time—:35½, 1:11¼, 1:47, 2:21¼.

DURFEE WINS TWICE AT BUFFALO.

The Buffalo Grand Circuit meeting, after being postponed from day to day on account of the weather, was opened on Friday of last week and on that and the following day, six stake races were decided, all the purse events being declared off. There was no betting and less than two thousand persons paid to see the races on the first day, while the attendance on the second day was not much better.

Will Durfee won the 2:06 pace, a $2,000 stake, on the opening day with Copa de Oro, defeating Major Mallow and Darkey Hal. The second day Durfee won the Empire Stake, $10,000 for 2:11 class trotters with Carlokin, beating the gelding Dewitt and seven others in straight heats all below 2:10. In this field were such horses as Locust Jack, Mae Heart and May Earl, the latter considered a rival of Sweet Marie. The results:

August 14th, LaFayette Hotel Stake, 2:24 trot, $2,000:

Spanish Queen, b. m., Geo. H. Eslabrook, Denver, Colo. (Macey) 1 1 1
Bonnie May, b. m. C. M. Lazelle, Whitingville, Mass. (Lazelle) 2 2 3
Nancy Royce, blk. m., W. H. McCarthy, Terre Haute (McCarthy) 3 3 2
Time—2:16¾, 2:17¾, 2:15.
Mochester also finished.

Dominion of Canada Stake, 2:11 pace, $5,000:

The Eel, gr. h., F. W. Entricken, Travistock, Ont. (McEwen) 1 1 1
Jerry B., ch. g., Christian Hill Stable, Dover, N. H. (Cox) 2 2 3
Major Brinno, blk. g., Joseph Girard, Montreal (Ritchie) 3 3 2
Prince Arundell and Hal Ryan also finished.

Touraine Hotel Stake, 2:06 pace, $2,000:

Copa de Oro, b. s., W. G. Durfee, Los Angeles (Durfee 1 1 2 3
Major Mallow, br. g, Washington (Mallow) 2 2 3 1
Darkey Hal, blk. m., J. E. Schwartz, Wingham, Ont (Snow) 3 3 1 4
Time—2:09, 2:08¼, 2:08¾, 2:12¾.
Hal C., Princess Helen and Jude also finished.

2:16 trot—Stake, $2,000, three in four heats:

Alceste, br. m. by Jay Bird-Eastmorn (Geers) 2 1 1 1
Aquin, b. h. (Titer) 1 3 2 3
Baffles, blk. g. (Burgess) 3 2 3 4
Prince C., b. h. (Farley) 4 5 4 2
Passenger Charm, b. m. (Barnes) 5 4 5 5
Munie, ch. s. (Murphy) ....d
Time—2:09½, 2:12¼, 2:12¼, 2:13¼.

2:11 trot—Empire Stake, $10,000:

Carlokin, br. s. by McKinney-Carlotta Wilkes (Durfee) 1 1 1
Dewitt, b. g. (Andrews) 4 3 2
Nahma, b. m. (Burgess) 3 2 7
Locust Jack, gr. g. (McHenry) 2 5 4
Genteel H., b. h. (McDonald) 5 4 3
May Earl, b. m. (Bowerman) 7 6 5
Axtellay, b. m. (Thomas) 6 7 8
Loyal, b. h. (Geers) 8 9 6
Mae Heart, ch. m. (Helde) ....9 8 d
Time—2:08½, 2:09¼, 2:09.

2:19 class, pacing—Stake, $2,000, three in four:

George Gano, blk. h. by Gambetta Wilkes-Credition (Cox) 1 1 1
Dr. Ronney, blk. g. (Geers) 2 2 2
Princess Direct, blk m. (Allen) 3 3 3
Time—2:14¾, 2:12, 2:13¾.

ADDITIONAL ENTRIES AT BELLINGHAM.

Three of the five late closing events advertised by the Whatcom County, Wash., Association for its meeting which opens at Bellingham, August 25th, were declared filled. The two-year-old trot or pace, and the race for trotters and pacers without records, hopples barred, failed to fill. The races which filled were the following:

2:14 Pace, Purse $600—6 Entries.

San Lucas Maid, ch. m. by Dictator; Wm. Grant.
Bonney Riley, gr. m. by Jack Riley; A. Phillips.
Bonnie M., br. m., by Mohegan, dam Cayuse Mollie; L. C. Shell.
Merry Monarch, blk. h. by McKinney, dam by Altamont; Marvin Childs.
Estabell, b. m. by Norwood, dam Eta by Silas Wright; Kuster-Erwin Horse Co.
Prince Charles, ch. s. by Chas. Derby, dam by Memphis; Albert Smith.

2:20 Pace, Purse $500—13 Entries.

Zanthos, h. h. by Zombro, dam Lillian W.; L. S. Haller.
Esther B., blk. m. by Alexis, dam Antrim; R. W. Thompson.
Atlantic Panic, ch. s. by Atlantic, dam Nina B.; A. L. Williams.
Bushnell King, br. s. by Norval King; I. D. Chappell.
Diabull, ch. g. by Diablo, dam by Blue Bull Jr.; W. Griswold.
Sunny Jim, b. h. by Dalles Boy, dam by Altamont; H. C. Davis.
Nellie Bishop, b. m. by Argot Wilkes, dam Cactus by Cuyler; Kuster-Erwiu Horse Co.
San Lucas Maid, ch. m. by Dictator; Wm. Grant.
Raffles, br. g. by Zolock; Frank Childs.
Earlwood, br. h. by Medianwood, dam Nancy; S. D. Alquire.
Speedway, b. g. by Saraway, dam Daisy H. by Clark Chief and Highway, blk. g. by Saraway, dam Blue Pearl by Graves Blue Bull; A. R. Gumaer.
Dewberry, b. s. by Strathberry, dam Maud by Abdolach; H. E. Robbins.

2:15 Trot, Purse $600—9 Entries.

Van Norte, blk. g. by Del Norte, dam Ingram; A. Phillips.
Lady W., b. m. by King Alexis, dam Cayuse Mollie; L. C. Shell.
Henry Gray, gr. g. by Zombro, dam Alice by Rockwood; Oscar Hartnagel.
Elma O., blk. m. by Red Byron, dam Satinwood; I. D. Chappell.
Johnnie K., gr. g.; Kuster-Erwin Horse Co.
Lady D., b. m. by Tvee, dam Lady Mac by Lemont; George F. Duncan, Sr.
Crylia Jones, blk. g. by Capt. McKinney; dam Bessie by Rockwood; E. T. Hay.
The Indian, blk. h. by Hidalgo, dam Lulu Glasgow; George T. Hoag.
Irene, b. m. by Martins Florida, dam by Altamont; J. Cole.

Edward Gaylord, speed superintendent of the Colorado Interstate Fair, in speaking of their meeting to be held September 7-12, says: "I believe we will have as fine harness races as have ever been seen in Denver, and I am pleased with the interest manifested in them. We have a 3:00 trot, 2:40 trot, 2:35 pace, free-for-all pace, 2:20 trot, and we are now filling up for a 2:10 trot in which we want not less than six entries. This last is a special that is not included in our regular speed program. In addition to these, we will have a special race the last day for horses at the track and two cup races for members of the Gentlemen's Riding and Driving Club. There are also five running races every afternoon." The harness events are for purses of $500 each and the prospects are that some of the best known pacers and trotters in the West will be in the races. The races are under the rules of the American Trotting Association.

During the meeting at Kalamazoo, Mich., a new world's record was established for the fastest four-heat race ever won by a stallion, Sterling McKinney performing the feat and lowering his own record to 2:06¾. The track records for both trotting and pacing were also lowered. Billy Andrews, with Hamburg Belle, lowered the trotting record to 2:05¼, and Charlie Dean, with Minor Heir, gave the track a new pacing record of 2:02¾.

When Hamburg Belle trotted her mile in 2:05¼ at Kalamazoo she was in front all the way and finished practically alone. It is thought she would have beaten 2:05 had she been forced out. She is by Axworthy out of Sallie Simmons.

The Eel is pretty slick even though he is a hoppled pacer. His record is now 2:02½, made at Poughkeepsie last Tuesday, and is the fastest mile paced on the Grand Circuit this year, although Minor Heir has beaten that time on three different occasions this season.

Trainer Billy Andrews probably has three faster trotting mares in his stable than any other trainer ever had at one time. These are Sweet Marie 2:02, Hamburg Belle 2:05¼ and Sonoma Girl 2:05¼.

"Spohn's Distemper Cure is wonderful in what it does to cure and prevent distemper. With it I kept Dan Patch in racing form. I have not seen its equal." What is good enough for Dan Patch should do quite well for any other horse. 50 cents a bottle, $5 dozen, of druggists, or sent express paid, by Spohn Medical Co., Bacteriologists, Goshen, Ind

NOTES AND NEWS

Chico meeting ends today.

California State Fair opens next Saturday.

The $50,000 handicap at Readville will be trotted on Tuesday next, the 25th inst.

If Carlokin 2:08¼ keeps up his lick he will be one of the heaviest money winners of the year.

Boralma 2:07 has gone so lame that it will be out of the question to start him in the big handicap.

Los Angeles is working up a big district fair for November. It should be a success in every way.

The collision between two engines which the State Fair Association advertised has beeu declared off..

Woodland and Santa Rosa will both be on the circnit next year with good purses offered by the local associations.

Belmont, now in training at Readville, is a full brother to Frank Ruhstaller's trotter Wild Bell 2:08¼.

Perrenial Dan Patch looks as well as ever, and Harry Hersey says he is just as fast. He is now twelve years old.

Zombro bids fair to again lead all California stallions this year as a sire of new standard performers with race records.

The Occident and Stanford stakes at Sacramento this year should furnish great contests. There are some good three-year-olds entered.

There are some pretty fair drivers on the California circuit, and some of the finishes put up would do credit to any Grand Circuit meeting.

A good account of the Santa Rosa meeting, written by E. J. Ferguson, appeared in the American Sportsman, of Cleveland, on August 13th.

Tuna 2:08¼ by James Madison has changed hands several times lately and is now owned by A. B. Coxe of Paoli, Pa., who paid $550 for her as a brood mare.

Ruth Dillon, four years old, with a three-year-old record of 2:15¼, is expected to be a starter in the big handicap at Readville, and will be driven by Millard Sanders.

Prince Lock's record is now 2:18 and he has won every race be has started in this year, including the two-year-old trotting division of the Pacific Breeders' Futurity.

J. D. Springer, former owner of Sonoma Girl, has gone to Boston to be present at the Readville track on Tuesday next, when the $50,000 handicap is trotted.

Ben Walker's drive at Oakland, when he landed Silver Dick a winner in the second heat of the consolation purse, was about as clever a piece of work as has ever been seen.

Ella M. R. 2:16¾ is the fastest two-year-old trotter of the year. She is owned by Martin Carter and is by his young stallion Lord Alwin, an own brother to John A. McKerron 2:04¾.

The last foal sired by Director 2:17 is now a four-year-old and is owned by James McAfee of New Castle, Pa. This four-year-old is a black stallion, 16 hands high and is quite a trotter.

Del Coronado 2:09¾ made his first start of the season last Thursday at Poughkeepsie and was third in both heats, which were trotted under 2:08. Sterling McKinney 2:06¾ took fourth money in this race.

Whitelock, the green pacer in the Estabrook stable, owing to an accident in shipping him from Terre Haute to Detroit, will not be able to fill his engagements and has been shipped to his Denver home.

Two sweet-looking girls of Detroit visited the fair grounds during the races and sought an introduction to E. F. Geers. Then they invited him to have an ice cream with them, which the silent horseman blushingly accepted.

Los Angeles is to hold a big fair in November, with a six-day program of harness racing. Agricultural Park is to be rehabilitated and cleaned up for the occasion, aud it is proposed to make this fair an annual occurrence.

Charley Belden won a matinee race at Pittsburg August 8th in 2:13½ and 2:15. On the same day Lady Jones 2:15¼ was driven a mile in 2:09 to wagon by her owner, Mr. J. D. Collery, who also owns Charley Belden.

A special train of six horse cars took the trotters and pacers from Oakland to Chico last Sunday, leaving Oakland at 10 a. m. and arriving at Chico at 6 p. m. The trip was made without incident and all the horses arrived in good shape.

W. O. White of Fresno has purchased from J. W. Zibbell the good trotter Adam G. 2:11¼ and will send him north to race on the North Pacific circuit. Mr. Zibbell also sold Fresno Girl 2:10½, and she will be used as a roadster and matinee trotter in Fresno.

Bertha, the great broodmare by Alcantara, is foundiug a wonderful family. Every year sees new additions to her already long list of 2:10 descendants, and she bids fair to be the greatest grandmother of 2:10 pacers as she is already the greatest mother.

They fined William Cecil of California $100 for being late at Kalamazoo when the 2:20 pace was called, and as he only won fourth money in the race, which was for a purse of $1000, the punishment was pretty severe, as the result left him a hundred dollars loser on the start.

Kim, a yearling by Demonio 2:11¼, purchased by H. P. Eakle Jr. of Woodland, at the Suisun Stock Farm sale a few weeks ago, trotted a quarter in 53½ seconds at the Woodland track last week, the first time he was asked to cover that distance. This is a good showing.

S. H. Hoy's mare Memonia 2:09¼ looks to be good for a mark of 2:07 or better before the season is over. She finishes her heats game and is always trying, and for a mare that could not be said to be in first-class condition since she left home, has made a splendid showing.

The death of Helen Norte 2:09¼ is announced. She was owned by Thos. H. Brents of Walla Walla and was by Del Norte 2:08, dam Laurelia, by Caution. She was an own sister to Magladi 2:07, the fast pacing mare owned by Judge Brents that Fred Ward is campaigning on the coast.

Clarence Day of this city has recently made a camping trip to the Sierra Nevada mountains, and used his pacing stallion Dictatus 2:17 as the draft horse for the outfit. The old pacer drew a camping wagon and three persons the entire distance and enjoyed the trip seemingly.

The fastest three heats paced on the Pacific Coast by a three-year-old is to the credit of Ray o' Light, winner of the Pacing Futurity at Chico Thursday. The heats were in 2:11, 2:09, 2:09. Last year Hymettus won a heat in this event in 2:08½, but the next two were in 2:14 and 2:13.

It is strange that the anti-betting laws in the eastern states do not seem to affect the price of harness horses. Within the past few weeks Sterling McKinney 2:06¾ sold for $35,000; Lady Maud C. 2:04½, a pacer, for $25,000, while $20,000 was refused for the three-year-old trotter Justo 2:10¼.

At the Southern California Fair to take place at Los Angeles the last of October, a $500 cup is to be hung up for a handicap race between horses owned by members of the Los Angeles Driving Club. This handicap is to be on the same plan as the one to be decided next week at Readville.

Those contemplating visiting the Arizona territorial fair in November for the purpose of making exhibits of any sort or racing their horses there will find a representative of the fair association at Sacramento during the California State Fair, which opens August 29th, who will be able to furnish all information required.

Attention is called to the advertisement of the Blue Ribbon live stock sale to be held by the Tulare County Agricultural Association during the annual fair at Tulare, September 21st to 26th. "There is every prospect that this sale will be a big success," writes Secretary Ingwerson. Entries will close September 7th.

The judges who officiated during the different days at the Oakland meeting were Messrs. T. J. Crowley and F. H. Burke of San Francisco, Robert Brown of Petaluma and A. H. Cohen and Charles Neal of Alameda. The timers were Messrs. John A. McKerron of San Francisco, John Thoms of Alameda and P. W. Bellingall of Oakland.

F. E. Alley of Roseburg, Wash., who has been a liberal purchaser of California trotting bred horses during the past few years, has some royally bred colts and fillies on his farm. Among them are the following: Phyllis Wynn, a yearling filly by Bon Voyage out of Mabel Wyun by Zombro, second dam Grace Kaiser dam of Coney 2:02, by Kaiser; Bonaday, a yearling colt by Bon Voyage, dam Welladay 2:14, full sister to Klatawah 2:05½; Stalene, by Stam B. 2:11¼, out of Atherine 2:16¾, dam of Copa de Oro 2:03¼. Among the mares on the farm are Mabel Wynn by Zombro; Aileen 2:26½, by Anteeo, out of Lou Milton, the dam of Lou Dillon, and many others of high class breeding. Sonoma Boy 2:20, an own brother to Sonoma Girl 2:05¼, is the premier stallion at Mr. Alley's farm.

Demonio and Diablo are the only full brothers among stallions now in California that are sires of 2:10 performers. If Lady McKiuney 2:18¾ gets back to her form and trots a mile at her best, however, there will be another instance—Geo. W. McKinney, sire of Silver Dick 2:09¼, and Washington McKinney, the sire of Lady McKinney, being full brothers.

Messrs. De Pue & Sprague of the Woodland Hackney stud contemplate making an exbibit of their horses at the big fair and horse show to be held at Portland, Ore., next month. There are some extra fine horses on this farm aud they will make a very attractive exhibit. They won several gold medals and blue ribbons at the California State Fair last year.

There is a four-year-old pacer up in Washiugton that is getting ready to make the horses that meet him in the races this fall step fast to beat him to the wire. This horse is Ken West, by The Commonwealth, and a few days ago Will Hogoboom drove bim a mile in 2:08½ over the Walla Walla track. Ken West is owned by W. L. Whitmore of Portland.

W. W. Mendenhall sold last week to B. L. Elli— of Mendocino City the bay stallion Gen. Sherwood, three-year-old trotting record 2:28¾. Gen. Sherwood is by Bob Evans 20668, out of Silk by Combination 2684. Bob Evans is by Woodford Wilkes, son of George Wilkes. Gen. Sherwood is a young horse, foaled in 1903, aud has size and fine trotting action as well as speed.

Charles Whitehead of Salinas is keeping up his reputation as a trainer and driver of futurity winners. Ray o' Light 2:09, that be drove to victory in the three-year-old pacing division of the Breeders' Futurity this year, also won the two-year-old division last year, and this is the first instance in the history of the stake that a two-year-old winner has also been a three-year-old winner.

Glide Bros. of Sacramento have been so uufortunate as to lose a nice filly by Jules Verne, out of tbe mare Babe. The filly was entered in Pacific Breeders' Futurity No. 8 for foals of this year, and was an especially fiue looker. She tried to jump a fence and got snagged. Messrs. Glide have a filly by Star Pointer out of a full sister to Stanton Wilkes 2:10½ that is very handsome.

Mr. J. H. Dirst of Modesto is the owner of the bay stallion Gossamer, sired by Gossiper 2:14¾, dam the registered mare Vendome by Richard's Elector. Gossamer is now seven years old, stands 15.3 and weighs 1050 pounds. He showed great speed as a colt, but when being shipped in a car met with an accident and was injured so that he was not trained. He has recovered and shows well at the trot. Mr. Dirst will use him in the stud next season.

On July 15th, at Oil City, Pa., Zoe Patchen by Zombro, out of Last Chance by Mambrino Patchen, won a six heat race and took a record of 2:23¼ in the sixth heat. The race was for trotters of the 2:30 class and there were nine starters. Every heat but one was faster than 2:25. This gives Last Chance two standard trotters as she is also the dam of Belle Patchen 2:16 by Atto Rex 6821, and will entitle ber to a place in the table of great brood mares.

We regret to learn that James Marshall's great broodmare Trix, by Nutwood Wilkes, dam of Mona Wilkes 2:03¼; Aerolite (3) 2:05½ and Moortrix (3) 2:14¼ is not in foal this year. She was bred to the great four-year-old The Limit (Searchlight-Bertha), but Mr. Marshall is certain that she is not in foal. This will be regretted by every horseman who hears of it, as every foal produced by Trix adds greatly to the horse values of California, and one by The Limit was especially desired by Mr. Marshall.

The race put up by Ray O'Light iu the 2:14 pace at Oakland on the closing day of the meeting was a great performance for a three-year-old racing against aged horses, several of which were tried campaigners. The Searchlight colt was a contending horse in every heat and while be failed to get to the wire first in any heat, he was a very close second the first and third heats in 2:11½ and 2:13½, and a good third the second beat in 2:10½. Ray O'Light cut out the pace each time, leading until the three-quarters was reached. Seldom has a better race been seen than this one, and the fact that Ray O'Light was game and fast throughout stamps him as a great three-year-old.

Citizens of Pleasanton are considering the idea of giving a two days' harness race meeting at that famous training track late in the fall, after the trainers all return from the North Pacific and other circuits. It is likely that by November 1st all the trainers who have been racing elsewhere will have returned home, and the Pleasanton stalls will be well filled. There will be many horses that have earned low records and fame during the summer and fall, and a good program of racing will enable them to be seen in actual contests on the track where they were trained last spring before starting on their campaign. There is no doubt but a two days' program could be arranged that would not only fill satisfactorily, but also draw a large crowd to the horse center to see the sport.

The Oakland track during last week was anything but fast, but it was not a real slow track next to the pole. Any horse that could get the pole and keep it during the entire circuit of the track could trot or pace a very fair mile. The soil was moist and the surface reasonably smooth, but it was soft and holding, although it did not break away. Horses at speed became rather leg weary at the end of a mile, and those compelled to take the outside found the journey a very tiresome one.

Have you a free-for-all pacer, a 2:14 class pacer, or a 2:09 class trotter, that is not going north to race? If so, you will have three chances to start either one or all in the races on the Central California circuit of fairs, which will follow the State Fair, and comprises the Associations at Fresno, Tulare and Bakerfield. These associations will all give $500 purses for these three classes and entries will not close until September 7th, the Monday following the close of the State Fair at Sacramento. Here is a chance to race your horse where he will have a chance to win. See the advertisement in this issue.

The exhibitions of Mr. Frank J. Kilpatrick's stallion Washington McKinney on the track at Emeryville during the meeting last week never failed to draw rounds of applause from the grand stand. The handsome black son of McKinney seemed to realize the fact that he was on show and was always ready to arch his beautiful neck and show his best form whenever Sam Norris brought him onto the track. It is Mr. Kilpatrick's intention to take Washington McKinney to the National Horse Show at Madison Square Garden, in New York, next November, and that he will create a sensation when led into the show ring is certain.

Mr. Frauk H. Burke is now the owner of Laddie G., the handsome Zombro gelding formerly owned by Mr. George R. Gay of this city. Mr. Burke was one of the judges at the Oakland meeting last Saturday and saw Mr. Gay drive Laddie G. in the cup race for amateur drivers. While Laddie G. did not win, he trotted so fast and had such nice manners that after the race Mr. Burke asked Mr. Gay for a price on him. $1,000 was the latter's figure and Mr. Burke handed over his check forthwith. That he has secured a very valuable addition to his racing stable is the opinion of every horseman who has seen Laddie G. in action. Mr. Gay is strictly an amateur and during the past year has started Laddie G. several times in the Park Amateur Club races at the stadium three-quarter mile track. The best race he trotted there was two weeks ago when he defeated Telephone and Dr. Hammond, trotting the third heat in 2:16. There are few better bred ones than Laddie G. His dam is Linnet a full sister to Whips, the sire of Azote 2:04¾ being by Electioneer and out of the thoroughbred mare Lizzie Whips by Enquirer. Laddie G. has no engagements and never started in anything but an amateur race. That he can beat 2:15 trotting is certain, and he is also a good prospect for a 2:10 horse next season. He is only five years old, sound and all right every way and level headed. Pat Davey, Mr. Burke's trainer will handle him with the idea of entering him in the races next year.

BERTA MAC 2:08.

When Henry Helman drove the big brown mare Berta Mac to victory in the second heat of the 2:14 trot at Chico last Wednesday and the timers hung out 2:08 flat, it was the third of McKinney's get that he had put in the 2:10 list out of just three that he has handled, and all are trotters. The other two are Mack Mack 2:08 and Lady Mowry 2:09¼. Berta Mac is the thirteenth trotter by McKinney to take a race record of 2:10 or better and the seventh to trot below 2:09. She is a powerful brown mare of good size and closely resembles the picture of her that appears on our title page this week. She was bred and is still owned by Worthington Parsons of Salinas, and nearly all her training has been done by Mr. Helman. Last year she raced all through the California and North Pacific circuit, winning over $4000 in purses and closed the season with a mark of 2:13¼, which she made at Santa Rosa. Mr. Helman wintered her at Pleasanton, and this spring she showed more speed than ever, and that she has trotted in 2:08 is no surprise to her owner or trainer, who confidently expect her to lower this mark considerable next year, unless some accident interferes. She is sound and rugged, full of life and ambition, tough as a pine knot, and her only fault is that she is not entirely steady, although she can hardly be driven off her feet in the stretch. Her breaks usually come from her anxiety to rush to the front, a fault that will lessen every year, and as the McKinneys are noted for training on and improving with age, the probability is that Berta Mac will yet show her ability to trot heats around 2:04, as she has shown two minute speed. She is now six years old. Her dam is Alberta 2:29¾ by Altoona 8850, second dam Gipsy by Erwin Davis 5558, son of Skenandoah 926, and third dam Maggie by Goldnote, another son of Skenandoah, whose dam was by a son of imported Glencoe. There is good blood in the veins of Berta Mac, and there is every probability of her being one of the sensational trotters of the Grand Circuit of 1909, if she is taken across the mountains.

Drink Jackson's Napa Soda.

GRAND CIRCUIT AT POUGHKEEPSIE.

POUGHKEEPSIE, N. Y., Aug. 18.—The feature of the opening day of the Grand Circuit meeting at the Hudson River Driving Park today, was the 2.16 pace, in the first heat of which The Eel went in 2:02½. He thus beat the track record, his own record and made the fastest mile paced in the Grand Circuit this year. The Eel's chief competitor was George Gano. The first heat was a great race between these two horses to the three-quarters pole, the first quarter being made in 29¾ seconds, the half in 59½ seconds and the three-quarters in 1:31½. The last quarter of the second heat was paced in 29½ seconds.

Sterling McKinney 2:06¾ was a surprise in the 2:09 trot, as the $35,000 horse finished outside the money. Geers does not seem to have the hang of him yet, as he made repeated breaks. No pools were sold on any of the races. The summary:

2:09 trot, the Queen City, purse $2000:

Jack Leyburn, ch. g., by Alto Leyburn (Grady)	3	1	1
Locust Jack, gr. g. (McHenry)	1	2	4
Margaret O., b. m. (Davis)	2	7	2
Nahma, b. m. (Burgess)	4	4	3
Sterling McKinney, br. h. (Geers)	6	3	3
Daniel, br. g. (Andrews)	5	6	6
Miss Abdell, b. m. (McDonald)	7	5	d

Time—2:08½, 2:07¼, 2:07¼.

2:10 pace, the Nelson, purse $1500:

The Eel, gr. h., by Gambolier-John L. (McEwen)	1	1	1
George Gano, b. h. (Cox)	2	2	2
Bender Jr., ch. g. (Geers)	4	3	3
Hallie Direct, ch. m. (Schaeffer)	3	4	4

Time—2:02½, 2:05, 2:06.

2:16 trot, the Vassar, purse $1500:

Royal, b. h., by Boreal-Nevilian (Geers)	3	1	1	1
Raffles, blk. g. (Burgess)	1	2	3	4
Prince C., br. h. (McAndrews)	4	5	2	3
Sir Axworthy, ch. h. (Cox)	5	4	4	ro
Munich, ch. g. (Murphy)	d			

Time—2:11¼, 2:10¾, 2:12, 2:11¾.

POUGHKEEPSIE, Aug. 19.—The great event of the second day at this meeting was the 2:13 trot for a purse of $4000. There were seven starters, and three were distanced the first heat, but the race was a great contest between the remaining four. Hamburg Belle won in straight heats, but Spanish Queen made her equal her record of 2:05¼ to win the first heat, while the California horse Carlokin forced her to trot in 2:07 in the final heat to beat him. The winner trotted the three fastest heats ever trotted over the Poughkeepsie track. Summaries:

Hudson Valley, 2:28 trotting (three in five), purse $1500:

Vendetta, br. h. by Bonedette-Electro Bento (McCarthy)	4	2	1	1	1
Alcoste, br. m. (Geers)	1	1	3	3	4
Bonnie Way, b. m. (Lazelle)	2	3	2	2	2
Noama, blk. m. (Burgess)	3	4	4	4	6
St. Peter, br. g. (Cox)	dis				
Oretto, blk. g. (McDowell)	dis				

Time—2:12½, 2:12¼, 2:13½, 2:16½, 2:20¾.

Oakland Baron stakes, 2:13 trotting (three in five), purse $4000:

Hamburg Belle, br. m. by Axworthy-Simmons (Andrews)	1	1	1
Spanish Queen, b. m. (Macey)	2	2	3
Carlokin, br. h. (Durfee)	3	4	2
Teasel, ch. m. (Geers)	4	3	4
Prince C., br. h. (McHenry)	dis		
Axtellay, b. m. (Thomas)	dis		
Directum Penn, b. h. (Cheeseman)	dis		

Time—2:05¼, 2:07, 2:07.

Poughkeepsie, 2:09 pace (two in three); purse $1500:

Major Brino, blk. h. by Wild Brino-Red Wilkes (Ritchey)	1	1
William C., br. g. (Murphy)	2	3
Hal Raven, b. m. (Snow)	3	2
Leslie Waterman, ch. g. (McDonald)	4	4
Miss Georgie, br. m. (Gerrity)	7	5
Lady of Honor, ch. m. (Thomas)	5	7
Laureatta, b. m. (McKinney)	6	6
Manager H., b. h. (Fullager)	8	8
Virginia, ch. m. (Munz)	dis	
Arrow, b. g. (Cox)	dis	

Time—2:05¼, 2:07.

POUGHKEEPSIE, August 20.—The three races that made up to-day's programme in the Grand Circuit meeting at the Hudson River Driving Park were won in straight heats. The gate receipts of the meeting have thus far been only a little behind those of last year. There being no betting, the Association loses $6000, which has heretofore been paid for the pool-selling privilege. This amount will not be made up in the receipts.

The brown mare Alceste, which was taken sick after winning two heats in the 2:28 trot yesterday, died to-day of inflammation of the bowels. The mare, which was 5 years old and valued at $10,000, was owned by Stamborough Brothers of Youngstown, O., and was in the string of Ed Geers, who drove her yesterday. Alceste was by Jay Bird and had a mark of 2:07¼. She won second money in the M. and M. stake at Detroit and won her races at Kalamazoo and Buffalo. Summary:

The Dutchess, 2:12 pace; purse $1500; best three in five heats:

Jerry B., ch. g. by Argot Wilkes (Cox)	1	1	1
Fred D., g. g. (Murphy)	2	3	4
Charley Hal, b. g. (Snow)	4	2	3
Dr. Bonney, blk. g. (Geers)	6	5	2
Baron Whips, s. g. (Case)	3	4	5
Jim Daley, b. g. (Clark)	5	6	6
Willie Walters, b. g. (Hinkle)	7	7	7

Time—2:05½, 2:07¾, 2:05.

2:04 pace; purse $1000; best two in three heats:

Hedgewood Boy, ch. h. by Chitwood-Norris Sweet)	1	1
Black Lock, blk. g. (Snow)	3	2
John A., ch. g. (Cox)	2	4
Baron Grattan, b. g. (Geers)	4	3

Time—2:04¾, 2:03¾.

2:09 trotting; purse $1000; best two in three heats.

Margaret O., b. m. by Onward-Axtel (Davis)	1	1
Locust Jack, g. g. (McHenry)	2	2
Del Coronado, br. h. (Durfee)	3	3
Sterling McKinney, br. h. (Geers)	4	4
Daniel, br. g. (McDowell)	5	5
Claty Latis, ch. m. (Lasalle)	6	d
Chime Bells, b. m. (Titer)	d	

Time—2:07¾, 2:07½.

DURFEE'S WINNINGS.

W. G. Durfee has won something over $15,000 with his horses since the racing season opened and up to the closing at Buffalo. Of this more than half or a little over $8,000 has been won by Claude Jones' trotter, Carlokin 2:08½ by McKinney. Carlokin has won four races and been second twice, out of six starts, his largest win being first money, amounting to $5,000 in the $10,000 stake for 2:11 class trotters at Buffalo.

Durfee's next best winner is Mrs. L. G. Bonfiillio's bay pacing stallion Copa de Oro 2:03¼ by Nutwood Wilkes. He has also been first in four races and second in two, out of six starts and has over $5,000 to his credit.

The trotting mare Zomalta 2:08¼ by Zombro, has won three races, been second once and third once out of five starts and while she was not entered in any of the big stakes and has been compelled to trot for comparatively small purses, she has won over $1,700, and will be a good money earner for the string. The pacer Phoenix has been distanced in nearly all his starts and while he seems to have a world of speed will not race.

Del Coronado 2:09¾ has not started yet. He has worked miles below 2:10, and will be raced later on.

Petigru and Murray M. have each started a few times but have not done much. Petigru was second in one race and Murray M. got fourth money once. Carlokin, Zomalta and Copa de Oro should win considerable more before the season is ended as all are in fine shape and are well entered down the line through the Grand Circuit.

STATE FAIR RACING PROGRAM.

Saturday, August 29—Occident stake for three-year-old trotters; 2:12 class pacing, purse $800; Driving Club race.

Monday, August 31—2:10 class trotting, purse $1000; two races for members of Park Amateur Driving Club.

Tuesday, September 1—2:08 class pacing, purse $1000; 2:17 class trotting, purse $700; free-for-all pacers, amateur drivers.

Wednesday, September 2—2:15 class pacing, purse $700; Amateur Driving Club races.

Thursday, September 3—Stanford stake for three-year-old trotters; 2:14 class trotting, purse $800.

Friday, September 4—2:20 class pacing, purse $2000; Amateur Club races.

Saturday, September 5—2:20 class trotting, purse $2000.

A horse that surprised the public during the Oakland meeting, although he did nothing but what was expected of him by his owner, William Michelsen of this city, was Wilmar, winner of the 2:30 trot on Friday, the third day of the meeting. Wilmar is a big horse and a good gaited one, and Johnny Quinn gave him an excellent drive, but there were very few who expected the big son of Wildnut to trot the race he did, as he has been looked upon as a speedway or fun horse rather than race horse. Wilmar was bred at Palo Alto Stock Farm and is by Wildnut (son of Woodnut 2:16¼ and Wildflower 2:21 by Electioneer) out of Sweetwater 2:26 by Stamboul, second dam Manzanita 2:16 by Electioneer, third dam Mayflower 2:30½ by St. Clair 16675. He was sold as a two-year-old at one of the farm's sales and Monroe Salisbury had him as a three-year-old and started training him for the Grand Circuit. Wilmar stepped the last half of a mile in 2:12 at Pleasanton in 1:02 for Salisbury but went lame soon after and was not taken east. He then passed through different hands until he finally became the property of Mr. Michelsen of the St. Francis Carriage Company of this city, who used him on the road and found that he had a very high rate of speed. He turned him over to Johnny Quinn a few months ago, and the latter got the horse ready for the Oakland meeting where he was entered in the 2:30 class trot. In this race he met Alsandra 2:12, Princess Christina 2:18 and Dutch, and won from them about as he pleased in straight heats, the time, 2:15, 2:17¾ and 2:14, being excellent for the track. During all three heats Wilmar never lifted his nose and acted more like an old campaigner than a green horse who was known to have speed but had been considered unsteady. His next race will be at the State Fair in Sacramento where he will meet some of the best trotters on the circuit, including Nogi, Easter Bells and Vallejo Girl, but he is expected to give a good account of himself even in that speedy company.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

IN THE HIGHEST SIERRAS.

The Yosemite Valley may well be called the crowning glory of the Sierra Nevada mountains. Every year thousands of visitors enjoy its majestic cliffs and waterfalls, and many have been the written descriptions of this world-renowned spot. Of late years, the King's river canyon has attracted an increasing number of mountain lovers, and several articles have appeared in American publications which are tending to increase the travel thereto. But of the great mountain mass which lies between them, of this, the grandest portion of our High Sierra, which blocks the direct travel from one to the other, and to which these canyons as well as many others are tributary, almost nothing is known to tbe traveling public, and practically nothing has been written of a detailed nature. It is with the idea of calling attention to this little known region, and of attracting thither a few mountain enthusiasts, that the following brief account is attempted:

Before taking up the description of routes and scenery through this magnificent mountain range, it will be necessary for the reader to have at least a general idea of its topography, which though highly complex in detail, is wonderfully simple in its broad outlines. It may here be observed that this part of the Sierra Nevada, like that to the north, consists of a gently sloping plateau, rising gradually eastward from the San Joaquin valley for a distance of seventy-five miles to the crest of the range, and then dropping off in one tremendous leap to the desert valleys of the Great Basin in from five to ten miles.

The altitude attained by the crest in this portion averages 13,000 to 14,000 feet, and the dralnage from the snow-capped summits has given rise to a series of rivers, which cut their way to the valley through roughly parallel transverse canyons of extraordinary depth. The Yosemite Valley and Merced river is one o. these, fed by the snowy group of Mt. Lyell. Next south of this is the San Joaquin, which is divided into two great branches, the middle and south forks. Still further south is the middle fork of the King's river, followed by the south fork of the same stream, upon which is situated the King's river canyon. It is evident, then, that to reach the summit country from the west, one has but to follow up the main canyons or the great divides between the water courses, or in any case has but minor tributaries and gorges to cross, but to make the trip from Yosemite to the King's river canyon parallel to the summit of the range he has to cross all the great river canyons, as well as the snowy divides between them. Furthermore, the trails in this portion are not well marked; in fact, the traveler must depend principally on his own general idea of the country in order to get through at all. But, on the other hand, the direct route through is not rough, and with the aid of a guide, or one member of the party familiar with mountain life, there should be no difficulty in working a way through this magnificent mountain region.

In passing, I may say that there are two possible routes. One, the high mountain route, which has not yet been completely worked out, lies between 8,000 and 12,000 feet above the sea, and is not safely attempted by anyone unfamiliar with the details of the country. The other, or middle route, is further west, and is the one to be preferred. While it does not pass through the highest portion of the range, side trips of one or two days' duration will in any portion bring the traveler to the crest region. It is this route which will therefore be described.

The start can be made from the north, tbe reason for this being that the roughest part of the journey is at its southern end, which should, therefore, be left until the season is as far advanced as possible, and the packs have become light. A good starting point is Summerdale, or Fish Camp, on the Raymond stage road, about seven miles west of Wawona. This settlement is in the heart of the great sugar-pine forest belt, and a network of old lumber roads and trails extends away to the east through the deserted sites of many saw mills, to the Beasore meadows on the southern slope of the great divide between the Merced and San Joaquin rivers. From this point the old Mammoth trail trends eastward, through the Chiquita and Jackass meadows and through splendid timbered country, but edging continually toward the rim of the great San Joaquin canyon, which parallels the route just to the south. Finally, after crossing Granite creek, a splendid clear tributary, the great spurs of the Merced divide force us out on the very edge of the San Joaquin canyon, and a fine view is obtained over the rugged country at the junction of its two main forks.

The trail now plunges down into the canyon of the middle fork and for 3,200 feet it zigzags down the rocky slope, for we must cross the river at this point, where a substantial sheep bridge spans the otherwise impassable torrent. A short steep climb up the other side soon brings us over the low ridge which divides the south from the middle fork of the San Joaquin and we bear off through the timbered country to the south just at the brim of the latter canyon

The course of the south fork of the San Joaquiu is ratber unique amongst Sierra streams, inasmuch as its course is toward the northwest or almost parallel to the main crest of the Sierra. The forest-covered plateau on either side or the course of its own deep canyon furnishes therefore a most obvious pathway which leads us for many miles into the very heart of the highest Sierra. It is fed by four great tributaries from the east, Mono creek, Bear creek, Piute branch, and Evolution creek. Each of these in turn furnishes a possible route toward the crest region.

For the first twenty-five miles after crossing the middle forks our route passes over this timbered plateau above the river canyon and then descends to Mono creek. Throughout its lower course Mono creek flows in a wide, almost level valley covered witb reddish sandy soil and a sparse growth of timber. Higher up it comes down through a magnificent canyon whose walls rise to a height of 2,000 feet above the stream. The southern wall is especially fine and at intervals side gorges break through it, forming deep recesses about whose heads are the snowy summits of the Abbott group, nearly 14,000 feet in elevation. A rough trail leads up the north bank of tbe stream across tbe mountains to Owens valley, and a side trip to the splendid Alpine region about the headwaters of the creek is well worth the time. The deep recesses on the south wall are known as the First, Second, Third and Fourth recesses. Of these the Second is the largest and easy access to it is obtained by an old sheep trail. The stupendous scenery about the head of the Second, Third and Fourth recess it is quite impossible for me to give an idea of in the short space of this article. Suffice it to say that they are headed by Mt. Abbott (13,700 feet), as yet unconquered by the mountain climber; Mt. Gabb (13,582 feet) and a number of others of nearly equal height, breaking off in tremendous precipices to the north and west. This region has the attraction to the mountaineer of being almost, if not quite, undescribed. To the south of the main canyon of Mono creek rise the imposing summits of the Slate group, consisting of Red-and-White peak and Red Slate peak, each about 13,000 feet in height. This group is a most striking one ou account of the brilliant coloring of the rocks and the vast field of snow which lie about their bases.

Returning again to the lower portion of Mono creek valley, the traveler, if he wishes another high mountain trip, may leave his base camp and make his way up the steep slope which walls the valley on the south, and thus reach the top of the Mono-Bear creek divide where a good trail will be found following very nearly the summit of the ridge. . This finally leads to the upper valley of Bear creek, which may now be followed without difficulty to the point where it branches about the base of the Seven Gables. This latter peak is one of the most picturesque that is to be found in the High Sierra. It is in the form of a huge rectangular block of granite, bounded by sheer precipices over 2,000 feet high on the north, east and south, formed by the tremendous canyons of the upper trihutaries of Bear creek which have cut their way through from the summit snows.

The crown of this immense block rises in peaks like the gables of a roof, that on the southeast being the highest, and shooting up like the spire of a cathedral. The elevation is about 13,000 feet, and though in the wildest portion of the San Joaquin Sierra, its summit is not difficult of access. The view from that commanding point cannot be excelled, for it stands one of a host of giants in the heart of the wilderness. Close at hand and across the tremendous chasms on all sides rise Gabb, Abbott, Bear Creek Spire, and in the south the airy summit of Humphreys. The view is well worth the rather difficult trip to its base.

Returning again to Mono creek valley and following down the stream (here almost as large as the Merced river) to near its confluence with the San Joaquin we can again pick up the main trail which crosses the Mono-Bear creek divided at a much lower point, then crosses Bear creek itself and swinging far to the west about the huge mountain masses on its south side, finally descensd to the bank of the main south fork of the San Joaquin river. This beautiful sparkling stream, fresh and pure from its snowy fountains, we now follow upward, through a miniature Yosemite, then through wide grassy valleys where the clear stream swings in graceful loops, to a point where it issues from a rocky canyon. Here our trail is forced up on the mountain side again, and for four or five miles we thread our way amongst the glaciated slopes, turn the "Great Bend," and again descend to the river at the Blaney meadows.

These constitute a good camping ground, for the broad grassy flat furnishes the finest of feed for animals, a convenient hot spring of pure water is most convenient for bathing and the surrounding scenery is superb. The Blaney meadows can also be easily reached from the west, by leaving the end of the stage road between Fresno and Pine Ridge at Shaver and taking the Red mountain trail.

About five miles above the hot spring, the Piute branch enters the river through a deep canyon. This canyon is entirely impassable for pack animals, so if the traveler wishes to explore the Mt. Humphreys regiou he must either carry his food and blankets on his back, and as we say "knapsack it," or must lead his pack train over a rough promontory 3,000 feet high and descend into the Piute canyon several miles above. Either of these methods is mountaineering with a vengeance, for there are no trails, nor can guides be procured that know this country. In 1898 the writer, in company with Mr. C. L. Cary, explored the high ridges to the north of the great canyon, tben returned to the hot spring and knapsacked it up the terrihly rough canyon to its source. Here we attempted Mt. Humphreys, but failed, and the mountain remained unscaled until the summer when James and Edward Huchusa succeeded in completing the ascent. With the exception of the extreme head of the middle fork of King's river this region is the most difficult of access in the whole length and breadth of the High Sierra, but these difficult regions are always the most magnificent. The whole south face of the divide between this and Evolution creek consists of a series of buge crowns, walled in by continuous precipices and separated hy thiu knife edges. These tower to a height of 4,000 feet above the creek. Mt. Humphreys, 14,055 feet in height at the head, is a fitting centerpiece for the stupendous picture.

Returning once more to our regular route, we take tbe well-marked trail up the canyon of the San Joaquin. Five miles ahove, the Piute branch must be crossed, and, in high water, this sometimes gives trouble. Above this the river flows in a great canyon, and for the remainder of the distance the trail keeps close to the water's edge, for the walls of black metamorpbic rise from 1,000 to 3,000 feet above the river. Over these walls at short intervals plunge glorious cascades, their snowy white contrasting most strikingly with the somber walls. After crossing the river, we finally come to the point where Evolution creek, a stream which carries fully half the now much diminished river, plunges over the east wall in a grand cataract.

Thougb apparently the most difficult of all the tributaries to follow up, we find to our surprise that a good trail winds up the apparently inaccessible side of the south fork canyon, and lifts us 1,000 feet up to the lower end of Evolution valley. This is a fine example of a great glacial valley. For six miles it pursues a perfect "U"-shaped cross-section, and its floor is covered with timber and meadows. There will be found only slight remains of the old sheep trail, and our route is about go-as-you-please, but little or no difficulty is encountered till the head of the valley is reached. Here there is an immense amphitheatre into which streams from all directions tumble in foaming cataracts. On the south side is the Hermit, a clean-cut pyramid of granite rising 2,000 feet above the meadow. Blocking the whole eastern sky stands the colossal Mt. Darwin nearly 14,000 feet in elevation, and dominating everything in the neighborhood except Humphreys.

The main stream tumbles down from a shelf at the foot of Darwin, and thougb possible to take animals up to this shelf, it is better to proceed from this point on foot, as the distance to the source can be made easily in a day. Upon this shelf lies beautiful Evolution lake. Grouped closely around it are the great peaks of the main crest, and the Goddard divide Mts. Darwin, Haeckel, Wallace, Spencer, Fiske and Huxley. This latter, the most beautiful of all, lies directly at the head of the lake, and the creek, which above this point flows from the south cuts around its base. It is not possible to take a four-footed animal above this point, but a man afoot can climb on up the creek to its very source, which seems to be as near the heart of the High Sierra as it is possible to get. It heads in a broad open hasin, contains two large lakes of crystal clearness fringed with snow. On the south towers the Goddard divide which separates the San Joaquin from the King's river.

On the west we are hemmed in by the spires of Mt. Goddard itself, and on the east hy the main crest of the Sierra. Crossing this hasin and climhing the snow slopes of the Goddard divide, one can make his way to its crest, and look down the other side upon the headwaters of King's river—upon a scene of the most inspiring grandeur. Southward for miles the whole limit of vision is crowded with snowy ranges of peaks, cleft with immense canyons. To the east the main middle fork of the King's river cuts its own preferred canyon through the hlack metamorphic rocks and at our feet fall away the great tributary gorges which swell its volume helow. Against tbe eastern sky towers the mighty array of the Palisades, its highest point 14,212 feet above the sea; the finest mountain except Shasta in California.

To give even a short description of the scene would be beyond the limits of this paper, so we must return to our main camp on the San Joaquin, and continue our journey to its source, where at an elevation of 10,200 feet amidst extensive meadows and glorious Alpine scenery, we make camp at the foot of Mt. Goddard. Though our traveler makes no other side excursions during his trip, though he climbs no other mountains, he should not neglect the opportunity of enjoying the most extensive view in the Sierra from the summit of Mt. Goddard from an elevation 13,602 feet on the highest point on the divide between the basins of our two great watercourses, the whole region is now laid out to his view. From Mts. Conness, Dana and Lyell, our familiar friends of the

Yosemite region, over all the great canyons and mountains among which he has been traveling, over the vast wilderness of King's river, and even to Mt. Whitney, which towers above the King's-Kern divide, the country lies like a map. There is lesson in geology and physical geography to he learned from several hours' study on this commanding point which can never he gained from hooks.

Our direct route southward is now completely blocked—although a high mountain route is gradually being worked out across the savage sources of the middle fork of King's river, no one has as yet taken a pack train across the upper Goddard divide. In any case such an undertaking would never be attempted hy one unfamiliar with the details of the whole region. So our party will have to make a wide detour to the west, avoid this magnificent though difficult portion of the high Sierra, and enter it again along its southern boundary. So retracing our steps for a mile or so down the south fork, we finally leave its canyon hy a ledge along the western wall.

An old sheep trail runs along this, but it is dim and hard to find. Our best assurance lies in the fact that it is impossihle to travel anywhere except on the ledge, and as it is not over 100 feet wide we cannot go far wrong. This ledge can be followed for ahout three miles, when it finally brings us out in a great open regiou at the base of snowy peaks. Just to the south of what is known as Red mountain is the Hell-for-sure pass, the only place for miles about where the San Joaquin divide can be crossed. Although at an elevation of 11,300 feet, this pass is not as had as its name implies. On the other side lies the lake-dotted basin in which the north fork of the King's river takes its source. The desceut of the other side is rough, hut once down there is but little difficulty in pioneering a way (for now we have not even a sheep trail to follow) across the basin, and down into the canyon of the north fork of King's river. Crossing this small stream, and the high ridge on the other side, we find ourselves at the source of Crown creek, a tributary of the middle fork of King's river, whlch may now he followed down to Crown or Collins' meadow.

This beautiful meadow may also be reached from Pine Ridge by taking the Collins trail at Ockenden's, near Shaver. It is an excellent starting point for Tehipite and the upper middle fork country.

We are now in the region of trails again, and strike south on an almost level stretch to the brink of Tehipite, and then down, down for 3,000 feet over one of the roughest trails in the mountains to the bottom of this wonderful gorge. The Tehipite is one of the grandest of Sierran canyons, ranking with Yosemite and Hetch Hetchy in the magnificence of its cliffs, and far surpassing the King's and Kern river canyons. The great feature of the valley is the noble dome which stands out from the north wall. This, according to measurement of the United States Geological Survey, rises 3,480 feet above the river; as clean cut and perfect a granite precipice as the world affords. The top is capped with a perfect hemispherical dome. The rock in my opinion ranks next only to El Capitan and Half Dome, though in many respects it is in no way inferior to them. At the foot of the Dome are the graceful Silver Spray falls formed by Crown creek. These are two in number and aggregate 200 feet in height. On the south side there is no such vertical precipice as the Dome, hut the rugged wall is of pure gray granite without a sign of vegetation. Its highest points are 5,000 feet above the river.

It is in regard to the floor of the valley that the Tehipite as well as the King's river canyon falls so far below Yosemite and Hetch Hetchy. Instead of green meadows and picturesque groves we have boulder-strewn flats and huge piles of talus all savagely rough. But the river is magnificent as it rushes through in a continuous chain of rapids. In order to reach the high mountains again—to regain our lost ground—we must follow up the middle fork of King's for ahout fifteen miles to Simpson meadow. The trip is a most interesting one. Throughout the whole distance the canyon is magnificent, second to none in the Sierra. The trail, though rough, is safe and well marked. At Simpson meadow we have the most glorious camping spot which it has heen my fortune to find in California. The meadow is over a mile long, covered with tall grass and groups of stately pines. Flowers of innumerahle hues spangle its broad openings, and through the middle rushes the splendid stream well stocked with the finest rainbow trout. On all sides rise mountains to from 4,000 to 6,500 feet above the river.

This, then, is an ideal spot for a permanent camp, and our traveler may rest here, or spend some time exploring the roughest mountains in our couutry about the head of the river. A good trail leads up the south hank of the river five miles to its confluence with Cartridge creek, the first great tributary from the east. Ahove this point the main river canyon is impassable except to a man on foot, but Cartridge creek may he followed to its source with a light pack train of the hest mountaiu mules or burros. A few miles above the river we find Triple falls, one of the most unique cataracts in the Sierra. Here, too, almost equal branches of Cartridge creek approach within a few feet of one another, and fall side by side over an absolutely vertical cliff 100 feet high into the same pool. The combined waters then make another vertical drop of 100 feet into the dark chasm below. Above Triple falls are other smaller ones making altogether a chain 550 feet in vertical height. The view down the canyon from the top of these falls is very fine. The opposite wall of the middle fork canyon rises nearly 5,000 feet above the river in an almost perpendicular cliff of black slate. This figure is no guess, for it depends on an actual measurement by barometer, and later by triangulation. I consider this the highest rock face to be found in the Sierra. The canyon above this point is savagely rough, but good mountaineers can navigate a pack train to its source near Lake Marian, which is the nearest point to the Palisades that can be reached from the south or west. Any further explorations of the middle fork north of this must be made with a knapsack. To the southeast of Lake Marian, however, is a rough pass over the great divide to the sources of the south fork of King's river. This latter heads in a beautiful broad basin at the southern end of the Palisades near Split mountain (14,076 feet). Although so very difficult of access, this basin is a very paradise for the mountaineer, and once in it he may travel in any direction. But it is not possible to follow the main stream down to the King's river canyon, nor is it possible to leave the basin by any point to the south or east. We must return, therefore, to our base camp at Simpson meadow.

Picking up again our through route at this point, we take the well-beaten trail up the tremendous mountain to the south, climb 4,000 feet in one pull, and then pass through thinly timbered basins, and high meadows to the Granite pass on the great divide between the south and middle forks of King's river. We now cross Granite basin, and then a low divide to Copper creek, down which the trail then runs. Before finally descending, however, we may cross the high ridges to the east, and scramble down iuto Paradise valley, a miniature Yosemite on the main King's river five miles above the great canyon. This, as its name implies, is a good camping spot. There is abundance of meadow land, and the beautiful groves have been unmarred by the few campers who visit them. Although the canyon of the main river above Paradise valley is impassable, there is a dim trail up Woods creek, a large tributary entering from the east. This leads us back to the main crest again, and Mt. Pinchot (13,485 feet) may be ascended, or the lake basin north of the Kearsarge pass explored.

Returning again to Copper creek, we hurry down the trail to the level floor of the King's river canyon, and aim to reach Kananyer's camp in time for dinner, for well we know the good things that Mrs. Kananyer will have in storc for us.

CARELESS HUNTERS IN THE MOUNTAINS.

An old mountaineer, who knows every foot of the Sierra Nevadas for a hundred miles north and south, and who has both means and leisure, was asked by some friends of his in Sonora one day last week why he stayed in that city of surrounding foothills during the intense heat of summer instead of hiking for the higher altitudes, where the water was but merely melted ice, and also where fish and game were as plentiful as the most ardent sportsman could wish for. He listened to the good-natured chaffing, to which he replied:

"Does appear strange that a man who has lived in the open as much as I have should seem content to pass a summer with those who grumble and growl, and sweat in the altitude where the sun comes up frying on both sides, sizzles all day like a cold trout dropped into a hot frying pan and grins like a fiend as he winks good night to the scorched gang of fool mortals he intends to soak harder than ever the next day. The mountains are high and wide, and the streams long, so it does seem that there ought to be room enough for everybody, hut there isn't; that is, for me and some of the crazy gangs that now go whooping through the woods like a pack of drunken Indians on the Fourth of July. Armed with all sorts of weapons, they blaze away at every moving object—their motto being to shoot first and find out what they shot at afterward. Two years ago I skipped out alone for a nice place not a huudred miles from Lake Eleanor. The first morning I was awakened hy a shot, followed hy the zip of a bullet which struck near where I was rolled up in my blankets. What was up? Why, a darned sand-lapper thought I was a hear, and I only wished I had been for about five minutes, instead of a sort of civilized human being who could sympathize with idiots. Two days later another fellow took a crack at me—said I looked like a deer. Then I crawled into the hrush, where I fortunately succeeded in remaining concealed without some dude in a shirtwaist, dinky cap and golf stockings clubbing me to death in the innocent belief that I was a rattlesnake. When night came, I climbed on my pony and hit the trail pretty fast, the darkness helping me to escape, although I expected to be hombarded every moment as a peripatetic coyote. At sunrise I was in town. I've heen in or near one every sunrise since, and expect to be just as long as the good Lord lets me live."

At Bairds eighteen men are working at the United States fishery taking eggs from the Summer run of salmon. The first catch was made last Friday. The Superintendent, Captain Lamhson, says the season promises to be a very successful one. He estimates that between 12,000,000 and 15,000,000 eggs will he gathered.

The season at the fisheries at Butte Creek and Mill Creek, in Tehama County, will not open until in the early part of Octoher.

ODD PHASES OF BIRD LIFE.

It may be a shock to some persons to learn that the birds of the present day are descendants of reptiles. This fact has beeu conclusively proved by the fossil remains of creatures that form the intermediate stages between the hirds of to-day and the reptiles of prehistoric ages.

In fact, many of the birds have not yet completed their evolution, as in the case of the penguiu, whose wings are merely rudimentary, absolutely inadequate for flying purposes, and useful only as a means of propelling these awkward creatures through the water.

The crafts are nearly all represented in bird life, but perhaps the most striking achievement is that of the tailor bird, of Asia. When preparing to make a nest these birds choose a plant with leaves about the size of a man's hand. These they proceed to make into a bag. They pluck the boll of the cotton plant and actually spin it into thread with their hills and feet and therewith literally sew together the edges of the chosen leaves.

The vigor and endurance that birds display upon the wing is astonishing. Nearly all the migratory species of Europe must cross the Mediterranean with resting.

The litle Eastern bluebird pays an annual visit to the Bermudas, six hundred miles from the continent, and Wilson estimated its very moderate flight at more than a mile a minute.

Remarkable stories are told of the long fights of tame falcons—one going one thousand three hundred miles in a single day. Jawal mentions carrier pigeons that flew from Rouen to Ghent, one hundred and fifty miles, n an hour and a half; and a certain warbler must wing its way from Egypt to the Baltic, one thousand two hundred miles, in one night, so it is claimed.

The cowbird, or cow blackbird, is the only bird that we have iu this country which is unnatural in its parental duties. It never builds a nest for itself, but lays its eggs in other birds' nests, thus forcing the rightful owners to assume parental duties.

It is sagacious enough to choose the nests of birds smaller than itself, so that its young, when it is hatched, being inevitably the largest of the brood, must necessarily receive the lion's share of the attention of its foster parents. The birds thus afflicted resort to various means to rid themselves of this unwelcome addition to their litter. The most ingenious method is that frequently used by the little warhler who will often build a sub-structure on top of her original nest, thus burying the eggs of the cowbird and often some of her own with it. Nests have frequently heen found with two of these snbstructures in cases where the warbler has twice been visited by the cowbird.

The drumming of a male partridge is a curious feat, and one well worth watching if the opportunity presents. The bird usually stands upon a fallen log with his ruff and tail erect and his wiugs trailing and rigid. He commences to move his wings with a slow downward and forward movemeut which steadily increases in power and rapidity until the swiftly vibrating wings appear only a semi-circular outline of mist above the bird, thus giving rise to a sound which may be appropriately likened to the reverberation of distant muttering thunder.

This is done at the mating season, when the male is wooing the female.

The means by which seabirds quench their thirst when far out at sea is described by an old skipper, who tells how he has seen birds at sea, far from any land that could furnish them water, hovering around and under a storm cloud clattering like ducks at a pond on a hot day, and drinking in the drops of rain as they fell. They will smell a rain squall a hundred miles distant, or even farther off, it is asserted, and scud for it with almost inconceivable swiftness.

Birds often have more sagacity than is generally accredited them. The long-billed marsh wren, which builds a substantial nest of rush leaves, swung in the tall rushes of a marsh, invariably makes several nests but only uses one. This is undoubtedly for the purpose of misleading its enemies. The nest used is always the best hidden, while those not used—the decoy nests—may be easily found hy those who seek them.

The keenness of both sight and smell with which those scavengers of nature, the vultures and huzzards, are endowed is remarkable. It is a fact that, let an animal die, even though there be not one of these birds in sight at the time, yet in a surprisingly short time one will appear, at first a mere speck in the sky, but rapidly approaching with narrowing circles. It will fly unerringly directly to the carcass. Soon afterward others will follow, and in a very few hours the bones of the dead animal will be picked cleau.

One of the mysteries of the ornithological world was the sudden and almost total extinction of the passenger pigeon. A good deal less than fifty years ago enormous flocks, consisting of millions of these birds—so many that they darkened the sky—were not an uncommon sight. To-day they are so rare that it is with the greatest difficulty that museums are able to obtain even one pair for exhibition purposes.

Many birds, in their nesting habits, have accommodated themselves to the advance of civilization. Thus the barn and cliff swallows, which once built under overhanging cliffs and in caves, now place their nests on the rafters and beneath the eaves of our barns.

SANTA CRUZ CONVENTION.

The eighth annual convention last week at Santa Cruz of the California Fish and Game Protective Association has, in one respect at least, been productive in bringing about a sentiment that has been lacking, to a greater or lesser extent at previous annual meetings of that organization—and that is, the possibility of the development of harmony and a spirit of mutual accord between the association, the State Board of Fish Commissioners, sportsmen at large, hotel men and other various interests with which fish and game affairs are more or less identified.

The establishment of the California Fish Commission was primarily for the protection and enlargement of the supply of food fish of the state, commercial interests principally. Incidentally, the scope of the work of the Commission was enlarged and took in the protection and propagation of both fish and game, this stage of affairs being backed by various acts and statutes passed from time to time. Much criticism has been indulged in against the Commission from year to year for alleged acts of undesirable performance or non-performance. The convention at Monterey last year is an illustration as to how matters stood. The Commission and its friends claimed, for one thing, that the board was hampered and confined within certain bounds by a lack of sufficient funds—the annual appropriation was not large enough for the increasing work of the Commission.

The establishment of the hunters' license law and the amount of money received annually from this source, $119,000 last year, it is stated, has no doubt placed the Board in a position to do most effective and dilligent work.

Now, then, given that the State Board was originally founded for the protection and propagation of the fish and game of the state, we will ask if the California Fish and Game Protective Association was not founded and organized with essentially the same purpose in view? If not, the association should change its name.

Such being the case, why cannot the two bodies work in conjunction with each other? If this can be brought about, surely most gratifying results will ensue. The Board has come in for much comment in the past, of its particular merit we will not here join issue, for the time being it is irrelevant.

The personnel of the Board has recently been changed; two of the present members are well known sportsmen. The presiding officer knows something about angling, so we will call him a sportsman, brevetted on the field. Aside from this, no one can gainsay his executive abilities and his position in a sphere of usefulness that sportsmen will readily acknowledge to be of the utmost importance for the good of the cause. Having the funds, the Board is in a position to do much, but we doubt if opposition or coercion will be of much benefit in bringing about the desired ends. Far better be it to follow the policy of "hands off" and let the Board go about its business in its own way. In other words, with all due respect, "give them a chance."

Another change we note is that of the new board of officers of the State Association. The prior board of officers accomplished more than their most sanguine friends believed they would. Legislation was passed through their earnest and coherent efforts that was practically the saving of the fish and game situation—the salvation of our valley quail, for instance. No one can gainsay the value of the services or take away the honors due the gentlemen who so enthusiastically guided the Association's progress and its steady career in fraternizing the sportsmen of the State.

The changes in the official government of both the Commission and the Association have brought up a condition of circumstances that makes possible a closer relationship on the mutual lines of fish and game protection and propagation. Suggestively and en rapport on the one side, officially and with appreciated collaboration on the other.

Each year when the convention meets there is quite a canvass for the assembly place for the succeeding convention. Leading sportsmen vie with each other in securing votes for their own city. Last week a delegate representing a prominent and up-to-date bay county association of sportsmen could have had his town selected as the place for next year's meeting, but a few words from a Southern California hotel man who was present convinced the meeting that it would be a coup d'etat if in attendance at the convention of 1909 a strong representation of hotel men were present. The delegate from across the bay immediately withdrew his motion in favor of Lake Tahoe for next year. The "game protectionists," so-called, and the hotel and restaurant interests have been at loggerheads for years past, here is a chance for more harmony, that the wise ones on both sides of the house can be depended upon to accomplish something worthy of doing.

The business meetings of the convention were marked by the non-advocacy of many radical measures. Certain laws on fish and game that have been unsatisfactory, inadequate or necessary were touched upon and will be offered in proper form for legislative action. These matters will be commented upon in following issues.

The officers of the association elected for the ensuing year were: Hon. Henry W. Keller of Los Angeles, president, who was elected unanimously on motion of retiring President H. T. Payne, who had served for eight years previously; Mayor A. A. Orr of Visalia, secretary, who was elected unanimously on motion of E. A. Mocker, retiring secretary, who had served for five years; Frank Miller of Riverside, J. Sub Johnson of Visalia, Dr. George of Antioch, H. A. Green of Monterey and C. L. Powell of Pleasanton, vice-presidents.

AT THE TRAPS.

The Golden Gate Gun Club's closing blue rock shoot for this season took place at Ingleside last Sunday. The attendance of shooters was rather limited, many of the club members and shotgun devotees being out of town—the possibilities of the trout stream, stubble field for doves and hills for buck being evidently stronger than the attractions of the traps.

Emil Holling won the Du Pont trophy race, and also the double bird match. The purse winners were: Holling, championship class; Murdock, first class; Ashlin, Ashcroft and Taylor divided in the second class. A summary of scores follows:

Club shoot, 50 targets—Holling 49, Murdock 45, Kleyesahl 37, Price 33, Thomas 32, Ashlin 36, Ashcroft 33, Taylor 32.

Twenty-five-bird race for Du Pont trophy—Price 19, Taylor 15, Thomas 20, Ashlin 20, Murdock 20, Klevesahl 20, Knick 16, Lohac 17, Holling 16, Holling (back score) 20.

Double rises, 20 targets—Thomas 11, Taylor 13, Price 11, Ashlin 11, Ashcroft 12, Kuick 15, Holling 15, Klevesahl 10.

Rose City Gun Club members shot with the Multnomah Rod and Gun Club shooters on the 9th inst. Abrahams of Portland was high gun for the day. A. Woelm won the Class C trophy for the second time and is now its permanent owner. A summary of scores for the day is the following:

Abrahams shot at 50, broke 49; Howe 100, 92; Robinson 100, 87; Fred Wagner 75, 64; Shangle 75, 59; Burns 75, 58; Fay 25, 18; Woelm 100, 68; Martell 75, 51; Keith 75, 50; Kendall 50, 33; Johnson 50, 30; Johnson 50, 30; Boose 50, 25; Lewis 50, 23; Ring 15, 6.

The shoot held at Squalicum Creek August 2, says the Bellingham Reveille, by the local gun club proved to be a great success; in fact, more successful than expected. Crack shots from all over the state and Western Canada arrived in the city Sunday morning to enter and were shooting regularly at the traps from 9 a. m. until late in the afternoon.

Dr. White of Spokane took the individual honors by breaking 102 bluerocks out of a possible 110. This is excellent shooting and he surpassed all the scores made by the experts who were sent here by powder companies to take part. B. Clewley, representing a cartridge company, broke 99, while Logan, representing a gun company, fell down on the first twenty birds and only scored 88. George Miller and W. Spratley headed the local squad of shooters by scoring 99 out of a possible 110 birds.

Captain Mayus scored a total of 87 birds out of a possible 110 in the nine events; Cunningham, 80; C. R. Connell, 51; J. Backer, 70; F. C. Oliver of Ladner's Landing, B. C., 98; J. Cooper of Tacoma, 82; Burnett, 85; Junker, West Seattle, 89; Baldwin of Seattle, 85; E. W. Cooper of Tacoma, 56; MacLaughlin of Seattle, 95; Ellis of Seattle, 97; Dr. Steele of Seattle, 99; Marsh of Seattle, 97; Mahan of New Westminster, 97; Brackney, 97; J. Kienast, 87; J. C. Inks, 59; D. Cooper, 96; H. E. Johnson, 90; Clewley, 99; Robinson, 99; Logan, 88; Forbes, Spokane, 94; Dr. White, Spokane, 102; G. Miller, 99. and Spratley, 99.

In the team shoot West Seattle broke 71 birds out of a possible 75; Seattle, 66; Bellingham, 64; Vancouver and Spokane, 62; Bellingham, second team, 59, and New Westminster, 57. The first prize for this shoot was $40.60; second prize, $24.40; third prize, $16.27.

It will only be a question of a few years until the sport of deer hunting in the San Bernardino mountains will be obsolete, states the San Bernardino Index. This condition will be brought about by the ever present game hog, who kills out of season, kills more than he is allowed to kill, and slays both bucks and does, indiscriminately.

Hunters recently in the mountains are authority for the news that the deer are being rapidly exterminated by the illegal methods of unscrupulous hunters. It is likely that at the next session of the legislature a law will be passed forbidding the killing of deer for a term of years.

There is on exhibition at the sporting goods house of Branch's, 309 East Weber avenue, Stockton, an ancient fowling piece nearly 300 years old. It is an old flint lock shotgun made in London in 1622. It was presented by the maker, Nathan Wight, to Yale Wight, and is now the property of A. H. Wight, of 639 Pilgrim street, Stockton, who secured it on the late settlement of the Wight estate. About 80 years ago the flint lock was changed over to a percussion cap fire. The barrel is 48 inches long. The engraving on the barrel is still plainly visible.

Drink Jackson's Napa Soda.

LOST BY VOTES—NOT BY MISS.

How J. E. Gorman lost the revolver championship at Bixley is told by him in a recent letter to H. A. Harris of Oakland. The story detailed in the letter is an interesting one and is here quoted:

"Of course you know the result of our shoot long before this will reach you, so I will not bother you with the details of the match. Suffice it to say that we came, we saw, we conquered, and we did so decisively, leaving no room for argument or doubt. I never saw more miserable or wretched weather than we had during the two days of the match.

"I lost the individual match by votes, not by shooting. The Belgians were looked upon as the probable winners, for in that team were champions of noted record. Instead of all teams starting at one time the committee assigned to us a few targets, according to the number of entries from each country; from two to three targets to twelve, the limit. Thus we were enabled to shoot when we felt inclined. It resolved itself into a proposition of luck and a knowledge of the conditions in the rain and wind. The English started in the morning and others followed their example. It was six shots in four minutes, sixty shots to count. I was prepared to start shooting at 10 a. m., as conditions were fairly good, and I also figured that the English were better able to judge conditions than we could.

"But our captain had us draw chances for the choice of time when to shoot. I drew sixth choice, giving me the chance to shoot either between 4 and 5:30 or between 5:30 and 7 p. m. I chose the latest hour. When I started the champion of the Belgians had already rolled up a score of 490, which only confirmed the opinion the people had formed of him in advance. For a couple of days prior to this match he had been handing out his card to people whom he met, designating him 'world's champion pistol shot,' who had won the championship of the Continent for the past four years, except one, which was won by his father, the whole family being crack shots. The second high score, 487, was also made by a Belgian, while the third, 480, was made by our Charles Axtel.

"Our other men had not done much during the day. Winans quit after the first few scores, very much disgusted. Dietz and I started at the same time. I shot along in pretty strong form. Pretty soon it got to be noised about that I had a chance to win. Then they all crowded around, watching the race as it grew closer. My thirty-fourth shot I called a little right. The spotter said O. K. The bullet passed through the same hole as my thirty-second, a nine. When the target came up we could not see but five shots, convincing us that the one shot went through the same hole made by a previous bullet. The range master would not allow it. We protested and the matter went before the council to decide.

"The council did not want to decide, as the contest was very close. The windup showed me winner with 494 if the shot was allowed and third in the race with 485 if the shot was not allowed. The matter was then left to the eight captains to decide whether there were five or six shots in the target. I knew then that we would lose, as all the teams from the Continent would vote in favor of the Belgian, as they did. The British team voted for me. I lost. I beat my lucky rival the next day in the team match, 501 to his 477. Our team beat the Belgians fifty points, the English ninety-eight points and the rest of the teams were left way behind."

Brush rabbit shooting will soon be in order. The young rabbits are of good size and as a table dish are preferred by many to chicken.

In the vicinity of Halfmoon Bay brush rabbit shooting is a favorite sport, the hunters using dogs trained for that kind of hunting. Rabbit shooting before dogs is no easy game. To be successful the hunter must have a quick eye and grass his game almost entirely by snap shooting at the little fellows as they pass small open patches between the undergrowth.

A number of sportsmen prefer hunting brush rabbits, erroneously called "cottontails," to any other kind of shooting, although it is considered a pot hunter's sport by the devotees of quail and duck shooting.

A brush rabbit fleeing for its life before a brace of fox terriers is not fooling away any time by any means, and the man who can score a clever stop as his quarry skims over the sage-covered sandhills, showing its white tail occasionally, can well afford to congratulate himself on his prowess as a snap shot.

The true cottontail rabbit is indigenous to the open plains, and is very plentiful in the vicinity of Bakersfield. It is somewhat larger than the brush rabbit, found along the coast. Some years ago, before the farmers of Alameda and Contra Costa counties placed out poison to eliminate the squirrel crop, brush rabbits were exceedingly plentiful along Wild Cat and San Pablo creeks, and in the canyons north of Hayward and San Leandro.

The State law does not place any limit on either cottontail or brush rabbit.

An excellent recipe for keeping hunting boots waterproof and in nice pliable condition is the following: One pint of castor oil, 1 gill spirits of turpentine, ½ pint of sperm oil, 4 ounces of Burgundy pitch, 11 ounces of beeswax, 11 ounces of ivory black, a piece of soft soap the size of an egg, 2 ounces of resin. Mix well together and keep in a covered tin box. This mixture makes a very good boot and shoe dressing as well.

IN PERCHERON LAND.

For some weeks I have beeu a rather constant visitor among the farms of Le Perche. It has been an enjoyable experience. Stockmen have certain traits in common the world over, and horsemen in particular. These people here in France, who have furnisbed America with so many valuable draft horses, are essentially farmers, but among their animals the horse holds premier position.

Le Perche is a region of hills and vales, of orchard and meadow, of diversified crops. Here one sees many trees that are common at home—as elm, maple, sycamore, linden and the like. Wheat and oats are the main crops in some sections, while alfalfa is very generally common for hundreds of square miles. In central France I found alfalfa the staple roughage. Some fine fields of common red clover are seen as one goes about. The grass is usually a mixed sort, with English ryegrass an important portion.

The land is beautifully rolling with fine hills here and there. The soil is quite free of stone of much size, and much of it is a nice mellow loam with a clayey tendency. There are beautiful meadows and heavy crops. For many miles the valley of the Huine extends along the way, and on its wide and fertile expanse may be seen grazing Percheron horses and fat cattle, a lovely pastoral scene.

Nogeut-le-Rotron is the head center of Percheron geography. From here one may easily reach the leading breeders and dealers. The roads all through this country are superb. France has the finest highways in the world, and the National roads which extend from Nogent put to shame anything we have at home. Napoleon, the great, was the author of these roads, and their perfection and beauty must be seen to be appreciated. Think of a fine macadamized road about 18 feet wide, with a wide grassy border trimmed down by flocks of sheep, and with lines of carefully planted and cared for trees flanking each side. Sometimes on the narrower department roads, the trees form a perfect green arch overhead, through which sunlight makes its mark on the roadway below, giving a charming view in the distance.

The homes of the Le Perche farmers have much in common in their architecture, though of course they differ in cost. Commonly a quadrangle is formed, the house occupying all or a part of one side, and barns the other three or perhaps but two sides. The buildings are of brick or stone and are usually covered with cement. Windows are fairly abundant, but the people of this country have shutters and do not let in the sunshine as we do. The roofs are usually of tile, and there are many houses one story high, and but few barns over a story and a half. The houses have no cellars. The stables have cement or stone floors, have few windows, and are dark, and from the modern point of view lack ventilation and sunlight.

In the houses one finds naturally a variation in furnishings, but my observation in numerous homes, leads me to regard the farmer here as in comfortable circumstances. Prosperity in fact is to be seen on every hand. This year there are good crops, the stock is healthy and the farmers are doing well.

As one goes about in a considerable territory southwest from Paris, he sees great, fine horses, heavily harnessed, hauling tremendous two-wheeled carts. Very frequently a lamb's hide, tanned with the wool on, covers the top of the collar. If one is familiar with the breeds of draft horses, he must at once recognize these blacks or grays as Percherons. The individuality of the breed is pre-eminent. One sees these same typical Percherons hauling heavy omnibuses in Paris, or pulling other great loads in this French metropolis. Sometimes the horse is alone, but there may be two or more in tandem hitch. On the farms, in the heavy work, the horses are always hitched tandem, and three horses are a common sight, hauling manure or hay as the case may be, in single file procession.

Refering to the heavy cart, this heaviness is a real and not imaginary thing. A while ago I strayed into a yard where an ordinary tire of a farm work cart leaned against the barn. I stood inside the tire and there was space enough left then for my head not to touch. Six feet in diameter was the dimension, and the tire itself was a full inch thick. But the farmers by rack arrangement extend the carts before and behind, and secure enough capacity to haul immense loads at a minimum effort. These big tires in the past century have rolled and rolled the roads so as to assist in making them better and better. Now the automobile is speeding over these same highways and in some communities is injuring them to such extent as to require much more labor than under the old condition to keep them in the expected repair. The suction process of the wide rubber tire draws out the firm, binding particles of the road, and produces unevenness of surface and a rougher finish.

On market day at Nogent it is an interesting sight to see the farmers driving in, in many cases having fine, breedy looking mares hitched to driving carts. These horses invariably appear in good flesh, although not fat. Thin horses, such as we have in America, are here few and far between. It is an object lesson worth going a long ways to see—these fine horses, mares or stallions as the case may be, serving as the all round faithful servant of a great community of farmers. Stallions on the small farms, or in town, are commonly used as we use geldings. Stallions serve as work horses generally in France, and draft geldings are rare. In the barns of the Paris Omnibus Company, where they have 10,000 horses, nearly all of them are stallions. The necessity for making them into geldings has not been manifest—in fact the people believe the stallion a hardier, better worker and more intelligent than the gelding. Of course horses that are being fitted for sale are not worked, excepting to exercise.

In traveling about among the horses of Le Perche I have been impressed with the size and draftiness. Occasionally one sees a smaller type, such as prevailed in the olden days, but scale and quality are certainly very common characteristics of the breed. A large number of the horses that find their way abroad, are bred by small farmers, who keep two, three or four mares, and commonly work them These mares breed regularly, and the important dealers and horsemen of Le Perche buy many of them as weanlings, and then take and carry them through till they can turn them off at from two to four years old, as the case may be. Some men handle stallions exclusively, and but few large dealers deal in mares, at least worth mentioning. The buyers come in here from North and South America and the European countries and they find Percherons everywhere, of varying degrees of excellence. One may buy from a small farmer, or he may go on a farm where 50 or 100 stallions furnish material to choose from. In this region, barring an occasional coach horse or a donkey, Percherons make up the horse population. How many there are here, it is impossible to say, but as a rough estimate Mr. Charles Aveline, president of the Percheron Society, gave me 10,000 as a figure.

Referring to Mr. Aveline, reminds me of a delightful little affair here in Nogent which recently occurred. Mr. Aveline had been given the degree of Chevalier in the Legion of Honor, and the Percheron men and friends of bis, to the number of about 150 gave him a complimentary dinner in the city hall here, in honor of this event. It is fair to say though, that this testimonial of esteem, was in recognition of what he has done to promote the Percheron horse. On every side I hear men speak of him in highest esteem. At the banquet were gathered the most notable breeders of Le Perche, and eloquent expressions of love and affection were publicly made. At one time the guest of honor sat at the table, with tears streaming down his face, so deeply was he moved by this expression of brotherly love. In honoring Mr. Aveline, the people of Le Perche paid a well merited tribute to a fine type of French gentleman and stockman.

What a lesson is found in this region, bearing on the commercial value of a fine breed to a community! Horses are constantly being shipped from here to various parts of the world, the money for which the Frenchman places in his pocket. And he more than anyone else, realizes that it is careful breeding and mating that is essential in keeping up their horse stock. Realizing this, the national government maintains at a minimum cost, fine Percheron stallions in the country, available to every breeder. At Le Pin, north of here, at the government stud, are a lot of fine stallions bought simply for service in the farms of France. Little depots, as they are called, where one, two or three stallions stand, furnish the best of breeding stock. Besides these, there are many fine stallions in service, owned by private individuals. So officially and privately France is endeavoring to improve its Percheron stock. Men who have been coming here many years, tell me the horses have greatly improved during their experience. It could not well be otherwise, with the method in practice. It is an object lesson that the rest of the world might profit by, in application to making some improvements at home. They do not breed Percherons here on trotting mares, or Shires on scrubs. A harmony of blood line development creates the thing the breeder here seeks for, and he is tolerably certain of the outcome. There is no experimental policy at all in the method. It is the working out of an established system. What we need at home is more system, based on sound common sense.

These people also keep their horses in a natural sort of fashion. They feed more or less green stuff in the summer time. One may see horses of both sexes in the fields, grouped according to sex and age. Heavy grain feeding is not practical. It has surprised me in my visits among the stockmen generally in France, to see how largely they depend on hay, or grass and roots. At the Paris and Mortagne shows, green bundles of alfalfa, sainfoin and grass were universally fed. In the summer time they use green stuff as we rarely try to do. In certain sections I find sainfoin, a plant of the legume family, much praised as horse feed, both green and cured. Straw is generally fed as a dry roughage. Oats are the staple concentrate, and but little other than this, and a little bran, is fed. Some people have their horses in splendid flesh, but many have them in what we would call fine shape for feeding, but not appearing starved, with prominent ribs, as one might surmise. When it comes to work, the climate here is cooler, than with us, and so the horse suffers less. Further, and very important, the driver spares his horse, and does not take the last bit of work out of him possible. But under our hot summer suns it would be practically impossible to keep up the horses in as fine condition as they appear here on every hand.

We Americans as a people are young in experiences, while over here the Frenchmen are old in method. We shall gradually accomplish the purpose we are setting forth to do in America, yet visits among such a people as these of Le Perche, should help the American stockman by valuable suggestions.

C. S. PLUMB, in Chicago Breeders' Gazette.

HOW CARLOKIN WON AT BUFFALO.

The Buffalo Sunday Express gave the following account of the Empire state $10,000 purse which was won by the California stallion Carlokin, owned by Claude V. Jones of Modesto, at the Buffalo track on Saturday, August 15th:

"In the draw for positions Carlokin got the pole, the others drawing positions as follows: Axtellay, two; Loyal, three; Mae Heart, four; Nahma, five; May Earl, six; Genteel H., seven; Dewitt, eight, and Locust Jack, nine.

"When they got the word in the opening heat Locust Jack cut across with a tremendous burst of speed and at the quarter was in third place, Carlokin being first and Mae Heart second. May Heart fell back on the upper turn, and, heading into the stretch, Locust Jack came up to Carlokin and from there home was one of the most desperate contests ever seen on a track. Under the superb driving of McHenry, the gray gelding raced the California stallion every foot of the way to the wire, but he was not able to head him and was beaten by a bare half length. Nahma finisbed third, Dewitt fourth and Genteel H., who had made a break, was fifth.

"In the second heat, Andrews with Dewitt took a hand in the fray, his horse and Nahma chasing Carlokin to the half in close company with Locust Jack. On the third turn Jack fell back and Genteel H. came up among the leaders, the battle between Carlokin, Nahma, Dewitt, Genteel H. and Locust Jack being a desperate one the last 300 yards. At the finish the California stallion had a shade the best of it, the other four being lapped, all under the whip and only the judges could tell just how they should be placed, they finally placing Carlokin first, Nahma second, Dewitt third and Genteel H. fourth.

"In the third heat a new factor showed up, the mare Axtellay, driven by Thomas. She lapped on to Carlokin and at her wheel was May Earl, they maintaining these positions to the half. There Dewitt came out of the bunch and in a hot brush through the stretch got second place, Carlokin winning by a small margin. A notable feature of this heat was Genteel H.'s phenomenal burst of speed in the last half. This horse was not on his stride when the starter sent the field away and he broke just after the word was given. At the half he was fully twenty lengths back of the leaders, but when McDonald set him going, he simply ate up the space and finished third. As the leaders trotted this half in 1:04, Gentell H. must have stepped the distance in about 1:02 or 1:01½. It was certainly the fastest piece of work seen during the meeting by a trotter and many good judges expressed the opinion that the Buffalo trotter would have won the heat had he got away well.

"The time of the three heats was 2:08¼, 2:09¼ and 2:09, very fast considering the condition of the track, which lacked much of being the billiard table sort of tracks the horses found at Detroit and Terre Haute."

STALLIONS YOUNG AT FIFTEEN.

William Bradley's purchase of Bingen 2:06¼ for $40,000—some say $50,000—caused a mild sensation among men who regard a fifteen-year-old horse as being almost on the brink of the grave. As a matter of fact, few trotting sires are really worth owning until they are about as old as Bingen. Too many of them, like the incomparable race horse Cresceus 2:02¼ give every promise which rich breeding and great speed and courage can afford of success in the stud, but when put to the test not one stallion in one thousand is a really great sire, and that one is rarely established as such until he is more than fifteen years old.

Electioneer, the grandsire of Bingen, was credited with only ten trotters in the 2:30 list when he was as old as Mr. Bradley's horse is. Bingen has that many in the 2:15 list and is the grandsire of seventeen more. George Wilkes 2:22 was regarded as a rank failure in the stud until he was twenty years old. At Bingen's age he did not have a representative in the 2:30 list. Today there are more than five thousand of his descendants in the 2:30 list.

Rysdyk's Hambletonian, the sire of Electioneer and George Wilkes, was just beginning to be known outside the county in which he was raised when he was fifteen years old. It was the winning race of George Wilkes against Ethan Allen in 1862 for $10,000 stakes that brought Hambletonian into prominence and enabled Mr. Rysdyk to raise his stud fee from $35 to $75 in the following year. If anybody had bought Hambletonian for $40,000 when he was fifteen years old the investment would probably have been a satisfactory one, since he earned more than $75,000 in the next two years and nearly $200,000 before he died at the age of twenty-seven.

The using of numbered saddle cloths on all horses starting in races, in addition to having the drivers wear arm numbers, makes the distinction of the horses much easier to the spectators. These saddle cloths are in use at all the leading eastern tracks and should be introduced at the principal meetings on this coast.

The sale of Shorthorns to take place at Woodland on Saturday, September 12th, will offer a good opportunity for buyers who want choice stock.

THE FARM

AUSTRALIAN EGG LAYING.

At the Hawkesbury Agricultural College, Australia, an egg-laying contest has been going on for six years. The last year forty pens of hens, six hens to a pen, were carried over from the previous year for the purpose of comparing ing the second year's laying results with the first.

The best two-year results were from a pen of six Chinese Black Langshans, producing 1,481 eggs the first year and 1006 the second year or nearly 247 eggs per hen the first year and 168 per hen the second year. In these calculations we are using the nearest whole numbers rather than fractions of eggs.

A pen of six Black Orpingtons produced 1,247 eggs the first year and 1,054 the second year; or nearly 203 eggs per hen the first year and 176 the second year.

Another pen of six hens, White Leghorns, produced 1,437 eggs the first year and 841 the second; or about 240 eggs per hen the first year and 140 per hen the second.

The pen making the least two-year showing produced 898 eggs the first year and 484 eggs the second; or 150 eggs per hen the first year and 81 eggs per hen the second year.

This comparison, one year with the other, clearly demonstrates that the pullet year is surely the best laying year.

The contest between sixty pens of pullets, six in a pen, for one year, produced the remarkable result that the twelve pens with the highest scores were White Leghorns, each averaging 200 eggs per hen per year or better. These six records ranged from 1,219 eggs per hen, or 202 eggs per hen, to 1,174 per ton, or 246 eggs per hen per year.

In considering this subject our readers reminded that there is no such thing as training hens for a contest; all that can be done in the way of selection for such a contest is to obtain good, likely specimens from known egg-laying families. Pullets from hens known to have large egg-laying records and males of equally well-known egg-laying families can be mated together to good purpose. A few contests are necessary before good selections can be made. The Australians have taken the lead in practical and popular egg-laying demonstrations.

THE CANNING FACTORY.

The canning factory to-day is one of the most popular industries in the United States. Such a profit is there in this business and so ready are sales made of such products that many farmers, and particularly farmers' wives, have inaugurated home canning factories and have been very successful in marketing their own products. Canning factories not only afford a market for the fruit and employ a large number of people who spend their money in the community, but they can be made a source of profit to the owners. Even with railroad facilities through the country to haul off the fruit, we would still raise a surplus sufficient to warrant the operating of canning factories. But the canning of fruit is only one of the products of a canning factory. Corn, beans, tomatoes and sweet potatoes, each in their season, would furnish work for the plant practically all the year round. We have many small canneries now, but their output is but an insignificant part of the consumption of the country.

WINDMILLS.

There are few farmers nowadays who do not count the windmill among their most profitable investments. The windmill, with its many improvements as we know it to-day, fills a place in the farm life of the country which could not well be left vacant. Running on ball-bearings, steel girded and durable, the modern windmill will give a supply of water equal to any enjoyed in the larger cities with much less expense.

However, in purchasing a windmill, the farmer should be very careful that he is not humbugged, as there are quite as many poor windmills thrust upon the market for the unwary as in everything else. To be satisfactory, three points should be considered. The first and essential point is power. It is economy to get a larger wheel than may seem adequate and a tower of ample height. The windmill perched on a knoll, contrary to popular belief, needs to be just as high for effective work as the windmill set in a hollow. The safe rule is to have the top of the tower ten or twelve feet above all buildings within a radius of 400 feet. Pumping capacity, too, is an important item. Wind engine specialists estimate that twenty barrels daily for household use and stock will cover the needs of the average farm, but liberal addition should be made if acreage is to be supplied. Too, the storage capacity is an important feature of the modern windmill. Get a large tank and insist upon a large tank. Where tank and connecting pipes are to be used in winter weather, same should be encased in wooden boxes with air spaces between them. Where the tank is directly over the well the pipe should be enclosed from below the frost line in the well to the tank. These "frost boxes" are made, in severe climates, with three air spaces lined with tar paper. Some tanks are constructed practically frostproof.

Many attempts have been made to harness the wind for other purposes than pumping and notably among these has been the effort to run a dynamo by this means. The variableness of wind power has made this a failure. The idea of using the stored power of water already raised to tanks by the faithful windmill, while new, is rapidly being perfected.

This means that electric light and other advantages of this wonderful power will not be confined to our cities and towns. The time is not far distant when any farmer who has a windmill can operate his own power plant. The method is simple. Regulation of the flow of water from the tank is all that is needed to operate a water motor to which is connected the dynamo. The water can then be used for irrigating or re-stored for future use. In this way the dynamo runs evenly whether there is a breeze or a gale.

There is no power that man can utilize so cheaply as the wind engine, and for irrigation it is often successfully used. Even in arid regions where there is small rainfall, the windmill of to-day will often furnish an adequate supply of water to produce the best of garden and orchard crops, and there are many farmers who construct reservoirs for the purpose of storing water for stock.

It is estimated that from 81 to 83 per cent of the corn crop of the United States is fed to livestock. The balance goes into the hundreds of manufactories. About 80 per cent is shipped out of the county where it is grown. During the last five years an average of corn exported has amounted to 85,000,000 bushels annually. This is about 3.3 per cent of the total production. The production of corn in 1899 was 2,666,000,000 bushels. This figure is 2 or 3 per cent of the average yield for the past five years.

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.

Address this office,

BREEDER and SPORTSMAN.

For Sale or Trade.

A fast 4-year-old trotting stallion. Mahogany bay, black points, no white; kind, handsome, stylish, intelligent and a sure foal getter of the kind worth while. He is by one of McKinney's best bred sons and out of a mare by Sable Wilkes. He is without fault or vice and for sale because not needed. Will trade for good work stock. For full pedigree and particulars address.

SABLE McNEER,
1319 Pearl St., Alameda, Cal.

Good Ones for Sale.

Standard and registered stallions by McKinney, brood mares, high-class roadsters and colts at very reasonable prices. I am closing out all my horses at private sale. Am offering some of the best bred and best indlviduals on the Coast. Write for particulars. Address,

THOMAS SMITH,
1021 Georgia St., Vallejo, Cal.

FOR SALE—PACER.

Highfly; 2-year-old record 2:24½; bay; 6 years old; all sound and a good actor; guarantee to show a mile in 2:08 or better any day or no sale.

My only reason for selling this horse is that I don't care to race horses any more. This horse will surely beat 2:05 before the racing season is over. He is entered in the California Circuit and will be entered all through Oregon and Washington. T. W. BARSTOW,
1042 Alameda avenue, San Jose, Cal.
Phone—Black 2841.

"HOWARD SHORTHORNS"-QUINTO HERD.—77 premiums, California State Fairs 1902-3-4. Registered cattle of beef and milking families for sale. Write us what you want.
HOWARD CATTLE CO., San Mateo.

JERSEYS, HOLSTEINS AND DURHAMS—Dairy Stock a specialty. Hogs, Poultry. Established 1876.
WILLIAM NILES & CO., Los Angeles, Cal.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to

S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

Stallion for Sale.

Chestnut Stallion by Nutwood Wilkes 2:16½, dam Carrie Malone, own sister to Chas. Derby 2:20, Klatawah 2:05¾, etc. Carrie Malone is the dam of two in the list, and grandam of Ray O'Light (2) 2:13¾ and Pinkey H. 2:17. This colt is a beautiful dark chestnut, with a great deal of knee and hock action, and in good hands would make a show horse. Will castrate him and break to saddle if any one wants him that way. Is a very attractive and stylish fellow.

For prices and other particulars address
Dr. A. De FOE, Box 38, Pleasanton, Cal.

FOR SALE CHEAP.

Handsome bay mare, seven years old, about 16 hands high. Sound, well broken and gentle in every way. Sired by Chas. Derby, dam Allie Stokum by Richard's Elector. High-class road mare and a good prospect for a race mare. With three months' work last year, trotted a mile in 2:18, half in 1:06, driven by an amateur. I will also sell a fine set of harness and pneumatic tired buggy, good as new. To see the horse, etc., and for further particulars write or apply to
W. DIXON,
2310 Encinal Ave., Alameda, Cal.

PETER SAXE & SON, 911 Steiner St., San Francisco, Cal., Importers, Breeders and Dealers for past thirty years. All varieties Cattle, Horses, Sheep, Hogs. High-class breeding stock. Correspondence solicited.

MONTEREY 2:09¼

and his son **YOSEMITE (tr.) 2:16 1-4**

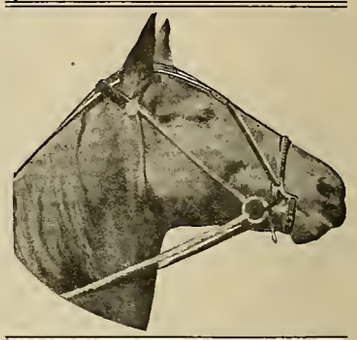
FOR SALE

I am positively retiring from the business. Now is the time to get a good bargain.

P. J. WILLIAMS, San Lorenzo, Cal.

Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

HOW FARMS RUN OUT.

An editor of a western county weekly has figured out in dollars and cents how much fertility is removed from the soil in forty years. The figures are interesting and as far as the writer is able to ascertain they are nearly correct. The editor arrives at the following conclusions:

Eighty acres in meadow, from which one ton of hay per acre was removed for forty years—$408 per year, or for forty years $16,320.

Eighty acres in potatoes, 125 bushels per acre—$561 per year; forty years, $22,440.

Eighty acres in wheat, twenty bushels per acre, 800 pounds of straw—$445 per year; 40 years, $18,188.

Eighty acres in corn, thirty bushels per acre—$454 per year; forty years, $18,144.

If these four crops were grown in rotation the annual yearly loss would be $469.50; forty years, $18,780.

Eighty acres devoted to making beef—$75.30 per year; forty years, $3,014.

Eighty acres devoted to cows where the milk was sold from the farm—$130.62 per year; forty years, $5,224.

Eighty acres devoted to cows where only the butter product was sold from the farm—$1.16 per year; forty years, $46.40.

Forty years ago many of the farms made butter, which removed only an insignificant amount of fertility. They began to ship away milk and the fertility went with the milk. They grew other crops, which carried off large amounts of fertility. In the forty years from eighty acres potatoes took $22,440 worth of soil fertility; possibly the farmer replaced $2,000 worth in the form of fertilizers. The $20,440 he probably reckons as "saved," but his land is ruined.

Tillers of the soil can not afford to overlook the fertility question. It is with them from the start to the finish, whether the finish be bankruptcy or amassed wealth.

MARKETING POULTRY.

The cream of the profit in the poultry business is often sacrificed by a careless method of preparing products for the market. Live birds should be carefully sorted as to age and sex and the crates as much as possible made up of those of the same quality. The profit from dressed poultry is decided largely by the manner in which it is prepared and packed for market. Provision dealers are so anxious to secure the most attractive looking poultry that many of the larger houses send out printed instructions as to killing and packing. Birds to be killed should have no food for from twelve to twenty-four hours and no water for eight hours before killing. Hang by the feet; insert a sharp knife in the mouth and cut the vein at the back of the throat; then run the point of the knife through the roof of the mouth toward the brain. Instant paralysis and loosening of the feathers follows. If dry picking is practiced it is easily done at this time before bleeding stops. After the bird is thoroughly cooled it may be packed in ice. If to be scalded before picking, immerse into water nearly boiling three or four times and pick quickly, taking care not to break the skin. Plump by plunging in nearly boiling water ten seconds, then in ice water fifteen minutes, then pack in ice. Or if to be sold dry, hang up, and dry thoroughly. The packing box or barrel should be lined with clean unprinted paper and if ice is used, pack tightly with alternate layers of ice and fowl; using ice on the top and bottom. As much as 3 to 5 cents a pound difference in the price paid for poultry is made on the ground of salable appearance.

Mites cannot and will not live on roosts or in cracks of boards that have been well oiled with crude oil. One or two paintings is not enough, as the first two soon soak into the wood, but after three are given the wood becomes saturated, and the mites will not linger around such a proposition. This is one kind of oil painting that pays immensely. What seems to prove a sure mite killer in the hands of one person often proves a failure with another. One tells of failing with a number of things, but succeeding with another, while some other succeeds with what proved a failure with some one else. It may have been persistency that counted for more in each case. If mites are left to breed it does not require many days to populate a whole hen house with myriads of them.

A CONTINUOUS FERTILIZER.

A farmer contributes the following information: "For the past fifteen years I have been growing wheat continuously on an eighty-acre tract. When my first crop of wheat was sown the ground was broken up from a clover sod. Each year since that enough of the second crop has produced seed which causes a good stand of clover to grow up among the wheat. I am raising just as much wheat now as I did fifteen years ago, and attribute my success to this continuous crop of clover which I plow under each fall."

We would like to know if others of our readers have practiced the same method of fertility maintenance.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

HORSES'S SENSE OF SMELL.

No animal is endowed with a better sense of smell than the horse. To the blind horse the acuteness of smell is a safeguard. Horse and Stable says:

"The horse will leave musty hay untouched in his bin, however hungry. He will not drink of water objectionable to his questioning sniff, or from a bucket which some odor makes offensive, however thirsty. His intelligent nostril will widen, quiver and query over the daintiest bit offered by the fairest of hands with coaxing that would make a mortal shut his eyes and swallow a nauseous mouthful at a gulp. A mare is never satisfied by either sight or whinny that her colt is really her own until she has a certified nasal certificate to the fact. A blind horse, now living, will not allow the approach of any stranger without showing signs of anger not safely to be disregarded. The destinction is evidently made by his sense of smell and at a considerable distance. Blind horses, as a rule will, gallop wildly about a pasture without striking the surrounding fence. The sense of smell informs them of its proximity."

The comparative profits of selling dairy products, as milk, cream or butter, have been carefully figured out by the Maryland Experiment Station. It is found that cream is one of the most profitable forms of sale, when 20 per cent cream can be sold at 50 cents a gallon, and even at this low price returns 23½ cents per pound for the butter in the milk, besides leaving the skim milk for use on the farm. Of course, cream can be usually sold for more than 50 cents per gallon. It also appears that milk shipping is ordinarily more profitable than buter. Thus 12 cents per gallon for 3½ per cent milk is equal to 23½ cents per pound for the butter, while at 15 cents per gallon for 3½ per cent milk the butter is sold at 32½ cents per pound. In selling cream at 70 cents per gallon the price obtained is equal to 33 cents for the hutter, but creameries never pay this amount, and no home-made butter brings any such price except for a very few gilt-edged makes.

FOR SALE.

A fine standard bred combination gelding, six years old, sound, gentle, stylish, fearless and goes all the saddle gaits with great ease and beauty. A superb and pleasant driver with three minute speed and plenty of size. See A. Saddler, 200 Seminary Ave., Melrose.

Address R. F. D. No. 1, Box 233 A, Fruitvale, Cal.

SHORT-HORN SALE

at Woodland, Cal., Saturday, Sept. 12

We will offer the entire Enterprise Herd, including the herd bulls and show cattle of last season. We do not hesitate to say that this is the best bred and best individual collection ever assigned to public sale on the Coast.

36——BULLS——36

They are the kind and type the farmers and rangemen are looking for. They are Eastern bulls thoroughly acclimated, of serviceable age, large, strong, and thrifty. This lot was personally selected by Mr. Dunlap from prominent breeders in the East, this being his eighteenth shipment. They have been fed no grain since reaching this coast, simply good pasture and alfalfa hay and will be presented in the best possible condition for future use. This is undoubtedly the best lot of range bulls ever offered on the Coast.

Sale to be held on the Enterprise Stock Farm, 4 miles south of Woodland. Busses will meet all trains at Woodland and lunch will be served on the farm. Sale to begin at 12:30 p. m. All are cordially invited to attend. Write for descriptive catalogue mentioning this paper. Catalogues ready Aug. 20th.

Auctioneer, H. P. EAKLE, Jr.
G. P. Bellows, Maryville, Mo. R. M. DUNLAP.

T. B. Gibson, Woodland, Cal., will sell the preceding day, Sept. 11th. Parties wishing can attend both sales.

CONDITIONS:

All harness races to be governed by the American Trotting Association rules as far as practicable. All harness races to be mile heats. All entries to close with the secretary at the fair grounds at 12 o'clock, noon, **August 25th.**

Entrance in all purse races five per cent of the amount of the purse, and five per cent for winners; four or more to enter and three to start. No money given for a walkover. Entries not accompanied by the money will not be recognized. Nominations to be made in writing, giving the name, age, color, sex, sire, dam (if known, and where not known the fact shall be stated) and colors of the driver. This rule will be strictly enforced. In case the purses above given do not fill with four complete entries, the board has the power to reduce the amounts of the purses as in its judgment seems proper. The board reserves the right to declare a race off or postponed on account of inclement weather. Any horse distancing the field shall be entitled to first and third money only. In all purse races for harness horses the winning horse to have 60 per cent, the second 30 per cent, and third 10 per cent of purse offered, for running races 70 per cent to the first, 20 per cent to the second and 10 per cent to the third horse.

Except as above in all running races rules of the California Jockey Club will govern as far as practicable.

How to get to Marshfield: Take Coos Bay Steamers from San Francisco: M. F. Plant, Eureka and Czarina. Fare on horses $10 and up, according to valuation. Passengers $10.

From Portland: Take steamers Breakwater and Alliance, or any other steamer plying between Portland and Coos Bay. Fare on horses, $10 and up, according to valuation. Passengers, $10.

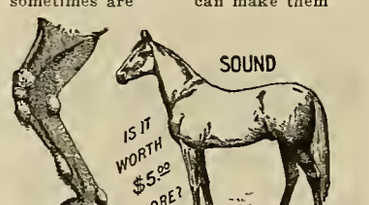
SPAVIN CURE

As they sometimes are — As "Save-the-Horse" can make them



CHAS. TAYLOR & CO., Broomcorn Brokers. Arthur, Ill.—Your Save-the-Horse was recommended by Mr. Checkley, now postmaster of Mattoon, Ill., for Curb, and after using the medicine as per directions in three weeks the lameness and eulargement had completely disappeared and have never returned, and that was five years ago. Since then I have used it on a badly strained leg, which threatened to result in a Bog Spavin and Thoroughpin, with a complete cure. I am driving a little road mare to-day which I cured of a Bone Spavin which had refused to yield to Biniodide of Mercury and Cantharides and a rigid firing with a red hot No. 8 wire.
CHAS. TAYLOR.

BROOKSIDE MILLS.
Knoxville, Tenn.—Please forward one bottle of your Spavin Cure. I used a bottle some time ago, and I am glad to report that it entirely cured my horse of ringbone. WM. T. LANG.

Our guarantee is not mere words, mind you, but a signed contract, made absolutely legally binding to protect purchaser to treat any case named in the document.

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it.

At Druggists and Dealers or Express Paid.

WINCHESTER Shotgun Shells

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

THE LARGEST AND BEST FAIR ever held in California will open to-day and close September 6th, 1908. The entries in all classes are larger than ever beforc, and the character of the exhihits are hetter. The entries this year are not confined to California, but are coming in from all parts of the country. The Pavilion Department has entries from as far away as Vermont, the Poultry Department from as far away as New Jersey, the Swine Department from Idaho and Oregon, while the Horse Department will be re-inforced by some late importations from the hest stables in Europe, and the best stud of desert Arabian borses on the American continent. Judged hy the number of entries and their character, the Midway and its features and the many fascinating free side attractions, the State Fair this year is going to he far ahead of any Fair ever heretofore held in California.

——o——

DEVELOPED dam theorists can take a whole lot of satisfaction in studying the pedigree of Prince Lock 2:18, the unbeaten two-year-old trotter of this year. His sire and dam were both highly developed, while both his grandsires, and one grandam had fast records. Of these five ancestors tbe slowest has a record of 2:15. Prince Lock is a trotter, his sire Zolock 2:05¼ and his dam Naulahka 2:14 were pacers; McKinney 2:11¼ and Gazelle 2:11½, sire and dam of Zolock are trotters, and Nutford 2:15 sire of Naulahka is a pacer. The three known sires in the third remove of Prince Locks pedigrec, Alcyone 2:27, Gossiper 2:14¾ and Abbotsford 2:19¼, all had records and were all trotters. Naulahka 2:14, the dam of Prince Lock is also the dam of Zolahka (3) 2:23½ and Wenja 2:18½, full sister to Prince Lock and both trotters, and is also the dam of Gladys M. 2:19, a pacer.

——o——

OF THE TEN STARTERS in the three-year-old division of the Pacific Breeders' Futurity at Chico last week, only one, Mr. Frank H. Burke's colt Siesta by Iran Alto, was an entry in Crowley Stake No. 2, a side stake gotten up by Mr. T. J. Crowley, one of the Directors of the Pacific Coast Trotting Horse Breeders' Association. This side stake was made up hy several owners of colts and fillies entered in the Futurity putting up $25 eacb, the winner to take all. Tbere were eleveu entries to the side stake, all were dropped out of the Futurity except Siesta, and he won the money although he was distanced in the first heat of the Futurity. Mr. Burke had overlooked the fact that Siesta was in tbe Crowley stake and when he was feeling rather hlue over his colt being distanced by Cleo Dillon, Secretary Kelley consoled him by imparting tbe information that wbile he had lost the Futurity he had won the Crowley stake, and be was given a check for the entry amount, $275.

——o——

THE CALIFORNIA pacers and trotters tbat have been racing at home for the past few weeks will reach the North Pacific Circuit with reputations that they will have to work hard to maintain on the northern tracks. The meetings at Salem and Portland where fairs will he held in connection with the harness races, will have tremendous crowds if the advance reports of the interest heing taken up there is half true. We hope our California trainers will give the Oregonians and Washingtonians the very hest they have in their shops and that their horses will keep up the record smashing they have started out so well on.

——o——

THE OFFICIAL HANDICAPPERS for tbe $50,000 race at Readville were Budd Dohle, J. C. Linneman and George R. Hicks. These gentlemen did their work well, as the despatches say that while the winner finished a few lengths in front there were ten horses so close hehind him that the judges had great difficulty in placing them. A matter of great satisfaction to Californians is the fact that P. W. Hodges finished third with his good stallion San Francisco, and thus won $5,000. Mr. Hodges has heen down on his luck for some time and having entered San Francisco in several large stakes that took place before the handicap was decided, bad to pay a large amount for entrance money prior to getting a start in the handicap. San Francisco must have trotted a great race and Mr. Hodges is to he congratulated on his persistency in taking his horse east and finally hringing him to the race in spite of all sorts of had luck. San Fraucisco is ahout as well hred as any horse in the country as he is hy Zombro 2:11 out of a mare by Nutwood Wilkes. As will be seen by the half tone engraving of San Francisco on another page, he is a classy looking trotter.

HOW JACK LEYBURN BEAT SWEET MARIE.

Philadelphia, Pa., Aug. 11.—Jack Leyburn defeated Sweet Marie in straight heats in the matcb race at Belmont track to-day in 2:05¾ and 2:06½, trotting tbe two fastest heats ever made over the course in a race, and lowering the track race record of Tiverton two full seconds. In drawing for positions Sweet Marie secured tbe inside place and in scoring for the first heat starter Joshua Evans got them off on the third time down, the mare having a short head the best of the start. Botb borses went off very fast, but Leyhurn had tbe most foot, and just beyond the stable entrance, took the pole, leading by two lengths at the quarter in 30¼ seconds. At tbe half he led hy tbe same distance in 1:01¼, and at the three-quarters was tbree open lengths to the good in 1:33¼. In the stretch Sweet Marie was sent along at her best clip and gained perceptihly at every stride, causing driver Grady to shake up the gelding, hut the mare made a hreak at the long distance and Leyburn won by three lengths in 2:05¾. Led back to the stand, Grady received a perfect ovation from the friends of Senator McNicol, Leyhurn's owner.

Driver Andrews tried different tactics with Marie in the second heat. The horses were sent off with Leyburn heading the mare by a head and neck. He was away very fast, with Andrews pulling in hehind aud trailing hy four lengths at the half-mile, evidently intending to make a whirlwind finish. When he gathered the mare up for the final struggle, however, she hroke disastrously and hefore she settled down was ten lengths in the rear, Leyburn finishing under wraps in 2:06½.

At no stage of the matcb yesterday was Sweet Marie equal to heating the son of Alto Leyburn, he having more speed and carrying it farther, beside showing no inclination to hreak. Allowing for the stiff wind that hlew across the course right in the teeth of the horses, as they came down the stretch, the time was exceptionally fast, and a Philadelphia crowd never saw a hetter race. About 5,000 people were present.

August 11—Match, trotting; purse $2,000:

James P. McNichol's ch. g. Jack Leyhurn, hy Alto Leyhurn (Thos. Grady)	1	1
William Bradley's h. m. Sweet Marie, by McKinney (Andrews)	2	2

Time hy quarters:

First heat	:30¼	1:01¼	1:33¼	2:05¾.
Second heat	:30¼	1:01	1:33	2:06½.

THE FUTURITY WINNERS.

The following short tahulations of pedigrees of tbe four winners in the Pacific Breeders' Futurity Stakes which were trotted and paced at the Chico mectiug last week will prove interesting to the students of breeding:

CLEO DILLON, b f (3), 2:13¼

Winner three-year-old trot. Owned by E. A. Gammon of Courtland.

Cleo Dillon	Sidney Dillon	Sidney 2:19¾	Santa Claus 2:17½ / Sweetness 2:21¼
		Venus	Capt. Webster / Untraced
	Cleo G	Yosemite	Egbert / Leah
		Lizzie E.	Frank Merrill / Not given

PRINCE LOCK, ch c (2), 2:18.

Winner of two-year-old trot. Owned by Geo. A. Pounder of Los Angeles.

Prince Lock	Zolock 2:05¼	McKinney 2:11¼	Alcyone 2:27 / Rose Sprague
		Gazelle 2:11½	Gossiper 2:14¾ / Gipsey
	Naulahka 2:14	Nutford 2:15	Abbotsford 2:19½ / Annie Nutwood
		Not given	

RAY O'LIGHT (2) 2:13½, (3) 2:09.

Winner of three-year-old pace. Owned by E. S. Train of Salinas.

Ray O'Light	Searchlight 2:03¼	Darknight	Alcyone 2:27 / Noonday
		Nora Mapes	Furor / Hattie Mapes 2:33½
	Carrie B. 2:18	Alex Button 2:26½	Alexander / Lady Button
		Carrie Malone	Steinway / Katy G. by Electioneer

EASTER D., b f (2), 2:13½

Winner two-year-old pace. Owned by Jas. Sewart of University Station, Los Angeles.

Easter D.	Diablo 2:09¼	Chas. Derby 2:20	Steinway 2:25¾ / Katy G
		Bertha	Alcantara 2:23 / Blandina
	Donnagene	Athadon 2:27	Matadon / Athalie
		Trenna	Junio 2:22 / Lusterine

——o——

FAIRS OF THE NORTHWEST.

For the North Pacific harness race and livestock circuit opened at Bellingham this week and continues until about the middle of Octoher, purses, stakes and premiums aggregating more than $225,000 have been hung up, nearly douhle the amouut of money ever awarded in similar expositions in one year before.

There are eight cities iucluded in the harness race circuit, with the following dates: Bellingham, August 24-29; Everett, August 31-Septemher 5; Seattle, September 7-12; Salem, Ore, September 14-19; Portland, September 21-26; North Yakima, Septemher 28- Octoher 3; Spokane, Octoher 5-10; Lewiston, Idaho, October 12-17.

For the racing events in which there are close to 500 trotters and pacers from all Transrocky Mountain and Coast states and Northwestern Canada entered, the aggregate stakes and purses will be $125,000, of which amount Country Club and Livestock Association of Portland, will contrihute $20,00.

There are seven cities in the North Pacific fair circuit at which the livestock interests will vie for another $100,000 or more in cash premiums. These are: Snohomish County fair, Everett, Septemher 1-5; Western Washington fair, Seattle, Septemher 7-12; Pacific National sbow, Portland, Septemher 21-26; Washington State fair, North Yakima, Septemher 28-October 3; Spokane Interstate fair, Spokane, October 5-10; Walla Walla County fair, Walla Walla, October 12-17.

——o——

Tbe exhibition mile by Wild Bell at Chico last Saturday, was an unofficial performance, the tall son of Wildnut simply being driven an exhihition mile for the edification of the spectators. John Quinn handled the horse ahly and those who saw the performance helieve that Mr. Ruhstaller's gelding can shade the time made quite a little if he is specially prepared for a fast mile. Wild Bell is hy Wildnut, a son of Woodnut 2:16¼ that was out of the famous Wildflower 2:21 as a two-year-old hy Electioneer. Wild Bell's dam is Bell Bird 2:26¼ as a yearling, hy Electioneer, and his second dam is the greatest of brood mares, Beautiful Bells, dam of eleven trotters with standard records. Wild Bell, on his hreeding alone has a license to trot fast. He is in superb condition at the present time and may he expected to reduce his race record of 2:08¼ before the season is over.

——o——

At the three meetings held in California so far this season, the racing has been of high class and the time made as good or even hetter than is made in the same classes at the principal eastern meetings.

19th ANNUAL MEETING OF P. C. T. H. B. A. AT CHICO

(By Ben S. Allen.)

Four days of brilliant racing with records smashed every day, is the story in brief of the 19th annual meeting of the Pacific Coast Trotting Horse Breeders Association held on speedway track at Chico last week.

Although the 19th affair of the Breeders, it was the inaugural meet for the new track and even its most ardent promoters could not have desired a more successful opening for Speedway, which the horsemen pronounce without question one of the fastest tracks in the United States.

The many close finishes at Oakland was a feature of that meet, but the stretch fights at Chico were equally exciting. and the majority of them meant a new record for the winner.

The weather was warm enough for the horses to become well unlimbered, yet not hot enough for the discomfort of the spectators. Every afternoon a cool breeze from the snow clad Sierras swept through the big double decker grand stand affording such grateful relief to the spectators that they always had energy to be on their feet cheering the many close finishes. A notable crowd of horse owners and horse lovers fraternized in the grand stand, and through a common sympathy the visitors and the citizens of Chico formed a tie that will be lasting. Among those conspicuous in the grand stand was the genial veteran C. A. Durfee, whose eyes sparkled as much at the sight of a good McKinney colt as they did when he sat behind that famous stallion. Among the ladies none were more gracious than Mrs. Severance, the Los Angeles horsewoman, who has owned some of the best futurity colts ever raced on this coast. No meeting would be complete without the presence of Mrs. F. H. Burke, and when her good mare Vallejo Girl won, the bright hostess of La Siesta ranch was showered with congratulations. J. W. Marshall the owner of the champion pacing mare Mona Wilkes was always ready to add to the gaity of the party. W. L. Vance, driver and owner of Sir John S. was present with his family and there was nothing to disturb the happiness of his little girl, who mourned so pathetically for the defeat of the beloved stallion at Oakland.

Berta Mac began the record smashing by trotting a heat in 2:08 in the very first race of the meet, and Wild Bell brought the speed carnival to an end by stepping a mile against a runner in 2:05¼ on the closing afternoon. Before the end record breaking became such a habit that no matter how close the finish might be in a race the crowd was a bit disappointed if a record did not go by the board.

So easily did Wild Bell make the circuit of the track that the crowd did not realize until the time was hung out that they had just witnessed the greatest mile ever trotted on this coast and one of the most wonderful ever trotted in this country. This was the final triumph for the new track, and it will be many moons before the record is taken away from Speedway.

The opening day has already been detailed so it will suffice to say that it provided racing which was a splendid foretaste of the exciting contests which followed. A large crowd was present on the first afternoon and they staid until sundown to see the end of the magnificent six heat race which was finally won by sturdy John R. Conway.

For the second day two of the colt stakes and the 2:14 pace were down for settlement. In the three-year-old pacing division of the futurity the sensational Ray O'Light gave Speedway another record by stepping the fastest three heats ever paced hy a three-year-old on this coast. The marvellous son of Searchlight was not pressed or he might have made it a world's record. The three heats were made in 2:11, 2:09 and 2:09, and the handsome colt now has a mark that may well be envied by aged pacers. Moortrix was fancied by many in the three-year-old pace and when the gallant Ray O'Light opened up a gap of five lengths at the quarter pole a gasp of surprise went up from the grand stand. Just to prove that it was not an accident Ray O'Light kept stretching the distance until Whitehead eased him up under the wire. Ben Walker took the classy looking Conquerer out in front in the second heat, but the game little brown

Ray O'Light winning Breeders Futurity for three-year-old Pacers.

colt wanted nothing but the lead and he got it and kept it until he jogged under the wire ahead of the second horse by four lengths. Moortrix and Conqueror finished as named. Walker did his hest with Mrs. Severance's haeutiful colt, but he was evidently short of work. The third and deciding heat was a replica of the second and when it was all over Ray O'Light was hailed as one of the greatest colts in the world.

The 2:14 pace promised to be a great fight between the old rivals Memonia and McFadyen, but Dudley's chestnut stallion lost all claim of being a contender in this race by his bad behavior. He broke at the start of the first heat and when Chadbourne pulled him to his feet at the quarter pole he was not even in the dust of the disappearing field. By dint of hard driving Chadbourne managed to save his distance.

Memonia, carefully rated by Sam Hoy, won this heat easily. In the second McFadyen again broke, but managed to make up a world of ground and finished a good third. Wearied by his hard drive behind Conway the day before and sore from his fall at Oakland Fred Chadbourne in the next heat surrendered his place behind McFadyen to his veteran partner James Sutherland. The old driver eased the erratic stallion around the turn and then set sail for Memonia which now knew that she was in a horse race. But the best he could do was to nose out Radium for second place.

The Futurity stake for two-year-old trotters resulted in a good three-heat race with Ella M. R. unexpectedly taking the first in 2:16¾ which is within ¾ of a second of the coast record. In the second Prince Lock and Ella M. R. went to the quarter pole like a team in :34½. But Prince Lock won in a jog from the filly which broke badly at the head of the stretch. Twohig could not get the best out of his filly in the third and Prince Lock won as he pleased.

Another record fell to the record of the new Chico track on the third day of the meet when the two-year-old colt Easter D. stepped a mile in 2:13½. The former mark of 2:13¾ was made by the fast Ray O'-Light in the two-year-old pacing division of the futurity last season. Jim Logan which forced the Diablo filly out to win the first heat showed a wonderful burst of speed, but he had not had enough work to go the route. Easter D. is one of the best gaited leg pacers that ever paced over a track, and although Teddy Bear was only a head behind when she took her mark, the remarkable filly did not seem to be extended. In the second heat Jim Logan broke badly at the head of the stretch and Teddy Bear took his place as the contender, and although Ivey put up a great drive the best he could do was second.

Cleo Dillon was an unexpected victor in the three-year-old trotting division of the futurity. But the triumph of the superbly bred daughter of Sidney Dillon was extremely popular with the short end bettors and the grand stand. There was almost $4,000 to be cut up by the money winners in this race and the richness of the stake attracted a field of ten actual starters. The starting of A. C. Stevens which had heen notable during the week was given its supreme test by this field. He emerged from the test with his reputation of a first-class starter firmly established.

It was known that Cleo Dillon had but lately recovered from a cracked heel so she was not much favored in the pools, where Don Reginaldo and Katalina sold equal favorites. Don Reginaldo took the first heat in such good time that the field was considably reduced by the fall of the flag. Zibbell did not seem able to get all the speed out of the rangy daughter of Tom Smith although she was a contender throughout the mile.

Cleo Dillon won the second heat in such impressive fashion that she received an ovation from the crowd as she left the track. In this heat she fought from the start with Don Reginaldo and Katalina, and at the head of the stretch she forged ahead and won by a length from Katalina, which stood a terrific lashing from the flag to the wire.

Don Reginaldo again became a formidable contender in the third heat, hut Walton, who had driven the filly with rare judgment shook her up a bit, and she passed under the wire an easy winner by three lengths.

The third race of the day, a special trot, was won in a colorless fashion by Wilmar, Michelson's good son of Wildnut. The game little stallion Alsandra made a great bid for first money, but Johnny Quinn's mount had too much class for the four-year old.

The fourth and last day of the meet was notable for the grand trial mile made by the trotting gelding Wild Bell against a runner. So smoothly did the big brown travel that those who were not holding watches were not ready to concede him a mark better than 2:08 until the real time was announced. Without a skip Johnny Quinn carried him to the half pole ahead of the runner in 1:02¾. There the runner went ahead and swinging into the head of the stretch with machine-like precision the great son of Wildnut started for home. Straight as an arrow he came under the wire with the same ease that he takes an ordinary workout.

A splendid feat for the horse and a grand triumph for the track, it was a fitting finale for a series of remarkable speed performances.

The 2:20 pace weut to Charley D. as was generally expected, but it was not the walkover that many predicted for Colonel Kirkpatrick's pacer. The time of 2:07¾, 2:06¼, 2:08¼ is faster than pacers in this class usually make. After Charley D. was barred

Ella M. R. winning first heat of Breeders Futurity for two-year-old ~~pacers.~~ trotters

from the pools Queen Derby was made the favorite, but she had to give up second place to Josephine. This remarkable four-year-old mare stepped the second half of the second heat in one minute flat.

In this heat Charley D.'s driver, Thompson, had to go to the whip to bring the chunky son of McKinney under the wire a winner. In all three heats Josephine and Queen Derby finished second and third respectively. There were nine starters and the race provided an opportunity for some fine driving.

Tbc 2:10 trot was somewhat of a disappointment as it was decided on summary after five heats had extended it to sundown. Athasham with Walker up took the first heat handily from Berta Mac and R. Ambush. R. Ambush took the next two, and showed in them all the steadiness that has usually characterized his performances. After his second winning heat for some unknown reason the pads were removed from his shoes. Helman kept the flighty Berta Mac on her feet in this heat and she won handily from Ambush, which went into the air three times during the

Easter D. winning Breeders Futurity for two-year-old pacers.

journey arcund the track. The little stallion was hastily reshod before the fifth heat, but his steadiness had deserted him as completely as that quality had returned to Berta and she won handily. The race was given to the mare on her showing in the summary.

The 2:14 trot was won by Vallejo Girl easily after she had lost the first heat to the tired Nogi. The stallion had evidently not recovered from his five-heat fight with Berta Mac on the opening day.

The meet at Chico was as much of a success as the new track proved to be and this is one way of saying that there is little to criticize in the 19th annual races of the Pacific Coast Trotting Horse Breeders' Association.

Fifth heat, 33½, 1:07½, 1:41, 2:13.

GOOD SPORT AT THE STADIUM.

Over three thousand people were at the three-quarter mile track in Golden Gate Park, San Francisco, last Sunday afternoon and had there been a grand stand where they could find seats, the crowd would have been twice as large. Harness racing is undoubtedly one of the most popular sports in San Francisco, and it is surprising how many stay to see the contests in the park in spite of the fact that they are compelled to stand during the entire afternoon unless they have come in conveyances. It will not be many mouths, however, until the new grand stand is huilt and then the sport will be much more enjoyable to the lookers on. Tbe summaries of tbe tour events last Sunday are as follows:

First race, one mile, 2:20 trot:

Meko 1 1
Major Cook 2 2
Moffit D. 3 3
Time—2:19¼, 2:21.

Second race, three-quarter mile, 2:19 pace:

Prince D. 1 1
N. L. B. 2 3
Lady Jin 2 4
Direct Steinway 5 5
Margaret 4 2
Time—1:43, 1:40½.

Third race, three-quarter mile, trotters and pacers:

Hunky Dory 1 1
Billy Murray 3 2
Monk 2 4
Docus D. 5 3
Valma 6 5
Daken D. 4 6
Time—1:48, 1:46.

Fourth race, free-for-all, three-quarter mile, pacers and trotters:

Little Dick 3 2 1 4 1
Kitty D. 5 1 2 3 4
George Perry 1 3 5 2 3
Walter Wilkes 2 5 6 1 2
Charley J. 6 6 4 6 5
Albert S. 4 4 3 5 6
Time—1:36 4-5, 1:39, 1:41 3-5, 1:41 2-5.

HAMBURG BELLE 2:05¼.

Among the trotters that have distinguished themselves tbis season, says an eastern exchange, and seem to be able to secure still faster records is Hamburg Belle, who won at Detroit, reducing her record from 2:12¾ to 2:05¼, and who won again the following week at Kalamazoo, equalling the record she made at Detroit in this race. No one will question the quality of a trotter that wins her first and second starts, trotting a heat in each in 2:05¼. In her race at Detroit she trotted the first heat in 2:05¼. In the second heat of this race, on account of a break, Sterling McKinney won in the very slow time of 2:14.

In the third heat she was again a winner in the good time of 2:07¼. The average time of her two winning heats was less than 2:07. In her second race at Kalamazoo the time of her three winning heats was 2:07¼, 2:09 and 2:05¼. It will he noticed that in this race the last heat was the fastest. Such creditahle performances as these need very little comment and indicate that she is one of the sensational trotters of the season. In her race at Detroit her actions in scoring and in one heat indicated that she was not as reliable as could be desired, but the very hard track and the fact that she trotted in very light shoes were responsible for this, for as soon as her shoes were changed all the trouble was over, and in her second race her manners were perfct.

Hamburg took a record of 2:12¼, over a half-mile track last year, under the name of Sally Simmons 2d. In 1896 she raced well, getting a record of 2:19¼.

She was sired by Axworthy 2:15½, being his fourth representative in the 2:10 list and his fastest record trotter, although he is also the sire of last year's sensational three-year-old trotter, General Watts 2:06¾.

Her sire, Axworthy, is by Axtell 2:12, son of William L., by George Wilkes 2:22. Her dam is Sally Simmons 2:13¼, by Simmons 2:28, son of George Wilkes, and her second dam was a daughter of John Burdine, a son of Almont. John Burdine also sired the dam of that good race mare, Dolly Bidwell 2:08¼.

Drink Jackson's Napa Soda.

NOTES AND NEWS

Hats off to Hodges, boys.

His horse San Francisco won $5,000 in the big handicap.

Shorty took a desperate chance, but be got the money and we hope his luck will continue.

Rain prevented races being held at the Readville track on Wednesday of this week.

The average time of the heats at Chico last week was 2:11¾.

Wild Bell's mile in 2:05¼ is not a record, but he did it all right.

Wildnut has two pretty good trotters in Wild Bell and Wilmar. Both can trot faster than their records.

College Maid, the guideless pacer, reduced her record from 2:09¼ to 2:09 at Bellingbam, Wasbington, this week.

The next matinee of the Los Angeles Driving Association will be beld Septemher 12th when five races will be on the card.

If plenty of water is used the State Fair track should be fast this year, as the horses have been working over it during the present week.

Citation 2:03¼ smashed tbe world's record for pacing mares on a half mile track last Monday at Des Moines, Iowa, by pacing a mile in 2:06¼.

Emily W. 2:11½ won the California Stakes for 2:20 class trotters so easily that every heat looked like a jog for tbe daughter of James Madison.

Vallejo Girl 2:10¼ twice in one race made a pretty close shot for a place in McKinney's list of 2:10 performers. She'll get there before the summer is over.

Visiting horsemen who have seen all the best tracks in tbe east, say the Chico track is as good if not better and faster than any track in the United States.

Lou Mativia of Dixon is trying to secure a lease of the Marysville training track, and will make it a popular place for horsemen if he can close the deal.

The attendance at the Breeders' meeting at Chico last week was not as large as it has been when this association held meetings at Woodland or Santa Rosa.

The Los Angeles Fair and race meeting will probably hegin October 26th. Over $6,000 has already been subscribed by the citizens of Los Angeles to promote this fair.

John R. Conway 2:07 belongs to the class of horses which C. A. Durfee mentioned when describing Mckinney, which he said had "a tough hide and a short memory."

F. B. Wetherbee of Sebastopol, Sonoma county, owns a fine young stallion by Daedalion 2:08½ that with very little work has shown miles better than 2:24 at the trot.

Geo. W. Ford of Santa Ana, has sold to Mr. S. L. Gathersole of Fullerton, a three-year-old filly by Neernut 2:12¼, dam Irene 2:27¼, that is a beauty. Mr. Gathersole will use this filly on the road.

Captain E. E. Caine, a prominent capitalist and steamship owner, an enthusiastic horseman and one of the organizers of the King County Fair Association at Seattle, died suddenly from apoplexy last Tues day at Seattle.

Magladi 2:07 is the third 2:10 performer for her sire Del Norte 2:08. Sbe was a great three-year-old, taking a record of 2:10½ when winning the Pacific Breeders' Futurity for three-year-old pacers, and she looks like a 2:05 or better pacer next year.

Prince Lock 2:18 by Zolock, has not been beaten a race so far this year and looks to have all the two-year-old trots that he starts in at his mercy. He is one of the sort that has a good head and can stand a drive, yet his full sister Zolahka was anything but steady.

It is said that Levy & Miller of Los Angeles who are getting together a racing stable to campaign in New Mexico and Arizona have leased Gold Nut 2:11½ trotting, and the black stud, Boston d'Or, a pacer with a trial of 2:08½, and bought a trotter for the slow classes.

Mr. J. R. Fronefield, who is just recovering from a siege of nearly three months with rheumatism, will be at the California State Fair in the interests of the Breeder and Sportsman. Mr. Fronefield will receive subscriptions and advertisements and is authorized to transact business of all kinds for this journal.

The last day at Chico was most remarkable in the prominence of the blood of McKinney in tbe money winners. All three races on the program were won by the get of McKinney, while second money in two of the events went to the get of Zolock, a son of McKinney. And but one heat of the twelve which were trotted and paced was as slow as 2:14.

There were forty-four heats paced and trotted at Chico last week in the regular races on the program, and but one heat was slower tban 2:20. This was trotted by a two-year-old which took a record of 2:18 in the same race, tbe first heat of which was trotted in 2:16¾ by the winner of second money.

I. B. Dalziel, the veterinary dentist of this city, who recently returned from a three months' trip to his old home in Maine, surprised his friends soon after his return by forsakiug single blessedness and taking unto himself a wife. Mr. and Mrs. Dalziel attended the meeting of the P. C. T. H. B. A. at Chico last week and enjoyed the splendid racing.

Dr. Alexander McFarland of Benicia, and Jack Walsh of Vallejo, have leased from the Knight estate the old Napa and Solano County Fair Association track at Flosden, three miles north of Vallejo, on tbe line of the Napa Valley Electric road, and will give Saturday and Sunday racing during the summer months. There will be one harness race and four or five running races each day.

One of the exhibits at the California State Fair this year will be a band of nine pure bred Arabian horses imported to this country by Homer Davenport, and now owned by Mrs. Eleanor Gates-Tully, the well known novelist and playwright. All horse breeders will be glad to have the opportunity to ir spect the Arabians of which so much has been written.

How fast can Col. Kirkpatrick's pacer Charley D. go if he is driven to his limit, is a question often asked. His record is now 2:06¼, made in the second heat of a race. He has won every start so far this year in straight heats and no matter how fast they try to carry him to the half, tbe speed does not bother him and he beats tbem home. He is the smoothest, easiest gaited pacer that has raced on the California circuit.

Ella M. R. 2:16¾, the fastest two-year-old trotter of the year, is related to some pretty classy trotters. Her sire Lord Alwin, is a full brother to the second fastest stallion in the world John A. McKerron 2:04½, her dam is by Monbells 2:23¾, (son of Mendocino and the great Beautiful Bells), while her grandam is the great three-year-old Expressive 2:12½ by Electioneer.

All Style, the brown colt by Stam B. 2:11¼ that won third money in the Pacific Breeders' Futurity for two-year-old trotters this year, is out of a mare by Bay Bird, and his grandam is Mary Lou 2:17, dam of Kinney Lou 2:07¾ hy Tom Benton. All Style was 3-3-2 in the futurity in heats that were from 2:16¾ to 2:21, being a good second the final heat in 2:18. He is owned by Mr. Dana Perkins of Rocklin, and is a very promising colt.

Many thrilling acts are to be provided for the entertainment of the large crowds that are expected to attend the California State Fair at Sacramento this year, which opens to-day. The ride down a forty-five degree incline in an automobile and leap across a forty-foot gap at the hottom is an act not seen before on the Coast, and this and other exciting and entertaining features will be enacted each day during the Fair and all for the one admission. The industrial display, the art display, the live stock display, and the music are going to excel all previous shows, and these with a splendid racing program and the most and best side attractions ever put on in Sacramento are going to make a Fair worth attending.

Speed carts bave been going out of the Kenney Manufacturing Company's place on Valencia street this week in large numbers. J. A. Davis of Willows had one shipped to him, J. V. Galindo of Oakland another, Nick Lawler and John Coon of the San Francisco Driving Club each took one, and W. J. Smedley of the Park Amateur Club purcbased one. Every-one of these speed carts was of the very latest model and Kenney guarantees them to he the best in the market. Kenney has three converted bikes on hand on which he has made a flat rate of $25 each. One has wood wheels, the other two steel wheels. Kenney's place of business at 531 Valencia street is the busiest place in town.

LIVE STOCK INSURANCE.

The daily increasing danger of loss to the owner of live stock through accident, injury or disease has made it essential to secure some indemnity for such possible loss, and during the past few years a numher of companies were formed in the United States for the purpose of giving such insurance. None of tbese companies, however, bave made a special effort heretofore to obtain business in this State, consequently this branch of insurance is very little known out here.

The California Mutual Live Stock Association was incorporated during the month of February of this year in Los Angeles, under the laws of this State, and has complied with all requirements of insurance laws of California. It commenced at once to write business in southern California, but recently has formed agencies and connections in the various other districts and it is the intention of its officers to remove the headquarters of the company to San Francisco in the near future.

The company is a mutual institution formed on the principle that each policy holder or memher agrees to insure the other policy holders on a pro rata basis. The strengtb of such company lies entirely in the financial strength of its policy holders and it is gratifying to know that amongst the present members of the company are some of the largest mercantile houses in California, such as Moses A. Gunst Cigar Store, White Sewing Machine Company and many others.

The rates of the company are based upon results obtained by other conservative companies, an ample margin being provided for expenses, commissions and payment of losses. The company has written many thousands of dollars in premiums since its organization and it is well able to meet its obligations. It issues policies for a term of one or two years, two year policies giving the assured the advantage of participating in the dividends which will be paid out at the end of the year from the profits made. Aside from securing a very valuable indemnity the members also receive a very nice interest on their investment.

INDIVIDUAL RIGHTS.

The Cincinnati Enquirer has the following editorial on Justice Gaynor's decision in regard to individual betting:

It is always refreshing to discover a Judge who is not afraid to defy the wild clamoring of a public which does not always know what it is clamoring for. It is a sign of better things when the decisions of a Judge begin to be based on common sense and sound principles instead of upon their possible effect on bis political chances. In the opinion of Justice Gaynor, of the Supreme Court of New York, in which he distinguishes between gambling as a legal crime and the ordinary passing of wagers between individuals, there is much of good sense and sound thought packed into a few words. He says:

"Ordinary betting has never been made a crime. Tbe law has never descended to thrusting its nose into the personal conduct of man or woman to that extent, and those who try to make out that it has, only tend to create a disrespect for it. . . . But ir you hold yourself out to bet and bet with all comers, or generally, or become the general recorder of such bets between others, you are guilty of a crime.

"As to the writing of a memorandum of the bet on a card by the relator, it is enough to say that Section 351 of the Penal Code is confined in plain terms to the case of persons wbo engage in the recording or registering of the bets of all comers as a practice or business. That is common gambling, or aiding and abetting common gambling, which the law does not tolerate."

This opinion was enunciated in deciding the case of a man who bet a set of golf balls with a friend on a game of golf which they were playing together on a private course. To any person of sound sense and unbiased mind the arrest of a man for such a thing was not only ridiculous but an outrage upon his personal liberty. If there was a law on the New York statute books upholding such an action, that law would have been better ignored as a detriment to society rather than as an aid to justice in human conduct.

Justice Gaynor's distinction between ordinary betting and gambling may be stretched in its application beyond the exact question comprehended in the case before him. It simply declares that individuals, in their conduct of matters purely private and between themselves as individuals, bave a lawful right to perform certain actions which as public agents it would be unlawful for them to perform. It is one of the soundest principles in jurisprudence that a man has a right to do anything he pleases with his own so long as what he does works no injury to the community. It is only upon this theory that the law may rigbtfully punish a man for attempting to commit suicide; he has sought to deprive society of his services, and as society has both preserved and protected him it has a claim upon him at least equal to that he has upon himself.

Gambling, according to Justice Gaynor's lucid decision, therefore, is not mere betting. Betting is a man's private disposal of his own property in a manner that pleases him. Gambling is a practice or business which the law declares inimical to the community welfare, and which it therefore coniludes is a crime. In doing this the law contemplates no encroachment upon the inalienable personal rights of the human heing. It does not threaten the liberty of the individual nor make his conduct conform to anything more than the consensus of the community's opinion as to what the conduct of the unit should be in its relations to the whole. It does not limit and nullify any of the powers specifically inherent in the unit itself.

But a law which made it a crime for a man to bet toothpicks with his grandson on the length of the family cat's after-dinner snooze would he a direct trespass upon the rights of the individual. It would really menace society in menacing the social unit.

Justice Gaynor's decision will have the effect of checking a recent dangerous tendency in New York —that of overzealousness in taking care of the Other Fellow's conduct.

ALLEN WINTER WINS HANDICAP.

Prince C. Gets Second Money and P. W. Hodges is Third With San Francisco.

The $50,000 handicap for trotters, the first important harness race ever given in America on the speed handicap system, was decided at Readville track, near Boston on Tuesday last and the brief telegraphic reports state that it was a complete success. Twenty thousand persons saw the race, and the majority, according to the dispatches, expressed the opinion that the handicap system of racing will be popular. The first prize, $30,000, a fortune in itself, went to the bay stallion Allen Winter, a horse that had never started in a race before.

SAN FRANCISCO.

P. W. Hodges' bay stallion by Zombro, dam by Nutwood Wilkes. Winner third money in $50,000 Handicap.

Alleu Winter is a son of Ed. Winter (4) 2:12¾, dam Miss Que by Que Allen 26316, (grandson of Happy Medium), second dam Myrtle Peek hy Wlikeswood 3676 (son of Nutwood and a mare by Geo. Wilkes), third dam Bessie Drake by Joe Gavin 564 (son of Messenger Duroc and Fanny Mapes, great grandam of Searchlight 2:03¼), fourth dam Minnie Drake by Louis Napoleon 207 (son of Volunteer 55), fifth dam the registered thoroughbred mare Julia Drake by Endorser.

Ed. Winter, four-year-old trotting record 2:12¾, slre of the winner of this great race, is by Jay Bird out of the famous brood mare Lady Ham, dam of Hawthorne 2:06¼ and four more in the list. Lady Ham ls by Hambrino 820, and out of a mare by Ashland 47, a son of Mambrino Chief II. Ed. Winter had no representatlves in the 2:30 list at the close of 1907, as none of his get had ever started. Ed. Winter is thlrteen years old, having been foaled in 1895.

Allen Winter was entered in the $50,000 handicap by his owner C. J. Reardon of Indianapolis, and was driven by Lon McDonald.

The wlnner of second money, $10,000, was Prince C. 2:15¼, by Martyr 7720 (son of Rumor 3033 he by Tattler and he by Pilot Jr.) first dam Lady May by Strawn 3330 (son of Mammont 2052, he by Almont 33 out of May Ferguson the dam of Piedmont 2:17¼); second dam Belle by Abdallah Jr. 27362, (son of Abdallah 15), third dam Nell by Joe Downing Jr. a son of Joe Downing 710, son of Edwin Forrest 49.

The wlnner of third money, $5,000, was the California bred stalllon San Francisco, bred by P. W. Hodges and entered and drlven in the race by him. San Francisco is by Zombro 2:11, son of McKinney 2:11¼ and out of the mare Oniska by Nutwood Wilkes 2:16½.

Fourth money, $2,500, went to Ralph Wyck 2:13½, a brown gelding by Almont Brunswick ı1290,(son of Almont Chief 361) dam Luella by Harry B. 4309.

The Huntsman 2:28, by Onward Silver 2:05½ out of Enola D. (dam of Chase 2:07¼) won fifth money, amountlng to $1,500.

Peter Balta 2:12, brown gelding by The Guardsman, dam Helen by Darknlght, slre of Searchlight, finished slxth in the race and won $1,000.

There were 33 starters for the race. These were separated lnto two dlvlslons of 16 and 17 horses each, and the prellmlnary heats resulted as follows:

Flrst prellmlnary, heat—Bervaldo, b. g. (Rhodes), 1; Jay Kay, br. f. (Brussle), 2; Teasel, ch. m. (Geers), 3; Composer, b. g. (LaSall), 4; Dewitt, b. g. (McDowell), 5; Locust Jack, g. g. (McHenry), 6; Ralph Wyck, b. g. (Doro), 7; Danlel, h. g. (Ernest), 8. Dononla, Suzette, Baron, Klngstress, Invader, Budd, Uhlan, Genteel and Margaret O. started. Tlme, 2:46¾.

Second preliminary heat—Prince C., b. g. (Farley), 1; The Huntsman, b. h. (Hussey), 2; Allen Wlntcr, b. h. (L. McDonald), 3; Peter Balta, br. g. (Snow), 4; San Francisco, b. s. (Hodges), 5; Kim, ch. g. (Shenk), 6; Del Coronado, br. s. (Durfee), 7; Sweet Marle, b. m. (Andrews), 8; Rehecca G., Baron Alcyona, Wllkerson, Vendetta, Munic, Beatrice Bellino, Gold Burr, Fred C. and Wilkes Heart also started. Tlme, 2:32.

Then, according to the conditions the first elght in each heat came out for the final heat and were started in the following order:

On scratch—Jay Kay.
50 feet—Ralph Wyck.
100 feet—Kim.
150 feet—Prince C., Peter Balta.
200 feet—San Francisco, Teasel, The Huntsman.
250 feet—Allen Wintcr, Bervaldo, Danlel.
300 feet—Del Coronado.
350 feet—Sweet Marie.

Through a system of electric buttons whlch ran from each starting judge to a big bell it was posslble for each judge to signal when his own horses were on the mark and facing the right direction. When all the judges were unanimous the bell rang automatlcally and the field was away.

As they turned into the stretch and raced under the wire for the first time it looked llke a long procession and there was very little change in position.

At the quarter pole Kim drew out a trifle, while the entire field seemed well strung out. At the three-eights the horses began to bunch up and there seemed to be four divisions, with Kim out ahead and Sweet Marie coming up fast on the outside of the last bunch.

The pace to the three-quarters pole never slackened. The slow horses up ahead were tlring fast, and the fast horses behind were coming up strong. The field came around the turn into the stretch like a Roman chariot race, with three teams abreast and 12 horses lined up for a grand dash of an eighth of a mile to the wire. At that point it seemed anybody's race, but 200 yards from the finish McDonald shot Allen Winter out of the bunch, and, urging the blg stallion along at the top of his speed, drew away rapidly and won by five lengths. The next ten horses came under the wire in a bunch and the judges were nearly 10 minutes in arriving at declsions.

There had been no question, however, as to Allen Winter and as McDonald came back he was lifted from the sulky and carried up the track on the shoulders of his shouting admirers.

It was found that Prince had captured second money, San Francisco third money. Geers who drove Teasel, and Andrews behind Sweet Marie, were beaten about 50 feet hy the place winner. Summary:

American Trotting Derby, handicap, $50,000:
Allen Winter, b. h. by Ed. Winter (L. McDonald)...1
Prince C. b. s. hy Martyr (Farley)................2
Sau Francisco, b. s. by Zombro (Hodges)..........3
Ralph Wyck, br. g. by Almont Brunswick (Dore)...4
The Huntsman, b. h. by Onward Silver (Hussey)..5
Peter Balta, br. g. by Guardsman (Snow)..........6
Time—2:43.

2:04 class pacing, purse $1,200 (three heats):
Hedgewood Boy, ch h. by Chltwood (Sweet)..1 1 1
Black Lock, blk. h. (Andrews)..............2 3 3
Baron Grattan, b. g. (Geers)................3 4 2
Gallagher, b. g. (McEwan)...................4 2 4
Time—2:03¼, 2:04¾, 2:03¾.

2:12 class trottlng, purse $1,200, (three heats):
Marvelletta b. m. hy Grand Baron (McDonald) 2 2 1
Loyal, b. h. (Gcers) 1 3 2
The Aloma, ch. s. (Cox)......................5 1 6
Zaza, blk. g. (Payne) 3 4 5
Nancy Boyce, b. m. (McCarthy)...............4 6 3
Murray M., b. h. (Durfee) 6 5 4
Time—2:11½, 2:10¼, 2:09½.

READVILLE MEETING.

Readvllle, Aug. 24.—The New England Trotting Horse Breeders' Association opened its Grand Circuit meeting here to-day with a program of four races, two of which were divisions of the American Horse Breeders' Futurity. In the Futurity for two-year-old trotters Czarevena, a filly by Peter the Great, won ln straight heats, her best time 2:15¾.

The dlvision of the Futurity for three-year-old pacers went to Master McKerron, son of John A. McKerron 2:04½, in straight heats, best time 2:17¼. The day's summaries follow:

American Horse Breeders' Futurity; trotting, purse $1,500; two in three:
Czarevna, ch. f. by Peter the Great (Nolan)....1 1
Belvasia, b. f. (Titer) 2 3
Czarine Bingen, br. f. (McGrath) 4 2
Rhinelander, b. c. (Paige) ....3 d
Berta, b. f. (Young) ....d
Time—2:17¾, 2:15¾.

2:15 class, pacing, purse $1,200:
Leslie Waterman, ch. g. by Oh So (McDonald) 1 1 1
Arrow, b. g. (Cox) 2 2 2
Lady of Honor, ch. m. (Thomas)............3 3 3
Prince A. Rundel, b. h. (Geers)............4 4 4
Time—2:09¼, 2:09¼, 2:09½.

2:21 class, trotting, purse $1,200:
Ward, b. h. by The Baron (McDonald)......1 1 2
Kidd McGregor, b. h. by Jay McGregor (Geers) 3 2 1
Prince Kohl, blk. h. (Essery) 2 3 4
Baron Bells, b. g. (Maloney)................5 6 3
Bronson, Alice Victor, Jupe Jr. and Redette also started.
Tlme—2:13½, 2:11, 2:14¼.

American Horse Breeders' Futurity; foals of 1905, pacing, purse $1,000; two in three:
Master McKerron, br. c. by John A. McKerron (McDonald) 1 1
Katana, g. g. (Young) 2 2
Clover Patch, br. m. (Snow) 3 3
Time—2:17¼, 2:17¾.

OLD GLORY SALE OF 1908.

The Breeder and Sportsman, San Francisco, Cal.,

Gentlemen: The 1908 Old Glory Auction will be held November 16, 17, 18, 19, 20, 21, one week earlier than usual, this being necessary in order that we may, as in the past, follow the National Horse Show.

The Old Glory has ever been known as the greatest of all sales of light harness horses. No other sale can be compared with it. And the truth of this was amply demonstrated last year, when the average price obtained was the highest since 1901, despite the fact that the sale was held at the height of the financial crisis.

Speaking of averages, the average of the first six days of the 1907 Old Glory beat all records. The offerings of the second week were far below the standard, a fact which brought down the average of the entire sale. We have, therefore, decided to make this year's Old Glory a six day event, eliminating as far as possible the cheaper class of horses. We hope to set a new world's record at the coming sale.

The business we have in sight warrants the belief that the 1908 sale will be one of the best we have ever held. Consignments are being made daily and are of the usual high standard set at past Old Glory sales.

We solicit correspondence concerning consignments of high-class material. Our patrons will appreciate the importance of notifying us at once of their intention to sell, the fact that the sale is of six days' duration only making it imperative that space be reserved immediately.

Yours very truly,
FASIG-TIPON COMPANY.

SHIPPING FEVER.

Sale stable distemper, acclimatization fever, are essentially the same, and cause much trouble, losses and time. All horses taken from their homes, for any purpose or reason, coming into contact with other horses, are sure to have this trouble. A good preventive is also an efficient cure when the disease has set in. Spohn's Liquid Distemper Compound has done all that can be reasonably asked to have done in these troubles—cure the sick and prevent those "exposed" or infected from sickness of any of these diseases. All druggists and horse goods houses sell it. 50 cents a bottle; $5 a dozen, or delivered by Spohn Medical Company, Chemists and Bacteriologists, Goshen, Ind.

A. H. EUBANK, Pres. W. B. STRATFORD, Sec. and Treas.
THE FARMERS' ASSOCIATION COTTON WAREHOUSE NO. 1.
MONTGOMERY, Ala., July 21, 1908.
Troy Chemical Co., Binghamton, N. Y.:

Dear Sirs: While you have not solicited a testimonial from me, yet in justice to your preparation "Save-The-Horse" I take pleasure in advising you that it has cured my horse of a "bone spavin" that did not yield to any other treatment, although one of the best veterinarians had him in charge for 30 days, during which time he was fired for the complaint, but still remained lame.

After a few treatments with your preparation the animal showed signs of improvement and at this time no signs of the trouble ever appears, and I consider his recovery the direct result of your remedy.

Yours truly,
W. B. STRATFORD.

CONDUCTED BY J. X. DeWITT.

HUNTING AND ANGLING IN HUMBOLDT COUNTY

(By A. J. Monroe.)

To those who with the return of the seasons, feel "the call of the wild," and the yearning to commune with Nature in her various forms, it is indeed true that,

"There is a pleasure in the pathless woods,
There is a rapture on the lonely shore,
There is society where none intrudes,
By the deep sea and music in its roar;
I love not man the less but Nature more,
From these, our interviews, in which I steal
From all I may be, or have been before,
To mingle with the universe and feel
What I can neer express, yet cannot all conceal."

Coming up as man does through Nature to his present marvelous intellectual and social development, Mother Nature still holds the reverence and love of her finest and truest hearted children. Fishing, hunting and camping, within the sound of ocean's ever murmuring solitudes or among the mountain heights, always has, and always will, claim many votaries. Our California is a marvelous and a glorious State; and that part of California which is our home, Humboldt county, is its finest and most splendid part. It is here that the portion of the continent embracing the United States reaches its most westerly point; and its geographical position in relation to the ocean currents and the prevailing winds make Humboldt county the most densely forested and the best watered county on the Pacific Coast. By glancing at the map of Humboldt, it will be noticed that the trend of the coast-line from Cape Mendocino to the northward for a distance of eighty miles is in a north-easterly direction, Capt Mendocino being about eighteen miles farther westward than the northern boundary of the county. It will also be noticed that the Klamath river with its tributary, the South Fork of the Trinity, Redwood creek running almost across Humboldt county, Mad river extending into Trinity county, Eel river with its two forks extending across the county and into Mendocino and Tehama counties, and the Mattole river, all flow in a northeasterly direction. Between these rivers rise high mountain ridges. In the southwestern part of the county a few miles above the Mendocino line, King's Peak lifts its head over 4,000 feet on the very edge of the ocean. So abrupt is the western slope of this mountain that there is no beach along which a horse can pass. On the eastern boundary of the county, Lasseck's Peak rises nearly 6,000 feet high. Farther north stretches South Fork mountain, a continuous ridge running north and south along our eastern border for twenty miles and nearly 6,000 feet high. On the northern boundary of Humboldt, the Siskiyou mountains, with grand old Shasta 14,000 feet high, uniting with the Coast Range complete the high mountain barriers which encircle Humboldt county on its southern, eastern and northern boundaries. The prevailing winds, except during the few months of winter, blow from the northwest across the Japan current flowing southerly along our coast. The valleys and canyons of all of our rivers flowing, as I have said, northwesterly, seem to have been fashioned to receive the vapor-laden winds from the Pacific, bearing their treasures of moisture to be precipitated by our mountain barriers and deposited over the length and breadth of our county. Under such conditions there is a wonderful vegetable growth and a vast network of ever flowing streams, thus making Humboldt the best fishing and hunting county in the State.

When the white man first came to Humboldt county in 1850, he found the mountains back of the redwood forest, which extended back from the coast ten miles, free from brush and undergrowth and called them the Bald Hills. Through ages the Indians had each year burned the leaves that they might more easily gather their acorns, and the brush and undergrowth that there might be more feed for game and that they might the more easily travel over the country. Thus Humboldt was and has continued to be, by reason of being so well watered and the quantity and character of feed, unequaled on the Pacific Coast as a habitat for fish and wild game. By reason of our want of a railroad connection and the difficulty of reaching Humboldt county except by ocean travel our attractions as a fish and game country have not been known; but of recent years attention has been directed to Humboldt and each returning game season has witnessed a larger and increasing number of the devotees of the rod, the gun and the tent, coming to our county and going out to take advantage of our unequaled opportunities.

Humboldt is unrivaled in the number and quality of the streams which it offers to the angler. On the north we have the wonderful Big Lagoon, Stone Lagoon and Fresh Water Lagoon. Big Lagoon, about forty-five miles square and very deep, invites the angler with the first day of April to come with his troll and catch steelhead, one of the gamest of all fishes. As it is salt water in part the angler may catch the steelhead trout during the month of April in both of the lagoons. With the coming of May the innumerable streams of the county flowing into Eel river, into Redwood, into Mad river and all of the lesser streams are full of large and gamey trout. With the first of May too, the lagoons offer the cut-throat trout weighing from one to three pounds. All of the streams of the county are easily accessible from many different points. Those who desire to go to the high mountain streams can reach them at almost every point by some roads. About the first of July comes the run of salmon trout and steelhead trout and later salmon in Eel river is the finest fishing stream ou the Coast. Drawing its fish from the ocean, there has always been an inexhaustible supply which, rnnning in schools from the Pacific, seek the various creeks and branches to deposit their spawn. The run of salmon-trout and steel heads is persistent and incessant, commencing in July and continuing until the high waters of winter make fishing no longer possible. Only second to Eel river in the run of steelheads and salmon-trout, and also of various kinds of salmon, are Redwood creek, Mad river, Bear river and the Mattole. Prairie creek which runs into Redwood from the north, is noted for its unequaled cut-throat trout. Numerous specimens of this magnificent trout being caught in that stream which are fully five pounds in weight. Fishermen in all the streams of Humboldt are successful with bait, with troll and with the fly. In the cold water of the high mountains the rainbow trout are wonderfully strong and gamy.

Along our hundred and thirty or forty miles of seacoast is offered some of the finest marine fishing in the State. At various points along our coast there are splendid cod fishing grounds, also surf fish, sole and sea trout; while off of the entrance to Humboldt bay and off Trinidad are very fine cod and halibut grounds. Along many parts of the coast beach are to be found the finest clams. Around Trinidad and Patrick's Point mussels are so plentiful that they can be gathered in sacks. Along the southern part of our coast abalones of the finest flavor abound. Humboldt Bay produces clams in many varieties and of most toothsome quality. The clam beds of South Bay are practically inexhaustible, and the far-famed Little river razor-backs are said to be the finest clams found on the coast. The finest crabs abound in the waters along our coast and in our bays as is shown by the tons shipped from Eureka to San Francisco. Thus to the fisherman and camper seeking to enjoy outdoor life and sport Humboldt county offers the assurance that he can find almost any kind of gamey fish or crustacean or bivalves found in the market or sought for by the epicure.

The enthusiastic Nimrod can find in Humboldt the most inviting fields for hunting from the sandpiper snipe to the cinnamon bear. In the whole Coast Range from the Mendocino line to Siskiyou and Del Norte on the north, there are black and cinnamon bear, panther, bob-cats and the coyote. Crossing the Klamath river and the Trinity in the northeastern part of the county is a wild rough uninhabited country in which bear and panther abound. Every part of the county is now accessible by wagon roads with the addition of a few miles of packing. Humboldt is one of the best deer counties in the State. The writer has killed deer within four miles of Eureka, and there is hardly a portion of the county except the thickly settled parts where deer cannot be found; while in the mountain fastnesses and on the edge of the forests they are particularly plentiful. It is a comparatively easy matter for the amateur hunter with a little patience and persistence to bag the limit of two bucks in many of the game fields of the county. To those who wish to feast on fat venison or secure the antlered trophies of the Pacific or Columbia deer, Humboldt county offers the best opportunity in the State. The big game hunter and the deer hunter can in the season always find in the mountains plenty of grouse and mountain quail which make gratifying change in the larder. The big gray squirrels are particularly numerous in our forests, while the ground squirrel, which is truly a delicacy when properly prepared, is exceedingly plentiful. In the duck season our marshes, and ocean and bay shores, and the estuaries of the various streams along our coast, are alive with many varieties of ducks and other aquatic birds. Among the ducks that come to our shores are the canvasback, mallard, widgeon, sprig, bluebill and other varieties.

To those who would find relief from the enervating heat of the interior during the summer months, the stimulating, exhilarating and health-giving seashore gives a constant invitation. To those who would get out of the humidity of the sea-shore into a drier atmosphere, the mountains back of the redwood forests with the dry climate and an abundance of water offers an ideal opportunity for camping out. During the months of July and August no tent is necessary. It is customary for campers to sleep under the open sky. There are innumerable places on the banks of our unnumbered creeks and mountain streams that combine splendid fishing, the finest hunting, unequaled opportunities for swimming and bathing, with fuel and shelter from winds.

Drink Jackson's Napa Soda.

REVOLVER SHOOTING A GROWING SPORT.

Interest in revolver shooting as a sport has kept pace with the growing interest in other outdoor sports and the increasing number of clubs in the United States testify to the fact that practice with the hand gun is becoming more popular.

Revolver shooting as a sport is a comparatively new game and it was not until the formation of the United States Revolver Association and the two victories of the American revolver team over the crack French team, that revolver shooting took its place with other recognized sports like rifle practice and the traps.

The earliest record of any one really attempting to do fine work with the revolver is that of Captain John Travers of Missouri. With the muzzle-loading revolver used in those days, 1860, he won a match in St. Louis, shooting at fifteen china plates nine inches in diameter, at tbe 100-foot range, and breaking eleven of them. This established a record for those days, although now a man who could not hit a target of that size every time would be considered a poor shot.

Ira Anson Paine is really the first expert revolver shot on record. In 1881 he went on a tour through Europe giving exhibitions with the pistol and revolver, and like a good many other top-notchers, instead of receiving credit for his marksmanship, was popularly supposed to accomplish most of his fine work by faking or tricks of some sort. The King of Portugal, however, was enough impressed with the work of this American to knight him and make him a chevalier of an ancient order. Paine thereafter tacking the "Chevalier" on to his name.

The Standard American 200-yard rifle target, with its rings counting from ten down to three, soon came into general use by the revolver cranks, but was first used at twenty-five yards. half the present distance for this target. The regularity with which some of the experts put all their shots into the ten ring at this range forced a change to make the game harder and the target was moved back to fifty yards.

One-hundred-shot matches on this target soon came into vogue and there was keen competition to gain the coveted "best on record" for this match. Chevalier Paine held the record until the latter part of 1887, when a man named F. E. Bennett wrested the honor from him with his score at 914 out of 1,000. Paine's first record in this number of shots at fifty yards was 791 aud was first considered extraordinary until Paine a few months later, scored 841, showing that the possibilities of the hand gun were by no means exhausted.

Paine and Bennett finally agreed to shoot a match to determine the real champion of the world and the contest was pulled off in 1888 for a purse of $1,000, conditions to be 100 shots per day for six consecutive days. On the fifth day of the match, while he was nine points to the good, Paine entered a protest and quit the contest, the title and purse going to Bennett by decision of the National Rifle Association. Bennett's best score was 915 for 1,000 shots. Some of the other records are as follows at this range and under the same conditions, but using single-shot pistols:

Nov. 10, 1888, F. E. Bennett.....934
Sept. 10, 1890, F. E. Bennett.....936
Feb. 25, 1900, J. E. Gorman (San Francisco)....939
May 26, 1901, J. E. Gorman.....942
March 1, 1902, E. E. Patridge.....942

Tom Anderton scored 480 points out of 500 in fifty shots, or at the rate of 960 for 1000 shots, April 4, 1903. When it is considered that this means an average of six shots out of ten in the 3 1-3-inch circle at fifty yards, and the other four shots in the ten in the 9 ring measuring some 5½ inches in diameter, and keeping up this gait for 100 shots, the wonderful accuracy of the hand gun in skilled hands is demonstrated.

Along about 1900 the French began to sit up and take notice that America had a few revolver shots, and a challenge was issued to the revolver marksmen of the United States for an international cable match with the revolver. The best shots of the United States were hurriedly collected and a ten-man team shot against the Frenchmen in June of 1900. The Frenchmen use an old-fashioned way of practice, with revolvers equipped with hair triggers and some of them with barrels a foot long, while the Americans used the regular Smith & Wesson and Colts guns made for use and not for exclusive work in a gallery. The final score was: Americans, 4889; French, 4828.

The Frenchmen were not satisfied with this beating and stated that their team was not national in character, but only represented Paris, and were accordingly given another chance in June, 1903.

This time the Americans had more time and determined to get a team together that would make the Frenchmen throw away their long cannons in disgust and get American guns when they saw the final scores. The only section of the country not represented on the American team was California, the cracks in San Francisco not taking part for some reason.

Such a collection of fine revolver shots as the American team will probably never be gotten together again, while the army, navy and the pistol and revolver clubs of France were raked with a fine-tooth comb to secure shots for the French team and to retrieve the lost laurels of the French revolver team. Th French team again used their own type of weapon against the shorter, more serviceable American guns. The final scores were: American team, 7889; French team, 7640; or a victory for the Americans by 249

points, the teams cousistiug of fifteen men and each man firing sixty shots.

At the time of the first match the United States Revolver Association was formed to preserve records and to encourage revolver shooting. Yearly championship matches with revolver, pistol and military revolver are held iu every section of the country where there exists a chapter of this organization, and the winner is considered the champion of the United States. A standard system of practice has been introduced and medals awarded to every man capable of making ten scores over a certain average.

There are at present a large number of strong clubs throughout the country, the greatest being the Manhattan Rifle and Revolver Club of New York, which includes more fine shots than any other organization in the world. The St. Louis Club, the Walnut Hill organization of Boston, and the Providence Club are among the most prominent. The Oakland Revolver Club has been organized for some time past, J. E. Gorman, Holmes, Harris and other skilled shots are members and take part in the regular club shoots at Shell Mound. In San Francisco there is the Golden Gate Rifle and Pistol Club, M. O. Feudner being one of the crack pistol shots of this organization. There is also regular revolver shooting matches at the monthly shoots of the Veteran National Guard of California. Revolver shooting is rapidly gaining many devotees in this city. The Los Angeles Club, while only a year old, has developed some excellent shots and has won from the Los Angeles signal corps, from the picked team of the Atlantic fleet and from the Des Moines Revolver and Rifle Club.

The arms commonly used in revolver practice at present are the Remington models, the Smith & Wesson 38 military, with now and then a 41 new service Colts or Smith & Wesson New Century 44, although the larger caliber arms are not much used on account of their weight and recoil. All of the above arms have from 6 to 7½ inch barrels and are, of course, equipped with wind gauge and elevating sights.

AN UNLUCKY HUNTER.

An extremely unfortunate hunting accident occurred in the wilds of Shasta county a few days ago in which a well known and popular sportsman, George H. T. Jackson of San Francisco was the underserving victim of the asinine carelessness of the guide for the hunting party. The hunters had been stationed in different places and were on the qui vive for their quarry. Mr. Jackson was posted on a runway that was looked upon as a very good location for getting a buck. Waiting in his station he must have moved in the brush, enough so, to attract the attention of the guide, one John Smith, who thereupon opened fire with his rifle and caught the unlucky huuter in the fleshy portion of the right hip, just where be was sitting down. For a guide, a man supposed to know the country and his business, such a piece of practically criminal negligence seems to be inexcusable. Mr. Jackson is an experienced deer hunter and can not be, even remotely, accused of contributory negligence.

Mr. Jackson was immediately taken care of by his hunting companions and taken to Delta where he was given such attention as could be there secured and was then hurried to this city and taken charge of by Dr. E. G. McConnell who had the sufferer placed in the German Hospital where every care and attention was given the case. After the hullet was extracted the patient rested easier and now barring the danger of blood poisoning Mr. Jackson is in a fair way for recovery. Among the hunting party were: Henry Wagner, James Brownell, John Biller and William Osgood. Mr. Jackson has the sympathy of a host of sportsmen and a large circle of business acquaintances among whom he was extremely popular.

A recent report from Alhany, Ore., states: Though not so abundant as in some past years, China pheasants will he as plentiful this Fall as during the hunting season of 1907. Farmers in Linn county, where the birds were first liberated in America and where they are yet more numerous than any other place in the United States, report that in spite of the unfavorable hatching season this spring there are apparently plenty of the young game birds.

Last year at the end of the open season there were more old birds left than for many years. This was largely due to poor hunting weather. With so many old birds left there would have been a record-breaking number of pheasants this year but for the late spring. The cold rains this spring just at the time the young birds were hatching killed many of them.

One favorable circumstance in the hatching season this year was the absence of crows. These birds eat the pheasant eggs and some years they have been so plentiful as to have an appreciable effect on the number of young pheasants.

While the China pheasants are very plentiful this year there are practically no native pheasants and grouse seen in the fields. In fact, it is said that they are becoming scarcer year by year and are rapidly becoming extinct in this part of the state. The cause of this condition is not known though many farmers assert that the China pheasants destroy the nests of the native birds and kill their young.

It is reported that a fish hatchery will probably be established in Tulare county on the headwaters of the Kaweah river.

WITH A KANGAROO HUNTER.

In the shire of Tambo, when the kangaroos were "open," to use the hunters' expression, they made £20 and £30 a month, and some even more. One of the keenest men after kangaroo was an old identity, one Jacob Beal, who lived on the outskirts of the back country forest—the Eastern Gippsland country, so writes a correspondent of the Weekly Press of Christchurch, N. Z. Jacob had heen "at the game" for a generation. He knew every acre of the wild country for miles around; he knew just whcre the feeding grounds of the kangaroos were; and he was making as big a hag as any single man who carried his rifle through the bush.

I arriver one day at Beal's camp to find that he had just returned with a load of skins, which he was busy pegging out on the sides of trees. This hunter was nothing if not original, both in dress and manner. He eyed me as I approached, and silenced with one brief, unprintable sentence his barking dogs. Two teeth only Jacob had, and they were almost hidden by his bushy moustache. They were black with tobacco smoke, and held that ill-smelling pipe without which he was never seen.

That evening I had supper with the old hunter, and the kangaroo tail soup which we had possessed all the hest qualities. Over it we chatted of old times, and I laid my plans for some sport with this kangaroo hunter.

Next day we were soon in the forest, and the hunter and his dogs were at oncc alive to business. We climbcd the side of a wooded range, and began to descend towards the valley below, where a soakage from the hills caused the grass to be greener than elsewbere. Before the descent of the slope had been half made the hunter stopped suddenly, and on the instant, his dogs pricked their ears, looked questioningly into the face of tbeir master, then apparently let the gaze of their eyes follow the direction in which the rifle pointed as Beal raised it to his shoulder and took aim. Every taut muscle in their bodies was ready for action, but they did not move for the moment while they waited for the report of the Winchester. As for myself, I strained my ueck this way and that to try to get a glimpse of the game, but if the reader has ever tried to find with his eye the upright, motionless form of a kangaroo standing in a forest of stringy-barks, he will understand how difficult was my task. When standing amongst the trunks of stringy-barks, unless the trees have been blackened by bush fires, the kangaroo has a perfectly protective surrounding, so correspondingly grey is the animal with all about it.

Like the dogs, however, I followed with my eye the direction of the muzzle of the rifle, and, before the smoke issued thcrefrom was able to see the grey form, tall and erect, of an "old man" kangaroo on the other slope that rose up from the side of the valley. In that instant there was a report, the dogs dashed down the hillside, and Jacoh, for the first time since he sighted the 'roo, spoke aloud.

"My gum! It was a pretty shot, and yet I missed 'im. My eyes isn't so good as they used ter be. But listen. The dogs has 'im stuck up. I muster hit 'im after all. Come on, now's your chance." We ran down the slope, but I outran the old hunter.

"You go ahead and get your pitcher. Your legs is younger nor mine."

I went ahead full speed, and he, puffing and blowing, came bebind. The kangaroo had been struck by tbe bullet, and the dogs, following it, had it at bay on the crown of the ridge. I was soon withiu camera reach, but at my approach the animal again made the bush ecbo with its thumping retreat. This time it retracted its leaps, and went away from me in the direction of old Jacob. Now it turned to the right, then to the left, the dogs still attacking. I followed in the rear at last, not knowing in the least where the man with the rifle might be. Once, twice, I thought I heard a whistle, but I was so intent on getting within camera range of the kangaroo, which was again at bay, that I disregarded what might have been a sign of warning.

Beyond some dense scrub I could hear the dogs barking wildly, and I hastened to the spot, to find that the kangaroo had taken up his position under a wild cherry tree which stood in a space almost open, but surrounded by a thicket of young sapplings.

Here was my chance. I moved closer, my head bowed to see the subject in the view-finder of the snapshotter. I pressed the ball that released the shutter, and in the same instant the rifle report rang through the forest, the bullet passed through the body of the kangaroo and embedded itself in a gum tree within a few feet of my side. The kangaroo was a big fellow. I had but to await my opportunity to secure other pictures to accompany the two I had already snapped, and by which I shall always remember my day with the kangaroo hunter.

North Yakima, Washington, sportsmen went afield on the 15th inst. On that date and until Novemher 15th it will be lawful to shoot grouse, partridge, prairie chicken, sage hens, native pheasant, ptarmigan. Ducks, swan, sandhill crane, snipe and other waterfowl may be shot from September 1st to March 1st. The bag limit is 10 birds a day except in the case of snipe and waterfowl on which a bag limit is 25. The license is $1.00 for a county resident and $5 for a state resident, the county license for a non-resident being $5. The fine is not less than $10 or more than $500 for the violation of any of the game laws. The fine for hunting without a license is not less than $10 or more than $100. It is unlawful to shoot on enclosed land without permission.

A FAMOUS BUCK BAGGED.

The Salinas Index of August 18th relates, more's the pity, the following story of the passing of a grand old buck, an antlered noble that kept the boys on the jump for a number of seasons past:

"Information has been received that "Old Sur," the "daddy buck" of Monterery county, is dead at last. It appears that the big deer, which for eight years has eluded the best shots in the State and is responsible for more than his share of nature-faking yarns, met his Waterloo last Saturday upon the topmost peak of the Big Sur country, whither he had heen tracked by James Mann, a noted guide ,and Andrew Meyers of Monterey. The two men followed the trail of the deer for almost a week over a country where there was no trail save that left by the monarch of the mountains, always a mile or two in the lead. They finally abandoned the quest when they found the tracks led into an impassable canyon and started homeward. While eating luncheon there was a crashing in the underbrush and "Old Sur" leaped into an open glen 200 yards distant. He stood there for an instant, head erect and nostrils quivering. Then a bullet from Mann's rifle split his heart. With a last tremendous effort "Old Sur" leaped into tbe air and crashed head foremost against a stout young tree, snapping the trunk as if it were cardboard. The deer weighed 230 pounds and his antlers, numbering eight prongs, are the largest ever seen in this part of the State.

The Idaho State fish and game department will this fall complete two new fish hatcheries and double the present capacity of the Hay Spur hatchery, making FIVE—DE WITT possible tbe distribution of 10,000,000 small trout in Idaho waters annually, a greater numher of seed fish than arc now being planted each year hy any state in the union. The department has decided to accept the proposition of Sandpoint and establish a hatchery there for northern Idaho, the citizens of that section giving the State a 10-acre tract of ground and an exceptionally fine water rigbt. This hatchery will be of 32 trough size or exactly the same size as the Hay Spur hatchery is to be when enlarged. Since the order for the survey for the hatchery site on the river in Fremont county it is proposed to proceed at once with the construction of an 80-trough size hatchery there, the size of the hatchery being determined by the exceptionally fine natural advantages for taking eggs iu that vicinity, from the headwaters of tbe Snake river. It is planned to place these eggs in the hatchery there, and to make distributions to the other hatcheries as soon as they have heen eyed, thus saving much time and expense in the general distribution. Deputy Game Warden Livingston who has conducted the distribution of fish tbis year in all sections of the State, and who has had charge of the car especially equipped and donated to the use of the department by the Oregon Short Line, states that on one of the trips from the Hay Spur hatchery in Blaine county to Lewiston but three small fish from among 155,000 died in transit, wbile in all shipments the losses were remarkably small.

Reports from the mountains reached from Redlands, San Bernardino county, continue to tell of occasional successes of deer hunters, but the best hunting is over, with less thau thirty deer to the credit of the hunters in the local mountains, except those killed by the Indians, of which nothing is known. Five were killed on South Mountain, near Oak Glen, and six in the country between Sugarloaf and Mount San Gorgonio, and the others in various parts of tbe mountains, including the slopes of San Gorgonio, Fawnskin, Deer creek and Santa Ana canyon. The season has been as satisfactory as any in recent years, but Redlands sportsmen agree that the game is becoming too scarce and that something should he done to increase it. Many are in favor of a closed season for about three years, while others want the State Fish Commission to increase the bounty on mountain lions. This year at Oak Glen, while only five deer were killed, ten carcasses of does and fawns were found where the animals had been killed by mountain lions. Similar conditions exist in all sections of the mountains. The bounty now is $20 for a pelt, which is sufficient for any hunter who happens on the tracks of a lion and follows until he kills the heast, but is not sufficient to encourage trappers and hunters to devote their time to killing them off. Local sportsmen suggest that the State pay $50 for a pelt instead of $20, thinking that it will encourage the killing off of the lions. It is figured that each lion kills au average of two or three deer a week, thus destroying many in the course of a season, several times the number that are shot.

Dolphin and swordfish angling is the fin de siecle sport in Catalina waters just now, pending the invasion of yellowfin tuna. No less than six dolphin, averaging fifteen pounds in weight, have been taken this season. The dolphin is a deep sea fish and is usually found several miles, often ten or twelve, from land, hy the Catalina anglers. Watch for a large mass of floating kelp. Your dolphin is likely to be there, because under it may be found the small fish which it is partial to as food. Strange to say, the semi-transparent, bitter tasting kelp fish is the favorite morsel of the dolphin, and the Avalon boatmen have tumbled to the fact. Various writers have told of thc wonderful coloring of the dolphin, but not so many of its gameness. It is a worthy prey of any angler's rod.

AT THE TRAPS.

The Carnation Gun Club regular monthly shoot at the Guadalupe valley grounds was held August 23d. A score of sbooters participated in the various events. J. Ferrier won the Du Pont trophy race, breaking 22 out of 25 targets, 16 yards rise. The club match, 25 targets, bad $30 added money for the hoys to take a crack at. M. Perpoli with 21 and J. Pisani with 19 were the two high guns.

In shooting off a previous tie, Ferrier scored 21 out of 25, beating Finnoccbio and Pisani with 18 eacb.

Following the program the boys were regaled with a bullshead lunch garnisbed with appetizing side lines. In tbis function, it was noticeable that the powder burners wbo were shy on scores at blue rocks made up for that lack with large appetites, thus sort of balancing averages as it were. Prof. Wideman, for instance, who has the repntation of being rather dyspeptic displayed stowage capacities that would rival tbe facilities of an ordinary freight car.

The scores shot were the following:

Dupont Trophy race, 25 targets, distance handicap—R. Finnochio 13-18 yards; J. Pisani 19-18, P. Finnocchio 16-16, G. Sylvester 20-16, M. Perpoli 19-16, J. Sullivan 18-16, J. Ferrier 22-16, J. Rose 19-14, Thomas 18-16, Moulton 16-16, Widemann 9-14, Ed. Barry 15-14, Exley 17-14, Hahlin 6-14, Burkhardt 11-14.

Club race, 25 targets—G. Sylvester 16, J. Sullivan 18, Tbomas 17, Exley 12, J. Pisani 19, Finnocchio 17, Widemann 8, Ferrier 17, Moulton 18, J. Rose 18. Perpoli 21, Eggers 15, Morris 4, Deafy 4, Hahlin 9, Barry 12, R. Finnocchio 18, Burkhardt 11.

Practice Sboot, 15 targets—G. Sylvester 11, Sullivan 12, Thomas 12, Exley 3, J. Pisani 12, Perpoli 9, Moulton 5, Ferrier 1, Widemann 15, Finnocchio 12, Sullivan 7, Thomas 7, J. Pisani 8, Finnocchio 6.

Besides winning the Du Pont trophy Ferrier also won the special prize put up by J. Pisani. All the contestants used U. M. C. shells.

The initial Rocky Mountain Handicap under the auspices of tbe Interstate Association will take place at Denver, Col., next week. September 1, 2, 3. There will be from $1,500 to $3,500 or more added money, based on tbe attendance.

Monday, August 31st, will he devoted to preliminary practicc, 5 events, 20 targets each, entrance $2 each event, Rose system 8-5-3-2. Sweepstakes open to amateurs only.

Tuesday, the first day, the card calls for 10 events, 20 targets each, $2 entrance each. Event No. 5, 19 yards rise, use of hoth barrels. Event No. 10, 10 double rises at 16 yards.

Wednesday, five 20 target races, $2 entrance (one race at 19 yards rise, use of both barrels). The feature of tbe day will be the Preliminary Handicap, the closing event, 100 targets unknown angles, entrance $7.50, handicaps 16 to 23 yards, $150 added money and a trophy to the winner.

Wednesday, the fiual feature of the shoot will be the Rocky Mountain Handicap, 100 targets, $10 entrance, 16 to 23 yards handicap, high guns, $300 added to the purse and a trophy to the winner. This cvent will be preceded by five 20 target races, $2 entrance each. (one race at 10 double rises, 16 yards).

The total entrance for the tbree days amounts to $57.50, targets included. The Squier money back system will be in vogue—it is estimated nearly $1,500 will be paid back (less the price of targets) to amateurs who fail to win the amount of their entrance money, shooting in all of the regular events not including the two handicaps. Purses in all events but the two feature races will be divided Rose system 8-5-3-2. It is expected there will be an attendance of 300 or more sbooters, if so this will bring up the added money to $3,750 or over.

The tenth regular shoot of the Eureka Gun Club was held August 16th, the following scores being made: Kelly 19 out of 25, Jensen 20, C. O. Falk 21, Parker 21, Jackson 14, C. C. Falk 17, Noble 15, Stone 12, Perrott 11.

Tbe club will bold two more shoots this season, one on September 6 and one on September 20. On the 20th the big tournament will close. The new club now has eight trophies which will be awarded at that time, and all the crack shots are practicing up for the contest.

On the second day of the tournament the second event will be a handicap shoot, the Humboldt County Handicap. The prize will be a $70 Ithaca gun, to be made to order and shipped direct from the factory.

The Riverside Gun Club of Reno, Nev., held its regular sboot August 16tb, at Moana Springs and aside from Al North's hard luck the sboot was without incident. Woods won the Moana trophy with 23 out of a possible 25.

The Herz medal, a handicap affair, was won by Tom Pickett with 24 birds. North could only get 23. The Moana loving cup went to Woods with North and Jimmy Clark 22 each. The shoot was well attended.

The Spokane Rod and Gun Club will open its new club house and grounds at Moran Prairie on November 1st, and the season will be open till June, closing just before the Pacific Northwest tournament.

The new officers of tbe club are: E. J. Chingren, president; R. J. Danson, vice-president; A. F. Wiesman, secretary; F. K. McBroom, treasurer; A. K. Copson, field captain; T. B. Ware (chairman), M. B. Brownless and Walter Merryweather, directors.

The Medford, Ore., tournament August 13th and 14th, was a well conducted and successful shoot. The Medford sportsmen, as usual, gave the visitors an enjoyable time. Weather and shooting conditions were about ideal. Harry Ellis of Portland was high gun for the two days, 289 out of 300. Dick Reed of San Francisco was beaten by one bird, he broke 288. Fred Willett of San Francisco was third with 273.

The special event at 25 targets for the individual championship for amateurs, on the first day, resulted in Helman making 24 and winning the event. Tbe scores were: Hellman 24, Rickoff 23, Seeley 22, Meek 22, Enyart 22, Smitb 21, Ganet 21, Peyton 21.

Tbere were 10 regular events, 15 targets, each day, 300 targets in all.

The total scores of those who shot through the program of 300 targets are the following: Ellis 289, Reed 288, Willett 273, Enyart 272, Peyton 272, King 272, Helman 271, Nauman (Parker) 268, Haight 267, Hillis 266, Hoelle 262, Biden 262, Carlton 262, Garratt 262, Seeley 261, Justins 256, Morss 250, Boyden 250, Smith 243, Leach 236, Meek 234, Reickhoff 233, Tolls 222.

Reickhoff and Hillis gave a very interesting exhibition of fancy sbooting in the afternoon after the events had closed.

The Interstate Association's circuit for the season of 1908 will close with the Rocky Mountain Handicap next week at Denver.

Tbe Southwestern Gun Club of Albuquerque, N. M., will hold a series of four shoots next month, at 25 targets per shoot, 100 in all, target handicap, for a Du Pont trophy. Secretary Cobb won the Du Pont cup the club shot for last season.

The Sbell Mound ranges were unusually busy for a weekday August 20th, two organizations turning out for practice. The Possible Pistol Club, one of the most exclusive shooting clubs in tbe United States, thc memhership heing strictly limited to 10, held its monthly sboot, and, despite the fact that some of the members were trying out new weapons, the shooting was above tbe average.

Henry A. Harris was the star of the day, making a record of 91 out of a possible 100. The first five shots Harris fired at were dead centers and the next two were nines. Thereafter he fell down and failed to break the club's record.

Willie Siebe surprised his friends by running up a score of 89, and, just to show that it was no fluke, he duplicated tbe feat hefore the day closed. Here are the scores made by the Possible members: William A. Siebe 89, Ferdinand Mante 86, 86, 80; A. M. Paulson 85, 76, 73; Julius Stirn 77; Herman Windmueller 86, 81, 82; Henry A. Harris 84, 77, 89, 85, 86, 91.

A movement is on foot to form a revolver club in Eureka, Cal. The leaders in the affair are: A. J. Monroe, Sam Dowling, M. F. Gillette, Dr. Chas. Falk, Will Noble, C. M. Wheeler and Mayor Ricks.

SANTA CRUZ CONVENTION.

The principal matters discussed and finally recommended for presentation to the next legislature for adoption by tbe State Game and Fish Association at its recent convention at Santa Cruz are the following:

The following changes were recommended as desirable amendments to the game and fish laws:

"First, the prohibition of the sale of ducks.

"Second, the reduction of the bag limit of ducks to twenty-five.

"The prohibition of the sale of all trout.

"Fourth, the prohibition of the shipping of all trout caught in the state to any place outside of the state.

"Fifth, the dividing of the state into two fish and game districts, making the counties south of Tehachapi one district and the rest of the state the other.

"Sixth, that all fines collected for the violations of the fish and game laws shall go into the treasury of such counties as maintain a county game warden."

It was proposed that the Association in conjunction with the Santa Cruz and Monterey Chambers of Commerce petition the Federal Government, with the purpose in view of ascertaining the reason for the gradual decrease, from year to year, of tbe salmon and other food fish in Monterey bay. One reason advanced for this growing scarcity of fish is the demands on the supply by some 400 fishing boats, it being claimed that the commercial depletion proceeds faster than the fish can be replenished.

It was decided to leave all questions concerning commercial fishing to the State Fish Commission.

Another matter considered hy Southern California sportsmen of tbe greatest importance which the southern delegates succeeded in accomplisbing, after many years of ineffectual effort, was the recommendation that the State be divided into game districts. It being recommended that the counties lying south of the Tehachapi—Santa Barhara, Ventura, Los Angeles, San Bernardino, Riverside, Imperial, Orange and San Diego—whose climatic conditions, game and distribution of game are so nearly similar, and are so unlike the conditions in tbe northern and central part of the State, that it has been the greatest obstacle in tbe way of getting suitable legislation, shall be in one district for purposes of game legislation, and the remainder of the State shall be in another district. This measure was supported by all the members present from Southern California and was warmly endorsed by Senator Willis, of San Bernardino.

The matter of compensation for county clerks for the extra labor caused by the issuing of game licenses such compensation to be paid out of the funds received for licenses was favored.

It was also recommended that anglers who fish for protected fish should have a license, but that both hunting and fishing should be covered by the hunting license, thus requiring those who fish, but do not hunt, to take out a hunting license which will cover hoth, the license not to apply to anyone under 15 years of age. This, it is estimated, will increase the license fund from $15,000 to $50,000.

It was recommended that there be but one fund and that it be used for the benefit of both fish and game."

The prospects are very poor for quail shooting in the vicinity of Alta, Placer county, when the season opens this year. Very few flocks are in evidence; those seen being few in numbers. The only cause given for the scarcity is their destruction by bluejays. Tbe jays seem to be greatly increasing each year, upon about the same ratio as quail are decreasing.

Salmon have been taken during tbe week in Raccoon straits by anglers who trolled for them. Last Sunday there was a large fleet of launches outside the heads, but results were indifferent.

The following report is credited to a correspondent located in Henderson, Shasta county: "With the increasing depredations of bears and California lions occurring in the neighborhood of tbe Big Bend Hot Springs, the kennel of hounds which are used by a local hunter is being augmented. A local merchant on his way home the other evening was followed by three panthers right to the door of his house. A neighbor on tbe same night had two sheep torn to pieces, and the panther screams are almost as common as the screech of an owl. Bear tracks as large as medium-sized dinner plates are noticeable on many of the trails and Professor White, an old-time Redding school principal, proposes importing two blooded hounds to join in the hunt that is being arranged and will take place soon."

The grouse season opened in Idaho on August 15th.

Drink Jackson's Napa Soda.

TAMED SEAGULLS.

After having fed the gulls for a few weeks, during which time the suspicious birds were schooled with fear and trembling, the bloodless hunters succeeded at Santa Monica a few days ago in "shooting" the gulls while they were in convention assembled, considering the adoption of a resolution indorsing the noiseless hunters. While the delegates had their eyes turned toward the sea, one of their number had taken the reverse position to perform the duties of rear sentinel. It is his business to see that no intruders approach from the rear, and when in his judgment the delegates are about to be surprised he unfailingly gives a startled cry of warning that results in hasty adjournment and retreat to some other lodge. Upon reassembling the birds invariably assume positions as before, with the sentinel on guard against surprise.

The gull with which the visitor to the beaches of Southern California is familiar not infrequently flies far inland, where for hours he will follow the plow of the agriculturist, devouring such worms as may be exposed. At other times he will feed with the flocks and herds. The gulls descend upon the Soldiers' Home, five miles from the Santa Monica beach, in such number as to make the feeding of the hogs a heavy tax upon Uncle Sam. The birds ate so much of the grain that in order to insure a generous portion for the hogs a double quantity had to be fed. These birds are thought to have contributed to the spread of hog cholera amoug the members of the herd at the bome and for that reason the hog business was abandoned.

Being too lazy to fish for himself, the gull steals from bis less alert associates. The pelican is his regular meal ticket, but the conscience of the gull is so pliable that he hesitates not at all to pilfer from the nests of other birds the food that has been placed there for the young. The eggs of shore birds constitute a considerable portion of his daily menu, and he is not averse to appropriating the nests of the cormorant.

But with all bis other faults the gull is clean and devoted to his mate. As the scavenger of the sea he is a boon to humanity, for were it not for the gull the beaches would upon occasion be littered with dead and decayiug fish and fowl. Being a poor swimmer and an indifferent diver, the only live fish the gull eats are such small surface swimmers as he may be able to capture or those which he takes from tbe pelicans and other industrious fisher fowls. The gull floats gracetully, and being a good flyer, his life is for the most part spent on the wing.

The superstitution of the sea prevents the gull from being assaulted by the gunner, although the summer visitors to the seaside are accustomed to making the gull their target. However, the law protects them, and iu the rigid enforcement of these provisions the bird societies are ever on the alert.

In former years it was the practice of summer guests along the shores of Santa Monica bay to attach a board to one end of a string and a fish to the other. The gull would devour the fish, and after swallowing the string would drown with the board against its bill. Otber "pleasure lovers" would tie a small fish upon eitber end of a string and throw the deception into the water. One gull would swallow each fish, and a few hours later two dead gulls held together by a string would be washed upon the beach.

Thanks to the activity of the officers of the Soclety for the Prevention of Cruelty to Animals, this inhuman practice was stopped, and for several years the gulls, pelicans an d other sea and shore birds of the Santa Monica bay section have not been the victims of cruel enemies.

---o---

PROPOSED KLAMATH GAME PRESERVE.

The creation of a game preserve on the lower Klamath lake and its bordering marshes and swamps is meeting with approval on the part of the local sportsmen, says the Sacramento Bee. The preserve covers all of the Government lands in the lower Klamath basin and the order is to prohibit all shooting, the idea being to give to the birds of this section a permanent breeding ground.

It is very probable that the next preserve to be created will be the Clear lake reservoir site. The Government owns about 25,000 acres and it is the desire of many of the local sportsmen that the whole area be put into a permanent preserve and to use it as a breeding ground for all kinds of water fowl.

The market hunting that has been carried on on the lower Klamath lake and on Tule lake is threatening the extermination of many of the game birds and also those that are valuable for plumage. Oregon prohibits all market hunting, but in California there is no law against it, consequently the bunters camp on the State line, where it is convenient for them to violate the Oregon laws and take shelter in California where thew cannot be prosecuted. The creation of the preserve will put a stop to this, as the lakes will be closely guarded by a Government representative who will be in charge of the preserve.

It is reported that the success of the recent Venice blue rock tournament has assured the holding of the Interstate tournament at Los Angeles next year, on the week following the Elks' convention. This will be one of the greatest shooting events ever held in California. Three hundred or 400 shotgun experts from all over the Unlted States are expected, so states a Los Angeles enthusiast. Special railroad rates will be given, and the prlze list will be such as to attract the talent of the country. The management of the affalr ls in the hands of men whose names are synonymous wlth success.

DEATH OF W. E. BRIDGE.

William E. Bridge, for 48 years one of the leading stablemen of San Franclsco, died rather suddenly at his home in Santa Rosa, Cal., where he has lived for the past two years. "Billy" Bridge came to California in 1858, and began business here by buying the old Black Hawk Stables which stood on the spot now occupied by the Stock Exchange. In 1868 the late Alvinza Hayward, then a millionaire mining man, built a new stable for Mr. Bridge on Sutter street, above Kearney, and the latter fitted it up as the St. Lawrence Stables, named in honor of the county in New York State where he and Hayward were boys together. Mr. Bridge ran this stable with great success for eighteen years, and then moved to Post street between Powell and Mason to a building that had been erected for him by W. S. Hobart. Here he conducted business successfully for twenty years, selling out a few months before the big earthquake and fire of 1906, and retiring to his home on the outskirts of Santa Rosa. Last November his beloved wife passed away and he felt her death most keenly. An affection of the heart had troubled him for some time, and while it was not expected that his life would end so soon, all his friends knew that he could not live long. He had been in his usual health up to within an hour or so before his death. W. E. Bridge was a native of New York State and a few months over 77 years of age at the time of his death. We believe his only living relative is a nephew, Fred Bridge of this city. Deceased was a member of Golden Gate Commandery of Knights Templar of this city. The funeral took place last Sunday.

There are many of the old time horsemen of San Francisco who will regret to hear of the death of "Billy" Bridge, a man who had hosts of friends by reason of his genial personality and the many acts of kindness he had done.

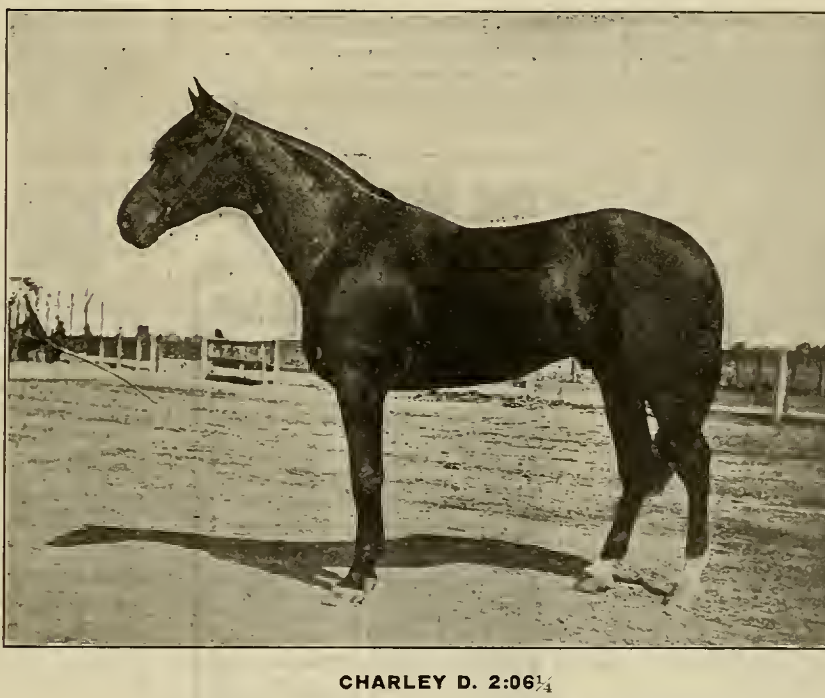
RATHER NARROW MINDED.

Rallstown, N. Y., Aug. 26.—For an hour and a half the openly expressed hostility of tbe owners of trotting horses taking part in the events at the Saratoga county fair toward Governor Charles E. Hughes held up the racing program at the fair grounds here. Governor Hughes was a visitor at the fair to-day and addressed a big gathering, which gave him a hearty greeting and attentive hearing. The Governor's presence on tbe grounds, however, was resented by the horse owners, who have taken exception to the Governor's efforts to suppress betting on the racetracks of the State. As a consequence they refused to start their horses while the executive was on the grounds.

The "strike" of the horse owners caused an unprecedented situation and caused the managers of the fair marked embarrassment. When the conditions became knowu, a sensation was created among the thousands of spectators on the grounds, and considerable pressure was put upon the trotting men to change their attitude and run off the races as scheduled.

In tbis the fair officials took the lead, urging the case strongly upon the recalcitrant owners and pointing out the awkwardness of the situation caused by the balk in the program. Their efforts were fruitless, however, the owners remaining obdurate and for an hour and a half refusing to budge from their position. They openly declared that Governor Hughes had antagonized their interests and that they proposed to retaliate by refusing to take their borses out on the track while he was present.

Governor Hughes was scheduled to leave here on the 4 o'clock train, and shortly before that time he left the fair grounds inclosure. Immediately upon his departure tbe racing proceeded.



CHARLEY D. 2:06¼

By McKinney. Owned by Col. J. C. Kirkpatrick of San Francisco.

HALF MILE TRACKS.

An eastern expert says: "It is rather a remarkable fact that nearly all of the really great borses both of the present and past have been able to go fast over both mile and half mile tracks.

Cresceus 2:02¼ was always at home on a half-mile track; Dau Patch 1:55¼ has broken a world's record over a two-lap ring, and Sweet Marie 2:02 several times has trotted fast miles over half-mile tracks and last year at Lima, O., trotted in 2:07 over the half-mile track there. Hamburg Belle 2:05¼ last year trotted to a record of 2:12¾ over a half-mile track and the sensational pacer Minor Heir 2:00¼ has several times raced over half-mile tracks this season and appears perfectly at home on one. All of his training this season was given him over the half-mile track at Charley Dean's farm and he is a first class performer over the half-mile rings.

Hedgewood Boy 2:03¼, although a big horse, can simply fly over a half-mile track and he is able to negotiate the short turns just as handily as he does the mile turns. A good horse can step a half-mile track just as easily as he can a mile one and, while he may uot be able to go as fast, he can race just as well and without endangering himself.

There may come a tlme in this country when Grand Circult meetings will be held on half-mile tracks and if it ever does come, it will be found that horses will be able to race just as well as they do on the mile tracks, but not as fast. There has been a lot of talk regarding the impossibility of raclng the high-class ones over half-mile tracks, but any good horse can and does race well over them."

CARLOKIN 2:08¼.

The subject of our front page illustration this week is the bay stallion Carlokin, winner of first money in the $10,000 stake at Buffalo two weeks ago, and the heaviest winner now of any California bred horse that is racing this year.

Carlokin is owned by Mr. Claude L. Jones of Modesto, Cal., who attended a sale of Santa Rosa Stock Farm horses held in this city in 1903, and paid $850 for the then two-year-old son of McKinney and Carlotta Wilkes. Carlokin was entered in the Occident and Stanford stakes of that year, dividing second and third money in one and getting third in the other. He has been raced considerably since then and has been out of the money but once, when on account of severe lameness he was not in the first four last year at Salem where he started in the $5,000 purse for 2:14 class trotters, but he won the consolation prize of this race a few days later, so really Carlokin has never failed to get some of the money in every purse or stake in which he has been entered. He is not a large horse, but is a very compact and handsome stallion and although he has been bred to a very few mares his colts are all large and fine looking. The oldest are two years old. Carlokin has been admirably handled by W. G. Durfee during the past three years, and Mr. Jones says that to Mr. Durfee is much of Carlokin's success due. Mr. and Mrs. Jones are contemplating taking a trip east soon to see Carlokin in some of his races before the season ends.

THE FARM

CALIFORNIA LIVE STOCK BREEEERS ASSOCIATION.

The above named association will hold its annual meeting in the Agricultural Pavilion, September 1st, at 8 o'clock p. m., and it is hoped that the attendance will be large.

There are a number of questions that the stockmen ought to take up and discuss, and unless they get together they will find that it is exceedingly diffieult to accomplish results. It was largely through the efforts of this association that the appropriations for the University Farm were secured and this institution needs their help as mueh as ever.

One of the features of the program will be an address by Dr. Charles Keane, State Veterinarian, on Tbe Control and Eradication of Infeetious Diseases of Live Stock. Dr. Keane has been doing a great work in tbe eradication of the Texas fever tick, and also on the sheep seab. There is no doubt that otber infectious diseases, particularly tuberculosis, will have to receive the attention of the stock breeders. If we do not take them up others will and probably their methods will not be as satisfactory, either to us or to the ultimate eradication of the diseases, as would be methods devised after joint discussion between live stock men and veterinarians. Among other addresses, we expect to have reports from Mr. T. B. Gibson and Mr. H. P. Eakel, Jr., on their visits to a number of the leading agrieultural colleges of the Middlewest. Mr. George A. Smith of Corcoran will discuss American bred versus Island bred Jerseys. Mr. Smith is one of our leading Jersey breeders and has had considerable experience with both types, so will undoubtedly present facts of interest to all breeders.

E. W. MAJOR.

RATS AND POULTRY.

The most exasperating and one of the hardest enemies the poultryman has to eomhat is rats. At times they heeome very hold and not only attaek the ehiekens at night, hut venture forth in hroad daylight. Several methods have heen tried and some are very sueeessful. Poisons, traps and dogs are the most effective, hut eaeh has its drawhaeks.

To poison is prohahly one of the most effeetive methods in killing the rodents, hut eare has to he exereised when plaeing it out, as other animals are liable to get it. A few grains of stryehnine plaeed on a pieee of toasted cheese or hread is one of the hest. By plaeing it in the middle of a small drain tile danger of other animals getting it may be avoided.

Barium earhonate or harytes, mixed one part to five parts of meal and slightly moistened, is one of the most effeetive methods of destroying them. It has the additional advantage of not being poisonous to animals, exeept to those for which it is intended. The rats upon eating the mixture will seek water and drink greedily. They will die almost immediately and their eareasses may be removed and hurled. This overeomes the ohjeetions to most poisons, that is, the rodents dying in their holes and eausing disagreeahle odors. Where traps can he used without danger to other animals they are effeetive in getting rid of the rats. Common wire traps are very good, but the ordinary trigger and spring trap is one of the hest. Dogs, where they ean he used without injury to the fowls will be found valuahle allies to the poultry keeper.

After the ehickens and dog have heeome used to each other his kennel, if put elose to the poultry house, will often serve as sufficient warning to these unweleome visitors.

Alfalfa surpasses in feeding value all other hay erops. One aere of elover equals three aeres of timothy, and one aere of alfalfa is worth three times as much as clover or the protein eontent, says an exehange. To test this statement Prof. Hall eompared the protein eontent. There are 2.8 pounds protein in 100 pounds timothy hay; in 2,000 pounds, or one ton, there are 56 pounds, and in 1½ tons (a fair yield per aere), 84 pounds of protein. Red elover hay has 6.8 pounds protein per 100 pounds, 136 pounds per ton and 272 pounds in two tons (a fair yield per aere). This is more than three times as mueh protein as that in one aere of timothy. Alfalfa has 11 pounds protein in 100 pounds hay, 220 pounds in one ton, and 1,100 pounds protein in one aere of five tons.

An English paper reeords that in 1826 a three-shear Lineoln wether weighed 386 pounds, a two-shear 364 pounds, and a shearling 284 pounds, dead weight. In 1888 three ewes at Smithfield Show weigher 1,120 pounds. Latterly the aim of breeders has heen to get rid of superfluous fat, and huge careasses are no longer in demand. Mr. Henry Dudding, of Rihy Grove, showed some heavy speeimens at the Royal of 1904; his lambs under a year old weighed 226 pounds, live weight, and shearing wethers 354 pounds.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For Human Body — It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints.

REMOVES THE SORENESS—STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $130.00 paid in doctor's bills." OTTO A. BEYER.

Price $1.50 per bottle. Sold by druggists, or sent by us express prepaid. Write for Booklet A.

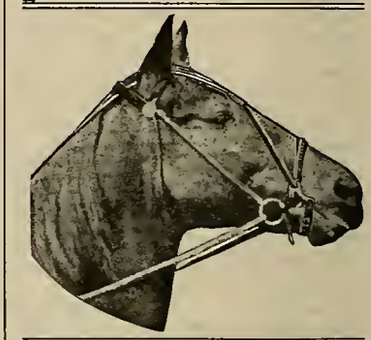
Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. Witb it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct** from us, as **we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

COYOTE PROOF FENCE.

Fencing the range to protect sheep from the attacks of predatory animals has met with excellent results in the Wallowa National Forest, Oregon. The problem was to find a strong fence that would make the sheep secure, even without the care of a herder.

The chosen fence, which is built of woven wire with barbed wire on the top, has kept out all the minor animals such as wild cats, lynxes and coyotes, but has not withstood the attacks of the grizzlies, which are apparently able to pass through it with little trouble.

Sheep numbering 2,200 head were placed in the enclosure with their lambs upon June 20th, and have been allowed to graze at their free will with no attention whatever from any herder. They have done splendidly and as far as the observation of those in charge of the experiment goes, a given area grazed by sheep under such conditions will carry more sheep per acre a herder.

Tracks along the fence show that constantly and follow it around but, with the exception of the bears, do not seem able to enter.

The hunter employed by the Service for hunting predatory animals in the predatory animals come to the fence vicinity of this fenced enclosure has than one grazed under the charge of killed no less than six large grizzlies this season, besides numerous other animals of the predatory class.

The results of this experiment are so satisfactory thus far that private individuals are profiting by it. Mr. J. W. Emmons of Troy, Oregon, has a large area of private land fenced with a special wire fence in which he has this season lambed a herd of 670 ewes without a herder's care and with very little attention and great success. Mr. Emmons is extending his fence, for he finds that it pays.

Careful record will be kept of the weights of lambs raised inside this fence with a view of comparing them with the same grade of lambs raised outside the fence on the same class of range, so that any gains or losses in weight and growth may be determined.

Campbell's EMOLLIC IODOFORM Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.
The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.
Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.
It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.
PRICE—25c, 50c and $1.00.
(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)
Jas. B. Campbell & Co., Manufacturers, 418 W. Madison St., Chicago, Illinois.
Sold by all dealers in Harness and Turf Goods. If not in stock ask them to write any Jobber for it.

LIVESTOCK NOTES.

Too often the farmer sells his best horse because he needs some ready cash and the best animal will bring the most money. This practice is common with that class of farmers who live only in the present and who have no regard for their future well doing. It is this practice which is responsible for the very inferior work stock found on so many farms. For this reason many farmers are compelled to use four plug horses on a wheat drill when two or at most three good animals would do the work easier, at less expense for keeping, and with more satisfaction to the owner. It is because that his horses are small that many a farmer is hiring a hand to run the second plow team of three horses whereas four good horses, a gang plow and one man can do the work easier and better. Four good horses and one man with the right kind of machinery on thousands of farms save two horses and the lahor of one man. On many farms the work horse prohlem is properly taken care of, hut on thousands of others shortsightedness and had husiness management is costing each year a nice interest on a 160-acre farm investment.—Farmers' Advocate.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership
and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions In the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

R. V. HALTON, Manager,
Hotel Belvedere,
Belvedere, California.

BEST FOR LEAST MONEY

JOHN MIDDLING'S

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Ever/ Two-Wheeler guaranteed

SHORT-HORN SALE

at Woodland, Cal., Saturday, Sept. 12

We will offer the entire Enterprise Herd, including the herd bulls and show cattle of last sesson. We do not hesitate to say that this is the best bred and best individual collection ever assigned to public sale on the Coast.

36——BULLS——36

They are the kind and type the farmers and rangemen are looking for. They are Eastern bulls thoroughly acclimated, of serviceable age, large, strong, and tbrifty. Tbis lot was personally selected by Mr. Dunlap from prominent breeders in the East, tbis being his eighteenth shipment. They bave been fed no grain since reaching this coast, simply good pasture and alfalfa hay and will be presented in the best possible condition for future use. This is undoubtedly the best lot of range bulls ever offered on the Coast.

Sale to be held on tbe Enterprise Stock Farm, 4 miles south of Woodland. Busses will meet all trains at Woodland and lunch will be served on the farm. Sale to begin at 12:30 p. m. All are cordially invited to attend. Write for descriptive catalogue mentioning this paper. Catalogues ready Aug. 20th.

Auctioneer, H. P. EAKLE, Jr.
G. P. Bellows, Maryville, Mo. R. M. DUNLAP.

T. B. Gibson, Woodland, Cal., will sell the preceding day, Sept. 11th. Parties wishing can attend both sales.

SPAVIN CURE

As they sometimes are — As "Save-the-Horse" can make them

Wm. H. Camerden, Real Estate Agent,
Quogue, Long Island.

Furnished Cottages to Rent. Phone 8B—Quogue.

"Save-The-Horse," which I purchased from you, will do all you recommended it to do. The two horses I used it on were both laid up, one for six weeks or more and the other for ten weeks. The first one had a large splint running from ankle joint to knee, also enlarged tendons on same leg. I used your liniment on this horse about two weeks according to directions, then commenced to drive him, and have worked him hard on a butcher wagon ever since. He is now sound. The other horse belonged to a friend of mine that has a cottage here for the Summer. His mare made a misstep and injured her ankle. It became large and calloused, and she could not go. He employed two veterinary surgeons; then he got another to fire the ankle at once, and kept doing so for a while; still his mare could not go and was no use to him. I told him when he got through doctoring her to send her to my stable and that my man would cure her with "Save-The-Horse." He did so. She was kept still for two weeks; then I told him he could drive her moderately; but that she was to stay at my stable until my man got through applying "Save-The-Horse." I sent her back to the livery stable last week, and she can go as far and as fast and quick as any horse on earth now, and is sound. The result of the firing shows, and always will; otherwise she is perfect. He drove her to Eastport last week in thirty-eight minutes, which is ten miles. I consider "Save-The-Horse" will no more than you recommend it to do, and will do more than any liniment I ever used. I enclose check for $5 for another bottle. I did not expect to give you a detailed report of the horses, but could not do otherwise after seeing how the horses came out. WM. H. CAMERDEN.

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of halr. Horse may work as usual.

$5 Per bottle, witb a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.

WINCHESTER Shotgun Shells

WON

THE GRAND AMERICAN HANDICAP

THE WINNER AN AMATEUR

This great event, the most important Handicap on the shooting calendar, was won by Mr. Fred Harlow, a Newark (Ohio) amateur, from a field of 331 of the best amateurs and professionals in the country.

The Gun and Shell Record—Over 45 per cent of the 331 contestants shot Winchester Shells, and over 40 per cent Winchester Repeating Shotguns, thus winning the blue ribbon of popularity.

The Professional Championship for 1908—First and Second Places Won by Winchester Shells. The Professional Championship, 200 targets from 18 yards rise, added more glory to the Winchester—the red W—standard. Fred Gilbert won the event, shooting Winchester "Leader" Shells, with a score of 188 and 20 straight in the shoot-off. R. R. Barber was second, shooting Winchester "Repeater" Shells, with a score of 188 and 17 in the shoot-off.

Preliminary Handicap—Charles Young, shooting a Winchester Repeating Shotgun, was High Professional, with a score of 95 out of 100 from the 20-yard mark.

THE BIG HANDICAP was one of tht most successful races ever given in this country, but it certainly demonstrated the fact that while fifty feet allowauce per second may do for tbe horses with from 2:15 to 2:09 speed, the distance per second is too great for horses with faster records that have to travel so much farther at a much faster clip. It is not too much to require a 2:14 horse to trot 50 feet further than a 2:15 horse, hut it is decidedly tco much to ask a 2:05 trotter to travel 500 further than a 2:15 trotter. We believe that the $50,000 handicap has done more for tht sport of trotting than any racing scheme ever devised, and that it will come into general use in the near future, but we think the baudicap distance should be decreased as the speed of the horses increases. The Readville handicap was made on the theory that a 2:05 horse could trot the entire distance of his handicap at the rate of speed he was capable of for a mile, but the race has shown that the theory is not tenable. It is the pace that kills, and as it was proven many years ago that uo horse can carry the speed for a mile that he can show for a half, there is good reason for advancing the idea that if it is a fair handicap to start a 2:14 trotter fifty feet hack of a 2:15 trotter, it is not a fair handicap to make a 2:05 trotter travel 500 feet further thau the scratch horse if the latter is on the 2:15 mark. We believe the handicap system of racing can be made popular by applying this idea to the next big race on this plan.

ENTRIES CLOSE MONDAY NEXT for four good purses offered hy the associations at Tulare, Fresno and Bakersfield. Three of these purses are for $500 each and are for 2:09 class trotters and 2:14 and free-for-all class pacers; the other is for 2:40 class trotters owned in tbc district. When the California State Fair ends at Sacramento to-day, a large number of the horses that have been racing on the California Circuit will be shipped north to race at Salem, Portland and othe" places on the North Pacific Circuit, hut those owners who do not care to take the northern trip will find opportunity to race down through the San Joaquin valley at the Tulare, Fresno and Bakersfield meetings. The principal fact to remember is that the four purses mentioned above will close on Monday, September 7th. Don't forget the date.

WHENEVER the Directors of the California State Agricultural Society realize the fact that the public will uot turn out iu large numbers for eight days in successiou to witness a racing program that should be pulled off in four afteruoons, the gate receipts at Agricultural Park in Sacramento during "fair time" will be something nearer what they should be. By uext year, when it is to be hoped the pavilion will be moved from its present location to the park, conditions should be more favorable for a big fair with a hig attendance, which the California State Fair should have every year, but even with the drawhack caused hy there being "two shows at separate prices of admission under the same management," there is no excuse for drawing a race program (that would be considered high class entertainment for about four days), out to seven days, with a Sunday interveuing. Ever since the State Fair management adopted the plan of stretching a program of less than a dozen races over seven days, filling in with a lot of cheap eveuts that have little or no drawing power, it has had the dissatisfaction of seeing a grand stand filled with empty henches on the first tbree days, and has had to depend upon the gate receipts of the last four days of the fair to make a respectable showing. The masses of the people, especially those who reside in the interior of the State, love contests between well bred horses, be they runners or trotters, but they refuse to take eight days vacation to go to Sacramento to see a program that can be easily finished in four afternoons. The Breeders' Association at its Chico meeting in August this year pulled off twelve of the best races ever held in California at one meet ing in four days, while the State Fair, with only ten regular events on its racing card, lengthened its program to seven days, beginning and ending on Saturday, filling up its program with amateur races so as to provide two races a day. The amateur races furnished excellent sport and the Society has done a wise thing is giving them a place on the program, but had the racing been confined to five days at the most, the Society would have saved money in expenses, while the crowds would certainly have averaged much larger. When a Grand Circuit meeting giving from thirty to forty thousand dollars in purses only requires five days to complete, and a fair like the Oregon State Fair, which is attended hy over twenty thousand people in a day, is only open for six days, the reason for stretching the California State Fair from Saturday to Saturday is not apparent, unless it be for the purpose of "keeping the crowd in town to spend its money," which it certainly does not do.

SIXTEEN THOUSAND DOLLARS is the amount offered hy the Arizona Territorial Fair for fourteen purses for trotters and pacers which close September 15th, one week from Tuesday next. Nearly all the California, Oregon and Washington owned horses will he stabled at Salem, Oregon, at that time, where the Oregon State Fair races will be then going on, and we hope the Arizona date of closing will not he overlooked, as the meeting will be one of the best ever held anywhere. The program provides for twelve purses of $1000 each and two for $2000 each. Horses may be entered at any time prior to the date of closing and records obtained after date of entrance will not he a bar to starting in any of the these races. Attention is called to the full program printed in our advertising columns. Phoenix has one of the fastest tracks in the world and the association knows how to treat horsemen and makes it pleasant for everybody who attends.

ONE WEEK FROM TO-DAY the famous Enterprise herd of Shorthorns will he sold at auction at the Enterprise Stock Farm, four miles south of Woodland, Yolo County. The animals to be sold are owned hy H. P .Eakle Jr. and R. M. Dunlap and are just the type of Shorthorn the farmer and breeder should own. They will pay a big profit to anyone who, having the farm for which cattle raising is adapted, will huy them at a fair price. The majority of the cattle to be sold were selected at the best breeding farms in the East especially for California's conditions and they are all choice animals. Colonel G. P. Bellows of Maryville, Missouri, is to wield the auctioneer's gavel at this sale. Read the advertisement in another column.

Drink Jackson's Napa Soda

THE OREGON STATE FAIR will open one week from Monday next, and from all reports gives every prospect of being the greatest fair in the way of exhibits and attendance that our sister State has yet given. It will be visited this year by many Californians and to those who see it for the first time it will be a revelation as to what a State Fair can be under energetic and intelligent management in all its branches. On some days there will douhtless be as many as 20,000 persons paying admissions, and all through the week vast crowds will visit the fair grounds day and evening. There will be no hetter racing than was seen at the Breeders' meeting at Chico this year, and the exhibits may be no better than our California State Fair affords, but the manner in which the Oregon Fair is managed is the secret of its drawing powers. In the first place, the entire show is, as it were, under one canvas. One admission fee of fifty cents will admit to the grounds, on which are the pavilion, the live stock exhibit, the machinery exhibit and the race track. The entire grounds are brilliantly lighted by electricity during the evening and the night crowd is always a tremendous one, although Salem, where the fair is held, is not a city of over fifteen thousand inhahitants. There is no liquor permitted to be sold on the fair grounds and no hooks made or pools sold on the result of the races. The restaurant privilege is not sold to one person, as is the custom at California fairs, but a certain charge is made for conducting them, and of the dozen or more eating places on the grounds, at least half them will be under the management of the ladies of different church congregations of Salem. On the occasion of the writer's visit to this fair a few years ago the Roman Catholic, Protestant Episcopal and three of four other churches had restaurants on the fair grounds, where an elegantly cooked and splendidly served meal was furnished for fifty cents, and they all seemed to be doing a land office business. A feature of the fair is the camp grounds where nearly a thousand families from all parts of the State camp during fair week. The camp ground is laid out in streets, aud is a city of tents, with all the modern conveniences. Farmers and others come here with their families to see the fair and spend a week renewing acquaintance with old friends, and have a good time generally. The Oregon fair directors found out years ago that a State Fair to be popular with the people must be given for the people and uot for the benefit of a few individuals. The result has been the making of one of the greatest and most successful annual fairs given in the entire United States. We hope as many Californians as possihle will attend the Oregon State Fair this year, which opens on Monday, Septemher 14th, and continues six days. It is well worth the long trip required to reach Salem, as it will be a most interesting as well as instructive exposition.

A NEAT COMPLIMENT.

The American Sportsman of Cleveland, Ohio, pays the following compliment to W. G. Durfee:

"The stable of trainer Will Durfee is made up of several remarkable horses. Copa de Oro 2:03¼; Carlokin 2:08¼, Zomalta 2:08¼, are all high class horses and the trotter Murray M. is a horse of extreme speed. Mr. Durfee has several others in his stable whose names I do not now recall, which are very fast horses, and all in all, he has more extreme speed in his stable than any trainer now racing in the Grand Circuit. It is seldom that horses with more speed than Copa de Oro and Carlokin are seen and Zomalta appears to be a trotter of considerable class, and capable of trotting well below her present record. There is one thing which can he truly said of the Durfee horses, and that is that they are race horses and all of them have shown their ability to fight out a race.

No trainer who has appeared on the Grand Circuit in recent years has made a more favorable impression than this modest, unassuming man from California. He is a clean-cut, honorable gentleman, who shows in looks and action that he is a gentleman. There is nothing theatrical in his make-up, no playing to the grand stand, but he is always "on the job" and looks out for himself and his horses. That he is a skillful trainer is shown in the class of horses he brought over from the coast and as a race driver he is as good as the best.

He is a real horseman and a gentleman as well and every trotting horse follower in this part of the country is glad of the success he has had thus far in his Grand Circuit campaign.

Ed. Benyon has purchased the gray trotting horse Judge Lee 2:14¼ by Lee's Pilot, out of a mare by Simmocolon. The reported price is $7,500. Judge Lee is said to have shown miles below 2:10 repeatedly.

THE $50,000 HANDICAP.

Full Account of How the Richest Stake Ever Trotted For Was Won.

BOSTON, August 26.—Allen Winter, an untried stallion from Indianapolis, never before started in a race, pulled dowu first money of $30,000 in the $50,000 American Trotting Derby at Readville yesterday afternoon.

Two lengths behiud him—for Allen Winter was out all alone in front at the finish—camc a half dozen other horses, none quite able to reach the leader, but all making a gallant soul-inspiring fight for second place and for the $10,000 portion of the purse that went with place position.

Of that buuch, so closely massed that individual identities were all but lost, Prince C., owned by James Farley of strike-breaking fame, was second at the wire, just ahead of the California stallion San Francisco, who was third, entitling him to a $5000 slice of the money. Old Ralph Wick, who has heen racing over New England tracks for years and who was not popularly regarded as having a chance on earth, was fourth, and behind him, winners of fifth and sixth moneys of $1500 and $1000, respectively, were the unmarked stallion The Huntsman and Billy Snow's brown gelding Peter Balta.

Allen Winter raced from the 2:10 mark, and his time for the 6850 feet that he negotiated—from a standing start—was 2 minutes 46 seconds. In other words, Allen Winter trotted the mile and 323 yards at a 2:08 clip throughout. None of the other horses starting on the 2:10 mark with Allen Winter or upon any of the divisional lines behind Allen Winter were within the money division at the finish. In fact, the only horse handicapped as faster than 2:10 to qualify was Sweet Marie, the champion race mare, but to have won the race Sweet Marie would have heen obliged to step her full mile and a quarter at a 2:03½ clip, a speed that no trotter has yet been able to carry for a mile and a quarter.

Never was a more enthusiastic demonstration accorded a winaer than that awaiting Allen Winter, and, more especially, his driver, Lon McDonald, when the pair jogged back to the stand. Although the race had not heen won by a New England horse, the winner had been driven by a New England horseman, and that was douhle justification for the demonstration. McDonald had hardly alighted from the sulky when he was surrounded by a throng of friends all eager to congratulate him, to hit him over the back or in any other way to secure recognition of their presence and an expression of their enthusiasm.

Then, while howing to the plaudits of the grand stand, Lon was picked bodily off his feet, and, despite. his good-natured protests, carried down on the shoulders of a dozen friends as far as the long distance flag before he was finally permitted to alight. Then he fairly ran to his stables to escape further congratulations. Meanwhile another crowd had followed John Scholl, Allen Winter's caretaker, hack to the animal's stall to watch the cooling-out process.

It was hard to tell whether Scholl, who has had charge of Allen Winter ever since he was first sent to the track, sleeping with the animal every night, or M. H. Reardon, the well-known Indianapolis horseman, Allen Winter's breeder and owner, was the more delighted. Allen Winter, himself, was the most unconcerned of the lot and from his hreathing as he was hastily being done up one would never imagine he had been a hard heat.

The winner is a beautiful five-year-old stallion hy Ed Winter, from Miss Que, a mare sired by Que Allen. Mr. Reardon bred Allen Winter, which made his win all the more pleasing, for every horseman likes to breed his own wiuners. Last year he worked a little as a four-year-old at Indianapolis, Mr. Reardon asserting after the race that the fastest mile he had shown last year was one in 2:11¾. He showed enough, however, to convince as astute a horseman as Reardon that he was worth campaigning, and early this spring he was turned over to Lon McDonald, and trained by McDonald with his other horses at Salem, Ala., being brought north at the time of Indianapolis meeting. The stable story is that his fastest mile this season was one in 2:13½ at Poughkeepsie last week, as a "prelim" to his start yesterday.

The race will go down in the annals of light harness racing as marking an epoch in the history of the turf. In the first place, never before has such a gathering turned out to witness a trotting event. Estimates as to the size of the crowd varied somewhat, but more conservative estimates by experienced men placed the attendance figures at 35,000 and, perhaps, a shade above that total. For years horsemen have pointed to the old Balch stallion race at Mystic Park in 1874, when Smuggler won from his field, as marking the high-water attendance at a trotting fest, but yesterday new figures were set up for future racing associations to shoot at.

Superlatives, however, apply not only to the size of the crowd, but to the richness of the stake and to the number of starters. Never before, either in this country or abroad, has $50,000 been hung up to he divided in a single race; never hefore in this country have 32 horses been sent away in a single race. The race was a distinct success, whether from the racing, the spectacular or the box-office standpoint.

The l ig event went off without a hitch so far as any accident of serious nature was concerned, although the delay before the start of the first heat occasioned through a comhination of causes was, for the timc being at least, some aggravation. The delay was enlivened by an exciting three-mile runaway in which the brown geldiug Wilkerson held the center of the stage and the whole of the track before being fiually captured. Wilkerson, on his first two circuits about the course, cleverly eluded every daring man who attempted to stop him, hut finally on the third trip around he was brought to a standstill, uninjured, but badly winded.

The judges, after considering the case, very considerately transferred Wilkerson from the first heat, for which he had been drawn, to the second, but his long ruu had taken away any chance Wilkerson might originally bave had of winniug and he finished in the ruck. Mike Bowerman, the lion of last year's Readville meeting, when he teaued Gen. Watts to victory in the American Horse Breeders' Futurity, establishing a new three-year-old record, drove Wilkerson, but when the gelding stood straight up in the air before the first heat, Bowerman got off the sulky in a hurry—he could hardly do otherwie—and thanked his lucky stars that Wilkerson didn't go way over and seriously injure him. Wilkerson, by the way, was Will W. Evans' entry and Bowerman was entirely unfamiliar with the horse.

As in every big contest, in which rich prizes are at stake, the American Trotting Derby was not without its disappointments. These, however, were disappointments of individuals rather than of the crowd as a whole or of the management of the meeting. One of the keenest disappointments was encountered by the Wilkes Heart contingent that had all along heen hanking with reasonahle certainty on at least a part of the purse. Wilkes Heart's chances of winning were hlasted with the start, for when the word was given Wilkes Heart was going the wrong way of the track, and Sweet Marie, starting 150 feet back of him, had passed Wilkes Heart hefore the New Jersey gelding was under way. The Beatrice Bellini people were another disappointed lot, for they felt their mare was as good as the best. She may have heen, but a break under John Dickerson's guidance shortly after the start prevented her from showing whether her owners' confidence was justified. When Chester W. Lasell qualified by finishing fourth with Composer, eased up, in the first heat, Mr. Lasell believed he had a chance for better things in the fiual. But Composer's break as they swung into the stretch the first time around disposed of his chances. Of individual disappointments these were but a few of the many.

To the crowd the only possihle disappointment was that but one of the three horses handicapped at 2:05, the scratch mark, came out for the word. The absence of Highball and Sonoma Girl, however, was soon forgotten in the scramhle for places by the nearly two score other starters. Sonoma Girl was not drawn until the last minute; in fact, five minutes before the heat was to be started, she was announced as a starter, but Walter Cox at the eleventh hour and fifty-ninth minute decided, after all, that he wouldn't start the mare, and did not bring her out on the track.

Cox gave as his reason that the mare was to start in a $6000 stake at Hamline, Minn., next week, in which she appeared to have a good chance to win and that under no conditions could she be expected to win any part of the money in the handicap. As the race went Cox was unquestionably correct in his assumption, but the judges didn't take kindly to permitting the mare to be drawn, and it was only after Jack Crabtree, representiug his sister, Miss Lotta Crahtree, her owner, had been called to the stand that they consented to her withdrawal.

Aside from Ralph Wicks, fourth, the Boston contingent was not especially prominent in the money division. For a time, however, Frank G. Hall's chestnut gelding Kim, driven hy P. Shank, seemed to have a fighting chance to win, for he started into the lead early and showed the way to the field in the final up to within a furlong or so of the finish, when a hunch crowded in upon him and he was lost in the struggle. Henry Titer's Betty Brook was just beaten out for a place in her qualifying heat by Sweet Marie. Ed Geers, much to everybody's surprise, had no hand in the distribution of the money, although getting into the final with his Teasel. Possibly it was the "23" that Geers wore on his arm as his number that was the hoodoo, but at any rate the silent man from Tennessee for once at least in a big stake event was among the "also rans."

The crowd taxed transportation facilities and seating accommodations at Readville almost to the limit, for it was of the proportions of a Harvard-Yale football gathering, although scattered over a somewhat larger area than those that watch the gridiron contests in the Stadium. Long before the hour of calling the race the reserved seat sections of the grand stands were packed, every seat in the boxes at $5 apiece was taken, and the $2 seats were carly cleaned up, driving late comers to the $1 stands.

Every seat, away down to the seven-eighths pole and beyond, was taken when the racing was at its height, while the broad lawn in front of the grand stands was a veritable mass of humanity. Within the enclosure were more automohiles and private rigs than ever before assemhled there, while along the rail the crowd was three or four feet deep. It was a tremendous demonstration to the popularity of light harness racing properly conducted.

Of course the clubhouse and the cluhhouse veranda were crowded. Conspicuous among the parties at the clubhouse was that composed of the Russian horsemen who had journeyed to this country expressly to witness the trotting Derby, which was largely patterned along the handicap racing so popular on Russian tracks.

How the Race Was Won.

Though it was advertised that the first preliminary or elimination heat in the fight for the $50,000 purse would be started at 2:30, it was 2:45 before the word was given that the horses were at the post and in the hands of the judges.

It was an unfortunate thing that the crowd of automohiles and the densely packed crowd of people standing on the hill in the center field hid the view of the start from a large part of the spectators, as this was one of the most interesting features of the race, and when ten minutes had passed and the horses did not round into view from behind the wall of men and automobiles one could hear many protests from the stand that it would be impossible to get so large a field away from a standing start. Then when a bay trotter was seen to have broken away from his driver and came tearing madly around the wrong way of the track, there were many "I told you so's." The horse was the four-year-old colt Wilkerson, whose owner, W. W. Evans, lies dangerously ill in a Kentucky hospital. The horse ran two and a half miles before he was stopped. Then it was announced that another horse had thrown a shoe, and the indulgence of the audience was asked.

These accidents are only what may he expected in any race, but the stock of the handicap plan of racing was at a low ebb. At this point, however, all is well that ends well. From this on there was scarcely a hitch. After the shoe was replaced the horses were quickly gotten under way for the first preliminary heat, and from that time to the finish of the race everything ran smoothly and the interest in the event was intense. All three races, the two preliminaries and the final, saw a big field of horses battling for a piece of the hig stake from the head of the stretch to the wire, and the finishes were so close that it was difficult to place some of the leaders as they went under the wire.

None of the fast record horses were inside the money, though Sweet Marie, hy finishing eighth in the first heat, qualified for the final. It was a great race, and reflects credit upon the handicappers, who have come in for a great deal of criticism ever since the handicaps were announced, but that their work was well done was shown in both the preliminaries and the final, the horses being bunched up at the head of the stretch, and the battle from there to the wire was in each instance as good a one as has ever been seen on a racetrack.

The sympathy of the crowd was with the fast horses, and could one of the horses that was giving away the extreme penalty of 500 feet have come through at the finish and nipped the heat it would have been the most popular victory ever seen at Readville.

Highhall was lame and Sonoma Girl was scratched at the last moment, which left only Sweet Marie to start from the 2:05 mark. The hig daughter of McKinney had a long road to go in the first preliminary, hut finished eighth, qualifying for the final. In this, however, she found the handicap too great a one, and was hack of the money.

Jay Kay, the trotter that went hegging at the Readville sale last spring, and was considered to he something of a joke in the race, was very much in evidence in the second of the preliminary heats. He got away on the 2:15 mark and held on like grim death all the way around to the finish, with a hig band of fast ones at his heels. It was a good contest in the stretch, with the first half dozen horses within striking distance all the way, hut Billy Rhodes called upon the bay gelding Bervaldo, and he drew away from the bunch and won comfortahly.

Bervaldo, though rated as a 2:10 trotter, had a record of only 2:18¼, yet he trotted the whole distance at the rate of 2:08¼, which cuts 10 seconds from his former record and will compel him to start in the 2:09 classes in the future. This was hard luck, as he finished behind the money in the final.

The second division horses were sent away with very little delay, and the race, though trotted in considerahly slower time than the first heat, was fully as interesting a contest. Peter Balta, who went away on the 2:12 mark, was very much in evidence during the first mile of the distance, and led the bunch when they turned into the stretch, where there was a general closing. McHenry then called upon Prince C., and the gelding stepped out in the lead and was a length ahead of The Huntsman at the wire, with Lon McDonald riding easily behind Allen Winter, the others to qualify being San Francisco, Kim, Del Coronado and Sweet Marie, who finished in the order named.

It was the final that told the story, however. The horses got away to a good start very quickly and the contest that ensued has had few, if any, equals.

The closing up process began earlier in this heat, and by the time that the horses were at the first turn, with the exception of a few trailers that had met disaster in one form or another, they were fast bunching up. Frank Hall's matinee trotter, Kim, had caught the slow trotters by the time he turned into the backstretch, and showed the way to the party the whole of the first mile of the distance. When they had raced the far turn there was a hunch of a dozen, with no daylight showing between them. Coming around the upper turn they looked like a swarm of bees. and the battle through the stretch has rarely been equalled.

It was a grand sight. It was practically impossible to tell from the stand which horse was leading, though Prince C. had a place in the front tier and was trotting a storm when he made a break and fell back. This gave Lon McDonald, who was in a pocket behind the leaders, the opportunity of his lifetime, and he was quick to take advantage of it. He sighted Allen Winter for the opening, and the big rugged stallion had the goods to deliver. With a fine burst of speed he shot into the gap and flashed under the wire a length ahead of Prince C., who had recovered quickly from his mistake and finished very strong.

Prince C.'s win over San Francisco was by a nose only, and, indeed, it was a very difficult thing to separate the next six horses to Alleu Winter under the wire. Geers and some of his friends thought that his mare, Teasel, finished ahead of Peter Balta, who was awarded the sixth position.

Many horsemen who have followed the game for years said they never saw a finish like it. They finished very strong, and it looked more like a field of horses scoriug for the wire than the finish of the average trotting race.

LAST TWO DAYS AT READVILLE.

August 28.—American Horse Breeders' Futurity, foals of 1905, purse $7000, of which $5000 to the winner; two in three:

The Leading Lady, b. f., by Bingen (Proctor)..1 1
Binvoli, b. c (Young) 2 2
Sadie Worthy, ch. f. (Phillips) 4 3
Oro Lambert, g. c. (Stinson) 3 4

Zalem, Little Sweetheart and Silver Baron also started.

Time—2:15¼, 2:12½.

The Blue Hill, 2:30 class, trotting, purse $4500.

Uplan, blk. g., by Bingen (Proctor) 1 1 1
Zomalta, b. m. (Durfee) 2 2 2
Bonnie Way, b. m. (Lazell) 4 3 3
Vandetta, br. h. (McCarthy) 3 4 4

Time—2:10½, 2:10½, 2:11.

The Norfolk, 2:08 pace, $3000:

Major Brino, blk. g., by Wildbrino (Ritchey)..1 5 1
Copa de Oro, b. h. (Durfee) 3 1 3
Jerry B., ch. g. (Cox) 2 2 2
Bonanza, b. f. (Thomas) 5 3 4
Hal. R., br. h. (McDonald) 4 4 5

Time—2:06½, 2:06¾, 2:06¼.

August 29.—The Massachusetts, 2:14 class trotting, purse $9000:

Dewitt, b. g. by Cecelian, dam by Red Wilkes (Andrews) 1 1 2
Carlokin, br. h. by McKinney (Durfee) 5 3 1
Teasel, ch. m. (Geers) 6 2 4
Axtellay, b. m. (Thomas) 2 5 5

Spanish Queen, Prince C., Raffles, Directum, Aquin, San Francisco and Kim started.

Time—2:09½, 2:08½, 2:09¼.

The Readville, 2:12 class pacing, purse $3000:

The Eel, g. h. by Gambolier, dam by John L., (McEwan) 1 1 1
George Gano, b. h. (Geers) 2 2 2
Fred D., g. g. (Thomas) 3 3 4
Charley Hal., b. g. (Snow) 4 4 3

Time—2:04¼, 2:05¾, 2:05.

The Ponkapoag, 2:11 class trotting, purse $3000:

Hamburg Belle, b. m. by Axworthy, dam by Simmons (Andrews) 1 1 1
Locust Jack, gr. g. (McHenry) 2 3 2
Baron May, br. h. (Sayles) 3 2 6
Nahma, b. m. (Burgess) 4 4 3

Mae Heart, Genteel H., May Earl and Bud started.

Time—2:06½, 2:06½, 2:06¼.

TO RACE AT PHOENIX.

Mr. J. C. Adams, who has been on an eastern trip in the interests of the Arizona Territorial Fair, says that the outlook for good racing at the fair this year is most excellent, and there is a chance of the track there holding the world's record for pacers, as Charley Dean will probably take the speed marvel Minor Heir 2:00½ there and start him for the fastest mile ever made by a horse without a wind shield in front.

W. G. Durfee of Los Angeles will take all the horses he is now racing on the Grand Circuit to Phoenix, including the big money winners Carlokin 2:08¼ and Copa de Oro 2:03¼.

Mr. Valentine will probably take Inferlotta 2:04¾ to the meeting and among the eastern owners and trainers who have already arranged to go with their strings are Dick McMahan, Allen Bros. of Iowa, Harry Jones, F. E. Marsh, and others.

DAN PATCH IN FINE FETTLE.

MINNEAPOLIS, Minn., August 29.—Dan Patch 1:55, the world's champion pacer, yesterday stepped the fastest work-out mile on record, making the distance in two minutes flat. Harry Hersey, Dan's driver, had warmed up the great horse during the morning, and at 11 o'clock sent him around with two runners on a tryout. He got away beautifully, went to the eighth in 15 seconds, to the quarter in 0:30, and to the half in a minute flat. He kept up an even pace of 15 seconds to each eighth all the way round and came under the wire easily without having turned a hair.

The Newman Fair Ground Association will give a program of harness racing on Wednesday next, September 9th.

TROTTING IN RUSSIA.

"I found Russian methods to be very much like ours," says Charles A. Tanner in the last issue of the Chicago Horse Review. "In fact they are thoroughly up-to-date in every particular. The large share of the credit for this is due Frank Caton and it is hard to say how much trotting in Russia owes to him and how much the American trotter does for what he has done there in his behalf. Caton went to Russia just 15 years ago. At that time, while trotting was an old established national sport, it was in a very primitive stage in a racing way, while in a breeding way it was still farther behind. Very few American stallions or mares had been imported and the racing was done by the native Orloffs, which were being trained in about the same way that they had been for a century before." Caton began gradually to introduce the best things American in the line of mares and stallions and in shoeing, balancing, boots, harnesses, sulkies and training. The adaptiveness of the Russian trainers and the way they have caught on to the American system is remarkable. Besides Caton, who drives principally for Count Vorontsoff-Dashkoff, there is quite a colony of American trainers now settled in Russia.

In one respect driving in Russia is very different from us. There is no amateur organization of standing there, as distinct from the professional. Most of the leading owners are expert reinsmen and they often drive their horses in their races, it being one of their chief ambitions to not only breed and own, but also to drive personally the winner of a classic race. Mr. Konoplin, the leading amateur driver, has won no less than 269 races, his trophies, cups, plate and medals being undoubtedly the finest collection in the world. The trainer himself is more fortunate in receiving pay than the American. He receives his salary, which may run up to above 10,000 roubles ($5,000), and in addition, 10 to 15 per cent. of the winnings of the horse be drives, while handsome presents are not uncommon. There is never any trouble about grooms in Russia, while in America a trainer sometimes has more trouble training his grooms than he does his horses. The Russian swipes receive 20 roubles ($10) per month, 1 per cent of the winnings of the horse or horses he cares for, and two suits of clothes a year. They are neat and clean, willing workers, quick learners, and keep their places. Never does one see 10 to 50 dirty half-clad swipes in one-gallus negligee swarming over the quarter stretch.

The pure-bred Orloffs, on the whole, are rather a disappointment. Most of them have fine heads and necks, but they are apt to lack heart room, be long backed, rough over the coupling, and steep rumped, while they lack muscular development, very markedly in the hind quarter, especially through the stifle and second thigh. Their limbs also incline to be round and meaty instead of flat and lean, and to cut in under the knee. As a tribe they are of large size, but are very trappy gaited, with a round trip hammer stroke that does not eat up enough ground. Their gait is very pure, however, because pacers are not tolerated and nothing so disgusts a breeder as to have one of his colts mix. Owing to the fact that for two hundred years pacers have not been bred from, the pacing gait has been almost entirely eliminated. The Russians are not aware that the mixed gaited horse is the quickest learner, and when he has learned how, the fastest trotter. Another peculiarity is that they train over loose dirt, and race over sand upon concrete, thus causing them to go high and to scalp.

The finest Orloffs are seen driven to the Moscow droshkies, a one horse vehicle for hire on the streets. Some of these horses are superb and the whole outfit is one of the classiest public service conveyances one may see. The drivers take great pride in their horses, continually grooming them while they are not in use. Upon a nice, clear smooth street, the horses are walked; when upon a rough, crowded one, they travel like mad, apparently trying to run down everybody. Shooting the chutes, looping the loop is tame as compared with a first class droshky ride. Another common vehicle is the troika, with three horses abreast, a trotter in the middle with a runner on each side. A ride in a troika would give a rough rider nervous prostration.

However, with all these deficiencies, the Orloff is a grand horse; when crossed with the American trotter, the produce is marvelous. The American trainers over there think they are the greatest trotters in the world. The cross, either an American sire upon an Orloff dam, or the reverse, seem to wipe out the objectionable qualities of both breeds The American blood furnishes the muscular development behind, the clean flat legs, general firmness and fineness of texture, and the Orloffs the handsome heads and necks and size. For instance, Harlo 2:23¾, the sire of the Russian champion Paluga 2:08½, would be considered off bred over here, yet Paluga is one of the best gaited of trotters. It will be recalled that two Orloff mares were sent this year to the courts of McKinney and Bingen, owing to the great desire of the Russians to get American blood, and Mr. Tanner predicts that the porduce of these mares now in foal will be great trotters.

Among the breeders Vladimir Smirnoff is one of the foremost and his breeding farm is one of the most handsomely appointed in the world. A feature of the establishment is a large amphi-theater for exercising and exhibiting colts. The trainer stands in the center of the arena while the colt circles around him, being guided by a long pair of reins. Paluga 2:08½ is the head of this farm. The Ouchkoff farm is the largest trotting breeding farm in Russia. Some idea of its extent may be obtained from the statement that is is ten miles from the entrance gate to the mansion. Mr. Ouchkoff owns the two sons of Bingen 2:06¼, Gay Bingen, 3, 2:12½ and Blue Hill, 2, 2:15¼. He also has what no other breeder in the world possesses—four trotting matrons with race records below 2:10, Susie J. 2:06½, Countess Eve 2:09¼, Totard 2:09¾ and Brilliant Girl 2:08¼. The produce of these mares by an American horse can not be raced in Russia, and they are being bred to Orloffs. Mrs. Ouchkoff, a celebrated beauty, is one of the best posted ladies in the world on trotters.

Other representative sportsmen are Mr. S. H. Konshin, Mr. Telagen and Captain Tchmerzin. Mr. Telagin owns Baron Rogers 2:09¾, whose get have won over 700,000 roubles ($350,000). It is claimed that every one of his foals have been able to beat 2:30, and in long distance races they are almost invincible. Last winter Eros, by Baron Rogers, out of an Orloff dam, trotted four miles, on the ice in 9:20¾, while the American record for this distance, held by the California horse, Senator L., is but 10:12 Eros' first, second, third and fourth miles, respectively 2:24¼, 2:20¾, 2:18¾ and 2:17, show bis endurance. Seven of the unbroken yearling get of Baron Rogers recently sold for 15,000 roubles ($7,500).

Captain Tchmerzin is owner of the world's champion stallion Cresceus 2:02¼, General Forest 2:08 and Pan Michael, 2:12 trotting, 2:03 pacing. His example is typical of the spirit of the Russian breeder. Commercialism does not figure at all with them. They want the best, are willing to pay any price, and go to any trouble to get it. Even trotting news is being translated from the American, German, French and Italian. Moscow bas her "form-sheets" and "sporting extras."

Something which is now interesting Russian horsemen is the International free-for-all trot to be given next March by the Imperial Club of St. Petersburg. It is worth 32,200 roubles ($16,000), and open to the world. Russians are ardently wishing that some of America's crack horses will go over for it. Some horses are already entered. It is not to be regarded as a commercial, but a purely sporting adventure. While the race is to be on the ice, and American horses must make concessions, they would have a chance. It would be a grand thing for Americans to be represented in this race. There is no country in Europe where the American trotter is so much appreciated as in Russia and no other country has invested so heavily in our horses in recent years. It would be well for us to realize this and reciprocate in kind.

NEW RECORDS ON CALIFORNIA CIRCUIT.

The following are the new performers and horses that have reduced their records in races on the California circuit at the meetings held at Santa Rosa, Oakland and Chico this year. They do not include the records made against time, nor the records made at the State Fair this week:

New Standard Performers—Trotters.

Alsandra, h. s. by Bonnie Direct..........2:12
Bessie T., h. f. by Zombro 2:26
Cleo Dillon, b. f. (3) by Sidney Dillon 2:13¾
Don Deginaldo, h. c. (3) by On Stanley..........2:15¾
Easter Bells, b. m. by Diablo 2:11½
Emily W., b. m. by James Madison 2:11½
Easter, b. c. (2) by Monocrat 2:27¼
Ella M. R., b. f. (2) by Lord Alwin 2:16¾
Lady Inez, b. m. by Nutwood Wilkes 2:14
Lady McKinney, b. m. by Wash. McKinney..2:18¾
May T., ch. m. by Monterey 2:16¾
Prince Lock, ch. c (2) by Zolock 2:18
Queen Alto, b. f. (3) by Iran Alto 2:21¼
The Statesman, b. s. by Jas. Madison..........2:11¼
Wenja, blk. m. by Zolock 2:18½
Wilmar, b. g. by Wildnut 2:11¼

Reduced Records.

Berta Mac, br. m. by McKinney..from 2:13¾ to 2:08
Nogi, b. s. by Athablo ....from 2:17 to 2:10½
R. Ambush, br. s. by Zolock ....from 2:11¼ to 2:09¼
Vallejo Girl, b. m. by McKinney..from 2:16 to 2:10¼
Walter Wilkes, br. g. by Sable Wilkes ....from 2:15½ to 2:14¾

New Standard Performers—Pacers.

Charley D., h. s. by McKinney 2:06¼
Easter D., h. f. (2) by Diablo 2:13½
Moortrix, b. c. (3) by Azmoor 2:14½
Mac O'D., b. g. by Zolock 2:14
Queen Derby, b. m. by Chas. Derby 2:11¼
Silver Dick, gr. g. by Geo. W. McKinney 2:09¼
Zoe W., b. c. by Zombro 2:22½

Reduced Records.

Delilah, b. m. by Zoloch.......from 2:08½ to 2:07¾
John R. Conway, ch. s. by Diablo.from 2:09 to 2:07
Memonia, b. m. by Demonio ...from 2:22 to 2:09½
Mona Wilkes, b. m., by Demonio..from 2:06½ to 2:03¼
McFadyen, ch. s. by Diablo....from 2:15½ to 2:12
Magladi, b. m. by Del Norte....from 2:10½ to 2:07
Ray o' Light, blk. c. (3) by Searchlight ....from 2:13¾ to 2:09

Ex-Sheriff Lilburn Boggs of Lake county recently purchased a handsome French Coach stallion from the representatives of an Eastern importing firm, paying $3000 for him. The horse will be in public service in Lake countly next spring.

NOTES AND NEWS

Sonoma May, full sister to Sonoma Girl, now has a record of 2:15¼.

The Santa Maria Race Track Association will hold a race meeting beginning October 14th, and lasting four days. The program will be announced shortly.

W. T. McBride of Portland, Oregon, sold his Diablo Stallion, Diablo McK., out of Mae McKinney, to J. F. Bennett, for $1500. He will be taken to Nevada and used for breeding purposes.

Lon McDonald did pretty well at the Readville meeting. He won three first moneys tbe opening day and the next day won $30,000 with Allen Winter in the big bandicap.

Tbe powers tbat be are said to have their eye on a certain meeting held in North Dakota a couple of weeks ago where, judging from the published reports, the time suppression was particularly flagrant.—Horse Review.

That remarkable mare Citation 2:03¼ smashed the record for pacing mares in a race over a half-mile track by stepping the first heat in the free-for-all pace over the balf-mile track at Des Moines, Iowa, Monday in 2:06¼.

Mary K., Dan Hoffman's pacing mare by Zombro, is a new 2:10 performer for that son of McKinney, and made her record at the California State Fair at Sacramento last Tuesday. This is Zombro's second 2:10 performer for this year, and bis sixth in all. Mary K.'s dam is Klickitat Maid 2:19 hy Altamont.

Ted Hays recently received a letter from W. A. Clark Jr., in wbicb Mr. Clark says he will send all his eastern stable of horses to the Old Glory Sale and will not race anything for a couple of years, when the young Bon Voyage colts will he ready. He has probably sold Bon Voyage 2:12¾ privately.

Berta Mac set the trotting record for the Sacramento track last year at 2:13¼ and this year reduced it three times in one race, finally setting it at 2:09. Tbe harness horses at Sacramento have to trot out at least two positions from the pole as the track is deep and dusty there.

Three Neernuts were entered in the matinee races at the Hynes half-mile track last week, and all three made good. Hazelnut, a brown mare, and Daisy, a chestnut mare, both owned by Mr. Palmer, won easily over a fairly fast field. Tornado, a black gelding owned by Mr. Harris, was second in 1:15½.

Tbe champion three-year-old pacer Klatawah 2:05½ is showing up well as a sire. Danforth Farm, Washington, Ill., has a two-year-old bay colt, a trotter, by Klatawah, 3. p., 2:05½, dam Belle Vara 2:08¾, that has shown 2:33¼, half in 1:14 and quarter in 35 seconds, with but a little work. He is a grand individual.

Ted Hays bas finally won a race with Moy, taking a special at Sacramento Thursday in straight heats in 2:16½, 2:15½ and 2:16, and defeating Pilot, Explosion and Silver Dick. The Prodigal mare has not been right all season, but Hays has persevered with ber and she may win some good races yet.

Minor Heir 2:00¼ holds the distinction of being the only green horse that was ever in demand as an exhibition horse after his fourth race. Charlie Dean is daily in receipt of handsome offers by associations, not only in the West, hut throughout the East, for engagements to go against the world's record.

Katalina by Tom Smitb won the Stanford Stake bandily on Tbursday, Dr. Lecco, by Lecco, taking second money and Siesta, by Iran Alto, third. Cleo Dillon, winner of the Occident Stake, and favorite for the Stanford, was distanced the first heat by making a bad break at tbe start. Katalina won in straight heats in 2:17, 2:16¾ and 2:19½.

During the last two days at Readville, Will Durfee's horses were second in all three of his starts. In tbe Blue Hill stake, $4500, he won second money with Zomalta, in the Norfolk stake of $3000 Copa de Oro took a heat and second money, and in the $9000 Massachusetts Carlokin won a heat and second money. Durfee's winnings for the two days amounted to $4200, divided as follows: Carlokin $2400, Zomalta and Copa de Oro, $900 each.

A farmer was anxious that his son should become a minister, and sent him to college for four years, but to his great disappointment the youtb balked at the ministry and set himself up as a horse-trader. The old farmer took his grief to a neighbor, who, however, took a more optimistic view of the matter. "Oh, I wouldn't feel so badly about that," he said. "As a hoss trader, Bill will probahly lead more men to repentance than he ever would have done as a preacher."

The Huguenot, a three-year-old brother to The Abbot 2:03¼ and Tbe Ahbe 2:10¾, recently took a record of 2:27¼.

In an item about William Michelsen's good trotter Wilmar 2:11¼ whicb appeared in this paper two weeks ago it was stated that Monroe Salisbury once owned the horse. This was an error. Wilmar was owned by several parties but John Quinn was his trainer at all times and worked bim a mile as a three-year-old in 2:16, last half iu 1:06. As a four-year old Mr. Salisbury timed Wilmar a mile in 2:17 with the last half in 1:04, but nothing more was done with the horse until this season when he was again sent to Quinn, who has raced him most successfully.

It's mighty easy to balance a trotter from the grand stand. Here is Will Durfee's answer to one of the grand stand critics: Tbis horse is for sale. The man wbo buys him will secure the full privilege of rigging him to suit bimself. There will be no conditions in the bill of sale. As for me, I have tried him both ways and find that he goes better witb his head up high, so that is the way I'm going to drive him." This seemed to settle the question and Durfee's critics are not as numerous as formerly.—Western Horseman.

There is a gray pacing stud at Los Angeles called Athol, hy Athablo, dam by A. W. Richmond, that shows every indication of not only becoming a race horse, but a very fast one at that. He is four years old and wears nothing hut quarter boots and very light shoes all round. He is a beautifully-turned horse, and as quiet as a lamb. He goes low when at speed, and there is no lost motion. Walter Maben drove him a mile last week in 2:09¾, every quarter in 32½ seconds except the last, and that was in 32¼. He finished strong, and came off the track without taking a long breath.

CALIFORNIA STATE FAIR AWARDS.

The following awards on thoroughbred light harness and saddle horses were made at the State Fair held in Sacramento this week:

Thoroughbred Awards—

Stallions—4-year-olds or over—Andrew B. Cook, Mrs. A. A. Bianchi, first; Silco, J. E. Ferry, second.

Stallions—3-year-olds—Green Goods, Mrs. Bianchi.

Stallions—3-year-olds—Randall, Mrs. Blanchi, first; Judge Quinn, Mrs. Blanchi, second.

Mares—4-year-olds—Tawasentha, Mrs. Bianchi, first

Mares—2-year-olds—Coppit, Mrs. Bianchi, first; Chestnut filly, second.

Best thoroughbred sire, with not less than five colts—Wandering Nun, F. H .Burke.

Best thorougbbred dam, with not less than five colts—Wandering Nun, F. H. Burke.

Best dam, other than thoroughbred, with two of her colts—Wanda, Siesta, and Roman Boy, F. H. Burke.

Standard Trotters—

Stallions—Washington McKinney, F. J. Kilpatrick, first; Lijero, F. E. Wright, second; Herbert Dillon, F. N. Frary, third.

Stallions—2-year-olds—All Style, Dana Perkins, first.

Stallions—1 year old—Roman Boy, F. H. Burke, first.

Mares—4-year-olds and over—Wanda, F. H. Burke, first.

Mares—1 year old—Expedio, E. J. Weldon, first.

Harness Horses—

Pair, 16 hands or over—Team, Don and Frank, Tbomas Rowers, first.

Team, Lynn and George A., Frank Aiken, Marysville, second.

Pair, 15 hands and under 16—Team,, T. H. Barnard, first.

Mare or gelding, 15 hands and under 16—Laddie G, F. H. Burke, first.

Mare or gelding, 16 hands or over—Anheuser, Carl Saemann, first.

Novelty Awards—

Team, rig, and equipment—Lady Barbara and Lady Mary, Mrs. J. F. Heenan, first.

Best single horse, rig, and equipment—The Lark, Mrs. J. F. Heenan, first.

Saddle Horses—

Stallions, 4-year-olds and over—Artist Jr., E. A. Bridgford, first.

Stallions under 4 years old—Artist Boy, E. A. Bridgford, first.

Mares, 4 years old or over—Black Belle, E. A. Bridgford, first; Lady Crawford, E. A. Bridgford, second.

Gaited Saddle Horses—

Dewey, Miss Edith Hoefler, first; Black Belle, E. A. Bridgford, second; Lafayette, Charles W. Reed, third.

Desert Arabians—

Mahruss, Miss Eleanor Gates, first; Obeyran, Miss Gates, second.

WILL RACE IN OCTOBER.

SANTA ROSA, August 29.—At a meeting of the members of the Sonoma County Driving Club, held last week, it was decided to hold two days' racing here under the auspices of the club on Friday and Saturday, October 9th and 10th. There will be a programm of harness and running races and good purses and trophies will be offered. Sampson B. Wright is president and Henry H. Elliott secretary of the Sonoma County Driving Cluh. The race program committee has as members Dr. J. J. Summerfield, L. L. Cannon and William E. Healey.

AUDUBON BOY COLTS.

Only a few people took advantage of Audubon Boy 1:59¼ being at Los Angeles in 1907 and bred mares to the neat pacer, but those who did now have some very fine colts. Tbere are two colts and a filly by Audubon Boy now at Agricultural Park, Los Angeles.

S. Sepulveda owns one of the colts that is out of his pacing mare Linda Belle by Zolock. He is almost as big as a yearling and seems to know nothing hut pace. When started up on a halter he breaks from a walk right into a pace and with his head up in tbe air looks as pretty as a picture. Like all of his hrothers and sisters, he is brown, with a white star and the off hind ankle and nigh hind heel white. He has the best of legs and feet and a strong short back. The dam is a typical hrood mare and well bred, her dam being by a son of Electioneer.

F. H. Merrmore owns the filly by Audubon Boy. Sbe is out of the good mare Belle, by Titus, the sire of Phoenix and her dam was by Dashwood. The filly is a solid color all over except her nigh hind ankle is white. She is almost as large as the Sepulveda colt, as both have thrived since the day they were foaled. She bas the hest chest and quarters one could ask, and ber sboulders are very oblique. Her dam is a big rangy bay mare that was one of Mr. Messmore's road team.

The tbird of the Audubon Boy get is a colt owned by Joseph H. Williams. His dam is Pearl Pointer, by Sky Pointer, which Williams drove in 2:25 as a three-year-old. She has not proved as good a motber as the other two mares and consequently the little fellow has not had as much nourishment as he needed, but now he is learning to eat oats and is getting about two or three quarts a day. He is naturally not as fat as the other two, but he is as tall as the filly and should soon begin to fill out and improve, as he is as well built as either. Like the others, he seems to know nothing but pace, which he certainly came by honestly.

DRIVING CLUB RACES.

The San Francisco Driving Club will hold its banner meeting of tbe season at Tanforan, Septemper 9. The track is in good shape and fast time is expected, as all of the class horses are entered. The entries:

Free-for-all trot—Charles L. Becker's Walter Wilkes, J. J. Butler's Major Cook, F. E. Burton's Neko, F. Gommett's Verona.

Free-for-all pace, match race—Joe Ciocello's Queen Derby, George Giannini's George Perry.

2:17 pace—R. P. Giovannoni's Golden Buck, A. H. Scofield's Albert S., James O'Kane's King V, Cbarles L. Becker's Schely B., C. J. Lecari's Charley J, George Kitto's Deroli.

2:25 class—F. E. Burton's Billy Murray, Fred Clotere's Monk, J. V. Galindo's Hunky Dory, J. Danz's Babe, H. Helbush's Prince H., H. Boyle's Docus D., O. Taylor's Billy Ellworth, S. Benion's Babe Boswell, G. Tasi's Margaret, Martin Ford's W. J., Charles L. Mitchell's N. L. B.

2:25 class, mixed—A. Schwartz's Artha, A. J. Boiseuther's Dandy, N. Lawlor's Valma, Joseph McTigue's Darby Mac, Cbarles Fulgerson's Ed Ray, H. Schottles' Dynamite, W. C. Rice's Hickman Girl.

Judges—Bert Edward, James McGratb, Walter Pease.

Timers—H. Schlotter, D. Misner, John Finn.

Marshal—Fred Lauterwasser Jr.

BOOKIES TO BLAME.

A New York dispatch of August 29th says: E. E. Smathers, rich hroker and owner of the famous horses McChesney and Major Delmar, and a familiar figure about the race tracks of the country for years as a plunger, was a passenger aboard the Mauretania of the Cunard line, in from Liverpool to-day. Asked about the recent law passed by the Legislature to prohibit race track betting, Mr. Smathers said: "I am afraid it's all over witb racing: The game is on the down path with no sign of coming hack. The whole fault lies at the feet of the 'bookies,' who wanted to grab everything in sight, forgetting absolutely the public or its interests."

LITTLE MANUFACTURING COMPANY,
—Dealers in—
Rough and Dressed Lumber of all kinds.

North Montpelier, Vt., Aug. 14, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—I raced this mare during treatment for a very bad tendon. She was so lame that she could hardly bear her weight on it. In two weeks from the time I commenced to use Save The Horse she was going sound. I have worked her hard all summer and she is sound on the tendon.

I have used it a great deal, and think it is the greatest medicine ever put up for bad tendon and strains of all kinds.

Yours truly,
F. S. LITTLE.

Buffalo, N. Y., Aug. 25, 1908.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—Please send me one pound of ointment, as I want to try it.

Your spavin cure cured my mule of spavin and ring bone, both of which was on the one limb, and I am in a position to tell anybody of it.

Thanking you for your past favors, I remain
Yours respectfully
R. A. DEACON,
168 Watson St.

CALIFORNIA STATE FAIR RACES.

Close Contest the Rule in Very Nearly Every Event of the Week.

While the crowds that attended the races at Agricultural Park during the first days of the State Fair were small, on Wednesday the people began coming in large numbers and during the last three days there has been a large attendance.

Before a rather small crowd, the Occident Stake for three-year-old trotters was decided on the opening day of the California State Fair last Saturday, and it resulted in one of the greatest contests this event has ever furnished. There were but four heats to the race, but every heat was a coutest, aud when it was over the audience voted it a splendid race, with the best trotter the winner.

Up to 1905, the Occident Stake was trotted on the old three-in-five plan. That year it went to six heats and was won by North Star. The year previous, in 1904, it took seveu heats to decide the stake, which was won by Almaden. These long-drawn-out contests for three-year-olds led the Board of Directors, when advertising the stake for foals of 1905, to close January 1, 1906, to make a uew condition, as follows:

"A horse not winning a heat in the first three shall not start in the fourth unless said horse shall have made a dead heat, but horses so ruled out shall have a right to share iu the prize according to their last heat."

The above condition has for years been enforced with all other harness races at the California State Fair with such satisfaction to all concerned that its adoption for the colt stakes did not cause much dissatisfaction, although tbere has been less money in the stake since then. The stake of 1904 was worth $3055, that of 1905 had a value of $3885, and for the years of 1906, 1907 and 1908 the stakes have been valued respectively as follows: $3095, $2335 and $2535.

It took four heart-hreaking heats to decide the wiuner of the Occident Stake, first on the program of the State Fair races.

They were a hard lot to get away in the first heat, causing Starter Stevens all kinds of trouble, but finally he sent them off to a perfect start. Zibhle took Katalina right to the frout by three lengths and never looking back came on and won the heat in 2:15¼, though Dr. Lecco got dangerously close right at the end, and Cleo Dillon was only a neck farther away. Bessie T. was fourth well inside the flag, but both Siesta and Debuante made mistakts soon after the start losing so much ground that they both finished outside. This heat, trotted from fifteen to twenty feet farther out than is usual, on account of this space being cut up for runners to gallop over, and with footing proven to be a little slow and tiresome, looked to he as good as 2:12½ or 2:13 over a fast track, and that's going some for three-year-old trotters in any part of the country.

The second heat they were away at the second time down for the word, Katalina again set out to make a run-away race of it, but Cleo Dillon and Dr. Lecco racing like a team, two or three lengths behind were in hot pursuit. At the distauce the three were close together and all under a hard drive. Dr. Lecco seemed to hang a bit for Walker, while Cleo Dillon made one last desperate effort and won the heat by a head in 2:16 flat. Bessie T. was again a safe fourth.

The third heat was exactly such a race as the second; Cleo Dillon winning from Katalina in the last twenty yards, with Dr. Lecco right there, and the Zombro filly safe for fourth money. In the final heat under the rule, the mares had the track to themselves Zibble again tried to win hy out sprinting his opponent over the first end of the route, but the Sidney Dillon filly again got to him down hy tbe distance post, and in a ding-dong finish beat him home again in 2:20.

Occident Stake, trotting, for three-year-olds. Total value $2535, divided 60, 30 and 10 per cent:

Cleo Dillon, b. m. by Sidney Dillon, dam Cleo G. by Yosemite (S. C. Walton)	3	1	1	1
Katalina, b. m. by Tom Smith, dam Kate Lumry hy Shadeland Onward (Zihhell)	1	2	2	2
Dr. Lecco, blk. s. by Lecco, dam by McKinney (B. Walker)	2	3	3	
Bessie T., br. f. by Zomhro (Torrey)	4	4	4	
Siesta, b. c. by Iran Alto (Davey)	dis.			
Debutante, b. f. by Kinney Lou (Phippen)	dis			

Time—2:15¼, 2:16, 2:16¼, 2:20.

The story of the 2:12 pace is soon told. Explosion could beat Pilot, Ray O'Light could beat Explosion, and Charley D. could, and did win, so there you are—four in a string like Brown's cows—all safe inside the flag in 2:09, 2:10½ and 2:12½. The first heat in 2:09 was something of a race at that being as good as 2:07 over a fast track, and the good colt Ray O'Light was right there at the end, while the other two were not far away.

2:12 Class, pace, $800:

Charley D., b. s. hy McKinney, dam Flewy Flewy hy Memo (Thompson)	1	1	1
Ray O'Light, blk. c. by Searchlight, dam Carrie B. by Alexauder Button (Whitehead)	2	2	2
Explosion, b. m. by Steinway, dam Flash by Egmont (Ward)	3	3	3
Pilot, ch. g. by Abbotsford Jr. (C. Walker)	4	4	4

Time—2:09, 2:10½, 2:12½.

Monday—Second Day.

Only three started for the $1,000 hung up for 2:10 trotters, but they furnished a nice race at that. Berta Mac set the pace in the first beat until well into the stretch where Rutherford brought R. Ambush up, causing Helmau's mare to do everything but make a break. At the upper end of tbe grandstand R. Ambush was in frout, but the mare quickly settled and heat him home hy a neck in 2:10¼. Athasham acted badly in this heat, but was a close third at the finish and trotting very fast. The second heat it was Berta Mac all the way; Athasham was still on his bad behavior, and R. Ambush's rush in the stretch fell short hy a length, the mare winning with her ears pricked in 2:09¾.

In the third heat Athasham had trot in his head and went right out with Berta Mac. He made a short run at the eight pole, and at the half Berta Mac made her first real mistake in the race. She soon hit a trot and was on equal terms with the other two turning into the stretch; they raced some from there home, but the mare was not to be denied and won handy enough in 2:09 flat. Athasham finished second, but made a wild run just before reaching the wire and was placed third.

Trotting, 2:10 Class, purse $1,000:

Berta Mac, blk. m. by McKiuney (Helman)	1	1	1
R. Ambush, b. s. by Zolock (Rutherford)	2	2	2
Athasham, b. s. by Athadon (B. Walker)	3	3	3

Time—2:10¼, 2:09¾, 2:09.

Toppy, Ringrose and Cresco Wilkes started in the race given for matinee horses, second on the programme.

Mr. Wempe, behind Cresco Wilkes, must have handed him a little "Hock der Kaiser" talk, for taking the lead as they got the word in the first heat, he went right after the cup and won the heat eased up in 2:11¾. After Toppy made a standstill break in the secoud heat, this was also easy for Cresco in 2:15¾.

Pacing, Park Amateur Club Members:

Cresco Wilkes, ch. s. by Nutwood Wilkes (G. Wempe)	1	1
Toppy, ch. g. by Delphi (G. Erlin)	2	2
Ringrose, b. g. by Falrose (D. Hoffman)	3	3

Time—2:11¾, 2:15¾.

The third race on Monday's program was a special for pacers, aud Mac O. D., Silver Dick and Moy accepted the conditions. The purse was not mucb, but they raced for hlood and the struggles in the stretch was worth seeing. Silver Dick set the pace over the half in the first heat where Moy and Mac O. D. hoth passed him and raciug the eutire last half like a team, both under a terrific drive the last end of it finished, Mac first by a neck in 2:11½. Silver Dick was third under an easy drive.

Walker had Silver Dick away on bis toes the second heat and there was something doing in his line all the way. Coming down the stretch it looked easy for Pouuder but he let Mac O. D. bear over to the inside enough to cause the Judges to see room enough for a foul and another cheap heat for the entertainment of the crowd.

So accordingly Silver Dick was given the heat, Mac O. D. was placed second, and Moy was this time an "easy" third.

The next heat everybody raced and at the end all were close together and under a drive but Ponnder's horse had the Indian sign ou them and won the third heat in 2:13¼.

The final heat was won by Mac O. D. in easy fashion and the slow time of 2:17½. Summary:

Special race:

Mac O. D. b. g. by Zolock (Pounder)	1	2	1	1
Silver Dick, gr. g. by Geo. W. McKinney (B Walker)	3	1	2	2
Moy, b m. by Prodigal (Hayes)	2	3	3	

Time—2:11½, 2:13½ ,2:13¼, 2:17½.

Tuesday—Third Day.

It took six corking heats to decide the 2:08 pace. Rutherford set out to win the first heat with Delilah, and but for a bad break when well in the stretch would have won, and as she later won two cracking heats in 2:09 and 2:09½ might have, bnt for this break, won the race in short order, but as it was Fred Ward brought Magladi from a rear position in time to win the heat very handy in 2:09½. Fred Chadbourne got busy with John R. Conway in the next heat, and when he got through heating Magladi a head on the post, the Jndges hung out 2:08¼. That Conway won this heat, was all due to the sixteen-to-one preparation of speed that Chadbourne handed the old horse all through tbe stretch. Delilah settled and won the next two heats in race-horse style, bnt after that she was a tired mare, so was Magladi, and Miss Idaho stayed in the stable after the third heat. John R. won the fifth and sixth heats with only a little "elixir" at the end, winning one of the hardest fought races of the season. Summary:

Pacing, 2:08 Class, $1,000:

John R. Conway, ch. s. by Diablo (Chadbourne)	2	1	2	2	1	1
Delilah, b. m. by Zolock (Rutherford)	4	3	1	1	2	2
Magladi, b. m. by Del Norte (Ward)	1	2	3	3	3	3
Miss Idaho, ch. m. by Nutwood Wilkes (Walton)	3	4	4			

Time—2:09½, 2:08¼, 2:09, 2:09½, 2:10¼, 2:13.

Nogi won the 2:17 trot in handy fashion, all the others in one heat or another had bad raciug luck or would make a break tbat was costly.

Alsandra came from a long way back in the first heat to be second, and was uufortunate enough iu the second heat to be sent away on a run. Vallejo Girl trotted a nice race throughout but met with cousiderable interference in two heats and was probably not quite at her best at that.

Wilmar was unsteady for Quinn, making a break in the second heat when it looked like he had a chance to win. The race of Easter Belle was entirely off color, after the first heat when she was third in 2:11. She never seemed to hit her stride and was not a contender at auy part of the route. Della Derby made a standstill-walk-a-pace break in tbe second and was distanced. Summary:

Trotting, 2:17 Class, $800:

Nogi, b. s. by Athablo (Walton)	1	1	1
Vallejo Girl, b. m. by McKinney (Davey)	4	2	3
Wilmar, b. g. hy Wilduut (Quinn)	6	3	2
Alsandra, h. s. by Bonnie Direct (Hayes)	2	4	4
Easter Bells, b. m. by Diablo (Vance)	3	5	5
Della Derby, blk. m. by Chas. Derby (Whitehead)	5	d	

Time—2:11, 2:12½, 2:11¼.

Tuesday's last race was for amateurs, and for a cup. Like most other such events they raced as hard for the cup as they would for tbe money. Davisville tried to win it with Chiquita, Sacramento tried hard with old Kelley Briggs, but dear old San Francisco brought bome the mug with Mary K. Hoffman knew after it was over, that he had been to the races, for one took him part of the route and tben the other.

Pacing, Amateur Clubs, silver cup:

Mary K., br. m. by Zombro (D. Hoffmau)	1	2	1
Kelly Briggs, hr. g. by Bayswater Wilkes (F. E. Wright)	3	1	2
Chiquita, b. g. by Diablo (C. Montgomery)	2	3	3

Time—2:10, 2:11¼, 2:10.

Wednesday—Fourth Day.

In the first heat of the 2:15 pace first on Wednesday's program, it was easy for Memonia to win in 2:12. McFadyen made a bad break going around the first turn but came on and beat Radium a length for second position. In the second heat both Memonia and Radium went to a break going around tbe first turn and McFadyen went right on about his bnsiness and won the heat by himself in 2:12. The other two finished close together just inside the flag.

In the third heat Radium made another break, but McFadyen and Memonia went away boiling aud raced the entire mile like a team. They were stepping at the end under a scorcbing drive but they had raced each other all the way, marching the first half in 1:03½. The finish they put np roused the grandstand from one end to the other, this being the first crowd of the meeting really able to cheer a good race. McFadyen made a hreak after going tbree-eighths of a mile in tbe fourth heat and Memonia came home alone in 2:16. Summary:

Memonia, b. m. by Demonio (Hoy)	1	2	1	1
McFadyen, ch. s. by Diablo (Sutherland)	2	1	2	2
Radium, blk s. by Stoneway (Mosher)	3	3	3	

Time—2:12, 2:12, 2:10½, 2:16.

A hunch of fun horses scored up for the word in the second event on the card aud the race was no procession at any part of the mile, though the Bonnie Direct gelding, Judge, had it on them for speed and won handy enough in 2:16½. The rest of the field finished all together fighting for second honors.

"Brick" Heenan cinched the money and the honor of being a real race driver by goiug right on from the start and never lookiug hack. As in the first heat, the real racing was for second position. Summary:

The Judge, b. g. hy Bonnie Direct (F. J. Heenau)	1	1
Briarwood (I. W. Christie)	3	2
Bonnie W. (A. W. Cowell)	5	3
Alto Genoa (J. Peirano)	4	5

Time—2:16½, 2:15.

Another bunch of matinee "prospects" furnished the entertainment third on the bill of fare, and each horse had a lot of loyal friends judgiug from tbe rooting, when one after another made a mistake and fell back. Gorgas finally wou by Priuce A. making a break when close to the wire, bnt cooled out so lame that he conld not start for the second heat. The others were sent away without him and as they finished the same as in the heat they awarded Gorgas first "money", Prince A. second, and so on just as they finished in the first attempt. Summary:

Gorgas (Capt. P. Sims)	1	dr
Prince A. (A. B. Sherwood)	2	1
Sterling (O. Wilber)	3	2
Cavaliero (M. Menassi)	4	3

Time—2:24, 2:37.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

DEER FARMING IN THE UNITED STATES.

[By D. E. Lantz, Assistant Biological Survey, U. S. Department of Agriculture.]

The present bulletin discusses briefly the economic possibilities of raising deer and elk in the United States. It is believed that when the restrictions now imposed by State laws are removed this business may be an important and highly profitable industry, especially since it will be the means of utilizing much otherwise unproductive land. The raising of venison should be, and is naturally, as legitimate a business as the growing of beef or mutton, and State laws should be so modified as to permit the producer, who has stocked a preserve with deer at private expense, to dispose of his product at any time, under reasonable regulations, either for breeding purposes or for food.

The growing scarcity of game mammals and birds in the United States and the threatened extinction of some of them over large parts of their present ranges make the preservation of the remnant highly important. Very important also is the increase of this remnant so as to make game once more abundant. It is believed that by means of intelligent game propagation, both by the States and by private enterprise, many of our depleted ranges can be restocked with big game.

Importance of the Deer Family. The members of the deer family (Cervidae) rank next to the cattle and sheep family (Bovidae) in general utility, and are the most important of the big game animals of America.

Wherever obtainable in quantity the flesh of deer of different kinds has always been a staple article of diet, and under present market conditions it is hardly necessary to say that venison is perhaps the most important game, being a favorite with epicures and also having a wide use as a substitute for beef and mutton, which meats it resembles in texture, color, and general characteristics. Its flavor is distinctive, though it suggests mutton rather than beef. In chemical composition it is very similar to beef, though, judging from available data, it is not so fat as stall-fed cattle. The following figures show how it compares with beef and mutton: A lean venison roast before cooking has been found to contain on an average 75 per cent of water, 20 per cent of protein or nitrogenous material, and 2 per cent of fat; a lean beef rump, some 65 to 70 per cent of water, 20 to 23 per cent of protein, and 5 to 14 per cent of fat; and a lean leg of mutton, 67 per cent of water, 19 per cent of protein, and 13 per cent of fat.

Venison, beef, and other common meats are very thoroughly digested, whatever the method of cooking. Venison may be roasted, broiled, pan-broiled, or used for making stews, in much the same way as beef. Venison, particularly steak, to be at its best, should be eaten as soon as possible after it is cooked.

The general popularity of venison is so great and the demand for it so widespread that overproduction is improbable. The other products of the deer —skins and horns—are of considerable importance, and in countries where deer are abundant and especially where large herds are kept in semidomestication, the commerce in both is very extensive.

The Domestication of Deer. A number of species of the deer family have been proved to be susceptible to domestication. The reindeer, however, is the only one that has been brought fully under the control of man. The fact that the European red deer and the fallow deer have been bred in parks for centuries without domestication does not prove that they are less susceptible to the process than the reindeer. The purposes for which they have been held captive and the environment given them have been markedly different. It must be remembered, also, that few attempts have been made to rear and domesticate deer under intelligent management. The work has been largely a matter of chance experiment. If they had been as long under careful management as cattle, they would now, probably, be equally plastic in the hands of the skillful breeder.

But raising deer for profit does not necessarily imply their complete domestication. They may be kept in large preserves with surroundings as nearly natural as possible and their domestication entirely ignored. Thus the breeder may reap nearly all the profit that could be expected from a domestic herd, while the animals escape most of the dangers incident to close captivity. But the breeder who aims at the ultimate domestication of the animals, and whose herd approaches nearest to true domesticity, will in the end be most successful.

Species to be Selected for Breeding. The number of species of deer suited for breeding in inclosures in the United States is great, though the chances for success are by no means the same for all. As a rule those native to America are to be preferred, since they are already acclimated. In selecting any species, similarity between its natural habitat and that to which it is to be transferred must be considered. Important, also, is its adaptability to varied conditions, as shown by former attempts to acclimatize it.

Unless they have shown a peculiar adaptability to such change, deer should not be taken from arid parts of the United States to humid parts. To a disregard of this principle are probably due many of the failures that have attended experiments in breeding the American antelope, the Columbia blacktail deer, the moose, and other animals in places differing widely from their natural ranges.

The history of attempts to acclimatize the several kinds of deer shows that some readily adapt themselves to a great variety of conditions, and efforts to introduce them into new countries have been almost uniformly successful. Such has been the experience with the axis deer, the Japanese and Pekin sikas, the red and the fallow deer of Europe, and especially with the wapiti, or Rocky Mountain elk, and the Virginia deer. While experiments with the foreign species named offer every promise of success to the owners of American preserves, there are obvious reasons for recommending the two native animals just mentioned as best suited for the production of venison in the United States.

The Wapiti, or Rocky Mountain Elk. The wapiti (Cervus canadensis), including two related species and a geographic race, and known generally in Amtrica as the elk, is, next to the moose, the largest of our deer. It was once abundant over the greater part of the United States, whence its range extended northward to about latitude 60 degrees in the Peace River region of the interior of Canada. In the United States the limits of its range eastward were the Adirondacks, western New Jersey, and eastern Pennsylvania; southward it reached the southern Alleghenies, northern Texas, southern New Mexico, and Arizona; and westward the Pacific Ocean.

For the practical purposes of this hulletin all the forms of the wapiti are treated as a single species. At the present time the range of these animals has so far diminished that they occur only in a few scattered localities outside of the Yellowstone National Park and the mountainous country surrounding it, where large herds remain. Smaller herds still occur in Colorado, western Montana, Idaho, eastern Oregon, Manitoba, Alberta, British Columbia, and the coast mountains of Washington, Oregon, and northwestern California. A band of the small California valley elk still inhabits the southern part of the San Joaquin Valley.

The herds that summer iu the Yellowstone National Park and in winter spread southward and eastward in Wyoming rae said to number about 30,000 head, and constitute the only large bands of this noble game animal that are left. Although protected in their summer ranges and partially safeguarded from destruction in winter by the State of Wyoming, there is yet great danger that these herds may perish from lack of food in a succession of severe winters. Partial provision for winter forage has been made within the National Park, but the supply is inadequate for the large numbers of animals. Further safeguards are needed to place the Wyoming elk herds beyond the reach of winter starvation.

In addition to the wild herds, there are a considerable number of elk in private game preserves and parks and gardens of this country. The herds in captivity form the nucleus from which, under wise management, some of the former ranges of this animal may be restocked and from which a profitable business of growing elk venison for market may he developed. At the present time this species affords a most promising field for ventures in breeding for profit.

Habits of Elk. The elk is both a browsing and a grazing animal. While it eats grasses freely and has been known to subsist entirely upon pasture, it seems to prefer a mixture of grass and browse.

The elk is extremely polygamous. The adult bulls shed their antlers annually in March or April, and new ones attain their full size in about ninety days. The "velvet" adheres until about August. While the horns are growing the bulls usually lead solitary lives; but early in September, when the horns are fully matured, the rutting season begins. Fights for supremacy then take place, and the victor takes charge of as many cows as he can round up and control. The period of gestation is about 8½ months The femals does not usually breed until the third year, and produces but one calf at a time.

Although the elk is less prolific than the common deer and some other species that have been bred in parks, it increases fully as rapidly as the common red deer of Europe. Moreover, it makes up for any lack of fecundity by its superior hardiness and ease of management. It has been acclimatized in many parts of the world, and shows the same vigor and hardiness wherever it has been transplanted. In Europe it has been successfully crossed with the Altai wapiti and the red deer, and in both instances the offspring were superior in size and general stamina to the native stock.

Elk Venison. The flesh of the elk, although somewhat coarse, is superior in flavor to most venison. That of the bulls is in its hest condition about the time the velvet is shed. By the time the rut is over, in October, their flesh is in the poorest condition. As the open season for elk is usually in October and November, and only bulls are killed, it follows that hunters often obtain the venison when it is poorest. The meat is not best when freshly killed, but should he left hanging for four or five days before it is used. Of course fat elk are better eating than lean, and it is said that venison from castrate bulls is superior to any other.

Domestication of Elk. With few exceptions the early attempts to domesticate elk were made by men who were wealthy enough to disregard all thought of profit in raising them. They were usually placed under the care of servants, and the hucks were left uncastrated until they became old and unmanageable. Soon the serious problem of controlling them outweighed the novelty of their possession, and one by one the attempts at domestication were abandoned.

A desire to preserve this important game animal has caused a renewal of attempts to breed it in confinement, and at present there are small herds under private ownership in many places in the United States. The Biological Survey has recently obtained much information from owners of herds in regard to their experience in breeding and rearing the animals, and also their opinions as to the possihility of making the business of raising them profitable. Of about a dozen successful breeders (The experience of these breeders are, in the main, reserved for a more extended bulletin on the domestication of game mammals), nearly all are of the opinion that raising elk for market can be made remunerative if present laws as to the sale of the meat are modified.

One especially important fact has been developed by the reports from breeders. It is that the elk readily adapts itself to almost any environment. Even within the narrow confines of the paddocks of the ordinary zoological park the animal does well and increases so that periodically the herds have to be reduced by sales.

The fullest reports that have been received by the Department of Agriculture from breeders of elk are from George W. Russ, of Eureka Springs, Ark., through H. N. Vinall, of the Bureau of Plant Industry.

Mr. Russ has a herd of 34 elk. They have ample range in the Ozarks on rough land covered with hardwood forest and abundant underbrush. The animals improve the forest by clearing out part of the thicket. They feed on buds and leaves to a height of 8 feet, and any growth under this is liable to he eliminated if the range is restricted. If not closely confined, elk do not eat the bark from trees, nor do they eat evergreens. In clearing out underbrush from thickets they are more useful than goats, since they browse higher. Goats, however, eat closer to the ground; and as the two animals get along well together, Mr. Russ recommends the use of both for clearing up brushy land and fitting it for tame grasses.

The increase of elk under domestication is equal to that of cattle. Fully 90 per cent of the females produce healthy young. An adult male elk weighs from 700 to 1,000 pounds; a female, from 600 to 800 pounds. The percentage of dressed meat is greater than with cattle, but, owing to hostile game laws, experience in marketing it is very limited. An offer of 40 cents a pound for dressed meat was received from St. Louis, but the law would not permit its export. Mr. Russ says:

From the fact that as high as $1.50 per pound has been paid for this meat in New York City and Canada, and that the best hotels and restaurants pronounce it the finest of all the meats of mammals, we are of the opinion that if laws were such that domesticated elk meat could be furnished it would be many years before the supply would make the price reasonable compared with other meats. Elk meat can be produced in many sections of this country at less cost per pound than beef, mutton, or pork.

Mr. Russ thinks that large areas of rough lands in the United States not now utilized, especially in localities like the Ozarks and the Alleghenies, could be economically used to produce venison for sale, and he regards the elk as especially suited for this purpose.

Another feature of Mr. Russ' report is of more than passing interest. He says:

We find from long experience that cattle, sheep, and goats can be grazed in the same lots with elk, providing, however, that the lots or inclosures are not small; the larger the area the better. We know of no more appropriate place to call attention to the great benefit of a few elk in the same pasture with sheep and goats. An elk is the natural enemy of dogs and wolves. We suffered great losses to our flocks until we learned this fact; since then we have hal no loss from that cause. A few elk in a thousand acre pasture will absolutely protect the flocks therein. Our own dogs are so well aware of the danger in our elk park that they can not be induced to enter it.

Judge Caton, in his Antelope and Deer of America, also remarks on the animosity of elk toward dogs, and says that the does always lead in the chase of dogs that get into the elk park. If elk will attack and vanquish dogs and coyotes and thus help to protect domestic animals grazing in the same pastures, a knowledge of the fact may be of great advantage to stockmen who desire to give up herding sheep

and to resort to fenced pastures instead. The addition of a few elk iu the pasture may be an efficient protection from dogs, coyotes, and wolves. However, outside of fenced pastures elk do not always show themselves hostile to dogs and coyotes.

Management of Elk in Inclosures. Lorenzo Stratton, of Little Valley, Cattaraugus County, N. Y., began experiments in breeding elk about sixty years ago. His plan of management consisted essentially in taming the calves when very young and continuing the petting process with the entire herd. He visited the animals daily in the pasture and always carried dainties to feed them. As the bulls became old and developed signs of viciousness, they were castrated, younger animals being used for breeding. He thus developed a thoroughly domesticated herd.

For economic reasons, it is not always possible to follow Mr. Stratton's plan. Those who grow the animals for venison and in large preserves would find it impracticable to tame all the calves. However, if elk or deer are grown for stocking parks or private preserves, the tamer they are the easier it will be to handle and ship them.

Range. In choosing a range for elk, the natural food supply is important. They thrive best in preserves having a variety of food plants—grasses, bushes and trees. Rough lands, well watered with clear streams and having forested area, are well adapted to their needs. About as many elk can be kept on such a range as cattle on an equal area of fair pasture. There should be thickets enough to furnish winter browse, but this should be supplemented by a supply of winter forage.

Food. Except when deep snows cover the ground, elk will keep in good condition on ordinary pasture and browse; but a system of management that provides other food regularly will be found more satisfactory. Hay and corn fodder are excellent winter forage; but alfalfa hay has proved to be the best dry food for both elk and deer. A little oats or corn —whole or chopped—may be fed each day. Elk are fond of corn, and feeding it affords excellent opportunities for winning their confidence and taming them. The same may be said of salt, which should be furnished liberally to all deer kept in inclosures. Running water, although not essential, is of great importance in maintaining elk in good condition.

Fence. Elk are much less nervous than ordinary deer, and less disposed to jump fences. When they escape from an inclosure they usually return of their own accord. If tame, they may be driven like cattle. Ordinarily, a 5-foot fence of any kind will confine elk. Henry Binning, of Cora, Wyo., writes us that a 4-foot woven-wire fence is ample for these animals. A small inclosure in which a vicious bull elk is to be kept should be higher and of stronger material.

Cost of Stock. The cost of stocking an elk preserve is not great. Usually surplus stock from zoological parks or small private preserves may be obtained at low cost, varying with the immediate demand for the animals. At times they have sold for less than $20 a head, and with the present restrictions on sale, low prices are likely to continue. A few years ago T. J. Wilson, of Lewisburg, Ohio, paid $165 for three animals. A Michigan breeder recently offered to deliver a dozen head, sex and age not given, all fine specimens, for $500. This is, of course, a low price, not more than cattle would bring and less than the venison would be worth if it could be sold. If restrictions on the sale and shipment of venison from private preserves were removed, prices of the stock would, of course, soon advance, and necessitate a greater outlay in starting the business.

Vicious Male Elk. The male elk is ordinarily docile, but in the rutting season the older ones often become ill-tempered and dangerous. Several tragedies connected with attempts to domesticate elk are matters of history. One was recorded by Judge Caton in his Antelope and Deer of America as having occurred in his own park. Another took place at Bull City, Osborne County, Kans., in October, 1879, and resulted in the instant death of Gen. H. C. Bull, the mortal wounding of two other men, and the serious injury of another, from the attacks of an infuriated bull elk that had previously been regarded as extremely gentle.

Wild and unconfined deer and elk flee from man under nearly all circumstances, but when wounded and closely pressed they have been known to attack hunters. It is unlikely that, even in the rutting season, a wild bull elk would attack a human being. But the tame or partially tame animals that have become familiar with man are to be feared and should not be approached in that season without extreme caution. A male elk or deer that has once shown viciousness can not again be trusted.

The remedy for viciousness in the male elk is castration. It is unsafe to keep as uncastrated male elk over 4 years old, unless he is in a strongly fenced inclosure from which visitors are excluded. The effects of castration are to make the animal docile and to greatly enhance his value for venison. This is in accord with observed results in the production of beef, pork, and mutton. Venison grown in domestication under a system in which the male animals intended for slaughter are castrated should be uniformly of the highest grade and far superior to that obtained in the wild state during the usual open season for hunting. This consideration is of the greatest importance in fixing the final status of venison grown under domestication.

(To be Concluded.)

TRAPSHOOTING AN OLD SPORT.

Nearly 80 years ago—in 1831, to be exact—members of the old Sportsman's Club of Cincinnati indulged in shooting over the traps, and as this is the earliest record known it is a safe assertion to say that the United States is the birthplace of a sport which has probably more active participants than any other outdoor recreation, and which has found world-wide favor with lovers of the "scattergun." In the early days wild pigeons were used in the traps, being replaced occasionally by quail, a fact which makes the present-day sportsman feel like calling down anathemas on the heads of those who helped to deplete the number of the gamey little "Bob White." But as wild game of all kinds was exceedingly abundant, and the only close seasons were such as a club might designate for its members, or individual sportsmen see fit to observe, there was no apparent necessity for a substitute for field shooting and comparatively little was done over the traps.

As the country became more thickly settled and the inevitable result of indiscriminate shooting was realized in the increasing scarcity of game, sportsmen turned their attention more and more to trapshooting, many finding in it their only chance to indulge in their love for sport with the gun. Gun clubs began to multiply, and at the present time hardly a town in the country is so small as not to be able to muster shooters enough for a club and pull off at least one very creditable tournament each year. And this sport is not for the wealthy sportsman alone, as are many others. The man of moderate means may partake of its pleasures and benefits without making too heavy inroads on his income. The fair sex are entering into the sport more generally each year, and while a few years ago it was a strange sight to see a woman on the firing line, to-day it has become so common as to excite nothing but favorable comment. Their presence has also had an elevating influence on the sport in many ways. The practice of sweepstake shooting in club events, which was so prevalent some years ago, had a bad effect and was the cause of many clubs disbanding. This feature is practically dead and the sport has benefited by its discontinuance.

The American sportsmen have proved their superiority over the best in the world more than once, and although there have been no international matches since Capt. Tom Marshall and his team of experts visited England and the continent and defeated all comers, the records made from year to year have not been appreciated. During the past year C. G. Spencer a professional of St. Louis, Mr., shot at 16,220 targets, breaking 15,400, or 94.9 per cent; W. R. Crosby of O'Fallon, Ill., his nearest competitor, also in the professional ranks, shot at 12,970 and broke 12,303, or 94.8 per cent; J. R. Taylor of Newark, O., a shooter destined to take his place at the head of the professionals of the country, broke 14,179 out of 14,960, or 94.7 per cent. Perhaps the most wonderful exhibition of skill was that of George Maxwell of Hastings, Nebr., who, in spite of the fact that he has only one arm, broke 12,311 out of 13,185 targets, or 93.3 per cent; Mrs. A. D. Topperwein of San Antonio, Tex., one of the professional experts, shot at 8080 targets and broke 7353, or 91 per cent; F. E. Rogers of Bucklin, Mo., winner of the Grand American Handicap in 1906, heads the list of amateurs with 16,110 targets shot at and 14,797 broken, or 91.8 per cent. The longest straight run on record in a tournament was made by W. R. Crosby at Canton, O., in 1905, when he broke 419 without a miss. J. M. Hawkins of Baltimore, Md., made the record runs last year of 271 in exhibition and 221 in tournament work. T. J. Hartman, an amateur, of Sulphur, I. T., beat Hawkins' tournament record by three targets with a run of 224.

That some of the shotgun experts are also handy with the rifle the following records made with a .22-caliber last year will show: At San Antonio, Tex., on September 17 to 20, A. D. Topperwein broke 19,990 out of 20,000 2½-inch wooden blocks and 2¼-inch clay disks thrown by hand. This included one run of 8840 and another of 4991 straight. A. H. Hardy at Lincoln, Nebr., on November 2 hit 992 marble out of 1000, and on the 13th and 18th, at the same place, he hit 13,066 2¼-inch wooden blocks without a miss. Mrs. A. D. Topperwein at San Antonio, Tex., beginning on November 12, shot at 100 targets daily, breaking 950 out of a possible 1000

Perhaps a better idea of the magnitude which this sport has attained may be had by giving a few figures based on the average rate of increase of the past few years. It is safe to say that 35,000,000 targets will be shot at this year; over 300,000 pounds of powder will be burned, and over 3,000,000 pounds of lead expended. The targets trapped this year will cost, it is anticipated, in the neighborhood of $150,000.

IDAHO GAME SEASONS AND GAME LAWS.

The open season in Idaho began on the 1st of September. A perusal of the following summary of the game laws in force in that State should be interesting to California and coast sportsmen. One curious anomaly in the otherwise rigid code for Idaho sportsmen is the continuous open season on fish. It is unlawful also to use dogs in hunting any of the larger, hoofed wild game.

Reports from the mountains are by no means encouraging as to grouse and like birds, and the crop will be lighter this year than for many seasons past. The reason is that the wet spring, heavy rains and late snow-storms chilled the eggs so that only a few birds were hatched. The old birds are wary and it is hard to get within shooting distance of them. The same may be said of sage hens and pheasants, localities where they were reported by the hundreds a year ago having scarcely a covey this season.

As to larger game, the reports are more encouraging. From almost every section come stories of deer being seen, and they appear to be unusually tame this year.

Water fowl are reported plentiful in certain sections of the state, where they are beginning to nest, now that spring shooting has been abolished, and there will be good preliminary shooting once the birds begin to make their annual migration from the north.

The game laws of the state are strict and they are being enforced rigidly. A brief synopsis of the game protected, the open season and the limitation placed upon hunters is given below:

Elk, limit one per person per season; antelope, limit one per person per season; mountain goat, limit one per person, September 1st to December 1st; mountain sheep, limit one per person per season; grouse, prairie chicken, fool hen, turtle dove, pheasant, partridge, limit 10 per person per day; wild geese, duck, brant and swan, no limit; deer, open season September 1st to December 15th, limit three. Fish may be caught at all times with a hook, line and rod.

It is unlawful to sell or offer for sale moose, bison, caribou, buffalo, quail, Chinese pheasants, meadow lark, bluebird, thrush (robin), oriole, woodpecker, mocking bird, goldfinch, snowbird, cedarbird, stork or any of the other small birds known as singing birds, or hunt any of the above large or big game with dogs.

It is unlawful to sell or offer for sale any game or part thereof, or trout, grayling or black bass or the eggs or spawn therefrom, except that the same came from private ponds; to catch, trap or otherwise restrain any buffalo, elk, moose or mountain sheep for the purpose of sale or domestication; to destroy the nests or carry away the eggs of any birds or wild fowl; to hunt upon the premises of another without first having obtained permission of the owner; for any person, railroad, express or stage company to receive for transportation or carriage or to sell or offer for sale any fish or game that has been killed contrary to the law; for any person to ship or offer for shipment, or for any transportation or common carrier company to ship or accept for shipment any game animals, game birds or fish out of the state or any part thereof for transportation out of the state, except that such consignment be covered by a shipping permit issued by the state game and fish warden. All packages containing game or fish must be labeled in plain letters on the address side of the package, so as to disclose the contents thereof.

It is required that all persons who are residents of the state who desire to hunt shall first procure a license therefor from the game warden or a justice of the peace, and pay for the same $1. (This includes all persons, children and women and all members of a family and people hunting on their own land, who were exempt under the old law.) To obtain a resident's license the person must have resided in this state for the six months last past. Such license entitles the holder to hunt all kinds of game, and said license may be secured by application from any one issuing them in your county.

Any person who has not resided in the state for the six months last past shall procure a non-resident's license, which are in three classes, the "general," which entitles the holder to hunt large and small game and to fish, and costs $25; the "limited," which entitles the holder to hunt small game and fish only, and costs $10; and "fishing," which entitles the holder to fish only, and costs $1. Non-resident licenses can be procured either personally or by application to the state game and fish warden or any deputy, with the exception of "fishing," which can be secured from a justice of the peace also. The applicant when applying must give name, residence, post-office address, business, age, height, color of eyes, color of hair and any distinctive marks he may have about him. Any non-resident holding a license is entitled to ship out of the state any game covered by the license and killed lawfully, but such shipment must be covered by a shipping permit issued by the state game and fish warden. All licenses are non-transferable and expire on the 31st day of December.

All children under 14 years of age, when in possession of a firearm, must be accompanied by their parent or guardian.

All guides, packers and camp cooks shall be licensed and pay therefor the sum of $10 annually; they shall be deputy state game and fish wardens and shall be held equally responsible for any violations of the law committed by any member of the party they take out unless reported by them.

A person while hunting or fishing must be in possession of his license, and, upon demand, must show the same to any officer and also identify himself.

Any resident or non-resident desiring a shipping permit shall make application for the same to the state game and fish warden, giving the number of his license, the party's name and address to whom shipped, the number and kind of game to be shipped, and inclose 50 cents for each and every permit. No shipping permit will be issued unless the applicant is in possession of either a resident or non-resident license.

A MIXED BAG.

[By F. J. Campbell.]

"Godfrey, more better you come look my country. Plenty duck, and alligator, full up. No good little bit small cartridge; you bring big mob cartridge." This remark had been made so often to me by black boys at Darwin, in Australia, that at last I decided to try a trip down the coast in search of sport; so I picked a crew of four boys and gave instructions that my boat, an 18-foot dinghy, originally known as "Eudulpa," was to have water on board and sail up at daylight next day. Flour, tobacco and other articles were sent down over night.

About 4 next morning I got imperative summons to go to the beach; so, laden with rifles, gun, camera, blankets and a large supply of cartridges, we struggled on to the boat. The picked crew of four boys had increased to seven, including three lubras. Two dogs also found crouching room somewhere, and, for all I know, there may possibly have been other stowaways. Daylight came, with a fair wind, and we started off. At 4 in the afternoon we reached and landed on Quail Island, thirty miles west of Darwin. I felt hungry, and as soon as the boat was drawn up on the beach two boys, Thebach-a and Barra-murram, went off to spear fish. This is done by walking in a couple of feet of water, and, assisted by a spear and wonderful eyesight, the black fellow gives few chances to any fish within reach.

In a few minutes we had ample fish for supper. They, of course, had to be cooked "black" fashion. A fire is made and plenty of ashes produced; the fish as he comes from the water is simply covered with ashes and baked. The result is delicious. As the shady trees were cool and "every prospect pleasing," we lay down and rested for an hour or so, listening to nigger legends and tales of auld lang syne told by Barra-murram, who is a noted raconteur.

About sundown I was half asleep, but woke into activity on hearing the words: "Big fellow turtle come up; him put him egg; you look see."

A turtle weighing about 200 pounds was crawling laboriously up the sandy beach, where, after scratching a hole in the sand, it deposited its eggs, and then crawled back into the sea. The boys wanted to kill it, but I said "No," and saved it. The eggs, 68 in number, were eaten in a very short time.

That evening, three canoes, carrying a total of thirty-five blacks—men, women and children—came to the beach. All knew me, and testified their gratitude and loyalty by giving a "singsong" that kept me awake till the small hours of the morning. I was, according to their custom, mulcted for about half a pound of "trade" tobacco for this ceremony.

At daylight, coffee and fish fresh from the water were partaken of, and we were off again before sunrise upon another cruise of twenty miles to "my country—By-allee." At this favored spot there was a big crowd of blacks on the beach, but long before the boat was in a yell from my crew of "Booja-walla kowa" (Godfrey has come) insured a welcome for me. The boat was simply turned over and carried high and dry along the beach, the stores packed and a mosquito net rigged ready for me. My rifles were very critically inspected, and, incidentally, a gun and two cartirdges were borrowed to "ketch him duck." Eleven duck came in on this account, and Barra-murram said in effect that the "gun person couldn't shoot much anyhow"; so he got a Martini-Henry rifle and two cartridges, and, summoning his lubras, Bendima and Garrighi, started out to vindicate his reputation. One kangaroo and one buffalo brought his tally above that of the "gun person," so he was satisfied, and many stomachs were repleted that night as a result of his efforts.

Buffalo are not plentiful here, and his success was simply due to luck. He always tops the score somehow. Ducks, geese and other water game were present in thousands, but we soon got tired of blazing away at them, and decided to go to Alligator Creek, known as Ban-a-gia, a few miles further on. Followed by a retinue of about 100 sable retainers, I walked along the beach. On the way we collected upwords of 500 turtle eggs, about 20 big crabs, several snakes, kangaroos, turkeys and a lot of fish. After a seven-mile walk we reached Jerribull beach and found the boat had been pulled up above the high-water mark and camp pitched. Bendima had taken charge of the culinary department, and had dampers cooking in the ashes, crabs roasting (until you eat roasted crab you don't know how luscious it is), and a big can gave off an unmistakable smell of duck stew.

Luncheon finished and the tide going out, eager youngsters kept trotting in with the information that "Creek full up wheela" (alligator), so rifles were oiled and carriers appointed. The most coveted job was to carry a rifle, but to be placed in charge of Godfrey's boots or even a couple of cartridges was an important appointment, and many hearts swelled with pride as a result. A walk of a mile brought us to the bank of a broad tidal creek with a strip of mangrove trees on each bank. I was then told to "put him cartridge and go quiet fellow." I had nothing to do but to walk as quietly as possible, as plenty of eager eyes were watching for "wheela." After five minutes of this there was a sudden stop from the leader, and, pointing in advance, he said: "You kill him head," and stepped out of the road.

About thirty yards in front there was a fine six-teen-foot alligator asleep on the edge of the mud-bank. His mouth was wide open, as if yawning, and his constant companion, a sort of black crane called "wag-gull," was perched close to his big yellow jaws. The bird is always in attendance, and acts as a sentry for the alligator; but he takes big risks from his mate. A rest for the rifle was taken, and a bullet driven in the side of our drowsy friend's neck. He could not run for a few seconds; his tail flew from side to side, pretty well touching his nose each time, but the strokes rapidly weakened. A chorus of yells followed the shot, and all hands rushed for the prey. A spear was thrown, almost entering the hole made by the bullet. It gave the finishing touch, and my first alligator was dead. His head was chopped off as a curio and sent back to the camp to be boiled and cleaned for preserving. I find that it is best to clean skulls by boiling the flesh off, and always carry a big copper for the purpose. About one hundred weight of the tail was also taken for food for the blacks. During the next two hours no less than eleven other "wheelas" gave up the ghost, which finished the day's work.

An amusing episode took place during the same morning. I wanted to take a photograph of a dead alligator, and told one of the boys, a lad named Harat, to go to the camp for my camera. He had started along the half-mile of beach at a run, but gradually eased off into a walk. I heard three rifle shots in quick succession, and inquired the reason, and was told stoically by one of my "crew" that "Marat go slow; Barra-murram wake him up along a rifle." I looked up and saw that Marat had started to run again, and did not take any further risks by loitering.

During the afternoon the boys brought in a dugong, two turtles, ducks and fish, snakes, opossums, emu eggs, and several kangaroo; so that there was no shortage of food for all present. The usual festivities took place Foot races and sports were held on the beach by the light of a full moon until about midnight, and then off to sleep till daylight At the first streak of dawn every one went for a swim on the beach. Men, women, "kids" and dogs all enjoyed themselves. Barra-murram sat calmly on a sandhill, nursing a rifle across his knee, and remarked: "Me look out, my boss, no more shark come up."

However, no shark disturbed our fun, and we got out to find that Bendima had "coffee royal" for me and two kerosene tins full of tea for the blacks. Breakfast consisted of fish, flesh and fowl, and then all hands got to work cleaning the skulls shot on the previous day.

Fifteen more skulls were added to the total that day, and the camp was shifted, for obvious reasons. Four of this tally were killed with spears after an exciting battle, in which the human combatants showed utter contempt of danger, and relied purely on their skill and personal activity. This contest took place at the head of a tidal cseek, the seceding waters of which had left a large swamp containing about two feet of water. Many alligators lie nalf submerged in mud and water, waiting for the next flood tide. Three hunters go in company, two being armed with spears, and the third carries several short logs of Pandanus palm about two feet long and six inches thick. An alligator is sighted in one of the smaller pools, and a trial spear is thrown at him, probably only slightly hurting him. At once he sinks to the bottom and is quite still. The hunters go into the water, one spearsman on each side and the "logman" in the enter, usually about six feet apart. The spearsmen carefully probe about with their ten-foot spears until they locate their qoarry. He is gently felt all over until his exact position is defined, and then the "logman" gets right in front of his head at a distance of about ten or fifteen feet. All but one log is dropped, and this is held by the ends in both hands above his head. At a signal the "wheela" is given a sharp prod with botb spears, and as quick as lightning the battle starts. He charges straight forward, with head out of water and mouth wide open, and goes straight for the center man. He seems to rely on getting the "logman" with his jaws, and on disabling the others with sweeps of his tail.

Tbere is no time for hesitation now on the part of our friend with the log. Quick as thought the timber is flung right into the gaping jaws, which as quickly close. The wood being soft and pulpy, the reptile is thus effectually gagged, and that end of him at least is harmless, although the tail is generally regarded as being the more dangerous, and there are still the powerful claws to be reckoned with. The "log person's" work is now done, and he doesn't walk or run away; he simply seems to fly out of the road. The men with the spears are on the alert, and as the head rises above the water each hurls a spear made of heavy wood, and (where obtainable) tipped with half-inch iron, into the "wheela's" ueck. If they are successful the battle is over, as the brute become paralyzed almost instantly, and quickly dies. On the other hand, if the spears miss, or do not cut deeply enough to kill, the fight goes on, the alligator rushing, doubling and swinging his tail left and right, any blow of it meaning broken legs at least—mud flying in showers, but the spearmen as cool as ever, watching every chance, missnig his rushes by a hair's breadth, springing to avoid the sweep of his tail, spears poised until the head gets into just the proper position for another thrust, and then they usually sit on the body of their late antagonist, and start singing an almost interminable song. Later the body will be dragged ashore, roasted and eaten, tbe tail and paws being an especial delicacy. On one occasion I saw a spearman, enraged at the loss of a favorite spear, whicb had been broken by the "wheela's" contortions, spring on to the reptile's back, and, clinging there, chop into its spine with his tomahawk. His legs were bady torn by the claws, and his chest was bruised and scratched on the alligator's rough back; but he was contented, and simply observed, "I bin give him hell."

Such are the attractions of sport in the Northern Territory. Buffalo shootiug is also to be had, but it is expensive and dangerous even to an expert. About five dollars per day each would cover tbe expenses of a party of, say, six persons, including food, boating, and other expenses, camping on shore every night, with unrivalley opportunities for securing good sport with gun, rifle and camera, and no danger whatever from hostile foes.

RECORD STRIPED BASS.

W. R. McFarland made a new coast striped bass record last Sunday afternoon when he landed a fish that weighed 36 pounds and measured 41½ inches in length. This big fish was caught with a No. 6 Wilson spoon in San Antone creek, just above "Fishermen's bend," while Mac was trolling from a boat. It took 25 minutes to land the fish after hooking it and several times the full length of 160 yards of 15 strand cuttyhunk line was run out from the reel when the fish ran and fought for its liberty. Mac used a silk wrapped and reinforced steel rod.

Following the pleasing news of this great capture, the report comes reliably from C. L. Peterson that an angler fishing from one of the wharves near the Selby Smelting Works hooked and landed a 47 pound striped bass, fishing with a clam baited hook.

Anglers fishing for striped bass at the Rodeo wharf have caught quite a number of fish, the largest weighing 6 or 7 pounds.

Many salt water anglers have been on the qui vive for news of the appearance of the bass at various resorts, for, it is claimed, a run of bass is due about this time of the year, if past records are any criterion to go by.

It will interest the striped bass fishermen to know that the State Fish Commission contemplates establishing a hatchery on the Napa river just above Vallejo. The Commission is gathering data and if it is found necessary that it is needed the hatchery will be established.

The United States Fish Commission announces that within a few years one of the gamest and showiest species of the fish kingdom probably will be caught out of a thousand streams in all parts of the country where it now is to be found in but one and that a remote brook. This rare fish has been named the Roosevelt golden trout (salmo-Roosvelto evermann) because of President Roosevelt's effort to preserve it from threatened extermination.

The Roosevelt golden trout at present is the product solely of Volcano creek, a turbulent water course of 15 miles in length on the slopes of Mount Whitney, Cal. Two years ago some of President Roosevelt's friends in California appealed to him to save from extermination this most beautiful fish. Until by Presidential proclamation Mount Whitney was made a Government forest reserve, anglers in large numbers visited the section and preyed upon the Roosevelt golden trout. Responding to the appeal in behalf of the fish, which subsequently was named for him, President Roosevelt took up the matter with the United States Fish Commission. After repeated efforts the Commission obtained a number of the trout which were sent to the fish cultural stations at Bozeman, Mont., and Leadville, Colo., for propagation. Encouraging news has been received from these stations to the effect that a sufficient quantity of eggs has been obtained for hatching the stock through streams in different parts of the country.

A. E. Doney took 20,000 young trout from the Sisson hatchery recently and departed for Red Bluff, where the fish were distributed in the headwaters of Cottonwood creek, 25 miles west of Red Bluff, and the streams about Big Meadows, 40 miles east of Red Bluff. The applicants for the fish were William E. Gerber, of Sacramento, and Dr. J. A. Owen, of Red Bluff. Mr. Gerber's shipment consisting of 6,000 Rainbow and 6,000 Eastern Brook trout whicn were placed in Big Meadows. Dr. Owen's shipment consisted of 8,000 Rainbow trout and were placed in Cottonwood creek.

The first installation of a total of 180,000 young trout fry was received last week from the Lake Tahoe fish hatchery and transplanted in Donner lake under the auspices of tbe Truckee River Game and Fish Protective Association. The new fish car was expected at Truckee this week with a consignment of several different varieties of trout for the Truckee river.

Salmon trolling continues to be comparatively good outside the heads, off Bolinas bay and Tennessee cove Inside quite a few good sized and fine conditioned fish have been caught off Belvedere Point and in the "straits."

Over 100,000 trout fry have been placed in Chico creek, Butte creek and the west branch of the Feather river.

DOINGS IN DOGDOM.

The San Mateo Kennel Club's fourth Admission Day show will take place next Wednesday, the 9th inst., at the Crossways Polo Grounds near Burlingame.

The number of dogs by breeds totals 250 as follows: St. Bernards 2, Great Danes 5, Russian Wolfhounds 3, Deerhouuds 1, Greyhounds 3, American Foxhounds 2, Pointers 9, English Setters 9, Irish Setters 6, Gordon Setters 1, Irish Water Spaniels 8, Field Spaniels 4, Cocker Spaniels 40, Dachshundes 12, Collies 15, Poodles 6, Dalmatians 1, Bulldogs 20, Airedales 14, Bull Terriers 30, French Bulldogs 10, Boston Terriers 27, Smooth Fox Terriers 41, Wire Fox Terriers 22, Irish Terriers 7, Pomeranians 8, English Toy Spaniels 12, Japanese Spaniels 2, Englisb Pugs 1, Toy Poodles 5, Yorkshire Terriers 6, Maltese Terriers 2, Chihuahuas 5, Griffons 2, Black and Tan 4, Italian Greyhounds 2, Miscellaueous 3.

This total will be increased hy mail entries. The number of entries in the classes will run up, approximately to 350 or morc. The above entries do not include a number of dogs in for exhibition only. In 1904 the uumber of dogs was 235, 1905 248 and last year 315.

The list of judges is the following: Mrs. William C. Ralston, Oakland, Cal. Cocker Spaniels. Mrs. Philip Wand, San Francisco, Cal., Dachshunde. Mr. Charles K. Harley, San Francisco. Fox Terriers, Mr. James J. Sweeney, Colma, Cal., Greyhounds. Mr. C. R. Harker, San Jose, Cal., Bulldogs. Mr. G. S. Haliwell, Millbrae, Cal., All Toy Breeds. Mr. Frank F. Dole, New Haven, Conn., All other breeds.

Ed. Attridge has had charge of the office and will act as superintendent. Needless to say there will be a large attendance and the show will be a successful one.

The Ladies' Kennel Association show will be held at Idora Park, Oakland, September 25th and 26th. Entries close on the 12th iust.

The judges announced for the show are the following: J. F. Mahoney of San Francisco, St. Bernards, Mastiffs, Italian Greyhounds and Newfoundlands; Mrs. C. G. Saxe of San Francisco, Great Danes. Geo. Cranfield of Yountville, English and American Foxhounds, Dachshundes, Airedales and Borzois. Thomas J. Blight o fSan Francisco, Pointers, English, Irisb and Gordon Setters, Field Spaniels, Irish Water Spaniels and Chesapeake Bay Dogs. J. Hervey Jones of San Francisco, Cocker Spaniels, W. E. Chute of San Francisco, Collies. G. S. Halliwell of Millbrae, Bull Terriers. Chas. K. Harley of San Francisco, Welsh, Irish and Fox Terriers. Miss Gertrude Blaine, French Bull Dogs and Boston Terriers. J. Bradsham all other breeds.

The Santa Clara Valley Poultry and Pet Stock Association will have a bench show in conjunction with tne other exhibits in San Jose, Cal., November 11th to 14th inclusive.

Mr. Charles Reid Thorburn has recently had built an elaborate and up-to-date establisbment for the Bull Terriers of Stiletto Kennels in Portland, Ore. Mr. Thorburn is looking forward with sanguine expectation of breeding some puppies above the ordinary. The few Bull Terriers he has disposed of to Eastern fanciers have done some winning in good company. There is now both inquiry and demand for dogs of the Stiletto prefix.

A recent photo of Ch. Meg Merrilies II and Master Donaldson Bride Thorburn depicts a pretty, sturdy haby boy sitting on the lawn with Meg alongside on the alert, either for fun or defence. Meg seems to be in her usual grand condition. By the way, tbose $500 wagers we hear of would be sttled by Meg, if she is anything like her old self, without a particularly hard race.

The Spokane Kennel Club dates are October 6th to 9th inclusive and the show will come off as an annex of the Interstate Fair. Thomas S. Griffith, owner of the Glen Tana Kennels, A. W. Jackson, Chase Kline and W. D. Vincent are working energetically for a record show for Spokane.

James Cole, of Kansas City, well known to and popular witb Coast fanciers will judge all breeds.

From Vancouver, Victoria, Butte, Seattle, Portland and California points Mr. Griffith says that entries have been coming in. He bas hopes of their being upward of 250 or 300 dogs entered.

Handsome silver cups have been contrihuted from over 30 business men of the city, and Mr. Griffith is after a few more cups.

Mr. Griffith is looking forward to the Spokane show with particular interest as he hopes to see his best dog, Glen Tana Squire, made a full-fledged champion under the rules of the American Kennel Club. Glentana Squire now has nine points towards his championship.

A feature of the Snohomish county fair will be a bench show. Entries closed August 25th with over 150 dogs entered.

A report of the Del Monte Show and list of awards will appear next week.

Drink Jackson's Napa Soda

SAN FRANCISCO FLY CASTING CLUB.

The Saturday contests billed for August 29th failed to draw enough rod wielders to make a quorum. T. C. Kierulff, C. G. Young and J. B. Kenniff only being present. In consequence the regular events were postponed and practice casting was indulged in.

On Sunday the regular program barely escaped postponement, there being hut five fly-casters present. The scores for the day follow:

Sunday Contest, Class Series No. 9, Stow Lake, August 30, 1908. Judges: Messrs. T. C. Kierulff, J. B. Kenniff, Geo. H. Foulkes. Clerk, E. O. Ritter. Wind, moderate. Weatber, tair.

	1	2	3		4	
			a	b	c	
J. B. Kenniff	118	99	98.11	99	98.52	98.4
Dr. W. E. Brooks	....	98.6	98.3	97.5	97.46	93.7
C. G. Young	90	98	98.10	98	98.20	97.8
T. C. Kierulff	100	99	98.1	97.5	97.42	96.2
James Watt	....	97	96.11	96.10	96.42	95.6
Geo. H. Foulks	100	97.10	98.4	96.10	97.28	81.7
Re-entry—						
Geo. H. Foulks	....	97.10	98.9	96.5	97.28	66
C. G. Young	85	98.13	98.14	98.10	98.48	95.9

NOTE: Event 1—Distance casting, feet. Event 2—Accuracy, percentage. Event 3—Delicacy; (a) accuracy, percentage; (b) delicacy, percentage; (c) net percentage. Event 4—Lure casting percentage.

Fraction in lure, tenths; fraction in net delivery, sixtieths; fraction in all others, fifteenths.

TRADE NOTES.

New Du Pont Records.

The records made at the Dominion of Canada Trap-shooting Association's annual tournament, August 5th to 7th, held at Sherbrooke, Quehec, are very pleasing to the Du Pont Company. High average for the entire tournament was won by H. H. Stevens and high amateur average was won by George Beattie of Hamilton, Ont., both of whom used Du Pont Smokeless. Mr. W. H. Ewing, of Montreal, Canada, who won the Olympic individual championship in England, added two more honors to his name, winning the amateur championship of Canada with 49 out of 50, and the Grand Canadian handicap with 47 out of 50, and 24 out of 25 in the shoot-off. The two-man team championship of Canada was won by A. W. Westover of Sutton Junction, and Dr. Stockwell of Sherbrooke, with a score of 38 out of 40, both shooting "New Schultze."

Annie Oakley's Latest Record.

Annie Oakley, who with her husband has been a guest of Fred Stone at Amityville, L. I., is just out with a new record for high-power rifle shooting. She shot the new 25 Remington auto-loading rifle at brass discs thrown in the air and made a run of 1016 without a miss. The remarkable feature of this new record is that the arm was not a light .22, hut was a rifle suitable for deer shooting or any of the smaller big game. Mrs Butler has received many congratulations on this new exhibition of her old-time skill and accuracy, but to all has replied, that while the "woman behind the gun" had a great deal to do with it, the U. M. C. cartridges and the new Remington should come in for a good share of the credit.

At tbe recent Medford tournament, the three high averages were shot with Remington guns—first and third with "pumps" and second with a double barrel.

At the last Carnation Gun Club shoot every contestant used U. M.C. shells.

---

961 out of 1,000.

Few men, however expert and hardened they may be in work at the trap, would care to undertake the feat of shooting at 1,000 clay targets in one day, there being ouly oue or two instances on record where this has been done. The magnitude of Mrs. Ad. Topperwein's performauce will therefore be realized. In San Antonio, Texas, on July 17tb, shooting at 1,000 targets thrown from regular traps, 50 yards at unknown angles, 16 yards rise, she broke 961—over 96 per cent. Her longest run was 111, made in the middle of her exhibition. The time consumed was four hours and thirty-five minutes. How well she stood the strain of this grueling process is shown by the fact that she broke 96 out of the last 100 and the last 25 straight. This is truly remarkable, as to raise a 7½ pound gun to the shoulder 1,000 times in succession, besides receiving the recoil of the explosion calls for endurance and courage of the highest order; and Mrs. Topperwein declared after the performance that she would he ready to shoot again the next day. She used a Winchester repeating shotgun and Winchester factory loaded Leader shells, this being her favorite combination. It is doubtful if there is another woman living that could equal this performance, if indeed, shoot so many times in succession. Mrs. Topperwein is the wife of Mr. Adolph Topperwein of San Antonio, Texas, the world famous fancy and trick rifle shot, and since her dehut in the shooting world three or four years ago she has steadily risen, until today she is probahly the most expert lady shot in the world, either with rifle, revolver or shotgun; and she still uses exclusively, as at the first, Winchester guns and ammunition.

Winchester "Leader" shells bold all the Pacific Coast records, as well as all the world's records; therefore, if you wish to shoot the shells the champions shoot, insist upon being furnished with "Leader" or "Repeater" shells, when placing your orders for shotgun ammunition.

Peters Points.

Mr. Guy Ward, shooting Peters shells, won high professional and high general averages at Vicksburg, Miss., August 10th-12th. Score 486 out of 500. Mr. Ward had one run of 137 and on the last day broke 247 out of 250. Mr. H. D. Freeman was third professional, with 466 out of 500, also shooting Peters shells.

Mr. H. W. Cadwallader was second professional at Evansville, Ind., August 12th-13th, scoring 379 out of 400, with Peters shells.

Mr. L H. Reid won high professional and high general averages at Sturgis, Mich., July 29th 30th, breaking 383 out of 400, with a straight run of 153. Reid shot Peters shells. Mr. W. R. Chamberlain was higb amateur, also shooting Peters shells, scoring 369 out of 400.

At the Texas State sboot, July 28th-30th, Peters shells scored a very pronounced success. The following gentlemen all used this popular brand of amiuunition. H. S. Fowler, winner of the Individual State Championship medal, 49 out of 50 and 47 out of 50 in the shoot-off. Messrs. J. S. Day and H. S. Fowler scored 24 each in the two-man team race, tying with Dr B S. Russell and Mr. L. E. Ross, all four gentlemen shooting Peters shells. Messrs. Day and Fowler won in tbe shoot-off by breaking 47 out of 50. Mr. Wallace Miller was the only shooter who broke 25 straight in the team race. Mr. Robert Connerly was second amateur, with 447 out of 490. For tbe State Championship medal at donbles Messrs. Day aud Ross tied on 38 out of 50, both shooting Peters shells. In the shoot-off Mr. Day won with 20 out of 24.

At Pawnee, Okla., August 12th, 13th, Mr. Fred Bell won high professional average, scoring 385 out of 400. Mr. Ed. O'Brien second professional 383, and Mr. L. I. Wade third professional 377, all using Peters factory loaded shells.

Mr. F. U. Galloway of Grundy Center, Iowa, won high amateur average at Eagle Grove, Iowa, July 28, scoring 184 out of 200. Mr. E. Hinshaw of Okoboji, was second amateur, with 183, both using Peters shells.

Mr. Fred Rogers, representative of The Peters Cartridge Company, and, of course, shooting Peters factory loaded shells, won second professional average at Glasgow, Mo., July 28th-29th, breaking 364 out of 385.

At Union City, Tenn., July 29th-31st, Mr. H. D. Freeman won third professional average, 478 out of 500 Mr. Freeman broke 99 out of 100 on Preliminary day, 95 out of 100 on the first day of the shoot, 195 out of 200 on the second day, and made long runs of 87, 88 and 103, using Peters shells.

Wild Turkey.

When the Pilgrim Fathers discovered the wild turkey (Meleagris sylvestris) they introduced to the world the noblest game bird it had yet encountered, and subsequent centuries have produced nothing to justly reverse the decision. Greatly reduced in all its original range, and entirely lacking in the greater part of it, the turkey is still to be found in suitable places south of Pennsylvania. It is not rare about the District of Columbia, and within a few years a pair brought their brood of poults into the grounds of the National Zoological Park and reared them there.

There are four distinct types of wild turkey, the largest and darkest being the one found in Eastern America north of Florida. He may be known by the rich mahogany colored tips to the tail and its covert feathers. The Florida bird is very similar, while in the Southern Rockies, Merriams' turkey is distinguished by creamy buff tail tips. The Mexican turkey, the well-known progenitor of our domestic "bronze turkeys," has these parts uearly pure write.

The weight of an ordinary wild hen is from nine to thirteen pounds, while the cock will frequently double these figures, and there are authentic records of gobblers weighing over forty pounds! These are, of course, exceptions, and the hunter who lands a twenty-pound gobbler has a big aud beautiful prize.

The history of the turkey, as a domestic bird, is rather interesting, as there is current a general belief that the hird was introduced into this country from Turkey. This is, of course, absurd, as it is doubtful that the hirds have ever heen domesticated in Turkty.

Ahout 1520, turkeys, which had long heen in domestication in Mexico under the Montezumas, were introduced into the West Indies and thence to Europe —particularly in France and England. So that by about 1575 they were well known in Western Europe. It was the offspring of these Mexican birds which were later brought to America as domestic fowl, and which still resemble exactly their original progenitors. It is indeed possible that this accounts in large measure for the extreme sensitiveness of turkey chicks, as ancestral traits are ever particularly prominent iu the infancy of the individual. This heing true, it is easy to understand that the offspring of a race of birds accustomed through ages to the mild climate of the Mexican tablelands should he suhject to many ills and dangers when brought into existence in the wet and uncertain spring of our Northern States.

So wrote that eminent naturalist Louis Agassiz Fuertes and which is here given as an apt introduction to the announcement of the Ithaca Gun Company that there is now ready a beautiful hanger for distribution among the sportsmen of the United States and Dominion—and for that matter any sportsman wherever he may be when he peruses this offer. This hanger is a work of art showing a wild turkey gobler in full plumage and splendid coloring. Send to Ithaca, N. Y., enclosing postage, 10 cents, for a copy and mention this journal.

THE FARM

THE SUFFOLK HORSE.

The Suffolk, or what was at one time called the Suffolk Punch. Just where the word "punch" originated I am unable to learn. This breed is purely English, as no infusion of foreign blood can be found in their origin, and no breed of draft horses is as uniform in type and color as is the Suffolk. The eastern counties of England are their home, and particularly the county of Suffolk. The color is dark chestnut, with usually a star in the forehead, and occassionally a little white may be seen on the pasterns near the hoofs. There is no breed of horses in existence that can be so easily matched as the Suffolks, so uniform are they in size, color and disposition; and I might say, also, that no breed is increasing in popularity in the United States as are the Suffolks.

Americans, as a rule, love two things in a draft horse. The first is, they like their teams well matched more than any other people, and they like clean limbs. I might add that chestnut color in a horse is like a black silk dress on a lady —always in fashion. The temper of the Suffolk is as uniform as the color. They are always docile. In their native land they are taught to do ordinary farm work, and are driven in tandem teams of two or three on the road without reins, so tractable are they and easily taught. I predict for them a greater popularity in this country, especially in the Atlantic seaboard States, than they have as yet had in any part of the world. In size they rarely exceed sixteen hands, and rarely weigh to exceed 1600 pounds in fair working flesh. The body is long for its height, and has great depth giving them good lung power and good digestion. It was likely the form of body that gave them the name of Suffolk Punch, "punch" being the short of "paunch." They have broad foreheads, yet rarely a dishing forehead which gives them plenty of room for brains. In some cases their hocks are rather small and do not seem well supported, and their feet are some times a little flat. These are the weak points which need guarding against in breeding them in this country.

The first importation made to the United States was by the Powell brothers, of Springboro, Penn., in 1880. In 1888 Galbraith Bros. of Wisconsin, made the first considerable importation of this breed of horses; also Peter Hopley of Iowa made importations of mares, if I am correctly informed. This same man —Hopley— made an exhibition of Suffolks at the Columbian exhibition at Chicago in 1893. This brought the breed into popularity more than anything that had previously been done in this country. In 1880 A. B. Allen, an eminent writer on livestock, says of them: "The reason why the Suffolks have not long since been imported and bred more extensively in this country is the fact that many of the breed have too small legs in proportion to the size and weight of the bodies." The same writer also says their feet are bad, being inclined to fatness, and the hoofs generally shelly. He further says: "I personally examined this breed in England in 1841, and finding them so deficient in feet and legs, made up my mind not to recommend their importation to this country."

All this may have been true in Mr. Allen's day, but certainly a great change took place between 1841 and forty years later, when Prof. Robert Wallace of Scotland, a noted writer on animal breeding, wrote of them that at one time they were flatfooted and likely to become lame if worked on hard or flinty roads; but care in breeding has been bestowed upon them, and that objectionable feature has been eliminated, and the quality and action now rank well. Prof. Wallace, being a Scot, would not admit that their action was quite equal to that of a Clyde, in which, of course, a Suffolk or Essex county Englishman would differ from him. The weights of the breed are quoted at a higher figure by Prof. Wallace than I have given them. This, perhaps, is owing to two things: The fact is, I don't think the larger ones have been brought to this country, and again, the weigbing is usually done in England —as in parts of the middle west—after the animals have been made hog fat, which, I am sorry to say, is being practiced by far too many breeders in this country to insure sure breeders. I don't mean breeders of Suffolks, but breeders of all classes of draft horses. When the people learn not to demand overfat horses and breeders learn to break every stallion to harness and work him when not in the stud, we shall have a much better class of horses than now.

This thought brings me to the important part of my subject. Fecundity and longevity are the predominating factors in the Suffolk as a breed more than in other draft breeds. One stallion, Julian Boxer, was traveled on the road for twenty-five seasons, and was a sure getter when 30 years old, it is said. The Suffolk stud book was established in 1879 in England, and a volume was published in 1880. Up to 1905 fourteen volumes had been published. The American association has been formed, but no volume as yet has appeared.

By some writers it is claimed the Suffolk is a crossbred breed, yet the same writers admit the crossing was done as early as 1700; and two centuries and over have passed since the Norman horse was brought to County Suffolk, and no claims to crossing are put forth later than 1768, when a horse was owned by Mr. Crisp of Ufford, in Sussex, to which all registration traces back. According to Professor Plumb, who made a special investigation, the foreign blood that was used was a Lincolnshire trotting horse, known as Blake's Farmer, in 1768. The Suffolks bred from this horse were known as the Blake strain of Suffolks. Another strain was quite popular as early as 1800, and remained popular for upward of eighty years. This was known as the Wright strain, and originated from a Lincolnshire trotter known as Wright's Farmer's Glory. He was a pure chestnut in color and clean limbed, and was said to be himself not less than a half blood Suffolk. Also, previous to 1846 there existed a strain of Suffolks known as the shading field strain. In this it was said a chestnut thoroughbred was used.

I speak of these that the reader who has been told that the Suffolk horse is a cross breed may judge for himself as to whether he is not as purely bred as any other breed. A century of line breeding is long enough to fix a type, and, as I study breeds, I can find none that is more true to type than are the Suffolks, and I predict for them a great degree of popularity, especially in the East, where the more massive, hairy-legged horse is not as much in demand as the clean-limbed animal.—C. D. Smead, V. S.

A practical farmer says that his cows produce more milk when provided with warm water during cold weather, the principal cause in shrinkage of milk being that ice cold water interferes with the digestion of food, whereas warm water promotes it.

STUD BOOKS FOR SALE.

The first four volumes of Bruce's American Stud Book, elegantly bound in Morocco, will be sold cheap for cash or exchanged for later volumes.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to
S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address
S. H. HOY, Winters, Cal.

HIGH-CLASS MARE FOR SALE.

Belle McKinney, record 2:25, trial 2:16, by McKinney 2:11¼; dam Mission Belle by St. Nicholas, second dam by Capt. Webster. St. Nicholas is by Sidney, sire of Memo, sire of the dam of Charley D. 2:06¼, the phenomenal pacer of 1908. This mare is 8 years old, a handsome bay, no marks, pure gaited trotter, and sound, and if you want a good one, come and bring your watch. Time her for yourself. This mare was worked three or four months by Mr. C. Whitehead, to whom I am pleased to refer as he will answer your questions.
In addition to this great mare I have over 20 head and among them I am confident you can find one that will answer your purpose both as to quality and price. Apply to or address,
JOHN ROWEN,
1347 E. South St., Stockton, Cal.

FOR SALE.

Beautiful bay pacing mare by Charles Derby; young, city broke and lady broke, with plenty of speed, size and style. Call at northwest corner Seminary Ave. and Orion Streets, Melrose.
Address, R. F. D. No. 1, Box 233 A, Fruitvale, Cal.

WANTED.

A thoroughly experienced young man wishes a position as instructor at a riding academy, or with stock farm breaking and fitting polo ponies.
Address, W. C., care of Breeder and Sportsman.

MONTEREY 2:09¼

and his son **YOSEMITE (tr.) 2:16 1-4**

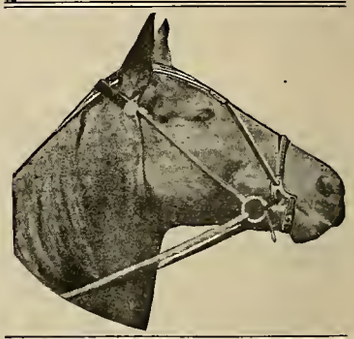
Ellis' Improved Hutton Patent Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.



Patented August 11, 1896. Patent No. 565,681.

Guaranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**
Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

N. B.—Our Illustrated Catalogue No. 42, containing cuts and descriptions of everything used on the horse (many new goods) will be mailed free to any address upon application. Write for one at once, addressing Dept. "C."

A POST HOLE DIGGER.

Selma, Aug. 25.—Post holes to give away is the latest attraction that a Selma man will have to offer at the State Fair, soon to be held in Sacramento. C. L. Beltz is the generous man who will give post holes to any farmer who will bring his ranch to the fair.

The cause of the generosity is the fact that Mr. Beltz is going to exhibit and demonstrate a machine which he has invented for the purpose of digging post holes. The American Earth Boring Machine, as it is styled by Mr. Beltz, is of particular interest, being alone in its class. The records of the Patent Office, when Mr. Beltz applied for his patent, showed that no patent for a post hole digging machine of any description had ever been asked for before, thus leaving to the designer considerable distinction for complete originality.

The digging mechanism is very simple in construction and driven by a small gasoline engine is mounted on a truck drawn by two horses. Two men are required in its operation, the driver who operates the engine, and another who controls the auger, which drops from the rear of the truck.

The boring apparatus is controlled by two levers; the shifting of one starting the auger forward and down into the ground, while the other lever reverses the motion of the auger and lifts it from the hole. The auger is specially designed so that it removes the earth from the hole, and is also Mr. Beltz's idea.

With the machine twenty-two post holes eight feet apart were completed in sixteen minutes.

The inventor was first impressed with the need of such a machine when he took a contract with the Western Pacific to furnish and erect over forty miles of fence. A machine was then designed by him, and it has been in constant use, proving its efficiency in various soils and under different conditions. The new model is more compact than the original, and reduced to complete simplicity of working parts.

It will doubtless be a big attraction at the fair and readily win honors for the inventor.

THE DAIRYMEN'S PROGRAM.

Under the direct supervision of Chief Ed. H. Webster of the Dairy Division, there will be held a dairymen's convention at the third annual National Dairy Show, which takes place in Chicago at the Coliseum, December 2 to 10, inclusive. It is the purpose of this convention to deal with subjects of national importance, and the program will be filled with men who will be eminently capable of dealing with subjects of the highest interests to dairy farmers.

No dairyman who can possibly leave his work can afford to miss this convention or miss seeing the large exhibit of dairy machinery and cattle which will be on exhibition at that time. The show comes at a season when the farmers have completed their year's work, and they should make it a point to take a few days for recreation and enjoyment. Not only will they find a trip to the Dairy Show a pleasant one, but it will be the means of giving them an understanding of the scope and magnitude of the dairy industry as well as a source of much useful information.

This season has produced one of the heaviest peach crops ever known in Yuba county in the vicinity of Yuba City and Marysville. Tons and tons more peaches could be handled and canned at Yuba City if not for the shortage of help.

THE RIGHT SORT OF A BARNYARD.

"The Milbrae Dairy" in San Mateo county, California, says the Pacific Dairy Review, "spent close to $8,000 in paving their cow corral, which practically speaking is a barnyard as understood in more northern climates." A dry, hard yard is one of the most important adjuncts to a dairy farm. No material that we have found for this purpose is as effective, cheap and easily applied, as soft coal cinders, particularly those from locomotive engines.

Apricot pits are bringing as high as $10 to $18 per ton this season.

WANTED.

A young man from New York wishes a position as manager of a gentleman's stable or ranch. Has had years of experience in fitting all kinds of horses for the market and show ring purposes. While disengaged would give private lessons in riding and driving four in hand and tandem. Address, "Professional," care of Breeder and Sportsman.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using **Quinn's Ointment** for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give **Quinn's Ointment** a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequaled. **Price $1 per bottle** at all druggists or sent by mail. Send for circulars, testimonials, &c.

W. B. Eddy & Co., Whitehall, N. Y.

The heaviest timothy and clover crops that have been harvested for years have been harvested this season by the farmers located around Weed, Siskiyou county.

It is said that the ditches and laterals of the Feather River Canal Company in the vicinity of Biggs and Gridley, Butte county, will permit of water being put on lands twenty-one feet higher than any other of the systems known, so as to water over 200,000 acres of non-irrigable lands.

They have commenced to shear sheep in the vicinity of Biggs, Butte county, and the crop of wool is turning out very satisfactory. There are a great many sheep ranged near Biggs which prove very profitable to their owners, both for the market and their wool crop. The sheep business is continually growing in Butte county which goes to show that the farmer considers sheep a good investment.

Alfalfa should he cut every time as soon as the buds for the next growth are fairly well started. It is a mistake also to let alfalfa grow too long before harvesting. When this is done the crop gets coarse and the cattle do not like it. Many men who have not cut alfalfa at the right time, have become disgusted with it as a crop, when, had they cut it at the right time, they would have been delighted with it.

This has been a great season in California for the production of all varieties of fruits. Commencing early in the spring with an abundance of all kinds of berries and cherries and continuing to yield heavily of all fruits in their season, making it a banner year for California. If we will but remember we had warm mild weather early in the spring which brought out the buds and blossoms. Then followed a long dry spell through March and April without hardly any rains to speak of. This, along with no cold snaps, prevented the blossoms from becoming drenched and rotted, and consequently gave to California a larger fruit yield than many anticipated. While the farmer was complaining in the spring of drough, the fruit grower is rejoicing in the summer and fall and is heard to say—fruit!

Joseph E. Wing, the noted sheep authority, gives in the Breeders' Gazette the following description of how the flock on his own farm is being handled the present season: The next thing worth mentioning is the new diet of tobacco that each ewe and suckling lamb on the farm is enjoying. Tobacco is the new preventive of all intestinal worms in sleep. We have told of its use before, and now a word about the application of it. We did not find it easy to get tobacco, but finally bought some damaged stuff, leaves, from a grower. It cost us about 6 cents per pound. It can be bought more cheaply of cigar manufacturers, in powdered form. Our tobacco is in the natural leaf. We simply put it in boxes and sprinkle it very liberally with salt. How the lambs and their mothers enjoy eating it! They eat a lot of it, too. The lambs thrive. We hope it may be the long sought panacea for parasites in sheep; at all events we will give it a thorough test. We propose to feed them all that they desire through the whole season. We are now wondering whether the nicotine may stunt the lambs, as cigarettes will stunt boys who smoke them. We think not, since sheep can eat a thousand weeds and poisonous plants that men cannot touch.

SHORT-HORN SALE

at Woodland, Cal., Saturday, Sept. 12

We will offer the entire Enterprise Herd, including the herd bulls and show cattle of last season. We do not besitate to say that this is the best bred and best individual collection ever assigned to public sale on the Coast.

36——BULLS——36

They are the kind and type the farmers and rangemen are looking for. They are Eastern bulls thoroughly acclimated, of serviceable age, large, strong, and thrifty. This lot was personally selected by Mr. Dunlap from prominent breeders in the East, this being his eighteenth shipment. They have been fed no grain since reaching this coast, simply good pasture and alfalfa hay and will be presented in the best possible condition for future use. This is undoubtedly the best lot of range bulls ever offered on the Coast.

Sale to be held on the Enterprise Stock Farm, 4 miles south of Woodland. Busses will meet all trains at Woodland and lunch will be served on the farm. Sale to begin at 12:30 p. m. All are cordially invited to attend. Write for descriptive catalogue mentioning this paper. Catalogues ready Aug. 20th.

Auctioneer, H. P. EAKLE, Jr.
G. P. Bellows, Maryville, Mo. R. M. DUNLAP.

T. B. Gibson, Woodland, Cal., will sell the preceding day, Sept. 11th. Parties wishing can attend both sales.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownership and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; within easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

A. H. Eubank, Pres. J. S. Edson, Vice-Pres.
W. B. Stratford, Sec. and Treas.
THE FARMERS' ASSOCIATION COTTON WAREHOUSE, No. 1.

Montgomery, Alabama, July 21, 1908.

While you have not solicited a testimonial from me, yet in justice to your preparation "Save-the-Horse" I take pleasure in advising you that it has cured my horse of a bone spavin that did not yield to any other treatment, although one of the best veterinarians had him in charge for 30 days, during which time he was fired for the complaint, but still remained lame.

After a few treatments with your preparation the animal showed signs of improvement, and at this time no signs of the trouble ever appear.

W. B. STRATFORD.

M. Yeazel A. V. Smith
FARMERS' MERCANTILE CO.

Madison, Neb., July 21, 1908.

The horse Nabisco that had such a bad tendon, and bog spavin is as sound as a dollar. Won his first race July 4, and will start next Thursday in 2:27 class in Columbus, Neb.; also entered in stake races at Lincoln, Neb., State Fair, $1000.

Respectfully, A. V. SMITH.

Celina, Ohio, July 28, 1908.

About May 1st I purchased from W. F. Schunck, druggist, a bottle of "Save-the-Horse" for Ithuriel King 2:25¼ for strained tendon. I am glad to say that he has gone sound since using the remedy, and has reduced his record from 2:25½ to 2:18¾, trotting.

CHARLEY W. HOLE.

Makes a tendon like a rod of steel

"Save-the-Horse" permanently cures bone and bog spavin, ringbone (except low ringbone), curb, thoroughpin, splint, shoe boil, windpuff, injured tendons, and all lameness, without scar or loss of hair. Horse may work as usual.

$5 Per bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for copy and booklet.

BUDD DOBLE, the dean of American reinsmen, arrived at his home in San Jose early this week on his return from Boston, where he had been called by the officers of the New England Trotting Horse Breeders' Association to act as one of the handicappers for the great race known as the American Trotting Derby, which was decided at the Readville track August 25th, a full account of which has already appeared in these columns. Mr. Doble was one of the first to endorse the plan of this great race. During the latter part of April this year, soon after the big handicap was announced, the great reinsman was in the office of this journal and expressed the opinion that the race would be a success, as the following item printed in these columns May 2d, will show:

"Budd Doble has read the conditions of Readville's $50,000 handicap trot and says this race should get the biggest list of entries of any big purse ever opened. He believes it will do more for the good of trotting racing than anything yet devised in America, and looks for it to be a great success and become one of the big fixed exents of future years. When a trotter has the opportunity annually to win a fortune for its owner in one race, in which it can be entered regardless of any record it may have, Mr. Doble says the good days of the business will again have arrived."

And now, after being one of about thirty thousand persons who witnessed the race last month, Mr. Doble returns more enthusiastic than ever over the plan under which it was brought to such a successful issue, and is ready to predict that handicapping will soon be in vogue on every first class trotting track in the country. While modestly denying that he or his fellow handicappers, Messrs. Linneman and Hicks, deserve more than ordinary credit for their work in placing the starters in this race, Mr. Doble says that the contest itself was one of the grandest spectacles he ever witnessed. The feature of the race which stood out most prominently to this veteran of the trotting turf was the marked difference in the start and finish as compared with the usual race where all score down for the word as near in line as possible. "In the ordinary race," said Mr. Doble, "the horses go away well bunched together, and gradually draw further apart, a few finishing in close proximity to the winner, but the majority, especially if the field be a large one, string out with distances between them that seem to constantly increase as the wire is approached by the leader. In the handicap, however, the scene was just reversed. They were all strung out at the start, but continued to get closer together until, when the head of the stretch was reached, it was almost impossible to tell which of fifteen or sixteen horses was in the lead." In other words instead of starting in a group and finishing in a long drawn line, they started in a line and finished in a group. One of the most striking pictures of the race that has been published was taken by the photographer for the Boston Herald and has been reproduced in several of the eastern turf papers. This picture exemplifies the point which Mr. Doble has made and shows how closely together were the entire field of sixteen horses as they headed into the stretch after going a mile. It is a wonderfully convincing bit of testimony to the almost perfect manner in which the horses were handicapped. Mr. Doble states that when the three handicappers met they found that all the preliminaries had been prepared for them by Secretary Jewett, and that they only had to apply their own knowledge and judgment as to the abilities of the different horses to the conditions of the race as they were printed before entries closed. Cards were handed them containing each horse's name and record, and facts so far as known as to the horse's condition. There was not a horse on which third payment was made but something was known about his speed, his steadiness, his soundness and his condition. The handicappers worked from 10 a. m. until 8 p. m. on the day the handicap was made, and when the work was finally done they were unanimous in the opinion that it was as near fair to every horse entered as it could possibly be. The race itself is complete proof that the work was well done. Allen Winter, the winner, had been "covered up" by his owner and trainer better than any other horse entered, yet it was known that he had worked a mile better than 2:13 and had a very high rate of speed. He was placed on the 2:10 mark, and we doubt if any person would say that he was treated anything but fairly. Sweet Marie and Sonoma Girl were placed at the 2:05 mark. The conditions required that horses be placed at such points as the handicappers believed their speed entitled them. It was evidently unfair to place Sweet Marie back at the 2:02 mark as no one believed she could trot the distance she was compelled to go, at that rate of speed. But the 2:05 mark was considered fair, and Sonoma Girl, who went lame the day of the race and was drawn, but who was according to her fair owner perfectly fit the day of the handicap, was given the same handicap as Sweet Marie. P. W. Hodges' horse San Francisco, was placed at the 2:11 mark, and but for his sore foot would surely have won second prize of $10,000 as he was only beaten a nose for it. If the race were to be held over again it is not likely that the handicappers nor anyone else could place the horses so as to make a better race. It was a success financially as well as from a racing standpoint. The association made money on the race in spite of the fact that no betting was allowed. The very fact that the association has announced that it will repeat the race next year and also arrange a big handicap for pacers is proof enough of the success of the venture. Every Californian will be glad to know that this is so, and feel a pride that California contributed some of the brains and horses that helped toward the accomplishment of the splendid result.

A WONDERFUL PERFORMANCE was that of Washington McKinney when he trotted the track at the State Fair grouuds at Sacramento last week in 2:20. Here is a stallion twelve years old that has been in the stud for the past seven or eight years, high in flesh and with a bad ankle that has prevented his training ever since he was a colt, with no preparation outside of jogging and one repeat with both miles slower than 2:40, yet he goes onto a slow track, trots twenty feet from the pole during the entire mile and finishes with his ears pricked and game as a pebble with the mile in 2:20 flat. He is indeed a worthy son of his great sire, McKinney 2:11¼. But while this wonderful display of speed brought forth cheers from the six thousand persons who saw him display it, it was the stallion's beautiful form, glossy black coat and magnificent carriage that made the people stand up and look at him. It is the minority at any gathering who appreciate a contest against time, and but few have any idea of the natural speed, gameness and other requirements that a twelve-year-old untrained horse must possess to enable him to accomplish such a feat, but grace and beauty appeal to everyone especially if the animal having those qualities is of the equine tribe. Washington McKinney is undoubtedly one of the most strikingly beautiful horses in America to-day. Whether in repose or in action he fills the eye of the artistic as well as of the practical horseman, and his performance on the track last week demonstrates that he possesses that other requirement, known as a high rate of trotting speed, which it has already been proven he has the power to transmit, and which will place him in the very near future well up toward the top of the list of California's greatest speed producing sires.

AMONG THE VISITORS to this office during the past week were two gentlemen from Los Angeles who had run up to see what San Francisco looks like since the big fire. One of these visitors was Mr. Byron Erkenbrecher, formerly president of the Los Angeles Driving Club, and still a lover of harness horses and breeder of a few good colts every year. Mr. Erkenbrecher has lately been honored by his party by being nominated as one of the Presidential Electors on the Republican ticket. Our other visitor from the south was Dr. A. C. Hemelbaugh, also a resident of Los Angeles and one of the most enthusiastic amateur reinsmen of that city. He is also a member of the driving club and is often seen at the matinees behind his handsome and fast mare Angie Duryea 2:17½, which he has driven many miles faster than her record. Both these gentlemen were surprised at the progress in building which has been made in San Francisco during the past two years, but like all true Angelenos expressed the opinion that Heaven is the only place that has anything on the southern metropolis in the way of climate, pavements, buildings or society.

KATALINA 2:15¼ SOLD.

During State Fair week Mr. J. W. Zibbell of Fresno, sold to Messrs. L. B. Daniels and W. J. Miller of Chico, the good three-year-old filly Katalina 2:15¼, by Tom Smith 2:13¼, dam Kate Lumry by Shadeland Onward. While the price is private it was a good long one, and one that is highly satisfactory to Mr. Zibbell who bred, trained and drove Katalina to her record.

As a two-year-old Katalina won the two-year-old trotting division of the Breeders' Futurity at Santa Rosa in straight heats in 2:25½ and 2:22½. Two weeks later at Woodland she won the two-year-old stake in straight heats in 2:23¼ and 2:23½, and a week later at Sacramento at the State Fair won a two-year-old stake in the same fashion, and did not have to trot faster than 2:26. In her three starts as a two-year-old Katalina never lost a heat.

This year she made her first start as a three-year-old in the Breeders' Futurity. While this race was a fast one, the heats being in 2:15¾, 2:13¾, 2:14¼ and 2:15¾, she was a contender every heat, being a close second to the winner in the first three heats and a close third in the final, getting third money

Her next start was in the Occident Stake where after winning the first heat in 2:15¼ she was a very close second each heat thereafter to the winner Cleo Dillon.

Four days later Katalina won the Stanford Stake in straight heats, distancing her rival Cleo Dillon in the first heat.

Katalina is a bay filly and a well bred one. By a grandly bred son of McKinney 2:11¼, her dam is Kate Lumry 2:20½ by Shadeland Onward, sire of six in 2:10, second dam C. C. L. dam of two in the list, by Combat 1038, son of Hero of Thorndale, third dam Mignonette by Mario 1359, son of Sentinel 280, fourth dam Carmel by Duval's Mambrino, son of Mambrino Chief 11. She is the first of the get of Prof. E. P. Heald's stallion Tom Smith to be trained and raced, and is considered by all the horsemen who have seen her race this year, as a certain 2:10 trotter and one of the coming great race mares of California. She is not only possessed of a great flight of speed, but is game and a natural race trotter. We shall expect to hear of her getting a very low mark as a four-year-old if she is raced, and congratulate Messrs. Daniels and Miller on becoming the owners of such a fine animal.

Mr. C. A. Durfee has purchased from Mr. S. S. Stiles of Oakland, a half interest in the three-year-old filly Helen Stiles by Sidney Dillon, dam Silver Haw by Silver Bow. Mr. Durfee beat Helen Stiles in the Breeders' Futurity with the three-year-old Dr. Lecco but was so impressed with the showing made by the filly that he opened negotiations with Mr. Stiles for her, and the latter, not being willing to sell her outright, finally accepted Mr. Durfee's offer of $2,000 for a half interest in her. Helen Stiles developed a splint just before the circuit opened and started in the futurity as lame as a dog. She got no money, but was separately timed in the race in 2:14 and never lifted her head in any part of the race. "She is the best headed Sidney Dillon I ever saw," said Mr. Durfee the other day, and as she is good gaited and dead game, I think she should be worth a good deal as a race mare, and I think I have secured a bargain in getting to own half of her at the price." Mr. Durfee now has a couple of three-year-olds in his string, Dr. Lecco and Helen Stiles, that have no records but look to be equal to 2:10 or better as four-year-olds. He also has the stake winner of 1903 and 1904, Almaden 2:22¼ by Direct in his string, and the three make a trio of trotters that will doubtless be seen on the Grand Circuit next year with W. G. Durfee up behind them.

CLOSING DAYS OF STATE FAIR.

Large Crowds Fill the Grand Stand on Last Three Afternoons.

The California State Fair for 1908 closed Saturday last with a hig attendance and the books will probably show a good halance on the right side of the ledger. The attendance at the track was very light during the first four days of the fair, but on the last three days there were many persons passing through the gates and the racing was witnessed hy a crowded grandstand on Thursday, Friday and Saturday. There was some extra fine racing, and had the program heen condensed and all the good events put into not more than five afternoons the success would have been much greater.

The display of horses of other hreeds than standard, was very good and the parade of prize winners attracted much attention and favorahle comment.

The traek trotting and pacing reeords were lowered during the week, Berta Mac setting the trotting record at 2:09, and Charley D. the pacing record at 2:07¾. Both are by the great McKinney.

The exhibit of Arahian stallions and mares made by Mrs. Eleanor Gates-Tully was one of the most interesting features of the fair, and the Directors voted the lady a gold medal, which she certainly deserved.

Next year when the pavilion is erected within the fair grounds, the California State Fair should attain the position among the fairs of this coast which it is entitled to occupy.

Our report of the harness races in last week's issue ended with those of the fourtb day, Wednesday.

Fifth Day—Thursday.

The Stanford Stake came first on the card for Thursday, with five starters. Of these four, Katalina, Dr. Leceo, Cleo Dillon and Siesta had started in the Occident Stake, the Saturday previous. The other starter was Idolway. Wben they got the word the first time Zibbell rated Katalina all the way a length in front of Dr. Lecco, and finishing fast through the stretch beat the blaek colt home in 2:17. Cleo Dillon winner of the Occident, had made a hreak going down the hack stretch, and before she caught was out too far to save her distance. Siesta and Idolway hoth acted badly in this heat but came the last end of it fast enough to beat the flag.

Idolway was drawn leaving but three in the second heat. Katalina set the pace as before, just a length in front of Dr. Lecco. Halfway down the stretch Walker set the Lecco colt down in earnest and at the end was beaten so little that only the judges could determine. Siesta finished third on a fast run and was called third.

In the third heat Dr. Lecco was not himself at all for after following Katalina three-eights of a mile, went up in the air and after squaring away again for an eighth made another break and finished third. Katalina finished first in 2:19½ and another race stake had gone to the credit of this good filly.

The free-for-all pace next on the card furnished a good race to look at, as Moy, Pilot and Explosion were right together all the way and finished as above heads apart. The other starter, Silver Dick, belongs with this hunch and would have been one to reckon with but for a hreak that put him out of husiness, going around the first turn. The second heat with Silver Dick out, it was three of a kind all the way. Explosion lost her chance to win by a slight mistake going down the back stretch and was lucky to be so close at the finish; as it was they were again heads apart in 2:15½. Pilot and Explosion both made a break in the third heat and were not so close at the finish of tbis mile making it easy for Moy in 2:16.

Sixth Day—Friday.

The 2:20 pace set down as first for Friday, made a uice race. It was conceded before hand that Charley D. would win, hut he did not win way off hy himself. Solano Boy fit in handy tbe first heat, and was only beaten by half a lengtb in 2:07¾ while Josephine was only another half length away. The other two beat the flag very handy finishing close together. In the second heat tbey raced nearly all tbe way in a close hunch, just as they had finished in the first heat, but Rutherford allowed Josephine to swerve in the stretch and was placed last. Charley D. settled the argument in one, two, three order, no one being able to straighten him out, the only question was, how fast could he step. Solano Boy was second just as easily and the same could be said of Josephine for third money. Queen Derhy was not quite right and was drawn after the second heat.

A hunch of ordinary pacers raced second on the program under the name of roadsters. All hut one made a break going the first eight of the mile and at the finish Presto was in front by a length, the rest on a run. They were cheered by the big crowd in the grand stand until the enthusiasm for the 2:20 pacers sounded cheap. This was the way it looked. but when the truth came out it was found that "something" had heen substituted for Presto and raced without the judges knowing. This "ringer" was disqualified and Pike's Protection given the heat, while the big crowd seemed satisfied and kept in the best of humor.

"Frank C. set out like a "ten" pacer in the second heat and the others behind him had made their two breaks to the mile before they had reached the half, and the way they changed positions made one wonder what he bad been drinking. Chappo finally hit his stride, and under a "Geers" finish nosed out Frank C. in 2:25¼. This finish again hrought down the grandstand and prepared the cròwd for another field of "green goods" tbird on the card for the hest day of the meeting.

Everything hut Chappo made several "lopes" in the third heat, hut it was all over, Chappo had won hy a neck from Guy Prince in 2:25½, and the race was his.

In the third race seven horses scored several times for the word, making much dust. When they got the word Frank Silva took Flyaway on a run and never let him make a hreak until close to the wire where he set him trotting and finished at that way of going. He was placed last and this may be his last race. Headlight was next and was given the heat. John S. without the "Sir" was second and Black Beauty third. Jay Wbeeler was fourth with Billy Dobhs. The friends of George Vice presented him with a big horse shoe of roses for not falling off in the first heat, and bringing Billy George in fifth. After much trihulation John S. got through and won a heat and Headlight wound up in fifth position; this caused another struggle hut several remained to see it.

Black Beauty with her hopples strung tight for the occasion won this heat just as the sun went down and the race went over for one of the star attractions of Saturday.

Seventh Day—Saturday.

As promised, the road horses settled their race first on Saturday's card. The three heat winners made one more circuit of the track and Headlight was declared the winner.

The 2:20 trot next on the pregram brought out a well balanced field. A race such as they put up is a credit to any track, and very satisfactory. Emily W. won the first beat after a short tilt through the stretch with May T., and Wenja was a close third, in fact the entire field were close together in 2:13½.

They went away in a bunch the second heat and a slight jam at the three-quarter pole caused Emily W. and May T. to make a break. When they hit trotting it looked all over as far as either of tbem winning was concerned, but turning into the stretcb they hoth came around their field and finished, Emily W. first by a length from May T. Emily W. made another break going away the third heat but picked up her field as she pleased and won the heat and race.

In a special 2:12 trot Alsandra, Della Derhy and Richie Baron put up a good race. Della Derby wanted to trot on this occasion and carried Hayes' colt to a break in every heat. While Alsandra won the first two heats the other two were right at him, and the eratic black mare beat him rather handily the other three.

Mr. F. J. Kilpatrick's handsome black stallion, Washington McKinney, then made a trip against the watch to beat 2:30. The big horse looked too high in flash to even beat 2:30, but he did heat that mark just ten seconds and finished the mile at a whirlwind clip in 2:20 flat.

Siesta started to heat 2:23½ and won, lowering his mark to 2:22¼. But for an unfortunate break in the stretch the colt would have surely heat 2:20.

The last race for roadsters brought out ahout the best bunch of matinee performers in this part of the country. They were a bad acting lot on the score however, coming down for the word at all sorts of angles. Starter Stevens was speechless at the way they acted and could not say a word to help them. They were off at last to a good start, and it was a race at the finish between Lady Irene, Bonnie W. and The Judge. Lady Irene came from hehind and in a whipping finish beat The Judge in 2:15½. R. W. P. did not get going until close to the finish. Lady Irene won the second heat like a good race mare, stepping the mile in 2:14½. The Judge was lame and Heenan pulled him up.

BERT ARONDALE WON AT EVERETT.

George Ramage has been winning races up north with his Sidney Dillon gelding Bert Arondale, and this is the way his race at Everett, Washington, is described by the Tribune of that city:

It required the full five heats to settle the question of supremacy in the first race of the afternoon at the Fair grounds yesterday, the 2:40 trot. It was a great event.

In a field of five Bert Arondale, George Ramage's bay gelding, took the first two heats in easy style. Laura W. in those heats came in second as easily and it looked as though the race was all over hut the formality of going around again.

In the third heat Bert Arondale was 1 to 20 and the bookies were offering 4 to 1 that Laura W. would not wiu. It looked like the lead pipe and hardly anybody went against the book. Then tbe uncxpected transpired. Bert Arondale came home fourth and Laura W. took the money with Frisby second. In the fourth heat Arondale trailed in at the tail end with Laura W. again at the front and Ping Pong second.

Awful suspense for the spectators for Bert Arondale was the clear favorite, and when the fifth heat was run the crowd was on its toes. Then Bert Arondale proved that he had only been resting up for the finish. He came home first with the same ease he had won the first two heats. Laura W. hung onto his flank and got second money. It was superh going, especially in the first two heats, with the two leaders. Bert Arondale and Laura W., steady as clocks. They all got a bit messy in the third and fourth heats, but finished in grand style.

WASHINGTON McKINNEY AGAIN.

On Saturday last Washington McKinney trotted to a record of 2:20 on the Sacramento Fair Grounds track. Under the existing conditions and circumstances this must he considered a most wonderful performance. Mr. Sam Norris, his driver, took the middle of the track never going within 20 feet of the pole during the entire mile, thus forcing the great stallion to go over 125 feet more than a full mile. The track is acknowledged to be from 2 to 4 seconds "slow" under the most favorable conditions, and when it was announced that an attempt would he made to give Washington McKinney a standard record of 2:30 or better his most sanguine friends did not expect to see him heat 2:30 over a second or two although they knew the heautiful stallion had "2 minute" speed. He had not heen driven a mile faster than 2:44 in over 5 years, and his entire preparation for his attempt to ohtain a record, has heen jogging during his season in which he served 46 mares and 4 "repeats" during that time, in from 2:44 to 2:55. He was exhibited at the fair and won the hlue rihhon for standard trotting stallions. It was decided on Friday to "mark him" and his owner's instructions to Sam Norris were to go to the ½ in 1:13 or 1:14 and then let him "come home" as well as he could. When the word was given the stallion was moving like a piece of machinery and stepped to the ¼ in 35 seconds, the ½ in 1:09½, the ¾ in 1:45 and the mile in 2:20. Many watches caugbt him from ½ to ¾ of a second faster, but the timers made it 2:20 flat and there it stands. The "grand stand" greeted bis performance with most enthusiastic applanse as he walked back to the start, tired and dead lame on his weak off front ankle, but with his magnificent head and neck erect, bis ears pointed, and eyes flashing, as if he knew he had just done a wonderful thing. Mr. Durfee the former owner of his great sire McKinney, his face wreather in smiles, was one of tbe first to congratulate Mr. Kilpatrick, who for a few minutes held an impromptu reception.

Mr. Pounder, the owner and driver of Prince Lock, Wenja, Mae O. D. etc. who, with Mrs. Pounder, sat next to Mr. Kilpatrick during the trial, said he had never before seen as magnificent a trotter as Washington McKinney appeared in this effort and his opinion was reiterated by many others who were present. This performance gives to Lady Washington's credit her third 2:20 performer, viz, Geo. W. McKinney 2:14¼, El Molino 2:20 and Washington McKinney 2:20. At the Santa Rosa meeting Washington McKinney was credited with eight new standard performers in one day and now in taking a record himself, we think establishes a "new record" for we do not recall any other instance where a stallion put eight in the list and obtained a record himself in the same season. Mr. Kilpatrick is anxious to send his horse east but a lot more people in California wish to breed to him now than did three months ago, and he may he persuaded to keep him in the Golden State for one more season.

BEST RECORDS OF THE YEAR.

Trotters.

Stallion—Sterling McKinney, by McKinney 2:11¼, dam Twenty Third, hy Director 2:17..2:06¾

Time—2:20, 2:19¾, 2:21.

Lon McDonald takes place as the foremost racing driver of the season by virtue of the Readville matters accentuating previous preformances. He has won the great Kentucky futurity twice, once with Sadie Mac and the next year with Miss Abdell. Last year he had also the great green mare Sadic Fogg that died in the winter. Before the Handicap on Tuesday last, he had won three races on Monday.

"CORNING STOCK FARM."

Mr. Parker Corning, Proprietor Noted Corning Stock Farm, Albany, N. Y., writes: "For several years we have used Quinn's Ointment with very satisfactory results. It is with pleasure that we give it our hearty endorsement. We consider it a remedy of unusual merit and well worthy of trial." This is the universal expression of leading breeders, from Maine to California. For Curbs, Splints, Spavins, Windpuffs and all blemishes, use Quinn's Ointment. If cannot be obtained from druggist, address W. B. Eddy & Co., Whitehall, N. Y. Price, $1.00 delivered.

BRED THE WINNER OF TWO STAKES.

When Ray Mead, the well known teaming contractor of San Jose, was a resident of Hollister in 1894, he sent his mare Carrie B. by Alex Button, dam Carrie Malone by Steinway, to be bred to the great pacer Searchligbt 2:03¼. Carrie B. was bis favorite road mare and as she was a fast pacer and out of a full sister to Klatawah (3) 2:05½, Chas. Derby 2:20 and other good ones, he figured that breediug her to Searchlight would be about the right cross to produce stake winning speed. After mating her with the the old champion he nominated her in the Pacific Breeders' Futurity for tbe produce of mares bred in 1904. During the fall of that year, while she was carrying the foal, Carrie B. was started in a race at Salinas and won second money, being a bang up second in 2:19½. The following spring she foaled a fine black colt and after weaning him was trained a little and took a record of 2:18 at Santa Rosa in October in the second heat of the 2:17 class pace which race she won.

The colt was a strong, lusty youngster and he made his appearance on March 17th, St. Patrick's Day. Mr. Mead's father-in-law, Mr. L. M. Ladd of Hollister, first discovered that Carrie B's foal had arrived, and in honor of the colt's grandam and the day of his birth, immediately named him Pat Malone, and the youngster went by the nick-name of "Patsy" from the first.

When Mr. C. C. Crippen, who now bas charge of Kinney Lou 2:07¾, but who at that time was managing Searchlight and Lecco, saw the colt he immediately fell in love with the youngster, and induced Mr. Mead to let him select a more appropriate name for him, and one that was not already in use. Mr. Mead consented and Crippne selected the euphonisus and apt name of Ray O'Light, combining Mr. Mead's given name and the last syllable of the name of the

RAY MEAD.
Breeder of Ray O'Light (3) 2:09.

colt's sire, and making a word that means something.

When Ray O'Light was eighteen months old Mr. Mead sold him to Mr. E. McHenry Train of Soquel with the agreement that the colt would be turned over to a good trainer and given every opportunity of starting in the futurity. Ray O'Light went into the stable of Charles Whitehead at Salinas and has been in that popular trainer's bands ever since.

The colt learned the game readily and in 1907 won tbe two-year-old pacing division of the futurity and took a race record of 2:13½, the fastest mile made by a two-year-old pacer during the year. When the race was over Mr. Mead as breeder and nominator of tbe winner was given a check for $200 from the amount of the stake.

This year Ray O'Light won the three-year-old division of thc stake. Taking a record of 2:09 in the second and third heats, and Mr. Mead was given another check of $200.

Mr. Mead is the first breeder who has been so fortunate as to have a colt of his breeding win both divisions of the Breeders' Futurity since this stake was opened.

Mr. Mead owns a two-year-old filly out of Carrie B. that is by Monbello, son of Monbells, also a yearling filly by Zolock 2:05¼, and the mare is now safely in foal to Bon Voyage 2:12¾, she having been shipped to Los Angeles last spring to be bred to Mr. Clark's horse. Carrie B. has certainly been a profitable investment for Mr. Mead and he anticipates having a lot of sport with her produce before he gets through With three such bred ones he should be able to turn out another futurity winner, and they say the Zolock yearling has a futurity look about him already.

Allen Winter 2:08 will remain the leading money winning horse of the year on the trotting tracks, that $30,000 he won at Readville being more than any other trotter or pacer can hope to earn during one season.

NOTES AND NEWS

Tbe Oregon State Fair opens on Monday next.

The Central California circuit opens September 21st at Tulare.

With good weather the racing should be the best ever held on the track.

Tbe average attendance at the Minnesota State Fair is about 40,000.

But two days racing was held at Bellingham, Wash., a rain storm stopping further sport.

Wild Bell's mile in 2:05¼ at Chico does not constitute a record. His mark is still 2:08¼ and he is still elegible to the 2:08 class.

Copa de Oro was awarded fourth money in the $5,000 pace at Hartford. The Eel won in three straight heats in 2:05, 2:05½ and 2:05.

Tbe Zoo, brown stallion by Zombro, now has a trotting record of 2:12, made in the fifth heat of the $5,000 trot at Hamline last week.

Bunch won a race with the McKinney mare Zella Mac at Lewiston, Illinois, last week. The fastest heat was 2:25¼, and the track a half mile ring.

Fred H. Chase & Co. will soon have several sensational announcements to make in regard to a big combination sale they are to hold October 26th.

Dr. A. De Foe of Pleasanton, has consigned all his standard bred horses to the big sale to be held at Portland, Oregon, on the 24th and 25th of this month.

The attendance at the Hartford Grand Circuit meeting this week has averaged ten thousand every day, altbough no betting was permitted on the grounds.

If you want to sell a good trotter or pacer see Fred H. Chase & Co., at 478 Valencia street, ahout the combination sale they will hold on Monday evening, October 26th.

Horse buyers from San Francisco and Los Angeles shipped several carloads of work animals and driving horses out of Marysville last month which they had purchased at fair prices.

The San Francisco Driving Club will race at Tanforan on Sunday, the 13th inst., several races having been arranged for the amusement of the big crowd that will attend the Butchers' Picnic there that day.

Dan Patch broke the Michigan record last Tuesday by pacing a mile in 1:58¾. Tbe great old stallion has acquired tbe habit of beating two minutes and seems able to do it every time he is asked.

Cbarles D. Ray's good stallion by Sidney Dillon, dam Ladywell 2:16½ by Electioneer, has been registered under rule 1 as Lord Sidney Dillon. He is in tbe stud at Mr. Ray's home in St. Paul, Oregon.

Next year's product of Peter the Great and Grace Bond has been sold by W. E. D. Stokes for $2,500. It doesn't look much as though the trotting horse industry was very much depressed when an unborn foal brings such a price.

Tbe Belgian draft stallion Escape, for which the Petaluma Draft Horse Association paid $3,600 a few years ago, died last month of impaction. He weighed 2,400 pounds and was a magnificent specimen of the breed. He was ten years old.

A $5,000 handicap for trotters and another for pacers should be drawing cards for some enterprising California association next year. On tbe Readville plan tbe entrance to such a race would be only $50, which would insure a big list of entries.

The Blue Ribbon sale to be held at Tulare during the fair this month is meeting with much favor among tbe live stock owners of tbat locality. R. O. Newman wbo owns some of the best bred trotters and pacers in California, has entered ten head in the sale.

Will Durfee won the 2:10 trot at Hartford, Conn., on Wednesday last with his McKinney stallion Del Coronado 2:09¾, taking the first and the third beats. The McKinney geldiug El Milagro, bred by Mr. Rudolf Jordan Jr. of this city, won the second heat of tbe race.

Sir John S. 2:04½ will not race any more this year. Mr. Vance has taken the son of Diablo back to Marysville and will throw him out of training for the balance of tbe year. This great son of Diablo is sound and all right and if given the proper preparation next season should certainly be able to reduce his record and show that he is a great race horse. Easter Bells 2:11¼, the full sister to Sir John S. will also be let up on as she is lame.

California Dillon, Frank Turner's cbestnut pacing stallion by Sidney Dillon, tbat took a record of 2:18¼ at Santa Rosa during the Breeders' meeting in August, worked an eigbtb in 14¾ seconds one day last week at tbe end of a slow mile. He bas been a mile in 2:13½ since tbe Santa Rosa meeting.

Friday and Saturday, October 9th and 10tb, are tbe dates selected by tbe Sonoma County Driving Club for its fall meeting this year. In addition to a good program of barness races to be announced soon, a few races will be given for runners at this meeting, and a novelty race or two will be on the program.

W. J. Kenney of 531 Valencia street, this city, took all the first prizes for sulkies and speed carts at the California State Fair last week. During the week he sold two speed carts to S. H. Hoy of Winters, oue to Schuyler Walton of Fresno and a sulky to Daniels & Miller of Chico, the new owners of that fast three-year-old Kataina 2:15¼, winner of the Stanford Stake.

Cleo Dillon, 2:13¾, Katalina 2:15¼ and Don Reginaldo 2:15¾, all trotters, and Ray O'Light 2:09 and Moortrix 2:14¼ pacing, are a pretty fair bunch of three-year-olds for one small circuit to develop this summer. And there are others that raced against them whose records could be placed below 2:15 if they were asked to do it.

After all has been said about the big Readville handicap, the principal cause of its success was the fact tbat the purse was the very largest ever trotted for, and the entrance fee the lowest, and these two made it look good to the horsemen who entered. Whenever the opportunity is offered to win $30,000 by paying $500 there will be many entries.

Fred H. Chase & Co. will hold their first fall sale of trotting bred horses, this year on Monday evening, October 26tb. There have been twenty head consigned to this sale already, and twenty more are needed. The market will be good and bidding is expected to be lively for good roadsters and track prospects. Entries for this sale will close on the 21st instant.

Corning Girl, the phenomenal yearling pacing filly by Loring, owned by W. H. Samson of Redding and trained by F. N. Frary, of Red Bluff, was being led through the streets of Sacramento on her way to the State Fair grounds, and slipped and fell on the pavement and quite seriously bruised her hip, but the injury is not considered serious enough to permanently injure her.

If any of our readers desire a good roadster we refer them to Mr. C. Gabrielson, of Seventh and Webster street, Oakland, who advertises a four-year-old gelding by Searcblight, and a three-year-old filly by Chas. Derby for sale. The gelding is a natural pacer and a fast one. The filly is also fast. Neither has been trained for speed. They are not afraid of steam cars or automobiles, and are worth the money asked.

More than one hundred and fifty head of horses and cattle are already listed to show and sell at the Tulare Agricultural Fair and Blue Ribbon sale. Mr. R. O. Newman, of Visalia, will sell ten head of standard bred mares with colts at foot sired by Best Policy and Robert Direct. Mr. J. W. Martin will sell his grand looking and fast trotting stallion McKinley and fourteen colts and fillies. This will be a great sale.

C. H. Durfee's three-year-old colt Dr. Lecco, looks like one of the coming trotters that will get a place in the 2:10 list before he is five years old. He won fourth money in the Breeders' Futurity, third money in the Occident Stake and second in the Stanford. His winnings amounted to $875.25, and he closed the season without a record. He is bred all right, as his sire is Lecco 2:09¾, his dam Bessie D. is by McKinney 2:11¼ and his grandam is Stemwinder, the famous dam of Directum 2:05¼.

H. S. Hogoboom, the popular Yolo county horseman, started for Oregon on Thursday of this week. Mr. Hogoboom has the honor of being the only Pacific Coast trainer so far heard from who has given a two-year-old a record of 2:21¼ trotting the same year it was broke. This he did at the Oakland meeting in August with Queen Alto, a daughter of his stallion Iran Alto 2:12¼. If he had taken Queen Alto to Chico, Mr. Hogoboom would have beaten 2:20 away off with her over that fast track, and he says 2:16 would not have been beyond her reach.

One of the most elaborate and handsomely printed tabulations of a pedigree we have seen for some time has been received by the editor of this journal from Mr. Andrew Robertson of Melbourne, Australia. The tabulation is of the pedigree of tne California bred stallion Marvin Wilkes 2:12½, which Mr. Robertson purchased last winter from Walter Mastin of Sacramento for Messrs. A. and G. Tye, of Allendale Stock Farm, Mentone, Victoria, and shipped to Australia with nearly twenty head of well bred trotting and pacing mares and young stallions which he had selected in various parts of California. The tabulation referred to is on a sheet about 16x22 inches, is printed credit to both compiler and printer.
in two colors and illustrated by a fine picture of the stallion. It is a very attractive advertisement and a

Drink Jackson's Napa Soda.

Portland Futurity No. 1 is not exclusively for colts and fillies foaled in tbe State of Oregon as bas been stated, but is open to the world. Entries will close November 2d for this stake when $5 will pay for tbe nomination of tbe foal. Tbese foals will start as two-year-olds in 1910, and as tbree-year-olds in 1911. The races are to be held at Portland. Tbe Portland association is giving this stake so two and tbree-year-olds will bave more to race for than tbey have in the past, and colts going north from here will have two races instead of onc.

Mr. F. J. Kilpatrick of this city, has decided to sell his entire string of trotters and pacers with the exception of his great stallion Washington McKinney 2:20 and possibly Lady McKinney 2:18¼. Tbere are ten head in the string eight of them by Washington McKinney, which eight he gave records to at the Breeders' meeting at Santa Rosa in August this year. The string of ten are now at the Park Amateur stables on Fulton street, near the Stadium, where they can be seen any day and prospective buyers can drive them on the stadium track. An advertisement giving full particulars will appear next week.

Geo. Ramage's eight-year-old gelding Bert Arandale, won his initial start at Bellingham, Wasbington, August 26th, and did not have to trot faster than 2:19¾ to do it. He won his race in straight heats very easily. Bert Arondale is by Sidney Dillon, and his dam is Oakley Russell by Happy Russell 2:21½, second dam by Orestes 1920, third dam Belle Harris by Henry Clay Jr. Tbe Washington and Oregon horsemen who have seen Bert Arandale in his work and in this race which is directly in line with the predictions made by the Pleasanton horsemen before Ramage took the horse north. He is well entered on the North Pacific circuit.

"At last the American horsemen are taking a step forward in the harness game, when they introduce the handicap system of racing in this country," said Gil. Curry, the veteran horseman. This system has been used in Russia for years, and the horsemen over there are as far ahead of America in this particular sport as our modern buildings are ahead of theirs. I have raced under the Russian rules, with the Russian people. and they have style, system and everything else which tbe American turf seems to ignore or want to overlook entirely. It will not be long, probably next year, when one will see such races all over the American continent and when they do it will improve the sport 100 per cent."

Fred Chadbourne, who was never in the heavyweight class, but has more grit and staying qualities than he has muscle, has earned his salary driving the stallion John R. Conway 2:07 this season. Conway is one of those studs tbat is never in a hurry and that has to be persuaded with the warmest sort of a persuader before he ever realizes that he is in a horse race and is expected to do his best to win. His hide is so tough that an ordinary stroke with a whip attracts but little more attention from him than the bite of a fly, and a slight swisb of the tail is about all the attention he ever pays to a visit from the whalebone. When a heat is over Chadbourne is a lot more tired than Conway is, and at the end of a race he is all in while old John R. walks back to his stall and looks around for something to eat with the air of a lazy boy that has been dragged from tbe dinner table to do some easy chore.

Mr. M. Henry of French Camp, near Stockton, writes us tbat be entered Frank C. by Gossiper and Headlight by Searchlight in tbe amateur races at the Sacramento State Fair last week at the earnest solicitation of President Sherwood of the Stockton Driving Club, so as to help fill these events. Frank C. had not had a harness on his back fifteen times since the spring of 1906. In the first heat of his race a ringer that was put in took him to the half in 1:07 which took the gimp out of him, yet he was just nosed out the secoud heat in 2:25¼. Headlight had been in pasture from the spring of 1904 to August 18th this year and was very fat. Mr. Henry was told that he would not have to beat 2:45 to win, but the first heat was in 2:29 which killed his chances to win that day and he lost the next two heats, when fortunately for him the race was postponed until the next day when he won the deciding heat. While no fast time was made in either of these races, the showing of Mr. Henry's two horses was most excellent for horses that have been on pasture the past year and had no training.

We have been asked several times to give the breeding of Alcantara Jr. sire of the dam of Sir John S. 2:04½, Easter Bells 2:11¼, etc., but as tbe horse is not registered we have been unable until now to give it, especially as all the old records of tbis office were destroyed by the fire of 1906. Mr. O. H. Weber, of Grand Island, Colusa county, was in the office of the Breeder and Sportsman one day this week, and showed us an old stud card of Alcantara Jr. from which we learn tbat the horse was sired by Alcantara 729, tbat his dam was by Vinco, son of Vindex, second dam by Washington and tbird dam by Senator, a thoroughbred. Vindex is given us by Blood's Black Hawk out of a mare by Mambrino Chief II, and tbe dam of Vinco is given as a mare by Darnaby's Bay Messenger According to this breeding there was good blood in the veins of Alcantara Jr., even though he is not registered. Mr. Weber owns a filly by Clarence Wilkes 2:28½ out of a mare by Alcantara Jr., that is one of the prettiest weanlings in the Sacramento Valley.

OPINIONS OF THE HANDICAP.

(Chicago Horse Review.)

Fred Beachey—Now, if thirty-three horses can be so closely handicapped, the first time the system is tried in this country, and for a fortune of $50,000 at stake, there is no earthly reason why, with a number of such races for smaller purses, say ten or twelve in consecutive weeks during another seasou, and valued at from $3,000 to $10,000 each, the handicap system of racing will not prove successful in every way. Horsemen have always heen slow to get away from the old American system, for it is true that the innovations introduced at various times have not always proven successes. It would not, therefore, in my opinion, do for the mile track associations to give their races altogether on the handicap system until a more thorough trial is given it.

Volunteer—If the crowd did not break all records it was only hecause no strenuous advertising campaign was made on behalf of the event. Had one been, all records, at least for strictly harness racing, easily might have heen broken. But, at any rate, the throng was an immense one—and its quality was the highest that I can remember of ever seeing at any race track. It is customary for the paragraphers to poke fun at Bostonian culture and at New England intellectually in geueral—but those thiugs are realities, after all, and they were conspicuous throughout this vast assemhlage. I watched it gather during the day and I watched it disperse in the evening, and I confess tbat its tone of station and quiet elegance, unostentatious but plainly apparent, its breeding, even its restraint —for, as a matter of fact, wbile its interest was intense it was not at all ebullient, and even the cheer for the winner was rather in the nature of a formality than otherwise—impressed me as something rare and admirahle. Its gathering together I consider as fine a tribute as was ever paid to the standing of the American trotter with the best portion of the most typical American public; for, say what we will, in jest or earnest, New England represents what is highest in American ideals and always has.

Marque—Here is a brief analysis of the event and the lesson to be learned from it:

1. The best horse won.
2. It is possible to handicap harness horses successfully.
3. Handicap racing gives every horse a possible earning capacity.
4. In part handicap racing eliminates the necessity of hetting.
5 It will attract the public and create unusual interest.
6. It is possible to start large fields and eliminate the disagreeable scoring feature.
7. Handicap racing appeals alike to the public, tbe horse owners, the drivers and the racing associations.

Lon McDonald: "I knew that I had a good horse, but thought all the time that the handicappers did him an injustice in placing him on the 2:10 mark. Allen got away well and was full of trot, but being mindful that the route was a long one, I rated him along easily till I reached the half. My greatest fear was getting into a pocket, so when I reached the half and saw the great pack of horses lined up I made up my mind to go around on the outside. It was well that I did, for there is no telling what might have happened had I permitted myself to be peuned in around the third turn. When I reached Kim at the five-eights pole I noted that he was about all in and as I had as yet uot asked any special effort of Allen, I felt confident of winning. I never had a horse that felt as strong as he did wheu we were finishing the mile. In fact, it seemed to me that he had just begun to trot and didn't know or care where the wire was. The last quarter in 31 seconds, was only play for him and when you rememher the distance he covered you will agree with me that he is one of the fastest and gemest stallions the turf has yet seen. How did I teel after the race was over? Well, I was somewhat bewildered, especially when the mob surrounded me and tried to tear my buttons off. I have never won a race that gave me so much pleasure, not considering the purse, either. It was the greatest race from all standpoints ever engaged in by trotters, and I would rather have the bonor of winning it than to be president of the republic."

M. E. McHenry:—"Prince C.'s race surprised me somewhat. He has heen racing every week with the handicap of had legs and received no special keying up. He gave me every ounce there was in him, tried all the time, and I want to say for the Prince that if some of the faster ones were as game as he there would he a great many more good race horses than there are When a horse does his best and keeps trying after he is tired I have to give him much credit. I have ridden taster miles hehind better trotters, but as long as I live I will never forget the one Prince C. gave me."

P. W. Hodges:—"San Francisco did remarkably well under the circumstances. He was very lame and when I warmed him up I had doubts about his sticking to the trot. His left front beel is badly cracked, causing him a great deal of paln. On advice of a veterinarian I used a preparation on the heel wbich cauterized lt and made it sore and raw. Otherwise he was in fine form, as his race showed. I had to go a rather long route to keep out of a pocket, but even so I feel certain that I finished second. Many of those who were near the wire have told me so, too—hut what s the use of kicking? That $5,000 is better thau nothing at all, which most of the others had to be content with. It was San Francisco's first race and his behavior throughout certainly proves that he is a very great trotter."

SEPTEMBER 9TH AT STOCKTON.

The Stockton and Sacramento Driving Clubs celebrated Admission Day by holding a matinee of seven races at the Stockton track before a very large crowd of spectators. Results:

First race, Class E, pace and trot:

L. Archambault's s. m. Babe (D. Leiginger)	1	1
Frank Silva's b. g. Flyaway (Silva)	2	2
M. Freidberger's blk. m. Black Beauty (Lance)	3	5
George Vice's br. g. Billy George (Vice)	5	3
J. Grigsby's s. m. Genevieve (Algeo)	4	4

Time—2:31¼, 2:32.

Second race, Class A, pace:

I. Christie's b. g. Briarwood (Quinn)	1	1	1
J. Jones' s. m. Lady Irene (Jones)	2	2	2

Time—2:15½, 2:18, 2:15½.

Third race, Class A, trot:

C. Silva's b. m. Blanche T.	1	1
Leiginger's b. g. Bob Ingersoll (Leiginger)	2	3
P. Chalmer's b. g. Auget Baron (Chalmers)	3	2

Fourth race, Special Cup race:

Frank Wright's b. h. Kelly Briggs (Wright)	1	1
Frank Ruhstaller's b. h. Wild Bell (Ruhstaller)	2	2

Time—2:16, 2:12.

Fifth race, Class C, pace:

Paul Sims' h. g. Captain Gorgas (Sims)	5	1	1
B. Acker's hr. g. The Wiggler (Algeo)	1	3	2
G. F. Wilke's br. g. Gilt Edge Dick (Leiginger.	3	2	3
R. Donovan's br. g. Chappo (Donovan)	2	6	5
H. C. Pike's br. g. Protection (Pike)	4	4	5
M. Henry's br. b., Frank C. (Henry)	6	5	4

Time—2:20, 2:16¾, 2:20.

Sixth race, Class B, pace:

W. Cowell's blk. m. Bonnie W. (Cowell)	2	1	1
G. Pierano's blk. h. Alto Genoa Jr. (Pierano)	1	2	2
J. Petch's b. b. Advance (Petch)	3	3	3

Time—2:15, 2:17½, 2:20.

Seventh race, Class D, mixed trot and pace:

M. Henry's br. g. Headlight (Henry)	1	1
W. J. Miller's s. g. Guy Prince (Miller)	4	2
Ed Lavin's blk. h. Ramus (Lavin)	2	4

Time—2:31, 2:22.

ADMISSION DAY RACES AT SONOMA.

The half mile track of the Sonoma Driving Club was visited by a large crowd of people on Wednesday of this week, when the club gave an afternoon program of six races, four of which were for barness horses.

In the free-for-all the Dictatus mare Kitty D., driven by Joseph Ryan, won in straight heats in 2:11¼ and 2:12½, beating Little Dick, also hy Diotatus, by not more than a head in the first mile. This race is probably the fastest ever paced on a half mile track in California. The results of the harness races were as follows:

First race, free-for-all, best two in three:

Kitty D.	1	1
Little Dick	2	2
Lady Falrose	3	3

Time—2:11¼, 2:12½.

Second race, 2:30 class, pacing, best two in three:

Hello Girl	1	1
Dan Fraser	2	2

Time—2:27, 2:28.

Third race, 2:40 class, mixed trot and pace, one heat:

Frank C.	1
Maggie Murphy	2
Menlo Belle	3

Time, 2:27.

Fourth race, trotting event, best two in three:

Maude Wilkes	1	1
Quickstep	2	2
Petaluma Girl	3	3
Billy Habarley	4	4

Time—2:45, 2:48.

HORSE NEWS FROM OREGON.

Fair Grounds, Oregon, Sept. 7, 1908.

Breeder and Sportsman:—Many improvements are being made here at the fair grounds where the Oregon State Fair is held every year. They have just completed a new barn which has forty fine hox stalls, twenty on eacb side with a driveway through the center, and with large double doors at each end arranged so that the barn can be closed against the winds and rains. They have also enlarged the grand stand so that at least 1000 additional seats have been provided.

The track is being kept in fine shape and if the weather keeps good the racing will be fast during the fair. President Matlock has been giving the grounds his personal attention nearly every day for weeks past and he surely ls the right man in the right place. He has two teams working on the track now.

S. S. Bailey is here from Albany with three of bis borses—Tidal Wave 2:09, Dr. Monday 2:26½ and Vinnie Mann 2:12½. Tidal Wave is by Nutwood Wilkes and is working miles in 2:10 very handily. Dr. Monday is by Zombro and is trotting around 2:15.

John Sawyers Zombro mare Zelma Z. which was working miles around 2:16 has sored up some and it does not look as thougb she will do much this year, but should she round to will make quite a trotter.

The stallion Zombronut, owned by Dr. Mott, of Salem, Oregon, and trained by Sam Casto, stepped a mile in 2:16½ and back in 2:16¼ the other day. The last half of the last mile was in 1:06½ with the last quarter in 32¾ seconds. He sbould be a hard one to beat in the 2:25 class.

Raoul W., green trotter by Zombro, worked a mile in 2:20. He is owned by E. House of Portland.

Zom Norte, formerly Lord Lister, is pacing miles in 2:12½ and sbould step into the 2:10 list this year.

Helen Dare 2:14 is workiug miles hetter than her record and looks like anotber 2:10 trotter for Zombro.

Zombro has nine new performers so far this year to wit: Alta Reva 2:28, Engenia B. 2:28, Zomalta 2:08½, Zoe Patchen 2:23¼, Bessie T. 2:26, and Clara B. 2:23½, all trotters, and Geraldine 2:15, Zoe W. 2:22½ and Mary K. 2:10, pacers. Those with reduced records are the trotters Early Bird 2:29½ to 2:17½, and The Zoo 2:25 to 2:12.

We look for the biggest and best fair and race meeting ever held on the coast when the Oregon State Fair opens on the 14th inst. We expect to see 20,000 people here each day when tbe two hig $5,000 purses are raced for.

The new track at Portland is now completed and from what I can learn it will he a very high class race track. Such good judges as John Tilden say that it will be the fastest track in Oregon.

It looks as if the free-for-all pace will be a tame affair up here this year. Sir John S. 2:04½ is not coming, aud Zolock 2:05¼ is quite lame, althougb looking and acting fine. It is said that his lameness is caused by a quarter crack and he may round to in time for bis engagements.

CALIFORNIAN.

SAN FRANCISCO DRIVING CLUB.

Following are the results of the races held at Tauforan Park ou Wednesday, Septemher 9th, by the San Francisco Driving Club:

First race—2:25 pace:

Margaret, br. m. by Bay Bird (Boyle)	1	1
Lucero (Lecari)	2	2
W. J. (Butler)	3	3
Babe Boswell (Benson)	4	4
Billy Ellsworth (Hill)	5	5

Time—2:21¼, 2:20.

Second race—Free-for-all trot:

Walter Wilkes, blk. g. by Sahle Wilkes (Becker)	1	1
Major Cook (McGrath)	2	3
Neko (Burton)	3	2
Verona (Sharp, Freslon)	4	4

Time—2:17¼, 2:19.

Third race—2:15 pace:

Albert S., c. g. by Nutwood Wilkes (Burton)	1	1
Charley J. (Lecari)	2	3
Deroll (Schwartz)	4	2
Schley B. (Becker)	5	4
King V. (O'Kane)	3	w

Time—2:16½, 2:18½.

Fifth race—2:25 mixed:

Hickman Girl, c. s. m. by Redwood (Becker)	1	1
Ed. Ray (Fulkerson)	2	2
Dynamite (Schottler)	3	3
Dandy (Hill)	5	5
Valma (Lawlor)	4	6
Arthur A. (Schwartz)	6	4

Time—2:27½, 2:23½.

Sixth race—2:25 trot:

Billy Murry, c. g. by Diablo (Burton)	1	4	1
Hunkey Dory (Schwartz)	2	1	4
Monk (Hans)	3	2	3
Docus D. (Boyle)	4	3	2
Babe (Costello)	5	5	d

Time—2:29½, 2:26, 2:23.

THINKS MINOR HEIR BROKE RECORD.

A despatch from Libertyville, Illiuois, under date of September 6th, says:

"C. E. Dean, who returned from St. Paul yesterday morning, was loud in his censure of the timers at the Hamline track yesterday. He says they did not give Minor Heir credit for what he did.

"Minor Heir made the mile in 1:59½ according to my own watch and forty others," said Mr. Dean. "I had my stop watch in my haud and was driving to break Dan Patch's mark of 2:00 unpaced, and I had it beat nobly. My time for the quarter was :29½, and it was exactly what the timers hung up. The half was made in :59½ by my watch and theirs. The three-quarters was paced in 1:29½, and that was exactly what the official timers hung out. As I passed the wire my watch showed 1:59½. Then the judges hung up 2:00¼ aud I was deprived of earning the extra $500 hung up if I beat Dan Patch's mark.

"I had forty men come to me and tell me that they cought the time in 1:59½, and the slowest time was 1:59¾, so that it would seem that something was wroug with the timers on the staud."

"I also want to say that Miuor Heir's performance yesterday was equal to 2:55. The track was so muddy at noon that one could not walk across it, but at 6 o'clock it had dried out and I said I would make the effort. I had to stay out about three sulky lengths from the pole down the back stretch, and in the home stretch I was in second position. With a good track I would have made the mile in 1:57 or better. Minor Heir, I think, is the equal of Dan Patch, and if the track is good at Milwaukee next week he will beat 2:00 easily."

NO REGAL TRIBE.

It would seem by this time, says Spirit of the West, that all men should have learned that in the great family of the American trotter there is no one regal tribe. no line of royal breeding to which the crowned kings and queens must trace their lineage and from which descend. Like as it is in the great Western Republic in the human family, where all distinction of rank, all titles and accessories belonging to a ruling class have been left across the seas, so in the distinctive family of horses known as the American light harness horse; within the class no regal tribe has either been chosen, or developed, that holds ascendency over others. Occupants of the throne, wearing crowns as kings and queens for a time, have successfully appeared, but coming up from this quarter and then that, members of one tribe, family or clan at one time, and of an entirely different one at another. Men have thought and planned to select out and establish a house that alone would wear the royal purple. When some eminent individuals came to the front from it, but before they were aware of it, or thought what was going on, some other emerged, perhaps, from what seemed deep buried obscurity and laid it over them so greatly that they were forced to shrink back into the ranks on a common level with others of the kind. And so it has been from the very first up to this hour. When Dexter 2:17¼ appeared Hambletonian was to be all there was to it, though Lady Thorn 2:18¼ and Woodford Mambrino 2:21½ made the demonstration that Mambrino Chief was to be reckoned on for a place also. St. Julian 2:11¼ led the owners of Volunteer 55 to put that great sire forward as a claimant to establish a new tribe and superior to all coming before. and from which all greatness henceforth must emanate. But Abdallah 15 had Goldsmith Maid 2:14¼, and she was real queen for years on the trotting pedestal. Unheralded and obscure Harold got Maud S. 2:08¾, and Dictator was out with Jay Eye See 2:10 and these progenitors had their day. George Wilkes had trotted to stallion championship honors, and though derided as "Simmon's baked-up pony," he gave the world Harry Wilkes 2:13¼, and Guy Wilkes 2:15¼, and a whole host of peers with the best on the tracks and in the stud, and Kentucky went wild and sought and bred Wilkes to the exclusion of everything else. But Senator Stanford, out on the Pacific Coast, sat down with a cheap horse called Electioneer, and he bowled it over the Wilkeses for a time till there was scarcely a champion honor, or commanding position left to the Kentucky idol. But others were "sawing wood"; while Electioneer and Wilkes were contending and parading, each at his best, and claiming all the earth. Happy Medium, that was relegated to the rear as common clay, came forward with Nancy Hanks 2:04 and she made them all take a back seat. Then a descendant of old Mambrino Chief forged into prominence again with Alix 2:03¾, and ruled supreme. And even the Morgans did something to command respect, with Nelson 2:09¼ as a trotting stallion after champion honors. Nor were the Clays to remain permanently in the background, for a Stamboul 2:07½ appeared, tracing his descent tail-male to the slandered "sawdust in oats" tribe. Robert McGregor 2:17¼ was a trotter of some consequence for a time, but was a western horse from an unnoticed sire, representing a tribe about to fall into "innocuous desuetude," when he brought his claim into a new lease of life by siring the trotting champion of all stallions up to the hour, Cresceus 2:02¼. Sidney 2:21¼ had been regarded of some consequence in his early years when he produced a number of youngsters that put up some new marks for their years to be shot at. But he was almost totally forgotten when Sidney Dillon made a meteor-like rush into prominence with the peerless Lou Dillon 1:58¼ and Dolly Dillon 2:06¾ and others to back her up. Even the Spragues have had their inning with the greatest of all sires, McKinney, from a mare of the clan. And so it is running over the field in seven-leagued boots, stepping only from mountain top to mountain top, it appears that every tribe has had a day and place; that no one is the whole thing, or holds regal place; that no sub clan or class is so minor or obscure as not to merit just recognition and consideration. And the conclusion to be reached is that whatever the channel come through, when an individual or tribe have a good inheritance from the fontal sources of the roadster and speed horse, there is room and place and hope for such. It may be a period of dearth for some at certain times, but there is no telling how soon it may come to an end. Great temporary triumph and eclat may make many possessed of some other family green with envy, and the fickle crowd may be running mad to get rid of everything else and to load up to the gunwale with what was conspicuous ascendancy and is the only talked about and touted. But quite likely before the new and popular has been attained, the old and discarded will have proven to be vastly greater and superior by actual demonstrated merit and performance. Thus, like boys in a berry patch, one strikes it rich and calls to his fellows and they all rush there, soon to be summoned to some other spot, and so the time is squandered chasing all the while for something better than what is at hand, whereas diligent application at developing what is possessed would yield far greater results in the end. There are possibilities in almost every tribe of the pedigreed roadster, with less difference in the long run than is commonly supposed.

Drink Jackson's Napa Soda.

RESULTS OF HAMLINE RACES.

Monday, August 31st.

2:12 Trot—Three heats, each heat a race. Purse $1,000

Miss Prophet, by Edward M. (Johnson)......1 1 2
Daffodil, by Directly (Ames)..............4 4 1
Charlie T. (De Ryder)......................2 2 3
Western Girl (Brown).......................3 3 4
The Baritone (Allen).......................5 5 5
Time—2:12, 2:14, 2:13½.

2:19 Pace—Three heats,each heat a race. Purse $1000

Dean Pointer, by Star Pointer (McMahon)....1 1 1
Margery Wilkes (Knowlton)..................2 3 2
Noon Bells (Malloy)........................5 2 3

Minor Heir, b. s., by Heir-at-Law (Dean).
Time—0:29½, 0:59½, 1:29½, 2:00¼.

THE COUNTY FAIR IN FAVOR.

The county fair is finding more favor than ever with the general public this year, says Western Horseman. At practically all these fairs the racing is the big attraction, and few of the "regulars" that attend the Grand Circuit meetings realize what great schools these fairs are for the development of the trotter and pacer. More than one horse that is racing successfully at the big meetings had its first racing lesson at the county fairs. At these meetings the wheat is separated from the chaff and the best ones are often sold for good prices to men who can afford to continue their education and get them in form to meet the best in the country. Were it not for these fairs there would be a dearth of good horses for the Grand and Great Western Circuit meetings. Not only that, but not a few of the great drivers are graduates from the county fair school of racing. It would not be possible here to name them all but every horseman can count drivers of national fame who were content not a few years ago to win first money at the "pumpkiu shows." And mighty good schools these fair races prove to be. The young man afraid of the cars soon finds that driving is not his forte, and he seeks other methods of earning a living. It is at these fairs that the farmer sees what his neighbor has done in the way of breeding and developing a horse that is worth a few thousand dollars and he immediately concludes that what his neighbor has done he can do. Then he buys a good mare, if he has not one already, and the chances are that he has one well bred in fashionable lines and he sends her to the court of a good sire. This means money for the stallion owner and the latter is enabled to increase his own operations. The man who sneers at the "pumpkin show" does not know what he is talking about. The county fair is the backbone of the breeding and racing business.

DIRECTORS GIVE SPECIAL AWARDS.

At a final meeting of the State Fair Association last Saturday night three special awards were given by the directors in addition to the regular prizes offered throughout the progress of the fair. Loys Darrell, a memher of tbe San Francisco Riding Club, whose splendid horsemanship on the high school Kentucky saddle horse Dewey drew the plaudits of thousands of spectators every day at the State Fair program at Agricultural Park, where he exhibited the gaits and tricks of the handsome animal owned by Miss Edith Hoefler of San Francisco, was awarded a special diploma for expert horsemanship in this exhibit. The work of the horse and rider was one of the best features of the fair, and attracted general compliments.

It was also decided to award a special gold medal to Miss Eleanor Gates for the horse Nedjarm as a stallion, for which purpose Miss Gates imported him into this country.

The directors conferred a special award of a gold medal on Tevis Paine, the youngest son of Director Charles W. Paine, for services rendered to the society. This was certainly a well-deserved recognition, for the little fellow was seen at all times on his pinto pony assisting the directors in working out the details connected with the carrying out of a successful stock show and race meet.

BOG SPAVIN.

Chas. E. West, Gotego, Okla., writes November 15, 1907: "I am in receipt of your letter of recent date. I purchased your ABSORBINE from the druggist and applied it according to directions as given for Bog Spavin and had grand success. One bottle was enough to do the work.

I can give high praise for your ABSORBINE and shall recommend it for Bog Spavin above all other medicines that I tried, and I tried a good many different kinds. I remain as ever your customer."

ABSORBINE penetrates to the seat of trouble promptly and effectually, without blistering or removing the hair. Does not require the horse to be laid up. Mild in its action, but positive in its results. It will give you satisfaction. $2.00 a bottle at druggist. Manufactured by W. F. Young, P. D. F., 54 Monmouth St., Springfield, Mass.

SHIPPING FEVER.

Sale stable distemper, acclimatization fever, are essentially the same, and cause much trouble, losses and time. All horses taken from tbeir homes, for any purpose or reason, coming into contact with other horses. are sure to have this trouble. A good preventive is also an efficient cure when tbe disease has set in. Spohn's Liquid Distemper Compound has done all that can be reasonably asked to have done in these troubles—cure the sick and prevent those "exposed" or infected from sickness of any of these diseases. All druggists and horse goods houses sell it. 50 cents a bottle; $5 a dozen, or delivered by Spohn Medical Company, Chemists and Bacteriologists, Goshen, Ind.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT.

DEER FARMING IN THE UNITED STATES.

[By D. E. Lantz, Assistant Biological Survey, U. S. Department of Agriculture.]

Breeding the Virginia Deer. The Virginia, or whitetail, deer (Odocoileus virginianus) is the common deer of the United States. Including the half dozen geographic races that occur within our borders, it is distributed over most of the country, except Nevada and the major portions of Utah, Arizona, Washington, Oregon, and California. It is extinct in Delaware and practically so in a number of States in the Middle West. South of our borders a number of closely related species occur.

In view of the wide natural range of the whitetail deer, its adaptability to nearly all sections of the United States can not be doubted. Testimony as to its hardiness in parks and preserves is not so unanimous as that concerning the wapiti; but the general experience of breeders is that with suitable range, plenty of good water, and reasonable care in winter, raising this deer for stocking preserves or for venison may be made as profitable as any other livestock industry. Not only do deer thrive on land unsuited for cattle or horses, but, like elk, they may be raised to great advantage in brushy or timbered pastures fully stocked with cattle or horses, as the food of deer rarely includes grass.

Advocates of the Angora goat industry state that within the United States there are 250,000,000 acres of land not suited to tillage or to the pasture of horses, cattle, or sheep, which are well adapted to goats. Much of this land is suited also to deer and elk, and can be utilized for these animals with less injury to the forest cover than would result from its browsing by goats.

The whitetail deer has often been the subject of experiments in domestication. The beauty of these animals, especially the fawns, appeals to every admirer of wild life, and early settlers of the country soon learned how easily they could be tamed and how promptly they attached themselves to the persons who fed them. The dangerous character of the same pets, especially the males, when grown up was soon learned also. It followed that the domesticating process usually ended with the maturity of the first subject, which was soon disposed of or banished to a safe inclosure.

The propagation of the Virginia deer has seldom been undertaken in a systematic way. The animals have often been bred in parks for pleasure or in large preserves for sport, but the economic possibilities in raising them have received little attention. Recently breeders have recognized the fact that they are profitable under proper management and would be much more so were conditions for marketing live animals and venison more favorable.

Experience of Breeders. The Biological Survey has reports of successful experience in raising Virginia deer from more than a dozen persons, located in different parts of the country, who are now engaged in the business. The management of the herds varies slightly with the surroundings and the object for which they are kept.

Thomas Blagden, of Washington, D. C., began raising deer in 1874. After an experience of over a third of a century he is confident that the business can be made profitable. In his own herds he has carefully avoided in-breeding by securing new bucks from time to time. His stock is vigorous and of the large size characteristic of the Adirondack and other northern deer. Consequently the animals are in demand for breeding purposes, the bucks bringing $50 each and the does $75. He feeds grain, using corn and a mixture of bran and meal, and during the summer cuts as much wild forage as possible. He finds that the animals prefer the rankest weeds to the choicest grass. Of the various kinds of hay, they prefer alfalfa. He provides abundant water at all times.

John W. Griggs, of Goodell, Iowa, writes that he has been engaged in raising deer for about fourteen years. Until two years ago he sold all his surplus stock for parks, but since then has disposed of about half of it for venison. For park purposes he gets $20 to $30 a head, but they bring fully as much or more when fattened for venison. As to management of deer, Mr. Griggs writes:

In raising a large herd the park should be divided into two or three lots, and one plowed each year and sown to red clover, mustard, rape, and seeds of different kinds of weeds. Bluegrass and timothy are useless. Corn is the principal grain I feed. I feed it winter and summer. In winter I feed also clover hay, oat straw, and weedy wild hay. Deer when rightly handled are very prolific, and from 50 does one can count on 75 fawns. They can be raised profitably for venison—very profitably until overdone; but I would not advise one to go into it on a large scale without previous experience with deer.

The report received from C. H. Roseberry, of Stella, Mo., although less enthusiastic than others, is quoted because his herd approaches more nearly a state of true domestication. Under the date of January 13, 1908, Mr. Roseberry wrote as follows:

My experience in breeding the common or Virginia deer covers a period of seventeen years, beginning in March, 1891, when, as a boy of 16, I built a small inclosure of 1½ acres to confine a single doe that was captured as a fawn in the neighboring forest.

A buck and other does were secured from year to year, until in 1900, by purchase and natural increase, my herd numbered 25 head of all ages.

From 1891 to 1901 I lost every year from disease an average of 20 per cent. The climax came in the drought year of 1901, when my loss was 50 per cent from the disease known as "black tongue."

I am convinced that, like cholera in swine, individuals recovering from this disease are immune from further attack. Apparently all of my herd were afflicted. The survivors and their progeny constitute my present breeding stock. I have made no purchases since 1901, nor have I suffered any loss from disease.

For the last seven years my herd has averaged 70 per cent increase, all of which I have sold at satisfactory prices. I began selling at $20 per pair of fawns at 4 months of age and $30 per pair of adults. I now get $40 and $60, respectively. I sell almost exclusively for pets and for propagating purposes, although a few surplus bucks have been sold for venison, averaging me 15 cents per pound gross weight.

If we except the goat, I know of no domestic animal common to the farm that requires so little feed and attention as the deer. My herd has a range of only 15 acres, two-thirds of which are set to white clover, bluegrass, and orchard grass. I provide also a small plat of wheat or rye for winter pasture. With the above provision, in this latitude, no feed is required between April 15 and November 15. During the rest of the year a ration of corn, bran, or other mill feed somewhat smaller than that required for sheep, in connection with a stack of clover or pea hay to which they have free access, is sufficient to keep them in good condition. Deer eat with relish nearly all of the common coarse weeds, and for clearing land of brush they are, I think, second only to the common goat.

Probably the greatest expense connected with the business of raising deer is the fencing. Another item of trouble and expense, when the animals are raised for pets, requiring that they be handled and shipped alive, is the fact that the fawns must be taken from the does when 10 days old and raised by hand on cow's milk. They are quite easily raised in this way, with but slight percentage of loss, but require frequent and careful attention for the first month. When they are allowed to run with the does their natural wildness can not be overcome, no matter how gentle the does may be.

I have found the business profitable on the lines indicated. I believe they could be profitably bred for venison alone—certainly with less trouble and expense since the fawns would be reared by the does and the trouble and expense of raising by hand would be eliminated.

My experience does not coincide with that of some other breeders in respect to the weakening of reproductive powers of deer by the confinement in parks. I have no barren does. Usually they produce a single fawn at two years of age; afterwards twins, and in rare cases triplets.

Management of Virginia Deer. As to the management of deer little need be added to the statements from practical breeders already given. Virginia deer are polygamous, like cattle; the rutting season is in November; the period of gestation is about seven months, and the fawns are born in May or June. Young does usually breed when about 17 months old and have but one fawn the first time; afterwards they commonly produce twins. The fawns are spotted until shedding of the hair in the fall.

While deer are chiefly browsing animals, in captivity they eat nearly every kind of vegetation, including most kinds of garden stuff. They are fond of acorns, beechnuts, chestnuts, and other mast. Lily pads, leaves, lichens, and mosses are freely eaten. With plenty of range and an abundant variety of plants there need be, therefore, no apprehension concerning the deer's food. A good supply of running water must be provided, and the animals should have access to rock salt. If the browse and pasturage are scant, a small ration of grain should be fed. Of the grains, corn is generally recommended as a food; there is no waste, as the deer pick up every grain. Coarse hay full of weeds is preferable to timothy or other tame hays, except alfalfa. Of clover hay, deer usually eat the blossom heads greedily, but waste the other parts. In winter feeding is necessary everywhere, and in the northern half of the United States shelter of some kind should be provided.

The remarks about castrating elk apply as well to the common deer. A number of vigorous bucks, however, must be kept with any considerable herd of does, for a single buck can not serve an unlimited number. Frequent changes of blood by introducing new bucks should be practiced to avoid in-breeding.

Wild Deer in Private Game Preserves. Individual owners, as well as associations, have established large private preserves in many parts of the country and stocked them with deer and other big game. The objects have been to preserve the animals and to provide sport for the owners. In the free life under the protected conditions generally provided, deer do remarkably well, the increase being even more rapid in small parks. There can be no doubt of the success of ventures in propagating the Virginia deer under natural conditions as wild game, as is proved by the experience of a large number of hunting clubs and private owners.

Deer in Buckwood Park, a New Jersey preserve of 4,000 acres, belonging to Charles S. Worthington, increased in the ten years between 1892 and 1903 from 19 to about 400 head, and the number was then lessened because it was thought too large for the permanent sustaining capacity of the park. The St. Louis Park and Agricultural Company have about 1,000 deer and 400 elk in their 5,000-acre preserve in Taney County, Mo. The Otzinachson Rod and Gun Club six years ago placed about 90 deer, mostly does in their 4,000-acre park in Clinton County, Pa. These have multiplied to nearly 2,000 head, and a further increase of about a thousand fawns is expected during the present season (1908). Doubtless these experiences are not exceptional.

The good effect of such preserves on the supply of game in the State should not be overlooked. While they may temporarily restrict the hunting privileges of a few citizens, they ultimately become a source of game supply secondary in importance only to State preserves or game refuges. Already a number of private reserves have become overstocked, and game has escaped or been turned over to the State to become the property of the people. The success of private enterprise in propagating large game in inclosures has thus become an object lesson for State game commissioners and others, and suggests the feasibility of the State's undertaking a similar work for the people.

Game Laws in Relation to Deer Farming. The chief obstacle to profitable progagation of deer in the United States is the restrictive character of State laws governing the killing, sale, and transportation of game. Many of the States, following precedent, lay down the broad rule that all the game animals in the State, whether resident or migratory, are the property of the State. A few States except game animals that are "under private ownership legally acquired." A few others encourage private ownership by providing a way in which wild animals—deer and the like—may be captured for domestication. Generally, when private ownership of game is recognized by law, the right to kill such game is granted, but the owner is hampered by the same regulations as to season, sale, and shipment that apply to wild game. One by one, however, State legislatures are coming to recognize the interests of game propagators, and game laws are gradually being modified in accordance with the change of view.

The chief source from which deer and elk may be obtained for stocking preserves is from animals already in captivity. These must be transported from place to place or there can be no commerce in them, yet the laws of many States absolutely forbid their shipment. The laws as to possession and transportation of deer carcasses make the shipping of venison also illegal. General export of venison is legal from only six of the States, and three of these have no wild deer left to protect.

The laws concerning the season for killing and the sale of deer are often equally embarrassing to those who would produce venison for profit. The owner of domesticated deer can not legally kill his animals except in open season. Owners of private preserves are similarly restricted and are limited to the killing of one or two animals in a season. More than half the States and Territories absolutely forbid the sale of venison. A few forbid the sale of venison produced within the State, but permit the sale of that imported from other States, a most unjust discrimination against home industry.

The following States have recently modified their laws so as to provide, under regulations, for the sale of deer from private preserves. Transportation and even export are included in some of them.

Arkansas. Possession, sale and shipment of deer or fawns is permitted when they have been raised in captivity for domestic purposes and are accompanied by an affidavit from the raiser.

Colorado. Owners of private preserves under a license are permitted to sell and ship deer or other quadrupeds that are accompanied by an invoice. A fee is required for each animal sold.

Illinois. Any person who raises deer for market may kill and sell them at any time in the same manner as other domestic animals.

Indiana The provisions of the law as to possession and sale do not apply to persons who have under ownership or control any deer raised in a deer park.

Massachusetts. The owner may sell his own tame deer kept on his own grounds.

Minnesota. Persons who desire to domesticate deer, moose, elk, or caribou may secure a permit to do so from the State board of game and fish commissioners by paying a fee of 50 cents for each animal in captivity and a like fee for each animal added later by natural increase or otherwise. The animals kept in captivity may be sold or shipped within or without the State, by permission of the commissioners.

Missouri. Deer or elk, alive or dead, may be shipped from any private preserve and sold in the markets of the State when accompanied by a tag furnish-

ed by the game warden of the county, showing whose property it is, where killed, and to whom shipped.

New Hampshire. The Blue Mountain Forest Association may kill elk, deer, or moose in their preserve for one month after the open season, and at any time may transport them outside the State.

New York Deer may be sold during the open season; and moose, elk, caribou, and antelope from private parks may be sold during the same period. Common carriers may transport animals into the State for breeding purposes, but may not transport venison unless it is accompanied by the owner.

North Carolina. Seventeen counties permit the owner and keeper of an inclosed game reserve, who raises deer for use or sale, to kill, sell, or use those raised or kept in said inclosure.

Pennsylvania. Owners of game preserves who hold a game-propagating certificate may sell and transport deer or fawn alive for propagating purposes only, after securing the written consent of the president of the board of game commissioners.

In three or four other States game "under private ownership, legally acquired," is supposed to be exempt from the general provisions of the game law; but in a test case as to its sale or export it is doubtful whether the courts would so hold without more specific provision legalizing such commerce.

Summary. The domestication of deer and elk offers an interesting field for experiment, as well as remunerative returns for the investment of capital.

The wapiti and the Virginia deer can be raised successfully and cheaply under many different conditions of food and climate. The production of venison and the rearing of both species for stocking parks may be made profitable industries in the United States.

Instead of hampering breeders by restrictions, as at present, State laws should be so modified as to encourage the raising of deer, elk, and other animals as a source of profit to the individual and to the State.

Safeguards against the destruction and sale of wild deer in place of domesticated deer are not difficult to enforce. For this purpose a system of licensing private parks, and of tagging deer or carcasses sold or shipped, so that they may be easily identified, is recommended.

It is believed that with favorable legislation much otherwise waste land in the United States may be utilized for the production of venison so as to yield profitable returns, and also that this excellent and nutritious meat, instead of being denied to 99 per cent of the population of the country, may be come as common and as cheap in our markets as mutton.

AT THE TRAPS.

The local trap shooting season closed last Sunday at Ingleside with the live bird shoot of the California Wing Club. This meeting decided the ownership of three high average club medals. Peter McRae won the first medal, Arthur J. Webb won the second medal and third medal went to Clarence C. Nauman.

The shoot was an interesting one throughout, in the medal event McRae had one back score to shoot up which he did before the regular race came off. He lost oue pigeon out of the twelve, this placed him one bird behind, on the season, C. J. Ashlin and Webb. In the medal race both Ashlin and Webb each lost a pigeon, McRae and Nauman grassed twelve birds. This left the four shooters in the lead for the medals with 78 birds each out of 84—seven 12 bird races during the season. In the shoot off at 10 pigeons, McRae killed straight, winning first place. Webb won second place with 9 birds, Nauman and Ashlin each scored 8. On the shoot off at 10 birds between Nauman and Ashlin for third place, the former killed clean, winning the third place by a margin of one bird, Ashlin grassing 9.

Ashlin surely experienced "shooter's luck." All season he had been shooting in excellent form and was was one bird ahead at the beginning of the race Sunday. He lost his first bird dead out, which practically knocked him out of first medal.

Only eleven members shot up their complete scores in the medal race for the season and the averages were as follows: P. A. McRae 78, A. J. Webb 78, C. C. Nauman 78, C. J. Ashlin 78, M. O. Feudner 77, P. L. Murphy 76, P. J. Walsh 75, F. W. Munday 74, E. L. Schultz 77, E. Klevesahl 72, F. Turner 67.

M. O. Feudner, E. Klevesahl and E. C. Prather shot straight scores in both the regular 12 bird races during the day.

In the first event of the day, the medal race, $50 added, high guns, distance handicap, four moneys, eight men scored straight and divided the purse, M. O. Feudner (32 yards) P. McRae (31 yards), C. C. Nauman (33 yards), E. C. Prather (26 yards), P. J. Wash (29 yards), W. E. Murdock (30 yards), W. W. Terrill (26 yards) and E. Klevesahl (26 yards). The other scores were: C. J. Ashlin (29 yards) 11; R. C. Haas (26 yards), 9; A. J. Webb (29 yards), 11; F. W. Munday (26 yards) 11; P. L. Murphy (31 yards), 11; E. L. Schultz (30 yards), 11; F. Turner (26 yards) 10; N. L. Nelson Jr. (27 yards), 8.

In the afternoon race at 12 birds, $50 added, three moneys, high guns, distance handicap, five shooters scored straight and divided the money, they were: M. O. Feudner, R. C. Haas, P. L. Murphy, E. C. Prather and E. Klevesahl. The other scores were: Nauman (34 yards), 5; Munday (28 yards) 10; Nielsen (26 yards) 10; Ashlin (29 yards) 11; Doss (30 yards) 10.

To clean up the birds on hand a 12 bird race followed, starting from the 26 yard peg, going back one yard for each bird scored, Nauman, Walsh and F. W. Munday tied at 36 yards with 11 out of 12 and divided the pool.

At the Multnomah Rod and Gun Club shoot August 30th the scores shot were: Caldwell shot at 100, broke 95, Home 40-35, L. Young 100-84, E. Young 50-37, Nicholas 75-49, Sternberg 50-29, Shanks 50-29, Montgomery 65-27, Olson 35-5.

Frank Howe, W. W. Caldwell, Ed. Young and Chas. Wagner of Portland will participate in the Anaconda tournament next week.

Crescent Bay Gun Club members are getting in trim for the duck season. Standing away from the traps the boys take the blue rocks as they come whizzing overhead from behind.

The Everett Gun Club of Everett, Wash., closed the Club trap season August 30th. Fred Sumner was the winner of the Du Pont silver cup and the Du Pont picture. The scores shot at the last shoot were:

Ten targets—Sumner 5, Wm. Hulbert 6, Westland 6, Russell 6, Horan 7, Brooks 5, Olwell 6, Solberg 5, Glen Hulbert 5, Watts 6, Swalwell 4, Crosby 5.

Fifteen targets—Sumner 14, Wm. Hulbert 10, Westland 11, Russell 8, Horan 10, Brooks 7, Alwell 11, Solberg 8, Glen Hulbert 8, Watts 8, Swalwell 8, Crosby12.

Twenty-five targets—Sumner 23, Wm. Hulbert 14, Westland 20, Russell 16, Horan 10, Brooks 14, Olwell 18, Solberg 16, Glen Hulbert 18, Watts 16, Swalwell 14, Crosby 12.

Judge William H. Waste of the intercollegiate shoot of last year states that the University of California rifle team has won the championship with a score of 397. Al the matches were held on the same day in different parts of the country, the scores of each team being telegraphed to the umpire.

J. S. Paddock of the Utah agricultural school made the highest individual score with 44 out of a possible 50. W. B. Mel and G. M. Chapman of the blue and gold team were second with scores of 43. The University of Nevada team was second in the intercollegiate shoot with 389; the State college of Washington followed with 385; Utah Agricultural College scored 359; St. John's College of Maryland, 322; West Texas Military Academy, 309.

The members of the victorious team of the university were: W. G. Mel, G. M. Chapman, E. O. White, J. M. Montgomery, T. H. Hook, L. McSpaden, A. J. Eddy, W. B. Parker, R. W. Pinger and C. A. Waldmann.

The open deer season will close October 1st.

The open season on mountain quail in this State begins September 1st and will end February 15th, bag limit 25 per day.

The open season on tree squirrels is from September 1st to January 1st, bag limit in one season 12, not lawful to buy or sell.

The open seasons for game birds and wild fowl, under the State law, are as follows: Wild ducks, October 1st to February 15th, bag limit 35 per day. Wilson or English snipe, October 15th to April 1st, bag limit 25 per day. Valley quail, rail, curlew, ibis, plover or other shore birds, October 15th to February 15th, bag limit 25 per day.

In Kings county, the open season on doves began September 1st. Birds are fairly plentiful and in good condition.

The close season on salmon will begin September 17th and continue until October 23rd.

Will D. Kittle, who has recently been an unfortunate sufferer from a severe attack of rheumatism, we take pleasure in announcing is now slowly recovering and regaining his health and strength.

Tehama county keeps up its reputation as a bear hunting district. At Mill creek canyon, a few days ago, Leo Joiner caught a large brown bear in a trap. He shot it and proceeded to skin it, but had scarcely removed the animal's scalp when he heard his hounds baying. Looking up he was surprised to see a large shaggy bear coming towards him with his two hounds in pursuit. Bruin was soon treed and in a few minutes was tumbling to the ground by a well aimed rifle shot, making the second bear killed in less than thirty minutes.

Quail shooting in southern Monterey county promises to be excellent this season. They are very plentiful and tame, the report of guns of hunters shooting cottontails failed in several instances lately to stop the birds from continuing their feeding—this in the Stone Canyon section of the county. Doves also are plentiful in that district.

Reports from Imperial valley are to the effect that the accumulation of wild ducks which has become great during the past few days has already brought serious complaints from the farmers, who find the birds living on the seed corn recently planted. Heretofore there has also been wide complaint from the growers of barley because the birds puddle the barley fields and annually destroy hundreds of acres.

Drink Jackson's Napa Soda.

DEL MONTE SHOW.

The second show of the Del Monte Kennel Club came off on the picturesque grounds of the noted seaside resort August 28th and 29th. The Del Monte show will, we are informed, be an annual fixture for for the future. In this event, it is to be hoped that proper benching will be provided, heretofore the dogs were either tied up in the stalls or kept crated until taken into the ring. A change in this respect will be appreciated by spectators and exhibitors. The number of dogs present was about 110.

There were 125 dogs entered; of these 14 were absent. The Millbrae Kennels' entries were present but not taken in the ring—Mr. Halliwell was one of the judges. The entries in all classes rolled up the respectable total of 274. The cups, trophies and specials were numerous, handsome and valuable. The winners were presented with their prizes in the beautiful foyer of the hotel on Saturday evening. Judge Carroll Cook distributed the trophies and incidentally make a few apt and appropriate remarks that were received with applause by a large audience of society people, exhibitors and fanciers.

The dogs were fewer in number than at the January show, but class and quality made up for lack of numbers by a large margin. We doubt if there has ever been a Coast show with twice the number of dogs that will compare with last week's open air show at Del Monte in the standard of value and worth of the dogs shown.

The judges were: Phil. M. Wand of San Francisco, Greyhounds. Airedales and Irish Terriers. Mr. J. J. Lynn was originally billed for Irish Terriers and several other breeds, but could not fill the dates. G. S. Halliwell of San Mateo, Cal., Bulldogs, Boston Terriers and Fox Terriers. Geo. S. Thomas of Hamilton, Mass., all other breeds and unclassified specials. The awards were placed properly and to general satisfaction. Adverse criticism was, for once, an unknown quantity. It is true, many of the classes placed the entries easily, but at times it required some close figuring.

Most of the dogs shown were well known benchers. Of the new ones Valverde Kennels' Valverde Blue Belle and Valverde Vinet were one two in winners bitches. Belle is a handsome merle, Vinet is an Aufield Model—Gladys May puppy, and that means something good. Speaking of Collies, Valverde Veto went over Dictator and very properly, Veto was in condition to do some winning.

A number of new ones were put down in Bostons, Edgewood Meadow Boy a seal brindle, nicely marked, with a pleasing head, will do better when he is a little heavier. In the regular classes the honors went to the Eastern dogs, Wonderland Kennels Dazzler and Tortora came to the front for the specials. Highgate Kitty II won the special in Airedales. She is about the right sort in size, color, texture of jacket, head and expression.

Belfast Ignito is one of the best looking Irish Terrier puppies shown in years. If she lives up to present promise she will go in any company and win. Belle Baya a wire haired Fox Terrier bitch puppy out of Ch. Lucretia is another promising youngster. Halcyon Alexandre, Miss Jennie A. Crocker's recently acquired French Bulldog, seems to be the right sort, he has the hall-mark of quality to a great degree. Willamette Starlight made her California debut, she is a neatly turned, well furnished bitch, rather light in eye and could be a bit thinuer in lip and with less white on the nose.

Sporting dogs were rather few in numbers. Lady Kate took Rockline Flirt's measure—both were bred by T. P. McConnell of Victoria, B. C.

Cocker Spaniels were a good averaging all round lot, all familiar ring showers.

Bulldogs were five in number but all good. Bull Terriers were a good class, several young homebred dogs being of sterling merit. Fox Terriers were but half a dozen in number but all excellent specimens of the breed. The toy breeds were notable for quality, the Poms in particular, Togo, a Japanese Spaniel, is about the best we have seen for several years, barring the rather uneven dark coloring he is pretty near right.

W. E. Chute, superintended this show, Tom Blight and Charles Gilbert, the ring steward, did much to foster the smooth running of the show. Dr. K. O. Steers was the official veterinarian.

Awards.

Great Danes. Open and winners dogs—1 J. Snook's Ch Dick,

Special—Trophy for best, Ch Dick.

Russian Wolfhounds. Junior dogs—Absent C. Givernaud's Manifesto. Novice, limit, open (Pacific Coast bred), open (bred in the U. S.), open and winners dogs—1 Miss A. Wilkins' Tybo.

Specials—Trophy for best and cup for best P. C. bred, Tybo.

Greyhounds. Open and winners dogs—1 T. J. Cronin's Black Tralee.

Special—Trophy for best, Black Tralee.

American Foxhounds. Limit and open dogs (bred by exhibitor)—1 Hon. Carroll Cook's Prince Louis. Open dogs—1 Hon. Carroll Cook's Ch Ned. Winners dogs—1 Ch Ned, res. Prince Louis. Limit bitches—1 Hon. Carroll Cook's Kenwood Beauty. Open bitches—1 Hon. Carroll Cook's Ch Queenie. Winners bitches—1 Ch Queenie, res. Kenwood Beauty.

Special—Trophy for best, Ch. Queenie.

Pointers. Puppy dogs—1 J. W. Gibbs' Shorty Wolthers. Novice dogs—1 A. C. Mayers' Sandy Bob, 2 Shorty Wolthers. Open dogs—1 J. W. Gibbs' Mike Geary, absent C. Holman's Ch Joaquin. Winners dogs—1 Mike Geary, res Sandy Bob. Novice bitches—1 J.

Caldero's Goldie R. Limit bitches—1 A. C. Mayers' Kit, 2 Goldie R. Open bitches—1 Goldie R. Winners bitches—1 Kit, res. Goldie R.

Special—Trophy for best, Kit.

English Setters. Junior dogs—1 Huron Rock's Montecito Chuck. Novice dogs—1 Huron Rock's Montecito Bob. Limit dogs—1 Montecito Chuck. Open dogs and open bitches (Pacific Coast bred)—1 V. A. Kuehn's Ch Mallwyd Beau. Open dogs (bred in the U. S.)—Absent Ed. Weisbaum's Rex Rodfield. Open dogs (bred by exhibitor)—1 Montecito Chuck. Winners dogs—1 Ch Mallwyd Beau, res. Montecito Chuck. Puppy bitches—1 W. G. Mahon's Nona III, 2 F. W. Motlow's Mallwyd Trilby. Limit bitches—1 Geo. B. M. Gray's Rockline Flirt. Open bitches—1 Dr. L. W. Spriggs' Lady Kate, 2 Rockline Flirt, 3 Huron Rock's Sue Gladstone V. Open bitches (Pacific Coast bred)—1 Sue Gladstone V. Open bitches (bred by exhibitor)—1 Sue Gladstone V, absent Montecito Chuck. Winners bitches—1 Lady Kate, res Rockline Flirt.

Specials—Trophy for best, Lady Kate. Trophy for best of opposite sex, Ch. Mallwyd Beau.

Irish Setters. Limit dogs—Absent Geo. B. M. Gray's St. Lambert's Sport. Open dogs—1 Mrs. S. N. Hodgkins' Spuds, absent St. Lambert's Sport, R. H. Groves' Ch Halvern Jerry. Winners dogs—1 Spuds. Open bitches—1 Geo. B. M. Gray's St. Lambert's Norah, 2 T. L. Lewis' Goldie of Culbertson, absent R. H. Groves' St. Lambert's Phyllis. Winners bitches—1 St. Lambert's Norah, res. Goldie of Culbertson.

Special—Trophy for best, St. Lambert's Norah. Trophy for best of opposite sex, Spuds.

Gordon Setters. Puppy, limit, open and winners dogs—1 A. E. Drendell's Silkwood Rip. Puppy and limit bitches—absent, J. G. Foster Moale's Madame Butterfly.

Special—Trophy for best, Silkwood Rip.

Irish Water Spaniels. Puppy and winners dogs—1 Chas. Luhr's Duke L., 2 Otto Heins' Spot H. Junior limit, open, open (Pacific Coast bred), open (bred in the U. S.) and winners bitches—1 P. O'Ryan's Irish Nell II.

Special—Trophy for best, Irish Nell II.

Cocker Spaniels. Limit, open (Pacific Coast bred), open (bred by exhibitor) and winners dogs, black—1 D. P. Cresswell's Sir Saxon. Limit bitches, black—1 W. H. Mackay's Lassie Kathleen, 2 Mrs. L. M. Mack's Kentucky Bess. Open bitches (bred by exhibitor) black—1 W. H. Dennis' Twinkle II. Winners bitches, black—1 Twinkle II, res Lassie Kathleen. Junior dogs, parti-colored—1 V. J. Ruh's Beacon Light. Limit and open dogs, parti-colored—1 Wm. Blackwell's Gay Lad, 2 Beacon Light. Open dogs (bred in the U. S.)—1 Gay Lad. Junior dogs, any solid color except black—1 V. J. Ruh's Prince Cbap. Limit dogs, any solid color except black—1 Miss Kempff's Commodore Carrots, 2 Prince Chap. Open dogs (Pacific Coast bred)—1 Commodore Carrots. Open dogs (bred in the U. S.)—1 Commodore Carrots. Winners dogs, other than black—1 Gay Lad, res. Commodore Carrots. Junior bitches, parti-colored—1 W H. Dennis' Cymbeline. Novice, limit, open, open (bred in the U. S.), parti-colored bitches—1 Wm. Blackwell's Tolna. Open bitches (bred by exhibitor), open (Pacific Coast bred) parti-colored—1 Mrs. W. C. Ralston's Ch. Delverton Dolores. Veteran bitches, parti-colored—1 Mrs. W. C. Ralston's Paprika. Open bitches, any solid color except black—Absent, L. M. Whipple's Poinsetta, Kingsley N. Stevens' Brownland Babbie. Winners bitches, any solid color except black—1 Paprika, res, Ch Delverton Dolores.

Specials—Trophy for best black, Lassie Kathleen. Trophy for best of opposite sex, Sir Saxon. Trophy for best other than black, Paprika. Trophy for best of opposite sex, Gay Lad.

California Cocker Club specials—Best novice, Tolna Best limit, Gay Lad. Best open, Paprika.

Dachshundes. Open dogs—Absent, Mrs. Phil M. Wand's Ch. Dougie E. Limit and winners bitches—1 Alex. Kaiser's Gretcben.

Special—Trophy for best, Gretchen.

Collies. Open dogs (Pacific Coast hred), open (bred in the U. S.), open (bred by exhibitor), sable and white—1 Wm. Ellery's Valverde Veto. Open dogs, other than sable and white—1 Robert Wallace's Dictator. Winners dogs—1 Valverde Veto, res. Dictator. Puppy bitches, sable and white—1 Wm. Ellery's Valverde Vinet, 2 Princess Bonnie. Junior bitches, sable and white—1 Valverde Vinet. Novice bitches, sable and white—1 Valverde Vinet, 2 Bonnie Doon II. Limit bitches, sable and white—1 Bonnie Doon II. Open bitches, sable and white—1 Princess Bonnie. Open bitches, sable and white (Pacific Coast hred)—1 Bonnie Doon II. Limit and open bitches, other than sable and white—1 Wm. Ellery's Valverde Blue Belle. Open bitches, other than sable and white (Pacific Coast bred)—absent, Valverde Viola. Open bitches(bred in the U. S.)—absent, Valverde Viola. Open bitcbes, (bred by exhibitor)—1 Valverde Viola. Winners bitches—1 Valverde Blue Belle, res. Valverde Vinet.

Specials—Trophy for best, Valverde Venus. Trophy for best of opposite sex, Valverde Veto.

Bulldogs. Junior and limit dogs—1 G. H. Young's Ross Billy. Open dogs—1 A. H. Hayes Jr's Endcliffe Advance, 2 Ross Billy. Open dogs (bred in U. S.)—1 Ross Billy. Winners dogs—1 Endcliffe Advance, res. Ross Billy. Limit bitches—1 F. V. Gray's Leone Lilly. Open bitches—1 A. H. Hayes Jr's Endcliffe Valentia, 2 A. H. Hayes Jr's Saint Queenie, 3 Leone Lilly. Winners bitcnes—1 Endcliffe Valentia, res. Saint Queenie.

Specials—Trophy for best, Endcliffe Advance. Best of opposite sex, Endcliffe Valentia. Best American bred, Leone Lilly.

Airedale Terriers. Puppy dogs—1 Miss Evelyn Cunningham's Dunvegan Admiral, 2 Robert Nolan's Woodburn Dan, 3 Mrs. C. R. Armstrong's Hilo. Coronet junior dogs—1 Dunvegan Admiral, 2 J. B. Goodhue's Culbertson Laddie, 3 Hilo Coronet. Novice dogs 1 Dunvegan Admiral, 2 Culbertsou Laddie. Limit dogs—I Dunvegan Admiral. Open dogs—1 N. T. Messer's Ch Motor Dace, 2 Dunvegan Admiral. Open dogs (Pacific Coast bred)—1 Dunvegan Admiral. Winners dogs—1 Ch. Motor Dace, res. Dunvegan Admiral. Open bitches—1 C. B. Holmes' Highgate Kitty II, absent, C. B. Holmes' Endcliffe Radiance. Open bitches (bred in the U. S.)—1 Highgate Kitty II. Winners bitches—1 Highgate Kitty II.

Specials—Trophy for best, Highgate Kitty II. Best of opposite sex, Ch. Motor Dace.

Bull Terriers. Puppy dogs—1 M. Shepard's Edgecote Mike. Junior dogs—1 Mrs. G. H. Stoddard's Toughy, 2 Miss L. Easton's Wonderland Jim Woods, 3 J. Cawkwell's Silkwood Surprise. Open dogs (bred in the U. S. and Pacific Coast bred)—1 Toughy. Winners dogs—1 Toughy, res. Wonderland Jim Woods. Puppy bitches—1 J. M. Taft's Haymarket Princess, 2 J. J. Matheson's Cadenza Junior bitches—1 R. A. Roos' Willamette Starlight, 2 Haymarket Princess, 3 Mrs. E. G. Jackson's Venoma Duchess. Novice bitches—1 Haymarket Princess, 2 Venoma Duchess. Limit bitches (over 30 pounds)—1 Mrs. A. I. Mollis' Silkwood Tatoosh. Open bitches (over 30 pounds)—1 Willamette Starlight. Open bitches (Pacific Coast bred)—1 Willamette Starlight, 2 Silkwood Tatoosh, 3 Venoma Duchess. Open bitches (bred in the U. S.)—1 Venoma Duchess. Winners bitches—1 Willamette Starlight, res. Haymarket Princess.

Specials—Trophy for best, Willamette Starlight. Trophy for best of opposite sex, Toughy.

French Bulldogs. Novice dogs—1 Miss L. S. Stone's Bizange. Limit, open and winners dogs—1 Miss Jennie A. Crocker's Halcyon Alexandre, 2 Bizange. Puppy and novice bitches—absent, Miss L. Hopkins' Mimsi De Patin De La Mare. Limit and open bitches—1 Mrs. A. F. Rosenbeim's Beddyo, absent Mimsi, etc. Open bitches (Pacific Coast bred)—1 Reddyo, absent Mimsi, etc. Winners bitches—Withheld.

Special—Trophy for best, Halcyon Alexandre.

Boston Terriers. Puppy, junior and novice dogs—1 G. S. Thomas' Endcliffe Amazon. Limit dogs (17 and under 22 pounds)—1 F. F. Dole's Edgewood Meadow Boy, 2 G. S. Thomas' Endcliffe Briskra, 3 Miss Jennie A. Crocker's Hazelwood Statesman, absent, Mrs. P. E. Bowles' Kirk. Limit dogs (22 and under 28 pounds)—1 G. S. Thomas' Endcliffe Beeswing. Open dogs (17 and under 22 pounds)—1 Edgewood Meadow Boy, 2 Endcliffe Briskra, 3 Miss Jennie A. Crocker's Frisco Cinders, res Hazelwood Statesman, absent Kirk. Open dogs (22 and under 28 pounds)—1 Endcliffe Beeswing, absent J. W. Brooks' Ascot Jim. Winners dogs—1 Edgewood Meadow Boy, res Endcliffe Beeswing. Puppy bitches—1 G. S. Thomas' Endcliffe Claudia, absent Mrs. E. F. Morgan's Millbrae Allie. Novice bitches—1 G. S. Thomas' Endcliffe Volga, 2 F. F. Dole's Edgewood Peerless, absent Mrs. E. F. Morgan's Vixen III. Junior bitches—1 Endcliffe Volga. Limit bitches (12 and under 17 pounds)—1 G. S. Thomas' Endcliffe Claudia, 2 F. F. Dole's Edgewood Peerless. Limit bitches (17 and under 22 pounds)—1 G. S. Thomas' Endcliffe Torenia, 2 Edgewood Wilwinsome. Open bitches (12 and under 17 pounds)—1 Endcliffe Claudia. Open bitches (17 and under 22 pounds)—1 Endcliffe Toreina, 2 Miss Jennie A. Crocker's Clancy III. Winners bitches—1 Endcliffe Claudia, res Endcliffe Torenia.

Specials—Trophy for best, Miss Jennie A. Crocker's Ch. Endcliffe Tortora. Trophy for best dog, Miss Jennie A. Crocker's Ch Dick Dazzler. Trophy for best of opposite sex, Ch Endcliffe Tortora. Trophy for best novice, Endcliffe Volga.

Fox Terriers. (Smooth). Puppy dogs—1 W. W. Stettheimer's Tallac Glen. Open dogs—1 I. C. Ackerman's Humberstone Bang Up, absent W. W. Stettheimer's Ch Sahine Ringer. Winners dogs—1 Humherstone Bang Up, res Tallac Glen. Puppy bitches—1 W. W. Stettheimer's Tallac Evergreen. Limit hitches—absent Dog Haven's Mischief. Open bitches—I I. C. Ackerman's Darkie. Winners bitches—1 Tallac Evergreen, res Humberstone Darkie.

Fox Terriers (Wire Haired). Open and winners dogs—1 I. C. Ackerman's Humberstone Penance. Puppy, limit, open and winners bitches—1 J. L. Cunningham's Belle Baya. Open hitches (bred in U. S.)—absent, I. C. Ackerman's Ch Humberstone Hope.

Specials—Trophy for best, Humberstoue Bang Up. Trophy for hest of opposite sex, Tallac Evergreen. Trophy for best wire, Ch. Humberstone Penance. Trophy for best of opposite sex, Belle Baya.

American Fox Terrier Club cup for best smooth, Humberstone Bang Up. Cup for best wire, Ch. Humberstoue Penance. Cup for best American or Canadian bred novice bitch, Belle Baya.

Irish Terriers. Puppy, limit, open and winners dogs—1 Belfast Kennels' Belfast Ignito, absent Mrs. E. F. Morgan's Endcliffe Curate.

Special—Trophy for best, Belfast Ignito.

Scotch Terriers, Limit, open, open (bred in the U. S.), opeu (Pacific Coast bred) and winners—1 Mrs. Charles E. Maud's Denver Duncan.

Pomeranians Limit dogs (not exceeding 8 pouuds)—1 Mrs. Leon L. Roos' Major Toodle. Limit dogs (over 8 pounds)—absent, Mrs. N. J. Stewart's Chummie of Achray. Open dogs (not exceeding 8 pounds)—1 Mrs. I. C. Ackerman's Ch. Humberstone Masher. Winners dogs—1 Ch. Humberstone Masber, res. Major Toodle. Limit bitches (not exceeding 8 pounds)—1 Mrs. Leon L. Roos' Sister, 2 Mrs. N. J. Stewart's Imp of Achray. Open bitches (not exceeding 8 pounds)—1 Imp of Achray. Winners bitches—1 Sister, res. Imp of Achray.

Special—Trophy for best, Ch. Humberstone Masher.

English Toy Spaniels. Limit, open, open (Pacific Coast bred), open (bred in the U. S.), veteran and winners dogs—1 Miss Elsa Draper's Laddie.

Special—Trophy for best, Laddie.

Japanese Spaniels. Open and winners dogs—1 Mrs S. W. Heller's Togo.

Italian Greyhounds. Open and winners dogs—I Mrs. W. A. Deane's Ch. Duke II.

Special—Trophy for best, Ch. Duke II.

Variety Team Class—1 Miss Jennie A. Crocker's Ch. Dick Dazzler and Ch. Endcliffe Tortora, Frisco Cinders and Clancy III. (Boston Terriers).

Variety Brace Class—1 Ch Dick Dazzler and Ch. Endcliffe Tortora.

Ladies' Variety Class—1 Endcliffe Tortora, 2 Mrs. I. C. Ackerman's Ch Humberstone Masber (Pom), 3 Mrs. S. W. Heller's Togo (Japanese Spaniel).

Champion Variety Class—1 Ch Dick Dazzler, 2 Ch Humberstone Masher, 3 Geo. B. M. Gray's Ch St. Lambert's Norah (Irish Setter).

Sporting Variety Class—1 T. J. Cronin's Black Tralee (Greyhound), 2 V. A. Kuehn's Ch. Mallwyd Beau (English Setter), 3 Hon. Carroll Cook's Ch. Queenie (Am. Foxhound), res St. Lambert's Norah.

Non-Sporting Variety Class—1 A. H. Hayes Jr.'s Endcliffe Advance (Bulldog), 2 Ch Humberstone Masher, 3 Miss Elsa Draper's Laddie (Blenheim Spaniel), res Geo. H. Youug's Ross Billy.

Smooth Terrier Variety Class—1 Ch Endcliffe Tortora, 2 Robt. A. Roos' Willamette Starlight (Bull Terrier) 3 I. C. Ackerman's Humberstone Bang Up (Smooth Fox Terrier).

Rough Terrier Variety Class—1 I. C. Ackerman's Ch. Humberstone Penance (Wire Halred Fox Terrier) 2 J. L. Cunningham's Belle Baya (Wire haired Fox Terrier).

Monterey Challenge Cup—1 W. W. Stettheimer's Tallac Evergreen (Smooth Fox Terrier), res M. Shepard's Edgecote Mike (Bull Terrier).

The initial field trials this fall began at Berwick, N. D., August 25th aud ended the 27th, the fourth annual trials of the North Dakota Field Trial Club. There were 26 starters in the Derby and 35 starters in the All-Age. Nat Nesbitt judged. In the Members' Stake there were 9 starters, F. S. Hall aud W. W. Cooke judged.

W. D. Gilchrist of Alabama, landed for the three places in the Derby with: First, Ione Whitestone, white and tan English Setter bitch (Count Whitestone-Countess McKinley), Dr. S. S. Sanderson, owner. Second, Rosa, lemon and white Pointer bitch (——), W. E. Hotchkiss, owner. Third, Merlin's King's Rod, white, black and tan English Setter dog (King's Rod-Sayde Rodfield) A. L. Kelly owner.

D. G. Macdonell of Vancouver, B. C., won the All-Age with the Pointer Spot's Rip Rap, winner of the Pacific Coast Champion Stake at Bakersfield last January. Spot's Rip Rap is by Four Spot out of Queeu of Rip Rap. Mr. Macdonell handled his dog. Second, Dick Mills, orange and white English Setter dog (Cowley's Rodfield's Pride-Marian Mills). J. C. Shepard, owner. M. E. McMichael, handler. Tbird, Daisy Lemon, orange and white English Setter bitch (McHale-Queen of Hearts). Idlewilde Kennel, owners. M. E. McMichael, handler.

Tod Sloan, owned by Mr. Macdonell, Abbott's Jock owned in Vancouver, Spot's Bad Boy, Kil's Viola, owned by J. W. Considine, bandled by J. E. Lucas also started. Tbree braces only were taken into the second and final series.

The San Mateo Kennel Club open air one day show at the Crossways Polo Grounds on Wednesday was a success in many ways. There was a large attendance of visitors and everything passed off smoothly. Lack of space prevents a more extended notice until our next issue.

Champion Banjo a well known bench winning Bull Terrier joined the canine majority this week. He was owned by Athole McBean of San Francisco. Banjo made his debut in San Francisco seven or eight years ago. He was brought here from Australia by Steward James connected with one of the Australian liners. "Particulars not given" was all we ever could get of his pedigree. He won through all of his classes at his first show here, going over Teddy Roosevelt by a close margin. He was a light weight and a very good looker and shower but did not stay on top for long. As a producing sire he did not figure prominently.

Dr. T. B. Bodkin recently received from T. P. Mallone of the Flat Rock Country Club of North Carolina, a grandly bred Pointer bitch Tettenhall Faskally by Baron Faskally. She is in whelp to Black Rock II. Her field experience has so far been confined to Bob whites and she is said to be a splendid worker to the gun. If she works as good as she looks she is a dog worth having.

Jos. Mills, who with the Bartons, has a big band of hogs in pasture on the south side of Tulare lake, was a caller at the Hanford Sentinel office recently and stated that recently he was down on the south edge of the lake and saw a peculiar scene there. He says that the shore line is literally strewn with dead teal ducks, tbousands of them having died from some mysterious cause. Millions of live ones inhabit the lake, and they are as fat as butter, but what is the cause of the death of so many of them is the particular problem.

THE FARM

WORK STALLIONS AND MARES.

The best results in horse breeding come from the mating of work stallions with work mares. This is the opinion of A. S. Alexander, V. S., of the Wisconsin Experiment Station. Where large bands of mares are kept in idleness and are bred to stallions that never do a turn of work and all the while are highly fed, he says, there is an inherent tendeney to weakness in the progeney. Where, on the eontrary, a single mare is kept on the farm or there are but a few mares and these are used for work and breeding purposes, the results are most favorable and where the stallions, like the mares, also are worked or properly fed and thoroughly exereised every day of their lives the results will be most perfeet and profitable.

It is high time that wherever attempts are being made to produee heavy draft horses of fine type and eharaeter farmers should, as oeeasion offers, buy a purebred mare or two and in addition keep and work high-grade mares. The purebred mares, mated with worked purebred stallions will soon stoek the eountry with an adequate supply of pure-bred stallions and mares and then we will not have to buy at fancy priees the imported, pampered stallions that are often unsound and usually partially impotent while beeoming acclimated and then apt to stay so when kept fat and under-exereised. The heavy draft stallion is intended to beget eolts that shall grow up into work horses. If like produces like, we may most confidently expeet work horses from work sires and work mares; therefore the pressing necessity is that every draft stallion, and all other stallions, should have an adequate amount of work in harness or exercise to halter or in the eart to keep the entire body in as perfeet health as possible and then the eell produets of good health will be strong cells in the semen and that will mean strong progeny when union takes place with eorrespondingly strong, healthy germ eells of the female.

Everywhere the scrub, grade and mongrel stallions should be eastrated as soon as their plaees can be taken by virile, robust, potent, pure-bred, registered stallions. The prineiple of using registered stallions is sound in every particular and that being the case it is urgently required that sueh stallions should be relieved of the present eorreet and humiliating aecusation against their virility and potency. The remedy for the evil is in eommon sense, hygienie methods of stabling, feeding and management and the eonstant remembrance of the too little understood fact that as "like produces like," health, strength, pure-blood and work ability are absolutely necessary on the part of both stallion and mare if they are to produce progeny endowed with like attributes and the ability to work.

THE STORY OF THE WINDMILL.

It is interesting in this age of new ideas when steam and eleetricity are so much in evidence to notice how some of the older methods of obtaining power are still profitably employed. Take for example the use of the windmill. Nobody knows when this usefnl deviee was invented. It is rumored that the old Romans knew of its use and there is another story that the Saracens introduced it into Europe. But while the early history of the windmill is shrouded in uncertainty, we do know that it eame to play so important a part in the little Kingdom of Holland as to be eonsidered a national necessity in keeping that eouragcous nation out of the hands of the sea.

In Holland windmills are used to get rid of the water; in this country they are employed to produce it. Out on the great plains of Colorado, Kansas, Dakota, Nebraska and adjoining states, an ideal place for windmills, where the country lies flat and the winds sweep uninterrupted for miles, the landseape is fairly dotted with them. They are of all sizes and kinds, some tall and graeeful, others placed low and resembling huge paddle wheels with the lower half housed and the npper half catching the wind. A number of the large ones saw wood, grind eorn or do similar work, but the majority are engaged in pumping water for the needs of the stoek and the irrigation of the land from the exhaustless supply below the ground.

Of eourse, eaeh pump can bring up but a small amount of water at a stroke but it is astonishing to see how mueh this little aggregates in the course of a year. An estimate has recently been made of the eapaeity of a windmill running ten hours a day for six months. An average wheel, twelve feet in diameter, with the wind blowing sixteen miles an hour, is eapable of punping 1920 gallons an hour, 19,200 a day of ten hours, 576,000 eaeh month and 3,456,000 gallons in six months.

This is the work of only one windmill. Add to it the work of hundreds and thousands of others and realize the vast amount of water brought into use by this means. It is diffieult to appreeiate the signifieanee of this work and the value of the windmill as a faetor in the produetiveness of the land. This is followed by an inerease in values and the possibilities of larger population, heavier erops and better priees and more business and inereased earnings for the transporation lines. This is what the windmills are helping to do here in tbe west.—Exehange.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

JACK FOR SALE.

Weighs 1,000 pounds, is well turned, good looker and without blemish. Is a prompt worker. Apply to

S. B. WRIGHT,
Santa Rosa, Cal.

FIRST-CLASS MATINEE HORSE FOR SALE.

A handsome sorrel trotter, seven years old, sound, has been worked a mile in 2:18, is now being driven on the road and can show that he can step fast. Good disposition, good manners, level headed, fine roadster and a high-class horse for matinee driving or the road. Will be sold at a reasonable price. For further particulars address S. H. HOY, Winters, Cal.

HIGH-CLASS MARE FOR SALE.

Belle McKinney, record 2:25, trial 2:16, by McKinney 2:11¼; dam Mission Belle by St. Nicholas, second dam by Capt. Webster. St. Nicholas is by Sidney, sire of Memo, sire of the dam of Charley D. 2:06¼, the phenomenal pacer of 1908. This mare is 8 years old, a handsome bay, no marks, pure gaited trotter, and sound, and if you want a good one, come and bring your watch. Time her for yourself. This mare was worked three or four months by Mr. C. Whitehead, to whom I am pleased to refer as he will answer your questions.

In addition to this great mare I have over 20 head and among them I am confident you can find one that will answer your purpose both as to quality and price. Apply to or address,

JOHN ROWEN,
1347 E. South St., Stockton, Cal.

FOR SALE.

Beautiful bay pacing mare by Charles Derby; young, city broke and lady broke, with plenty of speed, size and style. Call at northwest corner Seminary Ave. and Orion Streets, Melrose. Address, R. F. D. No. 1, Box 233 A, Fruitvale, Cal.

WANTED.

A thoroughly experienced young man wishes a position as instructor at a riding academy, or with stock farm breaking and fitting polo ponies. Address, W. C., care of Breeder and Sportsman.

MONTEREY 2:09¼

and his son YOSEMITE (tr.) 2:16 1-4

Ellis' Improved
Hutton Patent
Checking Device

Absolutely the Greatest Controller on Earth for Road or Track Use.

Patented August 11, 1896. Patent No. 565,681.

Guranteed to stop your horse from Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting, or any other bad habits caused by bits or checking devices that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse at all times with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson, and nearly all the prominent Track and Road Drivers, and on fully 80 per cent of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The **genuine** have name, number and date of patent stamped on bit, also on leather parts, **and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers.** Our entire product hereafter will be sold to horsemen **only, at the same wholesale prices we formerly charged harness dealers.**

Price reduced under our new plan direct from us to the consumer to $5.00 for complete device, including back part of over-check. Delivered free to any part of the world when cash accompanies order.

$5 Due Oct. 1, 1908,

On Weanlings.

PACIFIC BREEDERS FUTURITY STAKES NO. 8 $7,250

FOR FOALS OF MARES COVERED IN 1907, Foals Born 1908.

To Trot or Pace at Two and Three Years Old.

ENTRIES CLOSED DECEMBER 2, 1907.

$4,250 for Trotting Foals. $1,750 for Pacing Foals. $800 to Nominators of Dams of Winners and $450 to Owners of Stallions.

Money Divided as Follows:

$3000 for Three-Year-Old Trotters.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Trot.
1250 for Two-Year-Old Trotters.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Trot.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1000 for Three-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Three-Year-Old Pace.
750 for Two-Year-Old Pacers.
200 for Nominator on whose entry is named the Dam of Winner of Two-Year-Old Pace.
100 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$250 IN SPECIAL PRIZES WAS PAID FOR STALLION OWNERS.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 2, 1907, when name, color, description of mare and stallion bred to must be given; $5 May 1, 1908; $5 October 1, 1908; $10 on Yearlings February 2, 1909; $10 on Two-Year-Olds February 1, 1910; $10 on Three-Year-Olds February 1, 1911.

Colts that start at two years old are not barred from starting again in the three-year-old divisions.

A CHANCE FOR THOSE WHO FAILED TO ENTER.

SUBSTITUTIONS—A few of the original nominators of Pacific Breeders Futurity Stakes for foals of 1908 have advised us that, because of barrenness of the mare or death of the foal, they wish to dispose of their entries. If you own one or more whose dams you failed to name when entries closed, by making the payments due any time on or before February 2, 1909, which covers payments to February 1, 1910, the few substitutions to be disposed of will be awarded in the order in which remittances are received. Prompt attention will secure for you this rich engagement.

Address all communications to the Secretary.

E. P. HEALD, President. **F. W. KELLEY, Secretary.**

SPAVIN CURE

As They Sometimes Are.

As "Save-the-Horse" Can Make Them.

"What Are the Critics Going To Do With This Evidence?"

Cedar Rapids, Ia., Aug. 5, 1908.

Troy Chemical Co., Binghamton, N. Y.:

Yours received; contents noted; thank you for advice.

Now in this city it would be well to sum up the cases. I will give you the following:

Joe Plotz	Bog Spavin	Cured	Ed. Konegsmark	Bone Spavin	Cured
Thos. Ryan	Bowed Tendon,	"	J. Cull	"	"
W. Zalesky	Curb	"	Mr. Merrill	"	"
J. Krapil	Bone Spavin	"	Frank Konegsmark,	"	"

The above are eight of the ten cases complete in their cures, not one dissatisfied with the remedy or with their guarantee. The other two: Mr. Lynch's horse is recovering rapidly, is gradually resting heels on the floor, lameness about gone. I am certain this case is a complete cure, and a more stubborn case I never saw. The Swift & Co. horse is improving as fast as can be expected. Pretty good record. What are the critics going to do with this evidence? All the parties live in this city and are reliable men. I can get you testimonials from any of the named gentlemen mentioned on the list. In closing will say that I thank you for past favors, prompt treatment in shipping, letters of advice, etc., and will ask you to send me ½ doz. 8-oz. cans Save-the-Horse Ointment, as my supply is low; charge and send bill.

PAUL F. DOLAN, Care Fire Dept.

Cassopolis, Mich., Aug. 5, 1908.

Enclosed find check for $5.00, for which please send me a bottle of "Save-the-Horse." The other bottle I bought of you I used on a driving horse with two bad jacks. It took the lameness out and I am well pleased.

H. D. BADGLEY.

Aurora, Ill., Aug. 6, 1908.

Troy Chemical Co., Binghamton, N. Y.:

Mr. T. J. Smith, a local blacksmith, tells me he has taken off two curbs from his pacer. Send me a bottle by express C. O. D., and I will give it a trial.

H. R. STECK, 71 Fox st.

Investigation will make clear the responsibility attached to the guarantee, leaving no question as to its meaning and reliability.

Write for copy, also invaluable booklet on all diseases and injuries causing lameness, and fac-simile letters from bankers, business men, prominent breeders and trainers the world over on every kind of lameness.

Facts and proofs sent upon application. Write to-day.

Permanently cures **Bone and Bog Spavin, Ringbone, Thoroughpin, Curb, Splint, Capped Hock, Wind Puff, broken down, bowed or strained tendon, or any case of lameness.** Horse can be worked as usual and with boots, as no harm will result from scalding of limb or destruction of hair.

$5.00 per bottle, with a written guarantee, as binding to protect you as the best legal talent could make it. At all druggists and dealers in United States and Canada, or sent express paid by

Campbell's EMOLLIC IODOFORM Gall Remedy

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merits for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep It in Their Stables.

PRICE—25c, 50c and $1.00.

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

TRAINING, BOARDING and SALE

Cor. Grove and Baker Sts., just at the Panhandle Entrance to Golden Gate Park. (Take Hayes, McAllister or Devisadero Street Cars.)

Best located and healthiest stable in San Francisco. Always a good roadster on hand for sale. Careful and experienced men to care for and exercise park roadsters and prepare horses for track use. Ladies can go and return to stable and not have their horses frightened by autos or cars.

There is a great deal of confusion regarding the different grasses commonly called bluegrass. Kentucky bluegrass or Poa pratensis is the common bluegrass with which our lawns are sown and back East forms part of the permaneut pastures. It is a perennial, spreading by underground stems and forming a compact sod. The flowering stems are a foot or two high, or even taller in moist situations and bear at the top a spreading pyramidal flower cluster. Canadian bluegrass or Poa compressa, resembles the Kentucky, but it is mueh less valuable and is seldom seen in tbis country. It differs in having a blue-green color, strongly flattened or two-edged stems and a small narrow flower cluster. The growth is not so tall. It spreads by creeping stems and forms a strong sod. It will grow on thinner, poorer soil than the Kentucky. Texas bluegrass or Poa arachnifera is a perennial, spreading by creeping underground stems forming a strong growth one to three feet high. It is a native of Texas and is cultivated throughout the south quite extensively. It is highly recommended for permanent pasture, especially during the winter months but is no good for high altitudes. The flower cluster at the top of the stem is dense and narrow, not spreading like Kentucky bluegrass. Meadow fescue—Festuca pratensis or Festuca elatior—is not a bluegrass but is often called English bluegrass. It is a native of Europe but is now extensively grown in the United States for meadow and for pasture. It is a valuable grass for botb purposes. Meadow fescue is also known under the name of Randall grass.

How much pork can be made from a pound of grain? Forty pigs weighing 140 pounds were put in a close pen. At first they received six pounds of grain millet and barley daily, with three pounds of sugar beets a head. After two weeks on this ration they gained thirteen pounds for each bushel of grain. The next two weeks the beets were increased to six pounds a head, with the same amount of grain and the grain was the same. The next two weeks they had all the beets they would eat, whieb amounted to twelve pounds a head, the grain ration remaining the same as before with similar results. Tben the beets were taken off and the grain increased to all they would eat, amounting to nine or ten pounds, the results being the same as when they were eating beets. Then they were given straight shelled corn for two weeks and the gain fell off to 9½ pounds to the bushel of grain.

If the cow gives bloody milk, as a result of an injury to the udder, the best treatment is to let nature effect a cure. Dry the cow off, and let the udder rest until the cow is fresh again.

Two Highly Bred Horses for Sale

Bay gelding, 4 years old, by Searchlight 2:03¾, dam Allie Sloper by Elector 2170, second dam Calypso, dam of 3 in the list, by Steinway.

Maylid, 3-year-old brown filly by Chas. Derby 2:20, dam May, dam of Bay Rum 2:25, by Anteeo, second dam by Capt. Webster, etc. Standard and registered. Both of the above animals are well broke to drive, not afraid of cars or autos, and bave natural speed, although never trained. Sound and all right. Will be sold at a bargain. For furtber particulars apply to the owner.

C. GABRIELSEN, 7th and Webster St., Oakland.

McKINNEY STALLION FOR SALE.

MONOCHROME 35777 by McKinney 8818, World's champion sire of speed, dam Hattie (dam of Monterey 2:09¼ and Montana 2:16) by Commodore Belmont 4340, etc. Monocbrome, foaled 1896, is a handsome bay stallion, stands 16 hands high, and is one of the best bred, best looking and fastest undeveloped sons of the great McKinney. He never was hitched to a sulky but has shown 2:20 speed any time when in working condition. He has very few colts, but has proven that he is a sire of speed, one of his daughters having stepped a mile in 2:15, half in 1:06, and two others in 2:30, with very little work. For further particulars address,

JOHN ROWEN, 1347 E. South St., Stockton, Cal.

SHORT-HORN SALE

at Woodland, Cal., Saturday, Sept. 12

We will offer tbe entire Enterprise Herd, including the herd bulls and sbow cattle of last season. We do not hesitate to say that this is the best bred and best individual collection ever assigned to public sale on the Coast.

36——BULLS——36

They are tbe kind and type the farmers and rangemen are looking for. They are Eastern bulls thoroughly acclimated, of serviceable age, large, strong, and thrifty. This lot was personally selected by Mr. Dunlap from prominent breeders in the East, tbis being his eighteenth shipmeut. Tbey have been fed no grain since reaching this coast, simply good pasture and alfalfa hay and will be presented in the best possible condition for future use. This is undoubtedly the best lot of range bulls ever offered on tbe Coast.

Sale to be held on the Enterprise Stock Farm, 4 miles south of Woodland. Busses will meet all trains at Woodland and lunch will be served on the farm. Sale to begin at 12:30 p. m. All are cordially invited to attend. Write for descriptive catalogue mentioning this paper. Catalogues ready Aug. 20tb.

Auctioneer, H. P. EAKLE, Jr.
G. P. Bellows, Maryville, Mo. R. M. DUNLAP.

T. B. Gibson, Woodland, Cal., will sell the preceding day, Sept. 11th. Parties wisbing can attend both sales.

BEAUTIFUL BELVEDERE!

—THE—

Hotel Belvedere

Under New Ownersbip and New Management.

First-class in every respect

Most Charming Spot on the BAY SHORES.

Directly opposite San Francisco, on the Marin shore, only thirty minutes' ride on the ferry boats from the foot of Market street; witbin easy walking distance from the ferry slip at Tiburon; with busses, carriages and launches for those who prefer to ride.

From its broad verandas is presented an entrancing view of the bay, with beautiful Belvedere in the foreground, taking in Corinthian Island, Angel Island, Raccoon Straits and Alcatraz, with San Francisco in the distance.

Belvedere is less subject to fog than San Francisco, and the cove affords unrivaled attractions in the way of boating, bathing and fishing. There is probably no spot so accessible and so near any large city in the world that compares with it in natural advantages of climate, magnificent scenery and opportunities for aquatic sports of all kinds.

The service and table is unexcelled and no pains spared to add to the comfort and enjoyment of the guests of the hotel.

Rates reasonable.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. O. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: I have been using **Quinn's Ointment** for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For corbs, splints, spavins, windpuffs and all bunches it has no equal."

Price $1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

Ithaca Guns

Extra close shooting, with even distribution and good penetration, are essential qualities that a gun must possess for the very best success at the traps.

Ithaca Guns have a world-wide reputation for their superior shooting qualities.

"Bob" Edwards, the veteran barrel borer, who first bored Ithaca Guns in 1883, is still at it—his experience at your command.

Every Ithaca Gun is guaranteed in every part—hammerless guns are fitted with three bolts and coil main springs, which are guaranteed forever against breakage, weakness or lost tension.

Send for Art Catalog and special prices; 18 grades $17.75 net to $300.00 list.

Remington

91 YEARS

of experience back the Remington system of gun making. Starting in 1816 with the old flint locks, Remingtons have developed to the faultless hammerless double gun and the modern autoloader or pump for those who prefer the latest type. Remington hammerless double guns are famous for their simple mechanism and wearing and shooting qualities. Made in all grades from $25 to $750 list. The Remington Autoloading Shotgun lists at $40 and is an ideal gun for wild fowl.

The Remington autoloading gun won the Grand American Handicap in 1907 and 1908.

SIX DAYS ONLY

The Greatest of All Light Harness Horse Sales.

Correspondence Concerning Consignments Solicited. Address

Fasig-Tipton Co., Madison Square Garden, New York.

The 1907 Old Glory was

A Record Breaker

It beat all records since 1901, when the Daly and Spier dispersals were made, despite the "panic" the country had just experienced. Here are the figures:

1902—	935 head averaged....	$389.86
1903—	941 head averaged....	350.11
1904—	987 head averaged....	454.08
1905—	1,014 head averaged....	417.61
1906—	1,013 head averaged....	419.57
1907—	891 head averaged....	465.60

On Thanksgiving Day, 1907, 117 head sold for $151,550, an average of $1,295.

During the first six days of the Sale about 700 head sold for an average of $550.

The average of the entire sale was cut down by the lack of quality offered on the closing days of the sale.

This Year's Sale will be a Six-Day Event Only.

We Expect to Set a New World's Record in 1908

EIGHT WASHINGTON McKINNEYS and five other high class horses by Diablo, Geo. Washington, Zombro, Lynwood W. and Kinney Lou, the thirteen comprising the entire stable of roadsters, matinee and race horses owned by Mr. Frank J. Kilpatrick of this city, have been consigned by that gentleman to the fall sale to be held by Fred H. Chase & Co., at 478 Valencia street on Monday evening, October 26th. This consignment is beyond question the best lot of trotters and pacers ever sent to a sale on this coast from one stable. The Washington McKinneys are the eight by that stallion which Mr. Kilpatrick gave records to on July 30th this year at the Breeders meeting at Santa Rosa, a world's record by the way. They are all individually and collectively handsome, well broke and well mannered horses. Their records were obtained after very limited training and there is not one but can reduce its mark materially. They are all well bred and fit for road work or to race. Some great prospects are among them. The pacer by Diablo, the trotting stallion by Zombro, the fast mare by Geo. Washington, the splendid black gelding by Lynwood W. and the beautiful two-year-old by Kinney Lou, all of which are more fully described in the advertisement which appears in this issue, are among the best prospects for race horses ever offered by auction anywhere. Mr. Kilpatrick will go to New York in November and expects to take Washington McKinney with him to exhibit at the National Horse Show and then to place him in the stud in that State. He has decided therefore to sell all his horses in training, and on his return to purchase a half dozen or more unmarked sons and daughters of Washington McKinney, train and give them records. Mr. Kilpatrick's idea in regard to giving his magnificent stallion the opportunity to prove that he is a great progenitor of speed is a most laudable one and the value of all the get of the horse cannot help being enhanced by such action. Those who buy the Washington McKinneys now will find that they have gotten in on the ground floor as it were, as the values of these horses is certain to rise in the future. All Mr. Kilpatrick's horses to be sold are now at the Park Amateur Club stables near the Stadium, and can be seen every day in the week, and will be shown to harness. This is one of the greatest opportunities ever offered buyers to get really choice goods in the horse line at their own prices. We shall have more to say of these h orses individually in future issues of the Breeder and Sportsman. Catalogues giving full tabulated pedigrees and descriptions will soon be printed. It is worth a trip to the stables where the horses are kept to see Washington McKinney, as handsome a horse as human eyes ever looked on.

EMILY W. 2:11½ BY JAMES MADISON, is the subject of our front page illustration this week. This handsome bay mare, bred by J. B. Haggin, and owned by Fred E. Ward, of Los Angeles, made her fourth win of the season at Salem, Oregon, last Tuesday and now has four first moneys and $3,100 to her credit out of five starts this season. Her first race this year was at Santa Rosa, where she started in the 2:24 class trot for a purse of $1,000, but by an unfortunate break at the start of the first heat, was distanced. Her next start was at Oakland in the 2:20 trot for a purse of $2,000, which she won in four heats, the fastest of which was 2:15½. As but 60 per cent of the purses at Oakland were paid, her winnings in this race were but $600. The Breeders meeting at Chico was the place of her next start and she took The California Stake of $2,000 for 2:20 class trotters in straight heats, the time being 2:13, 2:13 and 2:11½. In this race she beat Lady Inez, May T. and Monicrat. The $2,000 stake for 2:20 class trotters offered by the State Fair Association at Sacramento was the occasion of her next appearance. She met May T., Wenja, Lady Inez and Lady Washington in this race, but it only took three heats to declare Emily W. winner of first money, the time being 2:13½, 2:15 and 2:15¼ over a very slow track. She was then sent to Salem, Oregon, where she won in straight heats last Tuesday, the fastest in 2:12½. She is now winner of $3,100 with several engagements to fill further on.

Emily W. is a bay mare, foaled in 1901. She was sired by James Madison 2:17¾, son of Anteeo 2:16½, and her dam is Cornelia Rose by Cornelius 11335, (son of Nutwood 600 and a mare by Echo), second dam A Rose by The Moor 870, third dam by Clark Chief 89. The breeding of Emily W. is in the strongest of lines all through, Anteeo, James Madison, Nutwood, The Moor and Clark Chief all being noted as sires of trotters and pacers with great endurance. When Emily W.'s racing days are over she should be a great mare for breeding purposes, and her produce should be not only fast but game if she is bred to any good trotting bred stallion. She looks to be quite capable of a mile in 2:10 this year under circumstances that are favorable. Mr. Ward, her trainer, has certainly handled the mare well, and in fact he has the reputation of doing well with all his horses and is considered one of the best reinsmen on the Pacific Coast.

IN HIS FIRST RACE that high priced colt The Harvester, sold at the Midwinter Horse Auction in New York last January for $9,000, has made good. He started for the first time in his life at Syracuse last Monday in a race for $2,000 offered for three-year-old trotters. He won in straight heats in 2:10¼ and 2:11¼, defeating such colts as Electric Todd, The Laird, Thistle Donne, Zalem and Silver Baron. The Harvester now holds the world's record for the fastest mile ever made by a colt in his first race, and for the fastest two heats ever trotted in a first race. It is a pleasure to recount the success of this young stallion for several reasons. He is one of the best bred trotters living as he is by Walnut Hall 2:08¼, a futurity winner, first dam Notelet by Moko 24457, second dam Tablet by Cuyler 100, third dam Prefix by Pancoast 1439, fourth dam Galatea by Messenger Duroc, fifth dam Hyacinth by Volunteer 55, sixth dam Clara, the famous old dam of Dexter by American Star 14. There was never a more intensely trotting bred colt than The Harvester. He carries the blood of Electioneer, Geo. Wilkes, Strathmore, Mambrino Chief, Messenger Duroc and Volunteer, all sons of the great progenitor of trotters, Hambletonian 10. He was bred at Walnut Hall Farm, Kentucky, and was purchased at the January sale by Mr. Uhlein, of Milwaukee, who still owns him. The colt has been trained by Ed. Geers, who has liked him from the first. The Harvester is entered in nearly $50,000 worth of stakes, including the Kentucky Futurity, to be trotted this year, and it looks as if the stock farms will have to "send forth the best they breed" to beat him.

THE OLD GLORY SALE is announced in this issue. California should send two or three car loads to this big auction. Read the advertisement.

Subscribe for The Breeder and Sportsman.

FEW PEOPLE REALIZE the immensity, the beauty or the grandeur of San Francisco's great play ground, Golden Gate Park. Since the stadium was built, with its three-quarter mile track, sixty feet wide, many lovers of light harness horses have become acquainted with this park as they never were before, and those who drive through its many beautiful roads and view the various spots that have been made scenes of beauty and pleasure, noting the excellent care that is taken of them for the benefit of the public, have long realized that Superintendent John McLaren is doing a work there that cannot be appreciated too highly. Sitting in the office of this paper the other day several gentlemen were discussing this stadium track which is now the most perfectly kept track in America, and the consensus of opinion was that Superintendent McLaren is a wonder. While he knows the name of every plant and tree that grows in the park, he also knows how and where and when it should be planted to get the best results, and in landscape gardening he has no superiors. Without previous knowledge of keeping a speed track for trotting horses in order, he bas learned how to keep the stadium track, so that in fair weather it always has a surface like velvet and is the fastest and safest speedway in any country. There is nothing like it in any public park in the world.

C. A. HARRISON, who had to give up a prosperous hotel business in Seattle recently on account of ill health, is in San Francisco for a few days. Mr. Harrison says the fair and race meeting at Seattle last week was a big success and the racing as good as any ever seen on a half mile track. There was a big attendance, as many as ten thousand people in one day, there being no betting permitted and no liquor sold on the grounds. Mr. Harrison says the fair association is well managed and the directors are not only enthusiastic but energetic, and the people appreciate their efforts to give a first class fair.

SECRETARY GOCHER holds that Bervaldo, winner of the first preliminary in the big handicap did not get a record as the race was only for the privilege of starting in the actual race in which Bervaldo got no money. Many others claim, however, that Bervaldo earned a record just the same as any horse that wins a heat and is afterwards distanced, is penalized with a record. The Board of Review will have to decide the matter.

A Los Angeles report of last week says: Walter Maben took a day off and slipped down to Riverside and bought the five-year-old mare Eugenia B., a full sister to Zomalta, that has been racing so well for Will Durfee down the Grand Circuit this summer. She took a record of 2:28 flat this spring, but has shown quarters better than 34 seconds and looks and acts like a high-class trotter. She is the same color and conformation as her sister and has very much the same way of going. E. F. Binder, from whom Maben bought her, has two or three other likely prospects, but will not part with them.

J. H. Williams of Los Angeles is training a six-year-old for Dr. Wills of that city that gives promise of being a good one. She is a very good looking trotter and a full sister to Bonnie Russell 2:10½. She was turned out for three years, as the doctor had a number of others and had no use for her, but this summer she was taken up. At first she showed no gait of any kind and even after she began to trot a little she would begin to mix and get all tangled up, but lately with a slight change of shoeing she squared away and last week went a mile with ease in 2:25, the last half in 1:10½.

TWO DAYS RACING AT SANTA ROSA.

October 9th and 10th are the dates set for the fall meeting of the Sonoma County Driving Club at Santa Rosa. At a meeting of the club held last Monday evening there was a good attendance and much enthusiasm manifested in the arrangements for the meeting.

Dr. J. J. Summerfield was in the chair and H. H. Elliott acted as Secretary. The committee on race program, composed of Dr. Summerfield, W. E. Healey and L. L. Cannon, reported the following:

Friday, October 9th—First event, 2:25 pace, purse $100.

Second event, road race, owners to drive; winner of each heat to go to the barn.

Third event, two-year-old trotting stakes, purse $500.

Saturday, October 10th—First event, stallion race for local stallions, purse $100. Winner of each heat goes to barn.

Second event, three-year-old trotting stakes, purse $500.

Third event, ladies' saddle horse race.

Fourth event, free-for-all, purse $100.

4 THE BREEDER AND SPORTSMAN [Saturday, September 19, 1908.

AT CHARTER OAK PARK.

There was three days of harness racing at the big fair held this year at Charter Oak Park, Hartford, Connecticut. The harness races were held on Monday, Tuesday and Wednesday, 7th, 8th and 9th, and on tbe opening day 62,000 people paid admission. The races were the big attraction of the first three days, and while no betting was permitted the grandstands were filled until the last heats were decided. The historical Charter Oak $10,000 stake for 2:09 class trotters was decided on tbe three heat plan and was won by Hamburg Belle in the fastest three heat race ever trotted, the time being 2:05, 2:06 and 2:04¾. On the second day The Eel won the famous Nutmeg pacing stake of $5,000 for 2:07 class pacers. Copa de Oro was a starter and got fourth money. On the third and last day Will Durfee won both of the only two races on the program. The first he won with William C. the brown pacer by Civilization, driving the race for Tommy Murphy, the horse's regular trainer, who was ill. Durfee then won the 2:10 class trot with his McKinney stallion Del Coronado, having a great contest in three of the heats with Ed Geers' mare Teasel, and beating her at the finish by a close margin eacb time. Del Coronado lost the second beat of this race Del Coronado made a break at the wire and was placed last by the judges. The McKinney gelding El Milagro won this heat. Tbe results of the three days races were as follows:

2:18 class trotting, purse $1,200:

Nelcyone, blk m, by Wilkes (F. Howell)	1	1	3	2	1
Composer, b g, (C. Lasell)	2	3	1	1	2
Prince Kohl, br h. (A. Essery)	4	2	2	3	3
Northerman, blk. b, (W. McCarthy)	3	d			

Time—2:14¼, 2:14½, 2:14½, 2:13¾, 2:15.

2:09 class trotting. Charter Oak stake, in three races, purse $10,000, divided as follows: $1,500, $500, $300, $200 for first, second, third and fourth respectively in each race, $2,500 to horse winning greatest number of races, wbo is also declared winner of "The Charter Oak."

Hamburg Belle, br. m., by Axwortby (W. Andrews)	1	1	1

Judge Lee, gr. h. (Lasell)	2	2	6
Raffles, blk. g. (Burgess)	3	3	2
Nancy Royce, blk. m. (McCarthy)	7	4	3
Hawkins, blk. g. (Cox)	4	6	4
Morn, ch. g. (Howell)	5	5	5
Kid McGregor. b. h. (Geers)	6	7	7

Time—2:12, 2:11, 2:10½.

The Nutmeg, 2:07 class, pacing, purse $5,000:

The Eel, gr. h., by Gambolier (McEwen)	1	1	1
Maj. Brino, blk. g. (Richie)	2	2	2
George Gano, b. h. (Cox)	3	3	4
Copa de Oro, b. h. (Durfee)	8	4	3
Fred D., ro. g. (Thomas)	4	5	5
Maj. Mallow, b. g. (Mallow)	5	6	6
Jim Daly, b. g. (Clark)	6	8	8
Auto, ch. g. (McLane)	7	7	7

Time—2:05, 2:05¼, 2:05.

2:09 class, pacing, purse $1,000:

William C., br. g., by Civilization (W. Durfee)	2	1	1	3	1
Charley Hal, b. g. by Star Hal (Snow)	1	2	2	1	3
Milton S. Jr., ch. g. (W. Cox)	4	3	3	2	2
Lady of Honor, ch. m. (A. Thomas)	3	4	4	4	4
Lauretta, b. m. (J. McKinney)	5	d			

Time—2:08¼, 2:08¼, 2:09¾, 2:10½, 2:10.

2:10 class trotting, purse $1,200:

Dei Coronado, br h. by MciKnney (Durfee)	1	7	1	1
El Milagro, br. g. by McKinney (Lasell)	3	1	4	3
Teasel, ch. m. (Geers)	2	3	2	2
Zaza, blk. m. (C. Payne)	4	2	5	4
Chime Bells, b. m. (H. Titer)	8	4	3	7
Axtellay, b. m. (A. Thomas)	7	6	6	5
May Earl, b. m. (M. Bowman)	6	5	7	6
Bell Bird, b. m. (R. Kester)	5	d		

Time—2:10¼, 2:11¾, 2:10, 2:10½.

Al. McDonald is still at the Santa Rosa track with a string of a dozen trotters and pacers, the majority of them colts, however, that will soon be turned out for a run at pasture for a few months. The pacer Rey McGregor, owned by F. Gommet, is a very fast horse, and McDonald says can show a quarter in 30 seconds any time. He is by Rey Direct out of a mare by Robert McGregor. The two-year-old trotter by Cresceus 2:02¼ out of Silpan by Silver Bow, second dam Kitty Fox by Pancoast, owned by Geo. H. Fox of Clements, is getting along nicely. He is a fiue looker and will be trained with the idea of starting him in the colt stakes next year, as he is well entered.

It is stated that the proposed big fair and race meeting announced to be held at Los Angeles this fali is off, but one will be given next spring, wheu the southern metropolis is full of tourists.

Drink Jackson's Napa Soda.

LOS ANGELES MATINEE.

The revival of matinee racing by the Los Angeles Driving Club for the fall and winter season was begun last Saturday, when the first meet was held. Quite a large crowd, probahly 3,000 persons, attested the popularity of the sport by attending, and excellent sport amply rewarded them.

A card of eight events was presented and was featured by the first race for the W. A. Clark Jr., challenge cup. This cup is valued at $500 and is a handsome design. It is offered for 2:30 trotters owned and driven by members of the club, and must be won three times by the same member before it becomes personal property. By the terms of gift it is not necessary for tbe member to win it in successive years or with the same horse. It also is provided that if any horse racing for the cup win a heat in better than 2:20¼ or demonstrate his ability to do so, that heat shall count as a "leg" on the cup and the horse shall be barred from further contest for the trophy.

Following is a summary of the results:

3:00 trot, mile dash:

Senator Tizrah, b. h. (J. W. Nickerson)	1
Clay, b. g. (L. P. Keller)	2
Royal Vasto, b. c. (W. N. Tiffany)	3

Time—2:39.

2:30 pace, two in tbree:

Lottie Baldwin, b. m. (O. O. Jonas)	1	1
Rex, b. g. (H. Moore)	2	2
Bud B., b. g. (L. L. Bricker)	3	4
Maj. Clifford, g. g. (R. J. Prescott)	5	3
Grey Bess, g. m. (W. C. Went)	4	5

Time—2:26, 2:24.

2:20 pace and trot, two in three:

Artesia (p) b. h. (O. O. Jonas)	1	1
Billy W. (p) b g. (J. H. Snowden)	2	4
Shecam (p) (J. Levy)	4	2
Glennetta (t) (L. P. Keller)	3	3

Time—2:21, 2:19.

Free-for-all pace, two in three:

Josh S., b. g. (Sam Watkins)	1	1
Isabelle, ch. m. (P. B. Lowe)	2	2

Time—2:25, 2:15.

2:40 pace, two in three:

Josephine, b. m. (R. Bourland)	1	1
Daisy, blk. m. (C. G. Willis)	3	2
Scrappy Nell, b. m. (J. W. Snowden)	2	4
Dan Wilkes, b. g. (Geo. Aiken)	6	3
Silveretta, g. m. (W. A. Glasscock)	4	5
Mandie, pto. m. (E. Deffebach)	5	6

Time—2:32, 2.33.

2:30 trot, Clark cup, two in three:

Lou H., b. m. (W. A. Glasscock)	2	1	1
Gen. Garcia, b. g. (J. S. McGaugh)	1	2	2

Time—2:30½, 2:22½, 2:32½.

2:40 trot, two-in-three:

Lady Vasto, b. m. (W. N. Tiffany)	1	1
Ancona, b. m. (P. B. Lowe)	2	2
Ranchella, br. m.	3	3

Time—2:40, 2:39.

Mule race, mile dash, slowest to win:

Sigh (J. W. Nickerson)	1
Happy Jack (H. Moore)	2
Happy Hooligan (A. Moore)	3

Above represents reverse of order of finish.

RACING AT RIVERSIDE.

A fair sized crowd saw some good racing at Riverside on Labor Day.

The first event, the 2:35 mixed, was won easily in two straight heats by H. J. Eigenbrod's Monk in 2:30 and 2:37. It was a one-horse race for Monk, the real struggle coming over second place. F. A. Ramsey winning it with Tom McKinney and J. F. Backstrand third with Bueno B.

The second event, the 2:25 pace, was won by G. W. Bonnell's Andrew Carnegie, a San Bernardino horse, in 2:31 and 2:30. George Parker took second bonors with Zenobia the first heat; Peter Beatty's Leap Year Wilkes third and A. B. Miller's Emerald fourth. The second heat Emerald won second place, Zenobia third and Leap Year Wilkes fourth.

The three-minute event was the only race requiring three heats to settle. Watt Maxim's Cammey L. won the first heat in 2:44; Joe Clapp's Ira, driven by Peter Beatty, a close second, and C. S. Wilson's Polly third. Ira, however, won tbe next two heats from Cammey L. in 2:46 and 2:45, Polly being scratched.

The free-for-all proved to be a pretty race both heats, although only two horses, W. L. Scott's Kid Wilkes and Joe Kelly's Bolock, of San Bernardino, were entered. Kid Wilkes proved to be the steadier of the two and took both beats, time 2:28 for both miles.

The last event, the 2:40 mixed, saw two pretty heats, though they were won in succession by J. T. Garner's Coupon in 2:39 and 2:41. S. R. McDougall's Pete pressed Coupon hard both heats, taking second honors, and G. M. Carrigan's Prince Valentine, but for a tendency to go off his feet, was a feature in the fun, taking third place both times. Dr. Ramsey's Laura K. finished fourth.

Gold watches were awarded for first prize in each event, gold watch chains for second place and driving whips, donated by Dick Welsh, for third place.

H. G. Stanley officiated as starter; Frank Ogden, Jack Thompson and Dr. Fletcher as judges; W. A. Hayt, James Cuthbertson, Joe Clapp and Geo. West as timers, and W. L. Scott as marshal.

FIFTY MILES WITHIN FIVE HOURS.

The following from the Los Angeles Times of the 11th inst., is as neat a bit of pleasantry over the result of a race as we bave seen for some time:

A race against time took place at Agricultural Park yesterday, in which the horse won and incidentally put a "crimp" into the pocket books of all the horsemen and know-it-alls that they will remember for several moons.

At an auction, early in the week, Sam Watkins bought a broncho for $37.50 and after driving him about town for a day or two came to the conclusion that he had got hold of an exceptionally game little plug that could sift along at a four-minute gait for an indefinite time, with little or no exertion.

Watkins incidentally mentioned his conclusion to his partner Joshua Snowden and a group of horsemen and was laughed at. After listening for some time to their criticisms on the horse, and personal remarks as to his knowledge of horses and judgment of pace, Watkins offered to bet that he could drive the pony fifty miles in 5 hours. In less than no time he had $250 bet against $500, the race to take place at Agricultural Park, beginning at noon.

"Fire Plug" as the raw candidate for turf honors was named, was taken to the track and put in Fred Ward's stable and, at the imminent risk of foundering him, was given three square meals, the first in his life. When the big measure of oats was put in his manger, he did not recognize them, never having seen oats on a bill of fare. He paid no attention to the oats, but at last, overcome by the pangs of hunger, and accustomed to eating any thing he found in a manger, tackled the grain and after the first mouthful would not have lifted his nose if the stable had caught fire.

Yesterday, after a good night's rest in a big box stall, and bedded to his knees, he was hooked to a bike speed cart, which was almost as much of a surprise to bim as the board and lodging had been, for he had all his life— he is now somewhere between twelve and fourteen—pulled a heavy peddler's wagon loaded generally with junk. Finally, after a good deal of trouble, a harness was found that could be made to fit him, for he is only about the size of an ordinary two-year-old, being less than 14¼ hands and won't weigh 700 pounds. He was taken out on the track, where tbe judges were waiting to start him on his long journey.

Three uninterested horsemen were agreed upon as a committee with the power to order him off the track as soon as he showed signs of exhaustion or distress and a little more money was bet on the result at tbe prevailing odds of 2 to 1 on the watch.

Tbere was no scoring, Fire Plug starting from the wire at a ten-mile-an-bour gait, and the first mile was covered in 5:54. He held that steady jog the whole distance, except every three or four miles after the first ten he was given a few mouthfuls of water, or his mouth was sponged out, and he finished the distance apparently as fresh as when he started in four hours and fifty-one-minutes, winning by nine minutes. He was not nearly as much distressed as a trotter after three heats in a race, and could have gone ten or fifteen miles farther at tbe same gait.

At no time in tbe race was Fire Plug as much as touched with the whip, nor did he require Watkins to urge him either by the bit or voice. In fact, the driver was mucb more tired, by the incessant jog-jog of the cart, with no rest for his back and unable to change his position, than the horse was.

After the race was over, Fire Plug was taken to the stable and given the care of a grand circuit stake winner, and after being cooled out—though he had not turned a hair—and "done up" he was put in a box stall with a warm bran mash for supper. He acted as if he thought the millennium had come. To-day he will be back on the street, pulling a light runabout, the most-talked-of horse at the park, for his days of dragging Meyer Rosenstein's junk wagon all over the country are passed.

All the horsemen who did not know of the match till after it was over, are congratulating themselves, as they all acknowledge they would have taken the "time" end of it for whatever money they had in their clotbes, especially with Watkins backing the horse, for he has tbe reputation of being the most consistent loser in Los Angeles. This, it is claimed, is the first bet he has won since eighteen hundred and something. Summary:

Fifty miles to barness within five hours:

Fire Plug, r. g. (breeding mislaid) (Watkins)	1
"Time"	2

Time—4:51:00¼.

W. A. Clark Jr., has decided to seud Miss Georgia 2:08½ to the Lexington sale next month, and will ship Bon Voyage back to California when Will Durfee returns. Bon Voyage will probably make the seasou of 1909 at Sacramento.

Walter Mahen has quite a large string of horses in training at Los Angeles. Eugene Binder recently sent him three that he purchased two years ago from C. W. Williams of Galesburg, Ill. They are the four-year-old stallion Worth Wbile by Allerton, and two three-year-old fillies by Expedition.

J. S. Stewart of Los Angeles, has his two-year-old pacing futurity winner Easter D. 2:13½ back at Los Angeles, and the filly is said to be looking even better than she did wheu she won her race at Chico. Mr. Stewart bas a black two-year-old by Zombro out of a mare by Titus that can pace around 2:20.

EVERETT, WASH., RACES.

Meeting September 1st to 5th.

2:25 pace, purse $500:
Geraldine, br. m. by Zombro (Wallace) 1 1 1
The Indian, b. h. by Hidalgo (Hoag) 2 2 2
Del Kisbar, br. g., by Del Norte (Erwin) 3 4 3
Louladi, blk m hy Del Norte-Saffrona (Prior) . 5 3 4
Pilot McGregor, blk s. by E. S.-Lady McGregor (Chappell) 4 5 3
Esta B., blk. m. by Alexis (Wallace) .... 4 dr
Time—2:15½, 2:17, 2:17.

Pace or trot, two-year-olds, owned in Snohomish or Skagit county, hobbles barred, 2 in 3, purse $300:
Harry T., b. s. by Zombro J. M. Miller) 2 1 1
Rainbow, b. s. by Zombro (Deo) 1 2 2
Blackberry, blk. s. hy Dewberry (Hawk) 3 3 3
Buster Brown, b s. by Meteor (W. Miller) .. 4 4 4
Time—2:51½, 2:44¾, 2:47¼.

2:40 trot, purse $500:
Bert Arondale, b. g. by Sidney Dillon-Oakley Russell (Ramage) 1 1 4 5 1
Laura W., b. m. by Charleston-Nellie F. (McGuire) 2 2 1 1 2
Frisby, b. m. by Ojason (Clark) 4 3 2 4 3
Ping Pong, ch. s. by Pactolus-by Phallas (Hoag) 3 5 3 2 4
Zepherine br m, by Autrim (Hogoboom) 5 4 5 3 5
Time—2:24½, 2:21¾, 2:24¼, 2:27½, 2:28½.

Trot or pace, horses without records, owned in Snohomish or Whatcom counties, purse $200:
Atlantic Panic, s. s., by Panic Jr (Williams) 1 1
Marguerite, blk. m. by Zombro (Deo) 2 2
Independence Girl by Meteor (W. Miller) 3 3
Tommy Lake, br. g by King Alexis (Rouse) 4 4
Time—2:36, 2:33½.

2:19 trot, purse $600:
General H., br g, by Combine (Hoag) 1 1 2 1
Daybreak, b g, by Tenrace (McGuire) 4 3 1 2
Henry Gray, g g, by Zombro (Hartnagle) .. 2 2 3 3
Deception, b g, hy Babe Chapman (Payne) . 3 4 4 4
Time—2:23½, 2:20½, 2:20¼, 2:25½

2:14 pace, purse $500:
Bonnie M., b. m. by Mohegan-Caynse Mollie (Hogoboom) 1 1 1
San Lucas Maid, s. m. by Dictatus (Prior) 2 2 2
Estabel, h. m. by Norwood (Erwin) 4 3 3
Prince Charles, ch. h. by Chas Derby (J.S. Miller) .... 3 dr
Bonnie Riley, g. m. hy Riley Medium (Phillips) .... d
Time—2:18½, 2:16¼, 2:17¼.

2:30 trot, purse $500:
Bramford Boy, b. g. hy Johnny Wallace (Chappell) 1 1 1
Dr McKinney, blk g by Capt McKinney (Deo) 2 2 2
Time—2:26¼, 2:26½, 2:26.

2:20 pace, purse $500:
The Indian, b. s. by Hidalgo (Hoag) 1 1 1
Bushnell King, h. s. by Norval King (Chappell) 2 2 2
Earlwood, br. s. hy Medium (Anguise) 7 4 3
Atlantic Panic, s.s. by Panic Jr (Ramage) 5 6 4
Nellie Bishop, b m, hy Argot Wilkes (Erwin) 4 7 5
Zanthus, b. s. hy Zombro (Phillips) 8 5 6
San Lucas Maid ch m, by Dictatus (J. Erwin) 3 3 d
Diabul, ch. g. by Diablo (Prior) .... 6 8 d
Time—2:17¼, 2:21, 2:19½.

2.15 trot, purse $600:
Lady W., hy King Alexis (Hogoboom) 3 1 1 1
Irene, b. m., by Martin's Florida (Prior) .. 6 2 2 3
Johnny K. g. g. (F. C. Erwin) 4 5 3 2
Van Norte, blk g, by Del Norte (McGuire) . 2 6 4 4
Henry Gray, g. g. by Zombro (Hartnagle) .. 5 4 5 5
Crylia Jones, blk. g. by Capt McKinney (Payne-Jas. Erwin) 7 7 6 6
Elma O., blk. m. by Red Byron (Chappell) 1 3 d
Red Skin, b. g. by Red Cloud (Lindsey) .. 8 d
Time—2:20, 2:18½, 2:20, 2:23¼.

2:08 pace, purse $1,000:
Iowa Boy, ch. g. by Greenhush King (Chappell) 1 1 1
General Heuertus, b. s. by Alexis (Hogohoom) . 2 2 4
Bonnie M., br. m., by Mohegan (Jas. Erwin) .. 3 3 2
Tommy Gratton, b. g. by Grattan-Bird (McGuire) 4 4 3
Time—2:14¾, 2:16, 2:16.

MARSHFIELD, OR., RACES.

August 26th to 29th.

Special trot, purse $150:
Belle N., h. m. by Bonnie Direct (Starr) 1 1
Tyler B., h. s. by Bay Bird (Norton) 2 2
Time—2:36½, 2:37.

Special pace, purse $150:
Wahke, b. s. hy Prince Deserter (Slagle) 1 1
Mack N., blk. g. by McKinney (Starr) 2 2
Time—2:37, 2:33.

Special trot, purse $125:
Warrior Gordon, ch. s. hy Lafayette (Starr) 1 1
Dolly McKinney, by Washington McKinney (Clark) 2 2
Time—3:03, 3:17.

Special pace, purse $150:
Mack N., blk. g. hy McKinney (Norton) 1 1
Wahke, b. s. by Prince Deserter (Slagle) 2 2
Time—2:30, 2:26.

Special trot, purse $200:
Wahke, b. s. by Prince Deserter (Slagle) 1 1
Tyler B., h. s. by Bay Bird (Reckel) 2 2
Time—2:40, 2:41.

Special trot, purse $200:
Belle N., b. m. by Bonnie Direct (Starr) 1 1 1
Zomoak, b. g. by Zombro (Norton) 2 2 2
Time—2:37, 2:33, 2:38.

RACES AT TANFORAN.

The races held by the San Francisco Driving Club at Tanforan Park last Saturday resulted as follows:

First Race:
Dividend (F. Cousani) 2 1 1
Dick (John Nolan) 1 2 3
Steave D. (G. Tassi) 3 3 2
Black (J. W. Danz) .... 4 d
Time—2:45, 2:44, 2:44.

Second Race:
Margarett (G. Tassi) 2 1 1
Durfee Mack (John Nolan) 1 2 2
Butcher Town Belle (H Danz) 3 4 3
Dandy (J. Bairenther) 5 3 4
Babe (J. W. Danz) .... 4 d
Time—2:22, 2:22, 2:24.

Third Race:
George Perry (G. Glannini) 1 1
Little Dick (Luke Marisch) 2 2
Walter Wilkes (C. L. Becker) 3 4
Kitty D. (A. Hoffman) 4 3
Albert S. (A. H. Scofield) 5 6
Toppy (G. E. Erlin) 6 5
Time—2:15, 2:14.

Fourth Race:
W. J. (Martin Ford) 3 1 1
Hickman Girl (W. C. Rice) 1 2 2
Lucero (J Campodonico) 2 3 4
Queen Eagle (Charles Buckley) 4 4 3
Time—2:22, 2:16, 2:26.

Fifth Race:
Major Cook (J. J. Butler) 3 1 1
Deroll (George Kitto) 1 2 2
Charley J. (C. Lecari) 2 4 4
Neko (F. E. Burton) 4 3 3
Time—2:18, 2:18, 2:21.

Sixth Race:
Schley B. (C. Becker) 3 1 1
Ed. Ray (C. Fulkerson) 1 2 2
Dynamite (H. Schottler) 2 3 3
Babe Boswell (S. Benson) .... 4 d
Time—2:25, 2:23, 2:24.

Seventh Race:
Moffat D. (G. E. Erlan) 1
Billy Murry (F. E. Burton) 2
Hunkey Dory (J. V. Galindo) 3
Docus D. (H. Boyle) 4
Mouk (Fred Clotere) 5
Babe (J. Danz) 6
No time.

The officers of the day were: Starter, W. J. Kenney; judges, William Todt, Bert Edwards and F. J. Pastene; timers, Joe McTigue, F. Consani, G. Linduer; marshal, Fred Lauterwasser Jr.

THE ZOO.

H. J. Kline gives the following interesting description of The Zoo 2:12, a son of Zombro, that is owned up in Manitoba, aud has been raced on tbe Great Western Circuit:

"That trottiug stallion, The Zoo, is what the trainer would call a 'good' borse. He stands ahout 15.2, is huilt a lot like a draft borse and is put up on stout legs with a long body, just the sort of animal a lot of good trainers say is the ouly kiud that will do to take to the races. He has as much substance as any trotter in training and a great deal more than the most of them have. It may, and again it may not, be agaiust him, but he has something about his way of going that is a heap like tbat of Sterliug McKinuey, a trotter who has more pure speed than any other horse I ever saw perform. I can uot subscribe to the hreaking habit of The Zoo, but, with all due regard for his gentlemanly driver, I am sure that habit cau be eliminated. Iu his race at Hamline he settled to business after the third heat. Had he been hrought to the race worked down to steadiness there might have been a different story to tell about that classic event of the Northwest. No one knows what he will show from this time on, hut I am confident he will develop into a sensational trotter, with opportunity, and add a good deal to the fame of the Zombro tribe. He is owned by Dr. Tweed and A. E. Wilson of Kilaruey, Manitoba, two of the finest gentlemen in the harness-racing game and for their sake as well as because I like a trotter that is the real thing I hope The Zoo does hetter than I expect him to do. If he does he will make all the turf historians and race reporters sit up and take notice. Candidly I think he has in him the material of which champiou trotters are made."

The Zoo is out of Beulah, an own sister to Chehalis 2:04¼, Del Norte 2:08 etc., by Altamont.

Hedgewood Boy and Lady Maud C. full sister and brother, have each been beaten but once this year aud Citation did the trick in each race.

SPOHN'S.

The word "Spohn's" is an abridgment of Spohn's Distemper Cure. It is the result of our eight years of test, trial, and adoption, by the owners, handlers and breeders of horses of this marvelous compound. It simplifies the four-word name. It shows how popular this great remedy has become. The Spohn Medical Company, Goshen, Ind., the manufacturers, nearly two years ago adopted this short form of name, and since then several unprincipled firms have studiously copied the ads., attempting to foist on the public remedies that are not to be compared to "Spohn's." There can be but one explanation of this stealing act. They find that "Spohn's" is selling everywhere, and is the most popular horse remedy of the day. The sales are largest, the territory widest, the merits of the remedy greatest, and hence the great name it has earned, "Spohn's."

THE INTERNATIONAL PRIZE.

There will be much interest in the great race to be known as the International Prize, which is to be trotted at St. Petersburg, Russia, next February. This will probably be the fairest "speed contest" ever devised, as the horses are not to race against one another, but against time, and each horse is to have two trials. The first advertisement of this race which has been sent out is as follows:

The International Prize, 32,200 roubles, for stallions colts, mares and fillies horn not later than 1905.
